The extreme limitation of available channels presents a serious problem, particularly in the early stages of television service, because only 7 channels are now developed from a technical standpoint. At first these 7 channels will probably be utilized in cities having large population and areas. The remaining 12 channels which have been reserved and which are not yet developed technically, will be useful for smaller communities as well as for additional stations in the larger communities. The experience gained in the technical phases of the earlier use of the 7 channels which have been developed to date should be utilized to advantage for the service to be rendered on the remaining 12 channels.

It is necessary that television service on a nation-wide scale be operated ultimately on a competitive basis. At present, by reason of the high cost of operation, it appears that cities of less than 100,000 population may have difficulty in supporting one television station, and that in cities of population less than 1,000,000 it may be difficult to operate two television stations on a profitable basis if reliance for financial support must be placed upon advertising as the only source of income.

---

[1] A careful study of the available data furnished the Committee by various sources would indicate that even under the most favorable conditions as to geographical location and distribution of population, supported as it is by government subsidy, the British public has not shown itself to be particularly responsive in its acceptance of television performance by the British Broadcasting Corporation. Under the standards of the art prescribed by the British Broadcasting Corporation, optimistic estimates indicate that in a population of approximately 14,000,000 not more than 14,000 receivers have been sold.

Thus with the combination of scarcity of channels and the estimated high cost of operating the transmitting stations which will render television program service to the public, it appears highly essential that the industry be encouraged to undertake further practical research leading toward the development of methods which will permit more stations to be accommodated in the limited space in the radio frequency spectrum as well as facilitating lower costs in the production of good quality program service to the public.

(5) *Future Progress*

In the opinion of the Committee, practical television service to the public on a nation-wide scale cannot be expected for some time in the future. Much development remains to be accomplished from both a technical and organization standpoint. Facilities for the distribution of programs from one center to another have yet to be developed, financed and constructed. Much has yet to be learned concerning program production as well as financing and reducing the cost thereof. Primarily because of the large cost of construction of transmitting stations as well as the high cost of operation thereof in a national competitive system, it is expected that for the next few years the largest metropolitan centers will be the only centers receiving television service and that the smaller centers of population will not have transmitting service available for several years. The cost of receivers will be high during the first years of development, and this in turn may have an additional retarding effect upon the construction of television transmitting stations, particularly in smaller communities.

This high cost of service as well as the relatively high cost of television receivers may be a retarding factor in the development of television as a service on a national scale. It may also act as a deterrent upon early mass production of receivers at low cost. In the opinion of the Committee, these natural economic factors of delay are not undesirable because they will enable a more sound development ultimately of an improved television service to the public, particularly when mass production of receivers at lower cost may become more of a reality than a hopeful probability.

In view of the foregoing, it seems safe to conclude that the establishment of a television service on a national scale will be a process of gradual development, beginning progressively with the larger cities and, over a period of years, finally becoming available to smaller communities.

(6) *Financing*

The financing of television requires courageous pioneering efforts on the part of American investors. Extreme caution should be taken to avoid investment in unproven enterprises. There are many organizations which now have sound basic plans for the development of certain phases of the television art. There may be others which are not equipped from the standpoint of either basic facilities or organization, but which will nevertheless attempt to secure financial support from the investing public. Such enterprises are doomed to ultimate failure. Therefore, good business acumen should be exercised by all concerned and exhaustive scrutiny of every television financial prospectus should be undertaken to insure adequate protection of the investing public.

(7) *Action Necessary*

The Committee believes that if television service on a national scale is to become a practical reality, positive and active steps must be taken to promote its development. It should not be permitted to die in the laboratory merely because more research is necessary. The public interest will not properly be served by those who attempt to minimize the possibilities of television.

In other countries the development of television has been fostered by governmental assistance. In the United States private industry has shouldered all the burden of such development. Credit is due the inventive genius and organization of private American enterprise for the scientific achievement of making available for the public of the United States this remarkable development of television in its present state. It is imperative, therefore, that our Government take no action which retards logical progress in the further development of television as a service in the interest of the public. In fact, the Communications Act requires that the Commission encourage the larger and more effective use of radio in the public interest.

While there are many problems yet to be solved and many obstacles yet to be overcome, the Committee sees no reason for an assumption that these problems will not be solved and that these obstacles cannot be overcome by encouraging inventive genius organized and financed by private American enterprise to proceed with the second of the three broad stages of television development.

Private industry has already spent millions in developing the technical aspects of television to the point that this new art is more than a dream of inventive genius. From a scientific standpoint, television is now practical, even though its quality is susceptible of improvement.

It appears useless to expect private enterprise to continue to pour additional capital in the further development of the technical aspects of this new art, unless there can be foreseen some hope of an eventual return on the investment. Consequently the time is fast arriving when it will become necessary to ascertain public reaction to the service potentialities of television. This can be accomplished only by limited public participation through the purchase of receivers, manufactured in the earlier stages of technical development.

Part of the industry has agreed upon certain standards in order that all manufacturers may participate to a greater degree by sharing the responsibility for the initial quality of television without placing too much of the burden of the choice upon the public.

The Television Committee sees no harm in this process, provided the public is made fully aware of facts regarding the potentialities of obsolescence of the television receivers they purchase. However, it should be understood thoroughly that the Federal Communications Commission in complying with the law must be prepared to grant licenses for experimental television stations when a showing is made that public interest will best be served by the granting of such licenses.

FACTORS INVOLVED IN STANDARDIZATION

The Committee is of the opinion that inherent in the consideration of any technical standards are the following important factors. Other important factors are present in the television problem, but these are not related directly to the subjects referred to the Television Committee.

A. *Premature acceptance* of technical standards tending to retard the attainment of the ultimate refinements which the public may need and demand in television.

B. *Flexibility,* so as to protect the public investment in receivers while accomplishing desired and necessary technical improvements in transmission service.

C. *Scarcity of channels* for television transmission resulting in extreme limitation of the number of stations which may be licensed in any specified area.

D. *Patents.*

E. *Cost of Receivers.*

F. *Interference.*

A. *Premature Acceptance of Standards*

The danger involved in the premature adoption of any standards during the early stages of any technical development is one of retarding scientific progress. This is particularly true if such standards are inherently inflexible.

Undoubtedly the public will desire to avail itself of future technical improvements as rapidly as inventive genius makes them possible. Thus, it would not be in the public interest for the Commission to specify rigid transmission requirements at an early stage of technical development, because to do so might result in a retardation of such development.

On the other hand, a wide diversification in transmitter performance, particularly in a single locality, will place upon the purchasing public the entire burden of selection of the best system for future expansion. This obviously has disadvantages and likewise may result in severe retardation of development. Nevertheless, mere technical progress which outmodes equipment is not ordinarily an inhibition to the American public because the public recognizes that in the long run it benefits by technical advances.

However, the situation in television is made more acute than in the ordinary case by reason of the fact that the public invests its individual capital in receivers and has a right to receive information concerning the probabilities of future changes in the transmitting system upon which the usefulness of receivers is dependent. Therefore, adoption of transmitter performance specifications by the Commission may encourage the public to purchase receivers in the expectation that changes in Commission specifications of transmitter performance would not be forthcoming if such changes had the effect of rendering receivers in current use unworkable. Hence, it is incumbent upon the Commission to keep the public informed of the intentions of the Commission with respect to television performance specifications.

In this connection it appears advantageous for the Commission to adopt a policy which requires future applicants for television transmitters at least to equal accomplished practical performance as to quality, and in addition thereto to prove that any method for obtaining the performance proposed in the application, differing from that generally accepted previously thereto, would be in the public interest. This procedure would protect the public in so far as is practicable, and at the same time would permit technical progress to be made toward the ultimate objective without outmoding completely receivers which may be in current use in the future.

There have been 19 channels reserved for television in the frequency range between 30,000 kilocycles and 300,000 kilocycles. Seven of these channels are grouped in the frequency band below 150,000 kilocycles. The remaining 12 are grouped in the frequency band above 150,000 kilocycles. Considerable progress has been made in the lower frequency band containing the 7 channels, but very little progress has been made in the upper band containing the 12 channels. Most of the designs for receivers which will appear soon on the market are capable of receiving only the lower frequency band and some are capable of receiving only 5 of the 7 channels in this frequency band, and some have even less capabilities than this. It is the opinion of the Committee that much more information is required with respect to this upper frequency band and that it is entirely premature for anyone at this time to adopt or authorize standards for either transmitters or receivers in this upper band.

B. *Flexibility*

The Committee is of the opinion that ultimately it will be desirable in the interest of the public for the Commission and the industry to adhere to broad standards of minimum performance for television transmitters so that every receiver, by whomever manufactured, will be capable of receiving any licensed television transmitter within range wherever located in the United States.

The Committee is further of the opinion that a television system operated under such standards should be sufficiently flexible to permit radical improvements in the technical quality of television transmission without rendering inoperative receivers in current use by the public.

The standards as proposed by the Radio Manufacturers Association do not contain a maximum degree of flexibility, and while they permit a limited degree of such flexibility the Committee is of the opinion that additional research may prove advantageous. Naturally there are advantages as well as disadvantages in the current standards proposed by the Radio Manufacturers Association. Nevertheless, there may be additional advantages in furthering investigation of developments now under way before impetus is given to the sale of receivers on a large scale. This investigation, however, should not preclude the initial sale of receivers which will aid in the development of television through partial public participation therein. Such participation is necessary to a limited extent in order to secure reaction of the public as to the technical quality of television in practical operation. However, it should be obvious that a responsibility rests upon the manufacturers selling early receivers to undertake a service to insure against radical and rapid obsolescence of the receiver purchased by the public.

C. *Scarcity of Channels*

From the standpoint of the Commission, the greatest need for technical development in television appears to be the discovery of any method which will permit all of the inherent improvements in quality and at the same time conserve the radio frequency spectrum from which all types of services, including television, must be allotted separated channels. In the frequency spectrum between 30,000 kilocycles and 300,000 kilocycles, there have been reserved 19 television channels occupying a total frequency band of 114,000 kilocycles, which is 38 per cent of the total useful radio spectrum available today for all radio services, including national defense, aircraft, ships, safety of life and preservation of property and transoceanic communications. At the present state of development 1 television channel requires a frequency band width of 6000 kilocycles, which is 600 times greater than that required for ordinary sound broadcasting as we know it today, and which is 5½ times greater than the entire standard broadcast band accommodating nearly 800 broadcast stations. There is a potential dearth of channels for television broadcasting stations in any given area because of the great width of frequency space required for each television transmission. Thus, potentially at least, it now appears that the number of television broadcasting stations in any given section of the country will be limited.

This situation will affect the licensing policy of the future and this is a factor of importance because of the effect of television upon existing industries and the social consequences involved in such effects.

The present proposed standards, while taking into consideration some of the factors involved in an "ether conservation" policy, do not appear to exhaust the possibilities of developments tending toward such conservation. Therefore, until all available information has been exhausted, it would appear to be premature for the Commission to commit itself at this time to specifying rigid transmitter performance requirements, particularly when such action would have the implication, in the minds of the public, that no changes would be required in the event of developments leading to a better solution of the allocation problem.

The Committee is none too optimistic of the practicability of obtaining substantial gains in this direction in spite of the fact that there are certain proponents claiming a practical solution of this channel question. The present conception of natural physical laws indicates that only a definite amount of information can be transmitted in a given time within a specified frequency band. Until it can be proved that the conception of this natural physical law is erroneous, the Commission cannot expect an appreciable gain in the number of channels available for television broadcasting. However, any gain would be helpful and the industry and inventive genius should be encouraged to continue efforts in research.

D. *Patents*

Inherent in the adoption of any standards of performance requirements is the question of patents. No one manufacturer seems to be in a position to place into service a complete radio television system without infringing issued or pending patents.

The patent situation is chaotic and no aggregate estimate can be made of the ultimate holder of any essential patent to a complete radio television system. However, all patentees or potential claimants to essential patents appear to recognize the necessity of coping with the situation in a common sense manner either by universal cross-licensing or by some other method. Such a cross-licensing policy might insure a desirable degree of competition in the manufacturing field provided the industry as a whole will recognize the economic impracticality of excessive accumulative royalty percentages.

The patent question is not a matter directly within the scope of the Commission's jurisdiction and requires the attention and cooperation of other agencies of the Government. Nevertheless, transmitter performance requirements which insure broad patent bases are preferable to those which narrow the base to a few patents, provided proper quality and improvements will be possible.

Therefore, before the Commission prescribes any minimum performance requirements for transmitters licensed by it, the Commission should assure itself that the resultant patent base is as broad as practicable and at the same time is consistent with good quality technical transmission to the public. However, the Commission should not permit the patent situation to become an obstacle in its encouragement of further technical developments in television. Also, the Commission should utilize caution to the end that its actions may not favor unnecessarily the patents of one person over those of another.

E. *Cost of Receivers*

Before television can become a service to the public on any scale, it is essential that the distribution of receivers in the hands of the public be general. This objective cannot be accomplished if television receivers are too costly. Consequently any standards which may ultimately be adopted should, if possible, permit simplification in the design and manufacture of receivers in order that the cost may be reduced as far as practicable. While the standards proposed by the Radio Manufacturers Association represent probably the accumulation of some of the best methods to obtain the highest practical quality consistent with the technical development existing today, the cost of manufacturing the receivers and the resulting sales prices are in the higher brackets, thus precluding purchase by large portions of the public. While mass production may reduce these costs somewhat, there is inherent in the standards this high-cost factor as compared to regular broadcast receivers of today. It is to be expected that after the initial test of television as a service on a limited scale, the manufacturing laboratories of the country will concentrate energies toward simplification and lowering cost, at the same time maintaining quality in the received picture.

In view of the fluidity and recent rapidity in technical development, it is perhaps fortunate that the initial costs of television receivers are relatively high because in so far as numbers of the public are concerned, any changes or radical improvements in transmission of television may be accomplished without inconvenience to large portions of the public generally.

F. *Interference*

One of the problems which must be faced in the development of television as a practical service to the public is the effect of electrical interference from such devices as electric razors, refrigerators, X-ray machines, diathermy machines, automobile ignition, etc. Under certain conditions these devices may have the effect of blurring or blotting out the received television picture. Insufficient information has been accumulated to date regarding the practical effects of this type of interference in actual service under various conditions. Not much is known of the public reaction to such effects in so far as is concerned the acceptability of television as a service. It is possible that one of the remedies may be a change in the design of receivers as well as the method of transmission of television. On the other hand, there may be other remedies which will become practical. Therefore, until television has been operated as a practical service to a greater extent than at present, it seems premature for the Commission to fix rigidly any requirements for transmitter performance which might have the implication of permanence.

RECOMMENDATIONS

Based upon the considerations discussed herein, the Television Committee recommends as follows:

1. That the Federal Communications Commission neither approve nor disapprove the standards proposed by the Radio Manufacturers Association. This recommendation is made first because the Commission by law is required to grant licenses to applicants for television stations who prove that the granting of such applications would be in the public interest, and, second, because it appears undesirable to take any action which discourages private enterprise or which decreases the incentive for undertaking research to effect further improvements.

The Committee suggests that in taking this action the public be informed that in failing to approve the standards the Commission does not believe the proposed standards to be objectionable as a phase of a rapidly developing service. The public should also be informed that the Commission desires to be free to prescribe better performance for the transmitters it may license in the future when and if such improvements are proved to be in the interest of the public.

Also, in making this recommendation the Committee suggests that it be made clear that the proposed standards do not at this time appear to be suitable for the 12 undeveloped higher frequency channels reserved for television.

2. That the Commission require future applicants for television station licenses proposing external transmitter performance differing from those previously in general use, to prove that such proposed performance not only equals the established quality but also will be in the public interest in view of the changed situation thus created.

3. That the Commission adopt a policy of cooperation with the industry as a whole and that it immediately arrange a procedure by which it can keep abreast of current developments in the technical phases of television and at the same time acquaint the industry with the problems inherent in the current allocation phases of television. For this purpose it is suggested that the Commission authorize its Television Committee to undertake further studies of the development of television as it progresses and to report from time to time to the Commission the status of such development, as well as to recommend any action which may appear appropriate at the time.

4. That the Commission announce that it will not hold a formal public hearing on the subject of proposed standards at this time. This recommendation is made because it does not appear that constructive results will be obtained at this early stage of development. After experimental operation has proceeded to the point where public reaction to television development can be gauged more accurately, a more opportune time for such a public hearing might then be presented.

Legal

NEW LEGISLATION

CONGRESS

S. 2466 (Senator Sheppard, D.-Texas) COMMUNICATIONS ACT—Same as H. R. 5508. To amend the Communications Act of 1934 by adding Section 307½, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network programs. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

Florida:

H. 1493 (Griner) AMUSEMENT TAX—SCHOOL SUPPORT—Imposing certain privilege taxes for the operation of places of amusement, and for the relief and benefit of free schools. Referred to Finance and Taxation Committee.

S. 809 (Dame) AMUSEMENT TAX—Provides for distribution of any moneys which may be allocated to Citrus County as result of enactment of any amusement tax; that such moneys shall be expended on and for completion of certain projects herein mentioned. Passed Senate 5-19.

S. 827 (Rose) COOPERATIVES—AGRICULTURAL—Amending Chapter 7388, Acts 1917, as amended relative to the creation and incorporation of associations not for profit to conduct public fairs and expositions for the development of agricultural, horticultural, livestock and other resources. Referred to Finance and Taxation Committee.

Massachusetts:

H. 2224 (Reported on H. 337) EMPLOYMENT OFFICES—Providing for the regulation of private employment offices. Referred to Ways and Means Committee.

S. 525 (Reported on H. 648) ADVERTISING—Provides regulations for signs and advertising devices not now subject to regulation.

Pennsylvania:

H. 415 (Bretherick) TAX—PHONOGRAPH MACHINES—Imposing a $10 annual tax on all coin operated phonographs or machines for reproducing music from records. Referred to Ways and Means Committee. Reported with amendment 5-16.

FCC PROCEDURE CHANGE

The FCC has amended Section 12.80(f) of the Rules of Practice and Procedure designed to clarify the procedure on unopposed cases.

Section 12.80 (f) now provides:

"(f) *Proposed decision of Commission.* The Commission will thereafter enter its proposed report of findings of fact and conclusions."

The Proviso to be added to the end of Section 12.80(f), is as follows:

"Provided, however, that if the Proposed Findings of Fact and Conclusions filed by the parties present no substantial conflict, and the Commission is in accord with the ultimate conclusions proposed, it will, if it deems such action will best conduce to the proper dispatch of business and to the ends of justice, issue a final order with or without Findings of Fact and Conclusions in lieu of issuing its Proposed Findings of Fact and Conclusions in accordance with this paragraph."

EXPERIMENTAL LICENSES

The FCC has sent the following announcement to licensees of all stations in the experimental service:

The new rules governing the experimental service which were adopted today, are effective immediately in so far as all classes of stations in the broadcast service and all applicants for new experimental stations are concerned.

Existing licensees of general and special experimental stations, that is, all classes of experimental stations now authorized, except those operating in the broadcast service, are requested to submit applications for renewal by July 1, 1939. These applications would normally be filed on August 1, 1939, since they involve existing licenses which expire on October 1, 1939. In order to properly classify the existing experimental stations which desire renewal licenses under the new classes of experimental stations provided in the new experimental rules, applicants are requested to file with their application for renewal of license, the complete experimental report in conformity with the new experimental rules and regulations (Rules 52.05 or 53.05). Submission of the report by July 1 is necessary in order that the Commission may have sufficient time to study the research program of individual stations with a view to reclassification of the station in accordance with the new plan. In this connection, the Commission after study of individual applications for renewal will specify the class of experimental station, i.e., Class 1 or Class 2 as the case may be, in renewal licenses which may be granted.

For the information of those who are authorized to operate experimentally under the provisions of former Rule 320 as a station in a service recognized in the Commission's plan of allocation, individual instructions will be given as to the process of conversion of these experimental licenses to regular service licenses. The Rules and Regulations of the Commission governing individual services are being modified to include the frequencies allocated by Order 19 as rapidly as possible. The revised rules governing stations in the fixed service have already been issued and it is expected that revised rules governing aviation and maritime services will be issued in ample time to permit the conversion of experimental licenses to regular service before October 1, 1939.

FCC BROADCAST MEASUREMENTS

During the month of April, experts of the Federal Communications Commission made measurements of 716 stations with 48 stations not measured.

Of this number the maximum deviation within 0-10 cycles was recorded for 648 stations, while 58 stations showed a maximum deviation of 11-25 cycles, with 10 stations showing a deviation of 26-50 cycles. None of the stations showed a deviation of over 50 cycles.

SHIPS GET SHORT-WAVE PROGRAMS FROM UNITED STATES

The range of reception of American short-wave radio programs was recently extended when the Electrical Division of the Department of Commerce expanded its world-wide distribution of advance schedules of American short-wave broadcasts to include steamships operating between the United States and foreign countries.

This service enables radio operators aboard ship to readily select radio programs for the entertainment of their passengers from the wide variety of broadcasts transmitted by all the United States short-wave stations. The offer of the Electrical Division to make these programs available to ocean liners was accepted by the European and eight United States steamship lines operating more than 100 of the largest passenger vessels now in service.

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF COMMISSION

The Federal Communications Commission has denied the application of Broadcasting Service Organization, Inc., licensee of WORL, **Boston,** to operate the station unlimited time with 1000 watts, using a directional antenna at night. The station now operates on **920 kilocycles,** with 500 watts LS at Boston.

The Commission stated that the operation of the station as proposed would not provide a full-time "local service for metropolitan Boston because of objectionable interference during nighttime hours which would be caused by existing licensed radio stations, particularly WPEN at Philadelphia, Pa."

Chairman McNinch and Commissioner Thompson did not participate in this decision.

The Commission granted the application of KFBI to move the station from **Abilene,** to **Wichita, Kansas,** and to install a new transmitter and vertical antenna. The station operates on **1050 kilocycles,** 5000 watts power LS at Los Angeles, Cal.

The Commission found that the applicant is in all ways qualified to move and operate the station. It was stated by the Commission that "there is no evidence in the record from which the Commission can conclude that the granting of this application would prevent either Station KANS or Station KFH in Wichita from continuing to operate in the public interest, convenience and necessity." It was further found by the Commission that the granting of the application will not result in increased objectionable interference to any existing station "nor are there any pending applications with which objectionable interference can be expected."

Chairman McNinch and Commissioner Thompson did not participate in this decision.

The Commission granted the application of Mary P. Martin, Administratrix of the estate of George W. Martin, deceased, to transfer the control of Station WGAN, **Portland, Maine,** to the Gannett Publishing Company, Inc. The station operates on **640 kilocycles,** 500 watts power, limited until sunset at KFI, using a directional antenna.

Chairman McNinch and Commissioner Thompson did not participate in this decision.

Application of the KTSA Broadcasting Company, **San Antonio, Texas,** for consent to assignment of license for Station KTSA from the present licensee to the Sunshine Broadcasting Company. The station operates on **550 kilocycles,** 5000 watts LS, 1000 watts night, unlimited time.

Chairman McNinch and Commissioner Thompson did not participate in this decision.

The Commission has granted the application of Sweetwater Radio, Inc., for a new station at **Sweetwater,**

Texas, to use **1210 kilocycles,** 250 watts, daytime only, upon the expressed condition that:

"The permittee herein shall file an application for modification of construction permit specifying the exact transmitter location and antenna system within two months after the effective date of this order. If for any reason such application cannot be submitted within the time allowed, an informal request for extension of time must be submitted stating the necessity therefor."

Chairman McNinch and Commissioner Thompson did not participate in this decision.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of May 29. They are subject to change.

Monday, May 29

NEW—Wendell Mayes, Joe N. Weatherby and Wm. J. Lawson, d/b as Brown County Broadcasting Co., Brownwood, Tex.—C. P., **990 kc.,** 1 KW, daytime.

Thursday, June 1

Oral Argument Before the Commission

Report of the Committee:

RULES GOVERNING STANDARD BROADCAST STATIONS

Thursday, June 1

NEW—WJMS, Inc., Ashland, Wis.—C. P., **1370 kc.,** 100 watts, unlimited time.

Friday, June 2

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—C. P., **1210 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1210 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings and oral arguments. They are subject to change.

June 15

Further Argument Before the Commission

Examiner's Report No. I-664:

NEW—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—C. P., **1010 kc.,** 250 watts, unlimited time.

WSBT—The South Bend Tribune, South Bend, Ind.—C. P., **1010 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1360 kc.,** 500 watts, shares WGES.

Oral Argument Before the Commission

Commission's Proposed Findings B-6:

NEW—Pillar of Fire, Zarephath, N. J.—C. P., **6080, 11830, 17780 kc.,** 5000 watts, 5000 watts LS, Emission A-3, unlimited time.

June 19

WJBW—Charles C. Carlson, New Orleans, La.—Renewal of license, **1200 kc.,** 100 watts, shares WBNO.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.,** 100 watts, unlimited time. Present assignment: **1200 kc.,** 100 watts, shares WBNO.

June 30

KALE—KALE, Inc., Portland, Ore.—C. P., **1300 kc.,** 1 KW, 5 KW LS, unlimited time. Present assignment: **1300 kc.,** 1 KW, unlimited time.

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.,** 500 watts, Emission A-3, unlimited time, according to Rule 983.

July 12

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—C. P., **570 kc.,** 1 KW, unlimited time (DA night and day). Present assignment: **1500 kc.,** 100 watts, unlimited time.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 100 watts, daytime.

July 24

Hearing Before Commissioner Case

KUMA—Albert H. Schermann, Yuma, Ariz.—Application for hearing upon Order of Revocation of License of Station KUMA. Present assignment: **1420 kc.,** 100 watts, specified hours.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WHAT—Public Ledger, Inc., Philadelphia, Pa.—Granted authority to transfer control of corporation from Public Ledger, Inc., to Bonwit-Teller and Company. Station operates on **1310 kc.,** 100 watts, shares WTEL.

WQDM—Regan and Bostwick, St. Albans, Vt.—Present license further extended on a temporary basis only, for a period of one month from June 1, pending receipt of additional information requested by the Law Department.

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—The Commission having under consideration the application for renewal of license of station WHOM for the period November 1, 1938, to May 1, 1939, and a petition to grant same without hearing, today granted said application and petition (Commissioner Payne voting "No"), and renewed the license of WHOM for the period ending November 1, 1939.

KVNU—Cache Valley Broadcasting Co., Inc., Logan, Utah.—Present license extended on a temporary basis for a period of 30 days, pending receipt of application for consent to transfer control of station.

WAAB—The Yankee Network, Inc., Boston, Mass.; WAAB (Auxiliary)—The Yankee Network, Inc., Boston, Mass.—Granted renewal of license upon a temporary basis only upon the express condition that it is subject to whatever action may be taken upon pending applications for renewal and for C. P. Renewal application was designated for hearing to be heard with the Mayflower Broadcasting Corp. application which is applying for facilities of WAAB.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Present license extended on a temporary basis for period of one month, upon condition that (a) hours of operation comply with Rules 151 to 163 inclusive, (b) equipment and operation comply with Rules 125 to 143 inclusive, and (c) frequency control and check comply with Rules 144 to 147 inclusive.

WCOV—John S. Allen and G. W. Covington, Jr., Montgomery, Ala.—Granted assignment of license of station WCOV to the Capital Broadcasting Co., Inc.

KRQA—J. Laurence Martin, Santa Fe, N. Mex.—Granted voluntary assignment of license from J. Laurence Martin to New Mexico Broadcasting Company; station operates on frequency **1310 kc.,** 100 watts, unlimited.

WCHV—Community Broadcasting Corp., Charlottesville, Va.—Granted authority to transfer control of corporation from its present stockholders to Mrs. Hugh M. (Nancy) Curtler; station operates on **1420 kc.,** 100 watts night, 250 watts day, unlimited time.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearings have not yet been set.

WCBS—WCBS, Inc., Springfield, Ill.—Application for C. P. already in hearing docket amended so as to request move of transmitter site locally from 2200-06 S. Sixth St. to 3.5 miles southeast of city, Route 24; install new equipment and DA system, and change frequency from **1420 kc.** to **1290 kc.**; increase power from 100 watts night, 250 watts day, to 500 watts night, 1 KW day, employing DA for nighttime operation. Application designated for hearing because of pending applications which involve increase in service and interference.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Application for modification of license to change time of operation from S.H. (all hours not used by WSVS) to unlimited time. Application designated for hearing to determine whether it would better serve public interest, convenience and necessity to grant to applicant herein the facilities now licensed to WSVS as requested in instant application, and to determine the need for additional service in the area proposed to be served.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Special experimental authorization to rebroadcast WLW facsimile signals between the hours 1:05, CST, and 2:15 a. m., CST, to be broadcast over applicant's regular broadcast station WLAP, using 250 watts night. Designated for hearing (1) to determine whether the applicant will comply in all respects with the rules and regulations of the Commission governing the operation of facsimile broadcast stations, particularly Sec. 43.31, and (2) to determine whether the applicant has complied with the order of the Commission on January 31, 1938, governing the monitoring schedule of broadcast stations.

NEW—Union Broadcasting Company, Scranton, Pa.—Application for C. P. for new station to operate on frequency **1370 kc.**, with 100 watts night, 250 watts day, unlimited time. Designated for hearing to determine if interference would result with existing stations and pending applications involve increase in service and interference.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period ending December 1, 1939:

KAND, Corsicana, Tex.; KASA, Elk City, Okla.; KBND, Bend, Ore.; KCKN, Kansas City, Kans.; KFJI, Klamath Falls, Ore.; KFPL, Dublin, Tex.; KFVS, Cape Girardeau, Mo.; KFYO, Lubbock, Tex.; KGEZ, Kalispell, Mont.; KGFW, Kearney, Neb.; KGY, Olympia, Wash.; KHBG, Okmulgee, Okla.; KLAH, Carlsbad, N. Mex.; KOCY, Oklahoma City, Okla.; KPDN, Pampa, Tex.; KPFA, Helena, Mont.; KRMD, Shreveport, La.; KROC, Rochester, Minn.; KRQA, Santa Fe, N. Mex.; KRRV, Sherman, Tex.; KSRO, Santa Rosa, Calif.; KTSM, El Paso, Tex.; KVOL, Lafayette, La.; KVOX, Moorhead, Minn.; KWOC, Poplar Bluff, Mo.; KWOS, Jefferson City, Mo.; KXRO, Aberdeen, Wash.; WAML, Laurel, Miss.; WBEO, Marquette, Mich.; WBOW, Terre Haute, Ind.; WBRE, Wilkes-Barre, Pa.; WBRK, Pittsfield, Mass.; WCLS, Joliet, Ill.; WCPO, Cincinnati, Ohio; WEBR and auxiliary, Buffalo, N. Y.; WEMP, Milwaukee, Wis.; WFDF, Flint, Mich.; WGAU, Athens, Ga.; WGH, Newport News, Va.; WGTM, Wilson, N. C.; WHAT, Philadelphia, Pa.; WJTN, Jamestown, N. Y.; WJW, Akron, Ohio; WLNH, Laconia, N. H.; WJAC, Johnstown, Pa.; WMBO, Auburn, N. Y.; WMFF, Plattsburg, N. Y.; WNBH, New Bedford, Mass.; WRAW, Reading, Pa.; WROL, Knoxville, Tenn.; WSAJ, Grove City, Pa.; WSIX, Nashville, Tenn.; WTEL, Philadelphia, Pa.; WTJS, Jackson, Tenn.; WTRC, Elkhart, Ind.; WCMI, Ashland, Ky.; WLBC, Muncie, Ind.

KID—KID Broadcasting Co., Idaho Falls, Idaho.—Granted renewal of license for the period ending November 1, 1939.

WBCM—Bay Broadcasting Co., Inc., Bay City, Mich.—Granted renewal of license for the period ending November 1, 1939.

Licenses for the following stations were extended upon a temporary basis only, pending receipt of and determination upon applications for renewal, but in no event longer than July 1, 1939:

KAST, Astoria, Ore.; KHUB, Watsonville, Calif.; WBBZ, Ponca City, Okla.; WBRY, Waterbury, Conn.; WRBL, Columbus, Ga.

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Granted renewal of license on a temporary basis only for the period ending December 1, 1939, upon the express condition that it is subject to whatever action may be taken upon pending application for renewal.

KVOS—KVOS, Inc., Bellingham, Wash.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1939, subject to whatever action may be taken upon the pending application for renewal of license of KVOS and pending application of the Bellingham Broadcasting Co., Inc.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1939, subject to whatever action may be taken upon pending application for renewal of license.

WJBW—Charles C. Carlson, New Orleans, La.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1939, subject to whatever action may be taken upon pending application for renewal of license.

WJRD—Thomas R. Doss, Jr., Tuscaloosa, Ala.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1939, subject to whatever action may be taken upon pending application for renewal of license.

KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only pending determination upon the application for renewal, but in no event longer than July 1, 1939.

WTAQ—WHBY, Inc., Green Bay, Wis.—Present license further extended upon a temporary basis only pending determination upon the application for renewal, but in no event longer than July 1, 1939.

KSUB—Leland M. Perry, Cedar City, Utah.—Present special temporary authorization to operate station KSUB was extended upon a temporary basis only for the period ending July 1, 1939, subject to whatever action may be taken upon any formal application for regular authorization that may be submitted with respect to station KSUB, and subject further to the condition that nothing contained in said special temporary authority shall be construed as a finding by the Commission that the operation of the station is or will be in the public interest beyond the express terms hereof.

WOLS—O. Lee Stone, Florence, S. C.—Granted renewal of license on a temporary basis only for the period ending December 1, 1939, subject to whatever action may be taken upon pending application for renewal and upon the application of the Pee Dee Broadcasting Company for C. P. to erect a new station.

W1XCS—Connecticut State College, Storrs, Conn.—Granted renewal of developmental broadcast station license for the period ending May 1, 1940, upon the express condition that it is subject to change or cancellation by the Commission at any time, without advance notice or hearing, if in its discretion the need for such action arises.

W1XEV—Connecticut State College, Storrs, Conn.—Granted renewal of developmental broadcast station license for the period ending May 1, 1940, upon the express condition that it is subject to change or cancellation by the Commission at any time, without advance notice or hearing, if in its discretion the need for such action arises.

W3XDD—Bell Tel. Labs., Inc., Whippany, N. J.—Granted renewal of developmental broadcast station license for the period ending May 1, 1940.

WAXG—Florida Capitol Broadcasters, Inc., Portable-Mobile.—Present relay broadcast station license was further extended on a temporary basis only for the period ending July 1, 1939, pending determination upon application for renewal.

Licenses for the following high frequency broadcast (experimental) stations were further extended on a temporary basis to July 1, 1939, pending determination upon applications for renewal:

W8XWJ, Detroit, Mich.; W9XLA, Denver, Colo.; W2XQO, Flushing, N. Y.; W4XCA, Memphis, Tenn.; W4XBW, Chattanooga, Tenn.; W5XAU, Oklahoma City, Okla.

MISCELLANEOUS

W2XUP—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted extension of special temporary authority to operate facsimile broadcast experimental station on frequency **25700 kc.** only, pending correspondence with applicant to determine past and proposed use of facsimile authorization, not to exceed 30 days.

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Granted special temporary authority to operate from local sunset (May 7:45 p. m., CST) to conclusion of ceremonies incident to banquet of the State Convention of the Knights of Columbus on May 21.

WTAR—Broadcast Station WTAR, Norfolk, Va.—Granted extension of authority to operate with 1 KW night, non-directional antenna, from May 11 for a period of 30 days. Authority to operate with 5 KW night not effective until directive antenna is reconstructed and proof of performance approved by Commission. (This action supersedes action of May 16 in granting authority to operate with 5 KW night for period of 30 days.)

KAZW—Harold Gillam, Fairbanks, Alaska.—Designated for hearing and granted temporary authority pending outcome of hearing, application for C. P. and license for change in equipment and use of green chain frequencies.

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Denied motion to consolidate application of KGLO for C. P. to change frequency and power, with renewal application of KWLC, Decorah, Iowa, now scheduled for hearing on June 27.

KWLC—Luther College, Decorah, Iowa.—Granted motion to accept late appearance in re application of KGLO, mentioned above.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted petition to intervene in the hearing on the application of WGBF, Evansville, Ind., and dismissed petition to consolidate in a single hearing applications of KXOK, WGBF, KFRU and KWK.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted petition to intervene in the hearing on the application of KXOK, St. Louis, Mo., and dismissed petition to consolidate in a single hearing applications of KXOK, AGBF, KFRU and KWK.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted petition for order to take depositions in re application for C. P. to change frequency, power, and time of operation.

NEW—Lawrence J. Heller, Washington, D. C.—Granted petition for extension of time for filing proposed findings of fact and conclusions from May 22 to on or about June 12, 1939, in re application for new station in Washington, D. C., and special experimental authorization.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted petition for continuance of hearing now scheduled for June 5, for approximately 60 days, new date to be fixed by Secretary's Office, on application for C. P. to change frequency and power.

W9XTA—E. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Granted petition requesting change in date of hearing on application for renewal of license for high frequency broadcast station, from May 29, pending amendment of application.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Granted petition for order to take depositions in re application for C. P. to change frequency, power and time of operation.

NEW—Central Broadcasting Corp., Worcester, Mass.—Granted petition to intervene in the hearing on the application of C. T. Sherer Co., Inc., for a new station in Worcester, Mass.

WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Denied petition to hold application for modification of license to change frequency, power, and time of operation, in the pending files. (Hearing on this application now scheduled for June 21.)

NEW—Edwin A. Kraft, Fairbanks, Alaska.—Denied motion to dismiss application for C. P. to operate on **610 kc.,** 1 KW, unlimited time, without prejudice, and dismissed same with prejudice.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted petition in part to dismiss without prejudice application for C. P. to change frequency and increase power. Commission to retain application in its files instead of returning it to applicant as requested.

WHMA—Harry M. Ayers, Anniston, Ala.—Granted special temporary authority to operate from local sunset (May, 6:30 p. m., and June, 7 p. m., CST), to the conclusion of baseball games to be played on May 20, 22, 23, 24, 25, 26, 29, 30, 31 and June 1, 2, 5, 6, 7, 8, 9, 12, 13 and 14, using 50 watts only, and subject to compliance with Rule 15.15.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 5 to 6 p. m. and from 10 to 12 midnight, AST, on May 22, in order to broadcast graduation exercises from the College of Agriculture and Mechanical Arts.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Granted authority to operate from 8 to 8:30 p. m., CST, on May 30, to broadcast 20th Century Fox program, consents from KOB and KEX having been received.

KSFM—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to operate Relay Broadcast Station KSFM aboard Boeing seaplane "Yankee Clipper" on the frequencies **4797.5, 6425, 8655, 12862.5** and **17310 kc.,** in addition to the normal licensed frequencies for the period May 28 to June 26, for transmission of special program features from newly developed Boeing seaplane on first public service flight to Europe.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to rebroadcast program material over high frequency broadcast station W8XWJ to be received from Relay Broadcast Station W8XIG, in accordance with Police Field Day activities, May 25.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9 to 10 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period June 1 to June 30, in order to broadcast certain educational programs.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from local sunset (May 7:15 p. m., CST) to 11:05 p. m., on May 29 and 30, in order to broadcast the closing exercises of Longview Public Schools, using 100 watts only.

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Granted special temporary authority to operate from local sunset (June, 7:45 p. m., CST), to 10:30 p. m. on June 4, 11, 18, 25, in order to broadcast church services; to operate from local sunset to 10 p. m., CST, on June 5, 12, 19, 26, in order to broadcast "Okmulgee Little Theater of the Air".

W1XOK—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test relay broadcast equipment of station W1XOK authorized by C. P. granted January 24, on the frequency **13226 kc.** in lieu of authorized frequencies, power 250 watts, for the period May 31 to June 29, pending definite arrangements to be made in ultra high frequency bands (provided all operation is to be on a non-interference basis and in accordance with Sec. 40.04).

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to test the high frequency broadcast equipment of station W1XOJ authorized by modification of C. P., on frequency **43000 kc.,** with power not to exceed 2 KW, for a period not to exceed 30 days, in order to make necessary adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400 ft. mast.

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Granted special temporary authority to operate from 10 to 12 p. m., EST, on May 29, in order to broadcast Patriotic Ball.

WNAD—Univ. of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 8 to 9 p. m., CST, on June 11, 18 and 25, in order to broadcast special educational programs (provided KGGF remains silent).

KGGF—Powell and Platz, Coffeyville, Kans.—To operate from 7:15 to 9:15 p. m., CST, on June 1, 6 and 8, and from 8:15 to 9:15 p. m., CST, on June 7, in order that WNAD may remain silent for closing of Spring Semester and opening of summer term (provided WNAD remains silent).

WBEO—The Lake Superior Broadcasting Co., Marquette, Mich.—Granted extension of special temporary authority to operate on Daylight Saving Time for the period June 1 to September 24, instead of Central Standard Time as specified in license.

KGCA—Charles Walter Greenley, Decorah, Ia.—Granted special temporary authority to remain silent for a period not to exceed 30 days, pending KWLC's compliance with Rule 131.

W3XL-W3XAL—National Broadcasting Co., New York City.—Granted extension of special temporary authority to transmit programs consisting of Spanish News to be rebroadcast by Cuban Stations CMX and COEX for the period June 2 to July 1, 1939.

NEW—William F. Huffman, Wisconsin Rapids, Wis.—Pursuant to the Commission's action of May 16, 1939, in designating for further hearing, upon issues to be specified by the Commission the application for a C. P. to erect a new station to operate on **580 kc.,** 250 watts, unlimited time, DA during nighttime hours, the following Bill of Particulars was today approved: (1) To determine whether there is available a frequency which will provide service to the area proposed to be served in keeping with the Commission's plan of allocation; (2) To determine whether or not the use of the frequency **580 kc.,** with 250 watts unlimited time, with DA during nighttime hours, will provide adequate service for the proposed area to be served and would be consistent with sound principles of allocation.

WINS—Hearst Radio, Inc., New York City.—Application for C. P. to make changes in transmitting equipment and antenna, granted by the Commission on January 4, 1939, was retired to the closed files as applicant has returned the C. P. to the Commission, since the changes originally proposed are no longer desired.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Granted petition for rehearing in re application for new transmitter, change in frequency from **1420** to **1120 kc.,** and power from 100 watts night, 250 watts day, to 500 watts night, 1 KW day, DA at night; set aside the Statement of Facts, Grounds for Decision and Order of March 27, 1939, and remanded application for further hearing on questions relating to the issue of interference.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted petition for rehearing, in re application for C. P. to increase power from 500 watts to 1 KW on frequency **1120 kc.,** unlimited time (except from 8 to 9 p. m., Mondays); set aside Statement of Facts, Grounds for Decision and Order of March 27, 1939, and remanded for further hearing on questions relating to the issue of interference.

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Me.—The Commission, upon its own motion, continued hearing now scheduled for June 2, until further notice, in order that applicant may be given further opportunity to submit additional engineering data in support of application for authority to increase daytime power from 100 watts to 250 watts.

APPLICATIONS FILED AT FCC

1190 Kilocycles

KTKC—Tulare-Kings Counties Radio Associates, Chas. A. Whitmore, Pres., Visalia, Calif.—Modification of construction permit B5-P-2055, to change frequency, increase power, change hours of operation, install new transmitter, and directional antenna (night use), further requesting authority to make changes in directional antenna and change type of transmitting equipment. Extend commencement and completion date 30 and 180 days.

1280 Kilocycles

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license to make changes in hours of operation by adding hours from 8 to 10 p. m., each night (hours to be withdrawn from WCAM and WCAP).

1320 Kilocycles

WSMB—WSMB, Inc., New Orleans, La.—Construction permit to replace tower demolished by hurricane and make changes in antenna.

1370 Kilocycles

NEW—Tom M. Bryan, Ft. Lauderdale, Fla.—Construction permit to erect a new station to be operated on **1370 kc.,** 100 watts night; 250 watts day, unlimited time. Amended: To give transmitter location as site to be determined, Ft. Lauderdale, Fla., and antenna to be determined.

WBLK—The Exponent Co., Clarksburg, W. Va.—License to cover construction permit B2-P-2110, for equipment changes and increase in power.

1420 Kilocycles

NEW—C. L. Weathersbee, W. H. Nichols, E. M. Thompson, d/b as Albemarle Broadcasting Station, Albemarle, N. C.—Construction permit for a new station to be operated on **1420 kc.,** 100 watts power, daytime hours of operation. Amended: to change name by adding C. L. Pickler to partnership, change requested frequency to **1370 kc.,** make changes in equipment.

KRIC—Beaumont Broadcasting Association (B. A. Steinhagen, Pres.), Beaumont, Texas.—Voluntary assignment of license from Beaumont Broadcasting Association (B. A. Steinhagen, Pres.) to KRIC, Incorporated.

KXL—KXL Broadcasters, Portland, Oregon.—C. P. to install new transmitter and directional antenna for day and night use, change frequency from **1420** to **730 kc.,** increase power from 100 watts; 250 watts-LS to 10 KW, change hours of operation from shares-KBPS to unlimited, move transmitter and studio from 4th and Pine Sts., Portland, to Trans-7 mi. S. E. of Portland, Oregon, and studio to 1101 S. W. Washington, Portland, Oregon.

MISCELLANEOUS

W2XVP—City of N. Y. Municipal Broadcasting System, New York, N. Y.—Modification of construction permit requesting extension of commencement and completion dates to 60 days after grant and 180 days thereafter. Amended: change date of required completion of construction to 12-15-39.

NEW—WDAY, Incorporated, Portable-Mobile, area of Fargo, N. Dak.—Construction permit for a new portable-mobile relay station on **30820, 33740, 35820, 37980 kc.,** 25 watts power. A-3 emission.

WNYK—City of New York, Municipal Broadcasting System, Portable-Mobile, New York, N. Y.—License to cover construction permit B1-PRY-164, for a new low frequency relay station.

WNYL—City of New York, Municipal B/c System, Portable-Mobile, New York, N. Y.—License to cover construction permit B1-PRY-165, for new low frequency relay station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Arlin Tailoring Company—See Strauss Tailoring Company.

Bell Tailoring Company—See Strauss Tailoring Company.

Federal Tailoring Company—See Strauss Tailoring Company.

Gordon-Gordon, Ltd., Chicago, cosmetics manufacturer, and its subsidiary distributing company, Princess Pat, Ltd., have been served with a complaint alleging misleading representations.

In selling their "Princess Pat" line of cosmetics, the respondents are alleged to represent, directly and by implication (1) that competing face powders contain orris root and other irritative ingredients not to be found in "Princess Pat Powder"; (2) that the almond in the respondents' powder is beneficial; (3) that use of this powder keeps the skin soft and pliant; (4) that the powder is non-allergic to all persons; (5) that the respondents' "Muscle Oil" penetrates beneath the surface and beneficially affects underlying facial muscles; (6) that their "Skin Cleanser" will prevent coarse pores and skin eruptions, and (7) that their "Skin Food Cream" or "Anti-Wrinkle Cream" nourishes and feeds the skin, is a tonic for the underlying nerves and smooths out and prevents lines and wrinkles. (3793)

James Heddon's Sons—Alleging misleading representations in the sale of fishing rods a complaint has been issued against James Heddon's Sons, Dowagiac, Mich.

It is alleged that in violation of the Federal Trade Commission Act, the respondent corporation represented that all hollow steel fishing rods other than its "Improved Heddon Pal," have a thick wall at the tip and a thin wall at the butt end whereas the new Heddon "Pal" steel rod has a thin wall at the tip end and a thick wall at the butt end.

The respondent further is alleged to have represented that tests have been made by expert testers of casting rods who are independent of the respondent, and that such tests have shown the "Improved Heddon Pal" as being "best-by-test." (3792)

McKesson & Robbins, Inc., manufacturing druggists, with headquarters in Bridgeport, Conn., have been served with a complaint alleging unfair trade practices in the sale of Calox Tooth Powder.

In advertising this product, McKesson & Robbins, it is alleged, have advised that "For teeth that 'shine like the stars' use Calox Powder," this slogan having been used in connection with pictures of popular cinema stars.

Through such advertising, the respondent is alleged to have falsely represented, directly and by implication, that movie stars have white, clear and sparkling teeth because they use Calox Tooth Powder; that Calox alone keeps their teeth in that condition, and that anyone who uses Calox can have teeth as beautiful as those of Hollywood's stars.

The complaint alleges that movie stars do not depend on the respondent's product or any other dentifrice alone but employ the services of dentists who give them regular prophylactic treatments, and that the permitted appearance of the stars' pictures and testimonials in the McKesson & Robbins advertising is the result of a reciprocal publicity arrangement primarily intended for advertising value in promoting the screen careers and popularity of the performers. (3791)

Princess Pat, Ltd.—See Gordon-Gordon, Ltd.

Strauss Tailoring Company—Julius M. Firk, trading as Strauss Tailoring Company, Federal Tailoring Company, Bell Tailoring Company, the Arlin Tailoring Company, 224 South Wells St., Chicago, is charged in a complaint with misrepresenting in price lists, markers and various advertising matter that certain of the fabrics distributed by him are composed entirely of wool, when they are in fact part wool and part cotton, rayon, or other materials, and that the lining materials are composed predominantly of silk when in fact they are composed entirely of rayon. (3788)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Kastar Specialty Manufacturing Company, Inc., 510 Sixth Ave., New York, has been ordered to discontinue representing that it manufactures the automobile accessories it sells unless and until it owns and operates a plant in which such articles are made.

Findings are that the respondent company used on its printed matter the wording: "Mfd. by Kastar Specialty Manufacturing Company, Inc., New York, U. S. A." However, according to findings, this company obtains the products it sells from plants which it does not own, operate or control. (3746)

Novelty Distributing Company—J. C. Robertson, trading as Novelty Distributing Company, 117 West Harrison St., Chicago, has been ordered to cease and desist from lottery methods in connection with the distribution of clocks.

The Commission's findings are that the respondent, in soliciting the sale of and in selling and distributing clocks, supplies merchants with push cards, thus placing in the hands of others the means of conducting lotteries in the sale of his merchandise to ultimate purchasers. (3178)

Richard Rosebury Organization, Inc., 522 Fifth Ave., New York, has been ordered to cease misrepresentation in the soliciting of subscribers for magazines.

The Commission finds that solicitors of the respondent represented to prospective subscribers that they would receive two or more designated magazines at a price and for a period stated by the solicitor, but that this representation was not fulfilled.

The respondent is ordered to cease representing that a subscriber is to receive a greater number of magazines than those actually delivered and from accepting subscriptions for magazines not actually delivered. (3710)

Superyarn Company—Adolph Friedman, trading as Superyarn Company, 353 Grand St., New York, seller and distributor of textile fabrics and knitting yarns, has been ordered to cease and desist from representing that his products are composed of fibers or materials other than those of which they actually are composed.

The respondent was found to have misrepresented the constituent fiber of his products by means of false advertising and by failure to disclose the rayon content of certain articles.

Findings are that the respondent falsely used the terms "Zephyr Tweed" and "Tweed Velenette" on labels, and in advertising material and catalogs, to designate a yarn product composed in part of wool and in part of rayon, the word "Cashmere" to describe products not containing the hair of the Cashmere goat, and the term "Silk Boucle" to designate an all-rayon article.

The Commission ordered the respondent to cease and desist from using the words "tweed" or "wool" or other words of similar import to describe any fabric not composed entirely of wool; from misrepresenting or overstating the quality, grade or character of his products; and from using the word "Cashmere" to describe or designate any fabric or product not composed wholly of the hair of the Cashmere goat. (3753)

Uneeda Underwear Company—Misleading representations in the sale of women's knitted undergarments brought a cease and desist order against Abraham Tabachnick, a manufacturer, trading as Uneeda Underwear Company, 335 Van Siclen Ave., Brooklyn, N. Y.

The order forbids representation that any fabric or other product has a stated percentage of silk and wool or silk or wool unless in fact they are contained in the proportions stated, and prohibits advertisement of fabrics or other products composed wholly or partly of rayon without clear disclosure of this fiber's presence. When such fabrics or products are partly rayon and partly other fibers and materials, such fibers or materials, including the rayon, are to be named in the order of their predominance by weight, beginning with the largest single constituent. (3686)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

Addison Sponge Company, Inc., 241 West 4th Street, Cincinnati, engaged in selling sponges and chamois skins, agreed to discontinue certain misrepresentations in the sale of its products under a stipulation.

The respondent corporation will cease and desist from use in its advertising matter or otherwise of statements or representations the effect of which is to convey the belief that Addison Sponge Company, Inc., actually owns and operates or controls a sponge packing house at Tarpon Springs, Fla., or elsewhere; that a business which it purchased from The Jos. Niehaus Co., Cincinnati, was that of a packer and producer of sponges, and that the Addison Sponge Company, Inc., succeeded to such business as a producer and packer of sponges. It will also discontinue use of cuts or pictorial representations of any building together with descriptions implying that the corporation uses or occupies the whole of such building in the conduct of its business, when this is not a fact. (2465)

Bankers & Merchants Stamp Works, Inc.—Unfair trade practices in the sale of signature stamps will be discontinued by Bankers & Merchants Stamp Works, Inc., 3215 Sheffield Ave., Chicago under a stipulation. The respondent company manufactures signature stamps, numbering machines, time stamps, notary seals and other marking devices.

The stipulation recites that Bankers & Merchants Stamp Works, Inc., arranged with The Autograph Engravers, Chicago, to sell the latter's hand-engraved signature stamps, when, in fact, the product actually sold was not the hand-engraved signature stamp of The Autograph Company but a wood-cut product of the respondent's own manufacture. The result was that purchasers received articles they did not intend to buy. (2469)

Blackstone Hosiery Mills, Inc.—Two North Carolina manufacturers have entered into stipulations to discontinue misleading representations in the sale of hosiery. They are Blackstone Hosiery Mills, Inc., and Waldensian Hosiery Mills, Inc., both of Valdese, N. C.

Each manufauturer agrees to cease using on transfers, brands or other markings of its products the phrase "Made in English Fashion" as descriptive of hosiery not so made. They will discontinue characterizing a product in any manner implying that it is an English product or is of a style and quality known as "English Ribbed" hose, when such is not a fact.

"English Ribbed" hose, according to the stipulation, is a distinctive type and quality originating in England and manufactured there under a patented process and in this country under license. (2466-2467)

Imperial Merchandise Company, Inc., 893 Broadway, New York, has entered into a stipulation to cease and desist from the use of lottery methods in the sale of products to ultimate consumers. The respondent company sells merchandise consisting of necklaces and sales cards or boards, through its secretary, Louis Bloom, under the registered trade name "Trans-Pacific Import Company."

The respondent agrees to discontinue supplying or placing in the hands of others punch boards, push cards or other lottery devices to enable such persons to dispose of its merchandise. (2464)

Joseph Levay, Inc.—Misleading representation of the fiber content of fabrics from which women's dresses are made will be discontinued by Joseph Levay, Inc., manufacturer, 498 Seventh Avenue., New York under a stipulation.

The respondent agreed to cease invoicing, branding, labeling, advertising or otherwise representing any product containing rayon, in whole or in part, without making full, proper and non-deceptive disclosure of the fiber content therof by stating the names of the fibers present in the order of their predominance by weight and by giving the percentages of any fibers which are or may be present in less than a substantial proportion. (2468)

Neonite—A stipulation to discontinue misleading representations in the sale of sign letters, has been accepted from Fred M. Cole, trading as Neonite, Akron, Ohio.

The stipulation shows that Cole advertised "gold * * * sign letters for windows," and represented that "* * * letters are produced * * * in * * * gold and silver."

In his stipulation, the respondent admits that the letters he sells are neither made in whole nor in part of gold or silver and he agrees to cease using in advertisements the words "gold" or "silver" or other words implying that his products are made in whole or in part of those metals, when such is not a fact. (02378)

Waldensian Hosiery Mills, Inc.—See Blackstone Hosiery Mills, Inc.

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice its case against General Concessions Corporation, 6545 Carnegie Ave., Cleveland, manufacturer and distributor of candies, charged with the use of a scheme involving lottery in the sale of its products to ultimate consumers.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts warrant.

NAB Reports
The National Association of Broadcasters

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 7, No. 22, June 2, 1939

The Week In Washington

The NAB learned from reliable sources this week that there was only faint possibility that Congress would consider new broadcasting legislation this year.

The arrival of hot weather has, as usual, spurred adjournment talk. The calendar is still so crowded with legislation in which both Congress and the administration appear to be vitally interested that any major reform of broadcasting regulation probably will be left over for the session starting next January.

Of course, there remains the danger that the bill to prohibit beer and liquor advertising might slip through in the last-minute rush. The International Copyright Treaty also remains on the Senate calendar.

Extension of the normal broadcasting license period to three years was advocated by the NAB during argument on exceptions to the FCC committee report on new rules and regulations. Philip G. Loucks, appearing for the NAB as special counsel, commended the committee for recommending an increase in the license period from six months to one year, but added that "far greater stability is needed."

It is now understood that the FCC, in calling the industry's attention recently to Section 317 of the Communications Act, had in mind particularly sponsored talks, and not spot announcements and participating programs.

Both the Code and Copyright Committees met in New York on Thursday. The Code Committee was expected to make the final draft of program standards to be presented to the Atlantic City convention July 10-13. The Copyright Committee was to review the progress to date of ASCAP negotiations and to consult with Neville Miller on future steps.

FCC CONFIRMS INTERPRETATION OF SECTION 317

When the FCC recently called the attention of the broadcasting industry to Section 317 of the Communications Act, a number of broadcasters were concerned about the industry's general practice with regard to spot announcements and participating programs.

It was understood that the Commission, in calling the industry's attention to the Act's requirement that sponsors be identified, had in mind particularly sponsored talks. It is also understood that the industry's present general practice with regard to spot announcements and participating programs was not involved, and that this present general practice is considered to meet the intent of the Act.

With regard to sponsors, it is understood that their identification does not mean that the complete name of the advertiser must be given if the advertiser is identified by the name commonly recognized by the public as referring to that advertiser.

The following letters were exchanged between the NAB and the FCC:

May 23, 1939

Mr. T. J. Slowie, Secretary
Federal Communications Commission
Washington, D. C.

Dear Mr. Slowie:

Please permit me to refer to the Commission's release No. 34075 of May 16, which called attention to the requirements of Section 317 of the Communications Act of 1934, reading as follows:

"Sec. 317. All matter broadcast by any radio station for which service, money, or any other valuable consideration is directly

Andrew Bennett, *Counsel;* Edward M. Kirby, *Director of Public Relations;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research*

FCC CONFIRMS INTERPRETATION OF SECTION 317

(Continued from page 3513)

or indirectly paid, or promised to or charged or accepted by, the station so broadcasting, from any person, shall, at the time the same is so broadcast, be announced as paid for or furnished as the case may be, by such person."

It is my understanding this release was occasioned by reports from the Commission's field representatives that in several instances a few stations had neglected to sufficiently identify sponsors, particularly in connection with time purchased for talks.

Heretofore we have interpreted the provisions of Sec. 317 as follows: "The station is required to announce the sponsor of the program in such language as will acquaint the listener with the fact that the program is being broadcast as an advertisement if such is the case. The Federal Radio Commission ruled that advertising must be presented as such and not disguised, applying the same principle which has been applied to newspapers to prevent an advertisement from appearing on the surface to be a news item (see Third Annual Report, Federal Radio Commission, page 35). The plain intent of the Section is to prevent a fraud being perpetrated on the listening public. Therefore, reference to the sponsor in such manner as to indicate to the listener that the program is paid for by the sponsor should be sufficient without the necessity of specifically using the words "paid for." An announcement of the fact that the program is presented by the "X" company or that it is sponsored by the "X" company would appear to satisfy the provisions of the statute, since these terms have been publicized to such an extent by radio that the public understands such programs are paid for and are for the purpose of advertising the product of the sponsor. On the other hand, if the name of the sponsor is mentioned in such manner that it might be construed as an editorial comment on the part of the station or as an item of news, it would be contrary to the provisions of the Section."

In view of the number of requests for information received as a result of the Commission's release, it will be greatly appreciated if you will advise whether the foregoing interpretation is in accord with that of the Commission.

Sincerely,
ANDREW W. BENNETT, *Counsel.*

Mr. Andrew W. Bennett
Counsel, National Association of Broadcasters,
1626 K Street, N. W.,
Washington, D. C.

Dear Sir:

This will reply to your letter of May 23, 1939, inquiring as to whether an interpretation given by you of Section 317 of the Communications Act is in accord with that of the Commission.

The statute does not specify the exact language of the required announcement. You are informed that the Commission regards an announcement that a particular program is sponsored as in substantial compliance with Section 317 when the name of the sponsor is given. The interpretation given in your letter would seem to properly reflect the purpose and spirit of the section.

Very truly yours,
T. J. SLOWIE, *Secretary.*

ENGINEERING CONFERENCE

The informal engineering conference on the Proposed Standards of Good Engineering Practice will be held as scheduled on June 5, 1939, in Room 1411 of the New Post Office Building beginning at 9:30 a. m., E.S.T.

R. M. Wilmotte, acting NAB engineer, and several members of the engineering committee will represent the NAB.

FLORIDA PASSES NEW MONOPOLY AND LIBEL BILLS

Both houses of the Florida legislature unanimously passed a new law seeking to curb the activities of pools controlling public performance of copyrighted music, and the new statute now is before the Governor for approval.

The new statute substantially is the same as that enacted in North Dakota (NAB REPORTS, March 10, p. 3335) and supersedes the objectionable features of the 1937 Florida law. However, the new statute expressly provides that it shall not be construed as modifying any of the provisions of the state law with respect to the monopolies and restraints of trade. It leaves on the statute books those provisions of the Florida 1937 statute which Associate Justice Black of the United States Supreme Court held in his minority opinion, April 17, to be violated by ASCAP (NAB REPORTS, April 21, pp. 3429-3431). Attorneys regard this action by the state legislature as removing the objectionable features of the 1937 law and as leaving the pending Florida-ASCAP suit open for a decision on the monopoly question unencumbered by sections of the statute believed by attorneys to be unconstitutional.

In addition, both houses of the legislature by a unanimous vote enacted a statute protecting broadcast stations against liability for defamation. Details of this statute are not available at the time of going to press.

NAB URGES LONGER LICENSE AT FCC ARGUMENT

Extension of the normal broadcasting license period to three years was advocated by the NAB this week during argument on exceptions to the FCC committee report on new rules and regulations.

Philip G. Loucks, appearing for the NAB as special counsel, commended the committee for recommending an increase in the license period from six months to one year, but added:

> "However, far greater stability is needed than that which will be supplied by extending the normal license period to one year. Perhaps, in the future, it may become necessary for Congress to provide for a much longer term. The Association considers the committee's recommendation as a step in the direction of greater stability from which will flow improved service to the public; but it is respectfully suggested, however, that further study in the future will reveal that the same reasons for extending the term for a period of one year may be applied with equal or greater force for a longer period."

The NAB Engineering Committee will deal with the engineering phases at an informal conference at the Commission on June 5.

Mr. Louck's statement as to other NAB exceptions to the proposed rules (see NAB Reports, p. 3481) follows in part:

Exception 1 relates to Rule 31.04 (3) in so far as that rule proposes to prescribe the amount of money required to construct stations of different classes; in so far as the rule distinguishes or recognizes a distinction between stations supported by sponsored programs and stations otherwise supported; and in so far as it makes mandatory a showing that "adequate commercial support is available" for one class of stations and that "adequate finances are available" to support stations of another class. The principal objection here goes to giving expression in the regulations to a distinction between stations commercially supported and stations otherwise supported. In the first place, the law recognizes no such distinction, but even if it did, this particular part of the rule would be unnecessary. It would seem to be sufficient for all regulatory purposes under the act to limit paragraph (3) of the rule to the first sentence which provides that the applicant shall make a satisfactory showing that he is "financially qualified to construct and operate the proposed station."

There is no doubt but that Congress intended that the Commission should investigate the financial ability of applicants to construct and operate the stations for which they make application but nowhere in the Act is there even the slightest implication that a station must be self-supporting. The regulation as proposed uses the language "adequate commercial support" without defining what will constitute such support. But that is not the evil. In most cases evidence of commercial support is either flimsy or totally worthless. Conditional contracts, oral promises to buy time, speculation as to available advertising revenue, census data—all of these might be evidence—but in most cases constitute little value as proof. Whether or not any particular community is entitled under the law to receive transmission service should not be dependent upon the questionable ability of any particular applicant or applicants to produce satisfactory evidence of adequate support. Under such a rule an economic depression might prevent the licensing of new stations and it is a recognized fact that throughout the last depression new stations were continually licensed. Whether a station can make or lose money, based upon testimony nebulous at its best, should not be the sole criterion upon which the Commission decides whether or not a community requiring service shall have that service supplied. The ability of a clever salesman to induce prospective advertisers to sign questionable agreements to use the facilities of a station that does not exist should not by regulation constitute a limitation upon the application of the statutory standard of public interest, convenience and necessity. The prospective advertiser under such arrangements buys nothing; the salesman has nothing to sell. Yet such agreements—in nearly every case worthless—constitute the best evidence available of commercial support. It is respectfully submitted that the two last sentences of paragraph (3) of Rule 31.04 be deleted as unnecessary, impracticable and of questionable legal validity.

Exception 3 relates to the prohibition of commercial or sponsored programs or commercial announcements during additional hours utilized for experimentation and prohibits additional charges by reason of transmission with facilities granted for experimental purposes which occurs in paragraph (b) of Rule 31.12. Objection was made to this provision during the hearing on the grounds that such prohibition will retard rather than encourage experimentation. The Committee had recommended that a footnote be added to the rule as follows:

> "Special authorizations which do not involve experimental operation may be granted pursuant to Rule 15.15 of the Rules of Practice and Procedure."

The addition of the footnote adds nothing to the rule. It is difficult to understand how the inclusion of sponsored matter in programs broadcast during periods of experimentation or how the imposition of charges for the use of facilities experimentally granted can have any bearing of any nature whatsoever upon the prosecution and accomplishment of a program of technical research, especially since the entire research program is under the control of the Commission. Indeed, it is a general rule that the conduct of experimentation adds to the cost of station operation. This restrictive provision, it seems, is of far greater importance to the Commission than it is to licensees since it will undoubtedly tend to discourage stations from going forward with experimental work. We confidently hope that that will not happen. But if it does—if the effect of the rule in actual operation limits rather than encourages experimental use of broadcast frequencies—then it is submitted that it is repugnant to Section 303 (g) of the Act which makes mandatory the

> "study of new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest."

This provision of the act—and it is assumed that it is under this provision that the experimental rule is promulgated—says nothing about rates or commercial sponsorship. It is a mandate to the Commission that experimentation be encouraged. A rule discouraging experimentation, it is submitted, contravenes the intent of this provision of the law.

Exception 4 relates to Rule 31.14 in so far as that rule does not provide for a license period which corresponds with the maximum period provided in the Communications Act of 1934. At the time of the hearing the Association asked that the license period be lengthened to the full statutory period of three years but in any event for a period of not less than one year. The Committee has recommended that the normal license period be increased from six months to one year and has set forth as the principal reason for its recommendation the need for greater stability in the industry. We urge the Commission to adopt the Committee's recommendation if it is deemed inadvisable to grant greater extension of the license term at this time. However, far greater stability is needed than that which will be supplied by extending the normal license period to one year. Perhaps, in the future it may become necessary for Congress to provide for a much longer term. The Association considers the Committee's recommendation a step in the direction of greater stability from which will flow improved service to the public; but it is respectfully suggested, however, that further study in the future will reveal that the same reasons for extending the term for a period of one year may be applied with equal or greater force for a longer period.

Exception 6 relates to Rule 32.05 (e) in so far as it prohibits the simultaneous use of a common antenna where two licensees are owned or controlled by the same person or corporation, or where two licensees have an agreement between them which is satisfactory to the Commission. It was the feeling of the Association that the rule should be omitted entirely or, if retained, that there should be language permitting the simulatneous use of a common antenna by separate licensees provided such use is in conformity with an agreement approved by the Commission. The reasons given at the time of hearing were that in some instances the police department of a given city has requested the use of a broadcast antenna for police transmissions. That would not interfere with the broadcast operations and would aid the police department, although the licensees are different. Another instance cited was where one licensee was conducting experimental work on the premises of another licensee, the two licensees probably being under the same control. In such instances, it seems to the Association, the rule should not prohibit such simultaneous use of a common antenna provided a satisfactory agreement is reached between the licensees and the Commission.

Exceptions 11 and 12 relate to certain provisions of Rule 34.21 (1) (a) and (b). This rule governs entries to be made on the program and operating logs. The first objection relates to the use of the language "with an indication of the type of announcement" in paragraph (a) under Section 1 of the rule. The language is indefinite. The rule would seem to provide that an entry of the time each station identification announcement is made, that is, the call letters and location, shall be made on the program log. But it is difficult to understand what is meant by the language "with an indication of the type of announcement." I presume that this language is intended to require that where a station has several types of identification announcements, or where words other than the mere call letters and location of the station are included in such announcements, then the log entry must show which of the several types is used. If this is what is intended, the language ought to be more specific. As it now stands, it is left to each station to place its own interpretation on this language.

In Exception 12 reference was made to a possible conflict between the provisions of Rule 34.20 (1) (b) and Rule 34.23. Upon further study of the rules and the testimony I do not see that there is any conflict here since the first rule relates to entries to be made upon the program log and the latter governs announcements actually to be made. However, 34.30 (1) (b) and (c) present difficult problems both to the licensee charged with making the entry upon the log and to the Commission in interpreting these entries. The principal difficulty grows out of the use of the words "by whom presented." It is difficult to understand whether the Commission desires that the entry show the names of the artist or artists actually presenting the program in the studio, if it be a studio program; the name of the network, if it be a network program; the name of the recording company, if it be a recorded program. Some of the practical problems which grow out of the construction of Section 317, relating to the identifying of sponsored matter are presented by this Rule. The difficulty of framing a regulation which will accomplish the purposes of the Act and at the same time square itself with the practical aspects of the problem are recognized and the purpose of raising objection here is simply to point out the need for clarification. Perhaps, as a result of the Commission's recent release calling attention of broadcasters to the provisions of Section 317, additional information will be obtained which will be of assistance in reframing parts of the rule which will aid both the Commission and the industry. If the rule is permitted to become effective without change, it is respectfully suggested that at some time in the near future, in the light of information obtained through its application, that the rule be reviewed with a view to making such clarification as may be necessary to remove all trace of ambiguity and misunderstanding. Generally speaking, there is no difference between the Commission and the broadcasters as to the objective to be achieved but if the rule is to be strictly enforced consideration ought to be given to its practical application during day to day operation.

The next exception is Exception 14 which relates to Rule 36.04 in so far as that rule requires every licensee to permit *public inspection* of a complete record of all requests for broadcast time made by or on behalf of candidates for public office. This is the present Rule 36 A 4 which was adopted after the hearings were closed, and therefore has not been the subject of testimony. It is the view of the Association that it will be sufficient for all purposes of the law if the record of requests for political time be open to the Commission rather than to the public. It is difficult to understand how any useful purpose can be served by requiring the licensees to permit members of the public to inspect these records. Furthermore, the rule does not prescribe the length of time such records must be retained by the station nor does it presume to limit the time for their inspection. Would it be a violation of the rule to deny some mere curiosity-seeking member of the public to inspect these records after the business offices of the station were closed for the day? It is believed that all proper purposes of the rule will be subserved if the records are kept available for inspection by the Commission or its representatives.

In closing, I want to point out that the Engineering Committee of the Association has given further study to the rules as recommended by your Committee and these views will be presented at the June 5 conference which I understand has been provided for that purpose. Let me express to you on behalf of the Association its appreciation for the opportunity to come before your Committee and present its views on the proposed regulations and to come before you with the observations I have made. It is the hope of the Association that in the future the same procedure will be followed in any revision of existing rules and in the promulgation of new ones.

FREE OFFERS

The American Hotel Association, New York City, has asked broadcasters to give free plugs for National Hotel Week, June 11-17. The NAB has advised the Association that this would constitute violation of the NAB Code and suggested that the Association cooperate with broadcasters in obtaining local sponsorship.

The Milk Industry Foundation, New York City, has sent out suggested announcements for "June Dairy Month." The NAB also has suggested cooperation to obtain local sponsorship.

In both of these cases, broadcasters might do well to approach their local dairies and hotels for accounts.

Caxton House, New York, and the Philatelic Banking Service, Boston, have been advised that acceptance of their commission propositions would constitute violation of the NAB Code.

Similar notice went to "The Winning Post," New York City, which offered to supply race results to stations which would plug the magazine on a commission basis.

The NAB has suggested a regular radio advertising campaign to the Angelus-Camp Fire (marshmallow) Company, Chicago, which has been offering prizes to domestic science script writers for program ideas, presumably with the intention of interesting these script writers in the use of marshmallow recipes.

The Stocking House (perfume), Noroton, Connecticut, has advised the NAB that it was not suggesting cost-per-inquiry advertising in its recent proposal, but merely wanted information as to what stations could produce a large number of mail returns.

COPYRIGHT QUESTIONNAIRES

Since the mailing of the copyright questionnaires on Monday, May 22, several stations have written in to inquire whether their responses will be held as confidential. In the first paragraph on the second page of Mr. Miller's letter the following statement is made: "Your individual response will be held strictly confidential and will not be disclosed in any way beyond the NAB Research Department without your expressed permission." In replying to one of the letters which have come in on the subject, Mr. Miller stated as follows: "In reply to your recent letter, I can assure you that the figures which you will send will be kept confidential. They will be handled by Paul Peter, our Director of Research, and at most two employees working under his direction. The compilations only will be shown to the Committee, but no breakdowns of individual stations will be made available for the Committee."

Program Logs were sent out from NAB headquarters May 24. A question on network programs has arisen because some stations feel they cannot reliably report musical numbers played. If member stations feel it too burdensome to list the titles of musical numbers played on network shows it is suggested that the program title be entered with a notation that there are musical numbers played so that in final tabulation logs furnished by the networks can be used to complete the individual station record.

Every station is urged to complete the questionnaire and the Program Logs as soon as possible so that the work of compiling the needed basic information on the broad subject of copyright can be gotten under way. Your cooperation is essential.

FCC STANDARD APPLICATION FOR RENEWAL OF LICENSE

Headquarters has received inquiries from stations with respect to the meaning of question numbered 17 (g) of the FCC's standard application for renewal of license. This question reads: "(g) Average number of hours per month of sponsored programs is ——, of which direct advertising programs is —— hours."

The word "programs" in the last portion of the question appears to have caused considerable misunderstanding. The Commission advises that the objective of the question is to develop the average number of sponsored broadcast hours per month and the amount of time in those hours devoted to advertising continuity.

PROMOTIONAL MATERIAL

If members desire to be represented in the display at the convention in Atlantic City, July 10 to 13, they should send material to headquarters at once, as final plans are being made for the display. All material must be at Headquarters Office no later than June 15.

HOTEL RESERVATIONS

If you have not already made hotel reservations for the annual convention to be held at the Ambassador Hotel, Atlantic City, July 10 to 13, be sure to write today. Reservations are being made and to secure the type of accommodation you desire at the price you want to pay, it is necessary to make them in advance. Do it today!

KIRBY TO ADDRESS BETTER BUSINESS BUREAU MEETING

Ed Kirby, NAB public relations director, will speak at the business-consumer relations conference to be held by the National Association of Better Business Bureaus June 5-6 in Buffalo, N. Y. Mr. Kirby is scheduled to discuss "What American Radio Means to the Consumer and to the Citizen" at the June 6 afternoon meeting.

BUREAU OF RADIO ADVERTISING

The announcement of the formation of the Bureau of Radio Advertising and its first contribution—"Radio Reaches People"—has been well received by NAB member stations. Approximately one hundred members have sent in the return post card included in the mailing of the announcement and the visual presentation. The orders for copies of future studies and bulletins is encouraging to the Bureau.

It is essential that all stations interested in progressing the objectives of the Bureau of Radio Advertising send in the return post card to give an estimate of the number of copies of bulletins, special studies and binders desired, so that the work of the Bureau can be gotten under way.

Legal

NEW LEGISLATION

STATE

CONNECTICUT:

S. 134 (Rich) LIQUOR—FALSE ADVERTISING—Prohibiting false advertising of liquor. Referred to Judiciary Committee. Passed by Senate 5-27.

FLORIDA:

H. 1913 (Committee on Finance and Taxation) TELEPHONE AND TELEGRAPH TAX—Imposing a tax upon all persons, firms or corporations receiving payment charges or tolls for use of telephones and telegraph, and for telephone and telegraph messages and communications and excluding any tax upon telephone or telegraph messages in interstate commerce. Referred to Calendar.

ILLINOIS:

S. 535 (Ward) BROADCASTING TRIALS—Prohibits broadcasting of court trials. Referred to Second Reading.

NEW HAMPSHIRE:

H. 358 (Committee on Rules) AERONAUTICS—Creating a State Aeronautics Commission and regulating the operating of aircraft. Referred to Judiciary Committee. Passed by House 5-2.

TEXAS:

H. 340 (Morris, et al) TAXES FOR PENSIONS—To redefine "need" in the Old Age Pension Act, and to change the administration of the Old Age Pension. Provisions for taxes of 5¢ per barrel on oil, 5% on natural gas, $2 per thousand on small cigarettes, $3.60 per thousand on heavy cigarettes and $1.50 per ton on sulphur are included. House Committee substitute of 5-12 adds inter alia firearms tax amendments to inheritance and corporate franchise taxes, luxury taxes. Passed by House 5-23.

S. R. 86 SOCIAL SECURITY TAXES—Resolution endorsing the principle of writing taxes to pay for social security benefits into the State Constitution, and requesting the cooperation of the minority members of the House in passing S. J. R. 12. Passed by Senate 5-22.

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF COMMISSION

The Federal Communications Commission has granted the application of KRFO, **Longview, Texas,** to change its frequency from **1370** to **1340 kilocycles,** to change its power and hours of operation from 250 watts daytime only, to 1000 watts, unlimited time, employing a directional antenna during nighttime. The station was also granted permission to change its transmitter site, and to install a new transmitter.

The Commission stated in its decision that the operation of the station as proposed "will not cause increased interference to the operation of any other existing station or to any station proposed in any application pending at the date the instant application was designated for hearing." The Commission said that the granting of the application "will enable the station to render a better service in practically all the service area of the station than is now available."

Chairman McNinch and Commissioner Brown did not participate in this decision.

The application of Leonard E. Wilson for voluntary assignment of license of Station KGIW of **Alamosa, Colorado,** to E. L. Allen, has been granted by the Commission. The station operates on **1420 kilocycles,** with 100 watts power.

Chairman McNinch and Commissioner Brown did not participate in this decision.

The Commission also granted the application of Charles C. Robinson to assign the license of Station KCRJ, **Jerome, Arizona,** to Central Arizona Broadcasting Company. The station operates on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

Chairman McNinch and Commissioner Brown did not participate in this decision.

The application of the KTSA Broadcasting Company, **San Antonio, Texas,** for consent to assign the license of Station KTSA from the present licensee to the Sunshine Broadcasting Company has been granted by the Commission. The station operates on **550 kilocycles,** 5000 watts LS, 1000 watts night, unlimited time.

Chairman McNinch and Commissioner Brown did not participate in this decision.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast cases beginning the week of June 5. They are subject to change.

June 6

KUSD—University of South Dakota, Vermillion, S. Dak.—Renewal of license, **890 kc.,** 500 watts, 500 watts LS, shares KFNF.

WNBC—State Broadcasting Corp., New Britain, Conn.—Modification of license, **1380 kc.,** 1 KW, unlimited time (DA). Present assignment: **1380 kc.,** 250 watts, 1 KW LS, unlimited time (DA).

June 7

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Renewal of license, **1350 kc.,** 1 KW, 1 KW LS, shares WAWZ (DA day and night).

Hearing Before the Committee

In the Matter of Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.

June 9

NEW—Neptune Broadcasting Corp., Atlantic City, N. J.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

June 26

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—C. P. to install new antenna and move transmitter and studio locally; **1290 kc.,** 100 watts, daytime.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Renewal of license, **1290 kc.,** 100 watts, daytime.

NEW—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

WCBA—B. Bryan Musselman (Assignor), Lehigh Valley Broadcasting Co. (Assignee), Allentown, Pa.—Voluntary assignment of license, **1440 kc.,** 500 watts, 500 watts LS, shares WSAN.

WSAN—WSAN, Inc. (Assignor), Lehigh Valley Broadcasting Co. (Assignee), Allentown, Pa.—Voluntary assignment of license, **1440 kc.,** 500 watts, 500 watts LS, shares WCBA.

July 6

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—C. P., **1120 kc.,** 1 KW, 1 KW LS, unlimited except from 8 to 9 p. m. Monday. Present assignment: **1120 kc.,** 500 watts, unlimited except 8 to 9 p. m. Monday.

WAPO—W. A. Patterson, Chattanooga, Tenn.—C. P., **1120 kc.,** 500 watts, 1 KW LS, unlimited time. Present assignment: **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

September 5

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—C. P., **1270 kc.,** 1 KW, unlimited time (DA night) (requests facilities of KWLC and KGCA). Present assignment: **1210 kc.,** 100 watts, 250 watts LS, unlimited time.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Renewal of license, **1270 kc.,** 100 watts, daytime, shares KWLC.

KWLC—Luther College, Decorah, Iowa.—Renewal of license, **1270 kc.,** 100 watts, daytime, shares KGCA.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KWJB—Sims Broadcasting Company, Globe, Ariz.—Granted renewal of license for the period June 1 to December 1, 1939.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted authority to transfer control of North Side Broadcasting Corp., licensee of station WGRC, from Charles Lee Harris to Charles Lee Harris and S. A. Cisler, Jr. (station operates on **1370 kc.,** 250 watts, daytime).

KHBC-KGMB—Pacific Theatres and Supply Co., Ltd., Honolulu, T. H.—Granted authority to transfer control of the Hawaiian Broadcasting Co., Ltd. (licensee of stations KHBC, Hilo, and KGMB, Honolulu), to the Consolidated Amusement Company, Ltd. (KGMB operates on **1320 kc.,** with 1 KW, and KHBC operates on **1400 kc.,** with 250 watts, unlimited time).

WGRM—P. K. Ewing, Grenada, Miss.—Granted renewal of license for the period June 1 to December 1, 1939.

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Present license extended upon a temporary basis only for the period ending July 1, 1939, pending determination upon the application for renewal.

KRBA—Red Lands Broadcasting Assn., Lufkin, Tex.—Granted renewal of license for the regular period.

WDAH—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Granted renewal of license for the regular period.

WEXL—Royal Oak Broadcasting Co., Royal Oak, Mich.—Granted renewal of license for the regular period.

WIBU—Wm. C. Forrest, Poynette, Wis.—Granted renewal of license for the regular period.

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Granted renewal of license for the regular period.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

NEW—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—C. P. for new station to operate on frequency **1310 kc.,** with 100 watts night, 250 watts day, unlimited time. The exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WCNW—Arthur Faske, Brooklyn, N. Y.—Modification of license application, already in hearing docket, amended so as to request unlimited time of operation (requests facilities of WMBQ and WWRL).

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif. —C. P. to move transmitter site locally about three miles, near Culver City, Calif.; install new equipment and increase night power from 500 watts to 1 KW and day power from 500 watts to 5 KW; increase time of operation from limited to unlimited. Exact transmitter site and type of antenna to be determined with Commission's approval. To be heard before the Commission. (Application designated for hearing because the request violates Rules 116 and 117; also because of possible interference to existing stations and pending applications involve increase in service.)

NEW—Yetta G. Samford, G. S. Shealy, Thomas D. Samford, Jr., J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—C. P. for new broadcast station to operate on **1370 kc.,** 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—C. P. to move transmitter site locally from northeast corner 12th and Olive Sts., St. Louis, to St. Clair and Warren Avenues, Nameoki, Ill.; install DA system for day and nighttime operation; change frequency from **550 kc.** to **630 kc.,** and time of operation from S-KFUO to unlimited time.

KXOK—Star-Times Publishing Co., St. Louis, Mo.—C. P. to move transmitter site locally approximately 2 miles east of previously approved site, from ½ mile northwest of Venice, Ill., to near National City, Ill.; install new equipment and make changes in DA system; change frequency from **1250 kc.** to **630 kc.,** and increase day power from 1 KW to 5 KW, employing DA system for both day and nighttime operation.

MISCELLANEOUS

KBPS—Benson Polytechnic School, Portland, Ore.—Granted special temporary authority to remain silent from 12:30 p. m., June 2, to 3 a. m., EST, July 1, in order to observe regular school vacation.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from local sunset (June 7:30 p. m., CST) to 11:05 p. m., using 100 watts power, on Sundays, June 4, 11, 18 and 25, in order to broadcast church services.

WMFO—James R. Doss, Jr., Decatur, Ala.—Granted special temporary authority to operate from 6:45 p. m. until 9 p. m., CST, on May 26, 27, and 28, in order to broadcast programs of local interest from FHA Better Homes Show, using 50 watts only.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted extension of special temporary authority for daytime operation of new WFBR plant, using DA and daytime power as authorized by C. P. modified February 23, 1939, 5 KW, in order to collect field data essential to proof of performance report, for the period May 25 to June 23.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to rebroadcast program material over high frequency broadcast station W8XWJ to be received from relay broadcast station W8XHV in connection with Police Field Day activities on May 25.

KFRO—Voice of Longview, Longview, Tex.—Denied special temporary authority to operate from local sunset (June 7:30 p. m., CST) to 11 p. m., using 100 watts power, on June 2, 6, 7, 8, 9, 14, 15, 19, 20, 21, 26, 27, 28, 29, in order to broadcast baseball games.

KOME—Harry Schwartz, Tulsa, Okla.—Denied special temporary authority to operate from 8:30 to 10:30 p. m., CST, nightly, for the period May 29 to June 27, in order to broadcast Texas League baseball games, using 100 watts only.

KODN—R. C. Hoiles, Pampa, Tex.—Denied special temporary authority to operate unlimited time on May 26, 27, 28, 29, 30 and 31, in order to broadcast local baseball games.

KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—Granted special temporary authority to operate with two 500-watt vacuum tubes for high level modulation (RCA 833) as authorized in modification of C. P. granted May 8, 1939, instead of four 250-watt tubes for high level modulation (RCA 204-A), until new directional antenna completed but not to exceed 30 days.

NEW—Vincennes Newspapers, Inc., Vincennes, Ind.—Ruling of March 31, 1939, affirmed, and denied motion to strike proposed findings and conclusions submitted by Samuel M. Emison, and to set aside the intervention granted S. M. Emison on March 31, 1939.

NEW—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted motion for order to take depositions except as to alternative place of taking and alternative notary, in re application for C. P. to use **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

KVOS—KVOS, Inc., Bellingham, Wash.—Denied petition for (1) continuance for from 30-60 days from June 28, 1939; (2) permission to take depositions 30 days after depositions or hearing relative to Bellingham Broadcasting Co., Inc. (Docket 5478), application; (3) permission to examine complaints against applicant; (4) denial of Bellingham Broadcasting Co., Inc.; (5) order requiring Bellingham Broadcasting Co., Inc. to clarify its respondent's appearance. (KVOS application involves renewal of license.)

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Referred to the Commission en banc, the motion to dismiss and return application of KOAC for C. P. to install new transmitter and antenna, move transmitter and increase power.

NEW—Clarence H. Frey & Herbert O. Greever, Logan, W. Va.—Denied, with permission to withdraw without prejudice and file a new application, the petition for leave to amend application to change frequency from **1200 kc.** to **1310 kc.**

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Dismissed motion to deny as in default application of KOVC, for C. P. to change frequency from **1500 kc.** to **1340 kc.,** and power from 100 watts, 250 watts LS, to 500 watts, 1 KW LS, unlimited time.

NEW—Milton Edge & Hobart Stephenson, Jacksonville, Ill.—Referred to Commission en banc petition for leave to amend application by substitution of party (Edgar J. Korsmeyer) for Sherman V. Coultas, deceased, in re application for C. P. to use **1310 kc.,** 100 watts, unlimited time.

KGLO—Mason City Globe Gazette Co., Mason City, Ia.—Granted alternative request for continuance of hearing, new date to be fixed by Secretary's Office, in re applications of KGLO to change frequency and power, and the application for renewal of license of KWLC, Decorah, Ia., now scheduled for June 27.

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Denied petition to accept amendment to amend Section 19(b) of applicant so as to request 1 KW night power instead of 5 KW, with permission to withdraw application without prejudice and file a new application.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate from local sunset (May, 6:45 p. m., and June, 7:15 p. m., CST), to 9:30 p. m., CST, on June 1 and 2, in order to broadcast selection and crowning of Strawberry Queen and on May 28, June 4, 11 and 18, in order to broadcast church services.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Granted special temporary authority to operate daytime with power of 1 KW using new directive antenna, for a period not to exceed 10 days, in order to make proof of performance measurements of directive antenna as authorized by permit granted November 28, 1939.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 2 to 3 p. m., EST, on June 10 and 17, and from 8:30 to 10 a. m. and 2 to 3 p. m., EST, on June 11 and 18, and unlimited time for the period June 23 to July 1, in order to broadcast programs as described in letter of May 20, 1939.

WCBN—Columbia Broadcasting System, New York City—Granted special temporary authority to operate relay broadcast station WCBN aboard aircraft *Yankee Clipper*, owned by Pan American Airways Co., on frequencies **2400, 4800, 6430, 8655, 12862.5, 17310** and **23100 kc.**, in addition to normal licensed frequencies for a period not to exceed 30 days, in order to relay broadcast special programs during second trans-Atlantic flight of the *Yankee Clipper*.

KBPS—Benson Polytechnic School, Portland, Ore.—Granted extension of special temporary authority to remain silent for the period July 1 to September 11, in order to observe regular school vacation.

WIEW—National Broadcasting Co., Inc., New York City, Portable-Mobile.—Granted C. P. for new transmitter and increase in power of an existing relay broadcast station from 20 to 25 watts.

WDZ—WDZ Broadcasting Co., Tuscola, Ill.—Granted license to cover C. P. authorizing installation of new equipment and increase in day power from 250 watts to 1 KW.

W8XSC—Mich. State College, E. Lansing, Mich.—Granted license to cover C. P. authorizing changes in equipment and increase in power to 50 watts in relay broadcast station. The license is granted on an experimental basis only, conditionally.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted modification of C. P. to install new equipment and extend commencement date to 60 days after grant and completion date to 60 days thereafter.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted license to cover C. P. authorizing change in frequency from **1370** to **1450 kc.**, and increase in power from 100 watts, unlimited time to 1 KW, unlimited employing directional antenna for nighttime operation.

NEW—World Peace Foundation, Oakland, Cal.—Denied as in cases of default application for C. P. for new international broadcast station at Oakland, Calif., because applicant failed to file a written appearance.

KPDN—R. C. Hoiles, Pampa, Tex.—Denied special temporary authority to operate unlimited time on May 17, 18, 19, 20, 26, 27, 28, 29, 30, 31, in order to broadcast baseball games.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 9 to 11 a. m., and from 1 to 3 p. m., EST, on May 30 (provided WOSU remains silent), in order to broadcast programs of a holiday character.

WCAT—So. Dak. State School of Mines, Rapid City, S. Dak.—Granted special temporary authority to remain silent from June 1 to September 11, in order to observe summer vacation.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted license to cover C. P. authorizing changes in composite equipment for 250 watts.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted authority to determine operating power by direct measurement of antenna input in accordance with Rule 137, and subject to the following power specifications: antenna current—2.95 amperes for 1 KW day; antenna resistance—115 ohms; type of antenna—vertical wire supported between two 200-foot insulated base towers spaced 340 feet; height of vertical lead 192 feet. Towers detuned by grounding for non-directive operation (non-directional). Transmission line current—3.98 amperes; resistance at common point of input to antenna system—63.0 ohms; type of antenna—3-element directional; height of vertical east and west elements, 200 ft.; overall height 204 ft.; and center element height of vertical lead 192 ft., supported from messenger cable between 2 main elements. Towers insulated with adequate ground system (directive antenna nighttime operation).

WBLK—The Exponent Co., Clarksburg, W. Va.—Granted license to cover C. P. authorizing changes in equipment and increase in day power from 100 to 250 watts.

W2XAX—Columbia Broadcasting System, Inc., New York City.—Granted modification of C. P. to extend completion date from June 16 to December 16, 1939.

KGMB—Honolulu Broadcasting Co., Honolulu, T. H.; KHBC: Hilo, T. H.—Granted petition to reconsider and grant without a hearing the applications for renewal of licenses for KGMB and KHBC. (Cause of objection removed.)

KNEL—G. L. Burns, Brady, Texas.—Denied petition to reconsider and grant without a hearing, the application requesting authority to increase time of operation from 250 watts daytime to 100 watts night, 250 watts day, unlimited time.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Granted petition to reconsider and grant without a hearing the application requesting authority to increase daytime power of station from 1 KW to 5 KW.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Denied petition to reconsider and grant without a hearing, the application for renewal of license of station WBAX.

NEW—Black River Valley Broadcasts, Inc., Watertown, N. Y.—Denied petition for special relief requesting the Commission to vacate its order of December 2, 1936, in which the applications of the Black River Valley Broadcasts, Inc. was granted and the application of Watertown Broadcasting Corp. was denied, and ordered these two applications be heard *de novo* before an Examiner, together with the applications of WCAD for voluntary assignment of license and C. P. to move station from Canton to Watertown.

NEW—Clinton Broadcasting Corp., Clinton, Ia.; and NEW—Burlington Broadcasting Co., Burlington, Ia.—Ordered that applications of Clinton Broadcasting Corp. and Burlington Broadcasting Co., be designated for further hearing on questions of interference with existing stations and pending applications for broadcast facilities and related questions.

NEW—The Courier Post Publishing Co.; and NEW: Hannibal Broadcasting Co., Hannibal, Mo.—Denied petition of Courier Post Publishing Company requesting grant of application for a new local broadcast station at Hannibal, and designated for further hearing in a consolidated proceeding, on the question of possible interference with existing stations and pending applications for broadcast facilities and related questions, the application of the Hannibal Broadcasting Co.

W8XVA—Brown Radio Service and Lab. (Gordon P. Brown, owner), Rochester, N. Y., Portable-Mobile.—Granted modification of C. P. extending completion date from July 1 to November 10, 1939.

WRNL—WLBG, Inc., Richmond, Va.—Granted modification of license to change name from WLBG, Inc., to Richmond Radio Corporation.

W9XXT—KCMO Broadcasting Co., Kansas City, Mo. (Portable-Mobile).—Granted modification of license to reduce the power of high frequency relay broadcast station from 5 watts to 0.5 watts, without new construction. This license is granted on an experimental basis only, conditionally.

APPLICATIONS FILED AT FCC

780 Kilocycles

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Modification of license to change hours of operation from daytime to unlimited time, using 250 watts power.

1120 Kilocycles

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Construction permit to make changes in transmitting equipment.

1200 Kilocycles

WSKB—McComb Broadcasting Corp., McComb, Miss.—Modification of construction permit (B3-P-2002) for approval of antenna, studio site at Main St., McColgan Hotel, McComb, Miss., and transmitter site as U. S. Highway 51, McComb, Miss. Amended: Give transmitter site as Berthadale Road, at Highway 24, McComb, Miss., and make changes in antenna.

1210 Kilocycles

KANS—The KANS Broadcasting Co., Wichita, Kans.—Authority to transfer control of corporation from Charles C. Theis to stockholders (to Herb Hollister, 48 shares common stock).

1310 Kilocycles

KOME—Harry Schwartz, Tulsa, Okla.—Modification of license to change hours of operation from daytime to unlimited time, using 100 watts power nighttime.

1340 Kilocycles

KGNO—Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Construction permit to make changes in transmitting equipment, install vertical antenna, increase power from 250 watts to 500 watts. Amended to make changes in equipment, change requested power to 250 watts night, 1 KW day.

1370 Kilocycles

KIUN—Jack W. Hawkins and Barney H. Hubbs, Pecos, Tex.—C. P. to increase power from 100 watts to 100 watts, 250 watts LS; make changes in equipment and give studio site as 306 S. Cedar St., Pecos, Tex. (no move, corrected address).

1410 Kilocycles

KMED—Mrs. W. J. Virgin, Medford, Ore.—Modification of construction permit (B5-P-1892) for increase in power and new transmitter, requesting authority to make changes in type of transmitting equipment.

1420 Kilocycles

WPRP—Julio M. Conesa, Ponce, P. R.—Construction permit to install new transmitter, vertical antenna; change frequency from **1420 kc.** to **1480 kc.**; increase power from 100 watts, 250 watts day, to 5 KW day and night; change hours of operation from specified hours to unlimited time. Amended: Specify transmitter site to be determined, Ponce, P. R.

1430 Kilocycles

KINY—Edwin A. Kraft, Juneau, Alaska.—Construction permit to make changes in transmitting equipment; increase power from 250 watts to 1 KW.

1500 Kilocycles

KVWC—R. H. Nichols, W. H. Wright and Stewart Hatch, a partnership, d/b as The Northwestern Broadcasting Co., Vernon, Tex.—License to cover construction permit B4-P-2356 for equipment changes and increase in power.

MISCELLANEOUS

WDAJ—Tampa Times Co., Portable-Mobile, area Tampa, Fla.—License to cover B3-PRY-146 for new low frequency relay station.

NEW—Head of the Lakes Broadcasting Co., Superior, Wis.—Construction permit for a new high frequency broadcast station on **26300 kc.**, 1000 watts power.

W9XSN—The Champaign News-Gazette, Inc., Portable-Mobile, area of Champaign, Ill.—Construction permit for change in equipment and request frequencies **30820, 33740, 35820, 37980 kc.**, in accordance with new rules.

W2XBF—William G. H. Finch, New York, N. Y.—Modification of license to change class of station from experimental broadcast to facsimile broadcast, and change frequency to **43740 kc.**

NEW—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—Construction permit for a new high frequency broadcast station on **40300, 41200, 41600, 41800 kc.**, 2 KW power, unlimited time, located at 89 East Ave., Rochester, N. Y. Amended to request frequency **43200 kc.**, power 1 KW.

NEW—Larus & Brother Co., Inc., Portable-Mobile, area of Richmond, Va.—Construction permit for a new portable-mobile relay broadcast station on **1646, 2090, 2190** and **2830 kc.**, 25 watts power, A-3 emission.

W9XXL—Ashland Broadcasting Co., Ashland, Ky.—C. P. for reinstatement of portable-mobile relay broadcast station on **31100, 34600, 37600, 40600 kc.**, 10 watts power, A-3 emission. Amended to specify **30820, 33740, 35820, 37980 kc.**

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Authority to transfer control of corporation from S. C. Ondarcho, W. P. Heffernan, C. A. Barker, J. A. Herman, L. R. Wyatt, E. J. Wyatt, A. B. Carrington, Jr., F. B. Leggett, W. E. Gardner, Jr., Harry Spencer, and L. N. Dibrell to L. N. Dibrell, 225 shares common stock.

NEW—Earle C. Anthony, Inc., Los Angeles, Calif.—Construction permit for new television station on **42000-56000 kc.**, 1 KW power, A-3 and A-5 emission, site to be determined, Los Angeles, Calif. Amended to request frequency band **50000-56000 kc.**

NEW—The May Department Stores Co., Los Angeles, Calif.—Construction permit for a new television station on **60000-86000 kc.**, 1 KW power, A-3 and A-5 emission, at Wilshire Blvd. and Fairfax St., Los Angeles, Calif. Amended: Specify frequency band **50000-56000 kc.**

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Barbara Gould Sales Corporation—See Bourjois, Inc.

Bourjois, Inc.—Amended complaints have been issued charging two New York organizations selling cosmetics and toilet preparations with violation of the Federal Trade Commission and Robinson-Patman Acts in connection with furnishing the services of demonstrators of their products to merchant customers, and with violation of the Robinson-Patman Act through granting price discriminations.

Respondents are (1) Bourjois, Incorporated, Bourjois Sales Corporation, Barbara Gould Sales Corporation, Bourjois Sales Corporation of California, and Bourjois Sales Corporation of New Jersey, and (2) Richard Hudnut, a corporation, Hudnut Sales Co., Inc., and William R. Warner & Co., Inc., all of New York.

Violation of the Federal Trade Commission Act is alleged because the respondents' demonstrators, while appearing to be employed by the respective merchants in their stores as disinterested salespersons qualified to give impartial advice and counsel regarding the use of various cosmetics, are in fact employed and placed therein by the respondent cosmetic companies and are able to further the sale of the respondents' preparations. The respondents' personnel plan is alleged to deceive purchasers and to have a tendency to lend itself to misrepresentation of competitors' commodities and substitution of respondents' products therefor.

Violation of the Robinson-Patman Act is alleged to occur through granting to some customers the services of demonstrators when such services are not granted to other competing customers on proportionally equal terms.

In violation of the same act the respondents are alleged to differentiate in price between different purchasers of commodities of like grade and quality sold for resale by allowing certain purchasers varied price discounts more favorable than those granted to others. The Bourjois respondents are alleged to allow such discounts from retail list prices and the Hudnut respondents from their "per dozen" wholesale list prices. (2972-2973)

Bourjois Sales Corporation—See Bourjois, Inc.

Elite Publishing Company—Steven V. Gimino and Anthony V. Gimino, doing business under the name of Elite Publishing Company, with offices at 214 Grand St., New York, have been ordered to cease and desist from misrepresentations in the sale and distribution of books advertised in magazines and other periodicals as describing "107 plans for making $20.00-$100.00 weekly in home or office, business of your own."

A "free booklet" advertised as descriptive of the plans, sent to inquirers, the Commission found, did not describe the plans in any practical detail and was merely suggestive of the general nature of each plan and some of its salient features. The plans themselves were incorporated in the larger books sold and distributed by respondents under the names "Collection of Successful Business Plans" and "The Elite Collection of Successful Business Plans."

Findings of the Commission are that all the plans involve the sale of articles or services. Many of them are adapted essentially to peddling or house-to-house sales. Although by following the respondents' proposals personal direct selling by the operator of the plan may frequently be avoided, in many cases such selling is necessary. (3521)

Richard Hudnut—See Bourjois, Inc.

Hudnut Sales Company, Inc.—See Bourjois, Inc.

William R. Warner & Company, Inc.—See Bourjois, Inc.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Brinkler School of Eating—George Henry Brinkler, 458 Ocean Drive, Miami Beach, Fla., has been ordered to discontinue misleading representations in the sale of correspondence courses in diet and health. Brinkler formerly operated as Brinkler School of Eating and as Brinkler School of Food Science.

The Commission's order is based on findings that the respondent, among other representations, advertised that congestion or waste matter in the blood is the cause of all diseases; that his courses comprise competent and adequate treatment for the cure and elimination of all diseases.

Brinkler was found to have represented that persons following his courses will achieve improved memory and eyesight, normal circulation, doubling of brain or muscle power, dependable health and activity in old age, increased creative talent and energy, a body system restored to normal functioning, and other benefits.

Findings are that congestion or waste matter in the blood is not the cause of all diseases and that the respondent's method or diet are not competent or adequate treatment for all diseases, except for a restricted number such as scurvy, beri-beri and rickets, caused by diet deficiency. (2693)

Brinkler School of Food Science—See Brinkler School of Eating.

STIPULATIONS

The Commission has entered into the following stipulations:

Hellige, Inc., 3718 Northern Blvd., Long Island City, N. Y., wholesaler of hospital and laboratory supplies, including cover glasses for use in microscopic work, has entered into a stipulation to desist from certain misrepresentations.

In the sale of its "Checker Brand" cover glasses, the respondent corporation will discontinue use, in price lists or on labels affixed to containers or in any other way, of the phrase "Made in U. S. A." or of any other words of similar inference so as to imply that the glass or the products in their entirety are of domestic origin, when such is not a fact. (2472)

Journal Printing Company—Trading as The Journal Printing Company, Max L. Hill, 415 Missouri Ave., East St. Louis, Ill., has entered into a stipulation to discontinue misleading representations in the sale of advertising layouts containing colored drawings or pictures of merchandise.

The respondent, a job printer, agrees to desist from representing that either the photographing or the engraving involved in the production of the finished advertising he offers for sale is done in his own plant, or that a plant owned, operated or controlled by him is equipped to do and does perform either the colored photography or the photoengraving work, when such are not the facts. (2470)

Kristee Products Company, Akron, Ohio, agrees that in the sale of the Kristee Fog-Lite, it will cease representing that an amber beam generally, or that the amber beam resulting from use of its product, has a greater degree of penetration or provides a clearer or better or more lengthy vision than ordinary beams. The respondent admits in its stipulation that amber light does not penetrate more than unmodified light, and that it will not improve revealing power or enable a person to see farther. (02379)

Penn-Crest Refining Company, Inc., a dealer in motor oils and other lubricants, with headquarters in Long Island City, N. Y., has entered into a stipulation to cease using the word "refining" in its corporate name, as it is not an oil refiner, and to discontinue indicating that it is located in Oil City, Pa., oil producing and refining center, when in fact it has no place of business there. (2471)

C. I. Todstad Company—Vera P. Williams, proprietor, and L. O. Williams, attorney in fact for Vera P. Williams, trading as The C. I. Togstad Company, Kokomo, Ind., stipulate that they will cease representing that sales persons, regardless of their age, residence, experience or business qualifications, can "make big money," "earn steady incomes" or "get into a business of their own" by selling the respondents' household mechandise. The respondents also agree to cease advertising that an "$8.00 free sample display" is furnished agents, so long as agents are required to make a cash deposit in order to obtain such outfits. (02380)

FCC Assignments For June

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF June
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	Commissioner T. A. M. Craven
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	Commissioner George Henry Payne
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	Commissioner Frederick I. Thompson
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	Commissioner Thad H. Brown
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	Commissioner Paul A. Walker
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	Commissioner Norman S. Case
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	Secretary T. J. Slowie
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location." Miller Asks Hearing on "Censorship" Rules

Threatened government censorship of radio programs drew fire this week from Neville Miller.

The FCC on May 23 promulgated new Rules and Regulations for the operation of international broadcast stations which included a requirement that these stations "shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation".

"If the Commission has the authority to promulgate this character of regulation in the international field, it must have equal authority with respect to domestic broadcasting, as the same provisions of law govern both classifications", Mr. Miller pointed out in a letter to the FCC Chairman Frank R. McNinch, asking for a hearing before the rules became effective.

"If licensees of international broadcast stations can be required to restrict their programs to any regulatory authority's concept of American culture, it would seem clear that the licensees of domestic broadcasting stations could be required to limit their programs to some 'official' definition of culture, education and entertainment.

"That this would constitute a violent transgression of the basic principles of American democracy is self-evident.

"We further submit that the proposed regulations would establish the precedent for such transgression and surely no such dangerous prerogative is contemplated by the Communications Act of 1934 and is in direct conflict with Section 326 of the Act which expressly prohibits any type or character of censorship or any condition or regulation 'which shall interfere with the right of free speech by means of radio communication'."

The press joined the NAB in condemning the new rules. Editorially, the New York Herald-Tribune said the rules should be reviewed and rescinded—"unless, that is, the Administration has decided that in violation of the express provisions of the Act of Congress establishing the powers of the FCC this body is to become a board of censorship". Immediate reaction came, too, from Congress where Representative McLeod (R-Mich.) said that the Commission's action "completely destroys" the broadcasting industry's freedom and "makes it the slave of a bureaucratic government". Representative Hinshaw (R-Calif.) had Mr. Miller's letter printed in the Congressional Record June 7.

Meantime President Roosevelt notified Mr. McNinch that he was expected to continue his service with the FCC. Mr. Roosevelt sent this word to Mr. McNinch in reply to the

MILLER ASKS HEARING ON "CENSORSHIP" RULES

(Continued from page 3525)

Chairman's letter expressing hope that he would not be reappointed to the Federal Power Commission.

The tentative draft of the Program Standards Code, to be revised again if necessary before it is presented to the NAB convention July 10-13 in Atlantic City, will be mailed to all members this week for their study and criticism.

Censorship

MR. MILLER'S LETTER

June 3, 1939.

The Honorable Frank R. McNinch, Chairman
Federal Communications Commission
Washington, D. C.

Dear Mr. McNinch:

On May 23, 1939, the Commission promulgated new rules and regulations for the operation of international broadcast stations. These rules included new and unprecedented restrictions and requirements as to program content and were issued without prior public hearing. Of the nine licensees operating fourteen international broadcast stations, the majority are members of the National Association of Broadcasters. This organization has a committee for the study and coordination of international broadcasting and is now accumulating more comprehensive information in this field than has been available. Meanwhile, however, these new rules and regulations precipitate certain fundamental questions which are a matter of vital concern to broadcasting generally and to the entire American public. It is to these more fundamental matters that we address ourselves.

Paragraph (a) of Section 42.03 of the new regulations provides that "A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation." It is submitted that the question as to whether a specific program reflects the culture of this country or promotes, at any given moment, international goodwill, understanding and cooperation, is a matter upon which there may be sharp differences of opinion. A literal interpretation of this regulation would, for example, require a licensee to suppress spokesmen for minority groups if either the licensee or the Commission thought their views would not promote "international goodwill, understanding and cooperation." Freedom of speech as an integral part of the culture of this country not only is a cherished tradition, but a living reality. Any requirement that international broadcast stations suppress a speaker because his remarks might not promote "international goodwill, understanding and cooperation" would, therefore, seem to be in conflict with the requirement that the service rendered by an international broadcast station "reflect the culture of this country."

We are advised by several licensees of international broadcast stations that foreign listeners rely upon stations in the United States as a source for unbiased and uncensored news of the world. This reliance is based upon the fact that these listeners know that in the United States there is no governmental supervision or control over the matter to be broadcast. In many other countries, broadcasting is an instrument of the government and listeners to their stations are aware of the fact that their programs, including news reports and information on current events, are colored to fit the philosophy and views of the government. The consequent distortion of news into self serving propaganda has evoked a growing resentment toward the countries from which it emanates, and such resentment has reacted to enhance foreign respect for the present impartial dissemination of programs from the United States. We, therefore, feel that the confidence that has been developed in the independent operations of American short-wave stations will be destroyed when it becomes known that an agency of the government of the United States has laid down requirements to control the program content of these stations.

Moreover, it is respectfully submitted that the existence of this regulation (42.03-a) needlessly places this government in a position which we believe to be contrary to our traditional policy in the field of foreign relations. There are abundant examples of instances in which some citizen of the United States has made certain utterances by radio or through the press which have aroused the antagonism of the representatives of foreign powers. It has been the customary reply of our State Department to the protests by offended powers that this country is one in which freedom of speech is an actuality and the government has no power to abridge this fundamental right. The regulation which we are discussing definitely implies official responsibility for all matter broadcast over international stations. This we believe is unsound policy and incompatible with the operation of broadcast stations by private enterprise in a democracy. It would seem equally appropriate to require government supervision and censorship of all matter contained in American newspapers circulated abroad which use the facilities of the American Merchant Marine or the second class mail for delivery. This analogy, we believe, clearly demonstrates the errors and the immediate dangers of the policy which this new regulation embodies.

We likewise desire to invite your attention to paragraph (b) of Section 42.03 which places further restrictions upon program content to the extent that it limits and prescribes the type of commercial advertisement which can be made, the type of commodity which can be advertised and then excludes all commercial or sponsored programs that "are not consistent with the purpose or intent of this section." Such regulations are neither desirable nor necessary nor susceptible to sufficient clarity of interpretation or agreement as to meaning to permit them to be practically applied. If international broadcasting is to be continued as an instrument of private enterprise, we feel that the regulatory authority should confine its functions to questions of technical efficiency, allocation and general performance in the public interest.

It seems appropriate to emphasize that the record of licensees in the international broadcast field has been one of greatly increasing service to foreign listeners. During the past two years, there has been a marked development of facilities and personnel by the various private licensees. Their programs are being exclusively designed for international audiences. The responses that have been received indicate that foreign listeners appreciate the fact that these programs, reflecting as they do, a living pattern of our democracy, have not undertaken to propagandize any political ideology. This should be continued, because the most effective way to develop and foster international goodwill by the United States is to avoid copying the tactics of totalitarian governments who supervise and direct all broadcasting.

Finally, we have been unable to find a legal basis for the regulations which we have discussed. It need only be pointed out that the authority for all powers exercised by the Commission must be found in the Act itself and that such authority must be expressly conferred or follow by necessary implication from powers expressly conferred. In this case, we can find neither. While the Communications Act of 1934 clothes the Commission with extremely broad powers on matters of allocation and the technical and physical operations of broadcast stations, we can find nothing in the Act or in the several decisions of the court which have been based upon this Act to support this character of regulation. We have been unable to find any provision of the Act or decision of the court which would authorize the Commission to pass upon the content of programs broadcast either directly by prior examination of the program material or indirectly by imposing requirements which will have the same effect.

The Federal Communications Act of 1934 is silent on the subject of program content. Not only does this absence of language support our conclusions that the Commission is without authority to regulate program content as such, whether in the international or domestic broadcasting field, but it should be particularly noted that the statutes expressly prohibit censorship in any form. We desire to emphasize the language in Section 326, which states:

> "Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, *and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.*"

If the Commission has the authority to promulgate this character of regulation in the international field, it must have equal authority with respect to domestic broadcasting, as the same provisions of the law govern both classifications. If licensees of international broadcast stations can be required to restrict their programs to any regulatory authority's concept of American culture, it would seem clear that the licensees of domestic broadcasting stations could be required to limit their programs to some "official" definition of culture, education and entertainment. That this would constitute a violent transgression of the basic principles of American democracy is self-evident. We further submit that the proposed regulations would establish the precedent for such transgression and surely no such dangerous prerogative is contemplated by the Communications Act of 1934 and is in direct conflict with Section 326 of the Act which expressly prohibits any type or character of censorship or any condition or regulation "which shall interfere with the right of free speech by means of radio communication."

In view of the importance of the subject itself and in further view of the necessary implications to which the adoption of such regulations give rise, we request that the Commission follow the same course selected by it in the adoption and promulgation of rules and regulations governing the domestic operation of broadcast stations and that it conduct hearings on these regulations. We further request that the Commission reconsider its action of May 23, 1939, and postpone final action until such time as an opportunity may be given for the conduct of a hearing upon the questions above referred to and others which are necessarily involved in the consideration of this subject.

Very respectfully yours,

NEVILLE MILLER.

REPRESENTATIVE McLEOD'S SPEECH

Mr. Chairman, a few days ago the Federal Communications Commission issued regulations governing the broadcasting of international programs by radio stations in the United States which should alarm Congress, the press, and every person in this country.

These regulations order radio stations to broadcast only international progress of good will. In effect it gives to the Commission the power to tell radio stations what they shall or shall not say over the radio. The Commission uses the term "good will," which signifies that something has to be defined or determined; in other words, censorship of the radio and censorship of speech.

It has long been apparent that the Commission has sought greater control of the air waves, but such a brazen attempt to say what shall or shall not be broadcast—in effect censorship of radio programs—most certainly was not anticipated.

When the F. C. C. attempts to tell the broadcaster what programs he shall broadcast internationally, it knows that if it can get by with this dictation there is just one short step remaining to the control of standard broadcasts or domestic programs, and when that hurdle is cleared radio is under the domination of bureaucracy and ceases to be free.

Mr. Chairman, a little more than two decades ago this Nation had sufficient belief in democratic principles to engage in a horrible and destructive war to protect and preserve what we believed to be the inalienable rights granted by God to man. Our struggles and battles during the past 150 years present additional proof of our determination to combat any attempt to destroy or change the rights extended to our people by the Constitution and the Bill of Rights.

Fortunately it is not always necessary that we conduct a war to prevent encroachments upon these natural rights. Most of these attempts to verge away from our democratic principles are adjudicated by the Supreme Court. Our forebears in creating this Court realized, as we must realize, that there are bound to be differences of opinion with respect to the various phases of our Constitution. There has been little or no uncertainty, however, regarding certain of the rights granted to us by the Constitution. Among these are religious liberty, freedom of speech and of the press, and others.

These are the natural rights and require limited explanation. We have come to take them as a matter of course. Only when they are in danger of being destroyed do we arise to defend and protect them. Needless to say, there are a few limitations on each of them. Bigamy, for instance, is prohibited, irrespective of religious belief, and freedom of speech and the press does not signify a right to libel, slander, or indecency.

When the Federal Communications Commission was created by this body it was not intended that censorship was to be part of the Commission's functions. The primary duties of the Commission are to prevent confusion in the air by allocation of wave lengths and to guard against libel or indecency. But here we have a creation of Congress, suddenly turned a Frankenstein, ignoring the will of Congress, and determining just what American radio stations shall or shall not say during international broadcasts. To carry out their purposes, violation of this fascistic principle will warrant revocation of a radio station's license and thereby force it out of business.

Gentlemen, I cannot say to you too strongly that without freedom of opinions, thoughts, and ideas this Nation has no right to entertain any hope for the survival of Democratic principles. This regulation is but a small cancer now, but unless it is cut out at the start it will spread like any unattended malignant growth, until finally free speech will be throttled, the press will be a mouthpiece for the few, and radios will blare forth only the ideas of the F. C C.

Gentlemen, no matter how you view this regulation, you can reach no other conclusion than that this is the most flagrant attempt yet made to stifle and kill the right of free speech. In all the history of our Nation no more audacious or tyrannical step has been taken to destroy a vested right. If not corrected immediately, this regulation can mean the beginning of a Fascist censorship of the press as well as of the radio.

The Supreme Court, speaking through Chief Justice Hughes, has made it clear in a unanimous decision that the scope of Federal regulation over radio relates only to the allocation of facilities. Congress, moreover, in section 326 of the 1934 Federal Communications Act, has specifically prohibited such censorship by the Commission in the following language:

> Nothing in this act shall be understood or construed to give the Commission the power of censorship of the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication. No person within the jurisdiction of the United States shall utter any obscene, indecent, or profane language by means of radio communication.

The danger of the unadulterated censorship as imposed by the Commission only last week must be apparent to all of you. It is a real threat against the newspaper and the freedom of the individual. It is something abhorrent to every American to whom freedom of speech is a precious heritage.

This action of the Radio Commission is undemocratic control of radio, and we have only to look at some of the countries of the Old World where broadcasting has been converted into the most powerful weapon of dictatorship to fully appreciate the significance of such control.

Heretofore, radio has taken its place with freedom of religion, speech, and the press, but this action completely destroys that freedom and makes it the slave of a bureaucratic government.

Mr. Chairman, the amazing predicament in which we find ourselves today calls for immediate remedial action. The President of the United States, in view of this serious situation, should forthwith demand the resignation of the entire Commission.

THE HERALD-TRIBUNE EDITORIAL

It was a foregone conclusion that the National Association of Broadcasters would protest the latest ruling of the Federal Communications Commission which restricts the broadcasting of international programs to material that "reflects the culture of the country and will promote international good will, understanding and co-operation." This, as others had already pointed out, is a form of censorship, and as such is to be resisted and rejected. As the National Association of Broadcasters is interested not only to see all efforts to impose censorship nipped in the bud, but also to see the standards of broadcasting maintained at their highest, it has naturally taken up the fight against the FCC ruling.

As a matter of fact this ruling deserves the widest possible attention on the part of every one interested in freedom of speech. Whether or not the FCC intended that the ruling should serve as an entering wedge for censorship is not the question. No matter how well intentioned the Commission's motives, the fact remains that the ruling can be interpreted so broadly that it implies drastic powers of interference in and control of broadcasting programs by the government, and that, coupled with the existing provision whereby the licenses of broadcasting stations are renewable every six months at the pleasure of the Commission, what is in effect a form of censorship is thus established.

The experience in Europe has shown very plainly that control of the air is the first objective of those who wish to see freedom of speech curtailed. The next is control of the press. These things are inseparable, and they are in defiance of the guaranties in the Constitution. For this reason the FCC ruling concerns not only the radio broadcasters but also the country at large. It should be reviewed and rescinded—unless, that is, the Administration has decided that in violation of the express provision of the act of Congress establishing the powers of the FCC this body is to become a board of censors. If this is what is intended the country has a right to know—and to act accordingly.

COPYRIGHT COMMITTEE

The Copyright Committee was in session in New York for two days (June 5-6) and gave very serious consideration to all angles of the copyright problem. Although no definite announcement can be made at this time, there were several significant developments all of which augur well.

All the various elements of the industry were represented by members who were well versed in the problems facing each particular class of station and all problems were carefully analyzed. Definite detailed information collected in various surveys, from FCC records and from questionnaires and letters from stations were presented to the committee for study.

It is the intention of the committee to know the possible effect of all plans and to select a plan which will be fair to all and which will work when adopted.

The most significant thing is that all elements of the industry are united and determined to approach copyright on an industry-wide basis, and to obtain a solution which will be both acceptable and fair to all elements. It was definitely agreed that all elements were represented on the committee and that the committee would be the sole negotiating agency for the industry, and that no negotiations would be carried on with ASCAP except through the committee.

The negotiating committee consisting of Messrs. Klauber, Lohr, Rosenbaum, Elmer and Miller met June 7 for further discussion. This committee has made an appointment with ASCAP officials for Thursday, June 15, for further discussion.

It is the object of the committee to push the negotiations as rapidly as possible so the industry may know what the final proposal of ASCAP is in the near future and long before the expiration of the present contracts.

At the meeting were:

Edwin W. Craig, WSM, Nashville, Tenn.; Walter J. Damm, WTMJ, Milwaukee, Wis.; John Elmer, WCBM, Baltimore, Md.; Gregory Gentling, KROC, Rochester, Minn.; Edward Klauber and Joseph Ream, CBS, New York City; Lenox Lohr and Mark Woods, NBC, New York City; I. R. Lounsberry, WGR, Buffalo, N. Y.; Ed Cranny, KGIR, Butte, Mont.; Sam Rosenbaum, WFIL, Philadelphia, Pa.; Clair McCollough, WGAL, Lancaster, Pa.; John Shepard, 3rd, Yankee Network, Boston, Mass.; Theodore C. Streibert, MBS, New York City; and Harold Wheelahan, WSMB, New Orleans, La.

Headquarters was represented by Neville Miller, President; Paul Peter, Research; Andrew Bennett, Legal Department; and Edwin M. Spence, Secretary-Treasurer.

TENTATIVE, PROPOSED CODE RELEASED TO MEMBERS TOMORROW

The proposed and tentative Code and new Standards of Practice which have been in the process of development since last December will be mailed tomorrow to all members.

Members are asked to examine and study it carefully and thoroughly during the intervening thirty days between now and the opening of the Annual Convention when the adoption of a code in final form will be the first order of business.

President Miller has asked every member to make comment, criticism and to advance suggested revisions between now and the time of the next meeting of the Code Committee, which will hold its final session two days prior to the convention to consider changes and recommendations made by NAB members.

The Committee has earnestly endeavored to bring forth a Code under which all might live, which protects the interests of both the listening public and the industry. It is a Code *voluntarily* imposed by member stations who will pledge *mutually* to comply with its provisions to the ultimate advance of the radio art itself in the service and acceptance of the American people. It is regarded as one of the most forward-looking steps undertaken in democratic, industrial self-regulation.

Committee members present at the New York meeting:

Edgar L. Bill, WMBD, Peoria, Ill.; E. B. Craney, KGIR, Butte, Mont.; Walter J. Damm, WTMJ, Milwaukee, Wis.; Earl J. Glade, KSL, Salt Lake City, Utah; Gilson Gray, CBS, New York City; William S. Hedges, NBC, New York City; Herbert Hollister, KANS, Wichita, Kans.; Paul W. Morency, WTIC, Hartford, Conn.; Theodore C. Streibert, MBS, New York, N. Y.; Mark Woods, NBC, New York City; and Karl O. Wyler, KTSM, El Paso, Tex. Messrs. Neville Miller, Edward M. Kirby, and Edwin M. Spence, of Headquarters Office were also in attendance.

McNINCH TO STAY AT FCC

The following letters between Chairman Frank R. McNinch of the FCC and President Roosevelt were exchanged this week:

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

June 7, 1939

My dear Mr. President,

You will recall that some time ago we discussed your reappointment of me to the Federal Power Commission, from which I had resigned to take up the work as Chairman of the Federal Communications Commission, at such time as my work at the latter Commission had been completed. I then expressed doubt as to whether or not I would feel like undertaking the responsibility of another five year term on the Federal Power Commission. You were gracious enough to leave this matter for my further consideration.

Now that the term of office on the Federal Power Commission expires June 22, 1939, I deem it my duty to call this fact to your attention and to advise you that, after most careful consideration, I must regretfully tell you that I hope you will not further consider me in that connection.

With assurances of my appreciation for your generous consideration and of my continuing high regard of and loyalty to you, I am

Faithfully yours,
Frank R. McNinch, *Chairman*,
Federal Communications Commission.

To the President
The White House.

THE WHITE HOUSE
WASHINGTON

June 8, 1939

Dear Frank:

Please accept my thanks for your thoughtful note of June seventh, reminding me that the term for which you were appointed as a member of the Federal Power Commission expires on June twenty-second and that you do not feel like returning to the responsibilities which a reappointment would entail.

I received word of your decision with less misgiving because it means that you can continue your service as Chairman of the Federal Communications Commission and devote all of your time to the exacting duties of that difficult post. I cannot, however, allow this opportunity to pass without expressing my sincere thanks for the splendid work you did as Chairman of the Federal Power Commission. Your industry, your skill in the elucidation of complex problems and your faithful stewardship of the public interest at all times, have made your services invaluable. You will be interested to know that I have decided to nominate Mr. Leland Olds of New York as your successor.

I do hope you will have a care for your health and with all good wishes remain, as always,

Very sincerely yours,
/s/ Franklin D. Roosevelt.

Honorable Frank R. McNinch,
Chairman,
Federal Communications Commission,
Washington, D. C.

RADIO TO BE SPOTLIGHTED AT ADVERTISING CONVENTION

With Mayor Fiorello LaGuardia of New York as guest speaker, the NAB Sales Managers' Committee, in conjunction with the new NAB Bureau of Radio Advertising, will occupy the spotlight at the Advertising Federation of America's annual convention at a luncheon to be attended by leading advertisers and agency executives, at the Hotel Waldorf-Astoria in New York, on June 20 at 12:30 P. M.

Neville Miller, president of the NAB, will introduce Mayor LaGuardia and act as toastmaster. Mr. LaGuardia will speak on "Radio By the American Plan." Entertainment throughout the luncheon will be made possible by the cooperation of the networks.

During the morning of June 20, the Sales Managers' Committee, under the chairmanship of Craig Lawrence, KSO-KRNT, will meet with advertising and sales managers, agency principals, account executives and radio time buyers from eastern, midwestern and far western points, for a discussion of mutual problems and for an informal analysis of the proposed new NAB Code and Standards of Practice. Mr. Miller will be present at this meeting and will be assisted by Paul Peter, Director of Research, and Ed Kirby, Director of Public Relations, who have the joint responsibility for the creation and development of the new Bureau of Radio Advertising.

Representatives of international short-wave stations will discuss the problems of international advertising by short-wave which has recently been permitted by FCC ruling. Curtis Mitchell, editor of RADIO GUIDE, will deliver an analysis of some of the shortcomings of commercial program promotion and publicity under the title "Sacred Cows of Broadcasting."

Following the luncheon there will be a closed meeting of all Sales Managers in attendance. This meeting is scheduled at 2:30.

Station owners, managers and sales managers are urged to be present at these important advertising conferences where leaders in advertising will take part in a discussion of mutual problems vital to the welfare of radio.

MILLER TO ADDRESS RMA

President Neville Miller will address the annual convention of the Radio Manufacturers Association to be held in the Hotel Stevens, June 13. His subject will be "Teamwork between RMA and NAB."

It is expected that he will outline new plans for the extension and intensification of the year-round NAB-RMA campaign.

KIRBY ADDRESSES BETTER BUSINESS MEETING IN BUFFALO

Speaking at the Business-Consumer Relations Conference, held under the auspices of the National Association of Better Business Bureaus in Buffalo this week, Ed Kirby, Director of Public Relations, told the critics of advertising that advertising furnishes the economic foundation of both a free press and a free American radio, and as such "bears a profound social importance in our democracy."

He stated further that honest merchants and manufacturers, engaged in the production, distribution and advertising of legitimate commerce through established avenues not only "welcome such consumer-relations gatherings, but encourage them." "Only the back-alley manufacturer, the fly-by-night vendor have anything to fear from a searching inquiry into the truth of advertising claims and statements," he stated.

Among those present at the gathering were Mr. John Benson, president of the AAAA; Mr. Walter D. Fuller, president of the Curtis Publishing Company; representatives from the Federal Trade Commission, the Department of Agriculture, the Consumer-Relations Division of the Securities and Exchange Commission, and various organized women's consumer study and cooperative groups.

It was the feeling of those representing advertising media that one of the new developments in the field of public relations would be in the inauguration of special studies in "consumer relations."

ACCOUNTING COMMITTEE

At a meeting of the Accounting Committee held at the Ritz Tower Hotel, New York City, June 1 and 2, the proposed questionnaire to be sent to all licensees by the FCC Accounting Department was thoroughly discussed. Mr. William J. Norfleet, FCC Chief Accountant, and Mr. de Quincy Sutton, of the FCC, attended the two day conference. Messrs. Norfleet and Sutton, on behalf of the department, were very cooperative. As a result of information obtained at previous meetings and the agreements reached at this meeting, the NAB hopes that the form of the questionnaire will be simplified so that information desired may be more easily obtained from the records as kept by station licensees. Members of the Committee present were: Chairman Harry C. Wilder, and N. L. Kidd, WSYR, Syracuse, New York; E. E. Hill, WTAG, Worcester, Massachusetts; Frank White, CBS; S. R. Dean and Harry F. McKeon, NBC; and Edwin M. Spence of NAB Headquarters Office.

Legal

TRANSCRIPTIONS AND RECORDS

Congressman James P. McGranery (D-Penna) on June 6 introduced a new bill (H. R. 6695) in Congress to amend the Communications Act so as to prohibit and penalize the recording or other mechanical reproduction of "music or other program material" without the consent in writing of the performers. This bill is similar to that introduced by Congressman Schulte (H. R. 5791) at the instigation of the Musicians' Union. It is understood that Mr. McGranery's bill is sponsored by Maurice J. Speiser, attorney for the National Association of Performing Artists. This Association is patterned after ASCAP and has been conducting a campaign for some time with the objective of preventing the use of phonograph records by stations without a license from the Association.

The McGranery bill is a word-for-word copy of the Schulte bill, with the exception that the following sentence is included in the McGranery bill: "This act is not to apply to any case of recording for private, personal, civic, or political use, or to any recording of any address or talk on subjects of a public nature." The proposed statute provides that the consent in writing of all performers of music or other program material must be obtained before the program can be recorded or otherwise mechanically reproduced for profit or gain. This includes each member of an orchestra and each participant in a program, including announcers. The penalty for violation is a fine of not more than $10,000 or imprisonment for a term of not more than two years, or both. Unless the written consent of each performer is obtained, the proposed law may prevent: (1) recording for audition purposes; (2) recording network program for subsequent rebroadcast when conditions prevent a broadcast at the time the program is delivered by the network; (3) rebroadcast of programs originating in foreign countries; (4) broadcasting of transcriptions or phonograph records; (5) the recording or rebroadcast of all addresses or speeches except those on subjects of a public nature, whether originating in this country or in a foreign country. The bill does not define what constitutes an address or talk of "a public nature."

The attention of all broadcasters is called to the NAB special mimeographed bulletin dated May 4 with respect to the Schulte bill. If you have not already advised Headquarters of the effect this bill will have on your station, it is urged that you do so immediately. The McGranery bill as introduced reads:

"A BILL

"To amend the Communications Act of 1934 so as to prohibit and penalize the unauthorized mechanical reproduction of music and other wire and radio-program material.

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Communications Act of 1934 is hereby amended by adding after section 505 a new section reading as follows:

"'SEC. 506. It is hereby declared to be unlawful for any person, without the consent in writing of the performer or performers of said music or other program material, (a) to record or otherwise mechanically reproduce or cause to be recorded or otherwise mechanically reproduced within the United States, for profit or gain, any music or other program material of any kind transmitted in any manner mentioned or described in section 2 (a); or (b) to offer for sale, sell, lease, or license, or to have in his possession for the purpose of sale, lease, or license, any record or other mechanical reproduction of music or other program material of any kind transmitted as aforesaid. This Act is not to apply to any case of recording for private, personal, civic, or political use, or to any recording of any address or talk on subjects of a public nature. Any person violating this section shall, upon conviction thereof, be punished as provided in section 501; and all records or other mechanical reproductions made in violation of this section may be seized on warrant issued by or under the direction of Attorney General of the United States, and the appropriate district court of the United States or any judge thereof may on proper cause shown order the destruction of such records or other mechanical reproductions.' "

BILLS AFFECTING BROADCASTING

CONGRESS

H. R. 6695 (Mr. McGranery, D.-Penna.) COMMUNICATIONS ACT—To prohibit recording for profit or gain any program without consent in writing of the performers. Referred to Interstate and Foreign Commerce Committee.

STATE LEGISLATION

Connecticut:

S. 167 (Fraser) FOOD AND DRUGS—FALSE ADVERTISING —Uniform State Food, Drug and Cosmetic Act, prohibiting adulteration, false advertising, mislabeling, etc., with penalty of not more than six months in jail or not more than $500 fine for violation. Prepared by the State Food and Dairy Department in line with federal regulations. Referred to Public Health and Safety.

Florida: (Adjourned Sine Die June 2)

H. 2038 (House Committee on Finance & Taxation) GROSS RECEIPTS TAX—Amending Sections 1, 2, 3, 4, 6, 7, 8, 10 and 15 of Chapter 16848 of 1935 relating to the relief of public free schools, imposing a tax upon the privilege of operating stores, etc., by decreasing a license or flat tax and by increasing the tax on gross receipts to be collected thereunder and by levying a gross receipts tax on other businesses and providing for penalties. Killed in Senate 6-1.

S. 1199 (Committee on Finance and Taxation) RACING REGULATION—Prohibiting any person, firm or corporation, operating a race track in this state, to maintain or to allow any other person, etc., to maintain and operate any telephonic or telegraphic facilities for the transmission of any information concerning racing from such track, without first obtaining permit to do so from the racing commission, etc. Referred to Calendar without reference.

Pennsylvania: (Adjourned Sine Die 5-30.)

H. 389 (Atkins et al) PENAL LAWS—Revision of the penal laws of the Commonwealth. Passed House 4-27 and Senate, as amended, 5-23.

South Carolina:

S. 858 (Bates) HOSPITAL DISTURBANCE—Makes it unlawful to annoy or disturb hospital or sanatorium patients by the use of radios or other musical instruments. Referred to Medical Affairs Committee.

Engineers, FCC Discuss New Rules and Regulations

Following the oral argument held before the FCC June 1, an informal engineering conference was held to discuss all the engineering questions involved in the proposed new rules and standards of good engineering practice. The conference was started by Chief Engineer Jett who had to leave early and turned the chairmanship of the conference over to Andrew Ring.

The conference lasted from June 5 to June 6. R. M. Wilmotte represented the NAB Engineering Committee. There were present of the Engineering Committee O. B. Hanson (NBC), William Lodge (CBS), E. J. Content (Mutual and WOR), John DeWitt, Jr., (clear channel group), G. P. Houston (WCBM). There were also present among others, representatives of WLW, WCAU and several consulting engineers.

The conference was ably led by the Chairman who clarified many regulations, the purpose of which had not been clear to broadcasters generally. Mr. Ring was receptive to many suggestions made and, although he explained that his report based on information that he gathered at the conference, would be reviewed by the FCC, it appeared likely that most of the suggestions of the NAB Engineering Committee had a good chance to be adopted.

Much of the discussion dealt with highly technical matters but on the whole, the Chairman seemed to react favorably to many suggestions which tended to make some of the regulations less rigid. Many such points were in themselves of minor importance but the trend on the whole seemed desirable. For instance, on page 12.3a of the Standards of Good Engineering Practice, it was originally proposed to require "proper bleeder resistors" to be installed across all condenser banks so as to reduce the danger of shock. It was suggested and accepted that bleeder resistors be changed to "effective automatic means." With this change, the broadcaster is at liberty to use any reasonable means that is suitable.

Another example in the same direction was the suggestion by Mr. Wilmotte that there should be some leeway between the required standards of performance of equipment under laboratory tests and the required standard of performance under normal operating conditions. That is when passing on the acceptability of a transmitter, for instance, the FCC should require a higher standard than it should require from the performance of the same transmitter under normal operating conditions in the field. The proposed standards did not differentiate between these two conditions. The suggested principle seemed to be accepted.

Many of these technical standards are difficult to establish and it was indicated that it might be desirable to continue studying them even after their adoption with a view of improving the engineering requirements to fit in with reasonable standards of operation.

Some of the broad problems and principles which had been brought up by Mr. Hogan at the original hearing on June 6, 1938 on behalf of the Engineering Committee of NAB were presented again by Mr. Wilmotte with the suggestion that the present Rules and Standards should not be held up for any major modification which might cause delay, and that committees be set up to study the possibility of amending the Proposed Rules and the Standards of Good Engineering Practice to fit in more closely with the broad principles suggested by Mr. Hogan.

Of special interest to broadcasters were the following amendments to the Proposed Standards of Good Engineering Practice which seemed likely to be adopted.

In the Proposed Standards the adjacent channel interference to the secondary service of clear channel stations were not protected from the adjacent channel interference. The Proposed Amendment was to give consideration to the protection of this service based on the merits of each case.

On page 1.3a, it is indicated that in certain cases protection may be granted beyond the normally protected contour of a station. "When it is shown that primary service is rendered beyond the normally protected contour, and when primary service of 90% of the population of the area between the normally protected contour and the contour to which such station actually serves, is not supplied by any other station or stations carrying the same general program service, the contour to which protection may be afforded in such cases will be determined from the individual merits of the case under consideration."

It was suggested that the figure 90% be deleted, but Mr. Ring pointed out that, if no standard were used, there would be danger of abuse developing and of considerable variations existing between decisions in individual cases. He also stated that the figure of 90% was not to be interpreted as a rule but only as a guide and that in certain cases it might be possible to consider much smaller percentages than 90%. He was in favor of retaining the figure 90% but thought that it was reasonable to change the wording to read "approximately 90%."

Mr. Ring suggested that it might be desirable that the measurements of power be made uniform and that the direct method of measurement be used in all cases. Owing to the increased efficiency of low powered transmitters, many 100 watt stations would have to reduce their power if it was measured by the direct method. Mr. Ring pointed out in the new Rules, local stations could apply for 250 watts of power and considered that there would be no hardship in this case. Representatives of the local stations who were present agreed.

In conclusion, it was stated that the Standards of Good Engineering Practice particularly as they affect the allocation of stations were to be interpreted as guides. In all cases special consideration would be given by the FCC to special conditions and requirements for the service of areas that were not properly served. In other words, broadcasters and applicants will have the right to present evidence indicating that the Standards of Good Engineering Practice should not be applied strictly in certain cases where they can show that deviation from these standards would be for the benefit of the listening public.

R. M. Wilmotte.

773 STATIONS

The FCC during the month of May issued an operating license to one new station and granted a permit for the construction of one new station. A comparative table by months is given below:

	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	Jun. 1
Operating stations	722	727	729	732	734	735
Construction permits	42	39	37	37	38	38
Total	764	766	766	769	772	773

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED FINDINGS OF FACT

The Federal Communications Commission, in a Proposed Findings of Fact, proposes to grant the application of WJAC, **Johnstown, Pennsylvania,** to change its assignment from sharing time with WFBG on **1310 kilocycles,** 250 watts day, 100 watts night, to unlimited operation on **1370 kilocycles,** using the same power.

In its Proposed Findings, the Commission stated that the granting of the application will result in a "more fair, efficient, and equitable distribution of radio service to a population of more than one hundred thousand persons." The Commission stated also that the operation of the station as proposed will not cause objectionable interference.

The application of Richland, Inc., for a new broadcast station at **Mansfield, Ohio,** to use **1370 kilocycles,** 250 watts power, daytime only, is proposed to be granted in a Proposed Findings of Fact of the Commission.

It is stated by the Commission that the applicant is in all ways qualified to construct and operate the proposed station and that a public need exists for the service which the applicant seeks to render. It is stated also by the Commission that the availability of economic support and of program talent "has been shown to a degree which gives reasonable assurance of operation in the public interest."

DECISION OF COMMISSION

The Federal Communications Commission has granted the application of the Sunbury Broadcasting Corporation, licensee of WKOK, **Sunbury, Pennsylvania,** to operate unlimited time instead of specified hours on its frequency of **1210 kilocycles,** 100 watts power.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of June 12. They are subject to change.

Thursday, June 15

Further Argument Before the Commission

Examiner's Report No. I-664:

NEW—King-Trencle Broadcasting Corp., Grand Rapids, Mich.—C. P., **1010 kc.,** 250 watts, unlimited time.

WSBT—The South Bend Tribune, South Bend, Ind.—C. P., **1010 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1360 kc.,** 500 watts, shares WGES.

Thursday, June 15

Further Hearing

Broadcast

NEW—Central Broadcasting Corp., Worcester, Mass.—C. P., **1500 kc.,** 100 watts, 250 watts LS, unlimited time.

Friday, June 16

KRKO—Lee E. Mudgett, Everett, Wash.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1370 kc.,** 50 watts, shares KEEN.

KRKO—Lee E. Mudgett, Everett, Wash.—Renewal of license, **1370 kc.,** 50 watts, shares KEEN.

KRKO—Lee E. Mudgett, Everett, Wash.—Voluntary assignment of license to The Everett Broadcasting Co., Inc. (Assignee); **1370 kc.,** 50 watts, shares KEEN.

NEW—Cascade Broadcasting Co., Inc., Everett, Wash.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

July 7

KUSD—University of South Dakota, Vermillion, S. Dak.—Renewal of license, **890 kc.,** 500 watts, 500 watts LS, shares KFNF.

July 11

WCOV—John S. Allen and G. W. Covington, Jr., Montgomery, Ala.—Modification of license, **1210 kc.,** 100 watts, unlimited time. Present assignment: **1210 kc.,** 100 watts, daytime.

KNEL—G. L. Burns, Brady, Tex.—Modification of license, **1500 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1500 kc.,** 250 watts, daytime.

July 14

KRLH—Clarence Scharbauer, Midland, Tex.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1420 kc.,** 100 watts, daytime.

September 6

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—C. P., **570 kc.,** 1 KW, unlimited time (DA night and day). Present assignment: **1500 kc.,** 100 watts, unlimited time.

September 11

In the Matter of Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KSAL—R. J. Laubengayer, Salina, Kans.—Granted assignment of license of KSAL from R. J. Laubengayer to KSAL, Inc.

W8XKA—Westinghouse E. and M. Co., Pittsburgh, Pa.—Granted C. P. to install a new transmitter in high frequency broadcast station; change frequency to **42600 kc.** on an experimental basis conditionally; increase power to 1 KW; move to new transmitter location in Springfield, Mass., and change emission to special for frequency modulation on an experimental basis in accordance with Sec. 40.01-40.11 and Sec. 44.01-44.07 of high frequency broadcast station W8XKA.

W1XKB—Westinghouse E. and M. Co., East Springfield, Mass.—Granted C. P. to install a new transmitter and change frequency to **42380 kc.,** and increase power to 1 KW on an experimental basis in accordance with Sec. 40.01-40.11, of high frequency broadcast station W1XKB.

WBNO—The Coliseum Place Baptist Church, New Orleans, La.—Granted voluntary assignment of license of WBNO from Coliseum Place Baptist Church to WBNO, Inc.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KABC, San Antonio, Tex.; KBST, Big Spring, Tex.; KCMC, Texarkana, Tex.; KDB, Santa Barbara, Calif.; KELD, El Dorado, Ark.; KEUB, Price, Utah; KERN, Bakersfield, Calif.; KFAM, St. Cloud, Minn.; KFGQ, Boone, Iowa; KFJZ, Fort Worth, Tex.; KGFF, Shawnee, Okla.; KFKL, San Angelo, Tex.; KGKY, Scottsbluff, Nebr.; KLUF, Galveston, Tex.; KMAC, San Antonio, Tex.; KNEL, Brady, Tex.; KONO, San Antonio, Tex.; KORE, Eugene, Ore.; KOVC, Valley City, N. Dak.; KPLC, Lake Charles, La.; KPLT, Paris, Tex.; KPQ, Wenatchee, Wash.; KRBC, Abilene, Tex.; KSAM, Huntsville, Tex.; KTOK, Oklahoma City, Okla.; KUJ, Walla Walla, Wash.; KUTA, Salt Lake City, Utah; WAGM, Presque Isle, Maine; WBNY, Buffalo, N. Y.; WCBS, Springfield, Ill.; WDAS and auxiliary, Philadelphia; WDWS, Champaign, Ill.; WELL, Battle Creek, Mich.; WGPC, Albany, Ga.; WHBB, Selma, Ala.; WHLB, Virginia, Minn.; WJMS, Ironwood, Mich.; WKBZ, Muskegon, Mich.; WMBC, Detroit, Mich.; WMBH, Joplin, Mo.; WMBR, Jacksonville, Fla.; WMAS, Springfield, Mass.; WNBF, Binghamton, N. Y.; WNLC, New London, Conn.; WOMI, Owensboro, Ky.; WPAR, Parkersburg, W. Va.; WPRA, Mayaguez, P. R.; WRGA, Rome, Ga.; WRTD, Richmond, Va.; WSLI, Jackson, Miss.; WWSW, Pittsburgh, Pa.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

NEW—Dr. Willard Craver, Thomas B. Williams and Byrne Ross (a partnership), Lawton, Okla.—C. P. for new station at Lawton, Okla., to operate on frequency **1420 kc.,** 100 watts night, 100 watts day, unlimited time, exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WSPR—Quincy A. Brackett, Lewis B. Breed, Edmund A. Laport, co-partners as Conn. Valley Broadcasting Co., Springfield, Mass.—Modification of license to change frequency from **1140 kc.** to **1240 kc.,** and power from 500 watts, limited time, to 250 watts night, 500 watts day, unlimited time. Application designated for hearing because pending applications involve increase in service and interference.)

KGHF—Curtis P. Ritchie, Pueblo, Colo.—C. P. to move transmitter site locally from 111 Broadway to corner Lake and Maryland Avenues; make changes in composite equipment and increase power from 500 watts to 1 KW. (Application designated for hearing on the following issues: to determine whether the interests of any other stations may be adversely affected by reason of interference, particularly stations KID and KRNT; because of the pendency of other applications with which a conflict may be had by reason of interference, i.e., Yuba-Sutter Broadcasters and F. W. Meyers; to determine whether the equipment which applicant proposes to use will comply in all respects with the rules and regulations of the Commission, particularly Rules 131 and 139, and will render proper service.)

MISCELLANEOUS

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate simultaneously non-synchronously with station KFAB commencing 4:45 a. m., CST, for the period June 10 to July 9, in order to conform to Daylight Saving Time.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—To operate as above except simultaneously non-synchronously with station WBBM.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Granted special temporary authority to operate simultaneously with station WAZL from 8:30 p. m., EDST, to conclusion of National and American League teams games on June 15, 16, 20, 26 and July 6 and 13.

W8XUM—WBNS, Inc., Columbus, Ohio.—Granted special temporary authority to operate a test transmitter for a period not to exceed 10 days, alternately on frequency **25.25 megacycles** and frequency **43.54 megacycles,** with power of 50 watts, in order to determine which of these frequencies would be most satisfactory for operation of facsimile broadcast station W8XUM.

In re: Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.—Granted request filed by counsel for Mayor LaGuardia for continuance of hearing heretofore scheduled for June 7, and continued same until September 11, 1939.

W9XUY—Central States Broadcasting Co., Lincoln, Nebr.—Designated application for renewal of high frequency broadcast station for hearing and granted temporary license pending hearing and decision. (Application was designated for hearing to determine technical and financial qualifications, equipment, and program service.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted special temporary authority to reduce power 15 minutes earlier than specified in license when necessary to prevent interruption of continuous programs during month of June.

W9XA—Commercial Radio Equipment Co., Kansas City, Mo.—Granted special temporary authorization to rebroadcast over high frequency broadcast station W9XA programs originating from standard broadcast station KCMO, for the normal license period of high frequency broadcast stations expiring April 1, 1940.

WKRC—Columbia Broadcasting System, Inc., Cincinnati, Ohio.—Granted special temporary authority to rebroadcast the program material to be received from American Air Lines Plane NC-14966, operating on frequency **2790 kc.,** from 12:30 to 12:45 p. m., EST, on June 4, in connection with the flood control program sponsored by the Ohio Chamber of Commerce.

KROY—Royal Miller, Sacramento, Calif.—Granted extension of special temporary authority to rebroadcast Naval Observatory time signals over station KROY from NAA-NSS at Washington, D. C., for the period June 1 to December 1, 1939.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Denied special temporary authority to operate from 8:30 p. m. to approximately 11 p. m., CST, or to end of game, on May 31, June 1, 2, 5, 6, 7, 8, 9, 12, 13, 14 and 15, in order to broadcast night games of Northern Baseball League.

KRLH—Clarence Scharbauer, Midland, Tex.—Granted motion to accept late appearance in re application for C. P. to change power and time of operation.

WPAX—H. Wimpy, Thomasville, Ga.—Granted request for order to take depositions in re application of John F. Arrington, Jr., for a new station in Valdosta, Ga., to use **1230 kc.,** 250 watts, unlimited time.

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted motion for postponement of hearing now scheduled for July 12, new date to be fixed by Secretary's Office, in re application of KUTA for C. P. to install new transmitter and antenna, and change frequency, power, and time of operation.

NEW—Samuel M. Emison, Vincennes, Ind.—Granted motion for order to take depositions in re application for new station to operate on **1420 kc.,** 100 watts, unlimited time.

KUSD—University of South Dakota, Vermillion, S. Dak.—Granted petition to postpone hearing now scheduled for June 6, new date to be fixed by Secretary's Office, in re application for renewal of license.

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Company, San Antonio, Tex.—Granted motion for leave to amend application so as to request change in frequency from **630 kc.** to **930 kc.**

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Granted petition to vacate order to take depositions in re application for C. P. to install new transmitter, change frequency, power, and time of operation.

NEW—Roy E. Martin, Opelika, Ala.—Denied petition for leave to dismiss without prejudice application for C. P. to operate on **1310 kc.,** 100 watts night, 250 watts LS, unlimited time.

WSAJ—Grove City College, Grove City, Pa.—Granted special temporary authority to remain silent for the period June 15 to September 20, in order to observe college vacation.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted extension of special temporary authority to operate with 5 KW at night, for the period June 4 to July 3, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.,** or reduces power so that additional interference is not involved.

WHP—WHP, Inc., Harrisburg, Pa.—Granted C. P. to install new type transmitter.

WHDV—Upper Michigan Broadcasting Co., Calumet, Mich.—Granted special temporary authority to operate from 9:30 to 10:30 a. m., CST, on June 13, in order to broadcast Soumi College Dedicatory Services.

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate with power of 100 watts, from 7:30 p. m., June 6, to 1 a. m., EST, on June 7, in order to broadcast congressional election returns.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from local sunset (June 7:30 p. m., CST) to 11:05 p. m., using 100 watts power, on June 3, 10, 17, 24, in order to broadcast Fair programs; on June 5 and 12, in order to broadcast Legion programs; on June 16, 23, 30, in order to broadcast Community Jamboree.

WKRC—Columbia Broadcasting System, Inc., Cincinnati, Ohio.—Granted special temporary authority to rebroadcast program material to be received from the American Air Line Plane No. 66, NC-14966, operating on frequencies **1622, 2058, 2150** and **2790 kc.,** from 10 a. m. to 1 p. m., EST, on June 4.

WDAY, Inc., Fargo, N. Dak.—Granted special temporary authority to operate a relay broadcast station on June 6, 7, 8, 9 and 10, on frequencies **30820, 33740, 35820, 37980 kc.,** 25 watts power, in connection with visit of Norwegian Crown Prince and Princess and Shrine Convention on June 7.

RCA Mfg. Co., Inc., New York City.—Granted extension of special temporary authority to operate general experimental station W3XDS, using frequency **950 kc.,** with 1 KW, to conduct a comprehensive field survey to study the effects of fading on amplitude modulated facsimile emission during the hours 2 to 7 a. m., DST, on Sundays, midnight to 5 a. m., DST, on Mondays, and 1 to 5 a. m., DST, from Tuesday through Saturday, for the period June 9 to July 8.

In re: Frequency Monitors Required by Sec. 40.02.—The Commission approved a notice to be sent to all licensees of relay, international, high frequency, non-commercial educational, facsimile, television and developmental broadcast stations, relative to the extension of the effective date of Sec. 40.02 (old Rule 981).

WBNX—WBNX Broadcasting Co., Inc., New York City.—Granted petition for reconsideration and grant of application for renewal of license, which was heretofore designated for hearing.

WCBA—B. Bryan Musselmann, Allentown, Pa., Assignor, and Lehigh Valley Broadcasting Co., Assignee, Allentown, Pa.; and WSAN—WSAN, Inc., Allentown, Pa., Assignor, and Lehigh Valley Broadcasting Co., Assignee, Allentown, Pa.—Denied motion of these parties to strike the issues, quash the hearing notice, and reconsider the applications for consent to assignment of licenses of stations WCBA and WSAN (Commissioner Craven voting "No").

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Denied motion requesting that the Commission dismiss and return the application of Oregon State Agricultural College (KOAC) for authority to increase its power from 1 KW to 5 KW, on frequency **550 kc.,** unlimited time.

NEW—Marion C. McCabe, Atlantic City, N. J.—Dismissed motion to set aside Order Granting Motion to Strike Protest and Petition for Rehearing that the said Marion C. McCabe has any legal interest in or is aggrieved or adversely affected by the action of the Commission involving the application of Press Union Publishing Co. for a new station in Atlantic City, N. J.

WJBL—Commodore Broadcasting, Inc., Decatur, Ill.—Dismissed petition of WJBL for denial of the application of Sherman V. Coultas, Milton Edge and Hobart Stephenson, because of dissolution of the applicant partnership, and denied petition of Edge and Stephenson for leave to amend their application by substitution of Edgar J. Korsmeyer as a member of the partnership for Sherman V. Coultas, deceased, and the application of the aforesaid applicant partnership was dismissed without prejudice to the right of the partners Edge and Stephenson to participate in the filing of a new application for the same or similar facilities.

WMBG—Havens & Martin, Inc., Richmond, Va.—Dismissed the petition of WMBG for severance of its application (Docket 4846) from that of WBNX Broadcasting Co., Inc. (Docket No. 4406) for the purposes of decision.

NEW—WDAY, Inc., Fargo, N. Dak., Portable-Mobile.—Granted C. P. for new relay broadcast station to operate on **1606, 2022, 2102, 2758 kc.;** power 100 watts, unlimited time.

NEW—The Champaign News-Gazette, Inc., Champaign, Ill., Portable-Mobile.—Granted license for new relay broadcast station (utilizing the equipment of high frequency relay broadcast station, W9XSM, owned by the applicant); to operate on **1606, 2022, 2102, 2758 kc.;** power 10 watts, unlimited.

NEW—The Champaign News-Gazette, Inc., Champaign, Ill., Portable-Mobile.—Granted license for new high frequency relay broadcast station (utilizing the equipment of relay broadcast station WAHJ, owned by the applicant), to operate on **30820, 33740, 35820, 37980 kc.;** power 25 watts, unlimited.

WNYL—City of New York, Municipal Broadcasting System, New York, N. Y., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station to operate on **1622, 2058, 2150** and **2790 kc.;** power 50 watts, according to Section 41.04.

WNYK—City of New York, Municipal Broadcasting System, New York, N. Y., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station to operate on **1622, 2058, 2150** and **2790 kc.;** power 50 watts, according to Section 41.04.

W2XVP—City of New York, Municipal Broadcasting System, New York, N. Y.—Granted modification of C. P. for extension of time of completion date from June 15 to December 15, 1939, conditionally.

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Granted modification of C. P. for approval of transmitter and studio sites, at Coal Branch Heights, near Charleston and 1016 Lee St., Charleston; changes in equipment and installation of vertical radiator.

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted special temporary authority to make transmitter site tests, using 100 watts portable transmitter between the hours of 12 midnight and 6 a. m., CST, for the period June 15 to July 7, 1939.

KFDY—South Dakota State College, Brookings, S. Dak.—Granted special temporary authority to operate from 7:30 p. m. to 9:30 p. m., CST, on June 5, 1939, in order to broadcast Commencement exercises of South Dakota State College.

WHBY—WHBY, Inc., Green Bay, Wis.—Granted application for renewal of license for the period ending November 1, 1939.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted extension of special temporary authority to operate from 5 to 6 a. m., CST, with 1 KW only, for the period June 8 to July 7, in order to conduct experimental farm programs.

CKLW—Essex Broadcasters, Inc., Detroit, Mich.—Granted special temporary authority to pick up Man on the Street program daily from 5 to 5:15 p. m., EST, for the period June 7 to June 17.

WQDM—Regan and Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from 8:45 to 10 p. m., on June 15, in order to broadcast graduation exercises of St. Mary's High School in St. Albans.

W2XWC—Kolorama Labs., Inc., Irvington, N. J.—Granted extension of special temporary authority to operate a television transmitter for test and experimental purposes only, for radio television transmitter in the **2000-2100 kc.** band, for operation between the hours of 12 midnight and 6 a. m., on a non-interference basis, with power of 500 watts, for the period June 7 to July 6.

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Company, Inc., Springfield, Mo.—Modification of license to change hours of operation by adding time from 5 to 6 a. m., using 1 KW power. (In addition to present licensed time of daytime with 5 KW power.)

680 Kilocycles

WPTF—WPTF Radio Co., Raleigh, N. C.—Extension of special experimental authority to operate with 5 KW power, using directional antenna, from sunset at KPO to 11 p. m., EST, for period 8-1-39 to 2-1-40.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—License to cover construction permit B1-P-2363, for equipment changes.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—Construction permit to make changes in transmitting equipment.

850 Kilocycles

WWL—Loyola University, New Orleans, La.—Extension of special experimental authority to operate unlimited time, period 8-1-39 to 2-1-40.

930 Kilocycles

KMAC—W. W. McAllister & Howard W. Davis, d/b as Walmac Co., San Antonio, Texas.—Construction permit to make changes in equipment, antenna, change frequency from **1370** to **630 kc.**, increase power from 100 watts, 250 watts LS, to 1 KW, change hours of operation from S-KONO to unlimited. Amended: Antenna changes and change requested frequency to **930 kc.**

1040 Kilocycles

KRLD—KRLD Radio Corp., Dallas, Texas.—Modification of construction permit B3-P-2080, for increase in power, new transmitter and directional antenna for day and night use, move of transmitter requesting authority to extend completion date from 7-1-39 to 8-1-39.

1120 Kilocycles

WISN—Hearst Radio, Inc., New York, N. Y.—Modification of license to increase power from 250 watts night, 1 KW day, to 500 watts night, 1 KW day.

1140 Kilocycles

WSPR—Quincy A. Brackett, Lewis B. Breed, and Edmund A. Laport, co-partners, d/b as Connecticut Valley Broadcasting Co., Springfield, Conn.—Voluntary assignment of license from Quincy A. Brackett, Lewis B. Breed and Edmund A. Laport, co-partners, d/b as Connecticut Valley Broadcasting Co., to WSPR, Inc.

1200 Kilocycles

NEW—W. B. Dennis, Plainview, Tex.—Construction permit for a new station on **1200 kc.**, 100 watts, daytime operation.

WJBW—Charles C. Carlson, New Orleans, La.—License to cover construction permit B3-P-2244 as modified for new equipment and move of transmitter.

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind. —Construction permit to move transmitter locally 150 feet (same address).

1390 Kilocycles

NEW—Hazlewood, Inc., Orlando, Fla.—Construction permit for a new broadcast station to be operated on **1390 kc.**, 1 KW, unlimited time.

1420 Kilocycles

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Modification of license to change hours of operation from simultaneous day, shares night with WILM, to unlimited time.

WILM—Delaware Broadcasting Company, Wilmington, Del.—Modification of license to change hours of operation from simultaneous day, shares night with WAZL, to unlimited time.

1430 Kilocycles

WHP—WHP, Inc., Harrisburg, Pa.—Modification of construction permit (B2-P-2090) to increase power, install new transmitter and directional antenna for night use, further requesting change in type of transmitting equipment.

1480 Kilocycles

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind. —Construction permit to change hours of operation from specified hours to unlimited time, employing directional antenna, day *and night.*

1500 Kilocycles

NEW—Frank R. Pidcock, Sr., Moultrie, Ga.—Construction permit for a new broadcast station to be operated on **1500 kc.**, 100 watts night, 250 watts day, unlimited time. Amended to request **1370 kc.** frequency.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—License to cover construction permit B2-P-2299 to install new antenna and move of transmitter.

MISCELLANEOUS

NEW—William G. H. Finch, New York, N. Y.—License to utilize the equipment of W2XBF for high frequency broadcast station to be operated on **42260** and **43400 kc.**, 1 KW, A3 and Special Emission. Amended to request frequency **42180 kc.**, and emission A3 for amplitude modulation.

NEW—Joe L. Smith, Jr., area of Beckley, W. Va. (Portable-Mobile).—Construction permit for a new relay broadcast station on **1622**, **2058**, **2150** and **2790 kc.**, power 75 watts, A-3 emission.

NEW—Donald C. Treloar, vicinity of Kalispell, Mont.—Construction permit for a new portable-mobile relay broadcast station on **31220 kc.**, 10 watts power, A-3 emission. Amended to request frequencies **30820**, **33740**, **35820** and **37980 kc.**

NEW—Don Lee Broadcasting System, Inc., Portable-Mobile, Los Angeles and environs.—Construction permit for a new television broadcast station on **156000-162000 kc.**, 100 watts power, A-5 for Visual Emission only.

NEW—WGN, Inc., Portable-Mobile, area of Chicago, Ill.—Construction permit for a new relay broadcast station on **31620**, **35260**, **37340**, **39620 kc.**, 1 watt power, Emission A-3.

NEW—Echo Park Evangelistic Association, Inc., Los Angeles, Calif.—Construction permit for a new high frequency broadcast station on **26400 kc.**, 100 watts power, A-3 emission. Amended to request frequency **25300 kc.**

W7XCY—Oregonian Publishing Co., Portland, Ore.—Construction permit for changes in equipment, increase power to 4.5 watts, and request frequencies **31220**, **35620**, **37020**, **39260 kc.**, in accordance with new rules.

W1XPW—WDRC, Inc., Meriden, Conn.—License to cover construction permit as modified, B1-MPHB-35, for frequency **43.4 mc.**, in lieu of **40.3 mc.**, in accordance with revised rules.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Maize Products Company—See Anheuser-Busch, Inc.

Anheuser-Busch, Inc.—Eight organizations producing finished corn products both for household and industrial use have been served with complaints alleging discriminations in price in violation of Robinson-Patman Act.

Respondents are: (1) Anheuser-Busch, Inc., St. Louis; (2) Piel Brothers Starch Company, Indianapolis; (3) Clinton Company, Clinton, Iowa, and Clinton Sales Company, Chicago; (4) The Hubinger Company, Keokuk, Iowa; (5) Penick & Ford, Ltd., Inc., New York; (6) A. E. Staley Manufacturing Company and The Staley Sales Corporation, Decatur, Ill.; (7) Union Starch & Refining Co. and Union Sales Corporation, Columbus, Ind., and (8) American Maize-Products Company, New York.

The respondents are alleged to discriminate in price between purchasers of commodities of like grade and quality by selling such commodities to some purchasers at a higher price than sold to other purchasers generally competitively engaged with those receiving the more favorable prices.

It is alleged that the effect of the discriminations may be substantially to lessen competition in the sale and distribution of corn products between the respondents and their competitors and between those who buy corn products from the respondents and receive lower discriminatory prices and others who buy from the respondents but do not receive the favorable prices. It is also alleged that the effect of the discriminations may be to create a monopoly in the lines in which the respondents and those in which the buyers are engaged and to injure and prevent competition between the respondents and their competitors and between the buyers who receive the favorable prices and those who do not.

The allegations of these 8 complaints are similar to those made in an amended complaint recently issued against Corn Products Refining Co., New York.

The mills of the Corn Products Refining Company and of the 8 respondent organizations are alleged to have a corn grinding capacity of approximately 382,000 bushels a day.

Principal products derived from corn, as sold by the respondents, are: (1) starch, both for food and other purposes; (2) glucose or corn syrup, and (3) corn sugar. Starch is first manufactured from the corn, and glucose and grape sugar are made by treating the starch with certain acids, the resulting solid product being sugar and the resulting syrup being glucose. Glucose is largely used in manufacturing candy, jellies, jams and preserves and in mixing syrups. (3798-3805, inclusive)

Benson Speciality Company—Pens, jewelry and electric water heaters were misleadingly advertised by Robert H. Benson and Emma Benson, distributors, 251 Plymouth Bldg., Minneapolis, it is alleged in a complaint. The respondents trade as Benson Specialty Company.

Fountain pens allegedly were advertised as being unbreakable and guaranteed for life, and necklaces as being 14-carat gold or silver, set with facsimile diamonds and guaranteed against tarnish or loss of stones, when, according to the complaint, the pens were not unbreakable or guaranteed for life and the jewelry was of cheap grade and quality.

Prices represented by the respondents as customary were in fact fictitiously and greatly in excess of regular prices, according to the complaint, and it is alleged that coupons advertised as having values of $4.41, $3.02 or $2.41 when offered as part payment for articles, actually had no such values or any value, as the prices charged by the respondents in addition to the coupons were the regular and customary prices.

Advertisements implying that the respondents' "Electro Heat Kwick" water heaters have an Underwriters' Laboratories seal of approval and also the approval of the Automotive Test Laboratories of America were misleading, according to the complaint, in that only the cord for attaching the heater has been approved by the Underwriters' Laboratories, and the Automotive Test Laboratories of America has no official standing and lacks the facilities for efficient testing of such a device. Further, the complaint alleges that the respondent's heater has been found unsafe for use by attachment to ordinary household sockets. (3795)

Clinton Company—See Anheuser-Busch, Inc.

Clinton Sales Company—See Anheuser-Busch, Inc.

Cravex Company—Trading as Cravex Company, Sara B. Plant, Burbank, Calif., distributor of an alleged cure for the alcohol habit, has been served with a complaint charging misleading representations.

"Stop Drink Habit," the respondent is alleged to have advertised. "Just put tasteless Cravex in his coffee, tea, liquor or food. * * * He won't know and soon his craving for whiskey, beer or wine should disappear."

The complaint alleges that the respondent's preparation is not a competent and effective treatment for alcoholism. (3794)

Hubinger Company—See Anheuser-Busch, Inc.

Illinois Nut Products Company, 613 West Lake St., Chicago, Ill., manufactures candy and distributes it through wholesalers, jobbers and retailers. It is alleged that dealers are furnished with assortments of malted milk balls together with push cards and that they award prizes to purchasers by the following method: Customers purchase discs or pushes on the card concealed beneath which are football terms such as "Touchdown," "Dropkick," "Field Goal" and "Off Side." Each play costs 1 cent and every play is described as a winner although a person drawing a "Touchdown," for instance, receives 20 pieces of candy as a prize, where an "Off Side" play receives only 1, the number of pieces of candy awarded being determined wholly by chance. (3807)

National Pen Company—Trading as National Pen Company and Phoenix Sales Company, Louis G. Meyers, Birmingham, Ala., has been served with a complaint alleging unfair trade practices in the sale of specialty merchandise including fountain pens and jewelry.

In advertisements the respondent is alleged to misrepresent retail prices by exaggerating the customary prices and indicating so-called marked-down figures which are in fact the customary prices. He also is alleged to offer worthless coupons represented as having certain values when offered as part payments on the purchase prices of articles.

Meyers also is charged with misrepresenting that he conducts special or introductory offers for a limited time only; that he guarantees the pens and jewelry for a lifetime and against tarnishing, and, by use of the word "facsimile" as descriptive of diamonds, that the cheap grade jewelry he sells is equipped with stones having the general appearance, qualities and brilliance of diamonds and having greater quality and value than imitation diamonds. (3796)

Penick & Ford, Ltd., Inc.—See Anheuser-Busch, Inc.

Phoenix Sales Company—See National Pen Company.

Piel Brothers Starch Company—See Anheuser-Busch, Inc.

A. E. Staley Mfg. Company—See Anheuser-Busch, Inc.

Staley Sales Corp.—See Anheuser-Busch, Inc.

Union Sales Corp.—See Anheuser-Busch, Inc.

Union Starch & Refining Company—See Anheuser-Busch, Inc.

United Factories, Inc.—A complaint has been issued against United Factories, Inc., 1302 McGee St., Kansas City, Mo., alleging misleading representations in the sale of a product designated as a reconditioner of automotive engines.

This product, "Micaseal," is described by the respondent as a "paste-like substance" which "when put into the motors through the spark plug openings, spreads and works itself around leaky pistons and rings, has an affinity for metal, and is not affected by heat of the motor."

In advertising its preparation the respondent is alleged to represent, contrary to the facts, that its use will effect substantial economies in operating an automobile through lessening of oil and gas consumption, and that it fills scores and scratches on cylinder walls and forms a cushion seal which increases compression, checks excessive carbon formation, and adds speed, power and smoothness. The respondent also is alleged to advertise, contrary to the facts, that its preparation reconditions a motor at a saving of 95 per cent over the ordinary mechanical methods of reboring cylinders and refitting pistons, and to represent, in effect, that use of its preparation produces the equivalent of a mechanical reconditioning job. (3797)

Wright Products Company—Isaac S. Friedman, trading as Wright Products Company, 4303 North Keeler Ave., Chicago, Ill., who sells and distributes hosiery, clocks, pen and pencil and manicure sets, is alleged to furnish his operators with push cards containing feminine names on discs concealing numbers. Customers allegedly purchase chances through selection of the names and the person who gets a name identical with that concealed and finally revealed under a master seal receives wholly by chance an "Animated Spinning Wheel Clock," while the recipients of a certain number also receive a prize. It is alleged that numbers 1 to 19 cost only the amount the participator draws but that any number over 19 costs 19 cents and four numbers are free. (3806)

STIPULATIONS

The Commission has entered into the following stipulations:

American Premium House—Jack Chertow, trading as American Premium House, 269 Canal St., New York, has made a stipulation to desist from the use of lottery methods in the sale of novelty merchandise to ultimate consumers.

The respondents agree to discontinue supplying or placing in the hands of others, pull cards or other lottery devices for the purpose of enabling such persons to dispose of or sell any merchandise by the use thereof and to cease the use of a scheme, plan or method of sale or of promoting the sale of merchandise which involves the use of any lottery, gift enterprise or scheme of chance whereby the identity of an article of merchandise to be purchased or the price to be paid therefor are determined by lot or chance. (2474)

American Spectacle Company, Inc., 136 West 52nd St., New York, has entered into a stipulation to discontinue misleading representations in the sale of sun glasses.

The respondent corporation agrees to desist from representing or from placing in the hands of others the means of representing that its sun glasses bar or exclude 94 per cent of harmful glare or any other percentage which exceeds the actual capacity to exclude glare. (2476)

American Seed & Plant Company—Trading as American Seed and Plant Company, A. Otis Arnold, Quincy, Ill., has entered into a stipulation to discontinue misleading representations in the sale of "Golden Seal" and "Ginseng" plant seeds.

The respondent agrees to desist from representing, either directly or by implication, that any one can grow Ginseng or Golden Seal, or that to cultivate these plants is easy or in all instances profitable, and that Golden Seal and Ginseng prices have increased in recent years. (02383)

Master Laboratories, Inc., 2626 West End St., Omaha, Nebr., has signed a stipulation to cease misleading representations in the sale of poultry remedies.

In advertising "Poultone", "Master Capsule" or similar products, the respondent agreed to desist from representing that administration of such remedies to sick poultry will solve all worm problems faced by the poultry raiser or will kill all worms or serve as a treatment and control of worms generally. (2477)

Milshire Garment Company, Inc., 270 West 38th St., New York, has made a stipulation to discontinue misleading representations in the sale of sport coats and suits.

The respondent company agrees to cease representing directly or by implication that a garment is 100 per cent camel's hair when the fiber content is not such and to discontinue indicating directly or by implication or appearance of a product the composition of a garment of mixed fibers without naming all such fibers, with equal conspicuousness, in the order of their predominance by weight and without giving the percentage of each such fiber present to such extent as is necessary to prevent misunderstanding.

Under its stipulation, the respondent company will also forego the use, in connection with its labels or brands, of pictures or depictions of a camel or other animal in a manner tending to deceive purchasers concerning such merchandise, and the use of the legend "100%" or any representation of similar import in connection with its labels or brands as descriptive of merchandise in a manner tending to deceive the purchasing public as to the quality, composition or character thereof. (2473)

Ring-Rout, Inc., 710 Queen & Crescent Bldg., New Orleans, will discontinue advertising that treatment by means of its product, Ring-Rout, will kill the fungi of athlete's foot, in actual cases of infection, without an appreciable length of time between its application to the infected area and the killing of the fungi, and that laboratory tests indicate Ring-Rout is effective in completely destroying the fungi of athlete's foot. The respondent admitted in its stipulation that its preparation will not kill athlete's foot fungi unless brought into direct contact therewith. (02382)

Scholl Manufacturing Co., Inc., 211 West Schiller St., Chicago, agrees to discontinue representing that arthritic or rheumatic-like foot and leg pains, callouses, fatigue, sore heels and tired feet are always signs or symptoms of weak or fallen arches and that "Dr. Scholl's Scientific Arch Supports" will quickly relieve all foot pains and physical disturbances and will assure the wearer of correction of weak or fallen arches without massage or exercise, or that they will alone restore the arch to normal. The respondent also will cease representing that "Dr. Scholl's Scientific Shoes" will eliminate the possibility of fatigue whether caused by improperly fitting shoes or otherwise, or will eliminate the possibility of strain on muscles, nerves and ligaments. (02381)

Clifford W. Wells—Selling information as to "How to Obtain a Job in the American Merchant Marine", Clifford W. Wells, 109 North Front St., Baltimore, has entered into a stipulation.

"Become a seaman. Sail the seven seas", Wells is quoted as advertising in his literature. "You can sail to whatever country you want, simply by waiting for a ship that makes a regular voyage to it. No experience or training is required to fill the jobs that you start in at—advancement is rapid."

The stipulation recites that this type of advertising implies that Wells has particular, exclusive knowledge about available positions in the American Merchant Marine or on sea vessels and is able to inform applicants how to obtain such jobs. He admitted, however, that the information imparted in his "instructions" is general and readily available from sources other than himself. (02385)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Cotton Belt Mattress Company—E. E. Phillips, trading as Cotton Belt Mattress Company, Pinetops, N. C., has been ordered to discontinue misleading representations in the sale of mattresses.

Phillips was found to have falsely advertised the constituent fiber and material of certain of his mattresses by use of the terms "All Layer Felt," "100% Layer Felt—Staple Cotton," "Felt-Plated—Cleaned Cotton Motes," and "Felt-Plated—Washed Cotton," when in fact such products were not all layer felt or otherwise as represented.

Pointing out that the word "felt," when used in connection with mattresses, is recognized in the trade as meaning a product made of fibers of cotton or wool which have been garnetted together into a mat or web, the Commission ordered the respondent to cease and desist from using the term "felt" alone or in connection with other terms to describe mattresses not made in accordance with this definition. (3781)

Monarch Stove Top Company—An order has been issued prohibiting misleading representations in the interstate sale of the "Monarch Stove Top," an appliance for use on open top gas ranges or stoves, by W. K. Honbaum, Hamburg, Mich., trading as Monarch Stove Top Company.

The order directs the respondent to cease and desist from representing that use of his appliance will prevent soiling of windows, walls or curtains by open top gas stoves or ranges; that the appliance is properly ventilated or insures proper combustion and is safe or harmless, and that its use will reduce gas consumption and increase the cooking capacity of a stove or range.

Bureau of Standards tests show and the Commission finds that the respondent's representations are not according to facts; that use of the appliance may be dangerous because of a possibility of producing carbon monoxide gas, and that the device is not a perfect sanitary system for gas ranges and open top gas stoves. (3383)

Publix Printing Corporation, 633 South Plymouth Court, Chicago, manufacturer of sales promotion cards, has been ordered to cease and desist from selling or distributing its cards or any other devices so made that their use by retail dealers may constitute the operation of a gift enterprise or lottery in the sale of products to ultimate consumers.

The Commission also has served Mason, Au & Magenheimer Confectionery Manufacturing Company, 22 Henry St., Brooklyn, with an order prohibiting the use of lottery methods in connection with the sale of candy to ultimate consumers. Findings are that the respondent company distributed to dealers candy assortments packed in a manner involving use of lottery plans. (3742-3477)

Technical Laboratories—Misrepresentation of the healing properties of a preparation for treating nasal catarrh, hay fever and asthma, is prohibited under an order issued against H. F. Allen, trading as Technical Laboratories and as Technical Products Company, 24 Bridge Road, Berkeley, Calif.

The order directs that Allen cease representing that his preparation, designated as "Aratone" and "Sinozone," is a competent and safe remedy, cure or treatment for nasal catarrh, hay fever, asthma or colds; that it is healing, will prevent or cure nasal irritation, and will aid in preventing poisons being carried from the nasal passage into other parts of the body; that its use is harmless and that it has any medicinal or therapeutic value in treating the diseases named other than as a palliative remedy to afford temporary relief. (3435)

Technical Products Company—See Technical Laboratories.

FTC CLOSES CASE

The Federal Trade Commission has closed its case against A. L. Hilkemeyer and R. J. C. Tricou, trading as Louisiana Hatcheries, 822 Poydras St., New Orleans. The respondents had been charged with unfair competition in the interstate sale of baby chicks.

The case, in so far as it referred to Hilkemeyer, was dismissed, it appearing that he is not a partner in the business. The case against Tricou, sole owner of the business, was closed without prejudice to the Commission's right to reopen it, should future facts so warrant.

Tricou agreed to observe and abide by the trade practice rules for the baby chick industry promulgated by the Commission December 31, 1938. The rules were held to regulate the practices with which the respondent had been charged.

NAB Reports

NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 24, June 16, 1939

FCC Orders Hearing on "Censorship" Rule

Expressions from the NAB, Congress, the press and the American Civil Liberties Union led the FCC this week to order a public hearing on its "censorship" rule for international broadcasting stations.

Technically, the Commission acted upon a petition from the American Civil Liberties Union requesting withdrawal or amendment of the rule stating that international stations "shall render only an international broadcast service which will reflect the culture of this country and which will promote international good will, understanding and cooperation".

The hearing was set for July 12—the third day of the NAB convention in Atlantic City. The NAB promptly called the Commission's attention to this, feeling that the coincidence must have been an oversight.

Before the Commission ordered the hearing, Senator Wheeler (D-Mont), Chairman of the Interstate Commerce Committee, called the Senate's attention to the rule, saying it was "a form of censorship which the Congress of the United States never contemplated when it passed the law".

"On the contrary, Congress specifically provided that there should be no censorship", Senator Wheeler added.

"I think anybody who is interested in the subject agrees that the radio must be free from censorship. I am told that the broadcasting companies and the National Association of Broadcasters are asking for a hearing upon this particular matter. The rule was adopted without any hearing. I sincerely hope the Commission will grant a hearing to the broadcasting companies, and I sincerely hope that they will modify a rule which would tend to bring about censorship in the United States over national and international broadcasting".

After Senator Wheeler had inserted in the Record Neville Miller's letter asking for a hearing and more than a dozen newspaper editorials condemning the "censorship" rule,

FCC ORDERS HEARING ON "CENSORSHIP" RULE

(Continued from page 3539)

Senator Johnson (R-Calif.) arose to say that he was "in hearty accord with the remarks of the Senator from Montana".

"We want no censorship of any sort in this country", Senator Johnson added. "If it is begun in one particular, it is only a step to another particular. So, as the subject is first broached let us take care of and take care of it as it ought to be taken care of."

Representative Celler (D-New York) sent a letter to Chairman Frank R. McNinch of the FCC saying he was "disturbed" by the rule; that he did not think that the Commission "was on firm ground" and that he hoped "earnest reconsideration will be given the regulation in question".

The FCC, after it had ordered the hearing, notified the NAB and said that "an appropriate notice of appearance should be filed" if the NAB desired to be heard.

The texts of the various statements and communications follow:

THE CIVIL LIBERTIES PETITION

Roger N. Baldwin, a director of the American Civil Liberties Union has filed the following with the Federal Communications Commision asking for the withdrawal or amendment of Rule 42.03(a) dealing with international broadcasting.

The petition states:

"Whereas Rule 42.03(a) of the Rules and Regulations of the Federal Communications Commission states:

'A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation. Any program solely intended for, and directed to an audience in the continental United States does not meet the requirements of this service.'

"And whereas the above mentioned rule tends to deprive the American public, including the petitioner, of the right of free speech by means of radio communication;

"And whereas the enforcement of the above mentioned rule will tend to constitute censorship of the radio communications of the American public, including the petitioner;

"And whereas the above mentioned rule conflicts with the provisions of Section 326 of the 1934 Communications Act;

"And whereas the petitioner is vitally interested in the preservation of freedom of speech by radio communication in the United States;

"Now, therefore, your petitioner prays that Rule 43.03(a) be reconsidered and withdrawn, or amended to remove the restrictions concerning the type of program material that may be broadcast by international broadcast stations."

THE FCC ORDER

34571

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

In re:
Rule 42.03(a)

ORDER

The Commission having under consideration the Petition for the Withdrawal or Amendment of Rule 42.03(a) filed on behalf of the American Civil Liberties Union;

It Is Ordered, that a hearing be held before a quorum of the Commission at 10:00 A. M. on the 12th day of July, 1939, at the Commission's offices in Washington, D. C., on the question of whether Rule 42.03(a) reading as follows, shall be modified, revised, or amended:

"A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation. Any program solely intended for, and directed to an audience in the continental United States does not meet the requirements for this service."

Any persons desiring to participate and be heard shall on or before the 5th day of July, 1939, file a notice of such appearance with the Secretary of the Commission. A copy of this Order shall be released to the Press for general distribution, and a copy mailed to each licensee of a radio broadcast station.

Federal Communications Commission,
(S.) T. J. Slowie,
Secretary.

FCC TO NEVILLE MILLER

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

June 15, 1939.

Mr. Neville Miller
National Association of Broadcasters
Washington, D. C.

My dear Mr. Miller:

This will reply to your letter dated June 3, 1939, addressed to Chairman McNinch, in which you refer to and discuss the rules and regulations promulgated by the Commission on May 23, 1939, pertaining to international broadcast stations.

A Petition in proper and customary form, requesting the withdrawal or amendment of Rule 42.03(a) was filed with the Commission on behalf of the American Civil Liberties Union June 9th. The Commission has ordered that a hearing be held on this matter July 12, 1939, and directed that anyone desiring to participate shall file a notice of appearance on or before July 5th. If your organization desires to be heard on the questions involved an appropriate notice of appearance should be filed.

Very truly yours,
T. J. Slowie,
Secretary.

FROM THE "CONGRESSIONAL RECORD"

Mr. WHEELER. Mr. President, I desire to call attention to and to have inserted in the Record a letter from the National Association of Broadcasters, together with several editorials from various newspapers throughout the country. I wish in particular to call attention to the fact that the Federal Communications Commission on May 23 adopted some new rules and regulations respecting international broadcasting. Among the rules which they adopted was the following:

A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international good will, understanding, and cooperation.

I call the attention of the Senate to the fact that if that rule should stand, it would give the Commission the right to censor the broadcasting of speeches by Members of the United States Senate. In other words, if I or some other Senator desired to make a speech on international questions over an international radio, the rule would give the Commission the right to say that the speech which was about to be made did not reflect the culture of the country, and might possibly stir up bad feelings in some other country. It is a form of censorship which the Congress of the United States never contemplated when it passed the law. On the contrary, Congress specifically provided that there should be no censorship.

I think everybody who is interested in the subject agrees that the radio must be free from censorship. I am told that the broadcasting companies and the National Association of Broadcasters are asking for a hearing upon this particular matter. The rule was adopted without any hearing. I sincerely hope the Commission will grant a hearing to the broadcasting companies, and I sincerely hope they will modify a rule which would tend to bring about censorship in the United States over national and international broadcasting.

I have here a number of clippings from various newspapers throughout the country. They are from Ohio, Indiana, Boston, Omaha, and various other States and cities throughout the United States. I ask unanimous consent that both the letter and the clippings be included in the body of the RECORD as part of my remarks.

Mr. JOHNSON of California. Mr. President——

Mr. WHEELER. I yield to the Senator from California.

Mr. JOHNSON of California. Have any steps been taken to secure a hearing upon this matter?

Mr. WHEELER. There was no hearing at the time the rule was promulgated. I understand that it was adopted without the matter really being given very serious consideration by the Commission.

In fairness to the Commission, I think it should be said that they inadvertently adopted the rule without appreciating what they were doing. The Chairman of the Commission, Mr. McNinch, was not present. He was away, ill; but the rule was taken up and adopted. I understand that some of the broadcasting companies, and perhaps the National Association of Broadcasters, have asked for a hearing. Certainly they should be given a hearing, and the matter should be thrashed out.

If the Commission has sought to impose censorship by radio, whether international radio or national radio, I think the Congress of the United States ought to pass a more stringent law against censorship of any kind or character in radio.

Mr. JOHNSON of California. Mr. President, I rose simply to say that I am in hearty accord with the remarks of the Senator from Montana. I hope the hearing will be accorded the companies that may wish it; or, if they do not ask for a hearing, I hope the committee itself will take the matter in hand and determine just what should be done. We want no censorship of any sort in this country. If it is begun in one particular, it is only a step to another particular. So, as the subject is first broached, let us take care of it, and take care of it as it ought to be taken care of.

Mr. WHEELER. I thank the Senator.

I may say, for instance, that we have the question of neutrality before the Senate. Senators take different views with reference to neutrality. If the Senator from California and the Senator from Nevada [MR. PITTMAN] should take different views with reference to neutrality, as they probably would, it might be said that the Senator from Nevada would be permitted to make a speech over the radio, because there would be in it nothing which would be detrimental to any foreign country; and, on the other hand, the Commission might very easily say that what the Senator from California was going to say should not be sent out over the international radio.

Mr. JOHNSON of California. Quite so; and the word "cultural" has a peculiar meaning according to the State Department. We might say something that was not in accord with the cultural views of somebody in the State Department, and then we would either be required to retract it or we would not be permitted to say it at all. So the subject is of sufficient importance that I am very, very glad the Senator from Montana has raised the question today. Let us continue our consideration of it until we find just what the situation is; and, if it be such as we suspect, let us remedy it.

Mr. WHEELER. I thank the Senator.

REPRESENTATIVE CELLER'S LETTER

The Honorable Frank R. McNinch,
Chairman, Federal Communications Commission,
Washington, D. C.

Dear Mr. McNinch:

This letter is written to you as Chairman of the Federal Communications Commission, in all kindliness and good will.

I am disturbed with one of the regulations recently promulgated by your Commision, which provides as follows: "A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international good will, understanding, and cooperation." What is "international good will" to one, may be international ill will to another. Furthermore, what is meant by "understanding;" and what is meant by "cooperation?" There is no common definition of these words, and therefore the language used is somewhat vague.

If I were scheduled to speak on one of the four international broadcasting stations, and were suddenly stopped on the score that I was not promoting "international good will, understanding, and cooperation," I would be deeply resentful against the broadcasting company that sought thus to interrupt or scotch my efforts.

Whether or no there is involved in this regulation a degree of censorship, I will not state at this juncture. But if there is censorship, then the regulation would be without force and effect, because the Federal Communications Act of 1934, (section 326), denies the Commission the right to exercise power of censorship over radio communication. That section, likewise, denies the Commission any right to interfere with freedom of speech.

Frankly, I do not think the Commission is on firm ground. I do hope therefore that earnest reconsideration will be given the regulation in question.

Let me also point out another significant fact. The Judiciary Committee, of which I am Acting Chairman, is now considering a bill which provides that no rule or regulation can be promulgated by any department or agency of the Government unless or until public hearings can be held; that any one aggrieved by such rule or order shall have the right to appeal to the Courts; and that such regulation must be supported by substantial evidence in its consideration by the Courts.

This bill puts into a common mold practically all of the agencies of the Government, with but few exceptions. Most of the departments and agencies have voiced protest on the score that their activities are so different from each other that they cannot be placed in a common pattern. However, public opinion as reflected in the Congress is growing impatient with some of the departments and commissions which make rules and regulations that at times go far beyond, as it is alleged, their basic statutes. It is thus charged in many quarters that the agencies are legislating.

You would indeed be giving great comfort to the proponents of this bill,—you would be giving them great ammunition for argument,—if your regulation concerning international broadcasting were not properly founded upon, or could not be deemed justified by the basic Communications Act of 1934. It may be that you have information not known to the public or to the Members of Congress which would clear up the situation. I repeat, in all kindliness, I ask for enlightenment.

Cordially yours,
Emanuel Celler.
Representative,
Tenth New York District.

MILLER URGES CONTINUED TEAMWORK BETWEEN NAB AND RMA

Speaking at the annual membership luncheon of the Radio Manufacturers Association at the Hotel Stevens, Chicago, Neville Miller, NAB President, last Tuesday declared that "anything which affects one branch of radio directly or indirectly affects the other. If the broadcaster did not continue to provide the finest radio service in the world, the radio dealer would find very little market for new sets and parts. On the other hand, if the manufacturers attempted to foist inferior receivers on the public, if parts and tubes did not give the fine reception to which the American listener is accustomed, we broadcasters would find little audience for our programs, no matter how fine they were. There is a vital need of continued teamwork, therefore, between NAB and RMA."

Mr. Miller stated that with television on the horizon and with facsimile broadcasting already here, the broadcasting industry was going through a "period of technological transition" and there was greater need than ever before for mutual understanding and cooperation.

He further pointed out that the present size of the radio industry has been made possible through the private and competitive system of American broadcasting. He declared that wholehearted cooperation of the broadcasting industry in the NAB-RMA campaign was manifested in Open House Week of April 17, when the goodwill promotional drive was inaugurated. He prophesied that forthcoming plans for fall and winter promotion would meet with the widespread approval and support of both branches of radio.

Ed Kirby, Director of Public Relations, who accompanied Mr. Miller to the RMA meeting, announced that through Joe Marty, executive secretary, the active participation of the Radio Servicemen of America has been obtained and that from now on "shoulder to shoulder" cooperation of servicemen is available to every NAB member station.

Already several members, he reported, have worked out plans wherein servicemen, calling on hundreds of homes a week to service sets, also undertake surveys on program preferences and listener reactions. Radio Servicemen's Association estimates that its members call on 350,000 homes a week and are in personal contact with listeners the year round, so that much valuable information may be uncovered for the benefit of the industry through this RSA cooperation.

LARGER NUMBER EXPECTED TO ATTEND AFA-NAB MEETING

A crowd larger than first anticipated is now expected at the NAB radio panel of the Advertising Federation of America Convention next Tuesday at the Waldorf-Astoria in New York, Craig Lawrence, KRNT, Chairman of the Sales Managers' group announced today.

Invitations have been issued to principal advertising men and women in Chicago, Detroit, New York, and to all NAB members to attend the morning and the luncheon meeting where Mayor Fiorello LaGuardia will address the group on the subject "Radio By the American Plan".

In the morning session, the proposed NAB Code will be discussed by President Miller. Frank Mason, vice president in charge of international radio for NBC will discuss the problems of international broadcasting and new problems brought on by the recent action of the FCC in permitting commercial advertising on international short-wave stations. Curtis Mitchell, editor of *Radio Guide* will review some observations he has made on shortcomings in publicity promotion of commercial programs.

The afternoon session will be given over to a meeting of the NAB Sales Managers for a round-table discussion, "How To Sell More Radio". Headquarters will be represented by President Miller, who will introduce Mayor LaGuardia at the luncheon; Paul Peter, Director of Research; and Ed Kirby, Director of Public Relations. The latter two will discuss the organization and projected work of the new Bureau of Radio Advertising.

FREE OFFERS

A flood of contingent advertising propositions has streamed into broadcasting stations during the last few weeks.

The number of these sent to Headquarters indicated, however, that few, if any, stations were interested.

The NAB has notified every firm suggesting a cost-per-inquiry or commission deal that it undertake a regular radio advertising campaign. Stations, networks and agencies might well follow up with literature, rate cards, and so forth. These firms appreciate the value of radio advertising or they would not be trying to use it on any basis.

Among the firms which have approached stations for contingent deals recently were the Philatelic Banking Service, the "Southern Sportsman", the International Associates' Press, the Radio Advertisers Company, the Radio Traveling Corporation, the Imperial Chemical Company and Farjoe and Company.

The American Spice Trade Association is still trying to chisel free time.

The National Highway-U. S. 40 Association is asking for free time to promote the use of that road.

The Waldorf-Astoria Hotel, New York, sent out a "news release" about how cheap it was to dine and dance there.

The National Hotel Association bluntly refused to try to help obtain local sponsorship for the National Hotel Week announcements they sent out.

Any member considering the use of programs offered by the American Civil Liberties Union or the National Association of Manufacturers should write to Headquarters for information about these.

CRAVEN ADDRESSES RMA ON TELEVISION PROBLEMS

Declaring that "it is surprising that the Radio Manufacturers Association should request the Commission to approve standards at such an early stage of development in television," Commissioner T. A. M. Craven of the FCC, told manufacturers at the RMA convention that he personally has "always felt that in this country private enterprise should be given the utmost freedom consistent with the interest of the public as a whole."

"It appears that the spectre of television, remote as it may be, has already begun to affect the economic stabilization of not only the existing radio manufacturing industry but also the existing industry involved in the broadcasting of regular voice and music programs to the public," he said.

"There is no need for an adverse effect. If the effect is adverse it must be the result of a lack of logical thinking and coordinated planning. Jobbers and others who sell broadcast receivers to the public should know that while television is here in the early stages of practical technical development, it is not here and cannot be here for several years from the standpoint of stabilized operation of a real service on a nation-wide scale.

"Thus, television is still in the experimental phase of development and while it is necessary for the public to participate in this phase to a limited degree, it would be foolhardy for the industry to lead the public into the belief that television is here as a practical reality as a stable service to the public on a national or even on a regional scale. The very fact that television has developed so rapidly in the past very few years should indicate that with the same intensive research in the future as in the past the public can expect greater improvements both in quality, simplicity, and cost. However, credit should be given for the wonderful strides in technical development achieved by the industry to date. The fact that you have already developed the technical phases of television to such an extent is a marvelous achievement. For this, the industry deserves the meritorious acclaim of every thinking person.

"The further development of television requires not only courage on the part of this industry but also the will to proceed. It is necessary for this industry to foster the development of television. Unless they do this they will be in no position to cry for protection when someone else undertakes the job. The public, having tasted the fruits of the inventions of modern genius, organized and financed by your industry, will not be denied the promise of the service which transmits over a distance not only the voice but also vision, in the form of culture, news, and entertainment."

MUSICIANS CONVENTION

No mention of terms for new contracts between the A. F. and M. and broadcasting stations was made during the first four days of the six-day union convention in Kansas City this week. A full report on the convention will be sent to all members after its close.

SENATE PASSES BARBOUR BILL

The Senate approved and sent to the House the Barbour Bill to permit transportation in interstate commerce of prize fight movies. The NAB endorsed the bill since it would permit television transmission of the fights.

MONITOR STATION BILL

Senator Wheeler (D-Mont), Chairman of the Senate Interstate Commerce Committee, introduced the following bill this week at the FCC's request:

> That the Federal Communications Commission be, and it is hereby, authorized to purchase for the United States a suitable site in the State of Massachusetts, provided a suitable site now owned by the Government is not available for the purpose, and cause to be erected thereon, according to plans and specifications to be approved by it, a suitable building or buildings, for use as a radio monitoring station, or to modify or reconstruct existing buildings or facilities on such site for such purpose, and to provide the necessary associated antenna systems, roadways, power, water, and sanitary facilities, including the construction and installation of geniometric apparatus and including necessary outfits, apparatus, and equipment at a total cost of said site, buildings and equipment of not to exceed Thirty Thousand Dollars ($30,000).

MONITORS ORDERED

The FCC has sent to all licensees of relay, international, high frequency, non-commercial educational, facsimile, television and developmental broadcast stations the following announcement dealing with the requirement of frequency monitors:

> The attention of all licensees of relay, international, high frequency, non-commercial educational, facsimile, television and developmental broadcast stations is specifically called to the provisions of Section 40.02 of the rules and regulations governing broadcast stations listed above. This section requires that each such station shall have installed at the transmitter a frequency monitor having accuracy of one-half the allowed tolerance of the station. This section becomes *effective September 15, 1939,* and all stations must have a monitor by that time.
>
> The attention of the licensee is also called to the fact that all of these stations except relay stations must install the monitor at the transmitter. An external standard or remotely located measuring equipment, though it may be common to several stations, *does not* meet the requirements of a frequency monitor. Relay stations must be checked by means of a monitor of the required accuracy at the beginning of operation and as frequently thereafter as necessary to maintain the operating frequency within the required tolerance.
>
> Two frequency monitors, which will meet the requirements of Section 40.02 (old Rule 981) have been inspected by the Commission. The Commission has been advised that these frequency monitors or frequency measuring devices may be supplied by the manufacturers in sufficient quantities to meet the demand.
>
> Section 40.02 was originally effective September 15, 1936, but this date has been extended from time to time due to the lack of commercially available equipment which will fulfill the requirements of this rule. The monitors required by this rule *are not approved by the Commission,* but shall have an accuracy of one-half of the allowed tolerance of the class of station with which

used. It is the responsibility of the licensee to see that the monitor will meet the frequency accuracy and operate in accordance with good engineering practice.

RADIO MEASUREMENTS

During the month of May, broadcast measurements were made by the Federal Communications Commission of 722 stations with 43 not measured.

The measurements showed that 646 stations had a maximum deviation within 0-10 cycles; 64 stations with a deviation of 11-25 cycles; 9 stations with a deviation of 26-50 cycles; and 3 stations with a maximum deviation of over 50 cycles.

LICENSE APPLICATIONS HELD UP

The Federal Communications Commission has announced that final action on nine applications pending before the Commission was being withheld because the facilities requested conflict with or involve the North American Regional Broadcasting Agreement. This Agreement, which was drawn up at the Havana Conference in December, 1937, allocates frequencies for standard broadcast stations on the North American Continent. The Agreement has already been ratified by the Governments of the United States, Canada, and Cuba and awaits only ratification by the Government of Mexico to become effective.

The nine applications on which action is being withheld are as follows:

Evening News Press, Port Angeles, Wash.
KVL, Inc. (KEEN), Seattle, Wash.
Michael J. Mingo, Tacoma, Wash.
Tacoma Broadcasters, Inc., Tacoma, Wash.
Radio Service Corp. (KSEI), Pocatello, Idaho.
St. Lawrence Broadcast Co., Ogdensburg, N. Y.
Cuyahoga Valley Broadcasting Co., Cleveland, Ohio.
South Bend Tribune (WSBT), South Bend, Ind.
King-Trendle Broadcasting Corp., Grand Rapids, Mich.

EXPERIMENTAL RULE CHANGED

The FCC has announced that Section 51.22 of the Rules and Regulations Governing Experimental Services, was amended by deleting the word "April" and inserting in lieu thereof the word "October."

FCC REPORT

The FCC's report to Congress on its investigation of the A. T. and T. included the following suggestion affecting broadcasting:

> *Fourth,* amend Section 202(b) so as to make it clear by specific language rather than by implication that practices, classifications, regulations and facilities, as well as services and charges, in connection with the use of wires in chain broadcasting shall be subject to regulation by this Commission and so that this section of the Act will correspond to the preceding half of the section, 202(a).

Legal

FLORIDA'S NEW MONOPOLY LAW

Florida's new copyright monopoly law (NAB REPORTS, June 2, p. 3514), seeking to curb the activities of pools controlling the public performance of copyrighted music, became the law of the State Tuesday, June 12. The complete text of the law follows:

AN ACT relating to public performing rights in copyrighted musical compositions and dramatico-musical compositions; defining the same; regulating licensing of same; prescribed filing fees; making provisions for a resident agent in the state; levying a tax on the gross receipts from the licensing of such rights within the State of Florida; providing for the enforcement of this Act; the promulgation of rules and regulations, governing the enforcement of this Act; appropriating the proceeds of the tax and fees levied herein and repealing certain laws in conflict herewith.

Be it Enacted by the Legislature of the State of Florida:

Section 1. As used in this Act, "person" means any individual, resident or non-resident, of this state, and every domestic or foreign or alien partnership, society, association or corporation; the words "performing rights" refer to "public performance for profit"; the word "user" means any person who directly or indirectly performs or causes to be performed musical compositions for profit; the term "blanket license" includes any device whereby public performance for profit is authorized of the combined copyrights of two or more owners; the term "blanket royalty or fee" includes any device whereby prices for performing rights are not based on the separate performance of individual copyrights.

Section 2. It shall be unlawful for any person to sell, license the use of, or in any manner whatsoever dispose of, in this state, the performing rights in or to any musical composition or dramatico-musical composition which has been copyrighted, and is the subject of a valid existing copyright, under the laws of the United States, or to collect any compensation on account of any such sale, license or other disposition, unless such person:

(a) Shall first have filed with the Comptroller on forms prescribed by the Comptroller a list describing each such musical composition and dramatico-musical composition, the performing rights in which said person intends to sell, license or otherwise dispose of in this state, which description shall include the following: The name and title of the copyrighted composition, the date of the copyright, the number or other identifying symbol given thereto in the United States copyright office, the name of the author, the name of the publisher, the name of the present owner of the copyright to said composition, and the name of the present owner of the performing rights thereto. Additional lists of such copyrighted compositions may be filed by any such person from time to time, and shall be subject to all the provisions of this Act. A filing fee of two cents a composition shall be required by the Comptroller for filing any list under this Act.

(b) Shall simultaneously file an affidavit which shall describe the performance rights to be sold, licensed or otherwise disposed of and shall state that the compositions so listed are copyrighted under the laws of the United States, that the facts contained in the list to which said affidavit relates are true, that affiant has full authority to sell, license or otherwise dispose of the performing rights in such compositions; and the affidavit shall set forth the name, age, occupation and residence of the affiant; and if an agent, the name, occupation and residence of his principal.

Section 3. The list provided for in the preceding section shall be made available by the Comptroller to all persons for examination, and taking of copies, in order that any user of such compositions in this state may be fully advised concerning the performing rights therein, and avoid being overreached by false claims of ownership of said performing rights, and also avoid committing innocent infringements of said works. The Comptroller may, if in his discretion he deems it necessary, in order to prevent such overreaching and to protect the citizens of this state from committing innocent violations of the copyright laws of the United States, cause a list of all such copyrighted material filed with him to be published once a year or oftener in a form and medium which he shall deem suitable for said purpose. A duplicate of any list so filed by any such person shall at his request be certified by the

Comptroller and shall by the Comptroller be given or delivered to such person, who shall exhibit the same on demand of anyone to whom such person seeks to sell, license or otherwise dispose of said performing rights.

Section 4-A. It shall be unlawful for two or more owners of the copyrights of musical compositions or dramatico-musical compositions to associate or combine together in any manner, directly or indirectly, for the purpose of issuing blanket licenses for the public performance for profit of their compositions upon a blanket royalty or fee covering more than one, or all, of such compositions owned or controlled by the members of such association unless each individual copyright owner included in such association, or such association in behalf of each individual copyright owner, also shall make available to each user of such compositions within the state, at the option of the user, the right to perform publicly for profit each such copyrighted musical composition owned by him or it at a price established for each separate performance of each such composition. To this end, there shall be filed with the Comptroller, either as a part of the list required by Section 2 hereof or as a separate document by such copyright owner, or by such association in behalf of such owner, a schedule of prices for the performing rights to each separate performance for profit of each such composition contained in such list, together with an affidavit of the copyright owner of such compositions that the price so stated has been determined by such copyright owner acting for himself and not either directly or indirectly in concert or by agreement with the owner or owners of any other copyrights. Such schedule of prices may contain reasonable classifications determined by use and function, or either, of the users of said compositions, with separate price for each classification, provided that there is equal treatment of all persons within each classification and that there is no unreasonable discrimination between classifications. Any copyright owner may at his election fix one price which shall be applicable to each rendition of each of such compositions owned by him except to the extent that he elects to name specific compositions and to fix other prices for each rendition thereof; and said prices shall remain in force and effect until a new schedule of prices with respect to the performing rights to such compositions has been similarly filed in the office of the Comptroller, at any time, at the election of such owner changes in prices to become effective seven days from the date of filing thereof. The schedule of prices provided for herein shall be made available by the Comptroller to all persons for examination and the taking of copies, and may be published by him in the same manner as provided in Section 3 hereof.

Section 4-B. Any person issuing a blanket license for performance rights shall file with the Comptroller within thirty days from the date such blanket license is issued a true and complete copy of each such license issued or sold with respect to performance within this state, together with the affidavit of such person that such copy is a true and complete copy of the original and that it sets forth each and every agreement between the parties thereto with respect to such performing rights. The Comptroller shall charge for filing such contracts the same fee allowed clerks of the circuit court for similar services.

Section 4-C. It shall be unlawful for any person selling, licensing the use of or in any manner whatsoever disposing of or contracting to dispose of, in this state, the performing rights in or to any musical composition or dramatico-musical composition, to make any charge or to contract for or collect any compensation as a condition of using said performing rights based in whole or in part on any program not containing any such composition, and any such charge or contract for compensation shall be valid and enforceable only to the extent that it is based and computed upon a program in which such composition is rendered.

Section 4-D. It shall be unlawful for any person selling, licensing the use of or in any manner whatsoever disposing of or contracting to dispose of in this state public performing rights in or to any musical composition or dramatico-musical composition to make any charge or to contract for or collect any compensation for the use or performance of any such composition that has not been listed with the Comptroller as provided in Section 2.

Section 5. At the time of filing the information required in Sections 2 and 3, the owner of said performing rights shall execute and deliver to the Secretary of State on a form to be furnished by the Secretary of State, an authorization empowering the Secretary of State to accept service of process on such person in any action or proceeding, whether cognizable at law or in equity, arising under this Act, and designating the address of such person until the same shall be changed by a new form similarly filed; and service of process may thereafter be effected in this state on such person in any such action or proceeding by serving the Secretary of State with duplicate copies of such process; and immediately upon receipt thereof the Secretary of State shall mail one of the duplicate copies by registered mail to the address of such person as stated on authorization last filed by him. A filing fee of $5.00 shall accompany this notice and the Secretary of State shall deposit same in the General Revenue Fund of the State of Florida.

Section 6. No person shall be entitled to commence or maintain any action or proceeding in any court with respect to such performing rights, or to collect any compensation on account of any sale, license or other disposition of such performing rights, in this state, except upon pleading and proving compliance with the provisions of this Act.

Copies, certified by the Comptroller as such, of each or all of the lists, license agreements, affidavits and other documents filed with the Comptroller pursuant to the requirements of this Act, shall be furnished by the Comptroller to any person upon request at the prices regularly charged by a clerk of the circuit court for such work. Such certified copies shall be admitted in evidence in any action or proceeding in any court to the same extent as the original thereof.

Section 7. From and after the effective date of this Act there is hereby levied, and there shall be collected, a tax, for the act or privilege of selling, licensing, or otherwise disposing of performing rights in such compositions in this state, in an amount equal to three per cent of the gross receipts of all such sales, licenses or other dispositions of performing rights in this State, payable to the State Comptroller on or before the fifteenth day of March, 1940 with respect to all such gross receipts for the portion of the calendar year 1939 after the effective date of this Act, and annually thereafter, on or before the fifteenth of March of each succeeding year, with respect to the gross receipts of the preceding calendar year. A return on a form prescribed by the Comptroller shall be made by all persons subect to this tax on or before the 15th day of March every year which shall accompany a remittance of the tax due.

The Comptroller shall have authority through his authorized agents to examine and audit the books and records of any person he may deem subject to the tax or fees under this Act and may require such persons to appear before him at his office in the Capitol in the City of Tallahassee, Florida with such records and papers as may be necessary after giving thirty days notice to such person through said person's authorized agent, the Secretary of State.

The Comptroller shall also have authority through his authorized agents to examine and audit the books, records and accounts of any licensee or user making payments for use of public performing rights in the State of Florida to any person in order that the Comptroller may determine or check on gross receipts of those selling or licensing public performing rights in the State of Florida. Any person refusing the Comptroller or his duly authorized agents access to such books, records and accounts shall be subject to penalties prescribed in Section 9 hereof and may be required to appear in person with all books, papers and accounts required by the Comptroller at the Comptroller's office in the Capitol. Tallahassee, Florida within ten days after receipt of notice which the Comptroller shall send by "registered mail, return receipt requested".

Should the Comptroller determine that any person liable for any tax or fees under this Act has made an incorrect return or has made no return at all, or has failed to pay any tax or fees due, the Comptroller shall after determining the amount of such tax or fees due the State of Florida, from the best information at his command, certify such claim for delinquent taxes to said person through his duly designated agent, the Secretary of State, and unless payment of such delinquent tax is received within thirty days of delivery of said notice to the Secretary of State the Comptroller shall apply to a Circuit Judge in Leon County for the appointment of a receiver to take over and administer all assets of said delinquent tax payer in the State of Florida.

The Circuit Judge upon the Comptroller's application properly authenticated, shall appoint some agent of the Comptroller as receiver, to serve without further compensation, but who shall be allowed all actual expenses. After posting such bond as the judge may determine proper, the said receiver shall take over and administer the affairs of said delinquent taxpayer within the State of Florida, collect accounts and do all things necessary to protect the interests of both the State of Florida and the said delinquent taxpayer and from such collections as he may make, he shall first pay the expenses of the receivership and any litigation incident thereto and the tax plus interest at the rate of 2% per month or fraction thereof from the last day of the year for which the tax was due.

After having satisfied the claims of the State and paid all costs of the receivership the receiver shall make a return to the court who shall order all assets returned to the taxpayer.

Section 8. It shall be unlawful for any person, without the consent of the owner thereof, if said owner shall have complied with the provisions of this Act, publicly to perform for profit, in this state, any such composition, or for any person knowingly to participate in the public performance for profit of such composition, or any part thereof.

Section 9. Any violation of this Act shall constitute a misdemeanor, to be punished as provided elsewhere in the laws of this state.

Section 10. Any person or persons who negotiates or collects or attempts to collect license fees or other exactions or acts in any capacity whatsoever as a representative or agent for any person owning public performing rights of any copyrighted composition shall be subject to all the penalties in this Act provided for violations thereof.

Section 11. Any person in this State aggrieved by reason of any violation of this Act may sue thereof in the circuit court in which he resides or in the circuit in which the violation took place to recover any damages as the result of the violation of the terms of this Act or to require specific performance under the provisions of this Act and shall be entitled to recover his costs including reasonable attorneys fees to be fixed by the court.

Section 12. The several Circuit Courts of this State shall have jurisdiction to prevent and restrain violations of this Act, and, on the complaint of any party aggrieved because of the violation of any of the terms of this Act anywhere within this State, it shall be the duty of the State's attorney in their respective circuits, under the direction of the Attorney-General, to institute proceedings, civil or criminal or both under the terms hereof, to enforce any of the rights herein conferred, and to impose any of the penalties herein provided. In civil actions such proceeding may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of have been duly notified of such petition, the Court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the Court may at any time make such temporary restraining order as shall be deemed equitable.

Section 13. In the event of the failure of the State's Attorney and Attorney-General to act promptly, as herein provided, when requested so to do by any aggrieved party, then such party may institute a civil proceeding in his own behalf, or upon behalf of Plaintiff and others similarly situated, as the State's Attorney and the Attorney-General could have instituted under the terms of this Act.

Section 14. After the costs and expenses of enforcing this Act and the collection of the taxes and fees herein levied and imposed are deducted the amount of which costs and expenses are hereby appropriated to be paid from the proceeds of this Act, there is hereby appropriated the entire balance paid into the Comptroller under and by virtue of this Act to the General Revenue Fund of the State of Florida.

Section 15. All laws or portions thereof whether general, special or local, which relate to the same subject matter as this Act and which are inconsistent with the provisions of this Act, are hereby superseded by the provisions of this Act to the extent that such inconsistency exists.

Nothing contained in this Act shall be so construed as to impair or affect the obligation of any contract or license which was lawfully entered into prior to the effective date of this Act.

Provided, however, nothing in this Act shall be construed to repeal, supersede or modify any of the statutes of the State of Florida pertaining to monopoly or restraint of trade, including but not limiting the generalities of the foregoing Sections 1, 2-C, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13 and 14 of Chapter 17807, Laws of Florida 1937. Provided further, the revenue provisions of this Act shall take effect immediately it becomes a law and persons having contracts to sell public performing rights to users in the State of Florida shall file copies of such contracts with the Comptroller within thirty days of the date this Act becomes a law and shall within ninety days of the time this Act becomes a law comply with other provisions of this Act that require filing of any data.

Section 16. If any section in this Act, or any part of any section shall be declared invalid or unconstitutional, such declaration of invalidity shall not affect the validity of the remaining portions hereof.

Section 17. This Act shall take effect immediately upon its becoming a law. Law without Approval, June 12, 1939.

FEDERAL COMMUNICATIONS COMMISSION

FINDINGS OF FACT

The Federal Communications Commission has announced a Proposed Findings of Fact in which it is proposed to grant the application of WTHT, **Hartford, Conn.,** to permit a power increase from 100 watts day to 250 watts day, to install new equipment, to make antenna changes, and to change transmitter site locally.

The Commission stated in its Proposed Findings that a public need has been shown for the additional service in the Hartford area proposed by the station, and that the operation of the station as proposed will not cause objectionable interference to the operation of any existing station or to any station proposed in any application pending at the time of the hearing of this case.

The Commission in a Proposed Findings of Fact proposed to grant the application of the Saginaw Broadcasting Company, **Saginaw, Michigan,** and Gross and Shields, Saginaw, Michigan, both asking for new stations in that city to operate on **1200 kilocycles,** with 100 watts night, 250 watts LS, specified hours, and **950 kilocycles,** 500 watts power, daytime only, respectively.

The Commission stated that there is a public need in Saginaw for the service and that both of the applications will receive cooperation of local organizations in the city. The Commission stated also that advertising support is available for both of the proposed stations, and the granting of the application in each case is in the public interest.

DECISIONS OF COMMISSION

The Federal Communications Commission has granted the application of Hugh J. Powell and Stanley Platz for consent to the voluntary assignment of license of KGGF, **Coffeyville, Kansas,** to Hugh J. Powell. The station operates on **1010 kilocycles,** 1000 watts, sharing time with WNAD.

The application of the Eastern States Broadcasting Corporation, licensee of WSNJ, **Bridgeton, New Jersey,** for a construction permit to increase the station's hours of operation from daytime only to unlimited time with 250 watts daytime and 100 watts night, operating on **1210 kilocycles** has been granted by the Commission.

The Commission has granted the application of the M. & M. Broadcasting Company for a construction permit for the erection of a new station at **Marinetta, Wisconsin,** to operate on **570 kilocycles** with 250 watts power, daytime only.

The Commission has granted the application of broadcasting station KTRB at **Modesto, California,** for license renewal. The station operates on **740 kilocycles,** 250 watts, daytime only.

The Commission has denied the application of the Pillar of Fire for a construction permit to erect a new international broadcasting station at **Zarephath, New Jersey,** to operate on **6080, 11830,** and **17780 kilocycles,** 5000 watts power, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast cases beginning the week of June 19. They are subject to change.

Monday, June 19

WJBW—Charles C. Carlson, New Orleans, La.—Renewal of license, **1200 kc.,** 100 watts, shares WBNO.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.,** 100 watts, unlimited time. Present assignment: **1200 kc.,** 100 watts, shares WBNO.

Tuesday, June 20

Further Hearing

NEW—Neptune Broadcasting Corp., Atlantic City, N. J.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

Wednesday, June 21

WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Modification of license, **1120 kc.,** 500 watts, 1 KW LS, unlimited time. Present assignment: **920 kc.,** 1 KW, daytime.

Friday, June 23

WSUI—The State University of Iowa, Iowa City, Iowa.—C. P., **880 kc.,** 1 KW, 5 KW LS, unlimited time (DA day and night). Present assignment: **880 kc.,** 500 watts, 1 KW LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

July 31

WHA—University of Wisconsin, Madison, Wis.—C. P., **670 kc.,** 50 KW, unlimited time (requests facilities of WMAQ). Present assignment: **940 kc.,** 5 KW, daytime.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Renewal of license, **670 kc.,** 50 KW, unlimited time.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.,** 250 watts LS, limited time.

September 8

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—C. P., **1200 kc.,** 100 watts, daytime.

September 15

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Renewal of license, **31600, 35600, 38600** and **41000 kc.,** 100 watts, 100 watts LS, Emission A-3, unlimited according to Rule 983 (a).

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license, **42180 kc.,** 100 watts, 100 watts LS, Emission A-3, unlimited according to Rule 983 (a).

November 1

NEW—Wm. F. Huffman, Wisconsin Rapids, Wis.—C. P., **580 kc.,** 250 watts, unlimited time (DA night).

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—The Louisville Times Company, near Eastwood, Ky.—Granted C. P. for new facsimile broadcast station on an experimental basis, frequency **25250 kc.,** 500 watts.

WLLH—Merrimac Broadcasting Co., Inc., Lawrence, Mass.—Granted extension of special experimental authority to operate synchronously with station WLLH at Lowell, Mass., on **1370 kc.,** with variable power of 10 to 100 watts, for the period ending January 1, 1940.

WHK—Radio Air Service Corp., Cleveland, Ohio.—Granted modification of license to increase day power from 2½ to 5 KW.

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted modification of C. P. to make changes in authorized equipment and changes in DA system and to extend commencement date to 30 days after grant and completion date to 180 days thereafter.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license to increase day power from 500 watts to 1 KW. Application designated for hearing to determine the question of possible interference and because pending applications involve increase in service.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KCMO, Kansas City, Mo.; KFIZ, Fond du Lac, Wis.; KGFL, Roswell, N. Mex.; KFRO, Longview, Tex.; KIUN, Pecos, Tex.; KOTN, Pine Bluff, Ark.; KRNR, Roseburg, Ore.; KTEM, Temple, Tex.; KTSW, Emporia, Kans.; KVOE, Santa Ana, Calif.; KVWC, Vernon, Tex.; KXL, Portland, Ore.; WAPO, Chattanooga, Tenn.; WATL, Atlanta, Ga.; WCBM, Baltimore; WCHV, Charlottesville, Va.; WDNC, Durham, N. C.; WFOR, Hattiesburg, Miss.; WGL, Fort Wayne, Ind.; WHBQ, Memphis, Tenn.; WHFC, Cicero, Ill.; WHLS, Port Huron, Mich.; WILM, Wilmington, Del.; WKBB, E. Dubuque, Ill.; WKBV, Richmond, Ind.; WLAP, Lexington, Ky.; WLEU, Erie, Pa.; WMSD, Muscle Shoals City, Ala.; WOC, Davenport, Iowa; WPAD, Paducah, Ky.; WRAK, Williamsport, Pa.; WSAU, Wausau, Wis.; WRDW, Augusta, Ga.; WSTP, Salisbury, N. C.; WSYB, Rutland, Vt.; WABY, Albany, N. Y.; WAZL, Hazleton, Pa.; WDAN, Danville, Ill.; WEOA, Evansville, Ind.; WGAL, Lancaster, Pa.; WIBM, Jackson, Mich.

MISCELLANEOUS

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 8 to 10 p. m., EST, on July 3, and from 9 to 11 a. m. and 1 to 3 p. m., EST, on July 3 and 4 (provided WOSU remains silent), in order to broadcast holiday programs.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate auxiliary transmitter of station WENR, at Downers Grove, for the period June 14 to July 13, until new antenna can be put up at WBBM's location.

KWLC—Luther College, Decorah, Iowa.—Granted special temporary authority to reduce its broadcasting schedule to 1 hour daily for the period June 12 to August 12, in order to observe summer vacation.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted extension of special temporary authority to operate simultaneously with WTAW from 8 to 9 p. m., CST, the following Mondays: June 12, 19, 26 and July 3, in order to broadcast special programs from Louisiana State University and special addresses by the President and members of the faculty of that University.

WSVS—Seneca Vocational High School, Buffalo, N. Y.—Granted special temporary authority to remain silent on the following dates: July 1 to September 10, inclusive, summer vacation; October 12, Columbus Day; October 27 and 28, State Teachers Convention; November 7, Election Day; November 11, Armistice Day; November 30, December 1 and 2 (noon) to December 31, inclusive, Christmas vacation. To operate from 8:30 to 10 a. m. and from 2 to 3 p. m., EDST, instead of EST, from September 10 to September 23 (provided WBNY remains silent).

W8XUJ-W8XNU—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to use facsimile broadcast experimental station W8XUJ and high frequency station W9XNU at Carew Tower, for the period June 9 to July 8, in order to complete radiation tests to determine whether or not shielding is needed in television rooms and also to make survey of station W8XNU to determine coverage of this frequency from Carew Tower location.

W6XUD—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted special temporary authority to operate an additional portable ultra high frequency Pack transmitter, with construction and technical features similar to the equipment licensed under call letters W6XUC, 1 watt, using frequencies **132260, 134080, 135480, 135760 kc.,** for the period June 15 to 30.

NEW—WDAY, Inc., Fargo, N. Dak., Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station upon an experimental basis only, conditionally, frequencies **30820, 33740, 35820** and **37980 kc.,** conditionally, 25 watts.

NEW—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** 50 watts.

WDAJ—Tampa Times Co., Tampa, Fla., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** 40 watts.

KMED—Mrs. W. J. Virgin, Medford, Ore.—Granted modification of C. P. to install new equipment.

W9XXL—The Ashland Broadcasting Co., Inc., Ashland, Ky., Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station, frequencies **30820, 33740, 35820** and **37980 kc.,** on an experimental basis conditionally, 10 watts.

NEW—Larus & Bros. Co., Inc., Richmond, Va., Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.,** 25 watts.

KVWC—The Northwestern Broadcasting Co., Vernon, Tex.—Granted license to cover C. P. authorizing changes in composite equipment and increase in day power from 100 to 250 watts.

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted license to cover C. P. authorizing changes in transmitter site and installation of vertical radiator.

WCOS—Carolina Advertising Corp., Columbia, S. C.—Granted modification of C. P. approving transmitter and studio sites, changes in equipment, and approval of vertical antenna.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted modification of C. P. to extend completion date from July 1 to August 1.

WDSM—WDSM, Inc., Superior, Wis.—Granted modification of C. P. approving transmitter site and changes in authorized equipment and extension of commencement date to 10 days after grant and completion date to 90 days thereafter.

National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate experimental relay broadcast stations W2XF, W2XK, W3XEK, W3XPO, W3XPP, W6XDE, W6XDG, W8XUE, W8XB, W9XAP, W9XDV, W9XDW, W9XXD, W9XXG, W10XAH, W10XAL, W10XAK, W10XAM, W10SAN, W10XAP, W10XAX, W10XCG, W10XCH, W10XDX, W10XDY, W10XDZ, W10XEA, W10XEB, W10XED, W10XFQ, W10XFR, W10XCG, W10XN, W10XV and W10XY, on the frequencies **31.22** and **37.02 mc.** in lieu of present assignments **31.1** and **37.6 mc.,** for the period June 19 to July 18, 1939, pending adjustment of relay broadcast frequency assignments above **30 mc.,** as contemplated by General Order No. 19.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 4 p. m. to 5 p. m., CST, on June 11, 1939, in order to broadcast Commencement Services of Purdue University, and from 7:15 p. m. to 10 p. m., CST, on June 17, 1939, in order to broadcast Purdue University Music Festival.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from international broadcast stations W2XE and W3XAU over station WKAQ, on a non-commercial experimental basis only, for the period beginning June 20 and ending in no event later than July 19, 1939.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9 a. m. to 11 a. m. and from 2 p. m. to 6 p. m., AST, on June 11, 18, and 25, 1939, in order to broadcast baseball games.

KFVS—Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted special temporary authority to operate from 7:30 to 9 p. m., CST, on June 13, in order to broadcast talk by Dr. L. M. Birkhead.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate simultaneously with KICA from 7:30 to 9:30 p. m., MST, on July 2 and 9, in order to broadcast evening church services. Also to broadcast same hours June 11, 18, 25, in order to broadcast evening church services.

WINS—Hearst Radio, Inc., New York City.—Granted special temporary authority to operate from 10:15 p. m. to midnight, EST, on June 9, in order to broadcast opening of WINS studio in the Worlds Fair.

W2XDG—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate high frequency broadcast station on the frequency **38.65 mc.** pending action on application for modification of license, for the period June 18 to July 17.

WCOV—John S. Allen and G. W. Covington, Jr., Montgomery, Ala.—Granted petition for order to take depositions in re application for modification of license to change hours of operation from daytime to unlimited, using **1210 kc.,** 100 watts night, 100 watts LS.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted petition for order to take depositions in re application for C. P. to install new equipment and increase power.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate from 1:30 to 3 p. m. and 4 p. m. to LS (June 7:45 p. m., EST, June 10), in order to broadcast alumni parade and varsity baseball game; to operate from 10:30 a. m. to 12 noon in order to broadcast Commencement Exercises of Theological School, and from 2:30 to 4 p. m., on June 11, Baccalaureate Service of the College of Letters and Science; to operate from 9:30 a. m. to 12:30 p. m. and 1:30 to 3 p. m., June 12, in order to broadcast Graduating Exercises of College of Letters and Science, and Senior Luncheon.

WAID—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted special temporary authority to use equipment described in application for low frequency relay station, with

20 watts power on **2830 kc.**, on June 9, from 2 to 7 p. m., EST, in order to broadcast Syracuse University crew races.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted supplemental petition for order to take depositions in re application for C. P. to change frequency, power, and time of operation.

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—Granted permission to withdraw motion for order to take depositions in re application for C. P. to install new transmitter and antenna, change frequency and power.

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Granted petition to intervene in the hearing on the application of KUTA for C. P. to install new transmitter, etc.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted motion to dismiss without prejudice application for modification of license to increase power.

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—Granted petition for leave to file appearance in re application for C. P. for a new station to operate on **1200 kc.**, 100 watts, daytime.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted special temporary authority to operate from 11 p. m. to 12 midnight, EST, for a period not to exceed 30 days, in order to broadcast programs as described.

WPG—City of Atlantic City, N. J.—Denied extension of special temporary authority to operate from 3:15 to 4:30 p. m. Sundays, June 11, 18, 25 and July 2, in order to broadcast major league baseball games; to operate from 2 to 3 p. m., EST, on June 16, 23, 30 and July 7, in order to broadcast programs of the New Jersey League of Municipalities studio recital, featuring Alice Woodlyn and CBS features.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted license to cover C. P. authorizing changes in equipment.

NEW—Donald C. Treloar, Kalispell, Mont., Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station, frequencies **30820, 33740, 35840, 35820** and **37980 kc.**, experimentally, conditionally, 10 watts.

W9XSN—The Champaign News-Gazette, Inc., Champaign, Ill., Portable-Mobile.—Granted C. P. for changes in equipment and for frequencies **30820, 33740, 35820** and **37980 kc.**, on an experimental basis, conditionally, 2 watts.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Granted license to cover C. P. authorizing local move of transmitter site and installation of vertical radiator.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 8 to 9 p. m., CST, on July 2, 9, 16 and 23, in order to broadcast special educational programs (provided KGGF remains silent).

KGGF—Powell & Platz, Coffeyville, Kans.—To remain silent from 8 to 9 p. m., CST, on July 2, 9, 16 and 23, in order to permit WNAD to broadcast special educational programs.

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Granted special temporary authority to rebroadcast demonstration of two-way communication to be conducted in accordance with Sec. 112.06 to be received from station WPDS, licensed to City of St. Paul, operating on frequency **33940 mc.**, from 9:25 to 9:30 a. m., CST, June 13.

W1XOK—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to operate relay broadcast experimental station W1XOK on frequencies **133030, 134850, 136810, 138630 kc.**, 250 watts, in accordance with Sec. 40.04, in order to carry out program of experimentation outlined in the application for C. P. granted January 24, 1939, for a period not to exceed 30 days.

KUSD—University of South Dakota, Vermillion, S. Dak.—Granted petition to reconsider and grant application for renewal of license of station KUSD, which was designated for hearing on February 27, 1939, to determine primarily whether applicant had complied with the provisions of Rule 340.01, which requires the licensees of all broadcast stations to supply certain information with respect to stock ownership. Applicants have now furnished the information required by said Rule.

WLAP—American Broadcasting Co. of Kentucky, Lexington, Ky. —Granted petition in so far as it requests further hearing, set aside the Statement of Facts, Grounds for Decision and Order of the Commission of December 23, 1938, and remanded for further hearing the application of WLAP for C. P. to install new transmitter and use DA at night; change frequency from **1420 kc.** to **1270 kc.**, and operate with 1 KW, unlimited time, and upon the following issues: (1) to determine whether or not applicant's present facilities provide adequate service to the community, and (2) whether the use of frequency **1270 kc.**, with 1 KW, unlimited time, with DA at night, will provide adequate service for the area proposed to be served and would be consistent with sound principles of allocation.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Granted special temporary authority to operate daytime with power of 1 KW, using new directive antenna, for a period not to exceed 10 days, in order to make proof of performance measurements of directive antenna as authorized by permit granted November 28.

KVI—Puget Sound Broadcasting Co., Inc., Tacoma, Wash.—Granted special temporary authority to rebroadcast over station KVI the conversation between two planes of the 116th Observation Squadron, 41st Division Aviation, Washington National Guard, June 14, in connection with altitude flight.

W1XPW—WDRC, Inc., Hartford, Conn.—Granted extension of special temporary authority to test high frequency broadcast equipment of station W1XPW, authorized by modification of C. P., on the frequency **42.4 mc.**, with power output of 1 KW, for the period June 23 to July 22, pending action on application.

W2XMN—Edwin H. Armstrong, New York City.—Granted extension of special temporary authority to operate high frequency broadcast station W2XMN on frequency **42.8 mc.**, with power of 40 KW, for the period July 14 to August 12, pending definite arrangements to be made in ultra high frequency bands.

KFRU—KFRU, Inc., Columbia, Mo.—Dismissed KFRU's petition for rehearing filed as respondent in re applications of KVOD and KFEL, Denver, Colo. (Dockets 4527 and 4578).

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted special temporary authority to operate crystal controlled test transmitter, maximum power 100 watts, on frequency **720 kc.**, in the vicinity of Raleigh, for 1 hour after local sunrise until 1 hour before local sunset, for the period June 15 to July 14, in order to determine suitability of proposed transmitter site.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted special temporary authority to operate with 5 KW at night, using DA, for the period June 14 to July 13, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.**, reduces power so that additional interference is not involved, or until defective directional system is corrected by installing new tuning condensers.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted special temporary authority to operate with 5 KW at night, using directional antenna, for the period June 14 to July 15, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.**, reduces power so that additional interference is not involved, or until defective directional system is corrected by installation of new tuning condensers.

KPDN—R. C. Hoiles, Pampa, Tex.—Granted special temporary authority to operate unlimited time on June 14, in order to broadcast the "Top O' Texas Fiesta", sponsored by the Chamber of Commerce.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate from 8 to 9:30 p. m., EST, on June 19, 20 and 21, in order to broadcast third Conference on Canadian American Affairs.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted special temporary authority to broadcast the regular programs of station KRLD over the new 50-KW transmitter, using DA during daytime, then reverting to the old 10-KW transmitter one hour before sunset in accordance with permit, for a period not to exceed 30 days, in order to make proof of performance tests.

W3XO—Jansky and Bailey, Washington, D. C.—Granted extension of special temporary authorization to operate high frequency broadcast station W3XO on a frequency of **43.32 mc.**, with the regular power of 1 KW, pending final arrangements in connection with the reallocation of the high frequency services with respect to Commission Order No. 19, for the period June 29 to July 28.

W1XAL—World Wide Broadcasting Corp., Boston, Mass.—Granted special temporary authority to broadcast one-second time signals over international broadcast experimental station W1XAL, on **6040 kc.**, from 10 to 11 a. m. and from 1 to 2:30 p. m., EST, on June 15, in cooperation with Department of Geology, M. I. T. seismographic work.

WAUJ—The Louisville Times Co., Louisville, Ky.—Granted special temporary authority to operate a portable-mobile relay broadcast transmitter, with power of 10 watts, on frequencies **30820, 33740, 35820** and **37980 kc.**, for a period not to exceed 30 days, to relay program material to broadcast station WHAS for broadcast.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test high frequency broadcast equipment of station W1XOJ authorized by modification of C. P. on frequency **43000 kc.**, with power not to exceed 2 KW, for the period June 19 to July 18, in order to make necessary adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400-foot mast.

APPLICATIONS FILED AT FCC

650 Kilocycles

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Modification of special experimental authority to increase power to 5 KW (**710 kc.**, unlimited time), install new transmitter and antenna, move transmitter to site to be determined, Seattle, Wash., for period ending 8-1-39.

770 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Construction permit to make changes in transmitting equipment.

830 Kilocycles

WRUF—University of Florida, Gainesville, Fla.—Construction permit to make changes in equipment; increase power from 5 KW to 10 KW to sunset at Denver, 5 KW thereafter; install directional antenna for use after sunset at Denver, Colo.; change hours of operation from limited to unlimited time; move studio and transmitter from Gainesville, Fla. (4.4 miles), to University Campus, Gainesville, Fla.

1120 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of license to increase power from 250 watts night, 500 watts day, to 500 watts day and night.

1230 Kilocycles

WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—Voluntary assignment of license from Indianapolis Power & Light Co. to WFBM, Inc.

1260 Kilocycles

WFVA—Fredericksburg Broadcasting Corporation, Fredericksburg, Va.—Modification of construction permit (B2-P-2105) for a new station requesting changes in equipment, install new antenna, and approval of transmitter site at Leonard Road and 2nd St., near Fredericksburg, Va., and studio site at 528 Wolfe St., Fredericksburg, Va.

1310 Kilocycles

WCLS—WCLS, Inc., Joliet, Ill.—Construction permit to make changes in transmitting equipment, changes in antenna, move of studio and transmitter from 222 N. Chicago St., Joliet, Ill., to Elgin at Walnut, Joliet Twp., Ill.

NEW—Harold Thomas, Bridgeport, Conn.—Construction permit for a new broadcast station to be operated on **1310 kc.**, 100 watts night, 250 watts day, and unlimited hours.

1370 Kilocycles

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Modification of construction permit B-P-1941 for change in frequency, hours and power, equipment changes, and move of transmitter to site to be determined, further requesting changes in transmitting equipment, approval of antenna, and approval of studio site at McKinley Cor. del Rio, Mayaguez, P. R., and transmitter site at Mayaguez, P. R.

KTOK—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—License to cover C. P. (B3-P-2109) to make changes in equipment and change power from 100 watts to 100 watts, 250 watts day.

WDWS—The Champaign News Gazette, Champaign, Ill.—Authority to install automatic frequency control apparatus.

1420 Kilocycles

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Construction permit to install new equipment, new vertical antenna; change frequency from **1420 kc.** to **630 kc.**; increase power from 100 watts night, 250 watts day, to 1 KW night, 5 KW day; and move transmitter.

1430 Kilocycles

NEW—Publix Bamford Theatres, Inc., Asheville, N. C.—Construction permit for a new station on **1430 kc.**, 1 KW power, unlimited time. Amended: Give transmitter site at Emma Road, near Asheville, N. C.

1500 Kilocycles

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Construction permit to install new transmitter; make changes in antenna; increase power from 100 watts to 100 watts night, 250 watts day; and move transmitter.

KDRO—Albert S. and Robert A. Drohlich, d/b as Drohlich Brothers, Sedalia, Mo.—Modification of construction permit B4-P-2165 for new station, requesting authority to install new transmitter and vertical antenna, approval of transmitter and studio sites at 2100 West Broadway, Sedalia, Mo.

MISCELLANEOUS

WGHB—Florida West Coast Broadcasting Company, Inc., Tampa, Fla.—License to cover C. P. (B3-PRY-169) for new relay station.

WIPM—Indianapolis Power & Light Co., Mobile, area of Marion County, Ind.—Voluntary assignment of license to WFBM, Inc.

WIPL—Indianapolis Power & Light Co., Mobile, area of Marion County, Ind.—Voluntary assignment of license to WFBM, Inc.

W9XXM—Indianapolis Power & Light Co., Indianapolis, Ind.—Voluntary assignment of license to WFBM, Inc.

NEW—WGN, Inc., Portable-Mobile, area of Chicago, Ill.—Construction permit for a new relay station on **1622, 2058, 2150, 2790 kc.**, power of 50 watts, A-3.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Anesthetic Advancement & Research Guild, Inc.—See Guild Anesthetic Laboratories.

Actino Laboratories, Inc., 429 West Superior St., Chicago, and its president, Carl Loeb, are charged with misleading representations in the sale of orthoptic equipment in a complaint.

The complaint alleges that the respondents sell three types of orthoptic machines, two of their own manufacture and one made by a competitor and that, in order to induce the purchase of the machines they manufacture, they accept the used machines made by a competitor from customers as part payment for their own products. It is alleged that the respondents thereupon sell the competitor's machine as new and at prices substantially lower than those charged by the competing manufacturer for new, unused machines. (3813)

Guild Anesthetic Laboratories—Misrepresentation that a commercial organization is operating as a guild or association of persons engaged in kindred pursuits for mutual protection, aid and cooperation, is alleged in a complaint. The respondent, Guild Anesthetic Laboratories, 2457 South Michigan Ave., Chicago, until recently known as Anesthetic Advancement and Research Guild, Inc., distributes a medicinal preparation known as "Guild Procaine Epinephrine Anesthetic", for use as a local anesthetic. Its customers include dentists, physicians and dental colleges.

It is alleged that the respondent corporation misrepresented the character of its business by use of the trade or corporate names "Anesthetic Advancement and Research Guild, Inc.", and "Guild Anesthetic Laboratories", some of the printed matter showing the word "Guild" set out in large type. (3816)

Norman Company—Alleging misleading representations in the sale of novelty merchandise, including lamps and shades, a complaint has been issued against Norman Company, a corporation, and its officers, Samuel J. Goldberg, Mrs. May Goldberg, Edward Koplin, and Max Feder, all of 169 Madison Ave., New York.

It is alleged that the Norman Company sent merchandise to various individuals, partnerships and corporations without previously receiving orders therefor and that in its correspondence with such purported purchasers, contended that the merchandise had been shipped in response to orders.

The complaint charged that the corporate respondent received no orders for the merchandise sent to purported purchasers in such instances and that its purpose was, through threats, coercion and annoyance, to induce the purported purchasers to accept and pay for merchandise rather than submit to the annoyance of interminable correspondence and threats. (3812)

Philip R. Park, Inc., San Pedro, Calif., distributor of a dehydrated kelp product in powdered and tablet form designated "Granular Parkelp" and "Parkelp Tablets", has been served with a complaint alleging misrepresentation.

Among advertisements disseminated by the respondent are the following: "Parkelp is amazingly rich in iodine, iron, calcium and other food minerals which land foods lack", and "It is interesting to know that lack of food minerals in such land-grown vegetables as lettuce, celery, asparagus, spinach, etc., which form a part of our daily diet, often results in deficiency conditions of the body. You can add these important minerals and vitamins to your diet in any easy and economical way. Try Parkelp, a pure, deep sea kelp product that brings you food minerals from the sea."

The complaint alleges that the amount of minerals other than iodine contained in respondent's product is not sufficient to produce the results claimed in respondent's advertising. It is also alleged that the diet of the American people is not deficient in the minerals mentioned in respondent's advertising, nor are the vegetables therein referred to deficient in such minerals. (3815)

Puritan Undergarment Corp.—Misleading representations in the sale of women's undergarments in violation of the Federal Trade Commission Act are alleged in a complaint issued against Puritan Undergarment Corporation, 1427 DeKalb Ave., Brooklyn. It is alleged that garments containing 87 per cent cotton, 10 per cent rayon and only 3 per cent wool were misleadingly represented as containing 15 per cent wool; that garments containing 10.5 per cent wool, the remainder being rayon and cotton, were advertised as 30 per cent wool, and that garments appearing to be made partly of silk were sold without disclosure that the fiber or material in question was not silk, but rayon. (3810)

Refrigeration & Air Conditioning Institute, Inc., 2150 Lawrence Ave., Chicago, has been served with a complaint alleging violation of the Federal Trade Commission Act in the sale of correspondence courses.

In selling its courses in refrigeration and air conditioning, the respondent is alleged to have made representations through its salesmen and by means of its advertising matter implying that there is a great demand for men in the air-conditioning and refrigeration industries; that these industries will absorb all graduates of the respondent school or that approximately 5,000 of its graduates will be so absorbed annually and that the respondent school is the official training agency of the two industries.

It is also alleged that the respondent implies that its educational program is directly in charge of officers or employees of certain leading manufacturers; that manufacturers who have commended the respondent's training will give employment to its graduates or to a large percentage thereof and that such manufacturers have actually sponsored the school or contributed financially to its upkeep. (3811)

Tetrine Chemical Sales Company—Maurice M. Goldberg and Tetrine Chemical Sales Company, 521 Fifth Ave., New York, are charged in a complaint with misrepresentation in the sale and distribution of fire extinguishers and chemical fluids.

The complaint charges that the respondents represent that fire extinguishers are given free to purchasers of a certain specified quantity of chemical fluid for use in the extinguishers, and that the representation is false and misleading, as the price received by the respondent for the fluid is so clearly in excess of the normal market value as to include not only the value of the fluid but the fire extinguishers as well. (3814)

Weiss Bedding Company, Inc.—Alleging false representations of the fiber and material of which mattresses are made a complaint has ben issued against Weiss Bedding Company, Inc., and its president, Dan Weiss, Jr., 365 Baxter Ave., Louisville, Ky., mattress manufacturers.

Among representations allegdly used by the respondents in advertising certain of their mattresses are assertions such as "This mattress contains 100 per cent cotton felt," "All new and sanitary," and "Complies with all State laws."

The complaint alleges that certain of the respondents' mattresses do not contain 100 per cent cotton felt, that the material in them is not all new and sanitary and that the mattresses as produced do not comply with all State laws. (3809)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

William J. Cressy, 2521 North 56th St., Milwaukee, formerly trading as Flying Intelligence Service, in the sale of a manual of instructions in aviation, has been ordered to cease and desist from representing that he conducts a flying school; that he will procure jobs for students either during or after training; that he is affiliated with the United States Air Corps or that purchasers of his aviation manual will receive training by that air corps. The complaint in this case was dismissed as to Mrs. Effie Robertson, who was found not to be a partner in the business. (3431)

Lewyn Drug, Incorporated, Hollywood, Calif., distributor of medicinal preparations known as Dr. Haller's Prescription 5000 and Dr. Haller's Prescription 2000, has been ordered to cease and desist from disseminating advertisements which represent that use of these preparations constitutes a competent, safe and scientific treatment for delayed menstruation, and that their use will produce no ill effects.

The order also prohibits dissemination of advertisements which fail to reveal that use of these preparations may result in serious injury to the health of the user.

The true facts are, according to findings of the Commission, that use of either of the respondent's preparations may result in gastro-intestinal disturbances such as catharsis, nausea and vomiting with pelvic congestion, inflammation and congestion of the uterus and adnexa leading to excessive uterine hemorrhage, and in those cases where either of these preparations is used to interfere with the normal course of pregnancy, may result in uterine infection with extension to other pelvic and abdominal structures causing septicemia or blood poisoning. (2934)

National Sales Company—Robert R. Charney, trading as National Sales Company and as Windsor Pen Company, 1315 Atlantic Ave., Atlantic City, N. J., has been ordered to cease and desist from representing excessive fictitious prices as regular prices of its merchandise; that any articles customarily sold in connection with use of a purported certificate have value exceeding the actual money price required to be paid; that certain fountain pens last a life time and that rings or necklaces are set with diamonds or will not tarnish or discolor. (3610)

O. K. Tailoring Company, Inc.—Misleading representations in the sale of men's garments are prohibited under an order to cease and desist issued against O. K. Tailoring Company, Inc., 325 South Market St., Chicago.

The respondent company was directed to discontinue employing the unqualified word "wool" or words of similar meaning to designate fabrics or products not composed wholly of wool, provided that in case of a fabric or product composed partly of wool and partly of other materials such words may be used as descriptive of the wool content if in immediate conjunction there also appear accurate designations of each constituent fabric or material in the order of predominance by weight.

Under the order, the respondent is also to cease using the term "free" or similar terms to refer to merchandise regularly offered as compensation for distributing the respondent's clothing products; to cease representing that the respondent's garments are the fastest selling lines of such merchandise in America, and that its agents receive specified compensation for the sale of the respondent's merchandise, unless they do in fact receive such compensation and there is no deception as to the services to be performed in obtaining. (3404)

Stillwater Company—Hay fever is not attributable to oversensitive, weak, or unhealthy local conditions of the nasal membranes and their consequent susceptibility to excessive irritation from pollens, and cannot be successfully treated and cured, or the cause removed, by local medication, according to findings made in connection with issuance of a cease and desist order against R. O. Murphy, trading as The Stillwater Company, Stillwater, Minn., distributor of five preparations advertised as a treatment and remedy for hay fever.

Findings of the Commission are further that the respondent's theories as to the treatment of or method of averting hay fever by local applications to the membranes of the nose are not in accordance with the concensus of present-day medical opinion. (3608)

Windsor Pen Company—See National Sales Company.

STIPULATIONS

The Commission has entered into the following stipulations:

Gabilla, Inc., 19 West 18th St., New York, a corporation engaged in the sale and distribution of perfume products, has stipulated to cease and desist from use of the word "Paris" or "France" on its labels or containers so as to imply that its products are of French origin, and from use of the words "Bottled in U. S. A." to imply that the product is imported in bulk as finished perfume and bottled in the United States, and from use of any foreign address on its letterheads or trade literature so as to imply that the corporation has offices or places of business in the foreign countries indicated, when such are not the facts. (2478)

Dr. Laun Sales Company—Joseph E. Gessner, trading as Dr. Laun Sales Company, 207 North Michigan Ave., Chicago, agrees to cease disseminating advertisements representing that "Dr. Laun's Reducing and Stimulating Balm", either with or without the application of massage, will remove fat from the body or any part thereof or that the preparation or any of its ingredients has any value as a reducing agent. (2480)

Mentos Products, Inc., 1469 North Hirst St., Philadelphia, agrees to cease advertising that use of Mentos will promote the growth of hair; that Mentos or Mentos Shampoo is capable of cleansing below the pore openings; that Mentos is efficacious in "building the resistance of the skin and scalp"; that its use will result in permanent cessation of falling hair, scalp itching or "sores between toes" and will cure eczema, ringworm, psoriasis, scalp irritations, scaly scalp conditions or dandruff. In its stipulation the respondent company admits that use of its products will not accomplish the results claimed. (02384)

Photo-Markets, Inc., Washington, D. C., publisher of a magazine "Photo-Markets", has entered into a stipulation to cease and desist from the sale or distribution of cards or tags bearing the inscription "Press Card" or "Press Tag", purporting to grant bearers exceptional privileges through police and fire lines. The so-called "Press Tags" are designed for attachment to automobile license plates. (2475)

Solo Chemical Works, Inc., 212 Fifth Ave., New York, has entered into a stipulation to discontinue misleading representations in the interstate sale of so-called tubular fly ribbons. The respondent agrees to discontinue using the word "Honey" alone or in connection with a picturization of a bee hive or in any other way as a brand name or designation for its product so as to imply that it has been substantially treated with honey. The stipulation recites that the honey content of the coating used on the ribbons was not substantial and added nothing to their effectiveness. (2479)

NAB Reports
NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 25, June 23, 1939

FCC Grants One-Year Licenses

The broadcasting industry's long fight for longer licenses bore first fruit this week when the FCC decided to make the normal license period one year instead of six months.

Although the industry will be extremely gratified to hear of the commission's decision, the fight for the three-year license authorized by Congress in 1934 will continue.

The industry feels that it can render better public service with the degree of additional stabilization granted by the commission with one year licenses. It also feels, however, that it could render still better public service with three-year licenses.

The one-year rule will become effective immediately, but does not affect current licenses. From now on, all licenses will be renewed or granted normally on a one-year basis.

SWAGAR SHERLEY TO REPRESENT NAB AT SHORT-WAVE HEARING

The NAB has retained the Hon. Swagar Sherley as special counsel for the hearings in regard to the recent regulations concerning international short-wave broadcasting. A petition will be filed requesting (1) a postponement of the date of the hearing which is now set for July 12; (2) that the scope of the hearing be enlarged to include all the regulations recently issued; and (3) that the operation of the regulations be suspended pending the hearings. In addition, each of the seven operators in the international short-wave field will file individual appearances.

These developments came forth as a result of the meeting of the NAB International Short-Wave Committee which met last Wednesday in New York at the call of President Miller, chairman of the Committee. Those present were: Frank Mason, Frank Russell, and P. J. Hennessey, Jr., of the National Broadcasting Company; Dr. Charles B. Jolliffe of Radio Corporation of America; Harry Butcher, Frederic Willis, Paul Porter and A. B. Chamberlain of the Columbia Broadcasting System; Dr. Leon Levy, WCAU, Philadelphia, Pennsylvania; Walter Evans and J. B. Rock of Westinghouse Broadcasting Stations; Jack Poppele, WOR, New York City; Joseph Reis, WLW, Cincinnati, Ohio. From NAB Headquarters were Edwin Spence, Secretary-Treasurer; Andrew Bennett, Counsel; and Ed Kirby, Director of Public Relations.

AD MEN DISCUSS CODE

Discussion of the proposed Code and Standards of Practice occupied the major portion of both the morning and afternoon sessions in the Sales Managers' department of the Advertising Federation of America, in

AD MEN DISCUSS CODE

(Continued from page 3553)

annual convention at the Waldorf-Astoria, New York City, last Tuesday.

Representatives from leading agencies in New York, Chicago and Detroit took part in the discussions, which were led by President Neville Miller, Craig Lawrence, Chairman of the Sales Managers' Division; and Ed Kirby, Director of Public Relations.

In general, there was sympathetic agreement among agency people present with the underlying fundamentals of the Code. Several changes in phraseology were suggested. In addition, agency people were again invited to make specific recommendations to the Code Committee.

It was the feeling of Headquarters men present that no serious obstacles appeared in the Code which could not be overcome through further discussions with agency people.

Over one hundred people attended the sessions and also the luncheon, at which entertainment was furnished by the three major networks. Due to a last-minute emergency call to Washington, Mayor Fiorello LaGuardia was unable to deliver his address on "Radio by the American Plan." Instead, Newbold Morris, President of the New York City Council and acting Mayor, appeared in His Honor's place and praised radio as one of the "cleanest and most useful of American industries."

FREE OFFERS

V. M. Products, Chicago, wasted a lot of postage last week in sending a cost-per-inquiry proposition to all stations. The NAB advised the firm that acceptance would constitute violation of the Code. Many thanks to the 43 members who forwarded the proposition to Headquarters.

The Popular Music Instruction Company, New York, is out with another percentage proposition. We again have notified this firm that acceptance would constitute Code violation.

We are pleased to report that Forjoe and Company, New York, has withdrawn its contingent proposition at the NAB's suggestion.

James R. Lunke and Associates, Chicago, is proposing advertising for the Industrial Training Corporation on the basis of a *guaranteed* number of inquiries. The NAB is of the opinion that this amounts to cost-per-inquiry business, and that acceptance would constitute code violation.

The National Society for the Prevention of Blindness and the Council Against Intolerance in America are seeking free time for Fourth of July programs. There appears to be no commercial motive in either. Both are reputable organizations.

Labor

A. F. OF M. CONVENTION

Little of prime importance to broadcasting was done at the American Federation of Musicians convention last week in Kansas City.

The convention voted down a resolution which would have compelled the networks to broadcast a local band on sustaining time each time they broadcast a travelling band. In his annual report, Joseph N. Weber, A. F. of M. president, said:

"Outstanding in the entire question is that we have no authority and never will have, to decide as to what should go over the air, as this authority strictly rests with the broadcaster, as a prerequisite to their responsibility to the government concerning the purposes for which broadcasting is used."

The jurisdictional dispute between the A. F. of M. and the International Brotherhood of Electrical Workers, also an A. F. of L. union, was referred to the A. F. of M.'s executive council.

The convention adopted Mr. Weber's recommendation that no local should make a contract for more than one year without the executive board's consent. It also reduced the local tax on travelling bands for broadcasting; banned payment of social security taxes by leaders instead of by "person or party for whom musicians' services are rendered"; and decided that two 15-minute commercial transcriptions could not be made at the half-hour price.

Mr. Weber made a full report on his discussions with the moving picture industry about a reemployment plan somewhat similar to that which the broadcasting industry has undertaken. Conferences are to be resumed in the fall.

WAGE-HOUR CHIEF AT CONVENTION

The NAB is pleased to announce that Elmer F. Andrews, federal wage and hour administrator, has accepted an invitation to address the NAB's annual convention on Wednesday morning, July 12.

Any member having a wage and hour question which he would like to have Mr. Andrews discuss should submit it to the NAB Labor Relations Department within the next few days. These questions should be confined to topics of general interest in the industry.

EMPLOYERS MAY ASK ELECTIONS

The Labor Relations Board decided this week to allow an employer caught in the middle of a fight between two bona fide labor unions to petition for an election to determine which union the employer should deal with.

The board's refusal heretofore to consider employer petitions has been one of the greatest complaints business has had against the operation of the Wagner Act.

Now, when each of two or more unions claim a majority but is unwilling to try to prove it, the employer can ask for an election. The losing union or unions would have no grounds for calling a strike.

Legal

FLORIDA'S NEW LIBEL LAW

Florida's new libel law (NAB Reports, May 12, p. 3472), relating to the civil liability of owners, lessees and operators of radio broadcasting stations, became the law of the state June 12.

The complete text of the law follows:

AN ACT in relation to the civil liability of owners, lessees, licensees and operators of radio broadcasting stations and the agents and employees of any such owner, lessee, licensee or operator, for radio defamation or libelous statements.

Be it Enacted by the Legislature of the State of Florida:

Section 1. The owner, lessee, licensee or operator of a radio broadcasting station, and the agents or employees of any such owner, lessee, licensee or operator, shall not be liable for any damages for any defamatory or libelous statements published or uttered in or as a part of a radio broadcast, by one other than such owner, lessee, licensee or operator, or agent or employee thereof, unless the said owner, lessee, licensee or operator, or agent or employee affirmatively declares that such statements are made for and in behalf of such owner, lessee, licensee or operator of such radio station or its agent or employee.

Section 2. This Act shall not be applicable to or affect any cause of action existing at the time this Act becomes effective.

Section 3. If any section in this Act or any part of any section shall be declared invalid or unconstitutional such declaration of invalidity shall not affect the validity of the remaining portions hereof.

Section 4. All acts or parts of acts in conflict herewith are hereby expressly repealed.

Section 5. This Act shall take effect upon its becoming a law.

NEW LEGISLATION

CONGRESS

S. 2611 (Sen. Wheeler, Montana) GOVERNMENT RADIO STATION—Authorizing the purchase of site and erection of building in Massachusetts for use as radio-monitoring station at cost not to exceed $30,000. Referred to the Committee on Interstate Commerce.

FCC ASKS APPROPRIATION

All of FCC members except Chairman Frank R. McNinch attended a hearing on Monday of a Subcommittee of the House Appropriations Committee. Mr. McNinch was out of town because of illness.

The Commission which is working this year under an appropriation of $1,700,000 asked the Committee for a $2,000,000 appropriation for the coming fiscal year beginning July 1 to take care of additional personnel in the Law Department, Engineering and Accounting.

Commissioner Thad H. Brown, who is acting chairman this week, was the only member of the Commission on the stand. Other representatives of the Commission who appeared at the executive hearing included William J. Dempsey, Chief Counsel; E. K. Jett, Chief Engineer; William J. Norfleet, Chief Accountant; and John B. Reynolds, Assistant Secretary.

It is reported that several questions were asked Commissioner Brown about the Commission's international broadcast regulations, and he told the Committee, it is said, that members of the Commission did not feel when the regulations were drawn, and do not feel now, that these rules invoke any kind of censorship. It is expected that the Commission's appropriation will be included in the third deficiency bill which will probably pass the House in a few days. Representative Woodrum is Chairman of the Committee in charge of the hearings.

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED FINDINGS OF FACT

The Federal Communications Commission in a Proposed Findings of Fact proposed to deny the application of WGTM, **Wilson, North Carolina,** for a construction permit to authorize changes in equipment, make changes in antenna, and operate with 500 watts power on **1240 kilocycles,** daytime only. The station now operates daytime only with 100 watts power on **1310 kilocycles.**

The Commission has also announced a Proposed Findings of Fact proposing to deny the application of the Moody Bible Institute Radio Station, **Chicago, Illinois,** for a permit to construct a new non-commercial educational broadcast station to operate on **41,300 kilocycles,** 100 watts power, unlimited time.

The Commission proposed in a Proposed Findings of Fact to grant the application of KTEM, **Temple, Texas,** for authority to modify its present license use of **1370 kilocycles,** 250 watts, daytime only, so as to permit it to increase its hours of operation to unlimited time, using 100 watts power at night.

In a Proposed Findings of Fact the Commission also proposed to grant the application of WALA, **Mobile, Alabama,** to move its transmitter site locally, install vertical radiator and increase its nighttime power from 500 watts to 1000 watts on its present frequency of **1380 kilocycles,** with 1000 watts LS, unlimited time.

DECISIONS OF COMMISSION

The Federal Communications Commission has granted the application of WEDC, **Chicago, Illinois,** to increase its daytime power from 100 watts to 250 watts and to operate from midnight to 6:00 a. m. The station operates on **1210 kilocycles,** with specified hours.

The application of the Kingston Broadcasting Corporation for a construction permit for a new station at **Kingston, New York,** to operate on **1500 kilocycles,** 100 watts, daytime only, has been granted by the Commission.

The Commission has also granted the application of the Albemarle Broadcasting Company for the erection of a new station at **Elizabeth City, North Carolina,** to operate on **1370 kilocycles,** 100 watts night, 250 watts LS, unlimited time. The Commission granted the application on condition that the permittee "shall file an application for modification of C. P. specifying the exact transmitter location and antenna system within two months after the effective date of the order."

The application of Broadcasting Station WHLS, **Port Huron, Michigan,** to increase its power from 250 watts to 100 watts night, 250 watts LS, and hours of operation from daytime to unlimited time has been granted by the Commission. The station operates on **1370 kilocycles.**

The Commission has granted the application of WBNX, **New York City,** for authority to change the transmitter site locally, to install new equipment and directional antenna system, and to increase its daytime power from 1000 watts to 5000 watts on **1350 kilocycles.**

The Commission has also granted the application of WMBG, **Richmond, Virginia,** to install new equipment, to increase its power from 500 watts unlimited time to 5000 watts day and 1000 watts night, using directional antenna system. WMBG operates on **1350 kilocycles.**

The application of WJBL, **Decatur, Illinois,** to change its frequency from **1200** to **1310 kilocycles,** and its power from 100 watts to 100 watts night, 250 watts LS, and time of operation from sharing with WJBC to unlimited hours, has been granted by the Commission. The Commission also granted the application of WBOW, **Terre Haute, Indiana,** to change its frequency from **1310** to **1200 kilocycles,** to move the station locally, using present power of 100 watts night, 250 watts LS, and unlimited hours of operation. The application of WJBC, **Bloomington, Illinois,** to change its time of operation from sharing with WJBL to unlimited time on **1200 kilocycles,** with 100 watts night, 250 watts LS, was also granted.

The Commission has denied the application of Station WOMI, **Owensboro, Kentucky,** to change its operating assignment from **1500 kilocycles,** 100 watts night, 250 watts LS, unlimited time, to **1200 kilocycles,** with the same operating power, unlimited time.

The application of Station KFQD, **Anchorage, Alaska,** to have its license renewed has been granted by the Commission, but the application for an experimental broadcast station was denied.

The Commission announced its Proposed Decision and Order in the matter of the application of Hearst Radio, Inc., licensee of Station KEHE, Los Angeles, Cal., for Voluntary Assignment of License to Earle C. Anthony, Inc., and the application of Earle C. Anthony, Inc., for authority to move Station KECA from Los Angeles to San Diego, Cal., and to assign the license of KECA to Worcester Broadcasting Corporation. (No. B-39.)

The Commission Ordered, "that said application for assignment of license of Station KEHE be, and the same is hereby Granted, upon condition that license of Station KECA be surrendered for cancellation prior to the operation of Station KEHE by Earle C. Anthony, Inc."

Earle C. Anthony, Inc., in requesting a construction permit to move Station KECA to San Diego, to operate under different call letters, is requesting the Commission to authorize him to construct a radiobroadcast station which he does not intend to construct or to operate. He admittedly is only requesting this authorization from the Commission in order that he may assign it to the Worcester Broadcasting Corp. The application to assign the license of Station KECA to the Worcester Broadcasting Corp. is nothing more than an application to assign the construction permit which is being requested by Earle C. Anthony, Inc. The Commission does not deem it in the public interest to grant a construction permit to anyone merely for the purpose of permitting such person to assign or sell the permit to another, nor does the Commission deem it in the public interest to authorize in advance of granting such construction permit the assignment of the permit to a third person.

Insofar as Earle C. Anthony, Inc., may desire to dispose of its station equipment and other physical property which is no longer useful to it because of the acquisition of Station KEHE, and the surrender of its license to operate the facilities of KECA, the consent of the Commission is not necessary. In the instant case, however, Earle C. Anthony, Inc., is not applying for consent to the transfer of the license of KECA to the Worcester Broadcasting Corp., with its concomitant duties and responsibilities, but on the contrary is seeking to obtain a permit to construct an entirely different station to be located in a different city and serve a different area, while at the same time seeking to obtain the consent of the Commission to assign that construction permit to the Worcester Broadcasting Corporation. The application for construction permit must be denied since Earle C. Anthony, Inc., admittedly has no intention of constructing a radiobroadcast station in San Diego. For the foregoing reasons, the application for consent to assign license of Station KECA from Earle C. Anthony, Inc., to Worcester Broadcasting Corp. must also be dismissed.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast cases beginning the week of June 26. They are subject to change.

Monday, June 26

NEW—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—C. P., **1370 kc.**, 100 watts, 250 watts LS, unlimited time.

WCBA—B. Bryan Musselman (Assignor), Lehigh Valley Broadcasting Co. (Assignee), Allentown, Pa.—Voluntary assignment of license, **1440 kc.**, 500 watts, 500 watts LS, shares WSAN.

WSAN—WSAN, Inc. (Assignor), Lehigh Valley Broadcasting Company (Assignee), Allentown, Pa.—Voluntary assignment of license, **1440 kc.**, 500 watts, 500 watts LS, shares WCBA.

Friday, June 30

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.**, 500 watts, Emission A-3, unlimited time, according to Rule 983.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

July 14

KRLH—Clarence Scharbauer, Midland, Tex.—C. P., **1420 kc.**, 100 watts, 250 watts LS, unlimited time. Present assignment: **1420 kc.**, 100 watts, daytime.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.**, 1 KW, unlimited time. Present assignment: **1120 kc.**, 100 watts, daytime.

September 6

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—C. P., **570 kc.**, 1 KW, unlimited time (DA night and day). Present assignment: **1500 kc.**, 100 watts, unlimited time.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Renewal of license, **1290 kc.**, 100 watts, daytime.

September 8

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—C. P., **1200 kc.**, 100 watts, daytime.

WJBW—Charles C. Carlson, New Orleans, La.—Renewal of license, **1200 kc.**, 100 watts, specified hours.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.**, 100 watts, unlimited time. Present assignment: **1200 kc.**, 100 watts, specified hours.

September 15

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Renewal of license, **31600, 35600, 38600** and **41000 kc.**, 100 watts, 100 watts LS, Emission A-3, unlimited, according to Rule 983 (a).

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license, **42180 kc.**, 100 watts, 100 watts LS, Emission A-3, unlimited, according to Rule 983 (a).

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, **25950 kc.**, 1000 watts, 1000 watts LS, Emission A-3, unlimited, according to Rule 983 (a).

W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, **88000, 120000, 240000** and **500000 kc.**, 500 watts, 500 watts LS, Emission A-3, unlimited, according to Rule 983 (a).

October 9

NEW—Bellingham Broadcasting Co., Inc., Bellingham, Wash.—C. P., **1200 kc.**, 100 watts, 250 watts LS, unlimited time (requests facilities of KVOS).

KVOS—KVOS, Inc., Bellingham, Wash.—Renewal of license, **1200 kc.**, 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KGNO—Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted authority to make changes in authorized equipment and increase day power from 250 watts to 1 KW.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted C. P. to make changes in composite equipment and increase in power from 250 watts to 1 KW.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted modification of license to increase time of operation to include 5 to 6 a. m., CST, using 1 KW power.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, T. H.—Granted C. P. to change frequency from **1320 kc.** to **590 kc.**, install new equipment and vertical radiator, and increase day power from 1 KW to 5 KW.

KRIC—Beaumont Broadcasting Assn., Beaumont, Tex.—Granted voluntary assignment of license from Beaumont Broadcasting Association, B. A. Steinhagen, President, to KRIC, Inc.

WSMB—WSMB, Inc., New Orleans, La.—Granted C. P. to replace one of the towers of the DA system which was destroyed by storm, and to make slight changes in the directive pattern.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Granted C. P. to make changes in transmitting equipment and increase in day power from 1 KW to 5 KW.

W2XBF—William G. H. Finch, New York City.—Granted modification of developmental broadcast station license to change class of station from developmental to facsimile broadcast, to operate on frequency **43740 kc.**, 1 KW, unlimited time.

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co., Fayetteville, N. C.—Granted modification of C. P. (Commissioner Craven voting "No"), approving transmitter site at North Water Street, and vertical antenna.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period ending December 1, 1939:

KEEN, Seattle, Wash.; KGFI, Brownsville, Tex.; KIDW, Lamar, Colo.; KLBM, LaGrande, Ore.; KOKO, LaJunta, Colo.; KRLH, Midland, Tex.; KTRI, Sioux City, Iowa; KWEW, Hobbs, N. Mex.; WEED, Rocky Mount, N. C.; WJBK, Detroit, Mich.; WLLH, Lowell, Mass.; WMBS, Uniontown, Pa.; WMFD, Wilmington, N. C.; WTMV, E. St. Louis, Ill.; WGRC, New Albany, Ind.; KAST, Astoria, Ore.; KHUB, Watsonville, Calif.; WBRY, Waterbury, Conn.; WRBL, Columbus, Ga.; WTAL, Tallahassee, Fla.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon applications for renewal, but in no event longer than August 1, 1939:

KAWM, Gallup, N. Mex.; KNET, Palestine, Tex.; KRMC, Jamestown, N. Dak.; KYSM, Mankato, Minn.; WGIL, Galesburg, Ill.; WKAT, Miami Beach, Fla.; WMFJ, Daytona Beach, Fla.; WMFO, Decatur, Ala.

KOBH—Black Hills Broadcasting Co., Rapid City, S. Dak.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon the application for renewal of license and assignment of license pending before it.

KRKO—Lee E. Mudgett, Everett, Wash.—Granted renewal of license on a temporary basis only upon the condition it is subject to whatever action may be taken by the Commission upon pending applications for renewal of license, C. P., and voluntary assignment of license, and upon the application of the Cascade Broadcasting Co., Inc., for C. P.

KSAN—The Golden Gate Broadcasting Co., San Francisco, Calif.—Granted renewal of license on a temporary basis only, and shall not be construed as a finding upon the application for renewal of license now pending before the Commission nor upon any of the issues raised by said application.

WCNW—Arthur Faske, Brooklyn, N. Y.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken upon pending application for renewal.

WHDF—The Upper Michigan Broadcasting Co., Calumet, Mich.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken upon pending applications of licensee corporation for renewal and consent to operate unlimited hours, and upon the pending application of Lane J. Horrigan.

WRDO—WRDO, Inc., Augusta, Me.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken upon pending application for renewal.

The following stations were granted renewal of licenses for the regular period:

KATE, Albert Lea, Minn.; KBPS, Portland, Ore.; KDNT, Denton, Tex.; KICA, Clovis, N. Mex.; KNOW, Austin, Tex.; KPAB, Laredo, Tex.; KRIC, Beaumont, Tex.; KTUC, Tucson, Ariz.; KWYO, Sheridan, Wyo.; WACO, Waco, Texas; WAGF, Dothan, Ala.; WBLK, Clarksburg, W. Va.; WBTM, Danville, Va.; WKEU, Griffin, Ga.; KDAL, Duluth, Minn.; KGKB, Tyler, Tex.; WHMA, Anniston, Ala.; WMEX, Boston, Mass.; WPAY, Portsmouth, Ohio; WPRP, Ponce, Puerto Rico.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1940, upon an experimental basis only, subject to change or cancellation by the Commission at any time without advance notice or hearing, if in its discretion the need for such action arises.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1940, upon an experimental basis only, subject to change or cancellation by the Commission at any time without advance notice or hearing, if in its discretion the need for such action arises.

W8XWJ—The Evening News Assn., Detroit, Mich.—Present license for high frequency broadcast station was further extended upon a temporary basis only, to August 1, 1939, pending determination upon application for renewal of license.

W4XCA—Memphis Commercial Appeal Co., Memphis, Tenn.—Present license for high frequency broadcast station was further extended upon a temporary basis only, to August 1, 1939, pending determination upon application for renewal of license.

W4XBW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Present license for high frequency broadcast station was further extended upon a temporary basis only, to August 1, 1939, pending determination upon application for renewal of license.

W2XQO—Knickerbocker Broadcasting Co., Inc., Flushing, N. Y.—Present license for high frequency broadcast station was further extended upon a temporary basis only, to August 1, 1939, pending determination upon application for renewal of license.

WAXG—Florida Capitol Broadcasters, Inc., Portable-Mobile.—Present license for relay broadcast station was further extended upon a temporary basis only, to August 1, 1939, pending determination upon application for renewal of license.

W2XBF—William G. H. Finch, New York City.—Granted renewal of developmental broadcast station license for the period ending May 1, 1940, on an experimental basis only, subject to change or cancellation by the Commission without advance notice or hearing, if in its discretion the need for such action arises.

WSVS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Granted renewal of license on a temporary basis and designated application for hearing because of pendency of the application of Roy L. Albertson for modification of license of WBNY requesting facilities of WSVS; and to determine whether public interest, convenience or necessity would be better served by granting this application than by granting the application of Roy L. Albertson for modification of license.

KSUB—Leland M. Perry, Cedar City, Utah.—Granted special temporary authority to Leland M. Perry, surviving partner of Johnson and Perry, a partnership formerly composed of Harold Johnson and Leland M. Perry, to operate station KSUB for the period July 1 to December 1, 1939, upon a temporary basis only and upon the express condition that it is subject to whatever action may be taken upon any formal application for regular authorization which may be submitted hereafter with respect to station KSUB; and subject further to the condition that nothing contained in said special temporary authority shall be construed as a finding by the Commission that the operation of the station is or will be in the public interest beyond the express terms hereof.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

KQV—KWV Broadcasting Co., Pittsburgh, Pa.—Application for modification of license to increase night power from 500 watts to 1 KW, employing DA system. Designated for hearing to determine question of interference and pending applications involve increase in service.

WKBO—The Telegraph Press, Inc., Harrisburg, Pa.—Application to transfer control of corporation from The Telegraph Press, Inc., to J. H. Steinman and John F. Steinman. (Station WKBO is licensed to Keystone Broadcasting Corp., and operates on **1200 kc.**, 100 watts, 250 watts LS.) Designated for hearing as transferees already own and control six radio broadcast stations—WDEL and WILM, Wilmington; WAZL, Hazleton, Pa.; WORK, York, Pa.; WGAL, Lancaster, Pa., and WEST, Easton, Pa.

NEW—C. L. Weathersbee, W. H. Nichols, C. L. Pickler, and E. M. Thompson, d/b as Albermarle Broadcasting Station, Albermarle, N. C.—Application for C. P. for new station to operate on **1370 kc.**, 100 watts daytime only. Exact transmitter site and type of antenna to be determined with Commission's approval.

NEW—Lackawanna Broadcasting Co., Inc., Scranton, Pa.—Application for C. P. for new station to operate on **1370 kc.**, 100 watts night, 250 watts day, unlimited time. Exact transmitter site, studio and type of antenna to be determined with Commission's approval.

NEW—Richard T. Sampson, Riverside, Calif.—Application for C. P. for new station to use **1390 kc.**, 250 watts, daytime only.

WTNJ—WOAX, Inc., Trenton, N. J.—Application for modification of license to change time of operation from sharing with WCAM and WCAP to sharing with these stations by adding the hours 8 to 10 p. m. to its operating period, this time to be withdrawn from stations WCAM and WCAP. Designated for hearing because of request which would withdraw three hours from WCAM and 11 hours from WCAP.

NEW—North Shore Broadcasting Co., Salem, Mass.—Application for C. P. amended so as to request **1200 kc.**, 100 watts, unlimited time. Exact studio location to be determined with Commission's approval.

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—Application amended so as to request C. P. to make changes in antenna and increase night power from 500 watts to 1 KW. Application designated for hearing because pending applications involve increase in service and to determine the possibility of interference.

NEW—Portorican American Broadcasting Co., Inc., Ponce, P. R.—Application for C. P. for new station to operate on **1340 kc.**, 1 KW both day and night, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz.—Application for C. P. for new station to use **1420 kc.**, 100 watts day and night, specified hours.

MISCELLANEOUS

KVOS—KVOS, Inc., Bellingham, Wash.—Granted motion for continuance of hearing, now scheduled for June 28, to a date to be fixed by Office of the Secretary; application of Bellingham Broadcasting Co. also continued to same date and consolidated with KVOS hearing.

WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Granted motion to withdraw without prejudice, application for modification of license to change frequency, power and time of operation.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted petition to intervene in the hearing on the application of WAPO for C. P. to install new equipment, change frequency and power; exception noted by counsel for WAPO.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted petition to intervene in the hearing on the application of WJBO for C. P. to install new equipment, increase power; exception noted by counsel for WJBO.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Granted petition to continue hearing now scheduled for June 26, in re application for renewal of license, to a date to be fixed by Secretary's Office.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted request for order to take depositions in re application of KFIO, Spokane, Wash., for C. P. to install new transmitter, vertical antenna, move transmitter, change frequency, power and time of operation.

KGA-KHQ—Louis Wasmer, Spokane, Wash.—Granted request for order to take depositions in re application of KFIO, Spokane, Wash., for C. P. to install new transmitter, vertical antenna, move transmitter, change frequency, power and time of operation.

WJBW—Charles C. Carlson, New Orleans, La.—Granted motion for continuance of hearing now scheduled for June 19, date to be fixed by Secretary's Office, on applications for renewal of license and modification of license.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted request for two-day postponement of hearing, now scheduled for July 12, on application for C. P. to install new transmitter, vertical antenna, move transmitter, change frequency, power and time of operation.

WDGY—Dr. George W. Young, Minneapolis, Minn.—Granted special temporary authority to operate evenings (LS, June, 8:15 p. m. and July, 8:15 p. m., CST), for the period June 17 to July 16, in order to broadcast civic, charitable, religious, educational, fraternal and commercial programs of outstanding public interest, and in order to carry programs of extreme local interest from Mutual B/c System.

WPG—City of Atlantic City, N. J.—Granted special temporary authority to operate from 3:15 to 4:30 p. m., EST, on June 18, in order to broadcast baseball game.

Herbert Becker, Los Angeles, Calif.—Granted special temporary authority to operate amateur station W6XAD as a relay broadcast station on frequencies **2399, 3492.5, 4797.5, 6425, 9135, 12862.5, 17310, 23100 kc.**, 500 watts, for the period June 18 to July 18, with A3 emission for broadcasting and A1 and A2 for testing. Station to operate as the receiving and communicating station for reception of programs from yacht contender entered in the San Francisco to Hawaii yacht race to be broadcast over station KHJ and Don Lee and Mutual Broadcasting Systems.

KOD—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of special temporary authority to operate unlimited time on **1180 kc.**, using 10 KW, employing DA system after sunset at Portland, Ore. (June and July 8 p. m., PST), for the period June 22 to July 21.

KEX—Oregonian Publishing Co., Portland, Ore.—To operate unlimited time on **1180 kc.**, using 5 KW power, for the period June 22 to July 21.

WMPC—The First Methodist Protestant Church of Lapeer, Mich.—Granted extension of license of special temporary authority to operate from 9 to 10 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday, and Sunday mornings, for the period July 2 to July 31, in order to broadcast educational programs.

WMFO—James R. Doss, Jr., Decatur, Ala.—Denied special temporary authority to operate from 7 to 10 p. m., CST, for the period ending no later than July 10, in order to broadcast American Legion athletic shows and city-wide revival campaigns, using 50 watts power.

The Travelers Broadcasting Service Corp., Hartford, Conn.—Designated for oral argument before the Commission the application for voluntary assignment of licenses of stations WTIC, W1XEH, W1XLU, W1XO, W1XT, to The Travelers Broadcasting Company.

WMEX—The Northern Corp., Boston, Mass.—Denied petition for rehearing filed by WMEX, intervener in the hearing on the application of The Yankee Network, Inc. (WAAB), Boston, for modification of license to increase power from 500 watts night, 1 KW day, unlimited time, to 1 KW, unlimited time, on **1410 kc.**, which was granted by the Commission May 1, 1939.

WHMA—Harry M. Ayers, Anniston, Ala.—Denied special temporary authority to operate unlimited time with power of 50 watts in order to broadcast Southeastern baseball games on June 15, 16, 17, 19, 20, 21, 22, 23, 24, 26, 27, 28, 29, 30 and July 1, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, 14, 1939.

National Broadcasting Co., Inc., New York City.—Granted special temporary authority to transmit NBC programs originating on board the *Atlantic Clipper* over the CBS relay broadcast station WCBN for rebroadcast over a national network of radio stations affiliated with the NBC, for a period not to exceed 10 days.

WCBN—Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to operate relay broadcast station WCBN aboard the aircraft *Atlantic Clipper*, owned by Pan American Airways Co. on the frequencies **2400, 4800, 6430, 8655, 12862.5, 17310** and **23100 kc.**, in addition to normal licensed frequencies, for a period not to exceed 30 days, in order to relay broadcast special programs during transatlantic flight of *Atlantic Clipper*.

W2XUP—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted extension of special temporary authority to operate facsimile broadcast experimental station W2XUP on frequency **25700 kc.** only, pending Commission action on application, for the period June 17 to July 16.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted extension of special temporary authority to operate high frequency broadcast experimental station W8XWJ on the frequency **42060 kc.**, in addition to normal licensed frequencies, for the period June 16 to July 15, pending definite arrangements to be made in the ultra high frequency bands.

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Denied authority to operate from local sunset to 10 and 10:30 p. m., certain dates in July as requested.

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate from 7:30 to 10:30 p. m., EST, on June 24, in order to broadcast speeches of U. S. Senator Radcliffe, Hon. D. J. Lewis, and Hon. G. H. Krantz, using 100 watts only.

W1XPW—WDRC, Inc., Meriden, Conn.—Granted license to cover C. P. for new high frequency broadcast station, frequency **43400 kc.**, experimental conditionally, 1 KW.

KXA—The American Radio Tel. Co., Seattle, Wash.—Granted modification of C. P. approving transmitter and studio sites and installation of vertical radiator.

WDWS—The Champaign News Gazette, Inc., Champaign, Ill.—Granted authority to install automatic frequency control apparatus.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted C. P. to make changes in transmitting equipment.

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted C. P. to move transmitter locally to adjoining building occupied by WHIP.

KTOK—Oklahoma Broadcasting Co., Inc., Oklahoma City. Okla.—Granted license to cover C. P. authorizing changes in equipment and increase in day power from 100 watts to 250 watts.

KTOH—Garden Island Publishing Co., Ltd., Lihue, Hawaii.—Granted modification of C. P. approving transmitter and studio sites and vertical radiator.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted C. P. to make changes in equipment.

NEW—Joe L. Smith, Jr., Beckley, W. Va., Portable-Mobile.—Granted C. P. for new relay station to operate on frequencies **1622, 2058, 2150** and **2790 kc.**; 75 watts.

NEW—The Louisville Times Co., Louisville, Ky., Portable-Mobile.—Granted license to cover C. P. for high frequency relay broadcast station; frequencies **30820, 33740, 36840, 36820** and **37980 kc.** on an experimental basis only, conditionally; 10 watts.

NEW—The Louisville Times Co., Louisville, Ky., Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station; frequencies **30820, 33740, 36840, 36820** and **37980 kc.** on an experimental basis only, conditionally; 10 watts.

W7XCY—Oregonian Publishing Co., Portland, Ore.—Granted C. P. for changes in equipment and increase in power from 2 to 4.5 watts and change frequencies to **31220, 35620, 37020** and **39260 kc.** experimentally, conditionally.

NEW—WGN, Inc., Portable-Mobile, Chicago, Ill.—Granted C. P. for new high frequency relay station; frequencies **31620, 35260, 37340** and **39620 kc.** conditionally, experimentally, 1 watt power.

NEW—WGN, Inc., Portable-Mobile, Chicago, Ill.—Granted C. P. for new high frequency relay station; frequencies **31620, 35620, 37340** and **39620 kc.** conditionally, experimentally, 25 watts power.

NEW—WGN, Inc., Portable-Mobile, Chicago, Ill.—Granted C. P. for new relay broadcast station; frequencies **1622, 2058, 2150** and **2790 kc.**; 50 watts.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Granted motion of WARD to consider and grant the application for authority to move transmitter site locally and install vertical radiator.

NEW—Peter J. Caldarone, Providence, R. I.—Denied petition for rehearing in reapplication for C. P. for a new station in Providence, which was denied by the Commission on May 1, 1939.

W1XEQ—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted petition to reconsider the action in designating for hearing the application for renewal of high frequency broadcast station license, and adopted order granting same.

W5XD—A. H. Belo Corp., Dallas, Texas.—Granted petition requesting reconsideration of action designating for hearing the application for renewal of high frequency broadcast station license, and adopted order granting same.

WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Denied petition for rehearing in the matter of the application of Pinellas Broadcasting Company, St. Petersburg, for C. P. to erect a new station which was granted by the Commission on April 3.

WMBG—Havens & Martin, Inc., Richmond, Va., and WRTD—Times Dispatch Radio Corp., Richmond, Va.—Denied petitions of WMBG and WRTD for rehearing on the application of WLBG, Inc. (WRNL), Richmond, Va., for C. P., which was granted by the Commission on March 20.

NEW—Bellingham Broadcasting Co., Inc., Bellingham, Wash.—Ordered that a hearing on the application of Bellingham Broadcasting Co., Inc., for the facilities of KVOS, be conducted in the Federal Court Room, Bellingham, Wash., or such other place in the City of Bellingham, which may be designated, on a date convenient to all parties involved, and to the Commission.

WAPI—Alabama Polytechnic Institute, Birmingham, Ala.—Denied petition for rehearing in regard to the application of WAPI to assign license to Voice of Alabama, Inc., which was denied by the Commission on May 23, 1939.

KALE—KALE, Inc., Portland, Ore.—Granted petition to reconsider and grant application for C. P. heretofore set for hearing, and granted application to make changes in equipment; increase power from 1 to 3 KW, daytime, move transmitter and antenna to new site, subject to compliance with Rules 132 and 139.

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Construction permit to install new transmitter, and vertical antenna, increase power from 1 KW to 1 KW night, 5 KW day, and move transmitter site from Physics Bldg., Corvallis, Oregon, to Granger, Oregon.

570 Kilocycles

KGKO—KGKO Broadcasting Co., Fort Worth, Texas.—Modification of license to increase power from 1 KW, 5 KW day, to 5 KW day and night.

WNAX—WNAX Broadcasting Co., Yankton, S. D.—Modification of license to increase power from 1 KW, 5 KW day to 5 KW day and night.

580 Kilocycles

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Modification of license to increase power from 1 KW night, 5 KW day to 5 KW day and night.

640 Kilocycles

WHKC—Associated Radiocasting Corp., Columbus, Ohio.—Modification of license to change frequency from **640** to **570 kc.**, and hours from limited to share with WOSU on same basis as WKBN at present, that is, specified hours. Request facilities WKBN. Amended: To change hours to specified hours.

650 Kilocycles

WSM—The National Life and Accident Ins. Co., Inc., Nashville, Tenn.—Extension special experimental authority to operate a facsimile station from 12 midnight to 6 a. m., CST, on **650 kc.**, 50 KW, period 8-1-39 to 2-1-40.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Extension special experimental authority to operate on **710 kc.**, 1 KW, unlimited time, period 8-1-39 to 2-1-40.

660 Kilocycles

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Construction permit to install new antenna and move transmitter from Bellmore to Port Washington, N. Y. Amended: Antenna changes.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—Extension of special experimental authority to operate a fascimile station from 12 midnight to 6 a. m., using 50 KW power, period 8-1-39 to 2-1-40.

710 Kilocycles

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Extension of special experimental authority to operate facsimile station from 1 a. m. to 6 a. m., using 50 KW, period 8-1-39 to 2-1-40.

720 Kilocycles

WGN—WGN, Inc., Chicago, Ill.—Extension special experimental authority to operate a facsimile station from 1 a. m. to 6 a. m., CST, 50 KW on **720 kc.,** period 8-1-39 to 2-1-40.

770 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension special experimental authority to operate synchronously with KFAB from local sunset at Lincoln, Nebr. to midnight, period 8-1-39 to 2-1-40.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension special experimental authority to operate synchronously with WBBM from local sunset at Lincoln, Nebr. to midnight, CST, period 8-1-39 to 2-1-40.

1000 Kilocycles

WHO—Central Broadcasting Co., Des Moines, Iowa.—Extension special experimental authority to operate a facsimile station from 12 midnight to 6 a. m., period 8-1-39 to 2-1-40.

1040 Kilocycles

WESG—Cornell University, Elmira, N. Y.—Extension of special experimental authority to operate on **850 kc.,** 1 KW, daytime to sunset at New Orleans, La., period 8-1-39 to 2-1-40.

WESG—Cornell University, Elmira, N. Y.—Construction permit to make equipment changes.

1060 Kilocycles

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Extension special experimental authority to operate simultaneous KTHS on **1060 kc.,** from 6 a. m. to local sunset at Hot Springs, Ark., and from local sunset at Hot Springs to 9 p. m., EST on **1060 kc.,** and operate synchronously with WJZ on **760 kc.** with power 2½ KW, using directional antenna from 9 p. m., EST, period 8-1-39 to 2-1-40.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn. —Extension of special experimental authority to operate simultaneously with KRLD (unlimited time) on **1040 kc.,** period 8-1-39 to 2-1-40.

1140 Kilocycles

WAPI—Ala. Polytechnic Inst., Univ. of Ala., Ala. College (Board of Control of Radio Broadcasting Station WAPI), Birmingham, Ala.—Extension special experimental authority to operate unlimited time with directional antenna after sunset at Tulsa, Okla., period 8-1-39 to 2-1-40.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension special experimental authority to operate unlimited time on **1140 kc.,** 25 KW, using directional antenna for night, period 8-1-39 to 2-1-40.

1170 Kilocycles

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Voluntary assignment of license from WCAU Broadcasting Co. (a corporation of State of New Jersey) to WCAU Broadcasting Co. (a corporation of State of Pennsylvania), main and auxiliary.

W3XHW—WCAU Broadcasting Co., Mobile.—Voluntary assignment of license from WCAU Broadcasting Co. (a corporation of State of New Jersey) to WCAU Broadcasting Co. (a corporation of State of Pennsylvania), main and auxiliary.

W3XEO—WCAU Broadcasting Co., Portable-Mobile.—Voluntary assignment of license from WCAU Broadcasting Co. (a corporation of State of New Jersey) to WCAU Broadcasting Co. (a corporation of State of Pennsylvania), main and auxiliary.

W3XAU—WCAU Broadcasting Co., near Newtown Square, Pa.—Voluntary assignment of license from WCAU Broadcasting Co. (a corporation of State of New Jersey) to WCAU Broadcasting Co. (a corporation of State of Pennsylvania), main and auxiliary.

W3XIR—WCAU Broadcasting Co., Philadelphia, Pa.—Voluntary assignment of license from WCAU Broadcasting Co. (a corporation of State of New Jersey) to WCAU Broadcasting Co. (a corporation of State of Pennsylvania), main and auxiliary.

1200 Kilocycles

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—Modification of construction permit (B2-P-241) as modified for increase in power, new equipment, new antenna, requesting authority to extend completion date from 7-17-39 to 9-17-39.

NEW—Hiawathaland Broadcasting Co., Sault Ste Marie, Mich.—Construction permit for new station on **1200 kc.,** 100 watts. 250 watts day, unlimited time.

1210 Kilocycles

WALR—WALR Broadcasting Corp., Zanesville, Ohio.—Construction permit to install new antenna and move transmitter.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Construction permit for changes in transmitter, install new antenna, change frequency from **1210 kc.** to **1370 kc.**

1240 Kilocycles

WXYZ—King-Trendle Broadcasting Co., Detroit, Mich.—Construction permit to install new transmitter; make changes in antenna; increase in power from 1 KW to 1 KW night, 5 KW day; move transmitter from 5057 Woodward Ave. to Joy and Greenfield Rds., Detroit, Mich.

KTAT—Tarrant Broadcasting Co., Fort Worth, Tex.—Authority to transfer control of corporation from Raymond E. Buck to Ruth G. Roosevelt, 1700 shares common stock.

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Construction permit to install new transmitter, and antenna to be determined; increase power from 1 to 5 KW; change frequency from **1240 kc.** to **620 kc.** Amended to specify a vertical antenna.

1260 Kilocycles

WNBX—Twin State Broadcasting Corp., Springfield, Vt.—Construction permit for changes in directional antenna system, use both day and night, and move studio and transmitter from Springfield, Vt., to Keene, N. H.

1270 Kilocycles

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Construction permit to move 1001-D transmitter from 5801 Radio Ave. to 701 Waterview Ave., Baltimore, Md. (site of new RCA 5-D main transmitter); increase power from 500 watts, 1 KW day, to 1 KW day and night, to be used as auxiliary transmitter for emergency use only, employing directional antenna day and night.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—License to cover C. P. (B1-P-1881) as modified for increase in power, move of transmitter, install new equipment and directional antenna for day and night use.

1310 Kilocycles

WGTM—WGTM, Inc., Wilson, N. C.—Authority to transfer control of corporation from Ben Farmer to H. W. Wilson, Charlotte L. Burns and Geo. C. McDonald, 49½ shares common stock.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—License to cover construction permit B3-P-2065, as modified, for new transmitter and antenna and move of transmitter.

WLNH—Northern Broadcasting Co., Laconia, N. H.—License to cover construction permit (B1-P-2284) for move of transmitter and new transmitter and antenna.

1350 Kilocycles

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Construction permit to change frequency from **1350 kc.** to **630 kc.**; changes in antenna to use directional antenna night, and transmitting equipment. Request facilities KFRU and WGBF. Amended to request application be contingent on applications WGBF and KFRU being granted (B4-P-2321-2322).

1360 Kilocycles

WSBT—The South Bend Tribune, South Bend, Ind.—Construction permit to make changes in equipment; install directional antenna; change frequency from **1360 kc.** to **1010 kc.**; increase power from 500 watts to 1 KW; change hours of operation from shares WGES to unlimited; and move transmitter from 4½ miles west on U. S. 2, South Bend, Ind., to 4 miles southeast of center of South Bend, on south side of Jackson Road, ¼ mile east of Miami Highway, South Bend, Ind. Amended to request **930 kc.**, 500 watts power, make changes in antenna, day and night use, and make changes in transmitting equipment.

1370 Kilocycles

WISE—Asheville Daily News, Harold H. Thoms, owner, Asheville, N. C.—Modification of construction permit B3-P-1066, for a new station, requesting equipment changes, approval of antenna and approval of studio and transmitter site at 179 South French Broad, Asheville, N. C. Amended: Equipment changes.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Authority to transfer control of corporation from George W. Taylor to W. P. Booker, 45 shares common stock.

1420 Kilocycles

NEW—WSPB, Inc., Sarasota, Fla.—Construction permit for a new broadcast station to be operated on **1420 kc.**, 100 watts night, 250 watts day, unlimited hours.

1500 Kilocycles

WTMC—John T. Alsop, Jr., Ocala, Fla.—Voluntary assignment of permit from John T. Alsop, Jr., to Ocala Broadcasting Co., Inc.

MISCELLANEOUS

W2XDG—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of license to change frequency to **42100 kc.** to comply with new rules. Amended: To request frequency **42420 kc.**

W2XHG—National Broadcasting Co., Inc., New York, N. Y.—Modification of license to change frequency to **42260 kc.** to comply with new rules. Amended: To request frequency **42060 kc.**

W10XAI—National Broadcasting Co., Inc., Portable-Mobile, area of New York.—Construction permit to make changes in equipment and increase power from 1 to 2 watts.

W10XDX—National Broadcasting Co., Inc., Portable-Mobile.—Construction permit for changes in equipment and increase in power from 1 to 2 watts.

W10XDY—National Broadcasting Co., Inc., Portable-Mobile, area of Washington, D. C.—Construction permit for changes in equipment and increase power from 1 to 2 watts.

W10XDZ—National Broadcasting Co., Inc., Portable-Mobile, area of Washington, D. C.—Construction permit for equipment changes and increase power from 1 to 2 watts.

W10XGC—National Broadcasting Co., Inc., Mobile, New York.—Construction permit for equipment changes and decrease power from 30 to 25 watts and add A1 and A2 emission.

W10XAX—National Broadcasting Co., Inc., Portable-Mobile, area of Cleveland, Ohio.—Construction permit for equipment changes and increase power from 1 to 2 watts.

W10XCG—National Broadcasting Co., Inc., Mobile, area of Cleveland, Ohio.—Construction permit for equipment changes, and increase power from 25 watts to 50 watts.

W10XAK—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Construction permit for equipment changes and increase power from 1 to 2 watts.

W9XDW—National Broadcasting Co., Inc., Portable-Mobile, area of Denver, Colo.—Construction permit for equipment changes and increase in power from 1 to 2 watts.

W10XEA—National Broadcasting Co., Inc., Portable-Mobile, area San Francisco, Calif.—Construction permit for equipment changes and increase power from 1 to 2 watts.

W10XEB—National Broadcasting Co., Inc., Portable-Mobile, area San Francisco, Calif.—Construction permit for equipment changes and increase in power from 1 to 2 watts.

W9XDU—National Broadcasting Co., Inc., Portable-Mobile, area of Denver, Colo.—Construction permit for equipment changes and increase power from 1 to 2 watts.

NEW—The Journal Co. (The Milwaukee Journal), Milwaukee, Wisc.—Construction permit for new television broadcast station on **42000-56000 kc.**, power 1000 watts for visual and aural, Emission A3, A4. Amended: To request **50000-56000 kc.**

NEW—The May Dept. Stores Co., Los Angeles, Calif.—Construction permit for new television broadcast station on **50000-56000** or **66000-72000 kc.**, power 1000 watts, Emission A3, A5. Amended: To request **66000-72000 kc.**

NEW—Television Productions, Inc., Los Angeles, Calif.—Construction permit for new television broadcast station on **66000-72000 kc.**, power 1000 watts both visual and aural, Emission A3, A5 and special.

NEW—World Peace Foundation, Abraham Dinneweg, Jr., Oakland, Calif.—Construction permit for a new developmental broadcast station on **1614, 3492.5, 6425, 12862.5, 23100, 30100, 2398, 4797.5, 8655, 17310, 26000, 33100, 37100, 40100, 86000, 100000, 200000, 300000, 400000, 401000** and above, 5 KW, A3 Emission. Amended: To request frequencies **1614, 2398, 6425, 8655, 9135, 17310, 12862.5 kc.**, 250 watts power.

NEW—Don Lee Broadcasting System, San Francisco or immediate vicinity.—Construction permit for a new broadcast television station on **42000-56000 kc.**, 1 KW for aural and visual, A3, A4 and special Emission. Amended to request **44000-50000 kc.**

WAHM—WLBG, Inc., Portable-Mobile.—License to cover C. P. (B2-PRY-160) for new relay station and change corporate name to Richmond Radio Corp.

NEW—Winona Radio Service (A partnership composed of M. H. White & H. R. Wiecking), Portable-Mobile.—Construction permit for a new relay broadcast station on **1646, 2090, 2190, 2830 kc.**, power 20 watts, A3 Emission.

WNEI—Indianapolis Power and Light Co., Mobile.—Voluntary assignment of construction permit (B4-PRY-157) to WBFM, Inc.

WIEW—National Broadcasting Co., Inc., Mobile.—License to cover C. P. (B1-PRY-172) for new transmitter and increase in power from 20 to 25 watts.

W2XH—General Electric Co., Schenectady, N. Y.—Modification of license for change in frequencies from **42000-56000** to **288000-294000 kc.**

KWKH—International Broadcasting Corp., Shreveport, La.—Extension special experimental authority to operate unlimited time on **1100 kc.**, using directional antenna for night use with power of 10 KW, period 8-1-39 to 2-1-40.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Hair and Felt Company and its subsidiary, Clinton Carpet Company, both of 222 West North Bank Drive, Chicago, are charged in a complaint with misrepresentation in the sale of hair underlays or cushions for rugs and carpets.

The respondents are alleged to advertise to the effect that underlays not composed wholly of hair but of jute or like materials will not withstand ordinary usage; that such underlays will become lumpy; that they will disintegrate in dry air and be ruined in moist air, and that they will cause a rug to wear out sooner than would be the case if no cushion at all were used.

The complaint alleges that in fact jute or jute mixed rug cushions satisfactorily meet the needs for which they are sold and that the respondents' representations are misleading and in violation of the Federal Trade Commission Act. (3822)

Clinton Carpet Company—See American Hair & Felt Company.

Douglas Candy Co., St. Joseph, Mo., is charged in a complaint with use of games of chance and lottery schemes in the sale and distribution of candy to ultimate consumers.

Push cards and punch boards are alleged to be shipped by the respondent to jobbers and wholesale dealers, who in turn assemble the gambling devices and candy into assortments for sale to retail dealers. Sale of the candy to consumers, the complaint charges, is made in accordance with instructions also distributed by the respondent, and the receipt of additional bars of candy is determined wholly by lot or chance. (3817)

Sprague-Kitchen & Company—A complaint has been issued charging Mary Eloise Gauss, trading as Sprague-Kitchen & Co., 4254 North Hermitage Ave., Chicago, with misleadingly representing that "Graolene," a cosmetic preparation for the scalp and hair, is not a dye; that, when applied to gray hair, it will bring about a change of color without dyeing, and that use of the preparation will restore the original natural color to gray hair. The complaint alleges that "Graolene" is a lead sulphur dye; that it will not accomplish the results claimed and may be injurious in effect. (3821)

STIPULATIONS

The Commission has entered into the following stipulations:

Bewley Mills, Fort Worth, Texas, agrees to cease and desist from representing that use of its Red Anchor feeds is a sure way to get maximum production, more vitality or lower mortality; that use of Red Anchor Egg Mash will mean more eggs at less cost, or, when fed along with Bewley's Hen Scratch, will keep the flock's health constantly at the highest level, or that use of the feeds will attain maximum results, unless it is clearly stated that such results can be expected or obtained only when other essential elements such as proper housing, cleanliness, care, water, air, etc., are provided. Bewley Mills also agrees not to cause to be published any testimonials containing representations contrary to the foregoing agreement. (02389)

Botay Laboratories—Estelle Adler Erlan and I. Mathew Berk, copartners trading as Botay Laboratories, 56 West 45th St., New York, have intered into a stipulation to discontinue misrepresentations in the sale of a cosmetic preparation designated "Face Line Oil."

The respondents agree to desist from representing directly or by implication that the use of this product will have any effect upon the "lines" or the wrinkles of the skin or in preventing their formation, or that their product contains any substance or factor necessary for the skin designated by the symbol "Vitamin F," and will also discontinue use of the term "Face Line" or the designation "Vitamin F" or any similar terms to designate their product. They admit there is no evidence of the existence in their product of the factors designated "Vitamin F." (02386)

General Laboratories, Philadelphia, Pa., agrees to cease representing that B-K Powder and B-K Liquid kill germs causing diseases, safeguard poultry from roup and other deadly winter diseases, and harm nothing but germs, and that either of the products will keep hens healthy, is a perfect relief for poultry diseases and is safe for baby chicks, and is not a poison, unless qualified by the statement "when used as directed" or similar words. The respondent also agrees not to publish or cause to be published testimonials containing representations contrary to the agreement. (02387)

Griffin Manufacturing Company, Inc., 410 Willoughby Ave., Brooklyn, has entered into a stipulation to discontinue misleading representations in the sale of shoe polishes designated "Griffin A.B.C. Wax Polish" and "Griffin A.B.C. Liquid Wax Polish" and a white shoe dressing, "Griffin Allwite."

The respondent corporation will discontinue representing that its wax polishes are waterproof under all conditions of use; that they give brighter and longer lasting shines than any other brand or are superior to all other brands, unless such statements are substantiated by competent comparative tests. (02388)

National Institute of Technology—Misleading claims concerning the ownership and operation of an amateur radio station in connection with the sale of correspondence courses in "electronic engineering," will be discontinued by a Minneapolis concern under a stipulation.

Thomas J. Casey, trading as National Institute of Technology, agrees to discontinue using printed or oral representations tending to convey the idea that his school owns, operates and controls amateur Radio Station W9VXZ, Minneapolis, or any other radio station for its curricular purposes; that use of that or any other station or call number may be available to unlicensed students for practice and operation, or, inferentially or otherwise, that his school has the authority to operate or control the operation of the transmitting equipment of an amateur radio station even though it may own such equipment.

The stipulation recites that the respondent, in selling trade school courses for radio operators and mechanics, extensively featured W9VXZ as a part of the school's operating equipment; that he personally operated the station for the school's commercial purposes, seeking to make contacts with radio broadcasting studios throughout the country in an effort to procure paying jobs for his students; and that this was contrary to Federal Communications Commission regulations that amateur stations shall not be used commercially and that amateur licenses are not issued to schools or their representatives or to amateur radio societies if their names advertise business concerns or commercial schools.

The facts are, according to the stipulation, that the call number W9VXZ is not the property of the school as represented and implied, but is assigned in a license to Raymond O. Overby as trustee for the National Institute of Technology Radio Club, an amateur radio society, upon a showing made by him of control of proper transmitting apparatus and of the station premises.

The respondent agreed to cease use of the words "Institute" and "Technology" in his trade name or in any manner as applied to his school or any affiliated radio club or society; or the use of any similar designation the effect of which is to convey the belief that the school is equipped to give technological courses or instruction other than trade or vocational, or that either school or club is an institution for the promotion of learning, philosophy, art or science, or is a national association of technologists.

Among other representations to be discontinued are overstatements of actual earning power or probable salaries and future security of graduates and students; representations implying that the respondent is in a position to offer employment to his graduates; and implications that persons lacking in proper education, experience or aptitude can become competent electronic or radio men by taking the respondent's course; that the school is equipped to supply competent engineers; that "some of the best engineers in this country" collaborated in preparing the course; that a certificate issued by the school is a diploma; that a fictitious price for the course is the actual price, and that the school occupies the whole of a building depicted when in fact it occupies part of one floor. (2482)

Roberti Brothers, Inc., Los Angeles, manufacturers and distributors of furniture, mattresses and bed springs, have entered into a stipulation to desist from offering for sale or supplying customers with products bearing what purport to be the retail selling prices of the products, when in fact they are not the regular retail selling prices but are in excess of the prices at which the products are customarily offered for sale and sold in the usual course of retail trade. (2481)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Eastern Trading Company—Henry O. Harr, trading as Eastern Trading Company, 3974 Vincennes Ave., Chicago, has been ordered to cease and desist from representing that incense distributed by him has magical powers.

The respondent is forbidden to further represent that the incense distributed by him possesses mystical charms; that "lucky numbers" which appear in the ashes of the incense are the keys to one's fortune or have any significance or meaning whatever. (3432)

F & F Laboratories, Inc., 3501 West 48th Place, Chicago, has been ordered to discontinue representing that F & F Cough Syrup and F & F Lozenges or any preparation having similar ingredients or therapeutic properties, whether sold under those or other names, are a cure or remedy for coughs, colds or throat irritations, or constitute a competent treatment therefor. It was found that the respondent's preparations were valuable only in giving temporary palliative relief from symptoms of throat irritations and simple colds. (3727)

Lincoln Locker Corporation, Pocahontas, Iowa, has been served with an order requiring it to cease and desist from misleading representations in the sale of cold storage lockers designated "Lincoln Louvred Lockers," which are separate compartments, individually locked, and may be installed in cold storage warehouses for leasing to individual patrons for storing and preserving perishable foodstuffs.

Under the order the respondent is directed to cease representing that its cold storage lockers are made of copper or copper alloy galvanized sheet metal or rust-proof copper alloy steel, or 22-gauge copper alloy sheet. The Commission's findings are that they contain no copper or copper alloy metal, but are made of galvanized sheet steel; that there is a public preference for lockers composed of copper or copper alloy steel as compared to those composed of galvanized sheet steel but that in fact there is little difference in the two metals so far as rust-resistant qualities are concerned. (3345)

Standard Brands of California—See Standard Brands, Inc.

Standard Brands, Incorporated, New York, and its subsidiary, Standard Brands of California, San Francisco, have been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act.

These companies are the country's largest manufacturers of yeast, producing approximately 120,000,000 pounds a year or between 55 and 65 per cent of the national production. Through 444 distributing agencies their products reach practically every United States community.

The Commission found that the respondents' differentials in price in the sale of bakers' yeast were not based on the quantities actually purchased by customers, but upon their estimated monthly requirements from all manufacturers, whether purchased from the respondents or from others.

The order prohibits price discrimination between different purchasers of bakers' yeast of like grade and quality by sales at different prices based on the total quantity or volume purchased (whether from the respondents or from any other source) over a period of time by the respective purchasers, where the effect may be to unjustifiably injure competition. (2986)

Zephyr Radio Company—Orville J. Bond, trading as Zephyr Radio Company, Highland Park (Detroit), Mich., has been ordered to cease and desist from representing that radio sets distributed by him will give world-wide reception.

In magazines and newspapers the respondent is alleged to have advertised as follows: "Get politics, news, music, market and weather reports on a new Zephyr world-wide, all electric, battery or auto radio. All latest improvements."

Findings of the Commission are that the "Zephyr" radio receiving set advertised to sell at $6.95 is a complete radio set with all working parts and aerial designed as a local receiver primarily for reception in a radius not over 100 miles and will not give world-wide reception; that "world-wide reception" as applied to radio means that a radio is capable of picking up signals transmitted from the major continents of the world and that the respondent's radio receiving set is not capable of picking up signals from the major continents of the world, nor even from remote places on this continent.

The respondent is ordered to cease and desist from representing that the radio set sold under the name of "Zephyr Radio Receiving Set" or any other radio receiving set similarly constructed, will give world-wide reception or that such a set will receive programs broadcast from all continents. (3294)

FTC DISMISSES CASE

The Federal Trade Commission has dismissed a complaint charging Duro-Test Corporation, 583 Broadway, New York, with unfair competition in the sale of incandescent lamps. Dismissal was ordered because it appeared the allegations of the complaint had not been sustained.

NAB Reports
THE NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 26, June 30, 1939

Advance Convention Reservations Break Record

The seventeenth annual convention of the NAB, and the first since its reorganization, has attracted the largest number of advance registrations in the association's history.

While many and diverse subjects will be considered by the broadcasters, two stand out in importance: the report of the Code Committee and the report of the Copyright Committee.

The convention will be addressed by Carl Milliken, secretary of the Motion Picture Producers and Distributors of America, Inc., who for the past seventeen years has been in charge of the motion picture industry's code of self-regulation. Elmer F. Andrews, Wage and Hour Administrator, will address the convention on Wednesday morning, as will Dr. John W. Studebaker, U. S. Commissioner of Education; and Orrin Dunlap, radio editor of the *New York Times.*

Though the convention does not officially convene until Tuesday morning, July 11, meetings and social activities will begin on Sunday morning, July 9. On Sunday, also, the Board of Directors will hold a dinner meeting; and at two o'clock the Research Committee will hold a pre-convention meeting. The annual golf tournament will begin at ten-thirty, Sunday morning.

Group meetings of the clear channel stations, the local channel stations, and the National Association of Regional Broadcast Stations, will be held Monday morning. In the afternoon, the IRNA group and the National Committee of Independent Broadcasters will meet. Later in the afternoon there will be a demonstration of television, followed by a discussion of radio engineering problems by John V. L. Hogan, chairman of the NAB Engineering Committee.

The Bureau of Radio Advertising will hold a luncheon on Monday in conjunction with the NAB Sales Managers' group. Luncheon will be followed by a report on sales

management policies by Dr. Herman S. Hettinger, and a forum discussion of various sales problems.

The convention will be called to order at nine-thirty Tuesday morning. President Miller will make his annual report during the opening morning session. In the afternoon the Code Committee's report will be presented and discussed. This will be a closed membership meeting.

On Wednesday morning the addresses of Mr. Andrews, Dr. Studebaker and Mr. Dunlap will be made. Wednesday afternoon will be devoted to the report and discussion of the copyright committee. This meeting will be restricted to NAB members only.

The annual banquet will be at seven o'clock Wednesday evening. During the latter portion of the evening President Neville Miller will participate in a discussion of "The Three Mirrors of America—The Press, the Motion Picture, the Radio," with Will Hays, president of the Motion Picture Producers and Distributors of America, Inc., and James G. Stahlman, ex-president of the American Newspaper Publishers Association.

It is anticipated that the convention will adjourn Thursday. On the Thursday schedule are: reports from Committees and discussions of same; a brief address by Joseph Marty, executive secretary of the Radio Servicemen of America, on "The Missing Link in Broadcasting"; the election of the six new directors; adoption of resolutions; a wind-up of unfinished business and adjournment. On Thursday afternoon at two P. M. the new Board of Directors will hold its first meeting.

Convention arrangements are being supervised by Edwin M. Spence, Secretary-Treasurer; the convention program agenda by Ed Kirby, Director of Public Relations, and Paul Peter, Director of Research. Press relations will be handled by Joseph L. Miller, Director of Labor Relations.

Members are asked to register as early as possible.

Special activities and entertainment have been arranged for the ladies.

FCC Postpones "Censorship" Hearing to July 14

The FCC this week postponed from July 12 to July 14 a hearing on its "censorship" rule for international broadcast stations.

The rule would require these stations to "render only an international broadcast service which will reflect the culture of this country and which will promote international good-will, understanding and cooperation".

Both the NAB and the American Civil Liberties Union requested a hearing before this rule went into effect. The Commission granted the Civil Liberties Union's petition.

Adoption of the rule had its repercussions in both a committee hearing and floor debate on the 1939-40 appropriation for the Commission. In a House appropriation sub-committee hearing, Representative O'Neal (D-Ky) asked Thad H. Brown, acting FCC chairman, whether there was anything in the budget "calling for funds to enforce such a regulation as that?"

Mr. Brown: "I do not believe there is."

Mr. Dempsey: "There is no specific appropriation attached to any regulation."

Mr. O'Neal: "I want to say, Mr. Chairman, that I will never vote for a dime's worth of appropriation for any such un-American doctrine as that. If they can do it internationally, they can do it nationally. And if there is one item for enforcement of that regulation, I want to register my protest against it."

Later, Representative Wigglesworth (R-Mass) asked whether the Commission considered it "has the right and should exercise power of censorship over programs" either domestic or international.

Mr. Brown replied: "Speaking for the Commission, I am quite sure that every member of the Commission does not consider that it has any right of censorship either domestically or internationally. The statute definitely prohibits censorship. * * * In my judgment there is no censorship whatever involved in that language" (in the international rule).

During debate on the House floor, Representative Dirksen (R-Ill) introduced an amendment to the Appropriations Bill that "no part of this appropriation shall be available for the effectuation and enforcement of the Commission order of May 23, 1939, relating to international shortwave broadcasting". "It is so easy to translate that kind of authority, and that kind of criticism and that kind of restriction from the international field to the national field," he said.

Representative Woodrum (D-Va), chairman of the subcommittee in charge of the bill, said he "quite agreed that this matter should have legislative attention" but that "we cannot undertake, in the consideration of an emergency effenciency matter, to renew the rules and regulations of the FCC and undertake to write it into the law".

The Dirksen amendment was rejected, 43 to 27.

NAB COPYRIGHT COMMITTEE TO MEET JULY 10 IN ATLANTIC CITY

The entire NAB copyright committee will meet Monday, July 10, at 8 p. m. at the Ambassador Hotel, Atlantic City, to receive a report from the negotiating subcommittee and to discuss the situation.

The negotiating subcommittee met with ASCAP officials on June 26 in New York. After considerable discussion of the various phases of the question, the meeting was recessed until Thursday, July 6.

240 STATIONS OPERATE IN RED LAST YEAR, FCC SAYS

The FCC has released a series of tables covering the economic status of broadcast licensees for the year 1938. The data was compiled by the Accounting, Statistical and Tariff Department of the Commission from information supplied by the licensees on Forms 705 and 706.

The tables show that there were 764 licenses and construction permits outstanding at the end of the year, classified as follows:

660	station reports used in the tabulations
40	construction permits
38	non-commercial stations
12	located in territories
14	not used because of defects in reporting
764	Total

The 660 stations reported in the tabulation include 240 stations from which not enough revenue was derived during the year to pay their actual expenses, including depreciation. Those 240 stations showed losses in the aggregate amounting to $2,223,195. The 419 stations reporting profits showed broadcast income of $16,728,533. One station reported neither a profit nor a loss for the year.

The tabulations include 175 stations each of whose time sales were less than $25,000. As a group these 175 stations showed a loss, their aggregate broadcast revenues being $2,520,026 and their aggregate expenses (inclusive of depreciation, taxes other than income taxes, etc.) $2,870,729. However, certain of these stations showed a profit.

Other compilations from the reports show that 658 of the stations and networks had a payroll for the year amounting to $45,663,757. Of this amount, $4,239,470 was paid to officers of the licensee companies. As of December 31, 1938, these stations and networks employed a total of 23,060 persons, including staff musicians and other artists on the regular payroll.

During the week beginning December 11, 1938, there were 18,359 full-time employees with a total payroll for the week amounting to $830,003. During the same week there were 4,377 part-time employees, drawing a total for the week in the amount of $103,134. The average compensation for the week beginning December 11 was $45.20 (18,359 employees), compared with $45.12 (17,085 employees) for the week beginning March 6, 1938. For part-time employees, the average compensation was $23.55 (4,377 employees) for the week beginning December 11, 1938, compared with $18.97 (5,820 employees) for the week beginning March 6, 1938.

The tables as released by the Commission are in summary form and represent generally the information included in the tables released on June 6, 1938, for the year 1937. Those tables include balance sheets for the major networks and for the industry as a whole.

FCC ADOPTS NEW RULES FOR BROADCASTING

The FCC has approved new Rules and Regulations governing Standard Broadcast Stations. The new rules become effective on August 1, 1939, except as otherwise provided in the terms of the individual sections. Not yet printed, the new rules will be distributed as soon as they are received.

Hearings on the proposed new rules and regulations were held from June 6 to June 30, 1938, before a Committee composed of Commissioners Case (Chairman), Craven and Payne. The new rules are the outgrowth of these hearings and the recent report on Rules and Standards of Good Engineering Practice concerning Standard Broadcast Stations which was released in two parts, the first appearing January 18, 1939, and the second, April 7, 1939. Oral Argument on these Rules and Standards was held before the Commission on June 1, 1939.

The recommendation in the report of the Committee for the adoption of these Rules and Regulations and Standards of Good Engineering Practice was, with a few modifications, unanimously approved by the Commission.

The new rules and regulations contain several new provisions, as well as numerous changes and clarifications necessary due to progress in the art since the original rules governing standard broadcast stations were promulgated some 10 years ago.

Under the new rules, the license period of Standard Broadcast Stations is increased from six months to one year. The FCC says that the instability created by the delay of Mexico in ratifying the North American Regional Broadcasting Agreement was a factor in its decision not to extend the license period of broadcast stations to a term greater than one year at this time. Under the Communications Act of 1934 the Commission is empowered to grant licenses for any period up to three years.

The new regulations change the classes of stations from Clear Channel, Regional, and Local, to Class I, Class II, Class III and Class IV. The Class II station is a new class recognized for duplicate operation on clear channels for the purpose of extending urban service.

The new rules permit the increase of the maximum night power of Class III stations to 5000 watts and the maximum night power of Class IV stations to 250 watts. The present night power limitation on these stations is 1000 watts and 100 watts, respectively.

The number of clear channels allocated for the exclusive use of stations at night, under the new regulations, is reduced from 40 to 26, and in addition, 18 clear channels are made available for duplicate operation either of Class I stations or Class I and Class II stations.

In view of the uncertainty in regard to the North American Agreement the Commission deemed it inadvisable to reduce the number of unduplicated clear channels at this time to less than 26. However, the provisions for the allocation of frequencies follow closely, but do not duplicate, those enumerated in the North American Regional Broadcasting Agreement. In general the new rules are designed to extend and improve broadcast service in the United States through an increase in signal in urban areas and an increase in coverage in rural areas.

The Commission feels that the new Rules and Regulations, together with the Standards of Good Engineering Practice, are a distinct contribution to the science and art of radio. Drawn up with the cooperation of the industry and the foremost radio engineers in the country, the FCC says the new rules and standards give to the people of the United States and its possessions the technical basis for the finest radio service in the world. The advantages of this service, however, cannot be fully realized until the North American Regional Broadcasting Agreement is ratified and made effective, the FCC says.

AD BUREAU TO BE DISCUSSED AT LUNCHEON JULY 10

Headquarters would like to call to the attention of all members the Bureau of Radio Advertising luncheon to be given in conjunction with the Sales Managers' Committee meeting in Atlantic City on July 10. At this meeting the foundation for the new Bureau will be laid. In addition, there will be a report made by Dr. Herman S. Hettinger of his recent survey on sales management policies of radio stations.

This will be followed by a forum discussion of various sales problems. Included in the agenda are: (1) Is there any "audience measurement yardstick" we can all follow? (2) The most effective selling methods used on department stores, clothing stores, banks, insurance companies, ready-to-wear stores. (3) What can we do to get more manufacturers in all lines to do cooperative radio advertising with local stores such as they do with newspaper and direct mail. (4) Effective sales promotion ideas in the local and national field. (5) How to increase billings to chains in dry goods, foods, drug, clothing and other lines. (6) Successful methods of selling Union musical talent to make the A. F. of M. contracts as profitable as possible to the station.

FCC APPROPRIATION APPROVED

The Senate and House have passed the third deficiency bill including an appropriation of $1,838,175 for the coming year for the Federal Communications Commission. The Commission this year had an appropriation of $1,700,000 and asked for $2,000,000. Included in the total is $1,800,000 for regular expenses with an extra $25,000 for printing and binding and $13,175 for miscellaneous expenses.

WALKER FAVORABLY REPORTED

Paul A. Walker, who early this week was renominated a member of the Federal Communications Commission for a seven-year period from July 1 by the President, was favorably reported by the Senate Committee on Interstate Commerce. It is expected that he will be confirmed by the Senate shortly.

Mr. Walker was born in 1881 and graduated from the University of Chicago and the Law Department of the University of Oklahoma. He was a school principal and later a member of the faculty of the University of Oklahoma. He practiced law for several years and for more than 15 years was connected with the State Corporation Commission of Oklahoma, serving as Counselor and Commissioner. Mr. Walker was also employed in a number of public utility and railroad rate investigations and acted as Chairman of the Committee of the FCC which investigated the telephone companies.

TELEVISION REPORT ADOPTED

The FCC on Tuesday unanimously adopted the report of the Television Committee and directed the committee to continue its work. The report of the committee was printed in NAB Reports.

NEW LEGISLATION

CONGRESS

H. R. 6973 (Mr. Lea, D.-Calif.) GOVERNMENT RADIO STATIONS—Same as S. 2611. Authorizing the purchase of site and erection of building in Massachusetts for use as radio-monitoring station at cost not to exceed $30,000. Referred to Committee on Interstate and Foreign Commerce.

S. 2689 (Senator Bone, D.-Wash.) COPYRIGHT—To amend Section 33 of Copyright Act with respect to rules covering importation of copyrighted items. Referred to Committee on Patents.

H. Res. 234 (Mr. Larrabee, D.-Ind.) FEDERAL COMMUNICATIONS COMMISSION—To authorize the FCC to take steps to provide an adequate method to obtain data and information necessary to determine the effects of power in excess of 50 kilowatts, and to provide that the FCC shall not be restrained from licensing one or more than one station to operate on power of more than 50 kilowatts for such experimental operation as may be necessary. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

WISCONSIN:

S. 528 (Peters) COPYRIGHTS—To create (g), (h) and (i) of Section (2) and subsection (3m) and (3n) of Section 177.01, 177.02 and 177.03 of the statutes, relating to copyrighted compositions. Referred to Judiciary Committee.

SESAC ADDITION

SESAC has notified its licensees that it has added the catalogue of Alberto Colombo, Hollywood, Calif.

LABOR BOARD CONFIRMS SETTLEMENT IN WIOD CASE

The National Labor Relations Board has made an order based upon a stipulation requiring Isle of Dreams Broadcasting Corporation and Miami Daily News, Inc., Miami, Florida, to bargain, upon request, with the American Federation of Radio Artists (A. of F. L.).

The stipulated order also provided for reinstatement with a payment of $500 to Earle Barr Hanson, an employee who had been discharged.

Charges of unfair labor practices against the companies were filed by the AFL radio artists' union. A hearing on the charges was held in Miami on May 11-13, 1939.

CONVENTION MEETING SCHEDULE

Saturday, July 8, 10 a. m.—Program Standards Committee.
Sunday, July 9, 2 p. m.—Research Committee.
Sunday, July 9, 7 p. m.—Board of Directors.
Monday, July 10, 8.30 a. m.—Newspaper Owned Stations, breakfast meeting, Walter Damm, presiding.
Monday, July 10, 10 a. m.—National Association of Regional Broadcast Stations, John Shepard, presiding.
Monday, July 10, 10.30 a. m.—Clear Channel Group, Edwin W. Craig, presiding.
Thursday, July 13, 2 p. m.—Board of Directors, meeting to organize new Board.

Details of other group meetings in session Monday, July 10, will be found in convention program and on official bulletin Board.

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED FINDINGS OF FACT

The Federal Communications Commission in a Proposed Findings of Fact proposes to deny the application of WMFF, **Plattsburg, New York,** to permit it to install a new transmitter, to make changes in its antenna system, to change its transmitter site, and to operate on **1240 kilocycles** instead of **1310 kilocycles,** and to increase its power from 100 watts night, 250 watts day, unlimited time, to 1000 watts employing directional antenna at night.

The Commission in a Proposed Findings of Fact proposes to grant the application of the Mutual Broadcasting System, Inc., **Chicago, Illinois,** for renewal of its permit to transmit programs to broadcast stations in Canada.

In a further Proposed Findings of Fact the Commission proposes to grant the application of the Greater New York Broadcasting Corporation for a license to operate a station in **New York City** on **1100 kilocycles,** 5000 watts, unlimited time. WPG, **Atlantic City,** which now operates on that frequency with 5000 watts and shares time with WBIL of New York City, will cease operation in Atlantic City, and WOV, New York City, now operating on **1130 kilocycles** with 1000 watts will also cease operation and instead a station will operate in New York City on **1100 kilocycles,** 5000 watts, unlimited time.

The Commission in a Proposed Findings of Fact proposes to deny the application of the Pee Dee Broadcasting Corporation for a new station at **Florence, South Carolina,** to operate on **1200 kilocycles,** 100 watts night, 250 watts day, unlimited time, and proposed to grant the application of WOLS, Florence, South Carolina, to change its hours of operation from daytime to unlimited and has granted the application of the same station for license renewal.

DECISIONS OF COMMISSION

The Federal Communications Commission in a decision has granted the application of KSAM, **Huntsville, Texas,** to increase its daytime power from 100 watts to 250 watts on **1500 kilocycles** "upon the express condition that the station's transmitting equipment shall comply with the requirements of Rules 132 and 139 of the Commission."

The application of KOBH, **Rapid City, South Dakota,** for voluntary assignment of the station's license from the Black Hills Broadcast Company to Black Hills Broadcast Company of Rapid City, and renewal of the station's license has been granted by the Commission. The station operates on **1370 kilocycles,** 100 watts night, 250 watts day, unlimited time.

The Commission has granted the application of KSAL, **Salina, Kansas,** to use **1120 kilocycles,** 500 watts night, 1000 watts LS, unlimited time, using a directional antenna at night, and subject to specific provisions.

The application of Panama City Broadcasting Company for the erection of a new station at **Panama City, Florida,** to use **1200 kilocycles,** 250 watts day, 100 watts night, unlimited time, has been granted by the Commission.

The Commission also granted the application of the Bowling Green Broadcasting Company for the erection of a new station at **Bowling Green, Kentucky,** to use **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

The Commission has also granted the application of the Westchester Broadcasting Corporation, licensee of Station WFAS, **White Plains, New York,** for transfer of control of station from Selma Seitz, transferor, to Valentine E. Macy, Jr., and J. Noel Macy, transferees. The station operates on **1210 kilocycles,** 100 watts, and shares time equally with Stations WGBB and WERB.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The next regular meeting of the Commission will be held on July 12.

The following hearings are scheduled before the Commission in broadcast cases beginning the week of July 3. They are subject to change.

Wednesday, July 5

Further Hearing

NEW—Pawtucket Broadcasting Co., Pawtucket, R. I.—C. P., **1390 kc.,** 1 KW, unlimited time (DA day and night).

Thursday, July 6

Further Hearing

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—C. P., **1120 kc.,** 1 KW, 1 KW LS, unlimited except from 8 to 9 p. m. Monday. Present assignment: **1120 kc.,** 500 watts, unlimited except 8 to 9 p. m. Monday.

WAPO—W. A. Patterson, Chattanooga, Tenn.—C. P., **1120 kc.,** 500 watts, 1 KW LS, unlimited time. Present assignment: **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

July 12

International Broadcast

5653—In re: Section 42.03 (a) pertaining to International Broadcast Service.

July 14

KRLH—Clarence Scharbauer, Midland, Tex.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1420 kc.,** 100 watts, daytime.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 100 watts, daytime.

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—C. P., **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—North Shore Broadcasting Co., Salem, Mass.—C. P., **1200 kc.,** 100 watts, unlimited time.

July 24

Hearing Before Commissioner Case

KUMA—Albert H. Schermann, Yuma, Ariz.—Application for hearing upon Order of Revocation of License of Station KUMA. Present assignment: **1420 kc.,** 100 watts, specified hours.

September 12

NEW—John F. Arrington, Jr., Valdosta, Ga.—C. P., **1230 kc.,** 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCAU—WCAU Broadcasting Co. (a corporation of State of New Jersey), Philadelphia, Pa.—Granted consent of voluntary assignment of licenses for broadcast station WCAU and international broadcast station W3XAU, high frequency broadcast W3XIR, and relay stations W3XEO and W3XHW, from WCAU Broadcasting Company, a New Jersey corporation, to WCAU Broadcasting Company, a corporation of the State of Pennsylvania.

KIUP—San Juan Broadcasting Co., Durango, Colo.—Granted renewal of license for period July 1, 1939, to January 1, 1940.

WBBZ—Adelaide Lillian Carrell, Executrix of Estate of Charles Lewis Carrell, deceased, Ponca City, Okla.—Granted renewal of license for the period ending December 1, 1939.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

WABI—Community Broadcasting Service, Bangor, Maine.—C. P. to install new equipment and DA system and change frequency from **1200 kc.** to **560 kc.,** and increase power from 100 watts night, 250 watts day, to 1 KW, unlimited, employing DA system for nighttime operation. Application designated for hearing in order to determine question of possible interference.

NEW—The Gazette Company, Cedar Rapids, Iowa.—Application amended so as to request C. P. for new station to operate on **1420 kc.,** 100 watts, unlimited time. Application designated for hearing in order to determine question of possible interference.

WPRP—Julio M. Conesa, Ponce, P. R.—C. P. to make changes in composite equipment; change frequency from **1420 kc.** to **1480 kc.;** increase power and time of operation from 100 watts night, 250 watts day, S.H., to 5 KW, unlimited. Exact transmitter site and type of antenna to be determined with Commission's approval. Designated for hearing because pending applications involve increase in service.

WWRL—Long Island Broadcasting Corp., Woodside, L. I., N. Y.—Application for renewal of license designated for hearing because of pendency of application of Arthur Faske requesting facilities of WWRL, and to determine whether public interest, convenience and necessity would be better served by granting this application than by granting that portion of the application of Arthur Faske for modification of license which seeks the WWRL facilities. Temporary license granted pending outcome of hearing.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Modification of C. P. to move station to Council Bluffs, Iowa, install DA system, and extend commencement date from April 15, 1939, to 30 days after grant, and completion date to 180 days thereafter. Application designated for hearing because pending applications involve increase in service and to determine the question of possible interference.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KBIX, Muskogee, Okla.; KGLU, Safford, Ariz.; KRE, Berkeley, Calif.; KVRS, Rock Springs, Wyo.; KWBG, Hutchinson, Kans.; KXO, El Centro, Calif.; WMIN, St. Paul, Minn.; WOPI, Bristol, Tenn.; WRJN, Racine, Wis.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon applications for renewal, but in no event longer than August 1, 1939:

KGIW, Alamosa, Colo.; KSAL, Salina, Kans.; KVGB, Great Bend, Kans.; WBNO, New Orleans, La.

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon applications for renewal, but in no event longer than August 1, 1939:

KVNU, Logan, Utah; WBHP, Huntsville, Ala.; KBGU, Ketchikan, Alaska.

MISCELLANEOUS

The Commission has reconsidered its action taken on March 13 in setting for hearing in Allentown, Pa., the cases involving the voluntary assignment of license of station WCBA from B. Bryan Musselman to Lehigh Valley Broadcasting Company, a Pennsylvania corporation; and the voluntary assignment of license of station WSAN from WSAN, Inc., to Lehigh Valley Broadcasting Company. The Commission has unanimously granted these applications for assignment of licenses, cancelling the hearing heretofore scheduled.

NEW—Central New York Broadcasting Corp., Syracuse, N. Y., Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** 100 watts.

NEW—Columbia Broadcasting System, Inc., Cincinnati, Ohio, Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.,** 50 watts.

NEW—Winona Radio Service, Winona, Minn., Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.,** 20 watts.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted C. P. to move old main transmitter to a new transmitter site; install former transmitter with power of 1 KW, employing DA system for both day and nighttime operation, for emergency use only.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Granted license to cover C. P. authorizing installation of new equipment and vertical radiator, and extension of commencement and completion dates.

WGHB—Florida West Coast Broadcasting Co., Inc., Tampa, Fla., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.,** 40 watts.

WIEW—National Broadcasting Co., Inc., New York City, Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** 25 watts.

W8XAL—The Crosley Corp., Mason, Ohio.—Granted modification of C. P. to extend completion date to January 1, 1940.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted license to cover C. P. authorizing move in transmitter site, installation of new equipment and DA for day and nighttime operation; increase in power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day; and extension of completion date to September 15, 1939.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted special temporary authority to operate simultaneously with WGBB from 4 to 5 p. m., EDST, on June 25, in order to broadcast Watch Tower Bible and Tract Society program.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted special temporary authority to operate unlimited time on July 4, in order to broadcast programs of civic nature and patriotic interest in commemoration of the national holiday.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate unlimited time for the period July 1 to July 30 (provided WSVS remains silent), in order to broadcast programs as described in letter.

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate from 7:30 to 10:30 p. m., EST, on June 26, in order to broadcast speeches to be made at Peninsula General Hospital Campaign Committee banquet, using 100 watts only.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Denied special temporary authority to operate unlimited time, with 1 KW, for the period June 27 to July 26, in order to broadcast civic, educational, etc., programs.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Denied special temporary authority to operate simultaneously with WAZL from 8:30 p. m., EDST, to the conclusion of National and American League team games on July 26, August 2, 8 and 16.

W9XXL—The Ashland Broadcasting Co., Ashland, Ky.—Granted special temporary authority to operate relay broadcast station on the frequencies **30820, 33740, 35820, 37980 kc.,** 10 watts, for the period June 20 to June 24, in connection with State Championship Golf Tournament play.

W2XBF—Wm. G. H. Finch, New York City.—Granted special temporary authority to operate experimental broadcast station on the frequencies **42260 kc.** in addition to the normal licensed frequencies, for the period July 1 to July 30, pending definite arrangements to be made in ultra high frequency bands.

WHAZ—Rensselaer Polytechnic Institute, Troy, N. Y.—Granted special temporary authority to remain silent August 21, 28 and September 4, in order to observe summer vacation.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted motion for leave to file amendment to application for C. P. to request increase in power from 10 KW to 50 KW.

NEW—Pawtucket Broadcasting Co., Pawtucket, R. I.—Denied, exceptions noted by counsel for petitioner, motion to dismiss respondent's (The Outlet Co., Providence) appearance in re application of Pawtucket Broadcasting Co.

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—Granted motion to take depositions in re application for C. P. to operate on **1200 kc.,** 100 watts night, 250 watts LS, unlimited time.

W9XUY—Central States Broadcasting Co., Omaha, Nebr.—Granted motion for leave to withdraw without prejudice application for renewal of high frequency broadcast station.

WOL—American Broadcasting Co., Washington, D. C.—Granted petition for postponement of hearing, now scheduled for July 10, 1939, until some time in September, on application of John F. Arrington, Jr., for a new station in Valdosta, Ga., to use **1230 kc.,** 250 watts day and night, unlimited time.

KPDN—R. C. Hoiles, Pampa, Tex.—Granted special temporary authority to operate from 8 to 10 p. m., CST, on June 23, in order to broadcast Chamber of Commerce State Highway Commission Banquet.

KOME—Harry Schwartz, Tulsa, Okla.—Denied special temporary authority to operate from 8:30 to 10:30 p. m., CST, for the period June 28 to July 27, in order to broadcast Texas League baseball games, using 100 watts only.

WPG—City of Atlantic City, N. J.—Granted special temporary authority to operate from 3:15 to 4:30 p. m., EST, on June 25, provided WBIL remains silent, in order to broadcast baseball games.

United Air Lines Transport Corp., Washington, D. C.—Granted special temporary authority to operate already licensed aircraft radio transmitter aboard plane owned by United Air Lines Transport Corp., call letters KHAZT, as a relay broadcast station, on frequency **2790 kc.,** to relay broadcast program in connection with arrival Pacific Fleet and Golden Gate Exposition to station KPO and NBC Red Network, from 11:30 a. m. to noon, PST, on July 1.

KFRO—Voice of Longview, Longview, Tex.—Denied special temporary authority to operate from local sunset (July 7:30

p. m., CST) to 11:05 p. m., using 100 watts, during month of July.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period June 23 to July 22, pending KWLC's compliance with Rule 131.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan and Bostwick, St. Albans, Vt.—Present license extended for period of two months on a temporary basis only subject to whatever action may be taken upon pending application of this station for renewal of license, involving a possible violation of Section 310(b) of the Act.

W9XTA—Schonert Radio Service, Harrisburg, Ill.—Denied motion requesting that the Commission reconsider its action in designating for hearing the application for renewal of license of high frequency broadcast station W9XTA, and grant said application without hearing.

KVSO—Ardmoreite Publishing Co., Inc., Ardmore, Okla.—Dismissed application for consent of the Commission to the transfer of control of the Ardmoreite Publishing Co., Inc., as satisfactory information relating to stock ownership has been furnished.

KEHE—Hearst Radio, Inc., Los Angeles, Calif.—Denied petition for amendment of final order adopted by the Commission on June 21, 1939.

W9XAK—Kansas State College of Agriculture and Applied Science, Manhattan, Kans.—The Commission today vacated its action designating for hearing the application for C. P. to change existing television equipment, reduce the power of the station from 125 watts to 100 watts, and change frequency assignment from the **2000-2100 kc.** band to the **42,000-56,000 kc.** band. Said application will be treated as an original C. P. and re-routed through the departments of the Commission for further consideration.

WHA—University of Wisconsin, Madison, Wis.—Continued hearing now scheduled for July 31 to September 11, 1939.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Continued hearing now scheduled for July 31 to September 11, 1939.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Continued hearing now scheduled for July 31 to September 11, 1939.

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Granted special temporary authority to operate ship radio station transmitter licensed to Victor E. Dalton, WCEE, as a relay broadcast station on **2790 kc.**, with power of 60 watts on July 4, in order to relay broadcast of start of Transpacific Yacht Race from San Francisco Bay, to be broadcast by radio station KMTR.

W8XIQ-W8XIR—WGAR Broadcasting Co., Cleveland, Ohio.—Granted special temporary authority to operate relay broadcast experimental stations on frequency **31220 kc.** pending definite arrangements to be made to eliminate interference with Cleveland's Police Radio Service, for a period not to exceed 30 days.

APPLICATIONS FILED AT FCC

680 Kilocycles

WPTF—WPTF Radio Co., Raleigh, N. C.—Construction permit to install new transmitter; increase power from 5 to 10 KW; increase hours of operation from limited to unlimited time, using directional antenna at night. Amended to request 50 KW power, and make changes in equipment.

1120 Kilocycles

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Modification of license to change hours of operation from unlimited except 8 to 9 p. m. Mondays, to unlimited. Request facilities of station WTAW.

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Modification of license to make changes in hours of operation by releasing time from 8 to 9 p. m. Mondays.

1130 Kilocycles

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Construction permit to install new transmitter.

1210 Kilocycles

KOVO—Clifton A. Tolboe, tr/as Citizens Voice & Air Show, Provo, Utah.—Modification of construction permit B5-P-2044, for new station requesting approval of antenna, and studio site at 44 W. Center St., Provo, Utah, and transmitter site at 3rd South and 16th West, Provo, Utah.

1310 Kilocycles

WSAV—Arthur Lucas, Savannah, Ga.—Voluntary assignment of construction permit B3-P-1714, from Arthur Lucas to WSAV, Inc.

KHUB—John P. Scripps, Watsonville, Calif.—Modification of license to change hours of operation from daytime to unlimited time, using 100 watts night and 250 watts day power.

1370 Kilocycles

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Construction permit for changes in transmitting equipment. Amended re equipment.

1420 Kilocycles

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Modification of construction permit B2-P-1727 as modified for a new station, requesting extension of completion date from 7-28-39 to 9-27-39.

WJMS—WJMS, Inc., Ironwood, Mich.—Construction permit for equipment changes and increase in power from 100 watts to 100 watts night, 250 watts day.

MISCELLANEOUS

W1XO—Travelers Broadcasting Service Corporation, Mobile, area Connecticut.—Construction permit for changes in equipment; decrease in power from 50 to 25 watts; specify frequencies **31220, 35620, 37020, 39260 kc.**, in accordance with new rules.

NEW—The Travelers Broadcasting Service Corporation, Portable-Mobile, area of Hartford, Conn.—Construction permit for a new relay broadcast station on **31220, 35620, 37020, 39260 kc.**, power 0.2 watts, A-3 emission.

NEW—WIBX, Inc., Portable-Mobile, area of Utica, N. Y.—Construction permit for a new relay broadcast station on frequencies **1622, 2058, 2150** and **2790 kc.**, 50 watts power, A-3 emission.

W1XA—General Electric Co., Bridgeport, Conn.—License to cover construction permit (B1-PVB-12). Amended to specify frequencies **66000-72000 kc.**

W9XC—Central Broadcasting Co., near Mitchelville, Iowa.—Modification of construction permit B4-PEX-23 for extension of completion date from 6-18-39 to 9-18-39.

W9XAI—The Journal Co. (Milwaukee Journal), Milwaukee, Wis., Portable-Mobile.—Construction permit for changes in equipment and decrease power from 50 to 25 watts, specify frequencies **30820, 33740, 35820, 37980 kc.**, in accordance with new rules.

W2XVT—Allen B. DuMont Laboratories, Inc., Passaic, N. J.—Construction permit for changes in equipment; increase power to 5 KW; request frequencies **44000-50000, 78000-84000** and **102000-108000 kc.**; and request waiver of Rule 43.13(b). Amended to request frequencies of **78000-84000 kc.**

NEW—Joseph N. Peckham, Auburn, N. Y.—Construction permit for a new television station at 23 E. Genesee St., Auburn, N. Y., on **42000-56000 kc.**, 100 watts power, Special emission. Amended to request **44000-50000 kc.**, A-3 and A-5 emission.

W2XWC—Kolorama Laboratories, Inc., Irvington, N. J.—Construction permit for change of location from Irvington, N. J., to Carlstadt, N. J. (Washington Ave. near Moonachie Ave.).

WDAC—University of Wisconsin, Portable-Mobile, vicinity of Madison, Wis.—License to cover construction permit B4-PRY-150.

KBTA—Red River Broadcasting Co., Inc., Portable-Mobile, area of Duluth, Minn.—License to cover construction permit B4-PRY-171.

W6XAO—Don Lee Broadcasting System, Los Angeles, Calif.—Construction permit to change present location from 1076 West 7th St., Los Angeles, Calif., to 1 Lee Drive, Hollywood, Calif., and specify frequency band **44000-50000 kc.**, in accordance with new rules.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Acme Steel Company—Violation of Section 3 of the Clayton Act, which prohibits exclusive dealing agreements, is alleged in a complaint issued against Acme Steel Company, Chicago, the country's largest manufacturer of steel strap and band tying-tools, machines and equipment and the straps, bands and seals used in connection therewith.

The complaint alleges that in leasing and licensing the use of tying-tools and equipment for the tying or binding of boxes, packages and bundles, the respondent company requires the lessee or licensee or other user to enter into an agreement or understanding that he will use in connection with the tools and equipment so leased or licensed only such strapping and seals as are purchased from the respondent, the latter reserving the right to terminate the lease at any time.

It is alleged that the respondent leased or licensed its unit-load tool equipment, used for large jobs like tying bundles for loading on railroad cars, on the condition and agreement that the lessee, licensee or user purchase his entire requirement of bands and seals for use in the operation thereof from the respondent, as long as he is in the possession of such equipment, and on the further condition that if any lessee or licensee should use in the operation of such machines and equipment any tying material other than that purchased from the respondent company, the right to the use and possession of the respondent's machines and equipment may be terminated and such property repossessed. (3818)

A. S. Aloe Company—A complaint has been issued charging A. S. Aloe Company, large dealer in surgical products, with unlawful receipt of price discriminations in violation of the Robinson-Patman Act. The company has its headquarters in St. Louis and branch distributing houses in Kansas City and Los Angeles.

It is alleged that the Aloe company induced manufacturers, jobbers, importers and distributors of surgical products to discriminate in price between different purchasers buying articles of like grade and quality by charging competitors of the Aloe company higher prices than those charged Aloe.

The complaint alleges that the discriminations favoring the Aloe company are not uniform on each surgical product sold or from each dealer and that the Aloe company pays the sellers from approximately 10 per cent to approximately 30 per cent less for such products of like grade and quality than do the competitors, depending upon the surgical product and the seller, or either of them. (3820)

Ardell Razor Blade Corp.—Unauthorized use of well-known trade names in the sale of razor blades is alleged in a complaint issued against Ardell Razor Blade Corporation, Newark, N. J., and its selling agent, Fuller Blade Company, Inc., New York.

The respondents are alleged to have etched on both faces of certain razor blades sold and distributed by them the words: "Made IN U.S.A. EDISON Surgical Chrome Steel. Ed-I-Co Blade Company, New York". Such blades allegedly were packed in cartons on which were printed the words: "EDISON RAZOR BLADES EDISON LEADS WHERE BLADES ARE SOLD".

The respondent are further alleged to have etched on both faces of certain other blades the words: "DeLuxe EASTMAN. Fuller Blade Co., Inc.", and cartons in which these blades were packed featured the word "EASTMAN" with the words "DeLuxe Razor Blades".

It is alleged that use by the respondents of the words "Edison", "Ed-I-Co", "Ed-I-Co Blade Company" and "Eastman" misleads and deceives the purchasing public into the belief that razor blades so designated are manufactured by Thomas A. Edison, Inc., and Eastman Kodak Company, whereas these companies have not authorized the respondents to so use their names.

It is alleged that the respondent companies, through their misleading use of these well and favorably known trade names, have obtained unfair competitive advantages. (3831)

Fuller Blade Company, Inc.—See Ardell Razor Blade Corp.

John J. Fulton Company, 88 First St., San Francisco, distributor of "Uvursin", advertised as an oral treatment for diabetes mellitus, has been served with a complaint alleging misrepresentation. The respondent distributes to purchasers of the preparation a suggested diet, and recommends that the diet be followed in connection with the use of the preparation.

The complaint alleges that the respondent corporation's product has no therapeutic value in the treatment of diabetes mellitus, and that when used with the diet recommended by the respondent, or any other diet, does not add to or increase the efficacy or therapeutic value of the diet as a treatment for diabetes mellitus. (3819)

Lorna Gay Company—See Knight Company.

Howard D. Johnson Company—Advertising ice cream and food as "home made" when they really are factory manufactured, is charged in a complaint issued against Howard D. Johnson Company, 89 Beale Street, Wollaston, Mass.

Typical of these advertisements, the complaint alleges, is "Howard D. Johnson food is wholesome—home cooked", and "Howard D. Johnson home made ice cream."

The complaint charges that the products are factory made, of the ingredients and by the ordinary methods of production used in factories manufacturing such products for sale. (3827)

Knight Company—A complaint charging misleading and deceptive representations in the sale of cosmetics and toilet preparations has been issued against a group of 20 respondents having operating headquarters in Des Moines, Iowa.

The respondents are Richard E. Williams, Steve W. Phillips, Walter C. Phillips, Warren Lee Eastman, Ernie A. Storesund, Don Parmalee and A. L. Anderson, trading under some or all of the following trade names: The Knight Company, June Knight, Marena Company, Lorna Gay Company, and other names; G. G. Grant, W. W. Young, Paul Manning, and the following who are in business as a partnership or otherwise under the trade name The Committee for General Investments: F. W. Fitch, Mrs. F. W. Fitch, L. W. Fitch, Mrs. L. W. Fitch, G. W. Fitch, Mrs. G. W. Fitch, R. H. Young, Mrs. R. H. Young, L. R. Sandahl and Mrs. L. R. Sandahl.

The complaint alleges that the respondents' plan of operation is briefly as follows:

The respondents get into contact with prospective purchasers of cosmetics and toilet articles by mail, soliciting such "prospects" to enter into a simple contest for a prize of comparatively small value, and for that purpose they enclose a reply postal card and circular letter in which they confusingly intermix references to various prizes and contests. When a prospect enters a preliminary contest by mailing the postal card he is advised in reply that he has been awarded the first 100,000 "booster" points. A so-called promptness certificate is sent him, which he is to return with an order for the respondents' products, for which he must remit $1, and a punch or pull card is sent for his use in reselling at a profit to himself the products ordered, provided he does not desire to use them himself. At a later stage he is informed for the first time that his chance of winning a prize depends upon the value of the cosmetics and other toiletries purchased by him from the respondents.

It is alleged that until the close of the contest, there is a continuous flow of circular letters and other literature similar in text and purport from the respondents to all contestants, urging that they purchase the respondents' products and representing that each has a chance to win the prize in each sub-contest and also the grand prize, and that one more order may make a contestant the winner.

It is alleged that the respondents make these representations well knowing that many of the contestants are purchasing their products for resale in rural communities and small cities and towns where the probable maximum demand for such preparations cannot be sufficient to give the contestant any chance to win. (3833)

Arthur Longfield—Simulation of the labels, wrappers and bottles of Lea & Perrins Worcestershire Sauce, is alleged in a complaint issued against Arthur Longfield, 522 Myrtle Ave., Brooklyn, distributor of a table sauce designated "Longfield's Celebrated Worcestershire Style Sauce".

Worcestershire sauce, the complaint alleges, was originally made in the County of Worcestershire, England. From 1835 until 1877 it was manufactured exclusively there. From 1877 to 1898 it was imported from England in casks, partly finished, and completed in this country according to the private formula of Lea and Perrins, the bottling and labeling also having been done here. Later it was manufactured in the United States by representatives of the original company under the original formula.

The complaint alleges that the respondent has packaged his product in a manner closely resembling the containers of Lea & Perrins Sauce, and also has copied from the famous Lea & Perrins label the language: "From the recipe of a nobleman in the country", enclosed in scrolls similar to those depicted on the original. The complaint names the English nobleman, whose identity has often aroused curiosity, as Sir Marcus Sandys, who brought the recipe from India. (3823)

Marena Company—See Knight Company.

Mattia & Briganti Company—See Premier Color Works.

McDowell, Pyle & Co., Inc., 221 West Pratt St., Baltimore, is charged in a complaint with use of games of chance, gift enterprises or lottery schemes in the sale and distribution of peanuts to ultimate consumers.

Punchboards are alleged to be supplied by the respondent to dealers who use them in selling and distributing the respondent's peanuts. (3832)

Mendoza Fur Dyeing Works, Inc.—In a complaint, Mendoza Fur Dyeing Works, Inc., 135 West 29th St., New York, is charged with misrepresentation.

The complaint alleges that for the purpose of inducing customers to forward pelts to the respondent for dyeing and processing, such customers are provided with various sketches and designs for use in their manufacture of fur garments from pelts dyed and processed by the respondent and labels to be attached to the garments designating them as "Mendoza Furs."

In advertising material the respondent is alleged to represent that the sketches supplied by it are designed by famous Parisian couturiers; that the labels are those of famous Parisian couturiers, and that the use of such labels is authorized by them. The respondent also represents that garments labeled "Mendoza Furs" are designed and manufactured in Paris, France, and have won a prize or award in competition with other designers and processors there. The advertisements carry reproductions purporting to be of labels of couturiers such as Schiaparelli, Vionnet, Heim, Max and Jeanne Lanvin and others. (3824)

Milton Products Company—Two Chicago dealers in courses or books of instruction have been served with complaints, charging misleading representations.

Respondent in one case is Milton Meyer, trading as Milton Products Company, 2440 Lincoln Ave., and in the other case, Universal Detective System, Inc., 188 West Randolph St. Meyer also sells watches, optical goods, skeleton keys and other articles, his catalog listing about 2,000 items.

Books of instruction allegedly were sold by Meyer under the titles: "Learn to Play the Piano by Easy Method at Home", "Learn to Vamp Easily", "Play Hawaiian or Steel Guitar in Five Minutes", and "The Famous Five Minute Courses." The respondent's representations as implied in these titles and as made in his advertising matter exceeded the possibilities of accomplishment, according to the complaint.

Among other commodities sold and allegedly misrepresented by the respondent Meyer, the complaint lists books of instruction in ventriloquism, fortune telling, crystal gazing, hypnotism and clog dancing, telescopes advertised as being of fine quality and two and one-half power, and watch cases guaranteed as gold finished and not to tarnish.

Universal Detective System, Inc., selling correspondence courses in detective work, allegedly advertised so as to imply that there is a great demand for detectives; that the respondent is in a position to obtain detective jobs for graduates; that the work is highly remunerative and that anyone can become a detective. Other alleged misleading representations were that the respondent corporation is an operative detective agency of wide extent and that its course exemplifies a unique method in detective work through use of the name "Universal Detective System, Inc.", and by designating its students as members of such "system."

The latter respondent also is alleged to have misleadingly represented by reproductions of photographs of city and police officers engaged in demonstrating fingerprinting and other crime detection activities, together with the use of such officers' names and positions, that the officers and the cities with which they are connected endorsed the respondent and its course. (3825-3829)

Premier Color Works—Complaints alleging misrepresentation by two companies distributing medicinal preparations have been issued.

Michael P. Briganti and Fred C. Mattia, individually and trading as Premier Color Works, and Mattia and Briganti Company, 382 Pearl St., New York, manufacture and sell a line of effervescent and laxative products under the brand name "Ave Maria." Statements and representations printed on the cartons and containers of the preparations include "* * * Made in U. S. A. from a highly recommended formula of Dr. Arnaldo Piutti, Director of the Pharmaceutical Institute of 'Reggio Universita de Napoli' (Italy)," and "Highest Awards in the Hygienic Divisions of International Expositions."

The complaint charges that the products were not made from the formula as advertised; were not exhibited at international expositions and did not receive the awards depicted on the containers and cartons.

Sunlak Company, 226 East 6th St., Cincinnati, distributes a medicinal preparation known as "Sumlakia," recommended as a cure for epilepsy.

Among representations made by the respondent company is "Equally important as its therapeutic qualities is the comforting assurance that Sumlakia is made out of non-narcotic ingredients. It is safe. If it does not help, it should, at least, not harm, not even an aged person or an infant." (3826-3828)

Prime Hat Company, Inc.—Misleading representations in the sale of hats made from old materials is alleged in a complaint issued against Prime Hat Company, Inc., 97 East Houston St., New York, and against Vincent Gerbino, Samuel Scifo, Vito Digregorio and John Scifo, individually and as officers of the corporation.

Purchasing felts and other materials obtained from old, worn and used hats, the respondents are alleged to renovate them and provide new trimmings, sweatbands and size labels so that they appear as new hats, and to sell them to dealers without any marks to inform the public that they are in fact made from old and used felt hat bodies and renovated to look like new.

The respondents are alleged also to use the words "Quality Hats" and the words "Made Over Hat" on sweatbands. By such usage, it is alleged, the respondents fail to disclose to purchasers that such hats are made from old and used hat bodies as distinguished from hats made from new but shopworn hat bodies reclaimed from merchants' shelves. (3830)

Universal Detective System, Inc.—See Milton Products Company.

STIPULATION

The Commission has entered into the following stipulation:

Kulp Lamp Company—Lester Kulp, individually and also trading as Kulp Lamp Company, 700 South Clinton St., Chicago, has entered into a stipulation to desist from misrepresentation in the sale of incandescent lamps.

The respondent agrees to discontinue use on his letterheads, invoices or otherwise, of the words "Manufacturer of" or any other words of similar meaning as descriptive of the business in which he is engaged or the effect of which may tend to convey the belief to purchasers that he makes or manufactures the incandescent lamps sold by him, or that he actually owns and operates or directly controls the plant or factory in which the products are manufactured, when these are not the facts. (2483)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Associated Sales Company—Two dealers using lottery methods in the sale and distribution of merchandise to ultimate purchasers have been ordered to cease and desist.

Hyman Mendels, individually and trading as J. J. Henderson, with places of business at 113 Hudson St., Jersey City, N. J., and 221 West 42nd St., New York, it was found, has been supplying push cards, order blanks and circulars to customers explaining his plan of allotting premiums or prizes to patrons of the push cards in the sale of fountain pen desk sets, clocks and other merchandise.

Philip F. Rubenstein, individually and trading as Associated Sales Company, 605 South First St., Milwaukee, Wis., also is found to have supplied customers with push cards and circulars explaining his plan of selling clocks, clothing, kitchen ware and other merchandise and allotting premiums.

Each respondent is ordered to cease and desist from supplying, mailing, shipping or transporting to agents or distributors or members of the public, push or pull cards, punch boards or other lottery devices to enable such persons to sell or distribute merchandise, or selling or disposing of merchandise by the use of such devices. (3179-3496)

Ever-Keen Dry Shaver Company—J. H. Tigerman, individually and trading as Ever-Keen Dry Shaver Company, and as Royce Dry Shaver Company, 43 East Ohio St., Chicago, has been ordered to cease and desist from lottery methods and misrepresentation in the sale and distribution of electric dry shavers to ultimate purchasers.

"Ever-Keen Electric Dry Shavers" and "New Royce Dry Shavers" are assembled by the respondent, and the Commission finds that in the distribution of the merchandise the respondent includes push cards, order blanks, pamphlets and instructions explaining a sales plan allotting extra premiums or prizes to the operators of the push cards.

The Commission also finds that the respondent has disseminated false and misleading representations with reference to his electric razors, purporting to be descriptive of their value and effectiveness. Representations are that the products are equal in value to $15 electric dry shavers and that they are "acclaimed as the best dry shaver on the market regardless of price." Findings are that the products are of inferior grade and workmanship and last only a short period of time. (3757)

Kolynos Company, New Haven, Conn., has been ordered to discontinue misleading representations in the sale of "Kolynos" toothpaste.

The respondent is directed to cease disseminating advertisements to the effect that Kolynos is an outstanding, competent or effective germicidal or antiseptic agent; that it will remove stains other than ordinary surface stains; that it will keep the mouth thoroughly clean and healthy or assure sound teeth, and that it will restore brightness to teeth dull or discolored because of other than ordinary surface stains.

The order also prohibits the representation that this dentifrice is more concentrated or economical to use than competing products or that it will accomplish results not attainable by use of competing dentifrices. (3587)

Lake Erie Chemical Company and U. S. Ordnance Engineers, Inc., corporations located at 2200 Scranton Road, Cleveland, have been ordered to cease and desist from making certain representations in connection with the sale and distribution of warfare products in foreign trade. The order was issued under the Federal Trade Commission Act as extended by the Export Trade Act (Webb-Pomerene Act of 1918).

In effect the Commission found, among other things, that the respondents caused about 700 copies of a certain catalog to be made up and circulated among foreign purchasers, advertising respondents' products in such manner as to represent that respondents had such official, semi-official, or close relationship with the United States Government, through its Army, Ordnance Department and Chemical Warfare Service, as to afford respondent U. S. Ordnance Engineers, Inc., access to, and use of, all information and experience, including experimental and development work of these military subdivisions of the Government, relating to warfare products and to Government standards and specifications therefor; that U. S. Ordnance Engineers, Inc., is favored and especially fitted by such relationship to supply purchasers with munitions and related products conforming to U. S. Government standards, and that U. S. Ordnance Engineers, Inc., is successor in business to the Lake Erie Chemical Company. The Commission found the representations to be false and misleading in that respondents had no such relationship. (2484)

Patterson School—A Rochester, N. Y., school preparing students for United States Civil Service examinations has been ordered to discontinue misleading representations in the sale of correspondence courses.

Respondents are Arthur R. Patterson, Albert C. Kehr, Arthur W. Edson, Eva O. Brown and Minnetha Coe, trading as Patterson School.

They are directed to cease representing that Civil Service positions are at the disposal of the respondents; that they can in any manner control appointments to such positions; that they can assist applicants in any manner other than by preparing them to take Civil Service examinations and that they have any information pertaining to such examinations other than or in advance of regular official notices. (3228)

Politis Remedy Company—Harry Politis, formerly trading as Politis Laboratory, 4504 North Vancouver Ave., Portland, Oreg., has been ordered to discontinue misleading representations in the sale of Politis, advertised as a remedy for skin afflictions. The respondent is now in business under the name Politis Remedy Company.

Politis is directed to cease representing his preparation as a cure, remedy or competent treatment for eczema, athlete's foot, poison oak, impetigo, and other skin diseases and to discontinue representing, through use of the word "Laboratory" as a part of a trade name, that he conducts or maintains a laboratory for manufacturing or testing or for experimenting with the preparation he sells. (3227)

Royce Dry Shaver Company—See Ever-Keen Dry Shaver Company.

U. S. Ordnance Engineers, Inc.—See Lake Erie Chemical Company.

FCC Assignments For July

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF July
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	**Commissioner Norman S. Case**
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	**Commissioner T. A. M. Craven**
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	**Commissioner George Henry Payne**
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	**Commissioner Frederick I. Thompson**
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	**Commissioner Thad H. Brown**
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	**Commissioner Paul A. Walker**
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	**Secretary T. J. Slowie**
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location."	**Chief Engineer Ewell K. Jett**

2:00 P.M.—First meeting of new Board of Directors

FCC "CENSORSHIP" HEARING

The FCC announced this week that it would confine its July 14 hearing on the new rules for international broadcasting to the "censorship" issue raised by the NAB and the American Civil Liberties Union.

Petitions from the NAB and six short-wave broadcasters requesting enlargement of the issues were denied. Appearances for the July 14 hearing filed by both the NAB and the short-wave broadcasters were accepted, however, and the enlargement petitions were denied "without prejudice to the filing of a petition requesting hearing upon or a reconsideration of any of the Commission's rules or regulations applicable to international broadcast stations."

Swagar Sherley will represent the NAB at the hearing on the "censorship" rule.

FCC REPORTS NETWORK INCOME

The FCC issued a press statement this week saying that the 1938 total time sales for the three major networks and 23 M. & O. stations amounted to $68,123,525. Of that amount $54,938,879 came from net time sales to advertisers after trade discounts; $5,347,388 from sale of station time to networks; and $7,837,258 from sale of station time to users.

Net revenue from broadcast services was reported as $9,307,735 and other income $174,751.

Deductions from income were reported as $985,090, leaving net income before income taxes $8,497,396. Federal income taxes were estimated at $1,473,796, and state income taxes at $19,900, leaving net income for the period after tax deductions, $7,003,700.

WALKER SWORN IN

Commissioner Paul A. Walker was sworn in on July 1 for his second term as member of the FCC. The new term extends for a period of seven years from July 1. He was confirmed by the Senate with no opposition on June 30.

PRESIDENT SIGNS FCC APPROPRIATION

On June 30, President Roosevelt signed the Deficiency Bill which, among other things, contained the appropriation for the Federal Communications Commission for the fiscal year which began on July 1. The total appropriation amounted to $1,838,175. The Commission had asked Congress for $2,000,000.

DONALD O'CONNOR

Station WOLS requests any member knowing the whereabouts of Donald O'Connor, a former employee, to advise WOLS.

FCC DEFERS ACTION ON CERTAIN APPLICATIONS

The FCC this week sent the following notice to licensees of broadcast stations:

> The Federal Communications Commission announced today that final action would be deferred on all pending applications requesting nighttime operation on regional frequencies which would involve serious interference problems if other pending applications requesting the use of 5 KW power on such frequencies are granted. The pending applications requesting the use of 5 kw power at night will, under the Commission's new rules which become effective August 1, no longer be inconsistent with the rules limiting maximum power for nighttime operation on such frquencies. The Commission's new rules and regulations governing standard broadcast stations, which were adopted by the Commission on June 23, provide for maximum permissible nighttime power of 5 kw on regional channels. The present rules limit such power to 1 kw. Applications affected by this action of the Commission fall into three classes: Those which have been set for hearing but not yet heard, those upon which a hearing has been held but no decision rendered by the Commission, and those upon which a decision has been rendered and are now pending on a petition for rehearing. As to those applications which have not yet been heard, an additional issue will be inserted in the notice of hearing concerning the interference problem with pending 5-kw applications, and, thereafter, the applications will be heard in regular course. As to the applications on which a hearing has been held and applications pending on petition for rehearing, a further hearing will be ordered on issues related to the interference problem created by pending 5-kw applications.
>
> Applications pending before the Commission which are affected by the Commission's action include the following:

NEW LEGISLATION

CONGRESS

H. R. 7035 (Mr. Hobbs, D.-Ala.) ANTITRUST LAWS—To amend Section 8 of the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," and to provide additional civil remedies against violations. Referred to the Committee on the Judiciary.

S. 2719 (Sen. O'Mahoney, D.-Wyo.) Same as H. R. 7035, above.

STATE LEGISLATION

New Jersey:

A. 651 (Farley) EMPLOYMENT AGENCIES—To make numerous amendments to the act regulating employment and booking agencies. Referred to Committee on Institutions.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

There was no regular meeting of the Commission this week. The next meeting will be held on July 12.

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, July 10. They are subject to change.

Tuesday, July 11

WCOV—John S. Allen and G. W. Covington, Jr., Montgomery, Ala.—Modification of license, **1210 kc.**, 100 watts, unlimited time. Present assignment: **1210 kc.**, 100 watts, daytime.

KNEL—G. L. Burns, Brady, Tex.—Modification of license, **1500 kc.**, 100 watts, 250 watts LS, unlimited time. Present assignment: **1500 kc.**, 250 watts, daytime.

Wednesday, July 12

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Modification of license, **1380 kc.**, 1 KW, unlimited time (DA night). Present assignment: **1380 kc.**, 500 watts, 1 KW, unlimited time (DA night).

Thursday, July 13

Oral Argument on Petition for Rehearing Before a Quorum of the Commission

Examiner's Report No. I-613:

WTIC—Travelers Broadcasting Service Corp., Hartford, Conn.—Voluntary assignment of license to Travelers Broadcasting Co.; **1060 kc.**, 50 KW, shares with WBAL (SA for **1040 kc.**, simultaneous operation with KRLD, unlimited).

W1XEH—Travelers Broadcasting Service Corp., Hartford, Conn.—Voluntary assignment of license to Travelers Broadcasting Co.; **63500 kc.**, 150 watts, unlimited time, according to Rule 983.

W1XLU—Travelers Broadcasting Service Corp., Hartford, Conn.—Voluntary assignment of license to Travelers Broadcasting Co.; **105,000, 200,000, 290,000, 450,000 kc.**, 5 watts, to operate according to Rules 983, 1002, 1004.

W1XO—Travelers Broadcasting Service Corp., Hartford, Conn.—Voluntary assignment of license to Travelers Broadcasting Co.; **31100, 34600, 37600, 40600 kc.**, 50 watts, to operate according to Rules 983, 1002 and 1004.

W1XT—Travelers Broadcasting Service Corp., Hartford, Conn.—Voluntary assignment of license to Travelers Broadcasting Co.; **31100, 34600, 40600, 37600 kc.**, 100 watts, to operate according to Rules 983, 1002, 1004.

Friday, July 14

KRLH—Clarence Scharbauer, Midland, Tex.—C. P., **1420 kc.**, 100 watts, 250 watts LS, unlimited time. Present assignment: **1420 kc.**, 100 watts, daytime.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.**, 1 KW, unlimited time. Present assignment: **1120 kc.**, 100 watts, daytime.

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—C. P., **1200 kc.**, 100 watts, 250 watts LS, unlimited time.

NEW—North Shore Broadcasting Co., Salem, Mass.—C. P., **1200 kc.**, 100 watts, unlimited time.

International Broadcast

In re: Section 42.03 (a) pertaining to International Broadcast Service.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change:

August 10

Hearing to Be Held Before Commissioner George Henry Payne in the Federal Court Room, Bellingham, Washington

NEW—Bellingham Broadcasting Co., Inc., Bellingham, Wash.—C. P., **1200 kc.**, 100 watts, 250 watts LS, unlimited time (requests facilities of KVOS).

KVOS—KVOS, Inc., Bellingham, Wash.—Renewal of license, **1200 kc.**, 100 watts, unlimited time.

September 11

Hearing Before the Committee to Be Held in Room 1411

In the Matter of Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.

Broadcast

WHA—University of Wisconsin, Madison, Wis.—C. P., **670 kc.**, 50 KW, unlimited time (requests facilities of WMAQ). Present assignment: **940 kc.**, 5 KW, daytime.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Renewal of license, **670 kc.**, 50 KW, unlimited time.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.**, 250 watts LS, limited time.

September 13

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Special experimental authorization; **1420 kc.**, 250 watts night, 1:05 to 2:15 a. m., CST.

NEW—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—C. P., **1310 kc.**, 100 watts, 250 watts LS, unlimited time.

September 25

NEW—Union Broadcasting Co., Scranton, Pa.—C. P., **1370 kc.**, 100 watts, 250 watts LS, unlimited time.

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.**, 500 watts, Emission A-3, unlimited, according to Rule 983 (a).

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.**, 100 watts, unlimited time.

MISCELLANEOUS

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted motion to accept respondent's appearance in re application of Lakeland Broadcasting Co. for a new station at Willmar, Minn.

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Denied motion for clarification and amendment of issues (exception noted by counsel for petitioner) in re application for C. P. to change frequency and power.

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted motion to amend hearing notice by adding issue relating to economic interest, in re application of KUTA, referred to above (exception noted by counsel for KUTA).

NEW—Vincennes Newspapers, Inc., Vincennes, Ind.—Motion for advancement of hearing date from July 10 to 6 in re application of Samuel M. Emison for a new station in Vincennes was passed Nisi. Motion by applicant (Emison) to continue this case granted; new date to be fixed by office of Secretary.

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Granted petition to intervene in the hearing on the application of C. T. Sherer Co., Inc., for a new station in Worcester, Mass.

KFVD—Standard Broadcasting Co., Inc., Los Angeles, Calif.—Granted motion for leave to amend application so as to request frequency **990 kc.**, 1 KW day, 500 watts night, unlimited time.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Granted petition for leave to amend application so as to request daytime only, in re C. P. for new station to operate on **680 kc.**, 250 watts LS.

NEW—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted petition to have depositions received in re application for C. P. to operate on **1370 kc.**, 100 watts, 250 watts LS, unlimited.

KFDY—South Dakota State College, Brookings, S. Dak.—Granted special temporary authority to remain silent July 4, in order to observe holiday.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted extension of special temporary authority to operate with 5 KW at night, using DA, for the period July 14 to August 12, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on **780 kc.**, reduces power so that additional interference is not involved, or until defective DA is corrected by installation of new tuning condensers.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate simultaneously, non-synchronously, with station KFAB commencing 4:45 a. m., CST, for the period July 10, and ending no later than August 8, in order to conform to Daylight Saving Time.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—To operate as above except simultaneously, non-synchronously, with WBBM.

KVOS—KVOS, Inc., Bellingham, Wash.; and NEW—Bellingham Broadcasting Co., Bellingham, Wash.—Commissioner Payne was assigned to preside at the hearing scheduled for August 10, 1939, in Bellingham, Wash., in re application of Bellingham Broadcasting Co. for C. P., and renewal of license of KVOS.

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted special temporary authority to operate from 9 a. m. to 1 p. m. and from 6 to 10 p. m., PST, during the months of July and August (instead of unlimited time as licensed), in order to observe regular vacation period.

KBKC—Columbia Broadcasting System, Inc., New York, N. Y.—Granted special temporary authority to use Type D-100 transmitter, the final amplifier of which consists of one RCA 813 tube which is modulated by two RCA 809 tubes with power of 175 watts, on board the yacht *Geoanna*, on the frequencies of **4797.5, 6425, 8655 kc.**, for the period July 1 to July 25, 1939, for relay broadcast of a series of special programs incident to the Honolulu Yacht Regatta to be broadcast by Radio Station KNX.

KAAC—Columbia Broadcasting System, Inc., New York, N. Y.—Granted special temporary authority to operate Amateur Station W6LS, licensed to Leo Shepherd, as a relay broadcast station on **4797.5, 6425** and **8655 kc.**, for the period July 1 to July 25, 1939, for the purpose of establishing the necessary cue circuit for a series of special programs incident to the Honolulu Yacht Regatta to be broadcast by Radio Station KNX.

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Granted special temporary authority to operate WORC new directional antenna as authorized in B1-P-2270 during daylight hours for the period July 1 to July 10, 1939, in order to facilitate equipment tests for proof of performance measurements.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted special temporary authority to operate until 11 p. m., EST, on June 29, 1939, in order to broadcast civic celebration in City of Williamson.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan and Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from 8:30 p. m. to 12 midnight, EDST, on July 25, 1939, in order to broadcast a special program under the auspices of the local National Guard, Company H, 172nd Infantry.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate from 7 to 8 p. m., CST, on July 2 and 9, in order to carry special revival programs of the Volunteers of America.

KOIN—KOIN, Inc., Portland, Ore.—Granted special temporary authority to rebroadcast over KOIN and the Columbia network program material between 8 a. m. and noon, PST, on July 1, 1939, from short wave stations licensed to the Coast Guard (Coast Guard Cutter Onondaga operating on **2698 kc.**, and Relief Lightship **3410 kc.**), in connection with ceremony of turning Lightship Service over to the Coast Guard.

KFRO—Voice of Longview, Longview, Tex.—Granted extension of special temporary authority to operate from local sunset (July, 7:30 p. m., CST) to 11:05 p. m., CST, using 100 watts only, on Sundays, July 2, 9, 16, 23 and 30, 1939, in order to broadcast church services.

KHGB—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Denied special temporary authority to operate from local sunset (July, 7:45 p. m., CST) to 10:30 p. m., on July 2, 9, 16, 23, and 30, 1939, in order to broadcast church services; to operate from local sunset to 10 p. m., CST, on July 3, 10, 17, 24, and 31, 1939, in order to broadcast "Okmulgee Little Theater of the Air."

WILM—Delaware Broadcasting Co., Wilmington, Del.—Denied special temporary authority to operate simultaneously with station WAZL from 8:30 p. m., EDST, to the conclusion of baseball games on July 19, 1939, and from 8 p. m., EDST, to the conclusion of baseball games on August 8 and 15, 1939, in order to broadcast the baseball games of the National and American Leagues.

WPTF—WPTF Radio Company, Raleigh, N. C.—Denied extension of special temporary authority to operate from 11 p. m. to 12 p. m., EST, for the period beginning July 9, 1939, and ending in no event later than 3 a. m., EST, August 1, 1939, in order to broadcast programs as described in letter of May 27, 1939.

WPG—City of Atlantic City, Atlantic City, N. J.—Denied special temporary authority to operate Sunday July 2, 1939, from 3:15 p. m. to 4:30 p. m., EST, for continuation report of baseball started shortly before commencement period.

W2XWC—Kalorama Laboratories, Inc., Irvington, N. J.—Granted C. P. to move television broadcast station from Irvington, N. J., to Carlstadt, N. J. (approximately 12 miles), and to continue operation for an additional 30 days from July 6, 1939, with power of 500 watts, **2000-2100 kc.**, 12 midnight to 6 a. m., on a non-interference basis.

WESG—Cornell University, Elmira, N. Y.—Granted C. P. to change tubes in transmitting equipment, conditionally, upon a temporary basis only.

W1XOK—The Yankee Network, Inc., Boston, Mass.—Granted license to cover C. P. for a new fixed special relay broadcast station on an experimental basis, to operate with power of 50 watts, frequencies **133030, 134850, 136810** and **138630 kc.**, unlimited time in accordance with Sections 40.04 and 41.04, to be used to relay high fidelity programs using frequency modulation from a site in Boston, Mass.; granted conditionally.

WJBW—Charles C. Carlson, New Orleans, La.—Granted license to cover C. P. and modification thereof authorizing installation of new equipment, moving of studio and transmitter, and extension of commencement and completion dates; granted conditionally.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—Granted modification of C. P. extending completion date from July 17, 1939, to September 17, 1939.

WSKB—McComb Broadcasting Corp., McComb, Miss.—Granted modification of C. P. for approval of antenna and studio site at Berthadale Road at Highway 24, McComb, Miss., and studio at Main St., McColgan Hotel, McComb, Miss., provided the marking of the tower is specifically inserted in the permit.

WTMA—Y. W. Scarborough & J. W. Orvin, d/b as Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted license to cover C. P. and modification thereof authorizing erection of new station in Charleston, S. C., to operate on **1210 kc.**, 100 watts night, 250 watts day, unlimited time.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Granted C. P. to make changes in equipment; frequency **1370 kc.**, power of 100 watts, unlimited time.

W2XWG—Kalorama Laboratories, Inc., Irvington, N. J.—Granted extension of special temporary authority to operate a composite television transmitter, to be located in Carlstadt, N. J., for radio television transmission in the **2000-2100 kc.** band, for operation between the hours of 12 midnight and 6:00 a. m., on a non-interference basis, with a power of 500 watts, emission A5 only, for test and experimental purposes only, for the period July 7 to August 5, 1939.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate Eastern daylight saving time instead of Eastern Standard Time as licensed during period when daylight saving time is in effect but in no event later than 3:00 a. m., EST, October 1, 1939.

KFVS—Oscar C. Hirsch, tr. as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted special temporary authority to operate simultaneously with Station WEBQ from 7:30 p. m. to 9:00 p. m., CST, July 4, 1939, in order to broadcast an address by U. S. Senator Bennett Champ Clark and other activities of the American Legion Picnic.

KQV—KQV Broadcasting Company, Pittsburgh, Pa.—Adopted an order setting for hearing at 10:00 a. m., on July 12, 1939, in the offices of the Commission in Washington, D. C., the application for modification of license.

WINC—WSMK, Inc., Dayton, Ohio.—Granted special temporary authority to operate daytime using new transmitter and directional antenna authorized in C. P. as modified to facilitate field measurements to substantiate phase monitor for a period not to exceed ten days.

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Denied special temporary authority to rebroadcast sustaining programs to be received from international broadcast stations W3XE, W3XAL, and W8XK over Station WPRP, on a non-commercial experimental basis only, for a period not to exceed thirty days.

WPG—City of Atlantic City, Atlantic City, N. J.—Denied special temporary authority to operate Sundays from 3:15 p. m. to 4:30 p. m., EST, for purpose of maintaining continuity in certain baseball broadcasts and on Fridays from 2:00 p. m. to 3:00 p. m., EST, for purpose of broadcasting worthwhile programs of interest to the public generally such as an educational feature description of certain baseball games and musical program for a period of thirty days.

APPLICATIONS FILED AT FCC

550 Kilocycles

WDEV—Lloyd E. Squier & Wm. G. Ricker, d/b as Radio Station WDEV, Waterbury, Vt.—Modification of license to increase power from 500 watts to 1 KW.

640 Kilocycles

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Construction permit to install new transmitter, make changes in directional antenna system, for night use, change frequency from **640** to **1390 kc.,** increase power from 500 watts to 1 KW night, 5 KW day, change hours of operation from limited to unlimited.

920 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—Modification of C. P. (B5-P-1540) to change frequency, power and time, install new antenna and move transmitter, further requesting installation of new transmitter and move transmitter from north of Denver, Colo., to 56th Ave. & Pecos St., Denver, Colo., and extend commencement and completion date 30 and 180 days respectively.

1210 Kilocycles

WPIV—Petersburg Newspaper Corp., Petersburg, Va.—Modification of C. P. (B2-P-1475) for a new station requesting approval of antenna, and approval of studio and transmitter sites at Wythe St., Petersburg, Va. Amended: Antenna changes and give transmitter site as Colonial Heights, Va., and studio site at corner Sycamore and Tabb Sts., Petersburg, Va.

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1250 Kilocycles

WKST—Keystone Broadcasting Co., New Castle, Pa.—Construction permit to install new transmitter, increase power from 250 watts to 1 KW.

1310 Kilocycles

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Construction permit to move transmitter 50 feet from Lower Hogback, Jerome, Ariz., to Main Road, Jerome, Ariz., and studio from 711 Main St., Jerome, Ariz., to Main Road (across from High School), Jerome, Ariz.

WEBR—WEBR, Inc., Buffalo, N. Y.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1380 Kilocycles

WING—WSMK, Inc., Dayton, Ohio.—Modification of C. P., B2-P-1575, as modified, for new transmitter, increase in power, change in hours of operation, install directional antenna for night use, and move transmitter, further requesting extension of completion date from 7-1-39 to 8-1-39.

1400 Kilocycles

KLO—Interstate Broadcasting Corp., Ogden, Utah.—License to cover C. P. (B5-P-489) as modified for equipment changes, installation of directional antenna for day and night use, increase power, and move of transmitter to new site.

1500 Kilocycles

WTMC—John T. Alsop, Jr., Ocala, Fla.—License to cover C. P. (B3-P-2148) for a new station.

MISCELLANEOUS

XXXX—Columbia Broadcasting System, Inc., New York, N. Y.—Extension of authority to transmit programs to CFRB and CKAC and other stations under the control of the Canadian Broadcasting Corporation.

XXXX—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs originating in NBC's studio at 30 Rockefeller Plaza, New York City, or any points in U. S. where network programs may originate, to station CMX, Havana, Cuba.

W7XCY—Oregonian Publishing Co., Portland, Ore.—License to cover C. P. (B5-PRE-257) for equipment changes, increase in power, and new frequencies, in accordance with new rules.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

C. R. Anthony Company, Oklahoma City, Okla., operator of 57 retail department stores in Oklahoma, Kansas, Texas and New Mexico, is charged with violation of the Robinson-Patman Act through illegal acceptance of brokerage fees in a complaint.

Other respondents are Burrell-Berger, Inc., Miss Plaza, Inc., Samuel R. Parnes, Inc., and Gorgeous Frocks, Inc., all of New York, described in the complaint as the "sellers."

It is alleged that C. R. Anthony Company, under the name of The Anco Company, maintains an office at 1450 Broadway, New York, and that its employees attached to that office, working on a salary basis, purchase for and in the name of C. R. Anthony Company the requirements of its retail department stores, consisting of women's apparel and other merchandise, from various New York sellers including the four named in the Commission's complaint.

The complaint alleges that the seller respondents and other sellers pay and deliver to C. R. Anthony Company, under the name of The Anco Company, so-called brokerage fees and commissions which amount to an agreed percentage on quoted sales prices, and that C. R. Anthony Company, the sole party with an interest in and the actual purchaser in the transactions, without performing any services for or on behalf of the sellers, accepts the payments in violation of the brokerage section of the Robinson-Patman Act. (3834)

Burrell-Berger, Inc.—See C. R. Anthony Company.

Economy Men's Hat Company, Inc.—Misleading representations in the sale of hats made from old materials is alleged in complaints issued against two New York companies. The respondents are Economy Men's Hat Company, Inc., and Rosalind Nissenbaum, Lena Nissenbaum and Samuel Gilman, individually and as officials of the company, 5 Elizabeth St. and Morben Hat Works, Inc., and Morris S. Altman, individually and as an officer, 162 Green St.

Purchasing old, worn and used felt hats, the respondents in both cases are alleged to renovate them and in some instances to provide new trimmings, sweatbands and size labels so that they appear as new hats made from felts which have never been worn, and to sell them to dealers without any marks to inform the public that they are in fact made from old and previously used felt hat bodies and renovated to look like new. (3837-3838)

Gorgeous Frocks, Inc.—See C. R. Anthony Company.

Industrial Plants Corporation, 90 West Broadway, New York, is charged in a complaint with misrepresentation in the sale and distribution of pliers and wrenches. The respondent is alleged to represent that its pliers and wrenches are nickel plated, when this is not a fact. The complaint alleges that such misleading representations result in unfairly diverting trade to the respondent from its competitors. (3835)

Morben Hat Works, Inc.—See Economy Men's Hat Company, Inc.

Samuel R. Parnes, Inc.—See C. R. Anthony Company.

Miss Plaza, Inc.—See C. R. Anthony Company.

Prudential Sales Corp.—False advertising and use of lottery plans in selling merchandise to ultimate consumers is alleged in a complaint issued against Prudential Sales Corporation, 230 East Ohio St., Chicago.

Advertising matter on the face of lottery push cards distributed by the respondent, including use of the word "Packard" and a picture of an electric dry shaver, is alleged to deceive buyers into believing that the pictured shaver is a "Packard Lectro Shaver," when in fact the respondent's electric dry shavers are not Packard Lectro Shavers.

Use of the word "Elkskein" in advertising sports jackets allegedly deceives buyers into believing that the respondent's garments are made of the skin of an elk when in fact this is not so and their value is but a fraction of that of jackets made from genuine elkskin.

Blankets allegedly are advertised in a manner misleading the public into believing that they are composed entirely of wool.

The respondent is alleged to represent that gifts, prizes or premiums are given free to agents when in fact the so-called gifts are not free but are regular compensation for selling the respondent's merchandise and their cost is included in the cost of other articles sold for the respondent by agents. (3839)

Wahl Company—Misleading representations in the sale of fountain pens is alleged in a complaint issued against The Wahl Company, 1800 Roscoe St., Chicago.

The respondent is alleged to represent directly or by implication that ink cannot leak from its Eversharp fountain pen equipped with a so-called "Safety Ink Shut-Off" device, when the pen is uncapped and the pen point exposed; that ink cannot leak from the pen into the cap when it is screwed tightly over the pen point, and that this pen possesses more than twice as much ink capacity as competing fountain pens.

The complaint alleges that in fact ink can leak from respondent's fountain pens under the conditions mentioned; that the so-called safety device does not prevent ink which is in the feed mechanism immediately prior to attachment of the cap, from leaking into the cap after it is screwed tightly over the pen point, and that such ink does leak into the cap when the pen is shaken or jostled. The complaint also alleges that the ink capacity of Eversharp pens is substantially less than the amount claimed. (3836)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Bobs Candy & Pecan Company—Lottery methods in the sale of merchandise to ultimate purchasers is prohibited under orders issued against an Albany, Ga., and a Chicago dealer.

Bobs Candy & Pecan Company, Albany, Ga., the Commission finds, sold to dealers certain assortments of candy and nut confections so packed and assembled as to involve a lottery scheme when so sold and distributed to consumers.

Morris L. Rauer, individually, and formerly trading as Earl Chrome Manufacturing Company, now in business under the name Earl Chrome Company, 2757 Lincoln Ave., Chicago, is found to have supplied Wisconsin, Indiana and Iowa merchants with punch-boards as a means of selling the respondent's radios, clocks, cocktail shakers, coffee sets and novelty merchandise. It is further found that the respondent, by use of the trade name Earl Chrome Manufacturing Company, represented himself to be the manufacturer of the products he sold, when in fact he did not own or control a factory. (3580-3426)

Earl Chrome Manufacturing Company—See Bobs Candy & Pecan Company.

King Candy Company, Fort Worth, Tex., has been ordered to cease and desist from lottery methods in the sale and distribution of candy to ultimate consumers.

The respondent was found to have been selling to dealers certain assortments of candy for distribution to consumers by use of push-cards and punch-boards.

The order directs that the respondent cease and desist from supplying or selling lottery devices to others, to enable such persons to sell or distribute merchandise, and from selling or disposing of merchandise by the use of such devices. (3437)

STIPULATIONS

The Commission has entered into the following stipulations:

C-E-Z-R Company—Anna Greenberg and Belle Greenberg, copartners trading as C-E-Z-R Company, Omaha, Nebr., have entered into a stipulation to discontinue misrepresentations in the sale of an eye wash preparation. The respondents agree to desist from representing directly or by implication that "C-E-Z-R Eye Drops" are a competent treatment in the relief of tired or fatigued eyes, or are unique in the manner in which they act to cleanse the eyes. They admit that eye fatigue results primarily from overuse of the extrinsic and intrinsic muscles of the eyes and cannot be competently relieved by medication, but only by periods of rest. (02391)

Deimel Linen-Mesh System Company, 376 Post St., San Francisco, has entered into a stipulation to discontinue misrepresentations in the sale of underwear.

The respondent agrees to desist from the use of the trade name or trade mark "Dr. Deimel Linen-Mesh Underwear" to designate garments not entirely made of linen, or from the use of the words "linen" or "linen-mesh" in any way to designate such garments unless the other fibers present are at the same time identified and with equal conspicuousness.

The respondent further agrees to cease representing directly or by implication that Dr. Deimel Linen-Mesh Underwear is the one or only underwear that gives "temperature control," that quickly absorbs perspiration and allows it to evaporate or that has been recommended by leading physicians for 40 years.

Other representations to be discontinued are that the respondent's product will eliminate the possibility of colds or of catarrh or of bronchitis when substituted for woolen undergarments, or works constantly to prevent skin rashes and eczema, and that a change to this type of underwear greatly lessens the danger of pneumonia. (02390)

Siticide Company—In a stipulation accepted and supplemental to one entered into June 23, 1936, the Siticide Company, Commerce, Ga., agrees to discontinue misleading representations in the sale of its product "Siticide", a treatment for scabies.

The respondent will cease representing directly or by implication that a single application of Siticide will cure the itch caused by scabies parasites; that Siticide penetrates the skin, or that the itching sensation accompanying scabies disappears immediately upon, or without the lapse of an appreciable length of time following, the application of Siticide to the skin. (01427)

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice its case against International Association of Ice Cream Manufacturers, Washington, D. C., its officers and member companies, who were charged with activities tending to restrain trade in the sale of ice cream in interstate commerce and to discourage the operation and use of counter ice cream freezers.

Respondent association members named in the complaint as being representative of the 500 ice cream manufacturer and distributor members were National Dairy Products Corporation, New York, The Borden Company, New York, Golden State Company, Ltd., San Francisco, Midwest Dairy Products Corporation, DuQuoin, Ill., French-Bauer, Inc., Cincinnati, and Southwest Utility Dairy Products Company, Oklahoma City, Okla. Respondent association officers at the time the complaint was issued were: G. G. Kindervater, president; W. R. Cammack, vice president; Madison H. Lewis, treasurer, and Robert C. Hibben, executive secretary.

The closing order points out that subsequent to issuance of the complaint the entire files of the proceeding were, at the request of the Attorney General, transmitted to the Department of Justice and that criminal indictments were brought by that Department against the respondents in Chicago, the cases being known as the Government against The Borden Company, and others, and against National Dairy Products Corporation and others.

The Commission closed its case without prejudice to its right to reopen it should future facts so warrant.

NAB Reports
The National Association of Broadcasters

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 28, July 15, 1939

Convention Takes Copyright, Code Action

Strong affirmative action on the two outstanding problems before the broadcasting industry today—copyright and program standards—marked the three day convention of the National Association of Broadcasters which adjourned Thursday at noon.

The convention unanimously adopted a resolution directing the Copyright Committee to fix an early deadline for the conclusion of the principle terms of a new deal with ASCAP and to call a special convention not later than September 15, if the Committee decides no good purpose would be served by postponement of the deadline.

By an overwhelming majority the convention adopted a Code of Program Standards and then unanimously supplemented it with a definition of "Accepted Standards of Good Taste" to assist in the Code's interpretation. The new Board was directed to fix the effective date and set up compliance machinery. The Board announced it would announce its plan at its September meeting.

Following are the texts of the copyright resolution, the Code and the Program Standards resolution:

Copyright

Whereas the existing contracts between broadcasters and ASCAP expire December 31, 1940, and whereas ASCAP is now the principal source through which music is made available to American broadcasters, and whereas broadcasters are willing to pay a fair and reasonable price for ASCAP music and thereby encourage composers, authors and publishers to continue to produce the best possible music, and whereas further the broadcasters believe that any fair and reasonable price must be predicated upon paying for the music used, therefore,

Resolved that

1. The present copyright committee is continued as a special copyright committee with the powers and duties herein stated.

2. The copyright committee is authorized and directed through a negotiation committee to conclude with ASCAP a form of contract to be recommended to the entire industry for a term of years, on a basis acceptable to the industry.

3. The copyright committee is authorized to fix a deadline for conclusion of the principal terms of such a deal.

4. The copyright committee, if in its judgment no good purpose is served by postponement of its dead-line, is authorized to prepare such measures as are necessary and expedient to enable the industry to provide sufficient music for its requirements without ASCAP on the expiration of the existing ASCAP contracts December 31, 1940.

5. The copyright committee is authorized in such event to call a special convention of the industry not later than September 15 to vote the funds necessary for success of such measures.

The Code

Recognizing the importance of radio broadcasting in the national life and believing that broadcasters have sufficient experience with the social side of the industry to formulate basic standards for the guidance of all, the National Association of Broadcasters hereby formulates and publishes the following revised Code:

CHILDREN'S PROGRAMS

Programs designed specifically for children reach impressionable minds and influence social attitudes, aptitudes and approaches and, therefore, they require the closest supervision of broadcasters in the selection and control of material, characterization and plot.

This does not mean that the vigor and vitality common to a child's imagination and love of adventure should be removed. It does mean that programs should be based upon sound social concepts and presented with a superior degree of craftmanship; that these programs should reflect respect for parents, adult authority, law and order, clean living, high morals, fair play and honorable behavior. Such programs must not contain sequences involving horror or torture or use of the supernatural or superstitious or any other material which might reasonably be regarded as likely to over-stimulate the child listener, or be prejudicial to sound character development. No advertising appeal which would encourage activities of a dangerous social nature will be permitted.

To establish acceptable and improving standards for children's programs, the National Association of Broadcasters will continuously engage in studies and consultations with parent and child study groups. The results of these studies will be made available for application to all children's programs.

CONTROVERSIAL PUBLIC ISSUES

As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

Time for the presentation of controversial issues shall not be sold, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussion and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discussion on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topic to be discussed would be surrendered. Third, and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it.

The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.

Nothing in the prohibition against selling time for the presentation of controversial public issues shall be interpreted as barring sponsorship of the public forum type of program when such a program is regularly presented as a series of fair-sided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network.

EDUCATIONAL BROADCASTING

While all radio programs possess some educative values, broadcasters nevertheless desire to be of assistance in helping toward more specific educational efforts, and will continue to use their time and facilities to that end and in cooperation with appropriate groups, will continue their search for improving applications of radio as an educational adjunct.

NEWS

News shall be presented with fairness and accuracy and the broadcasting station or network shall satisfy itself that the arrangements made for obtaining news insure this result. Since the number of broadcasting channels is limited, news broadcasts shall not be editorial. This

means that news shall not be selected for the purpose of furthering or hindering either side of any controversial public issue nor shall it be colored by the opinions or desires of the station or network management, the editor or others engaged in its preparation or the person actually delivering it over the air, or, in the case of sponsored news broadcasts, the advertiser.

The fundamental purpose of news dissemination in a democracy is to enable people to know what is happening and to understand the meaning of events so that they may form their own conclusions and, therefore, nothing in the foregoing shall be understood as preventing news broadcasters from analyzing and elucidating news so long as such analysis and elucidation are free of bias.

News commentations as well as all other newscasters shall be governed by these provisions.

RELIGIOUS BROADCASTS

Radio, which reaches men of all creeds and races simultaneously, may not be used to convey attacks upon another's race or religion. Rather it should be the purpose of the religious broadcast to promote the spiritual harmony and understanding of mankind and to administer broadly to the varied religious needs of the community.

Commercial Programs
and
Length of Commercial Copy

Acceptance of programs and announcements shall be limited to products and services offered by individuals and firms engaged in legitimate commerce; whose products, services, radio advertising, testimonials and other statements comply with pertinent legal requirements, fair trade practices and accepted standards of good taste.

Brief handling of commercial copy is recommended procedure at all times.

Member stations shall hold the length of commercial copy, including that devoted to contests and offers, to the following number of minutes and seconds:

Daytime

Fifteen-minute programs—3:15
Thirty-minute programs —4:30
Sixty-minute programs —9:00

Nighttime

Fifteen-minute programs—2:30
Thirty-minute programs —3:00
Sixty-minute programs —6:00

Exceptions:

The above limitations do not apply to participation programs, announcement programs, "musical clocks," shoppers' guides and local programs falling within these general classifications.

Because of the varying economic and social conditions throughout the United States, members of the NAB shall have the right to present to the NAB for special ruling local situations which in the opinion of the member may justify exceptions to the above prescribed limitations.

PROGRAM STANDARDS

To clarify the phrase "Accepted Standards of Good Taste" and the canons of good practice set forth in the NAB Code, therefore be it Resolved:

That member stations shall not accept for advertising:

1. Any spirituous or "hard" liquor.
2. Any remedy or other product the sale of which or the method of sale of which constitutes a violation of law.
3. Any fortune-telling, mind-reading, or character-reading, by handwriting, numerology, palm-reading, or astrology, or advertising related thereto.
4. Schools that offer questionable or untrue promises of employment as inducements for enrollment.
5. Matrimonial agencies.
6. Offers of "homework" except by firms of unquestioned responsibility.
7. Any "dopester," tip-sheet or race track publications.
8. All forms of speculative finance. Before member stations may accept any financial advertising, it shall be fully ascertained that such advertising and such advertised services comply with all pertinent federal, state and local laws.
9. Cures and products claiming to cure.
10. Advertising statements or claims member stations know to be false, deceptive or grossly exaggerated.
11. Continuity which describes, repellently, any functions or symptomatic results of disturbances, or relief granted such disturbances through use of any product.
12. Unfair attacks upon competitors, competing products, or upon other industries, professions or institutions.
13. Misleading statements of price or value, or misleading comparisons of price or value.

Resolutions Adopted

One

Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby thanks Mr. Stephen Early, secretary to the President of the United States, for his attendance, his constructive message and the good will and understanding of the problems in broadcasting as evidenced by the opinions and suggestions contained in his address.

Two

Resolved, that the Seventeenth Annual Convention of the National Association of Broadcasters hereby extends its hearty thanks to Carl E. Milliken, secretary of the Motion Picture Producers and Distributors of America, Inc., for his interest in our problems and his kindness in being willing to share with us the experiences of his organization in meeting similar problems in the past.

Three

Resolved, that the Seventeenth Annual Convention of the National Association of Broadcasters hereby thanks Mr. Elmer F. Andrews, administrator of the Wage and Hour Division of the United States Department of Labor, for his valuable suggestions and interpretation of the Fair Labor Standards Act. And that the Association hereby pledges its wholehearted support of Mr. Andrews and his organization in carrying out the intent of the law.

Four

Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby extends its appreciation to Dr. John W. Studebaker, United States Commissioner of Education, and to Dr. Leonard Power, Research Coordinator of the Federal Radio Education Committee, for their help and suggestions in enabling the broadcasting industry to more completely live up to its obligations in promoting the proper use of radio facilities by the educational operators of the country.

Five

Resolved, by the Seventeenth Annual Convention of the National Association of Broadcasters, that our thanks are extended to Mr. Orrin E. Dunlap, Jr., Radio Editor of the New York *Times,* for his message on television and facsimile.

Six

Resolved, by the Seventeenth Annual Convention of the National Association of Broadcasters, that our thanks are extended to Joseph Marty, executive secretary of the Radio Servicemen of America, for his interesting discussion of the subject, "The Missing Link in Broadcasting."

Seven

Resolved, that the National Association of Broadcasters hereby extends its appreciation to Edwin M. Spence and his co-workers for their usual efficient convention arrangements.

Eight

Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby heartily thanks the Columbia Broadcasting System, the Mutual Broadcasting System, and the National Broadcasting Company for their contributions in helping the National Association of Broadcasters in connection with the fine entertainment at the banquet. And particularly commends them for their thoughtfulness in providing entertainment other than that with which we are so familiar in our regular business.

Nine

Resolved, that the National Association of Broadcasters hereby extends its hearty thanks to William S. Hamilton, manager, Harold E. Baggs, assistant manager, and the staff of the Ambassador Hotel, and the Atlantic City Convention and Publicity Bureau, for their fine service in contributing to the success of the Seventeenth Annual Convention of the Association.

Ten

(*From the Independent Radio Broadcasters*)

WHEREAS, the Radio Manufacturers Association, comprising the larger manufacturers of radio receiving sets, has established and promoted the manufacture and sale of the push button type of receiving set, and

WHEREAS, the continued sale and distribution of the push button set (comprising for the most part only four buttons) will, in five years at the present rate of replacement, seriously reduce the possible listening audience of the independent stations, thereby causing inestimable damage to the independent broadcasters through the loss of advertising revenue, and

WHEREAS, the independent broadcasters feel that a continuance of this policy on the part of RMA constitutes an unfair trade practice and a monopolistic condition in the broadcast industry,

Be It, Therefore, Resolved, that the independent broadcasters urgently request that the NAB immediately attempt to arrive at a satisfactory solution to this problem with the RMA, and that failing to arrive at some satisfactory solution that the NAB bring the matter to the attention of the proper governmental agencies to the end that relief from this untenable situation be provided for the independent broadcasters.

Eleven

Be It Resolved, by the National Association of Broadcasters, in Seventeenth Annual Convention assembled, that our hearty thanks and appreciation are hereby extended to President Neville Miller and his very efficient staff for their loyalty, cooperation and wholehearted support during the year just concluded.

WHEREAS, on May 23, 1939, the Federal Communications Commission promulgated new rules and regulations for the operation of international broadcast stations. These regulations included new and unprecedented restrictions and requirements as to program content and were issued without prior public hearing. On June 3, 1939, Neville Miller, President of the National Association of Broadcasters, addressed a letter to the Honorable Frank R. McNinch, Chairman of the Federal Communications Commission, discussing certain objections of principle to these regulations and suggesting that the Commission reconsider its action of May 23, 1939 and give licensees of international stations and others an opportunity at public hearing to discuss the questions involved; and

WHEREAS, as pointed out by President Miller in his letter of June 3, 1939, "If the Commission has authority to promulgate this character of regulation in the international field, it must have equal authority with respect to domestic broadcasting, as the same provisions of the law govern both classifications." It was further pointed out by President Miller that the proposed regulations will establish the precedent for "a violent transgression of the basic principles of American democracy" and that "surely no such dangerous prerogative is contemplated by the Communications Act of 1934 and is in direct conflict with Section 326 of the Act which expressly prohibits any type or character of censorship or any condition or regulation 'which shall interfere with the right of free speech by means of radio communication' "; AND

WHEREAS, subsequently, on June 15, 1939, the Federal Communications Commission, acting under a petition for the withdrawal or amendment of Rule 42.03 (a) filed on behalf of the American Civil Liberties Union, ordered a hearing to be held before a quorum of the Commission on the 12th day of July, 1939, the date for which hearing was later postponed to July 14, 1939; and

WHEREAS, President Miller, acting under authority vested in him by the Board of Directors of the National Association of Broadcasters, employed Swagar Sherley as special counsel to represent the National Association of Broadcasters at this hearing. Mr. Sherley has entered an appearance on behalf of the National Association of Broadcasters and has been instructed to participate in these proceedings; and

WHEREAS, because of the fundamental questions raised by these regulations, which appear not only to restrict the type of service that might be rendered by the licensees of international broadcast stations; and because of the more fundamental question that if such regulations are permitted to go unchallenged, there might be grave misunderstanding by the public and Congress as to the powers of the Federal Communications Commission with respect to program content, including advertising continuities; and because of the further fact that there is implied in these regulations a trend that must be resisted if broadcasting is to remain free and uncensored; and because of the further fact that there has been some suggestion or intimation as to the manner in which President Miller took the steps he did to call to the attention of the Commission the fears and misgivings of the broadcasting industry in connection with these regulations;

Now, Therefore, Be It Resolved, that the National Association of Broadcasters, assembled at their 17th annual convention, hereby affirms and believes that the statements contained in President Miller's letter of June 3, 1939, constitute a fair and accurate expression of the fundamental issues involved and commends President Miller for his prompt and vigilant action in calling to the attention of the Commission and the public the fact that the regulations governing international broadcasting stations, as drafted, contained elements of a genuine threat to the right of free speech by radio communication, not only in the operations of international broadcast stations, but in the domestic field as well.

Be It Further Resolved, that the National Association of Broadcasters takes cognizance of the fact that, in convening a formal hearing on these regulations, the Federal Communications Commission, on June 15, 1939, in a press release accompanying the order, stated:

> "The Commission is of the opinion that an open public hearing to discuss the merit of the new regulation is desirable, particularly in view of the fact that the application of the rules has been misunderstood in some quarters.";

and that it is the sense of this convention that, in view of the Commissioner's statement, the Commission will, following the hearing scheduled upon this regulation, through appropriate revision or modification make it clear that such regulation could not in any way be construed or interpreted by either the licensees of international broadcast stations or by the public to abridge in any manner the fundamental right of free speech by means of radio communication.

Thirteen

WHEREAS, the National Association of Broadcasters, as the organization composed of the majority of the licensees of standard broadcast stations, has from time to time urged upon the Federal Communications Commission that the normal license period of standard broadcast stations be extended beyond the six months period: and

WHEREAS, it has been the sense of broadcasters that the previous short term license policy made for uncertainty and insecurity; and

WHEREAS, as early as 1934, the Honorable Thad H. Brown, member of the Communications Commission, proposed an amendment to the section of the regulations limiting the license period to six months, and proposed to extend it to a period of one year; and

WHEREAS, the industry has long believed that it was unnecessary to limit the license to a period of six months, particularly when Congress had authorized a maximum period of three years; and

WHEREAS, on June 22, 1939, the Communications Commission announced that it had increased the normal license period for standard broadcast stations from six months to one year by amending the appropriate section of the rules and regulations governing standard broadcast stations, which amendments affect all of the 735 standard broadcast stations now operating in the United States and territorial possessions.

Therefore, Be It Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby expresses to the Communications Commission its commendation of the action extending the license period to one year; and further, it is the belief of broadcasters that this will contribute to the stability of the industry and thus enhance the opportunity for increasingly better public service.

Be It Further Resolved, that the National Association of Broadcasters continue its efforts to obtain thhe maximum length of licenses as authorized by the Congress; and

Be It Further Resolved, that copies of this resolution be sent by the Secretary of the Association, to the Chairman of the Federal Communications Commission, and to each of its members, as an expression of appreciation of the confidence which the extension of the license period evidences.

Fourteen

Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby heartily thanks Grover Whalen, president, and John S. Young, Director of Radio and Television, of the New York World's Fair, for the invitation extended to the broadcasters to attend the Fair as their guests.

Fifteen

Resolved, that the official acts of the duly qualified officers of the National Association of Broadcasters, performed since the last annual convention, be and the same are hereby approved.

Sixteen

Resolved, that the National Association of Broadcasters, in Seventeenth Annual Convention assembled, hereby extends its most hearty thanks to Will Hays, president of the Motion Picture Producers and Distributors of America, Inc., and to James G. Stahlman, past president of the American Newspaper Publishers Association, for their most valuable contributions to the principles of free speech and the preservation of that most important factor contributing to our democratic form of government as expressed in the international broadcast entitled, "The Mirrors of America," at 10.30 p.m., July 12, 1939.

Early's Speech

I come here today not in the role of White House "spokesman" for that mythical creature of evasion was interred on the fourth day of March, 1933, and, insofar as I can predict, he will never be resurrected; certainly *not* by the incumbent President. Any views which I express to you, therefore, reflect solely my personal beliefs, based upon experience as a newspaperman and upon observations made during the past six years of official life.

When I accepted your invitation to appear before this convention, I emphasized to your President, Mr. Miller, that none could presume to speak for the President of the United States. I wish now to reiterate that as a preface to my remarks to you.

Usually when a government official appears before the trade association of an industry his remarks include:

1. A solemn plea for cooperation to attain some general and usually undefined objectives; or
2. A stern admonition to reform certain of its practices under the penalty of a paternal spanking; or
3. A soothing reassurance that the government has no immediate intention of taking over their business, leaving its operators to the mercies of a dictator with designs against the capitalistic system, or
4. A pious affirmation of faith in the profit system.

I prefer to avoid such banalities although, like a famous Vermonter, I, too, could assure you that I am "agin sin."

Broadcasting, it seems to me, mostly craves reassurance. That I *can* bring you. I have no knowledge of any Marxist plot for government to "take over" and operate radio stations. Nor am I informed concerning any subversive movement to put the government in the retail hardware business. If such reassurance will serve to alleviate the jitters, I am glad to pass it along.

When the time comes that this government dictates what its people shall hear; what they shall read or see, then freedom ends and democracy is no more.

Perhaps most of you are familiar with the recent utterance of the President concerning freedom of radio. Speaking in a transcribed interview conducted by Lowell Mellett, Executive Director of the National Emergency Council, the President said, in part:

"But now in our own time, there has come into being another great institution for the general diffusion of knowledge—the radio. Still in its infancy, it already rivals in importance the schools and the press. The government, as the people's agent, has had and has now a still different relation to radio from that toward the school and the press. It has encouraged and aided its development on the one hand, and, on the other, it has set up such controls of its operation as are necessary to prevent complete confusion on the air. In all other respects the radio is as free as the press."

What, then, is this freedom? The President in the statement just quoted spoke of the government's having a "different relation to radio from that toward the school and the press." To my mind, this relationship implies more than mere technical regulation necessitated by the physical phenomena of radio and goes somewhat beyond the statutory prohibition against broadcasting obscene, indecent language or information concerning lotteries, etc. Fortunately or unfortunately, the radio spectrum limits the number of broadcast stations and government must determine who is to operate them. This necessarily involves a duty upon the part of the government and a peculiar responsibility upon the part of broadcasters who are licensed to operate a franchise in the public interest.

Were the physical characteristics such that an *un*limited number of broadcast stations could be established, the relationship of the regulatory authority of government to the broadcast operator might be simply that of parceling out wave-lengths and enforcing recognized statutory prohibitions against false and misleading advertising that apply to all media alike. However, if predicted engineering advances materialize and the number of broadcast stations can be expanded to approach infinity, I doubt if the present operators will be particularly jubilant over the prospect of such additional competition. You might yearn then for the good old days of regulation and questionnaires. The present F. C. C. might become a synonym for peace and exclusive frequencies.

Therefore, it should be assumed that broadcasters are not hostile to a periodic scrutiny of their record to determine whether they have fulfilled their obligation to the people in performing a public service.

As I understand it, grants are made essentially to the highest bidder for public service. The licensee then assumes an obligation to render the type of service he specified in obtaining his grant. If someone thinks he can perform a better broadcasting service in your locality than you, under the law, he has a right to file application for your license, and, if he can prove his case to the satisfaction of the Commission, he can supplant you.

Consequently, I take it, your best insurance to defeat such potential antagonists is consistently to render the very best public service you can. A cumulative record of good service is an excellent insurance policy.

Extremists of the "hands-off" school may advocate that when a licensee is granted a station, the licensing authority should kiss him goodbye, wish him luck and renew his license every six months or a year as a matter of course. This would grant a perpetual franchise to each licensee and the government, as the agent of the people, would have no opportunity to determine whether a proper public service was being rendered.

I would not advocate that the licensing authority lay down in advance definite, detailed and rigid standards of public service, implemented by specific rules and prohibitions. It would be difficult, if not impossible to draft such standards free from the odium of censorship. But the elements that compose public service are not vague or mysterious. Each of you broadcasters know whether your station is doing the right kind of job and, for my part, I would be willing to leave to a jury of broadcasters any specific instance involving the right of a station to have its license renewed.

You would know the answer. Only recently, I am advised, the Communications Commission has extended the license period from six months to a year for standard broadcast stations. The requirement that a broadcast licensee make annual justification for the use of a franchise granted him by his government is in no sense *in*compatible with freedom, as we understand it, and it is *not* necessary to lay down tight regulations to prevent flagrant disregard of the fundamental decencies of broadcasting. The Commission, it seems to me, has ample authority to proceed against any licensee who persists in a course of conduct which reasonable men agree is contrary to any rational standard of public interest.

The question then arises whether, in the process of making this determination, any violence is done to the freedom of radio. Of the 700 odd radio stations, the vast majority of whom have had their licenses regularly renewed since 1927, I am told that less than *a* half dozen have had their licenses revoked for cause. Since the Communications Commission was created in 1934, the records show that only a single station has failed to obtain its renewal of license —and that for some violation of technical engineering regulations.

Yet it is said that you gentlemen live in a constant state of fear that your licenses MAY be taken from you and that, therefore, you must spend too great a part of your time and give up too great a part of your time on the air in trying to please the big, bad government. The big, bad government, standing over you with hand outstretched ready to snatch away your precious license. Of course, I know and I am certain you agree that this just isn't so.

Thus it would seem that there has been no perversion of the duty of the regulatory authority to examine periodically the station's record. What, then, is the basis for the clamor that radio's freedom may be invaded? Certainly the brief history of radio regulation affords no conclusive evidence of any threat to the fundamental American right of freedom of speech.

Nevertheless, certain myths have grown up which deserve examination. The first myth *that should be cracked* is censorship. The Communications Act of 1934—I am certain you have recently read this section—says "nothing in this Act should be understood to give the Commission the power of censorship . . . and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech." There is nothing ambiguous or equivocal about that language. Legalists may quibble over its commas and semicolons but I stick to the interpretation that it means what it says. And should this Commission or any of its successors promulgate any regulation that violates that section, broadcasters have the remedy of judicial review and, if you *can't* get in the courthouse, you can *ignore* the regulation until the Commission takes you there.

The recent outcry over the regulation relating to international broadcasting demonstrates that the people of our country would never tolerate censorship. In this instance, the Commission, as you might expect, disclaimed any attempt at censorship and I understand it now has convened a hearing to determine whether the rule should be revised. It is my personal hope that the final regulations governing this class of broadcast stations will leave no doubt that freedom of speech *is* American culture and that *no* agency of government intends to supervise or control the programs broadcast.

In my opinion, censorship of radio, the press and other media of public information, should it ever develop, would be preceded by a real upheaval in the basic structure of our government and economic system. Professional alarmists may spin learned and fanciful parallels of events here and abroad, but these United States of ours *defy comparison.*

And I reiterate: I am the last person in the world to advocate censorship of what is said by broadcasters in the United States or by newspapers in the United States. I say this not only because I am a firm believer in the constitutional provision for freedom of expression, but also because I am an equally strong believer in the common sense of the American people within our own borders. No "Columnist," "interpreter" or "broadcaster" who misinterprets, misquotes or invents news out of a clear blue sky survives long. The good sense of the American people catches on to the fact that he is a perverter rather than a purveyor of news.

In the same way the American people soon lose confidence in the type of individual who seeks to stir up prejudice—prejudice against race, against religion or against color.

Thus I can conceive of no permanent danger within our country, even though great temporary harm is often done to our national welfare by such people. The average American citizen realizes that in most cases their principal motive is to seek notoriety either for the sake of notoriety itself or because they are paid large sums of money by people who have special axes to grind.

There is a real danger—a permanent danger, however—in news stories which might originate in the United States and be directed by foreign agencies to the citizens of other nations. The people of other nations are not as familiar with our own background as we are and the most fantastic stories about what is going on within the United States are readily believed by foreigners when they hear these stories over the short wave or read them as so-called news stories in their newspapers. They get wholly erroneous ideas not only about facts in the United States, but also about public opinion in the United States. The result is that these foreigners, because of false impressions, become less friendly to us and make it more difficult for us to maintain or to make friendships with them. This affects, of necessity, what we call our American relationship to international affairs as a whole.

I do not have to cite instances or to give illustrations. I do not have to name names. You are just as aware as I am that within the past few years there have been newspaper columnists and radio commentators whose words have been hailed with glee in certain portions of the earth as proof that the United States is friendly to certain principles of international conduct, which, as a matter of fact, the overwhelming majority of Americans dislike and abhor.

To say that false news of this kind emanating from the United States does harm not only to us but to civilization as a whole is putting it mildly. But that does not mean that the time has come for Government censorship over such false news.

It is obvious that those who operate international broadcast stations have a very definite public duty to keep their programs free from false news. Definitely this is their duty—and definitely the Government is watching and will continue to watch with great interest to see whether those in control of these stations continue to observe this public obligation. International broadcasting is but a single aspect of this problem. It is my information that international broadcasting by American stations, largely because of the accuracy of their reports, are relied upon by constantly increasing numbers of foreign listeners. While it is a sad commentary on our civilization that harried citizens elsewhere under the penalty of incarceration or worse must obtain accurate news from without their borders, you international licensees are performing a genuine service for them. Free men everywhere, I hope, will continue to crave truth even if they must bootleg it.

Although I am not familiar with them in detail, I know that the networks and many independent stations have developed enlightened policies dealing with religion, political discussions and commercial continuities. One specific policy which impresses me with radio's own recognition of its stewardship is that which prohibits the sale of time for propaganda purposes. To permit the individual or group with the greatest financial resources to utilize radio to peddle their own particular brand of social or economic philosophy would be a grave mistake for radio. Among other things, it would deny equality to groups with lesser resources.

In dealing with radio, the White House in 1933 adopted and has maintained a policy of equal treatment of networks and stations. When the President speaks, the microphones of any responsible broadcasting organization may seek and obtain their place on his desk. Certain restraints have, as a matter of necessity, been imposed in the relationships of radio to the White House. For example, we have insisted that radio announcers in dramatized news broadcasts or otherwise refrain from imitation of the President's voice, unless specifically authorized with a direct quotation and appropriate explanation that it was not the President speaking. It had been our experience that such imitations resulted in deception and after such a broadcast the White House mail was heavily loaded with inquiries of bewilderment.

The myth of censorship and the fallacy that broadcasters goose-step to official pressure seem to a sideline observer to be the twin bogey-man of radio. In my opinion freedom from official censorship, freedom from domination by any administration or political party rests with the radio itself. So long as its operations reflect the "doctrine of fair play" as expressed by the provision of the statute governing political broadcasts, so long as programs are interesting, informative and clean—in brief so long as radio serves democracy, it will remain free.

I belong to what may be the old-fashioned school in that I believe a reporter should stick to the facts with appropriate elucidation to make the news understandable and let his reader or listener reach his own conclusions. And I like that portion of your proposed code which says:

"If a broadcaster devotes a reasonable amount of time to fair and two-sided discussion of controversial public issues, using representative speakers to give differing points of view, he is providing debate and the expression of opinion on controversial issues in a far more effective way than it can possibly be provided by one or even a handful of commentators, regularly expressing personal points of view on every conceivable subject."

Let me speak in conclusion of my own amazement of the growth and development of this industry. It is an old story to you but fascinating to those not engaged in broadcasting to contemplate the fact that in 15 years more than 81 per cent of our families have acquired radio sets. That broadcasting must have done a good job is further evidenced by the fact that these sets are in use almost five hours a day. Through the medium of network systems more than 90 per cent of our population can listen to the voice of their President or his critics, hear the greatest in music and the drama; and the world is brought to our door. Contrasted with what has been done in other countries, we are convinced that the pattern adopted in America not only is the most consistent with our democratic traditions but affords the greatest opportunity for the development of a superior service.

No one can predict when radio will become of age because the miracles of science apparently have no boundaries. Of this much I am certain—radio in the hands of private enterprise has done amazingly well. With the government assuring free competition in the service to our people, with that sense of public responsibility your codification efforts imply, with that awareness to needs of scientific research you have manifested, there is every reason for you to receive the continued and enthusiastic support of the public—that ultimate tribunal of success.

Congratulations!

Adoption of the new code was received favorably by both press and public. The clause outlawing controversial questions from paid time, for elimination of any attack upon race or religion, met with the widest public support. The women's organizations of the country were enthusiastic about the children's platform and sent in to the convention wires of commendation. Several of these are published below.

NEVILLE MILLER
HOTEL AMBASSADOR
ATLANTIC CITY, NEW JERSEY

Heartiest congratulations to you and the National Association of Broadcasters upon new code for children's programs. Stop. I have every confidence that only great good will result for our children, their parents and the future of our democracy.

DOROTHY GORDON
Sunapee, New Hampshire

NEVILLE MILLER
HOTEL AMBASSADOR
ATLANTIC CITY, NEW JERSEY

All of us interested in the best development of radio in the world today are delighted with the proposed code of the National Association of Broadcasters. We congratulate you on your masterly formulation and wish you all success in your efforts.

SIDONIE MITSNER GRUENBERG, *Director,*
Child Study Association and Chairman,
Parent Education, Committee of National
Advisory Council on Radio in Education.

* * * *

NEVILLE MILLER
HOTEL AMBASSADOR
ATLANTIC CITY, NEW JERSEY

Congratulations on code adoption. We represent hundreds of thousands of parents and children who will benefit and be grateful.

DOROTHY L. MCFADDEN,
Junior Programs, Inc.,
New York City.

* * * *

NEVILLE MILLER
HOTEL AMBASSADOR
ATLANTIC CITY, NEW JERSEY

Warmest congratulations on code for children's programs. Altogether admirable.

MARY GOULD DAVIS,
New York City.

* * * *

NEVILLE MILLER,
HOTEL AMBASSADOR,
ATLANTIC CITY, NEW JERSEY

Congratulations to you and your board upon the splendid success of your conference and the establishment of the code system. As National Radio Chairman of the National Society New England Women, Radio Committee member of the National Federation of Press Women and member of the Women's National Radio Committee, I express my deep appreciation of your cooperation.

DOROTHY M. LEWIS,
Laconia, New Hampshire.

Neville Miller,
Hotel Ambassador,
Atlantic City, New Jersey

Delighted to read of convention's approval of code for broadcasting ethics. This is a forward step in radio and reflects much credit on the National Association of Broadcasters.

Mrs. William Corwith, *National Radio Chairman, American Legion Auxiliary.*

* * * *

Neville Miller,
Hotel Ambassador,
Atlantic City, New Jersey

Congratulations on passage of revised code a tremendous stride was taken to keep radio within the framework of our free enterprise system and yet serve the public interests. On behalf of the general Federation of Women Clubs who have worked consistently for better children radio programs. I want to thank you in particular. Democracy and decency go forward again. Congratulations.

Lucy R. Milligan, *Chairman of Radio.*

STUDEBAKER PRAISES BROADCASTING FOR NEW PROGRAM STANDARDS

In an address, "What the Federal Radio Education Committee Means to the American System of Broadcasting," Dr. John W. Studebaker, U. S. Commissioner of Education, congratulated the broadcasters on the adoption of a code and praised the improving relationships between radio and education generally. He stated that we had much in common; that the purpose of education in a democracy was to preserve the "right to learn"; and that radio as perhaps the most formidable channel for the distribution of information and knowledge was making substantial contributions to the American way of life and was insuring the American public of the "right to learn."

Dr. Studebaker pointed out the purposes of the Federal Radio Education Committee and explained the contributions it would make to both education and radio in uncovering valuable information for the benefit of both groups.

Dr. Leonard Power, research coordinator of the FREC, detailed the research project being carried on at Princeton University and Ohio State, which is being financed by a joint fund contributed by two educational foundations and the broadcast industry through the NAB.

MOVIE CODE ADMINISTRATOR ADDRESSES CONVENTION

Carl E. Milliken, secretary of the Motion Picture Producers and Distributors of America, Inc., described the operation of the movie code at a convention luncheon on Tuesday. He urged the broadcasters to profit by the experience of the movies by setting their program standards just a little higher than the public demanded. In this way, he said, the industry could not only reflect but develop the tastes of its listeners. He also suggested that the industry attempt to educate the listeners to accept better programs, thus doing its share to raise the nation's cultural standards. Administration of any code called for a strong personality, he said, adding that he was certain that the NAB had such in Neville Miller.

MILLER, HAYS AND STAHLMAN MAKE JOINT BROADCAST

For the first time in history, leaders of radio, movies, and press jointly gave the American people an accounting of the services of these three great "Mirrors of America," in a broadcast Wednesday night. Neville Miller spoke from Atlantic City; Will Hays spoke from Hollywood; James G. Stahlman, retired president of the American Newspaper Publishers Association, spoke from London.

All three stressed the public obligations of their medium. All three asserted that only freedom could insure the fulfillment of these obligations to the best interest of the people.

Television

The NAB invited Orrin E. Dunlap, Jr., veteran radio editor of the New York *Times,* to tell the convention what had happened in the field of television and how he thought it would develop in the immediate future.

Because of illness, Mr. Dunlap was unable to attend the convention but sent the following statement which was read to the delegates.

Television is making progress in New York, but slowly. It is like the baby who has taken a few steps and rather chestily looks westward as if it might be no trick to walk right across the map to San Francisco. But the parents know that when the youngster goes to California he'll probably fly, not hike. So with television today. It is toddling around New York. It can't walk to the Pacific. It must fly. But it cannot fly until there is a wire or a national radio relay system on which to travel.

Those in telecasting today are asking when the others are coming in to help them carry the load. The pioneer already feels the burden. He's afraid that he will not be appreciated until years from now, when monuments or plaques may be erected. Pioneering is often a thankless task. Trail blazers meet the obstacles and opposition. So it is with the telecaster. His road through the air is no easier than that of the covered wagon, the iron horse or the clipper planes. Nevertheless, pioneering made their achievements possible. A dozen years separated Lindbergh's flight to Paris and the transatlantic Dixie Clipper's passenger carrying schedule that puts America and Europe a day and a night apart. Progress in television may seem slow, but each day finds the images dancing nearer to the homes.

From the broadcaster's standpoint there is a vital question to be answered before he can hope to get revenue from telecasting. Who will pay for the programs? It may be from three to five years before that answer is available. Because of tradition in broadcasting, the quick answer is sponsors. But can they afford it? And will the public tolerate advertising on television? The eye in its likes and dislikes differs from the ear. The eye can "tune out" even the most subtle visual advertising on the screen by a turn of the head or a drop of the eyelid. The ear has no such guards.

The toughest row to hoe in television is to get the first 100,000 sets in homes. Then many of the present riddles will be answered; public reaction will be known.

Television has been called a $13,000,000 "If." The question is how to sever the "If" and let the 13 million grow.

First, programs must be of such calibre that the Joneses will be surprised to learn that they are missing pictures the Smiths are seeing. Before this can happen the price of television sets must be within range of the average pocketbook. Telecast stations must be on the air in cities other than New York.

The optimist in television must be fully aware of the intricate problems ahead. For one who has seen so much magic performed by radio since 1912, it is easy after seeing scenes from a Broadway play, a baseball game, and a prize fight by television to realize that it has a tremendous future—that some day it will be a great industry.

It is true that television has not made the splash in New York that some expected. They overlooked certain factors, now more apparent since programming has been in effect on a regular schedule for two months. The optimistic figure of 100,000 television sets being sold by Christmas is being whittled drastically. 10,000 would be a big surprise. Nevertheless, progress is being made.

From all indications it will be the autumn of 1941 at the earliest before television really gets up steam in the New York area. Telecasters have two years of agony ahead. In that period the showmen will learn more about their art, which incidentally, is not merely Hollywood plus broadcasting. Television is an art in itself.

Furthermore, and this is vital, before the public takes to television, prices must be reduced or present radios converted to receive telecasts without much expense. The public is greatly interested in television, but can't afford it.

Listeners who have become accustomed to plucking their entertainment from the air with an instrument costing less than $100, and in the majority of cases much less, are not likely to take to television at a cost of $500. They can listen in or go to the movies cheaper than that. Therefore, prices must be lowered, and they will be as mass production has a chance to operate. But in any case it is going to cost more to see and to hear than merely to listen by radio.

Broadcasting, of course, flamed as a national craze and became a pastime because it was simple and inexpensive. Radios could be built at home. It was a new fun. But that's a story you all know. The question now is what effect is television to have on broadcasting? There are so many angles to the subject that I shall try to stick to the text "What is to be the fate of the broadcasters and their millions invested?"

That question has been put also in regard to the stage and screen. Broadcasting will be more directly affected by television than will Hollywood or the theatre. Television is just another motion picture, but it is a broadcast picture. It's in the air on wavelengths and that's where you are. It appeals directly to your audience and therefore to hold them, eventually you must add sight to sound. Your future as broadcasters is in ultra-short waves. Just as amusement centers shift, also shopping, residential, publishing and transportation terminals, so too will broadcasting's center of entertainment shift to keep pace with progress. It will go below ten meters. In years to come the present broadcast band may be abandoned like an old theatre after the shows moved uptown to a modernistic, bright-light street glorified by a shift in the population.

The radio population, however, has nothing to fear. Broadcasters will make it as convenient as possible to take them along. Ultra-short wave converters will avert obsolescence of the existing radios. They will continue in use until gradually they are replaced by popularly priced combination tele-radios attuned to ultra-short waves.

But how can all this happen when television isn't national? It will be either through an ingenious wire network or through automatic ultra-short wave bouncer stations located fifteen or twenty miles apart. If the wires cannot do it radio will take the network problem into its own hand. It can be done.

Gradually broadcasting will move into the ultra-short wave spectrum. To be sure, for many years the regular broadcasters will begin to feed the same programs into the ultra-short wave channels to accommodate the modern audience and to fill in while there are no television shows on the air. In addition special sound programs will be offered, new acts and talent developed on the tiny waves. You as broadcasters are by no means to be supplanted; you are to be kept busier than ever running a two or three ring circus. You may have to go into the film making business to create short attractions of your own for telecasting. But remember, on the air there is a second handedness to films. Already it has been learned in New York and London that televiewers prefer live shows and surprising as it may seem a drama that runs for more than an hour is a big hit, if properly staged. But, or course, the headline television act of acts is the topicality or actuality as they call them in London; events as they happen as they call them in New York.

Television is an intimate medium; it's a parlor show and the actors who come into the family circle to perform successfully are those who have a friendly approach. Television is no glamour medium. The keynote is the same as in broadcasting—be natural.

People have heard much about television in the past ten years. Few of them have seen it. In New York, daily, more are viewing the images and I have yet to talk with an initiate who does not express amazement at what television can do. They never suspected telepictures could be so clear. They would like to have a tele-set in their homes but it is the price and the fear that tele-sets will change radically within a year or two that keeps them away. When the signs appear that those two factors, high prices and quick obsolescence, are to be removed, that will be the cue to broadcasters that their audience is beginning the mass march into the ultra-short wave field. That may be five years from now. Nevertheless, this is the time to stake the ultra-short wave claims and prepare for the exodus from 550-1600 kilocycles into the promised land. There is little static or fading there. Tonal quality is excellent, because of the wide wave path available. If you want to see yourself in the mirror of the future listen to Armstrong's staticless, ultra-short wave system. Until then you haven't heard radio perfection.

With television will come greater use for facsimile as a supplemental service. Television is a fleeting picture. Facsimile leaves a permanent record. To date it is more or less of a ticker service. It is not amusement. Therefore it has not caught with the public. Furthermore, it is rather slow and expensive. It lacks the spontaneity of broadcasting. But as new apparatus and tubes are evolved to perfect the use of ultra-short waves, facsimile will come into its own. It needs a satisfactory paper that will print by an electrical touch, not by ink. Many uses for this facsimile machine of the future can be seen, one of which is likely to be an attachment to the television set to print the program, synopsis of the shows, biographical facts about speakers and summaries of events seen and to be seen on the air.

It is not too much to expect that television sets will be equipped with a bell or whistle actuated by a master signal from the transmitter. It will call the family to the tele-room for a special event or to warn when the curtain is going up. Radio becomes more automatic. But even then it gives you more to think about. Yours is an unending business, unlimited, and there is not the slightest chance in the world of the progressive broadcaster being supplanted. But the day is not so far away when he cannot be classed as a leader if he operates only a sound theatre when just around the corner on another wavelength his competitors are offering illustrated sound. Today it may seem that television is creeping at the pace of a glacier. But by 1950 broadcasters will be deep into ultra-short waves and television. The ice age will not last forever.

Now, there is one more factor to be watched. War threats hang over Europe. Storm signals flutter around the world. The bugle call would stop television's march toward the home, but after a conflict television would emerge greatly advanced. Broadcasting was a so-called by-product of the World War. Whether history is to repeat in television is something to be considered.

ANDREWS SAYS BROADCASTING GIVES "VERY LITTLE TROUBLE"

Elmer F. Andrews, Wage and Hour Administrator, told the NAB convention that "the radio industry is giving us very little trouble."

Since the Wage and Hour Act went into effect last October 24, the Administrator has received 18,000 complaints of violation, he said, and only 12 of these were against radio—and that included radio manufacturing as well as broadcasting.

Mr. Andrews pointed out that the broadcasting business should profit from the Wage and Hour Act despite slight inconveniences in its application to broadcasting employees. By increasing the wage of low pay workers throughout the country, the Act should increase the demand for consumer goods and consequently the volume of advertising, he said.

"Undoubtedly you wish to know just how definitely the Fair Labor Standards Act affects you. Well, you are under the law. I think there is no room for argument there. You are covered by the definition written into the Act itself that 'commerce means trade, commerce, transportation, transmission, or communication among the several states or from any State to any place outside thereof.' You are certainly engaged in 'communication,' and transmission, too, I take it, so that brings you in.

"However, so far as the application of the 25-cents-an-hour minimum wage to the industry is concerned, the discussion is somewhat academic. Radio is a high wage industry. I am informed that the average wage in radio is somewhat more than $45 a week, and that certainly takes you out of the sweatshop class.

"Persons employed in a bona fide executive, administrative or professional capacity are exempt from the Wage and Hour Provisions. The Act requires the Administrator to define these terms. We have struggled with the problem and with the help and advice of both employers and employees have defined them in our regulations.

"I should like to add, however, that any person wishing a revision of any of the terms of the regulations may petition the Administrator who will either arrange for hearings or make some other provision for affording interested parties an opportunity to present their views, either in support of or in opposition to the proposed changes. In the absence of any petition for change in the regulations applicable to professionals, I assume that the radio industry has not found them too burdensome and has been able to adjust its operations to the requirements. At least I certainly hope that is the case."

After his talk, Mr. Andrews answered numerous questions about the application of the Act to broadcasting employees. All of his answers were in line with opinions and interpretations which have been sent to all members by the NAB Labor Relations Department.

REGISTRATION 655

Total registration at the Seventeenth Annual Convention was 655.

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF COMMISSION

The Federal Communications Commission has granted the application of KGDE, **Fergus Falls, Minnesota,** for renewal license and also license renewal of Experimental Relay Stations KIIV and W10XBH, Fergus Falls. Station KGDE operates on **1200 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

Application of KROY, **Sacramento, California,** to increase its operation from daytime to unlimited time has been granted by the Commission. The station operates on **1210 kilocycles,** 100 watts power.

The Commission granted the application of KSAN, **San Francisco,** for a license renewal operating on **1420 kilocycles,** 100 watts, unlimited time, and assignment of station's license to The Golden Gate Broadcasting Corporation and dismissed the application for assignment of construction permit to change transmitter site of Station KSAN and install new antenna.

Application of WKAQ, **San Juan, Porto Rico,** for renewal of license was granted by the Commission. The station operates on **1240 kilocycles,** 1000 watts, unlimited time.

The Commission has granted the application of Richland, Inc. for a construction permit for a new station at **Mansfield, Ohio,** to operate on **1370 kilocycles,** 250 watts, daytime only.

The application of the Coastal Broadcasting Company for a construction permit for a new station at **Brunswick, Georgia,** to operate on **1500 kilocycles,** 250 watts LS, 100 watts night, unlimited time has been granted by the Commission.

The Commission has granted the application of the Northwest Broadcasting Company for a construction permit to erect a new station at **Fort Dodge, Iowa,** to operate on **1370 kilocycles,** 250 watts LS, 100 watts night, with specified hours of operation.

The application for consent to transfer control of Broadcasting Station WHBB, **Selma, Alabama,** from the Selma Broadcasting Company, Inc. to Bascom Hopson has been granted by the Commission. The station operates on **1500 kilocycles,** 100 watts, unlimited time. Commissioner Thompson did not participate in this decision.

The Commission has granted the application of KRBA, **Lufkin, Texas,** to make changes in its transmitting equipment and increase its daytime power from 100 watts to 250 watts.

The application of the Pennsylvania Newspaper Company for consent to transfer the control of WWSW, **Pittsburgh,** from Walker & Downing Radio Corporation to the P. G. Publishing Company has been granted by the Commission. The station operates on **1500 kilocycles,** 100 watts, 250 watts LS, unlimited time.

The Commission granted the application of WJAC, **Johnstown, Pa.,** to change its assignment from sharing time with WFBG on **1310 kilocycles,** 100 watts night, 250 watts day, to unlimited time.

The Commission granted the application of WHMA, **Anniston, Alabama,** to operate unlimited time on frequency **1420 kilocycles,** instead of daytime only, using 100 watts power.

The application of WFBR, **Baltimore, Md.,** for a special experimental authorization for a satellite station to operate on **1270 kilocycles** with power output of from 10 to 100 watts, unlimited time, to be located at **Frederick, Md.,** and to operate synchronously with Station WFBR was denied by the Commission.

The Commission granted the application of the Greenville Broadcasting Company for the erection of a new station at **Greenville, North Carolina,** to use **1500 kilocycles,** 250 watts, daytime.

The Commission granted the application of J. Samuel Brody for the erection of a new station at **Sumter, South Carolina,** to operate on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time, and in the same decision the Commission denied the application of WIS, **Columbia, South Carolina,** for special experimental authority to operate a satellite station at Sumter, South Carolina synchronously with WIS.

PROPOSED FINDINGS OF FACT

The Federal Communications Commission announced its Proposed Findings of Fact proposing to grant the application of the Southern Oregon Broadcasting Company for the erection of a new station at **Grants Pass, Oregon,** to use **1310 kilocycles,** 100 watts, unlimited time.

The application of KAND, at **Corsicana, Texas,** to increase its power to 100 watts night on **1310 kilocycles** is proposed to be granted by the Commission in a Proposed Findings of Fact. The new station now operates 100 watts daytime only.

In a Proposed Findings of Fact the Commission proposes to deny the application of KRRV, **Sherman, Texas,** to move its transmitter locally, to install new equipment, including a directional antenna, and to operate the station on **880 kilocycles,** unlimited time, with 1000 watts. The station now operates on **1310 kilocycles,** 250 watts, daytime only.

The application of KPLT, **Paris, Texas,** to change its assignment from 250 watts daytime on **1500 kilocycles** to unlimited time on the same frequency, with 100 watts night, 250 watts day, is proposed to be granted by the Commission in a Proposed Findings of Fact.

The Commission proposes to grant in a Proposed Findings of Fact the application of WHDF, **Calumet, Michigan,** to operate full time on **1370 kilocycles** instead of specified hours and renewal of its license. The station now operates 100 watts night, 250 watts LS. In the same Findings the Commission denies without prejudice the application of the Copper Country Broadcasting Company to erect a new station at **Hancock, Michigan,** to use **1370 kilocycles,** 250 watts day, 100 watts night, with specified hours of operation. The Commission states that this Company can file its application for a construction permit on another frequency.

The Commission proposes to grant in a Proposed Findings of Fact the application of the Suffolk Broadcasting Corporation to erect a new station at **Suffolk, Virginia,** to use **1420 kilocycles,** 100 watts night, 250 watts day, unlimited time.

The application of the Spartanburg Advertising Company to erect a new station at **Spartanburg, South Carolina,** to use **1370 kilocycles,** 100 watts night, 250 watts LS, unlimited time, is proposed to be granted by the Commission in a Proposed Findings of Fact.

The Commission proposes to deny the application of the Brown County Broadcasting Company for the erection of a new station at **Brownwood, Texas,** to operate on **990 kilocycles,** 1000 watts, daytime only.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings are scheduled to be held at the Commission during the week beginning Monday, July 17.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

September 13

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Special Experimental Authorization. **1420 kc.,** 250 watts night, 1:05 to 2:15 a. m., CST.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—C. P., **1270 kc.,** 1 KW. Unlimited time (DA night). Present assignment: **1420 kc.,** 100 watts, 250 watts, LS, unlimited time.

NEW—Clyde E. Wilson & Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—C. P., **1310 kc.,** 100 watts, 250 watts, LS, unlimited time.

September 26

KNEL—G. L. Burns, Brady, Tex.—Modification of license, **1500 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1500 kc.,** 250 watts, daytime.

WSPR—Quincy A. Brackett, Lewis B. Breed, Edmund A. Laport, co-partners, d/b as Connecticut Valley Broadcasting Co., Springfield, Mass.—Mod. License, **1240 kc.,** 250 watts, 500 watts LS, unlimited time. Present assignment: **1140 kc.,** 500 watts, limited time—KVOO, WAPI.

September 27

NEW—Dr. Willard Carver, Thomas B. Williams, Byrne Ross, Lawton, Okla.—C. P., **1420 kc.,** 100 watts, 100 watts LS, unlimited time.

October 9

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., **1410 kc.,** 500 watts, 1 KW, LS, unlimited time. (Requiries facilities of WAAB.)

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal License (Main & Auxiliary), **1410 kc.,** 1 KW, 1 KW LS (Main) *500 watts, 1 KW LS (Auxiliary), unlimited time.

* Auxiliary purposes only.

October 23

WCBS—WCBS, Inc., Springfield, Ill.—C. P., **1290 kc.,** 500 watts, 1 KW LS, unlimited time. (DA-night). Present assignment: **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Yetta G. Samford, C. S. Shealy, Thomas D. Samford, Jr., J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—Tom M. Bryan, Ft. Lauderdale, Fla.—Granted C. P. for a new broadcast station, to operate on **1370 kc.,** 100 watts night, 250 watts day, unlimited time.

NEW—W. B. Dennis, Plainview, Texas.—Granted C. P. for a new broadcast station to operate on **1200 kc.,** 100 watts, daytime only.

NEW—W. G. H. Finch, New York City.—Granted license for new high frequency broadcast station to use the equipment now licensed for Development Broadcast Station W2XBF, to operate on frequency **42180 kc.,** experiment conditionally; 1 KW.

WIBC—Glenn Van Auken, Indianapolis, Ind.—Granted consent to transfer control of Indiana Broadcasting Corp. (WIBC), to H. G. Wall. (Station operates on **1050 kc.,** 1 KW, daytime only.)

WGN—WGN, Inc., Chicago, Ill.—Granted extension of special authority for transmission of facsimile signals over the regular broadcast transmitter of WGN during the experimental period between 1 and 6 a. m., CST, from August 1, 1939, to February 1, 1940.

WHO—Central Broadcasting Co., Des Moines, Ia.—Same except transmitter of WHO, and from 12 midnight to 5 a.m., CST.

WSM—The National Life and Accident Insurance Co., Nashville, Tenn.—Same except transmitter of WSM.

WLW—The Crosley Corp., Cincinnati, Ohio.—Same except transmitter WLW.

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Same except transmitter of WOR, and from 1 to 6 a. m., EST.

WPTF—WPTF Radio Company, Raleigh, N. C.—Granted extension of special experimental authority to operate with 5 KW from sunset at KPO to 11 p. m., EST, using DA after sunset, for the period August 1, 1939 to February 1, 1940.

KWOC—Don M. Didenton and A. L. McCarthy, Poplar Bluff, Mo.—Granted voluntary assignment of license from Don M. Didenton and A. L. McCarthy to A. L. McCarthy, O. A. Tedrick and J. H. Wolpers, d/b as Radio Station KWOC.

NEW—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted C. P. for new high frequency broadcast station; frequency **26300 kc.** on an experimental basis only, conditionally; 1 KW.

KANS—Charles C. Theis, Wichita, Kans.—Granted authority to transfer control of corporation (The Kansas Broadcasting Co., licensee of station KANS), from Charles C. Theis to stockholders (To Herb Hollister).

NEW—Don Lee Broadcasting System, Los Angeles, Cal.—Granted C. P. for new portable-mobile television relay station on an experimental basis, to operate on frequencies **156000-162000 kc.;** 100 watts.

WSPR—Connecticut Valley Broadcasting Company, Springfield, Mass.—Granted assignment of license to WSPR, Inc., **1140 kc.,** 500 watts night and day, limited time.

WGRM—Ben Farmer, Wilson, N. C.—Granted transfer of control of WGTM, Inc., licensee of station WGTM, to H. W. Wilson, Charlotte L. Burns and George C. McDonald.

WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—Granted voluntary assignment of license to WFBM, Inc.

WNEI—Indianapolis Power & Light Co., Portable-Mobile (Area of Marion County, Ind.).—Same for relay station.

WIPM—Indianapolis Power & Light Co., Portable-Mobile (area of Marion County, Ind.).—Same for relay station.

WILP—Indianapolis Power & Light Co., (area of Indianapolis, Ind.).—Same for relay station.

W9XXM-W9XXZ—Indianapolis Power & Light Co. (area of Indianapolis, Ind.).—Same for relay station.

WNEI—Indianapolis Power & Light Co. (Portable-Mobile, area of Marion County, Ind.).—Granted voluntary assignment of C. P. for relay broadcast station to WFBM, Inc.

NEW—WSPB, Inc., Sarasota, Fla.—Granted C. P. for new station in Sarasota, Fla., to operate on **1420 kc.,** 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WAPI—Alabama Polytechnic Institute, University of Alabama, Etc., Birmingham, Ala.—Granted renewal of license for the period August 1, 1939, to February 1, 1940.

WWL—Loyola University, New Orleans, La.—Granted extension of special experimental authority to operate unlimited time, using DA day and night, for the period August 1, 1939, to February 1, 1940.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted extension of special experimental authorization to operate on **1100 kc.,** with 10 KW power, unlimited time, employing DA for nighttime operation, for the period August 1, 1939, to February 1, 1940.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special experimental authority to operate synchronously with KFAB from local sunset at Lincoln, Nebr., to midnight, for the period August 1, 1939, to February 1, 1940.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Granted extension of special experimental authority to operate synchronously with WBBM from local sunset at Lincoln, Nebr., to midnight, for the period August 1, 1939, to February 1, 1940.

NEW—Frank R. Pidcock, Sr., Moultrie, Ga.—Granted C. P. for new station to operate on **1370 kc.,** 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites to be determined with Commission's approval.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted extension of special experimental authority to operate on frequency **710 kc.,** with 1 KW, unlimited time, for the period August 1, 1939, to February 1, 1940.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

NEW—Hazlewood, Inc., Orlando, Fla.—Application for C. P. to erect a new station to operate on **1390 kc.**, 1 KW day and night, unlimited time.

WNYC—City of New York, Municipal Broadcasting System, New York City.—Application for modification of license to increase time of operation from daytime-WCCO to S.H. 6 a. m. to 11 p. m., EST. (To be heard before the Commission.) Application designated for hearing as the request violates Rules 116 and 117, and would cause interference to existing stations.

NEW—Harold Thomas, Bridgeport, Conn.—Application for C. P. for new station to operate on **1310 kc.**, with 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WNBX—Twin State Broadcasting Corp., Springfield, Vt.—Application for C. P. to move station approximately 27 miles to Keene, N. H., install DA system for day and nighttime operation, and operate with 1 KW night and day employing DA system for both day and night. Exact studio site to be determined with Commission's approval. (Application designated for hearing to determine if interference might result.)

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Application for C. P. to make changes in equipment, install DA system for nighttime operation, and change frequency from **1350 kc.** to **630 kc.** (Application designated for hearing to determine the question of interference, and pending applications involve increase in service.)

NEW—George Penn Foster, Maxwell Kelch and Clavert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—Application for C. P. for new station to operate on **1370 kc.**, 100 watts night, 250 watts day, unlimited time.

NEW—Las Vegas Broadcasting Co., Inc., Las Vegas, Nev.—Application for new station to operate on **1420 kc.**, 100 watts night, 250 watts day, unlimited time.

NEW—Radio Voice of Springfield, Inc., Springfield, Ohio.—Application for C. P. for new station to operate on **1310 kc.**, 100 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval.

WRUF—University of Florida, Gainesville, Fla.—Application for C. P. to move transmitter and studio sites locally; make changes in equipment; install DA system; and increase power and time of operation from 5 KW, limited, to 5 KW night, 10 KW day, unlimited, DA system after sunset at Denver. (Application to be heard before the Commission, and designated for hearing because request violates Rule 116.)

KMAC—W. W. McAllister and Howard W. Davis, d/b as Walmac Co., San Antonio, Tex.—Application already in docket amended so as to request C. P. to move transmitter site from 319 Ave. A., San Antonio, to site to be determined in San Antonio, subject to Commission's approval; changes in equipment and installation of antenna system; change in frequency from **1370 kc.** to **930 kc.**, and power from 100 watts night, 250 watts day, S-KONO, to 1 KW day and night, unlimited time. (Application designated for hearing to determine question of interference, and pending applications involve increase in service.)

WINS—Hearst Radio, Inc., New York City.—Application for voluntary assignment of license from Hearst Radio, Inc., to Metropolitan Broadcasting Corp. (station operates on **1180 kc.**, 1 KW, limited time). Application designated for hearing to determine relationship between proposed owner and the owner of other stations in the New York area.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period ending February 1, 1940:

KDKA and Alternate, Pittsburgh, Pa.; KFBI, Abilene, Kans.; KFEQ, St. Joseph, Mo.; KGDM, Stockton, Cal.; KGO and auxiliary, San Francisco; KJBS, San Francisco; KJR and auxiliary, Seattle; KMMJ, Grand Island, Neb.; KNX, Los Angeles; KRLD, Dallas, Texas; KSL, Salt Lake City; KSOO, Sioux Falls, S. Dak.; KTKC, Visalia, Cal.; KVOO, Tulsa, Okla.; KWKH, Shreveport, La.; KXA, Seattle; KYQ, Philadelphia, Pa.; WABC-WBOQ, New York City; WBAL, Baltimore, Md.; WBAP, Fort Worth, Texas; WBZ, Boston, Mass.; WBZA, Boston; WCAL, Northfield, Minn.; WCBD, Chicago; WCCO, Minneapolis; WDGY, Minneapolis; WDZ, Tuscola, Ill.; WEAF and auxiliary, New York City; WEAU, Eau Claire, Wis.; WEEU, Reading, Pa.; WENR, Chicago; WEW, St. Louis, Mo.; WFAA, Dallas, Tex.; WGAN, Portland, Maine; WGN, Chicago, Ill.; WHAM and auxiliary, Rochester, N. Y.; WHB, Kansas City, Mo.; WHDH and auxiliary, Boston; WHEB, Portsmouth, N. H.; WHO, Des Moines, Ia.; WIBG, Glenside, Pa.; WINS, New York City; WJJD, Chicago; WJR and auxiliary, Detroit, Mich.; WJZ and auxiliary, New York City; WLAW, Lawrence, Mass.; WLB, Minneapolis; WLS, Chicago; WLW, Cincinnati, Ohio; WMAZ and auxiliary, Macon, Ga.; WMBI, Chicago; WNYC and auxiliary, New York City; WOAI and auxiliary, San Antonio, Texas; WOI, Ames, Iowa; WOR and auxiliary, Newark, N. J.; WOWO, Fort Wayne, Ind.; WPTF and auxiliary, Raleigh, N. C.; WSB and auxiliary, Atlanta, Ga.; WSM and auxiliary, Nashville, Tenn.; WTAM, Cleveland, Ohio; WTBO, Cumberland, Md.; WTIC, Hartford, Conn.; WWL, New Orleans, La.; WWVA and auxiliary, Wheeling, W. Va.

W2XQO—Knickerbocker Broadcasting Co., Inc., Flushing, N. Y.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1940.

MISCELLANEOUS

WWRL—Long Island Broadcasting Corp., Woodside, N. Y.—Adopted an order extending the effective date of Provision (3) of the Commission's Order of December 5, 1938, 90 days from July 4, 1939.

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass. —Granted petition to intervene on the issues as stated by the Commission in notice of designation in the hearing on the application of C. T. Sherer Co., Inc., for a new station in Worcester, Mass., to operate on **1200 kc.**, 100 watts night, 250 watts LS, unlimited time.

WRBL—Columbus Broadcasting Co., Inc., Columbus, Ga.—Granted petition to intervene on the issues as stated by the Commission in notice of designation in the hearing on the application of Yetta G. Samford, C. S. Shealy, Thomas D. Samford, Jr., J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala., for a new station to operate on **1370 kc.**, 100 watts night, 250 watts LS, unlimited.

WCOV—John S. Allen and G. W. Covington, Jr., Montgomery, Ala.—Granted applicant's petition for leave to amend application by a change in name to Capital Broadcasting Co., Inc., in re application for modification of license to change hours of operation from daytime to unlimited, using **1210 kc.**, 100 watts.

KNEL—G. L. Burns, Brady, Tex.—Granted applicant's motion to postpone hearing scheduled for July 11 on application for modification of license to change hours of operation from daytime to unlimited, using **1500 kc.**, 100 watts night, 250 watts LS, new date to be fixed by Secretary's office.

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Granted applicant's petition for continuance of hearing from July 12 to July 15.

KRLH—Clarence Scharbauer, Midland, Texas—Granted applicant's motion for leave to amend application to eliminate request for increased daytime power; hearing scheduled for July 14 cancelled, new date to be fixed by Secretary's office.

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted authority to move transmitter site from Bellmore, N. Y., to Port Washington, N. Y., and install vertical radiator in accordance with specifications for marking of the vertical radiator.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate auxiliary transmitter of Radio Station WENR at Downers Grove, for the period July 14 to August 12, 1939, until new antenna can be put up at WBBM's location.

W8XUJ, W8XNU—The Crosley Corporation, Cincinnati, Ohio—Granted extension of special temporary authority to use facsimile broadcast (experimental) Station W8XUJ and high frequency station W8XNU at Carew Tower for period July 9 to Aug. 7, 1939, in order to complete radiation tests to determine whether or not shielding is needed in television rooms and also to make survey of Station W8XNU to determine coverage of this frequency from Carew Tower location.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Granted special temporary authority to operate with directional antenna, 50 KW power, from 6 a. m. to one hour before sunset, for period not to exceed ten days, in order to make proof of performance measurements in accordance with C. P. granted November 28, 1938.

WAID—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted special temporary authority to use equipment described in application with 20 watts power on **2830 kc.** from 10 a. m. to 7 p. m., EST, for a period July 12 to July 15, 1939, in order to broadcast Junior Amateur Golf Tournament.

WHMA—Harry M. Ayers, Anniston, Ala.—Granted special temporary authority to operate from local sunset (July, 7 p. m., CST) to the conclusion of "All Star" baseball game to be played on July 8, using 50 watts only.

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted special temporary authority to rebroadcast the transmissions from Naval Reserve Plane J2F3 #1572, from 10 p. m. to 11 p. m., CDST, on July 9, operating on frequency **6690 kc.**

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9 to 11 a. m. and from 2 to 6 p. m., AST, on July 9, 16, 23, 30, in order to broadcast baseball games; to operate from 9 to 11 a. m. and from 2 to 6 p. m., July 25, and from 10 p. m. to 1 a. m., July 26, in order to broadcast activities pertaining to arrival of American forces to Puerto Rico in 1898.

WJJD—WJJD Incorporated, Chicago, Ill.—Granted extension of special temporary authority to operate from 5 a. m. to 6 a. m., CST for the period 3 a. m., EST August 1, to Sept. 23, 1939, in order to conform with the adoption of daylight saving time in Chicago; granted on a temporary basis only and is subject to revocation by Commission without prior notice or hearing.

KWJJ—KWJJ Broadcast Co., Inc., Portland, Oregon—Granted extension of special temporary authority to operate on **1040 kc.**, limited time, and resume operation from 9 p. m. to 3 a. m., PST, for period 3 a. m., EST, August 1, to 3 a. m., EST, February 1, 1940.

WGTM—WGTM, Incorporated, Wilson, North Carolina—Granted special temporary authority to operate from local sunset (July 7:30 p. m. EST) to 12 midnight on July 18, 19, and 20, 1939, in order to broadcast the Third annual North Carolina Tobacco Exposition and Festival.

WIXOK—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate relay broadcast experimental station W1XOK on **133,030, 134,850, 136,810, 138,630 kc.**, power 250 watts, in accordance with Sec. 40.04, in order to carry out the program of experimentation outlined in the application for C. P. granted January 24, 1939, for the period July 12, 1939, to August 10, 1939.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, Puerto Rico—Granted special temporary authority to operate from 9:00 a. m. to 11:00 a. m. and from 2:00 p. m. to 6:00 p. m. and from 10:00 p. m. to 1:00 a. m. AST, for the period July 15, 1939, to July 23, 1939, in order to broadcast inaugural ceremonies of new studios.

National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate experimental relay broadcast stations W2XF, W2XK, W3XEK, W3XPO, W3XPP, W6XDE, W6XDG, W8XUE, W8XB, W9XAP, W9XDV, W9XDW, W9XXD, W9XXC, W10XAH, W10XAI, W10XAK, W10XAM, W10XAN, W10XAP, W10XAX, W10XCG, W10XCH, W10XDX, W10XDY, W10XDZ, W10XEA, W10XEB, W10XED, W10XFQ, W10XFR, W10XGC, W10XN, W10XV, and W10XY, on the frequencies **31.22** and **37.02 mc.** in lieu of present assignments **31.1** and **37.6 mc.**, for the period July 19 to 3 a. m., EST, August 1, 1939, pending adjustment of relay broadcast frequency assignments above **30 mc.** as contemplated by General Order No. 19.

W2XDG—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate high frequency broadcast station W2XDG on the frequency **38.65 mc.**, pending effective date of new frequency allocation, for the period July 18 to 3 a. m., EST, August 1, 1939.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test high frequency broadcast equipment of Station W1XOJ authorized by modification of C. P. on frequency **43000 kc.**, power not to exceed 2000 watts, for period July 19 to August 17, in order to make necessary adjustments on equipment installed and for tuning and adjustments of antenna elements now assembled for erection atop 400-foot mast.

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Granted extension of special temporary authority to operate WORC new directional antenna as authorized in B1-P-2270 during daylight hours for period July 11 to July 17, 1939, in order to facilitate equipment tests for proof of performance measurements.

W9XAI—The Journal Company (The Milwaukee Journal), Portable-Mobile area of Milwaukee, Wis.).—Granted application for C. P. for changes in equipment of high frequency relay broadcast station W9XAI and decrease in power from 50 watts to 25 watts, and to use certain frequencies listed under Group D of Section 41.03; frequencies **30820, 33740, 35820** and **37980 kc.**; granted conditionally.

W10XGC—National Broadcasting Co., Inc., Portable Mobile (Area of New York, N. Y.)—Granted application for C. P. for changes in equipment, decrease in power from 30 watts to 25 watts, and addition of A1 and A2 emission; frequencies **31220, 35620, 37020** and **39260 kc.**; granted conditionally.

W9XC—Central Broadcasting Co., Davenport, Iowa—Granted modification of C. P. for extension of completion date for construction from June 18, 1939, to September 18, 1939.

WFMJ—William F. Maag, Jr., Youngstown, Ohio—Granted modification of C. P. for extension of completion date from July 28, 1939, to Sept. 27, 1939.

WING—WSMK, Incorporated, Dayton, Ohio—Granted modification of C. P. to extend completion date for construction from July 1 to August 1, 1939.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted application for license to cover C. P.; frequency **1370 kc.**, power 100 watts, daytime only.

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Granted application for C. P. to install a new transmitter at its present transmitter location; frequency **1130 kc.**, power 50 KW, unlimited time.

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Granted petition to reconsider and grant without a hearing the application for C. P. to increase daytime power of the station from 100 watts to 250 watts. This application was designated for hearing on January 20, 1939.

KOCA—Oil Capital Broadcasting Association, Kilgore, Tex.—Denied petition for rehearing in re application of KFRO, Voice of Longview, Longview, Tex., for C. P. to authorize change in frequency from **1370 kc.** to **1340 kc.**, power and hours of operation from 250 watts, daytime only, to 1 KW, unlimited time, employing DA at night; change transmitter site and install new transmitter, which was granted by the Commission on May 31, 1939.

NEW—North Shore Broadcasting Company, Salem, Mass.—Granted petition to reconsider and grant application for a new station without a hearing, to operate on **1200 kc.**, with 100 watts, unlimited time.

WKBO—The Telegraph Press, Inc., Harrisburg, Pa.—Reconsidered and granted without hearing the application for consent to transfer control of Keystone Broadcasting Corp., licensee of broadcast station WKBO, from the Telegraph Press, Inc., to J. H. Steinman and John F. Steinman.

WWNC—Asheville Citizen-Times Co., Asheville, N. C.—Denied petition for rehearing in re application of WOSU, Columbus, Ohio, for modification of license to increase power at night from 750 watts to 1 KW, on frequency **570 kc.**, with specified hours.

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—Denied petition for reconsideration of WOSU application referred to above.

World Wide Broadcasting Corp., Boston, Mass.—Denied petition requesting continuance of hearing now scheduled for July 14, in re Section 42.03(a), the rules in re international stations.

KOVC—KOVC, Inc., Valley City, N. Dak.—Denied petition of KOVC to dismiss without prejudice the application for C. P. heretofore set for hearing, and denied application for change in frequency and increase in power.

KFH—Radio Station KFH Co., Wichita, Kans.—Denied petitions of KFH and KANS for rehearing in re application of KFBI to move station from Abilene to Wichita, Kans., which was granted by the Commission on May 23, 1939.

NEW—Nebraska Broadcasting Co., Hastings, Nebr.—Granted C. P. for new station to operate on **1200 kc.**, 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites to be determined with Commission's approval.

W9XDV—National Broadcasting Co., Inc., Portable-Mobile (area of Denver, Colo.).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XAI—National Broadcasting Co., Inc., Portable-Mobile (area of New York).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W9XAK—National Broadcasting Co., Inc., Portable-Mobile (area of Chicago, Ill.).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XAX—National Broadcasting Co., Inc., Portable-Mobile (area of Cleveland, Ohio).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XCG—National Broadcasting Co., Inc., Portable-Mobile (area of Cleveland, Ohio).—Granted application for C. P. to make changes in equipment and increase power from 25 watts to 50 watts; granted conditionally.

W10XDX—National Broadcasting Co., Inc., Portable-Mobile (area of New York, N. Y.).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XDY—National Broadcasting Co., Inc., Portable-Mobile (area of Washington, D. C.).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XDZ—National Broadcasting Co., Inc., Portable-Mobile (area of Washington, D. C.).—Granted application for C. P. to make changes in equipment and increase power from 1 watt to 2 watts; granted conditionally.

W10XEA—National Broadcasting Co., Inc., Portable-Mobile (West Coast Area).—Same as above, except add to P.A.: **120000, 240000, 300000** and **330000,** and except WPO, West Coast Area.

W10XEB—National Broadcasting Co., Inc., Portable-Mobile (West Coast Area).—Same as above, except add to P.A.: **120000, 240000, 300000** and **330000,** and except WPO, West Coast Area.

KBTA—Red River Broadcasting Co., Inc., Portable-Mobile (area of Duluth, Minn.).—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** power 10 watts.

W9XTZ—Eugene P. O'Fallon, Portable-Mobile (area of Denver, Colo.).—Granted application for license to cover C. P. for new high frequency relay broadcast station to use frequencies listed under Group F of Section 41.03, power 0.8 watt, unlimited, under Sections 40.04 and 41.04, and to communicate as a relay broadcast station under Sections 41.01, 41.02(c), 41.03(b), and 41.05(b) to relay programs to applicant's broadcast station KFEL, Denver, Colo., where wire facilities are not available; granted conditionally.

NEW—South Nebraska Broadcasting Co., Hastings, Nebr.—Denied as in cases of default the application of South Nebraska Broadcasting Co. for a new station to operate on **920 kc.,** with 1 KW night, 5 KW day, unlimited time, because applicant failed to appear or present any evidence in support of its application.

NEW—Presque Isle Broadcasting Co., Erie, Pa.—Designated for further hearing to determine the citizenship of each of the officers, directors and stockholders of the applicant corporation.

KUMA—Albert H. Schermann, Flagstaff, Ariz.—Continued hearing now scheduled for July 24 to September 25, on the Order of Revocation of License of station KUMA.

KFJB—Marshall Electric Co., Marshalltown, Iowa.—Authorized Secretary's office to issue a corrected license to station KFJB changing the name from Marshall Electric Co., Inc., to Marshall Electric Company, inasmuch as the articles of incorporation filed with the Commission on April 18, 1932 show the company was incorporated in the name of Marshall Electric Co., although applications have been inadvertently filed in name of Marshall Electric Co., Inc.

The Commission announced it had granted a petition to reconsider its decision of April 10, in which the application of Radio Enterprises, Inc., Victoria, Texas, for a new station to operate on frequency **1310 kc.,** with power of 100 watts night, 250 watts day, unlimited time, was denied.

The Commission set aside and cancelled the order of April 10, and GRANTED the application of Radio Enterprises, Inc., for a new station at Victoria, Texas, to use the above-described facilities.

APPLICATIONS FILED AT FCC

570 Kilocycles

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Authority to install automatic frequency control apparatus on auxiliary transmitter.

580 Kilocycles

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Construction permit to install new transmitter, make changes in directional antenna system, for use both day and night, increase power from 1 KW to 1 KW night, 5 KW day.

620 Kilocycles

WFLA—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—Modified license to increase power from 1 KW night, 5 KW day to 5 KW day and night.

680 Kilocycles

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Construction permit for new station on **680 kc.,** 250 watts, limited time. Amended: to request daytime hours of operation.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—License to cover C. P. (B-2-P-2397) for equipment changes.

850 Kilocycles

KWKH—International Broadcasting Corp., Shreveport, La.—Extension of modification of special authority to operate on 50 KW power, unlimited time on **1100 kc.,** period ending 2-1-40 (using directional antenna at night).

1040 Kilocycles

KRLD—KRLD Radio Corp., Dallas, Texas.—License to cover C. P. (B3-P-2080) as modified, for new transmitter, directional antenna for day and night use, and increase power.

KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Extension of special experimental authority to operate on **1060 kc.,** simultaneously with WBAL from 6 a. m. to local sunset, daily, suspend until 8 p. m. and unlimited from then until midnight, period ending 2-1-40. Amended: hours of operation.

KRLD—KRLD Radio Corp., Dallas, Texas.—Extension of special experimental authority to operate simultaneously with WTIC, unlimited time for period ending 2-1-40.

KRLD—KRLD Radio Corp., Dallas, Texas.—Authority to determine operating power by direct measurement of antenna power.

1080 Kilocycles

WMBI—The Moody Bible Institute Radio Station, Chicago, Ill.—Voluntary assignment of license from The Moody Bible Institute Radio Station to The Moody Bible Institute of Chicago.

1210 Kilocycles

WSBC—WSBC, Inc., Chicago, Ill.—Modification of license to increase power from 100 watts; 250 watts day to 250 watts day and night.

WSOC—WSOC, Inc., Charlotte, N. C.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Modification of license to increase power from 100 watts night; 250 watts day, to 250 watts day and night.

WCOV—Capital Broadcasting Co., Inc., Montgomery, Ala.—Modified license to change hours from daytime to unlimited time, using 100 watts power. Amended: to change name from John S. Allen & G. W. Covington, Jr.

WHAI—John W. Haigis, Greenfield, Mass.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

1260 Kilocycles

WFVA—Fredericksburg Broadcasting Corp., Fredericksburg, Va.—Modification of C. P. (B2-P-2105) for a new station requesting equipment changes, approval of antenna, and approval of transmitter site at Leonard Road and 2nd St., near Fredericksburg, Va., and studio site at 528 Wolfe St., Fredericksburg, Va. Amended: omit request for equipment changes.

1270 Kilocycles

WJDX—Lamar Life Insurance Co., Jackson, Miss.—Modified license to increase power from 1 KW night, 5 KW day to 5 KW day and night.

1310 Kilocycles

WCLS—WCLS, Inc., Joliet, Ill.—Construction permit to make changes in transmitting equipment, changes in antenna, move studio and transmitter. Amended: re move of transmitter, same address.

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Modification of license to increase power from 100 watts; 250 watts day to 250 watts day and night.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Construction permit to install new transmitter and directional antenna for night use; increase power from 100 watts, 250 watts day, to 500 watts, 1 KW day; change frequency from **1310 kc.** to **620 kc.;** and change transmitter site from 201 Randolph St., Knoxville, Tenn., to Holston Hills Road, near Knoxville, Tenn.

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

WLBC—Donald A. Burton, Muncie, Ind.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1370 Kilocycles

WISE—Asheville Daily News, Harold H. Thoms, Owner, Asheville, N. C.—Modification of C. P. (B3-P-1066) for a new station, requesting equipment changes, approval of antenna and approval of studio and transmitter site at 179 S. French Broad, Asheville, N. C. Amended: Give transmitter and studio site as Broadway and College, Asheville, N. C., and make changes in antenna.

WBLK—The Exponent Co., Clarksburg, W. Va.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

1420 Kilocycles

WACO—Frontier Broadcasting Co., Inc., Waco, Texas—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

WCBS—WCBS, Inc., Springfield, Ill.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

KVAK—Carl Latenser, Atchison, Kan.—Modified construction permit (B4-P-1846) as modified for new station requesting extension of completion date from 7-28-39 to 9-28-39.

1430 Kilocycles

WOKO—WOKO, Inc., Albany, N. Y.—Special Experimental authority to operate a facsimile station from 2 to 5 a. m., for regular license period ending 11-1-39.

1500 Kilocycles

KNOW—Frontier Broadcasting Co., Inc., Austin, Texas—Construction permit to install new transmitter, make changes in antenna, increase power from 100 watts to 100 watts; 250 watts day, and move transmitter from 114 West Seventh St., Austin, Texas, to site to be determined, Austin, Texas.

KRNR—News-Review Co., Roseburg, Ore.—Modified license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

MISCELLANEOUS

NEW—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Construction permit for new high frequency broadcast station on **42600 kc.**, 5 KW power, Special emission, to be located at 606 West Wisconsin Ave., Milwaukee, Wis.

WAIG—WGN, Incorporated, area of Chicago, Ill.—License to cover C. P. (B4-PRE-258) for new relay broadcast station.

WAIF—WGN, Incorporated, area of Chicago, Ill.—License to cover C. P. (B4-PRE-259) for new relay broadcast station.

W9XJM—WCBS, Incorporated, Portable-Mobile—Construction permit for changes in equipment, increase power from 2 to 10 watts, specify frequencies **31220, 35620, 37020, 39260 kc.,** in accordance with new rules.

WAIH—WGN, Incorporated, area of Chicago, Ill.—License to cover C. P. (B4-PRY-179) for new relay broadcast station.

W9XAZ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Modification of C. P. for move from 509 W. Wisconsin Ave., to 606 West Wisconsin Ave., and specify frequency **42260 kc.,** antenna changes, and extend commencement and completion dates from 5-13-39 and 11-13-39 to 30 days after grant and 90 days thereafter.

NEW—The Travelers Broadcasting Service Corporation, Avon, Conn.—Construction permit for a new Television Broadcast station on frequencies **84000-90000 kc.,** 1 KW power, A-3 and A-5 emission, to be located at Avon, Conn.

NEW—WOKO, Incorporated, Albany, N. Y.—Construction permit for a new facsimile station on **25050 kc.,** 500 watts power, A-3 and A-4 emission, to be located near Central Ave. and Tremont St., Albany, N. Y.

W2XQR—John V. L. Hogan, New York, N. Y.—Modification of construction permit specifying transmitter site at Alpine, New Jersey.

NEW—Worcester Telegram Publishing Co., Inc., Holden, Mass.—Construction permit for a new high frequency broadcast station on **43400 kc.,** 1 KW power, to be located at Shrewsbury St., Holden, Mass.

W8XRZ—WJR, The Goodwill Station, Portable-Mobile, Detroit, and Vicinity—Construction permit to change frequency operating assignment of Station W8XRZ from **31100, 34600, 37600, 40600 kc.,** to **1646, 2090, 2190, 2830 kc.,** and make equipment changes.

NEW—Edwin H. Armstrong, Portable-Mobile—Construction permit for new special relay broadcast station to be used with high frequency broadcast station W2XMN on frequencies **133030, 134850, 136810, 138630 kc.,** 50 watts, Emission Special for frequency modulation.

W9XEG—Martin R. O'Brien, Portable-Mobile—License to cover construction permit (B4-PRE-227) for new relay broadcast station. Amended to specify frequencies **30820, 33740, 35820, 37980 kc.,** in accordance with new rules.

WAHF—WTAR Radio Corp., Portable-Mobile—License to cover construction permit (B2-PRY-137) for new relay station.

W5XGO—Beaumont Broadcasting Assn., Portable-Mobile—Voluntary assignment of license to KRIC, Inc.

KDAC—George Harm, Portable-Mobile—License to cover construction permit (B5-PRY-167) for new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Oil Company—A complaint has been issued against American Oil Company, Baltimore, and General Finance, Inc., Washington, D. C., alleging price discrimination in the sale of gasoline, in violation of the Robinson-Patman Act.

General Finance, Inc., is engaged, among other things, in the selling and financing of taxicabs, and also leases and operates two gasoline stations in Washington.

Five taxicab companies of Washington and Baltimore, whose policies and activities were controlled by General Finance, Inc., or by its officers, Herbert Glassman and Edward C. Ostrow, are alleged in the complaint to have entered into a contract with American Oil Company providing for the purchase of "Amoco" and "American Gas," at a price of 5⅝ cents per gallon below the current posted retail service station price, and 1⅝ cents to 2⅛ cents lower than the posted tank wagon prices charged by American Oil Company for Amoco and American Gas sold by it to other retail gasoline station operators in the District of Columbia. During the years 1937, 1938 and 1939 American Oil Company is alleged to have sold to General Finance, Inc., more than 100,000 gallons of gasoline monthly, at the prices fixed in the contract, which gasoline was resold at retail by General Finance, Inc., at its gasoline stations in Washington to taxicab operators and the public.

The complaint alleges that although the contract provides that the products purchased under it are "for buyer's own consumption only and not for resale, in whole or in part, to buyer's employees or any other person," the gasoline purchased by General Finance has been resold by it at retail to taxicab operators and to the public generally. The fact of such resale, the complaint alleges, has at all times been well known to the American Oil Company.

By selling its gasoline at the prices stated, which are substantially lower than prices charged by it to other retail dealers in the District of Columbia, American Oil Company is charged with discriminating in price, and receipt of such discrimination in price was knowingly induced and received by General Finance, Inc. (3843)

General Finance, Inc.—See American Oil Company.

Simmons Company—A complaint has been issued charging the Simmons Company, New York, manufacturer of metal beds, mattresses and allied products, with unlawful price discriminations in violation of the Robinson-Patman Act.

Discounts allegedly were granted certain purchasers under a sliding scale plan based on purchases during the calendar year, and operating as follows: No discount on purchases of less than $50,000; 3 per cent discount on purchases of $50,000; 3½ per cent on purchases of $75,000; 4 per cent on purchases of $100,000; 4½ per cent on purchases of $150,000, and 5 per cent on purchases of $200,000 and more.

The complaint charges that the respondent's discount plan discriminated against individual purchasers of less than $50,000 worth of merchandise in a year and in favor of those competing individual customers purchasing more than that amount and that there were few of the latter class. However, it is alleged, the Simmons Company sold its product to large central organizations or syndicate members and granted the discounts on the basis of aggregate purchases of the entire organizations even though some of their individual retail stores or units often made aggregate yearly purchases which were no larger and in many cases smaller than the yearly purchases of many unaffiliated individual customers. In many instances, it is alleged, the individual customers were in direct competition with unit stores of the central organizations, or with member stores of the syndicates. (3840)

Usona Shirt Company—False representations in the sale of textile fabrics is alleged in a complaint issued against Usona Shirt Company, 230 Fifth Ave., New York.

The respondent is alleged to label certain of its products as being "shrunk," "pre-shrunk," or "full shrunk," when in fact they were not made of shrink-proof, non-shrinkable cloth, but from cloth which had not been fully shrunk to the extent that no residual shrinkage remained. (3842)

Williams & Wilkins Company—Price discrimination in the sale of books in violation of the Robinson-Patman Act is charged in a complaint against The William and Wilkins Company, Mt. Royal and Guilford Avenues, Baltimore, publishers and distributors of medical and other scientific books.

The complaint charges the respondent company with discriminating in price between different purchasers buying the same books for resale to retail dealers by granting price discounts ranging from 20 per cent to 35 per cent. It is alleged that the effect of such discriminatory discounts enables some purchasers to buy the same books at lower prices than competing purchasers. (3844)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Shaw and Davis, Inc., Abner Shaw, and Janet Shaw, 20 West 47th St., New York, have been ordered to discontinue misleading practices in the sale of jewelry, leather goods and related items to the consuming public.

By misrepresenting themselves as "wholesalers" and by publishing "list prices" in their catalogs, the respondents were found to have misled the public into buying their merchandise under the belief that they were securing the goods at retail dealer prices. The so-called "list prices" were found not to be "list prices" but figures that will, when reduced by a specified discount, show the prices of respondents' articles as offered for sale to consumers.

The respondents were ordered, in reference to sales to the purchasing public other than the retail trade, to cease representing themselves as "Wholesalers" or "Wholesale Jewelers," and to cease using the terms "list prices" or "discount" or representing that the price at which they offer their products for sale, constitutes a discount to the purchaser, or is a wholesale price, when such price is the one at which they normally sell their products in the usual course of business. (3635)

Silver Manufacturing Company—James I. Silver, trading as Silver Manufacturing Company, Silver Sales Company, and World-Wide Radio Company, 2868 Elston Ave., Chicago, has been ordered to discontinue misleading representations and lottery methods in selling radios, fountain pens and other novelty merchandise.

Radios were found to have been represented in a fashion tending to deceive buyers into believing they were R.C.A. sets, when in truth only tubes or other parts had been made by a manufacturer operating under a limited R.C.A. license.

It was also found that the respondent advertised to the effect that his agents could obtain radio sets from the respondent at factory prices and save up to 50 per cent, when in fact the respondent was not the manufacturer of the sets offered but only the middle-man and did not sell radios at factory prices or at the saving advertised.

The Commission's order directed the respondent to cease representing directly or by inference that radios not made by the Radio Corporation of America are "R.C.A." radios; that the respondent is a manufacturer, until that is a fact and that his purchasers obtain a 50 per cent or other saving, and to cease implying that merchandise supplied to agents is free when they are required to pay therefor or perform certain services to obtain it. (3211)

Silver Sales Company—See Silver Manufacturing Company.

World Wide Radio Company—See Silver Manufacturing Company.

Wyeth Chemical Company, 15 Exchange Place, Jersey City, N. J., was ordered to discontinue false and misleading representations in the sale and distribution of "Freezone," a preparation for the removal of corns and callouses.

The order directed the respondent to cease and desist from representing that "Freezone," or similar products, will cure corns or callouses or prevent their formation or recurrence, and that it will promptly stop, or prevent the recurrence of, pain caused by corns. The order also prohibited representations that corns have roots, that the roots are removable by "Freezone," or that an entire corn can be removed by the use of the fingers after one application. (3754)

STIPULATIONS

The Commission has entered into the following stipulations:

Bond Pharmacals, 2404 McKinney Ave., Dallas, Tex., has entered into a stipulation to discontinue certain representations in connection with the sale of its product, "30-40 Wafers," a concentrated food tablet represented as an aid for reducing weight.

The respondent agrees to desist from representing, directly or by implication, that "30-40 Wafers" will be effective in reducing weight, unless it is clearly explained that the product is of value only to the extent that it tends to reduce the appetite for other foods, and that it should be used in conjunction with low calorie diets and exercise. (02398)

Intermountain Broadcasting Corp.—Five Western and one Southern broadcasting stations have entered into stipulations to discontinue certain advertising practices in connection with the sale of their facilities.

The respondents are Intermountain Broadcasting Corporation, operating station KDYL, Salt Lake City, Utah; Lamar Life Insurance Company, station WJDX, Jackson, Miss.; Mosby's, Incorporated, station KGVO, Missoula, Mont.; Woodmen of the World Life Insurance Society, station WOW, Omaha, Nebr.; KFRU, Incorporated, station KFRU, Columbia, Mo., and Minnesota Broadcasting Corp., station WTCN, Minneapolis.

The respondents agreed to cease representing, directly or by implication, that their respective stations have a certain power unless that power is actually used by them during the entire broadcasting period, or unless it is clearly explained in direct connection with each representation that such power is authorized and used only during certain specified hours.

According to the stipulation, all but one of the respondents advertised, without qualification, their stations as having 5,000 watts power, which, it was agreed, might mislead some prospective purchasers of radio facilities into believing that such power was continuous when in fact the power authorized for use and used in each instance was 5,000 watts during the day only and was limited to 1,000 watts at night. In the case of KFRU, Incorporated, the power advertised without qualification was 1,000 watts when in fact 1,000 watts was used by day and 500 watts at night. (02392 through 02397, inclusive.)

Ivis Company, Inc.—In a stipulation, The Ivis Company, Inc., 150 Pearl St., New York, agrees to cease certain misrepresentations in the sale of a facial pack designated "Milk-Mode".

The respondent stipulates that it will cease representing directly or by implication that Milk-Mode or the Milk Mode treatment will reduce enlarged pores, remove blackheads, whiteheads, or discolorations; that it is comparable to a facial massage treatment in a beauty salon; that it will lift out dirt and poisons from the pores and combat re-infection or that the treatment is a health bath for the skin, and that actresses have said it will give renewed vitality.

The respondent will also cease the representations that Milk-Mode is of value in the treatment of oily, coarse, drab, dry or sallow skin; that it will eliminate or reduce wrinkles, lines, puffiness or sagging, and that it will stimulate, revitalize or tone the skin or stimulate circulation. (020400)

KFRU, Inc.—See Lamar Life Insurance Company.

Lamar Life Insurance Company—See Intermountain Broadcasting Corp.

Minnesota Broadcasting Corp.—See Lamar Life Insurance Company.

Mosby's Inc.—See Lamar Life Insurance Company.

Tenex, Incorporated, Davenport, Iowa, entered into a stipulation to cease the dissemination of misleading advertisements in the sale of Tenex, a treatment for athlete's foot and other skin diseases.

The respondent agreed to cease representing directly or by implication that Tenex is a cure for athlete's foot, ringworm or any other disease or that it is a competent treatment or effective remedy for fungus nail, eczema, barber's itch, corns and callouses, cuts, dermatitis, irritation, skin diseases generally, and ringworm, unless the representations are limited to the types of ringworm for which Tenex may be effectively indicated.

The respondent will also cease representing that eczema is a fungus infection or disease; that Tenex is harmless to healthy tissue, and that Tenex will prevent reinfection of athlete's foot conditions. (02401)

"Short Wave" Hearing

JULY 14

Commissioner Thad H. Brown, acting chairman, opened the hearing by announcing the suspension of the program rule affecting international broadcasting. Mr. Brown denied that the Commission had any intention of exercising any "censorship" of international programs. He made the following statement:

This hearing was set on a petition of the American Civil Liberties Union for revision, amendment or modification of Section 42.03(a) of the Commission's rules and regulations governing international broadcast stations. This rule reads as follows:

"A licensee of an international broadcast station shall render only an international broadcast service which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation. Any program solely intended for, and directed to an audience in the continental United States does not meet the requirements for this service."

The Commission intended by this rule to require international broadcast stations, which are licensed for the purpose of rendering a program service intended for general public reception in foreign countries, to render a program service designed for reception by the people of such countries as distinguished from a program service intended only for reception in this country. It was further intended to define the primary purpose and objectives of international broadcast stations for reasons provided in international agreements to which the United States is a party.

The applicable provisions of the Communications Act of 1934, as amended, require that licenses be issued to serve the public interest, convenience or necessity. To comply with this statutory mandate, the Commission is required before it may issue a license or assign any frequency for any particular service to define the purpose and objectives for such service in such a way that the public interest, convenience or necessity will be served by the station licensed to operate on frequencies assigned to this service. This is true whether the service be international broadcast service, telephone or telegraph service, domestic broadcast service, police service, aviation service or any of the other various classes of radio service authorized by the Commission.

Prior to the adoption of the present rules governing international broadcast stations, stations licensed to operate on the frequencies assigned to that service were authorized only on an experimental basis. During the experimental period the Commission imposed, and the licenses accepted, conditions limited the nature and defining the character of the service which could be rendered on the assigned frequencies.

The operation of these stations has demonstrated that the use of the frequencies involved for long-distance communication is practicable and can no longer be considered in an experimental stage of development. Before assigning frequencies for use on a regular basis for international broadcasting, it was necessary for the Commission to consider what, if any, benefits would result to the people of this country from such use. For, unless the public interest, convenience or necessity would be served by assigning these frequencies to a use which would not directly serve the listeners of this country, and since the frequencies are to be used for providing program service to the listeners of other countries, it was necessary to determine how and to what extent a program service to foreign countries from American broadcast stations would be of benefit to this country. The Commission reached the conclusion that there would be a public benefit to the people of this country if American stations could be licensed to provide a program service to foreign countries if the effect of the operation of such stations would be to engender international good-will, understanding and cooperation through program service generally reflecting the culture of our people. The Commission was of the opinion that such a service would result in benefits to the people of the United States through the stimulation of international goodwill, understanding and cooperation and would promote our foreign commerce.

Among other things, it was necessary to keep in mind at all times that from a technical standpoint the licensing of international stations presents a different problem than that of regular domestic broadcast stations. As an example, the problem of providing an interference-free channel between the transmitter and the receiver is not one subject generally to the control of this government alone; for any of these frequencies or all of them could be rendered useless for our purposes if other countries permitted stations to operate, or create interference, on the same frequencies.

It was also necessary to consider in connection with this rule the international policy which our government had a major part in formulating with respect to the use of these frequencies. This policy is reflected in Article VII, Section 22 of the General Radio Regulations annexed to the Telecommunication Convention of Madrid, the Cairo revision of which carries forward and makes more restrictive the similar provisions in the Madrid regulations (Article VII, Section 19). The Cairo provision reads:

"§ 22. (1) It is recognized that the frequencies between 5,000 and 30,000 kc. (60 and 10 m) are capable of propagation over great distances.

(2) The administrations shall make every possible effort to reserve the frequencies of this band for long-distance communications, in view of the fact that their use for short- or medium-distance communications is likely to interfere with long-distance communications."

In summary, Section 42.03(a) was intended to do two things: (1) to require international broadcast stations to direct their service to foreign countries rather than the United States; (2) to define the public interest to be served through the licensing and operation of such stations. It has not been the practice of the Communications Commission in the past, nor is it the intention of the Commission now, with respect to the rule, ever to require the submission of any program continuity or script for editing, modification or revision, or for any other purpose prior to its use by a station.

It cannot be emphasized too strongly that the Commission has no desire, purpose or intention of setting itself up as a board of censorship, and that it does not and will not exercise any such jurisdiction.

The Commission deems it appropriate in the interests of orderly procedure to place this statement formally upon the record in this hearing which has been duly set upon a proper petition, and hopes that the statement will contribute materially toward a constructive result.

The fundamental issue in this hearing may be stated as follows:

1. Is the public interest, convenience or necessity within the meaning of the Communications Act of 1934, as amended, served

"SHORT WAVE" HEARING

(Continued from page 3605)

through the licensing and operation of international broadcast stations?

2. How is the public interest, convenience or necessity served through the licensing and operation of international broadcast stations?

3. Is the Commission on the basis of the public interest, convenience or necessity to be served through the licensing of such stations justified in limiting the stations to an international broadcast service as distinguished from a domestic broadcast service?

It is of the greatest importance that these issues be considered and discussed without possibility of confusion arising from any ambiguity in or misinterpretation of language or phraseology. The Commission, therefore, pending an opportunity to hear and consider the evidence, views and arguments to be presented on the issues in this hearing has ordered that the operation of section 42.03(a) be suspended.

After the American Civil Liberties Union had introduced a statement of its radio policy as its only direct testimony, Swagar Sherley, special NAB counsel, introduced a motion to amend the suspended rule to read: "A licensee of an international broadcast station shall render an international broadcast service." ("Stop there," Mr. Sherley said.) All interested parties except the International Catholic Truth Society and the National Committee on Education by Radio agreed to the motion, he explained. After considerable discussion, the motion was taken under advisement.

Horace L. Lohnes appeared for the Westinghouse Electric and Manufacturing Company, and told the Commission that "Westinghouse does not believe in censorship any more than the Commission apparently does," and that he joined in Mr. Sherley's motion. The same held for the Isle of Dreams Broadcasting Company, he added. During cross-examination, Commissioner Thompson asked Mr. Lohnes a question he asked each succeeding witness: "Has there been any indication whatsoever in the operation of the station that any effort at all has been made to censor any program on that station?" Mr. Lohnes replied that there had not been.

Rev. Edward Lodge Curran, appearing for the International Catholic Truth Society, the next witness, said that as an American Citizen he was "at a loss to understand how any of my fellow American citizens can object to either the contents or the wording of this section." During his testimony, he assailed both the NAB and the American Civil Liberties Union for their position in the matter.

Neville Miller, NAB president, was on the stand the rest of the first day, and was subject to a great deal of questioning by both the Commission and Commission counsel.

The NAB convention, the new code, how Mr. Miller found out about the "censorship" rule, the NAB news review, the drafting of Mr. Miller's letter requesting a hearing on the rule, whether the board of directors was consulted, why the letter was sent to Chairman McNinch instead of the acting chairman, how many stations the NAB represented, just whom Mr. Miller represented in the proceedings—these and other topics were discussed before the Commission and its counsel finished their questioning.

JULY 15

E. K. Cohan, CBS engineering director, the next witness, described the technical aspects of international broadcasting. It was brought out that a broadcast could not be confined to one country alone, and that a program which was designed to promote "good will" in one country might be received in another where it might provoke ill will. Frederick A. Willis, CBS assistant to the president, in charge of short wave operations, described in detail CBS short wave programs and policy.

H. Thomas Austern, for the American Civil Liberties Union, next gave his argument in behalf of that organization. In concluding, he said, in part:

> "Now, what does this mean when a licensee of the Commission examines whether a program promotes international goodwill, understanding and cooperation? Well, it clearly considers the effect of what is said on those who listen. It proposes, as it can be so interpreted, we think, to curb expression where the listener might possibly be irritated or annoyed; it necessarily confers upon the Commission the opportunity to decide when this occurs. Now, frankly, we do not know how anyone could interpret that standard. Would a public discussion of tariff policy, let's say, with respect to imported beef, be permitted even though both sides were debated? Would a news report about our Governmental action in buying such materials be proper? Would a broadcast of the Mikado or Porgy and Bess be ruled out as possibly offensive to the sensibilities of some other nationals, and would not a licensee, seeking renewal or defending a revocation proceeding, necessarily have to deal with the effect of his program content in specific terms? We think that this clearly permits censorship. Frankly, we fear that it is contemplated, that type of examination. * * *
>
> "Now, we submit that all of subparagraph (a) should be rescinded because it permits the exercise of the power of censorship; because it impedes and interferes with the specific content of programs; because it contemplates the measurement of such specific content in terms of its truth, its effect elsewhere, whether it will provoke hostility, and so forth. * * *
>
> "Now, we submit that there is no necessity whatever for that paragraph. Candidly, we think there is no necessity for any such particularization as to public convenience and necessity, and we respectfully submit that it be deleted."

After Mr. Willis underwent long cross-examination, C. B. Jolliffe, engineer in charge of the RCA frequency, and Frank E. Mason, in charge of the NBC International Division, discussed NBC short wave broadcasting. Like the other witnesses, Mr. Mason was closely cross-examined on the "censorship" issue.

JULY 17

Mr. Sherley summed up the NAB'S case with a brilliant analysis and discussion of the fundamental issue. Following are especially important excerpts:

Perhaps it may not be amiss at this point to call attention to what I consider to be the loose thinking that has grown up in connection with radio and government's relationship to it.

We all indulge in talk about the ether and it being the property of the State; that licensees are the recipients of government favor and as such exist, so to speak, as tenants by sufferance. I in no way deny the right of regulation which, in the interest of the public, the government possesses; but it has been easy, because of this right of regulation, for persons to conclude that there is in government an ownership of the ether in some mystical way (always unexplained) whereby the use of this great art by the citizens of the Republic is to be considered as a favor bestowed by a generous government, and that the recipients should therefore show a corresponding sense of gratitude and accept with whatever limitations are placed on it the right to use the art.

To my mind nothing could be more misleading. Ownership of the ether, in any strict sense of the term, is an impossibility. It is a property of nature, capable of use, but not of ownership. What the government possesses is a right to regulate the use of the ether, and this right of regulation with a free people is limited *by the need to regulate* in order that proper use in the interest of society may be made.

Man's inventive genius found a method for transmitting electrical impulses with the speed of light and their translation into auditory sensation, and as a result of the genius of Marconi and those who followed him, there has been built up a new form of instruction and entertainment for mankind, the possibilities of which we cannot even visualize. Those who have given their ability, their wealth and their energy in the development and improvement of this art are not in any true sense of the term suppliants of a government's favor. They are benefactors of their time, willingly submissive to that regulation of their government and that only which is necessary in the clear interest of all.

Now let me not be misunderstood. I would not represent but misrepresent those for whom I speak, if I in any way gave the impression that the industry is rebellious over the regulation and licensing that the *radio law* provides. Those of us who had experience in the chaotic days when the then regulatory power of the government was stricken down would be the last to ask that freedom which is not real freedom but anarchy, that existed in the ether.

But I have said what I have said because I believe it was the intention of Congress—as I believe that it is and should be the viewpoint of this Commission—that regulation should be the child of the art's need and not the exertion of power by government for power's sake, or of any mistaken notion that those who are licensed to pursue the art are beneficiaries of grants in the sense in which a government with a proprietary interest might convey rights or interests to specially chosen individuals and therefore place whatever conditions upon the grant it saw fit.

It is interesting to note that the Commission's carefully prepared statement suspending the rule occupies five pages of typewriting in order to explain the intent lying behind six lines of regulation. May I be pardoned if I say that witnesses may be considered to have had some justification for expressing their uncertainty as to the significance and scope of the regulation? It will be noticed that the Commission's statement at no place deals with the meaning and construction of the language actually used in the regulation.

The Commission at no point has undertaken to define the word "culture", of which we have heard so much during the hearing, nor as to what will promote international good will, understanding and cooperation, and the statement of the Commission is interestingly silent as to the second sentence of the regulation, though it does affirmatively declare that the intention of the Commission was to make a distinction between the program service intended for general public reception in foreign countries as distinguished from a program service intended for reception in this country.

Notwithstanding the disclaimer as to intent made by the Commission, I submit that there can be no two opinions as to the language of the rule being such as in law to create and permit censorship of international broadcast programs.

And it must never be overlooked that the phraseology of the rule is an affirmative command and not simply a prohibition. It would be bad if it was a prohibition other than those which the Act itself contains. It is doubly bad when it substitutes the judgment of the Commission as to what must be said in order to be considered in the public interest. That is the very essence of censorship—the substitution by governmental fiat of a judgment as to what is desirable for the freedom of judgment of those within the purview of the regulation.

Rule 42.03(a) is an affirmative requirement that all licensees of international broadcast stations *shall* render a program service which both reflects the culture of the United States and promotes international good will, understanding and cooperation, and I respectfully submit that no question of intent on the part of the Commission in adopting the rule has any place in the construction of the language actually used.

Had the rule provided simply that a licensee of an international broadcast station should render an international broadcast service and stopped there, it might be argued with some plausibility that the regulation was simply a classification such as we are all familiar with in connection with ship-to-shore, police, point-to-point and other regulations pertaining to classification.

But when it goes forward with an affirmative requirement—vague, uncertain and indefinite though it is—I submit that it is an effort at direct censorship of program content within the international field and as such is beyond the power of this Commission to enact.

As always, confusion arises from the use of the same word in different senses. We have talked about censorship, using the phrase as carrying with it as a necessary incident the fiat of the government whereby the person subject to the censorship is under the compulsion of obedience.

The word has been used as applying to the self-imposed censorship which the members of an association such as the National Association of Broadcasters voluntarily elect to impose upon themselves in their desire to live up to the full obligation of their duties as licensees of broadcast stations, and it has been used to indicate that editorial selection which is exercised by a broadcaster in determining what shall go into a particular program. It is very vital that we bear in mind the fundamental differences that underlie the word accordingly as it applies to one or the other of these situations.

Repeated suggestions were made that inasmuch as the broadcasters had seen fit to establish standards that should control them in broadcasting, there should be no objection to the like purpose sought to be accomplished by a regulation of the Commission. Such a view, I submit, is fundamentally unsound. The vice of governmental censorship lies in its compelling power; like a sword of Damocles it is held over the heads of those subject to it, with pains and penalties if they fail to comply. It is the difference between servitude and voluntary restraint.

One may and does impose upon himself restraints that are in the nature of voluntary censorship, but to conclude that there is no essential difference between such voluntary restraint and that which may be imposed upon one by government is again to lose sight of the whole philosophy that underlies our government.

Voluntary restraint by an association is the American way of making sure the performance of a duty that is always coincident to a right. The failure properly to live up to the duty may be, under given conditions, a warrant for taking away the right or privilege; but unless we are to transform completely our concept of government, the right cannot in the first instance be given subject to conditions that of themselves curtail the freedom that is contemplated by the Bill of Rights.

Again I say to you that our theory of government contemplates citizens full grown, capable in themselves, who do not need the guiding hand of governmental guardianship no matter how benevolently applied.

The power of Congress over radio arises out of the constitutional grant in reference to interstate and foreign commerce. This power, broadly speaking, is a plenary power; but like all other express grants to Congress, it is to be exercised subject to the limitations imposed by the First Amendment to the Constitution.

I have, I hope, already made clear that Congress has the right—nay, the duty—in the public interest to place restrictions upon speech in order that the right may not degenerate into license of speech.

Congress has the unquestioned power, and it is the very basis of its control, to determine in the public interest who shall be given the right to use of the ether waves. And it has not only the right to determine who shall be licensed to use the ether but also to classify the uses to which particular frequencies shall be dedicated. This power of classification is broad and fundamental as a classification of service to be rendered, but it is not a power that can be used as a medium for disregarding the prohibition on abridging freedom of speech.

Much has been said in connection with the Montevideo Conference of 1933 and the very laudatory resolution adopted there regarding desirable objectives as to international broadcasts. Similar resolutions were adopted at Buenos Aires in 1936 and at Lima in 1938. But there has been an entire failure to call attention to the fact that in connection with the very statements which have been quoted there was a statement on behalf of the American delegates to the Lima conference which reads as follows:

> "The United States delegation agrees to this resolution with the understanding that the following words in paragraph one: 'to recommend that the governments of America, *in so far as their respective internal legislation permits*', are intended also to apply to and limit the language of paragraph two."

But I submit with all the earnestness possible that the necessity for any consideration of programs, broadcast by a single station, if necessity exists, cannot in any way be construed into a right of the Commission to declare affirmatively what shall or shall not be broadcast by all stations, save as the Radio Act expressly provides.

The Communications Act contains five specific provisions having to do with programs:

(a) Obscene, indecent or profane language;
(b) Denial of equal opportunity to political candidates;
(c) Lottery information;
(d) Announcement of sponsored matter; and
(e) Unauthorized rebroadcasting.

In summary and in conclusion, may I say that it is my position that the Bill of Rights is an express limitation upon every power conferred upon our Federal Government by the Constitution of the United States.

That Congress, recognizing the limitation in the First Amendment upon freedom of speech, has most emphatically and explicitly declared that this Commission should exercise no form of censorship.

That all of the powers conferred upon the Commission regarding classification and other matters are by the express terms of Section 326 of the Radio Act made subject to that clause.

That Rule 42.03(a) is censorship and censorship none the less because of the benevolent intent of the Commission in adopting it.

We lose sight entirely of the fundamental issue here involved if we accept a disclaimer as to an intent to disagreeably or restrictively enforce a regulation as warranting its enactment.

We were told during the hearing that the industry should have no concern over the regulation adopted or some substitute for it, because its enforcement would be by reasonable men and without an intent to interpret it oppressively. This is the old, old plea for power sought to be justified by a disclaimer of intent to abuse the power. But I submit as a matter of law that a regulation adopted speaks in its own language and once adopted it *becomes the duty and not the option* of those charged with enforcement to see to its enforcement.

(Note: Mr. Sherley's full statement is being printed, and will be sent to all NAB members.)

ISSUE BEFORE CONGRESS

Representative Cochran (D-Mo) on July 13 introduced a bill to set aside the FCC short wave rule setting program standards for international broadcasts and to forbid the FCC from setting up such standards.

CORRECTION

In last week's NAB Reports (Vol. 7, No. 28, page 3588), Walter J. Damm was incorrectly listed as director of District 9. This should be changed to:

District 9—Gene T. Dyer, Manager
Radio Station WCBD
WCBD, Inc.
Chicago, Ill.

Members should correct the list in case it is used for reference.

Legal

RCA VS. WHITEMAN

Findings of fact and conclusions of law were made by United States District Judge Vincent L. Leibell in the Southern District of New York and filed on Saturday, July 15th, in the case of RCA Manufacturing Company, Inc., against Paul Whiteman, W. B. O. Broadcasting Corporation and Elin, Inc., tried in that Court last December. No opinion has yet been rendered although it is understood that Judge Leibell will shortly file a memorandum in support of his findings and conclusions, and this week will sign a decree.

The Court found that from November 1932 to August 15, 1937, the RCA Manufacturing Company, Inc., and its predecessor, RCA Victor Co., has marketed phonograph records bearing the legend "Not Licensed for Radio Broadcast," and since August 15, 1937, all records have been issued with labels and envelopes stating, "Licensed ** Only For Non-Commercial Use On Phonographs In Homes. Mfr. & Original Purchaser Have Agreed This Record Shall Not Be Resold Or Used For Any Other Purpose."

The Court held that the broadcasting by the defendant radio station and sponsor of phonograph records bearing these restrictions constituted unfair competition with the record manufacturer (and also with the recording artist, provided the artist had not assigned all of his rights to the recording company); that Whiteman had contracted away all of his rights to the Recording Company except under one contract in which the rights were restricted as to broadcasting so that neither the Company nor Whiteman could alone license the broadcasting of the records without the consent of the other.

The Court found that Whiteman and certain other artists had (in their renditions of musical selections transcribed upon phonograph records) acquired common-law-property rights in such renditions and that these rights were not dedicated, published or abandoned by the sale of the records, provided the labels restricted the use thereof.

The Court further found that the defendant W. B. O. Broadcasting Corporation had caused the New York distributor of RCA records to breach the distributor's contract with RCA Manufacturing Company, Inc., by inducing the distributor to sell the records for radio use.

The injunctions that are expected to issue are as follows:

> 1. Whiteman will be enjoined from asserting the right to control the commercial use of RCA phonograph records made under his 1924 and 1931 contracts with the manufacturer, and from undertaking to license the same, and from asserting the sole right to control the use for radio broadcast of RCA phonograph records produced under the 1934 contracts, and from undertaking solely to license the same.
>
> 2. WBO Broadcasting Corporation and Elin, Inc., will be enjoined from broadcasting any RCA records provided such records have on them the restrictive-use labels; and the WBO Broadcasting Corporation will be enjoined from inducing RCA Manufacturing Company's New York distributor to breach its contract by selling records for radio use.

This decision may have various results. The National Association of Performing Artists has received a decided set-back in its attempt to license radio stations to broadcast phonograph records. It is reported that fewer than a dozen contracts exist by which the artists have retained any rights of any character in their renditions.

On the other hand, it is understood that some phonograph record manufacturers are likely to attempt to license their records for radio use on a regular fee basis with the royalties divided with the artists and music publishers.

The following findings of fact in this case may in some cases make the decision inapplicable to other stations:

> "10. Defendants WBO Broadcasting Corporation and Elin, Inc., duly appeared in this action and filed their answers herein, but at the trial of this action appeared by counsel and stated that they elected not to defend the suit.
>
> "77. Defendant WBO Broadcasting Corporation has prefaced the playing of phonograph records with announcements designed to create the impression among the audience that the performance is being rendered by the artist in person."

Accordingly, it is possible that in a suit in which testimony would be introduced by a defendant radio station and in which the witnesses of the recording company and of the recording artists would be subjected to vigorous cross-examination, the decision might be far different.

The decision is furthermore determinative only of the common law of the State of New York and need not be followed by Courts of other States or even by the State Courts of New York. Furthermore, if appealed by any of the parties, it may not even be sustained as the legal conclusions arrived at are not only far from being well settled but also are contrary to many decided cases in analogous situations.

Although the recording company urged a property right in it by virtue of the skill and ability of its employes, the Court refused to so find and instead found:

> "52. No act of the recording company contributes to the artistic quality of the interpretation."

It is suggested that the members keep NAB headquarters advised of any steps taken by manufacturers or artists respecting the broadcasting of records.

FCC STANDARD BROADCAST RULES

Inquiries have been received respecting the interpretation of Rule 3.90(a)(2) of the Rules Governing Standard Broadcast Stations, which become generally effective August 1. The Rule is as follows:

> "3.90. *Logs*. The licensee of each broadcast station shall maintain program and operating logs and shall require entries to be made as follows:
>
> "(a) In the program log.
>
> "(2) An entry briefly describing each program broadcast, such as 'music,' 'drama,' 'Speech,' etc., together with the name or title thereof, and the sponsor's name, with the time of the beginning and ending. If a mechanical record is used, the entry shall show the exact nature thereof such as 'record,' 'transcription,' etc., together with the name or title of each, and the time it is announced as a mechanical record. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered."

The second sentence of the Rule with respect to transcription and phonograph record programs is the portion which apparently needs clarifying. An official ruling has been requested from the FCC which we hope will be available for publication in the NAB REPORTS next week.

BILL TO CURB GOVERNMENT AGENCIES

The bill introduced by Senator Logan (D-Ky). and advocated by the American Bar Association which would curb the powers of quasi-judicial federal agencies, such as the Federal Communications Commission, the Federal Trade Commission and others, was approved by the Senate on July 18. The proposed law is opposed by the government agencies as well as the Department of Justice, and an effort is being made by Administration leaders to have the bill reconsidered. The proposed law would impose a mandatory obligation upon federal courts to set aside decisions, rulings and orders of administrative agencies on any of the following grounds: (1) if the findings of fact were "clearly erroneous"; (2) if the findings of fact were not supported by "substantial evidence"; (3) if the decision was not supported by the findings of fact; (4) if the decision was issued without "due notice" and a "reasonable opportunity" for the aggrieved parties to have "a full and fair hearing"; (5) if the decision was "beyond the jurisdiction" of the agency; (6) if the decision infringes the Constitution or statutes of the United States, and (7) if the decision is "otherwise contrary to law."

NEW LEGISLATION

CONGRESS

H. R. 7188 (Mr. Cochran, D., Mo.) COMMUNICATIONS ACT—To abrogate FCC Rule 42.03(a), adopted by FCC May 23, 1939, requiring international broadcast stations to limit programs to those which reflect the culture of the United States and promote international good will, understanding and cooperation, and to prohibit FCC adopting any similar rule. Referred to Interstate and Foreign Commerce Committee.

H. R. 7192 (Mr. Fay, D., N. Y.) PATENTS—To provide for the compulsory granting of licenses under patents which are brought by competitors within a single control in order to dominate an industry. Referred to Patents Committee.

FREE OFFERS

Recent attempts to obtain free time for commercial purposes called to the NAB's attention:

The American Can Company—"A series of noncommercial, educational recordings" for "use in conjunction with their food programs."

Hal Roach Studios, Inc.—"An entirely new transcribed program of Hollywood happenings . . . talks with the stars and featured players appearing in productions currently before the cameras at our studio."

The American Golf Institute ("Founded and conducted by A. G. Spaulding and Bros.")—Question and answer quiz on golf including two plugs for Spaulding, manufacturers and retailers of golf equipment.

Ringling Brothers–Barnum and Bailey Combined Shows, Inc.—"One or more transcriptions prepared by the Educational Department of Ringling Brothers and Barnum & Bailey Circus." (Note: Circus offers passes as a reward for the use of these).

"Your Life" Magazine (Amy Vanderbilt)—Excerpts from an article in August issue, about blondes vs. brunettes.

FCC MONITORING STATION

Senate Bill 2611 authorizing the purchase of a site and erection of a building in Massachusetts for use as a FCC radio-monitoring station with an appropriation of $30,000 was approved this week by the Senate. A similar bill is pending in the House.

The bill provided "that the Federal Communications Commission be, and it is hereby, authorized to purchase for the United States a suitable site in the State of Massachusetts, provided a suitable site now owned by the Government is not available for the purpose, and cause to be erected thereon, according to plans and specifications to be approved by it, a suitable building or buildings, for use as a radio-monitoring station, or to modify or reconstruct existing buildings of facilities on such site for such purpose, and to provide the necessary associated antenna systems, roadways, power, water, and sanitary facilities, including necessary outfits, apparatus, and equipment at a total cost of said site, buildings, and equipment of not to exceed $30,000."

BROADCAST MEASUREMENTS

During the month of June experts of the Federal Communications Commission measured 701 broadcast stations leaving 69 not measured.

Of this number 629 showed a maximum deviation within 0-10 cycles; 64 a deviation within 11-25 cycles; 5 a deviation within 26-50 cycles and 3 stations having a maximum deviation of over 50 cycles.

778 STATIONS

During the month of June, the Federal Communications Commission granted permits for the construction of five new stations. A comparative table by months follows:

	Jan. 1	*Feb. 1*	*Mar. 1*	*April 1*	*May 1*	*June 1*	*July 1*
Operating stations . . .	722	727	729	732	734	735	735
Construction permits . . .	42	39	37	37	38	38	43
Total . .	764	766	766	769	772	773	778

ALLOCATION OF FACILITIES

Sec.
3.21 Three classes of standard broadcast channels.
  (a) Clear channel.
  (b) Regional channel.
  (c) Local channel.
3.22 Classes and power of standard broadcast stations.
  (a) Class I station.
  (b) Class II station.
  (c) Class III station.
    (1) Class III–A station.
    (2) Class III–B station.
  (d) Class IV station.
3.23 Time of operation of the several classes of stations.
3.24 Broadcast facilities; showing required.

FREQUENCY ALLOCATIONS BY CLASSES OF STATIONS

3.25 Clear channels; class I and II.
3.26 Regional channels; class III–A and III–B.
3.27 Local channels; class IV.
3.28 Assignment of stations to channels.
3.29 Assignment of class IV stations to regional channels.
3.30 Station location.
3.31 Authority to move main studio.
3.32 Special experimental authorizations.
3.33 Directional antenna; showing required.
3.34 Normal license period.

EQUIPMENT

3.41 Maximum rated carrier power; tolerances.
3.42 Maximum rated carrier power; how determined.
3.43 Changes in equipment; authority for.
3.44 Other changes in equipment.
3.45 Radiating system.
3.46 Transmitter.

TECHNICAL OPERATION

3.51 Operating power; how determined.
3.52 Operating; indirect measurement.
3.53 Application of efficiency factors.
3.54 Operating power; direct measurement.
3.55 Modulation.
3.56 Modulation; data required.
3.57 Operating power; maintenance of.
3.58 Indicating instruments.
3.59 Frequency tolerance.
3.60 Frequency monitor.
3.61 New equipment; restrictions.
3.62 Automatic frequency control equipment; authorization required.
3.63 Auxiliary transmitter.
3.64 Duplicate main transmitters.

OPERATION

3.71 Minimum operating schedule.
3.72 Operation during experimental period.
3.73 Specified hours.
3.74 Sharing time.
3.75 Sharing time; equivalence of day and night hours.
3.76 Sharing time; experimental period.
3.77 Sharing time; departure from regular schedule.
3.78 Sharing time station; notification to Commission.
3.79 License to specify sunset hours.
3.80 Secondary station; filing of operating schedule.
3.81 Secondary station; failure to reach agreement.
3.82 Departure from schedule; material violation.
3.83 Local standard time.
3.84 Daylight saving time.
3.85 Changes in time; agreement between licensees.
3.86 Local standard time; license provisions.
3.87 Station license; posting of.
3.88 Licensed operator required.
3.89 Licensed operator; other duties.
3.90 Logs.
3.91 Logs; retention of.
3.92 Station identification.
3.93 Mechanical reproductions.
3.94 Rebroadcast.

BROADCASTS BY CANDIDATES FOR PUBLIC OFFICE

Sec.
3.101 General requirements.
3.102 Definitions.
3.103 Rates and practices.
3.104 Records; inspection.

DEFINITIONS[1]

§ 3.1 *Standard broadcast station.* The term "standard broadcast station" means a station licensed for the transmission of radiotelephone emissions primarily intended to be received by the general public and operated on a channel in the band 550 to 1600 kilocycles inclusive.*†

§ 3.2 *Standard broadcast band.* The term "standard broadcast band" means the band of frequencies extending from 500 to 1600 kilocycles, inclusive, both 550 kilocycles and 1600 kilocycles being the carrier frequencies of broadcast channels.*†

§ 3.3 *Standard broadcast channel.* The term "standard broadcast channel" means the band of frequencies occupied by the carrier and two side bands of a broadcast signal with the carrier frequency at the center. Channels shall be designated by their assigned carrier frequencies. Carrier frequencies assigned to standard broadcast stations shall begin at 550 kilocycles and be in successive steps of 10 kilocycles.*†

§ 3.4 *Dominant station.* The term "dominant station" means a Class I station, as hereinafter defined, operating on a clear channel.*†

§ 3.5 *Secondary station.* The term "secondary station" means any station except a Class I station operating on a clear channel.*†

§ 3.6 *Daytime.* The term "daytime" means that period of time between 6 a. m. local standard time and local sunset.*†

§ 3.7 *Nighttime.* The term "nighttime" means that period of time between local sunset and 12 midnight local standard time.*†

§ 3.8 *Sunset.* The term "sunset" means, for each particular location and during any particular month, the average time of sunset as specified in the license of a broadcast station. (For tabulation of average sunset time for each month at various points in the United States see "Average Sunset Time".)*†

§ 3.9 *Broadcast day.* The term "broadcast day" means that period of time between 6 a. m. and 12 midnight, local standard time.*†

§ 3.10 *Experimental period.* The term "experimental period" means that period of time between 12 midnight and 6 a. m. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any standard broadcast station, on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period. No station licensed for "daytime" or "specified hours" of operation may broadcast any regular or scheduled program during this period.*†

§ 3.11 *Service areas.* (a) The term "primary service area" of a broadcast station means the area in which the ground wave is not subject to objectionable interference or objectionable fading.

(b) The term "secondary service area" of a broadcast station means the area served by the sky wave and not subject to objectionable interference. The signal is subject to intermittent variations in intensity.

(c) The term "intermittent service area" of a broadcast station means the area receiving service from the ground wave but beyond the primary service area and subject to some interference and fading.*†

§ 3.12 *Main studio.* The term "main studio" means, as to any station, the studio from which the majority of its local programs originate, and/or from which a majority of its station announcements are made of programs originating at remote points.*†

§ 3.13 *Portable transmitter.* The term "portable transmitter" means a transmitter so constructed that it may be moved about conveniently from place to place, and is in fact so moved about from time to time, but not ordinarily used while in motion. In the standard broadcast band, such a transmitter is used in making field intensity measurements for locating a transmitter site for a standard broadcast station. A portable broadcast station will not be licensed in the standard broadcast band for regular transmission of programs intended to be received by the public.*†

---

[1] Other definitions which may pertain to Standard Broadcast Stations are included in Sections 2.1 to 2.35 and the Communications Act of 1934, as amended. These sections appear as Sections 21.01 to 21.35 at 4 F.R. 2104 DI.

§ 3.14 *Auxiliary transmitter.* The term "auxiliary transmitter" means a transmitter maintained only for transmitting the regular programs of a station in case of failure of the main transmitter.*†

§ 3.15 *Combined audio harmonics.* The term "combined audio harmonics" means the arithmetical sum of the amplitudes of all the separate harmonic components. Root sum square harmonic readings may be accepted under conditions prescribed by the Commission.*†

§ 3.16 *Effective field.* The term "effective field" or "effective field intensity" is the Root-mean-square (RMS) value of the inverse distance fields at a distance of one mile from the antenna in all directions in the horizontal plane.*†

ALLOCATION OF FACILITIES

§ 3.21 *Three classes of standard broadcast channels*—(a) *Clear Channel.* A "clear channel" is one on which the dominant station or stations render service over wide areas and which are cleared of objectionable interference, within their primary service areas and over all or a substantial portion of their secondary service areas.

(b) *Regional channel.* A "regional channel" is one on which several stations may operate with powers not in excess of 5 kilowatts. The primary service area of a station operating on any such channel may be limited, as a consequence of interference, to a given field intensity contour.

(c) *Local Channel.* A "local channel" is one on which several stations may operate with powers not in excess of 250 watts. The primary service area of a station operating on any such channel may be limited, as a consequence of interference, to a given field intensity contour.*†

§ 3.22 *Classes and power of standard broadcast stations*—(a) *Class I station.* A "Class I Station" is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels, and its secondary service area free from interference, except from stations on the adjacent channel, and from stations on the same channel in accordance with the channel designation in Sec. 3.25 or in accordance with the "Engineering Standards of Allocation". The operating power shall be not less than 10 kw nor more than 50 kw (also see Sec. 3.25 (a) for further power limitation).

(b) *Class II station.* A "Class II Station" is a secondary station which operates on a clear channel (see Sec. 3.25) and is designed to render service over a primary service area which is limited by and subject to such interference as may be received from Class I stations. A station of this class shall operate with power not less than 0.25 kilowatts nor more than 50 kilowatts. Whenever necessary a Class II station shall use a directional antenna or other means to avoid interference with Class I stations and with other Class II stations, in accordance with the "Engineering Standards of Allocation."

(c) *Class III station.* A "Class III Station" is a station which operates on a regional channel and is designed to render service primarily to a metropolitan district and the rural area contiguous thereto. Class III stations are subdivided into two classes:

(1) *Class III–A station.* A "Class III–A Station" is a Class III station which operates with power not less than 1 kilowatt nor more than 5 kilowatts and the service area of which is subject to interference in accordance with the "Engineering Standards of Allocation."

(2) *Class III–B station.* A "Class III–B Station" is a Class III station which operates with a power not less than 0.5 kilowatt nor more than 1 kilowatt night and 5 kilowatts daytime and the service area of which is subject to interference in accordance with the "Engineering Standards of Allocation."

(d) *Class IV station.* A "Class IV Station" is a station operating on a local channel and designed to render service primarily to a city or town and the suburban and rural areas contiguous thereto. The power of a station of this class shall not be less than 0.1 kilowatt nor more than 0.25 kilowatt and its service area is subject to interference in accordance with the "Engineering Standards of Allocation."*†

§ 3.23 *Time of operation of the several classes of stations.*[2] The several classes of standard broadcast stations may be licensed to operate in accordance with the following:

(a) "Unlimited time" permits operation without a maximum limit as to time.

(b) "Limited time" is applicable to Class II (secondary stations) operating on a clear channel only. It permits operation of the secondary station during daytime, and until local sunset if located west of the dominant station on the channel or if located east thereof, until sunset at the dominant station, and in addition during night hours, if any, not used by the dominant station or stations on the channel.

(c) "Daytime" permits operation during the hours between 6 a. m. and average monthly local sunset. (For exact time of sunset at any location, see "Average Sunset Time.")

(d) "Sharing Time" permits operation during hours which are so restricted by the station license as to require a division of time with one or more other stations using the same channel.

(e) "Specified Hours" means that the exact operating hours are specified in the license.

(The minimum hours that any station shall operate are specified in Sec. 3.71)*†

§ 3.24 *Broadcast facilities; showing required.* An authorization for a new standard broadcast station or increase in facilities of an existing station[3] will be issued only after a satisfactory showing has been made in regard to the following, among others:

(a) That the proposed assignment will tend to effect a fair, efficient and equitable distribution of radio service among the several states and communities.

(b) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweights the need for the service which will be lost by reason of such interference. That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference, see "Engineering Standards of Allocation" and "Field Intensity Measurements in Allocation".)

(c) That the applicant is financially qualified to construct and operate the proposed station.[4]

(d) That the applicant is legally qualified. That the applicant (or the person or persons in control of an applicant corporation or other organization) is of good character and possesses other qualifications sufficient to provide a satisfactory public service.

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations herein and "Locations of Transmitters of Standard Broadcast Stations.")

(f) That the facilities sought are subject to assignment as requested under existing international agreements and the Rules and Regulations of the Commission.

(g) That the public interest convenience, and necessity will be served through the operation under the proposed assignment.*†

FREQUENCY ALLOCATIONS BY CLASSES OF STATIONS

§ 3.25 *Clear channels; class I and II.* The frequencies in the following tabulation are designated as clear channels and assigned for use by the classes of stations as given:

(a) To each of the channels below there will be assigned one Class I station and there may be assigned one or more Class II stations operating limited time or daytime only: 640, 650, 660, 670, 700, 720, 740, 750, 760, 770, 800, 810, 820, 830, 850, 860, 870, 980, 990, 1000, 1070, 1090, 1130, 1150, 1170 and 1190 kilocycles. The power of the Class I stations on these channels shall not be less than 50 kw.

(b) To each of the channels below there may be assigned Class I and Class II stations: 680, 710, 790, 970, 1020, 1040, 1050, 1060, 1080, 1100, 1110, 1140, 1160, 1180, 1460, 1470, 1480, and 1490 kilocycles.*†

§ 3.26 *Regional channels; class III–A and III–B.* The following frequencies are designated as regional channels and are assigned for use by Class III–A and Class III–B stations: [5] 550, 560, 570, 580 590, 600, 610, 620, 630, 780, 880, 890, 900, 920, 930, 940, 950, 1010, 1120, 1220, 1230, 1240, 1250, 1260, 1270, 1280, 1290, 1300, 1320, 1330, 1340, 1350, 1360, 1380, 1390, 1400, 1410, 1430, 1440, 1450, 1530, and 1550, kilocycles.*†

---

[2] Formal application required for change in time of operation of existing broadcast station. See "Standards of Good Engineering Practice" for form number (to be published at a later date).

[3] Formal application required. See "Standards of Good Engineering Practice" for form number.

[4] See "Money Required to Construct and Complete Electrical Tests of Stations of Different Classes and Powers."

[5] See Sec. 3.29 in regard to assigning Class IV stations to regional channels.

§ 3.27 *Local channels; class IV.* The following frequencies are designated as local channels and are assigned for use by Class IV stations: 1200, 1210, 1310, 1370, 1420, and 1500 kilocycles.*†

§ 3.28 *Assignment of stations to channels.* The individual assignments of stations to channels shall be made in accordance with the standards of good engineering practice prescribed and published from time to time by the Commission for the respective classes of stations involved. (For determining objectionable interference See "Engineering Standards of Allocation" and "Field Intensity Measurements in Allocation", Section C.)*†

§ 3.29 *Assignment of Class IV stations to regional channels.* On condition that interference will not be caused to any Class III station. and that the channel is used adequately and properly for Class III stations and subject to such interference as may be received from Class III stations, Class IV stations may be assigned to regional channels.*†

§ 3.30 *Station location.* (a) Each standard broadcast station shall be considered located in the state and city where the main studio is located.

(b) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the city in which the main studio is located, in accordance with the "Standards of Good Engineering Practice," prescribed by the Commission.*†

§ 3.31 *Authority to move main studio.* The licensee of a standard broadcast station shall not move its main studio outside the borders of the city, State, district, Territory, or possession in which it is located without first making written application[7] to the Commission for authority to so move, and securing written permission for such removal. A licensee need not obtain permission to move the main studio from one location to another within a city or town, but shall promptly notify the Commission of any such change in location.*†

§ 3.32 *Special experimental authorizations.* (a) Special Experimental Authorizations[6] may be issued to the licensee of a standard broadcast station in addition to the regular license upon proper application therefor[7] and satisfactory showing in regard to the following, among others:

(1) That the applicant has a program of research and experimentation which indicates reasonable promise of contribution to the development and practical application of broadcasting, and will be in addition to and advancement of the work that can be accomplished under its regular license.

(2) That the experimental operation and experimentation will be under the direct supervision of a qualified engineer with an adequate staff of engineers qualified to carry on the program of research and experimentation.

(3) That the public interest, convenience and necessity will be served by granting the authorization requested.

(b) In case of Special Experimental Authorization permits additional hours of operation, no licensee shall transmit any commercial or sponsored program or make any commercial announcement during such time of operation. In case of other additional facilities, no additional charge shall be made by reason of transmission with such facilities.

(c) A Special Experimental Authorization will not be extended after the actual experimentation is concluded.

(d) The program of research and experimentation as outlined in the application for a special experimental authorization shall be adhered to in the main unless the licensee is authorized to do otherwise by the Commission.

(e) The Commission may require from time to time a broadcast station holding such experimental authorization to conduct experiments that are deemed desirable and reasonable.

(f) A supplemental report shall be filed with and made a part of each application for an extension of a special experimental authorization and shall include statements of the following:

(1) Comprehensive summary of all research and experimentation conducted.

(2) Conclusions and outline of proposed program for further research and development.

(3) Comprehensive summary and conclusions as to the social and economic effects of its use.

§ 3.33 *Directional antenna; showing required.* (a) No application for authority to install a directional antenna[8] will be accepted unless a definite site and full details of the design of the directional antenna are given with the application. (See "Data Required with Applications Involving Directional Antenna Systems.")

(b) No application for an authorization to operate a directional antenna during the broadcast day will be accepted unless proof of performance of the directional antenna taken during equipment test period is submitted with the application. (See "Field Intensity Measurements in Allocation," Section B.)* †

§ 3.34 *Normal license period.* All standard broadcast station licenses will be issued so as to expire at the hour of 3 a. m., Eastern Standard Time and will be issued for a normal license period of one year, expiring as follows:

(a) For stations operating on the frequencies 640, 650, 660, 670, 680, 700, 710, 720, 740, 750, 760, 770, 790, 800, 810, 820, 830, 850, 860, 870, 970, 980, 990, 100, 1020, 1040, 1050, 1060, 1070, 1080, 1090, 1100, 1110, 1130, 1140, 1150, 1160, 1170, 1180, 1190, 1460, 1470, 1480, 1490 kilocycles February 1.

(b) For stations operating on the frequencies 550, 560, 570, 580, 590, 600, 610, 620, 630, 780, 880, 890, 900, and 920 kilocycles April 1.

(c) For stations operating on the frequencies 930, 940, 950, 1010, 1120, 1220, 1230, 1240, 1250, 1260, 1270, 1280, and 1290 kilocycles June 1.

(d) For stations operating on the frequencies 1300, 1320, 1330, 1340, 1350, 1360, 1380, 1390, 1400, 1410, 1430, 1440, 1450, 1530, and 1550 kilocycles August 1.

(e) For stations operating on the frequencies 1200, 1210, and 1310 kilocycles October 1.

(f) For stations operating on the frequencies 1370, 1420, and 1500 kilocycles December 1.* †

EQUIPMENT

§ 3.41 *Maximum rated carrier power: tolerances.* The maximum rated carrier power of a standard broadcast transmitter shall not be less than the authorized power nor shall it be greater than the value specified in the following table:

Class of station	Maximum power authorized to station	Maximum rated carrier power permitted to be installed[1] *Watts*
Class IV	100 or 250 watts	250
Class III	500 or 1,000 watts	1,000
	5,000 watts	5,000
Class II	250, 500 or 1,000 watts	1,000
	5,000 or 10,000 watts	10,000
	25,000 or 50,000 watts	50,000
Class I	10,000 watts	10,000
	25,000 or 50,000 watts	50,000

[1] The maximum rated carrier power must be distinguished from the operating power. (See Secs. 2.18 and 2.19, which appear as Secs. 21.18 and 21.19 at 4 F.R. 2105 DI.)

*†

§ 3.42 *Maximum rated carrier power; how determined.* The maximum rated carrier power of a standard broadcast transmitter shall be determined as the sum of the applicable power ratings of the vacuum tubes employed in the last radio stage.

(a) The power rating of vacuum tubes shall apply to transmitters employing the different classes of operation or systems of modulation as specified in "Power Rating of Vacuum Tubes," prescribed by the Commission.

(b) If the maximum rated carrier power of any broadcast transmitter, as determined by paragraph (a) of this section, does not give an exact rating as recognized by the Commission's plan of allocation, the nearest rating thereto shall apply to such transmitter.

(c) Authority will not be granted to employ, in the last radio stage of standard broadcast transmitter, vacuum tubes from a manufacturer or of a type number not listed until the manufacturer's rating for the class of operation or system of modulation is submitted to and approved by the Commission. These data must be supplied by the manufacturer in accordance with "Requirements for the Approval of the Power Rating of Vacuum Tubes," prescribed by the Commission.* †

§ 3.43 *Changes in equipment; authority for.* No licensee shall change, in the last radio stage, the number of vacuum tubes to vacuum tubes of different power rating or class of operation, nor shall it change system of modulation without the authority of the Commission.[9] *

---

[6] Special authorizations which do not involve experimental operation may be granted pursuant to § 15.15 (3 F.R. 2836 DI).

[7] Formal application required. See "Standards of Good Engineering Practice" for form number.

[8] Formal application required. See "Standards of Good Engineering Practice" for form number.

§ 3.44 *Other changes in equipment.* Other changes except as provided for in these Rules or "Standards of Good Engineering Practice," prescribed by the Commission, which do not affect the maximum power rating or operating power of the transmitter or the operation or precision of the frequency control equipment may be made at any time without authority of the Commission but in the next succeeding application for renewal of license such changes which affect the information already on file shall be shown in full.* †

§ 3.45 *Radiating system.* (a) All applicants for new, additional, or different broadcast facilities and all licensees requesting authority to move the transmitter of an existing station shall specify a radiating system the efficiency of which complies with the requirements of good engineering practice for the class and power of the station. (Also see "Use of Common Antenna by Standard Broadcast Stations or Another Radio Station.")

(b) The Commission will publish from time to time specifications deemed necessary to meet the requirements of good engineering practice. (See "Minimum Antenna Heights or Field Intensity Requirements" and "Field Intensity Measurements in Allocation," Section A.)

(c) No broadcast station licensee shall change the physical height of the transmitting antenna, or supporting structures, or make any changes in the radiating system which will measurably alter the radiation patterns except upon written application to and authority from the Commission.[10]

(d) The antenna and/or supporting structure shall be painted and illuminated in acordance with the specifications supplied by the Commission pursuant to Section 303(q) of the Communications Act of 1934, as amended. (See "Standard Lamps and Paints.")

(e) The simultaneous use of a common antenna or antenna structure by two standard broadcast stations or by a standard broadcast station and a station of any other class or service will not be authorized unless both stations are licensed to the same licensee. (See "Use of Common Antenna by Standard Broadcast Stations or Another Radio Station.")*†

§ 3.46 (a) *Transmitter.* The transmitter proper and associated transmitting equipment of each broadcast station shall be designed, constructed, and operated in accordance with the standards of good engineering practice in all phases not otherwise specifically included in these regulations.

(b) The transmitter shall be wired and shielded in accordance with good engineering practice and shall be provided with safety features in accordance with the specifications of Article 810 of the current National Electrical Code as approved By the American Standards Association.

(c) The station equipment shall be so operated, tuned, and adjusted that emissions are not radiated outside the authorized band[11] which cause or which, in accordance with the Standards of Good Engineering Practice, are considered as being capable of causing interference to the communications of other stations. The spurious emissions, including radio frequency harmonics and audio frequency harmonics, shall be maintained at as low level as required by good engineering practice. The audio distortion, audio frequency range, carrier hum, noise level, and other essential phases of the operation which control the external effects shall at all times conform to the requirements of good engineering practice.

(d) Whenever, in this rule, the term "good engineering practice" is used, the specifications deemed necessary to meet the requirements thereof will be published from time to time. (See "Construction, General Operation and Safety of Life Requirements.")*†

TECHNICAL OPERATION

§ 3.51 *Operating power; how determined.* The operating power of each standard broadcast station shall be determined by:

(a) Direct measurement of the antenna power in accordance with Sec. 3.54[12]

(1) Each new standard broadcast station.

(2) Each existing standard broadcast station after July 1, 1940.

(b) Indirect measurement by means of the plate input power to the last radio stage on a temporary basis in accordance with Secs. 3.52 and 3.53.

(1) In the case of existing standard broadcast stations and pending compliance with paragraph (a) (2) of this section.

(2) In case of an emergency where the licensed antenna has been damaged or destroyed by storm or other cause beyond the control of the licensee or pending completion of authorized changes[13] in the antenna system.

(c) Upon making any change[13] in the antenna system, or in the antenna current measuring instruments, or any other change which may change the characteristics of the antenna, the licensee shall immediately make a new determination of the antenna resistance (see Sec. 3.54) and shall submit application for authority to determine power by the direct method on the basis of the new measurement.*†

§ 3.52 *Operating power: indirect measurement.* The operating power determined by indirect measurement from the plate input power of the last radio stage is the product of the plate voltage (E_p), the total plate current of the last radio stage (I_p) and the proper factor (F) given in the following tables:

that is

$$\text{Operating power} = E_p \times I_p \times F$$

A. Factor To Be Used for Stations Employing Plate Modulation in the Last Radio Stage

Maximum rated carrier power of transmitter:[1]	*Factor (F) to be used in determining the operating power from the plate input power*
100–1,000 watts	0.70
5,000 watts and over	.80

[1] The maximum rated carrier power must be distinguished from the operating power (See Secs. 2.18 and 2.19 which appear as Secs. 21.18 and 21.19 at 4 F.R. 2105 DI.)

B. Factor To Be Used for Stations of All Powers Using Low-Level Modulation

Class of power amplifier in the last radio stage:	*Factor (F) to be used in determining the operating power from the plate input power*
Class B	0.35
Class BC[1]	.65

[1] All linear amplifier operation where efficiency approaches that of Class C operation.

C. Factor To Be Used for Stations of All Powers Employing Grid Modulation in the Last Radio Stage

Type of tube in the last radio stage:	*Factor (F) to be used in determining the operating power from the plate input power*
Table C[1]	0.25
Table D[1]	.35

[1] See "Power Rating of Vacuum Tubes."

*†

§ 3.53 *Application of efficiency factors.* In computing operating power by indirect measurement, the above factors shall apply in all cases, and no distinction will be recognized due to the operating power being less than the maximum rated carrier power. (See "Plate Efficiency of Last Radio Stage.")*†

§ 3.54 *Operating power; direct measurement.* The antenna input power determined by direct measurement is the square of the antenna current times the antenna resistance at the point where the current is measured and at the operating frequency. Direct measurement of the antenna input power will be accepted as the operating power of the station, provided the data on the antenna resistance measurements are submitted under oath giving detailed description of the method used and the data taken. The antenna current shall be measured by an ammeter of accepted accuracy.[14] These data must be submitted to and approved by the Commission before any licensee will be authorized to operate by this method of power determination.[15] The antenna ammeter shall not be changed to one of different type, maximum reading or accuracy without the authority of the Commission. If any change is made in the antenna system or any change made which may affect the antenna system, the method of determining operating power shall be changed immediately to the indirect method. (See "Further Requirements for Direct Measurements of Power.")*†

---

[9] Formal application required. See "Standards of Good Engineering Practice" for form number.

[10] Informal application may be made, except in controversial cases or directional antenna; then formal application shall be made.

[11] See "Construction, General Operation and Safety of Life Requirements."

[12] Program tests on equipment including a new or different antenna system will not be authorized unless application for authority to determine power by the direct method has been granted or is submitted simultaneously with the application for license to cover the construction permit and the application for license will not be granted until such time as the application for direct measurement is approved.

[13] Changes shall not be made except upon making proper request and obtaining approval thereof in accordance with Secs. 3.45 and 3.58.

§ 3.55 *Modulation.* (a) A licensee of a broadcast station will not be authorized to operate a transmitter unless it is capable of delivering satisfactorily the authorized power with a modulation of at least 85 per cent. When the transmitter is operated with 85 percent modulation, not over 10 percent combined audio frequency harmonics shall be generated by the transmitter.

(b) All broadcast stations shall have in operation a modulation monitor approved by the Commission.

(c) The operating percentage of modulation of all stations shall be maintained as high as possible consistent with good quality of transmission and good broadcast practice and in no case less than 85 percent on peaks of frequent recurrence during any selection which normally is transmitted at the highest level of the program under consideration.

(d) The Commission will, from time to time, publish the specifications, requirements for approval, and a list of approved modulation monitors. (See "Approved Modulation Monitors" and also "Requirements for Approval of Modulation Monitors.")*†

§ 3.56 *Modulation: data required.* A licensee of a broadcast station claiming a greater percentage of modulation than the fundamental design indicates can be procured, shall submit full data showing the antenna input power by direct measurement and complete information, either oscillograms or other acceptable data, to show that a modulation of 85 percent or more, with not over 10 percent combined audio harmonics, can be obtained with the transmitter operated at the maximum authorized power.*†

§ 3.57 *Operating power; maintenance of.* The licensee of a broadcast station shall maintain the operating power of the station within the prescribed limits of the licensed power at all times except that in an emergency when, due to causes beyond the control of the licensee, it becomes impossible to operate with the full licensed power, the station may be operated at reduced power for a period of not to exceed 10 days, provided that the Commission and the Inspector in Charge[16] shall be notified in writing immediately after the emergency develops. (See "Operating Power Tolerance.")*†

§ 3.58 *Indicating instruments.* Each broadcast station shall be equipped with suitable indicating instruments of accepted accuracy to measure the antenna current, direct plate circuit voltage, and the direct plate circuit current of the last radio stage. These indicating instruments shall not be changed or replaced, without authority of the Commission, except by instruments of the same type, maximum scale reading, and accuracy. (See "Indicating Instruments Pursuant to Sec. 3.58.")*†

§ 3.59 *Frequency tolerance.* The operating frequency of each broadcast station shall be maintained within 50 cycles of the assigned frequency until January 1, 1940, and thereafter the frequency of each new station or each station where a new transmitter is installed shall be maintained within 20 cycles of the assigned frequency, and after January 1, 1942, the frequency of all stations shall be maintained within 20 cycles of the assigned frequency.*†

§ 3.60 *Frequency monitor.* The licensee of each standard broadcast station shall have in operation at the transmitter a frequency monitor independent of the frequency control of the transmitter. The frequency monitor shall be approved by the Commission. It shall have a stability and accuracy of at least 5 parts per million. (See "Approved Frequency Monitors" and also "Requirements for Approval of Frequency Monitors." *†

§ 3.61 *New equipment; restrictions.* The Commission will authorize the installation of new transmitting equipment in a broadcast station or changes in the frequency control of an existing transmitter only if such equipment is so designed that there is reasonable assurance that the transmitter is capable of maintaining automatically the assigned frequency within the limits specified in Sec. 3.59*†

§ 3.62 *Automatic frequency control equipment; authorization required.* New automatic frequency control equipment and changes in existing automatic frequency control equipment that may affect the precision of frequency control or the operation of the transmitter shall be installed only upon authorization[17] from the Commission. (See "Approved Equipment")*†

§ 3.63 *Auxiliary transmitter.* Upon showing that a need exists for the use of an auxiliary transmitter[18] in addition to the regular transmitter of a broadcast station, a license therefor may be issued provided that:

(a) An auxiliary transmitter may be installed either at the same location as the main transmitter or at another location.

(b) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(c) The auxiliary transmitter shall be maintained so that it may be put into immediate operation at any time for the following purposes:

(1) The transmission of the regular programs upon the failure of the main transmitter.

(2) The transmission of regular programs during maintenance or modification[19] work on the main transmitter, necessitating discontinuance of its operation for a period not to exceed five days.

(3) Upon request by a duly authorized representative of the Commission.

(d) The auxiliary transmitter shall be tested at least once each week to determine that it is in proper operating condition and that it is adjusted to the proper frequency, except that in case of operation in accordance with paragraph (c) of this section during any week, the test in that week may be omitted provided the operation under paragraph (c) is satisfactory. A record shall be kept of the time and result of each test operating under paragraph (c). Tests shall be conducted only between midnight and 9 a. m., local standard time.

(e) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by these regulations.

(f) An auxiliary transmitter which is licensed at a geographical location different from that of the main transmitter shall be equipped with a frequency control which will automatically hold the frequency within the limits prescribed by these regulations without any manual adjustment during operation or when it is being put into operation.

(g) The operating power of an auxiliary transmitter may be less than the authorized power but in no event shall it be greater than such power.*†

§ 3.64 *Duplicate main transmitters.* The licensee of a Standard Broadcast Station may be licensed for duplicate main transmitters provided that a technical need[20] for such duplicate transmitters is shown and that the following conditions are met:

(a) Both transmitters are located at the same place.

(b) The transmitters have the same power rating.

(c) The external effects from both transmitters is substantially the same as to frequency stability, reliability of operation, radio harmonics and other spurious emissions, audio frequency range and audio harmonic generation in the transmitter.*†

OPERATION

§ 3.71 *Minimum operating schedule.* Except Sundays, the licensee of each standard broadcast station shall maintain a minimum regular operating schedule of two-thirds of the total hours that it is authorized to operate during each broadcast day (both day and night), except that in an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating, the station may cease operation for a period of not to exceed 10 days, provided that the Commission and the Inspector in Charge[21] shall be notified in writing immediately after the emergency develops.*†

---

[14] See "Indicating instruments Pursuant to Sec. 3.58."

[15] Formal application required. See "Standards of Good Engineering Practice" for form number.

[16] See "Field Offices of the Commission."

[17] Formal application required. See "Standards of Good Engineering Practice" for form number.

[18] All regulations as to safety requirements and spurious emissions applying to broadcast transmitting equipment shall apply also to an auxiliary transmitter. (See "Use of Frequency and Modulation Monitors at Auxiliary Transmitter.")

[19] This includes the equipment changes which may be made without authority as set forth elsewhere in the Rules and Regulations and the Standards of Good Engineering Practice or as authorized by the Commission by letter or by construction permit. Where such operation is required for periods in excess of five days, request therefor shall be made in accordance with Sec. 15.15 (3 F.R. 2836 DI).

[20] Such as licensees maintaining 24 hour schedule and needing alternate operation for maintenance, or development work is being carried on requiring such alternate operation.

§ 3.72 *Operation during experimental period.* The license of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference. (Stations involved in the after-midnight frequency monitoring programs are notified of their operating and silent schedule.)*†

§ 3.73 *Specified hours.* If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in Secs. 3.71 and 3.72.*†

§ 3.74 *Sharing time.* If the licenses of stations authorized to share time do not specify hours of operation, the licensees shall endeavor to reach an agreement for a definite schedule of periods of time to be used by each. Such agreement shall be in writing and each licensee shall file the same in triplicate original with each application to the Commission for renewal of license. If and when such written agreements are properly filed in conformity with this rule the file mark of the Commission will be affixed thereto, 1 copy will be retained by the Commission, 1 copy forwarded to the inspector in charge, and 1 copy returned to the licensee to be posted with the station license and considered as a part thereof. If the license specifies a proportionate time division, the agreement shall maintain this proportion. If no proportionate time division is specified in the license, the licensees shall agree upon a division of time. Such division of time shall not include simultaneous operation of the stations unless specifically authorized by the terms of the license.*†

§ 3.75 *Sharing time; equivalence of day and night hours.* For the purpose of determining the proportionate division of time of the broadcast day for sharing time stations one night hour shall be considered the equivalent of two day hours.*†

§ 3.76 *Sharing time; experimental period.* If the license of a station authorized to share time does not specify the hours of operation, the station may be operated for the transmission of regular programs during the experimental period provided an agreement thereto is reached with the other stations with which the broadcast day is shared and further provided such operation is not in conflict with Sec. 3.72. Time sharing agreements for operation during the experimental period need not be submitted to the Commission.*†

§ 3.77 *Sharing time; departure from regular schedule.* Departure from the regular operating schedule set forth in a time-sharing agreement will be permitted only in cases where an agreement to that effect is reduced to writing is signed by the licensees of the stations affected thereby and filed in triplicate by each licensee with the Commission prior to the time of the proposed change. If time is of the essence, the actual departure in operating schedule may precede the actual filing of written agreement, provided appropriate notice is sent to the Commission and the Inspector in Charge.[22] *†

§ 3.78 *Sharing time station; notification to Commission.* If the licensees of stations authorized to share time are unable to agree on a division of time, the Commission shall be so notified by statement to that effect filed with the applications for renewal of licenses. Upon receipt of such statement the Commission will designate the applications for a hearing and, pending such hearing, the operating schedule previously adhered to shall remain in full force and effect.*†

§ 3.79 *License to specify sunset hours.* If the licensee of a broadcast station is required to cease operation of the station at the time of sunset at some point within the United States, the license will specify the hour of the day during each month of the license period when operation of such station shall cease. (See "Average Sunset time.")*†

§ 3.80 *Secondary station: filing of operating schedule.* The licensee of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station or stations on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return 1 copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in Sec. 3.77.*†

§ 3.81 *Secondary station; failure to reach agreement.* If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.*†

§ 3.82 *Departure from schedule; material violation.* In all cases where a station licensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the license.*†

§ 3.83 *Local standard time.* All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.*†

§ 3.84 *Daylight saving time.* If local time is changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight-saving time, and not standard time, as long as daylight-saving time is observed at such locations. This provision shall govern when the time is changed by provision of law or general observance of daylight-saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensees: *Provided, However,* That when the license specifies average time of sunset, local standard time shall be observed and in no event shall a station licensed for daytime only operate on regular schedule prior to 6 a. m. local standard time or shall a station licensed for greater daytime power than nighttime power operate with the daytime power prior to 6 a. m. local standard time.*†

§ 3.85 *Changes in time; agreement between licensees.* Where the local time is not changed from standard time to daylight-saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight-saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight-saving time is observed at the location of some of these stations.*†

§ 3.86 *Local standard time; license provisions.* The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.*†

§ 3.87 *Station license; posting of.* The station license and any other instrument of authorization or individual order concerning construction of the equipment or the manner of operation of the station shall be posted in a conspicuous place in the room in which the transmitter is located in such manner that all terms thereof are visible and the license of the station operator shall be posted in the same manner. (See Secs. 2.51 and 2.52.[23])*†

§ 3.88 *Licensed operator required.* The licensee of each station shall have a licensed operator or operators of the grade specified by the Commission on duty during all periods of actual operation of the transmitter at the place where the transmitting equipment is located. (See Sec. 2.53.[23])*†

§ 3.89 *Licensed operator; other duties.* The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such other stations: *Provided, However,* That such duties shall in no wise interfere with the proper operation of the standard broadcast transmitter.*†

§ 3.90 *Logs.* The licensee of each broadcast station shall maintain program and operating logs and shall require entries to be made as follows:

(a) In the program log,

(1) An entry of the time each station identification announcement (call letters and location) is made.

(2) An entry briefly describing each program broadcast, such

---

[21] See "Field Offices of the Commission."

[22] See "Field Offices of the Commission."

[23] Appear as Secs. 22.11, 22.12 and 22.13 at 4 F.R. 2106 DI.

as "music," "drama," "speech," etc., together with the name or title thereof, and the sponsor's name, with the time of the beginning and ending. If a mechanical record is used, the entry shall show the exact nature thereof such as "record," "transcription," etc., together with the name or title of each, and the time it is announced as a mechanical record. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered.

(3) An entry showing that each sponsored program broadcast has been announced as sponsored, paid for, or furnished by the sponsor.

(b) In the operating log.

(1) An entry of the time the station begins to supply power to the antenna, and the time it stops.

(2) An entry of the time the program begins and ends.

(3) An entry of each interruption to the carrier wave, its cause and duration.

(4) An entry of the following each 30 minutes:

(i) Operating constants of last radio stage (total plate current and plate voltage).

(ii) Antenna current.

(iii) Frequency monitor reading.

(iv) Temperature of crystal control chamber if thermometer is used.

(5) Log of experimental operation during experimental period (If regular operation is maintained during this period, the above logs shall be kept).

(i) A log must be kept of all operation during the experimental period. If the entries required above are not applicable thereto, then the entries shall be made so as to fully describe the operation.*†

§ 3.91 *Logs; retention of.* Logs of standard broadcast stations shall be retained by the licensee for a period of two years except when required to be retained for a longer period in accordance with the provisions of Sec. 2.54.*†

§ 3.92 *Station identification.* (a) A licensee of a standard broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation on the hour and half hour as provided below:

(b) Such identification announcement during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert or operatic production of longer duration than thirty minutes. In such cases the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of such program.

(c) In case of variety show programs, baseball game broadcasts, or similar programs, of longer duration than thirty minutes, the identification announcement shall be made within five minutes of the hour and half hour.

(d) In case of all other programs (except provided in paragraphs (b) and (c) of this section) the identification announcement shall be made within two minutes of the hour and half hour.

(e) In making the identification announcement, the call letters shall be given only on the channel of the station identified thereby.*†

§ 3.93 *Mechanical reproductions.* Each broadcast program consisting of a mechanical record, or a series of mechanical records, shall be announced in the manner and to the extent set out below:

(a) A mechanical record, or a series thereof, of longer duration than fifteen minutes shall be identified by appropriate announcement at the beginning of the program, at each fifteen minute interval, and at the conclusion of the program: *Provided, however,* That the identifying announcement at each fifteen minute interval is not required in case of a mechanical record consisting of a single, continuous, uninterrupted speech, play, symphony concert or operatic production of longer duration than fifteen minutes;

(b) A mechanical record, or a series thereof, of a longer duration than five minutes and not in excess of fifteen minutes shall be identified by an appropriate announcement at the beginning and end of the program;

(c) A single mechanical record of a duration not in excess of five minutes shall be identified by appropriate announcement immediately preceding the use thereof;

(d) In case a mechanical record is used for background music, sound effects, station identification, program identification (theme music of short duration), or identification of the sponsorship of the program proper, no announcement of the mechanical record is required.

(e) The exact form of the identifying announcement is not prescribed but the language shall be clear and in terms commonly used and understood by the listening public. The use of the applicable identifying words such as "a record," "a recording," "a recorded program," "a transcription," "an electrical transcription," will be considered sufficient to meet the requirements hereof. The identifying words shall accurately describe the type of mechanical record used, i. e., where a transcription is used it shall be announced as a "transcription" or an "electrical transcription" and where a phonograph record is used it shall be announced as a "record" or a "recording." *†

§ 3.94 *Rebroadcast.* (a) The term "rebroadcast" means reception by radio of the program[24] of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.[25]

(b) The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.[26]

(c) No licensee of a standard broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.[27] [28]

(d) In case of a program rebroadcast by several standard broadcast stations such as a chain rebroadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of station originating the program.

Attention is directed to Section 325 (b) of the Communications Act of 1934, which reads as follows:

"No person shall be permitted to locate, use or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there having a power output of sufficient intensity and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission upon proper application therefor."[29]*†

BROADCASTS BY CANDIDATES FOR PUBLIC OFFICE

§ 3.101 *General requirements.* No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities, provided that such licensee shall have no power of censorship over the material broadcast by any such candidate.*†

§ 3.102 *Definitions.* The following definitions shall apply for the purposes of Sec. 3.101:

(a) "A legally qualified candidate" means any person who has met all the requirements prescribed by local, state or federal authority, as a candidate for the office which he seeks, whether it be municipal, county, state, or national, to be determined according to the applicable local laws.

(b) "Other candidates for that office" means all other legally qualified candidates for the same public office.*†

§ 3.103 *Rates and practices.* The rates, if any, charged all such candidates for the same office, shall be uniform and shall not be rebated by any means, directly or indirectly; no licensee shall make any discrimination in charges, practices, regulations, facilities or services for or in connection with service rendered pursuant to these rules, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the *exclusion of other legally qualified candidates* for the same public office.*†

---

[24] As used in Sec. 3.94 "program" includes any complete program or part thereof, or any signals if other than A_3 emission.

[25] In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

[26] The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

[27] The broadcasting of a program relayed by a relay broadcast station (Sec. 4.21) is not considered a rebroadcast.

[28] Informal application may be employed.

[29] Formal application required. See "Standards of Good Engineering Practice" for form number.

§ 3.104 *Records; inspection.* Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted.*†

By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

CHAPTER III—RULES GOVERNING STANDARD BROADCAST STATIONS

The Commission, on June 23, 1939, repealed the following rules to become effective August 1, 1939:

Rule No.:	*C. F. R. Section No.*
69	30.02.
70	31.01.
71	30.01.
72–83, inclusive	30.11–30.22, inclusive.
84–91, inclusive	30.03–30.10, inclusive.
103	30.34.
113	31.10.
115–120, inclusive	31.02–31.06, inclusive.
120.1	Not codified.
121–124, inclusive	31.07–31.09, inclusive.
125–132, inclusive	32.01–32.08, inclusive.
134	33.01. 33.02. 33.03.
135	33.04.
136	33.05.
137	33.06.
139–150, inclusive	33.08–33.19, inclusive.
151–163, inclusive	34.01–34.13, inclusive.
166–168, inclusive	34.16–34.18, inclusive.
171	34.21.
172	34.30.
175–177, inclusive	34.33–34.35, inclusive.
177.1	34.36.
177.2	34.37.
178	34.38.
181	34.41.
36 (a) 1	Not codified.
36 (a) 2	Not codified.
36 (a) 3	Not codified.
36 (a) 4	Not codified.

By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

[F. R. Doc. 39-2230; Filed, June 27, 1939; 3:05 p. m.]

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The next regular meeting of the Commission will be July 26.

The following hearing is scheduled by the Commission in a broadcast case during the week beginning Monday, July 24. It is subject to change.

Monday, July 24

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—C. P., **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

September 25

NEW—Union Broadcasting Co., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.,** 500 watts, Emission A-3, unlimited, according to Rule 983(a).

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

Hearing Before Commissioner Case
Broadcast

KUMA—Albert H. Schermann, Yuma, Ariz.—Application for hearing upon Order of Revocation of License of Station KUMA. Present assignment: **1420 kc.,** 100 watts, specified hours.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

W2XUP—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted extension of special temporary authority to operate facsimile broadcast (experimental) station W2XUP on the frequency **25700 kc.** only, for the period July 17 to 3 a. m., EST, August 1, 1939, pending effective date of new frequency allocation.

W8XWJ—The Evening News Association, Detroit, Mich.—Granted extension of special temporary authority to operate high frequency broadcast (experimental) station W8XWJ on frequency **42060 kc.,** in addition to the normal licensed frequencies, for the period July 16 to 3 a. m., EST, August 1, 1939, pending definite arrangements to be made in the ultra high frequency bands.

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Granted motion to take depositions in re application of KGLO for C. P. to change frequency, power and time of operation (requesting facilities of KWLC and KGCA), and the application of KWLC, Decorah, Iowa, for renewal of license.

NEW—John R. Pepper, Greenville, Miss.—Granted petition for permission to withdraw appearance in re application of Hot Springs Broadcasting Co. for a new station in Hot Springs, Ark.

NEW—Cascade Broadcasting Co., Inc., Everett, Wash.—Granted motion to extend time for filing Proposed Findings of Fact and Conclusions in re application for new station to September 20, 1939.

KRKO—Lee E. Mudgett, Everett, Wash.; and NEW—The Everett Broadcasting Co., Inc., Everett, Wash.—Granted motion for addition of time to file Proposed Findings of Fact and Conclusions to September 20, 1939, in re applications of KRKO for C. P. to change facilities, voluntary assignment of license to Everett Broadcasting Co., and renewal of license of KRKO, and the application of Cascade Broadcasting Co., Inc., for a new station.

NEW—Harry Jackson, Harrisburg, Pa.—Granted motion to extend time for filing Proposed Findings of Fact and Conclusions in re application for C. P. for general experimental station, from July 13 to July 28, 1939.

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Granted extension of time to August 7, 1939, within which to file Proposed Findings of Fact and Conclusions in re application to move transmitter and studio to Kansas City, Kans., and Kansas City, Mo., respectively, install DA, and operate on **1220 kc.,** 1 KW, 5 KW LS, shares KFKU.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Granted special temporary authority to operate simultaneously with station KGFL from 6:45 p. m. to 7:30 p. m., MST, July 16, 1939, in order to celebrate seventh anniversary of Radio Station KICA.

W3XO—C. M. Jansky, Jr., and Stuart L. Bailey, d/b as Jansky and Bailey, Washington, D. C.—Granted extension of special temporary authority to operate high frequency broadcast station W3XO on a frequency of **43.2 mc.,** with the regular power of 1000 watts, pending effective date of new high frequency allocation, for the period July 29 to 3 a. m., EST, August 1, 1939.

WTAR—WTAR Radio Corporation, Norfolk, Va.—Granted extension of special temporary authority to operate with 5 KW power, using directional antenna, for the period July 14 to August 12, 1939, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.,** reduces power so that additional interference is not involved, or until defective directional system is corrected by installing new tuning condensers.

WNEL—Juan Piza, San Juan, P. R.—Denied special temporary authority to rebroadcast sustaining programs to be received from international broadcast stations W3XL and W3XAL over station WNEL, on a non-commercial experimental basis only, for a period not to exceed thirty days.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted extension of special temporary authority to operate simultaneously with WTAW from 8 to 9 p. m., CST, the following Mondays: July 17, 24 and 31, in order to broadcast special programs from Louisiana State University and special addresses by the president and members of the faculty of that University.

WMPC—The First Methodist Protestant Church of Lapeer, Mich.—Granted extension of special temporary authority to operate from 9 to 10 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period August 1 to 30, 1939, in order to broadcast educational programs.

W2XBT—National Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate television broadcast (experimental) station on frequency band **156-162 mc.,** for a period not to exceed 30 days pending adjustment of license to conform with provisions of Rule 43.13.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of special temporary authority to operate unlimited time on **1180 kc.,** using 10 KW, employing directional antenna system after sunset at Portland, Ore. (July, 8 p. m., PST), for the period July 22 to August 1, 1939.

KEX—Oregonian Publishing Co., Portland, Ore.—To operate unlimited time on **1180 kc.,** using 5 KW, for the period July 22 to August 1.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted extension of special temporary authority to reduce power 15 minutes earlier than specified on license when necessary to prevent interruption of continuous programs, during month of July.

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted special temporary authority to make transmitter site tests, using 100-watt portable transmitter, between the hours of 12 midnight and 6 a. m., CST, for a period not to exceed 30 days.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate from local sunset (August, 7 p. m., CST) to 11 p. m., CST, using 100 watts, on August 6, 13, 20 and 27, in order to broadcast church services. Also granted special temporary authority to operate from local sunset (August, 7 p. m., CST) to 11:05 p. m., CST, using 100 watts, August 1, War Anniversary program; August 7, 14, 21, 28, Legion programs; August 8, 15, 22, 29, Theatre of the Air; August 2, 9, 16, 23, 30, Welcome Neighbor program; August 3, 17, 24, 31, E. Texas Chamber of Commerce program; August 10, Herbert Hoover program; August 4, 11, 18, 25, Community Jamboree; August 5, 12, 19, 26, Fair program.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Granted extension of special temporary authority to operate with directional antenna, 50 KW power, from 6 a. m. to one hour before sunset, for the period July 17 to July 26, 1939, in order to make proof of performance measurements in accordance with construction permit granted November 28, 1938.

W1XO—The Travelers Broadcasting Service Corp., Portable-Mobile (area of Hartford, Conn.).—Granted C. P. for changes in equipment of relay broadcast station and decrease in power from 50 to 25 watts.

NEW—WIBX, Inc., Portable-Mobile (area of Utica, N. Y.).—Granted C. P. for new relay broadcast station to operate on **1622, 2058, 2150** and **2790 kc.,** 50 watts.

NEW—The Travelers Broadcasting Service Corp., Portable-Mobile (area of Hartford, Conn.).—Granted C. P. for new high frequency relay broadcast station to operate on frequencies **31220, 35620, 37020, 39260 kc.,** power 0.2 watts.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Granted license to cover C. P. authorizing local moxe of station, installation of new equipment, and increase in power from 500 watts to 1 KW night, 5 KW day, employing DA system for both day and nighttime operation.

WTMC—John T. Alsop, Jr., Ocala, Fla.—Granted license to cover C. P. for new station to operate on **1500 kc.,** 100 watts, unlimited time.

KDRO—Drohlich Bros., Sedalia, Mo.—Granted modification of C. P. approving transmitter and studio sites, changes in authorized equipment, and installation of vertical radiator.

WLNH—The Northern Broadcasting Co., Laconia, N. H.—Granted license to cover C. P. for new station to operate on **1310 kc.,** 100 watts, unlimited time.

WFVA—Fredericksburg Broadcasting Corp., Fredericksburg, Va.—Granted modification of C. P. approving transmitter and studio sites and installation of vertical radiator.

WMCA—Knickerbocker Broadcasting Co., Inc., New York City.—Granted authority to install automatic frequency control apparatus, auxiliary transmitter.

KVOD—Colorado Radio Corp., Denver, Colo.—Granted modification of C. P. approving transmitter site in Denver at 56th Ave. and Pecos St., installation of new equipment, and extension of commencement date to 30 days after grant and completion date to 180 days thereafter.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to rebroadcast program material over high frequency broadcast station W8XWJ to be received from relay broadcast stations W8XIG and W8XHV, in connection with National Rowing Regatta, from 12 noon to 6 p. m., EST, on July 20, 21 and 22.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Denied special temporary authority to operate simultaneously with station WAZL from 8:30 p. m., EDST, to conclusion of Philadelphia National League baseball game on July 19.

W9XZV—Zenith Radio Corp., Chicago, Ill.—Granted special temporary authority to operate a 50-watt portable television transmitter on frequency **45¼ mc.,** for the period August 1 to 30, in order to make site survey for new location of experimental television station W9XZV.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to reduce power from 1 KW to 250 watts for a period not to exceed 10 days, while rebuilding transmitter in accordance with C. P.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate simultaneously with KICA from 8 to 9 p. m., MST, on July 27, in order to broadcast State Safety Program.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of special temporary authority to operate unlimited time on **1180 kc.,** using 10 KW power, employing DA system after sunset at Portland, Ore. (August, 7:15 p. m., PST), for the period August 1 to August 30.

KEX—Oregonian Publishing Co., Portland, Ore.—To operate unlimited time on **1180 kc.,** using 5 KW, for the period August 1 to August 30.

KBTM—Regional Broadcasting Co., Jonesboro, Ark.—Granted special temporary authority to operate from 8 to 9 p. m., CST, for the period September 20 to October 1, in order to broadcast revival services of Fisher Street Church of Christ in Jonesboro, subject to compliance with Rule 15.15.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to remain silent from 7:15 to 9:15 p. m., CST, on August 1, 3, 8, 10, 15, 17, 22, 24, 29, 31, and from 8:15 p. m. to 9:15 p. m., CST, on August 2, 9, 16, 23, 30, in order to observe summer vacation.

KGGF—Hugh J. Powell, Coffeyville, Kans.—To operate on above-mentioned dates in order to permit WNAD to remain silent during summer vacation.

APPLICATIONS FILED AT FCC

570 Kilocycles

WMAM—M & M Broadcasting Co., Marinette, Wis.—Modified construction permit (B4-P-2130) for new station, requesting approval of antenna and approval of studio and transmitter sites.

580 Kilocycles

KMJ—McClatchy Broadcasting Co., Sacramento, Calif.—Extension of special experimental authority for transmission of facsimile signals from midnight to 6 a. m. for period ending 3-1-40.

710 Kilocycles

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Construction permit to make changes in directional antenna. Amended: antenna changes.

890 Kilocycles

KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—License to cover construction permit (B3-P-2318) as modified for increase in power, install directional antenna for night use and make changes in equipment.

1200 Kilocycles

WABI—Community Broadcasting Service, Bangor, Maine.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

1210 Kilocycles

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Authority to transfer control of corporation from Harry B. Greaves, T. B. Lanford, R. M. Dean, John Caruthers, to Mrs. Lucille Buford, Mrs. S. P. Ross, Sam W. Ross, and Paschal Buford, 100 shares common stock.

NEW—Yuma Broadcasting Co., Yuma, Ariz.—Construction permit for a new broadcast station to be operated on **1210 kc.**, 100 watts night, 250 watts day, unlimited time. Amended: antenna to be determined, transmitter site to be determined.

WSNJ—Eastern States Broadcasting Corp., Bridgeton, N. J.—License to cover construction permit (B1-P-2275) for new equipment, increase in power and hours of operation.

1250 Kilocycles

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—Construction permit to install new transmitter, directional antenna for night use; changes in frequency from **1250 kc.** to **710 kc.**; increase power from 1 KW night, 5 KW day, to 10 KW day and night; and move transmitter.

1260 Kilocycles

KPAC—Port Arthur College, Port Arthur, Tex.—Modified construction permit (B3-P-206) for change in frequency, hours of operation, equipment changes, installation of directional antenna for night use, and move of transmitter, further requesting changes in antenna and installation of new transmitter, extend commencement and completion dates 20 and 120 days, respectively.

1280 Kilocycles

WORC—Alfred Frank Kleindienst, Worcester, Mass.—License to cover construction permit (B1-P-2270) for installation of directional antenna for day and night use.

1370 Kilocycles

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Special experimental authority to operate a synchronous station using 100 watts power for regular license period, install 100-watt transmitter, studio and transmitter site to be determined.

1420 Kilocycles

KRLH—Clarence Scharbauer, Midland, Tex.—Construction permit to make changes in equipment; change power and hours of operation from 100 watts daytime to 100 watts night, 250 watts day, unlimited time. Amended to change from construction permit to modified license, omit request for equipment changes and request 100 watts power day and night.

1430 Kilocycles

WHP—WHP, Inc., Harrisburg, Pa.—License to cover construction permit (B2-P-2090) as modified for new equipment, directional antenna for night use, and increase in power.

1500 Kilocycles

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

MISCELLANEOUS

W1XAR—World Wide Broadcasting Corp., Boston, Mass.—Modified license to add frequency **6080 kc.** to present authorized frequencies.

W1XAR—World Wide Broadcasting Corp., Boston, Mass.—Modified license to add frequency **25600 kc.** to present authorized frequencies.

NEW—Central New York Broadcasting Corp., Portable-Mobile.—Construction permit for new relay broadcast station on **31220, 35620, 37020, 39260 kc.**, power of 12 watts, A3 Emission.

NEW—Central New York Broadcasting Corp., Portable-Mobile.—Construction permit for new relay broadcast station on **1606, 2022, 2102, 2758 kc.**, power of 12 watts, A3 Emission.

WDAC—University of Wisconsin, Portable-Mobile.—License to cover construction permit (B4-PRY-150) as modified for new relay station.

WDAC—University of Wisconsin, Portable-Mobile.—Modified construction permit (B4-PRY-150) requesting equipment changes.

W9XER—Midland Broadcasting Co., Inc., Kansas City, Mo.—License to cover construction permit (B4-PHB-65) for changes in equipment, move of transmitter, and increase in power (application specified **42460 kc.** as assigned under new rules).

W9XBF—WDAY, Inc., Portable-Mobile.—License to cover construction permit (B4-PRE-255) for new relay station.

NEW—Don Lee Broadcasting System, Portable-Mobile.—Construction permit for new developmental broadcast station for portable-mobile operation in Western United States on **1614, 2398, 3492.5, 4797.5, 6425, 9135, 12862.5, 17310, 23100, 31540, 35460, 39460 kc.**, 125 watts power, unlimited time A1, A3 Emission (to be used as an experimental long distance relay transmitter to feed programs to stations of the Don Lee Mutual Broadcast Systems).

W3XIS—WLBG, Inc., Mobile.—Modified license to change corporate name from WLBG, Inc., to Richmond Radio Corp.

WAHM—WLBG, Inc., Portable-Mobile.—Modified construction permit (B2-PRY-160) to change corporate name to Richmond Radio Corp.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Central States Supply Company—Use of lottery methods in the sale of fishing tackle, silverware, rifles, radios, cups, blankets, and other articles is alleged in a complaint issued against Rose Greenberg, trading under the name of Central States Supply Company, 537 South Dearborn St., Chicago. The respondent is alleged to have furnished others with push cards for use in the sale of her merchandise to ultimate consumers. (3845)

House of Royalsun—False representations in the sale and distribution of various grades and types of textile fabrics and knitting yarns are alleged in a complaint issued against Samuel R. Israel and Al Goldstein, trading as House of Royalsun, 25 Essex St., New York.

The complaint alleges that the respondents have falsely represented the constituent fiber or material of their products by means of labels and in advertisements, and by failing to disclose the rayon content of certain of their products; that they have falsely represented that purchasers of their products received certain discounts or savings, and that they have falsely represented that they employed one of the foremost authorities in the East on mail-order instructions and fashion designs, whose services were available to the respondents' customers.

The respondents are also alleged to have falsely represented that they maintain a separate unit in their organization for blocking and cleaning garments; that this unit is operated by experts; that the respondents' plant is equipped to specialize in such work, and that this branch of the business is on a non-profit basis, being operated solely as a service for their customers. (3849)

Inland Sales Corporation—Use of lottery methods in the sale of sports jackets, pens, pencils and other articles is alleged in a complaint issued against A. Laskey, J. Samuels and J. P. Sheehan, trading as Inland Sales Corporation, 1719 W. Division St., Chicago.

The respondents are alleged to have distributed to the purchasing public push cards for use in the sale of their merchandise to ultimate consumers. (3846)

Landon & Warner Company—See Purity Products Company.

Penn Products—See Dr. Ron-al Medicine Company.

Dr. Penn's Products Company—See Dr. Ron-al Medicine Company.

Purity Products Company—False advertising in the sale and distribution of "Wheatol", claimed to contain Vitamin E, is alleged in a complaint issued against Willard C. and Maude B. McAhren, trading under the name of Purity Products Company, 801 Bluff Road, Sioux City, Iowa, and Landon & Warner Company, 360 North Michigan Ave., Chicago, advertising agents for Willard C. and Maude B. McAhren.

The complaint alleges that the respondents have made, directly or by implication, the following misleading representations: that impairment of youthful vigor, vitality and general well-being in men up to and considerably over 50 years of age is due to an inadequate supply of Vitamin E and can be averted or delayed by the use of Wheatol, and that, in women, inability to bear children successfully after conception is due to a deficiency of Vitamin E and will be remedied by the use of Wheatol. (3847)

Dr. Ron-al Medicine Company—A complaint has been issued against Irving Sofronski, trading as Dr. Ron-al Medicine Company, Dr. Penn's Products Company, and Penn Products, 7342 Ogontz Ave., Philadelphia, alleging dissemination of false advertisements concerning "Dr. Ron-al's Relief Compound", represented as a remedy for delayed menstruation.

This is the second Commission complaint in a series of seven cases in which preliminary injunctions were recently granted by the Federal courts on petition of the Federal Trade Commission prohibiting dissemination of advertisements which represent certain preparations of this character as being safe, competent and scientific treatments for delayed menstruation and as having no ill effects, and which fail to reveal that the use of such preparations under conditions as prescribed in the advertisements, or under customary and usual conditions, may result in serious injury to the health of users. The injunctions remain in effect until final disposition of the Commission's complaints under the Federal Trade Commission Act.

The Commission's complaint in the Sofronski case alleges that the respondent's product does not, as advertised, accomplish results without pain or delay; that its use under certain conditions may result in gastro-intestinal disturbances leading to excessive uterine hemorrhage, and when used to interfere with the normal course of pregnancy, may cause septicemia. The complaint further alleges that use of the respondent's preparation is a menace to the health and life of pregnant women. (3848)

CEASE AND DESIST ORDERS

The commission has issued the following cease and desist orders:

American Memorial Company, 2135 Piedmont Road, Atlanta, Ga., was ordered to discontinue misleading representations in the sale of granite or marble monuments, tombstones or footstones.

The Commission finds that monuments which the respondent represents as being "everlasting" are not everlasting; that stones represented as weighing 400 pounds weighed substantially less than that amount; that the respondent was not the manufacturer of its granite tombstones as advertised, and that representations that purchases made through the respondent eliminate profits of the middleman were misleading.

The order prohibits representations that the respondent's monuments, tombstones, or footstones are everlasting; that its monuments or tombstones weigh 400 pounds or any specified weight until that is a fact; that the respondent manufactures its granite monuments or tombstones, and that it has posted a bond guaranteeing the quality of its products. (3369)

Hart, Schaffner & Marx, 36 South Franklin St., Chicago, and its subsidiary, Wallach's, Inc., Fifth Ave. and 33rd St., New York, were ordered to discontinue misleading representations in the sale of men's clothing.

The order prohibits use by the respondents of the unqualified word "Silk" or "Silkool", or similar words, to designate fabrics which are not composed wholly of unweighted silk, except that in the case of a fabric or product composed in part of unweighted silk and in part of other materials, such descriptive words may be used as descriptive of the silk content if conspicuously accompanied by other words accurately designating each constituent fiber or material in the order of its predominance by weight, beginning with the largest single constituent.

The order also forbids the advertisement or sale of men's clothing composed wholly or partly of rayon without clear disclosure of the rayon composition, and where such clothing is composed in part of rayon and in part of other fibers, such fibers, including the rayon, shall be named in the order of their predominance by weight, beginning with the largest single constituent. (3560)

Interstate Premium Novelty Company—See Schall Candy Company.

Monica M. Rock, individually and as executrix of the estate of Dr. Arthur A. Rock, Milwaukee, has been ordered to discontinue misleading representations in the sale of medicinal preparations for treating goiter.

The Commission finds that tablets and an ointment sold by the respondent are not a scientific, efficacious, safe and proper treatment for any type of goiter, nor do they have any therapeutic value; that, contrary to the respondent's representations, medication is not a proper and efficacious treatment for all types of goiter, surgery being the only effective remedy in some types; that the respondent cannot accurately diagnose cases of goiter from answers submitted by patients on the question blanks furnished by the respondent, and that the respondent, has not successfully treated and cannot successfully treat goiter my mail. (2509)

Schall Candy Company—Orders have been issued to a Clinton, Iowa, candy distributor and a Brooklyn, N. Y., dealer in novelty articles prohibiting the use of lottery devices in the sale of their merchandise to ultimate consumers.

The Schall Candy Co., Clinton, Iowa, was found to sell to wholesale dealers, jobbers and retail dealers, certain assortments of candy so packed and assembled as to involve the use of lottery schemes when so sold and distributed to consumers.

The Commission ordered the Schall Candy Co. to cease and desist from supplying others with candy assortments or other merchandise, together with push or pull cards, punch boards or other lottery devices which may be used in selling or distributing such candy or merchandise; supplying lottery devices, either with assortments of candy or other merchandise, or separately, which devices may be used in selling or distributing such candy, or other merchandise, and selling or otherwise disposing of merchandise by the use of such devices.

Max Bergman, trading as Interstate Premium Novelty Company, 700 Glenmore Ave., Brooklyn, N. Y., was found to sell articles such as dresser sets, watches, bedspreads, quilts, cameras, dolls, kitchenware, silverware, razors, razor blades, fountain pen and pencil sets, jewelry, cigarette lighters, cosmetics, pocketknives, mirrors, men's and women's clothing, and other merchandise, through agents, who were supplied with pull card devices for use in promoting sales to ultimate purchasers.

It was ordered that Max Bergman cease distributing lottery devices to his agents or others, to enable such persons to sell merchandise, and to cease disposing of merchandise by the use of lottery devices. (3776 and 3577)

Wallach's, Inc.—See Hart, Schaffner & Marx.

STIPULATIONS

The Commission has entered into the following stipulations:

Cary Manufacturing Company—W. Earl Cary, trading as Cary Manufacturing Company, 1116 West Washington Blvd., Los Angeles, entered into a stipulation to desist from use of the word "manufacturing" in conjunction with his trade name, or use of any word which would imply that the respondent makes the merchandise sold by him, or that he actually owns and operates or controls the plant or factory in which his merchandise is made, when in truth he is engaged only in the sale and distribution of a kitchen utensil designated "The Cary Vapor Cooker." (2486)

Commercial Silk Company—Two textile companies entered into stipulations to discontinue misleading representations.

The Commercial Silk Company, having its principal place of business in Paterson, N. J., and a manufacturing plant at Altoona, Pa., agreed, in its stipulation, to cease using the word "Silk" as part of its corporate or trade name and the term "manufacturers of silks," when actually it manufactures and sells only rayon fabrics.

Martin Weiner, trading as Martin Weiner Company, New York, stipulates that he will cease representing himself to be a manufacturer of silk or rayon or any other products when in fact he is engaged only in the sale and distribution of fabrics. (2484-2485)

Correspondence Register—Mary Lee Saltz, conducting a business in her own name and as Mary Lee's Club and as Correspondence Register, Rolla, Mo., entered into a stipulation to discontinue false and misleading representations in the sale of lists of persons wishing to correspond for social and matrimonial purposes, and memberships in a correspondence club.

In her stipulation, the respondent admitted that the price charged for membership in her club is not a "special offer," as represented in advertisements, but the regular price. She also admitted that no inquiry is made to determine the moral, business, social or financial standing of her clients; nor are records kept to indicate the outcome of the correspondence or resulting marriages for which the respondent advertises definite claims.

Under the stipulation, the respondent agreed to cease representing that any offer is "special" unless that is a fact; that club members are suited in correspondence or married within any specified time, or at all, unless supported by sufficient investigation as to actual fact; or that parties seeking correspondents are worth any specified amounts, or have any social, business or financial standing, other than that disclosed by a competent investigation. (02402)

Foster Canning Company, Inc., Glendale, Long Island, N. Y., entered into a stipulation to discontinue misrepresentations in the sale of a dog food designated "Dr. Olding."

The respondent agreed to cease use in advertising matter of the word "meat," alone or in connection with the words "food product" or with other words so as to imply that its product is composed wholly of meat, when such is not a fact.

The stipulation provides that if the preparation is composed substantially of meat and partly of other ingredients, and the word "meat" is used to describe the meat content, it shall be accompanied by other words in conspicuous type clearly indicating that ingredients other than meat are present.

The respondents also agreed to cease representing directly or by implication that its product contains more real fresh beef or meat than products of its competitors, when such is not a fact. (02487)

Mary Lee's Club—See Correspondence Register.

Martin Weiner Company—See Commercial Silk Company.

McNinch Resigns: J. L. Fly Named Successor

While no official letter of resignation and acceptance has been given out by the White House, it is understood that Chairman Frank R. McNinch has resigned and that his resignation becomes effective September 1.

James L. Fly, general counsel for the Tennessee Valley Authority, was today nominated by President Roosevelt for the unexpired term. Senate confirmation is expected before adjournment.

The new commissioner, age 41, is a native of Texas, a graduate of the Naval Academy and of Harvard Law School. He was one-time secretary to Senator Pat Harrison of Mississippi. During the Hoover administration he served as special assistant to the Attorney-General and handled several important anti-trust suits, including the Sugar Institute case in 1932. He was appointed general solicitor of the TVA in 1934 and three years later was named general counsel.

Following his anticipated confirmation by the Senate, the general opinion prevails in Washington that he will be named chairman of the Commission on September 1, when it is expected Mr. McNinch will officially relinquish his post.

On Tuesday of this week Mr. McNinch conferred with the President and later notified reporters that he told the President of his desire to retire because of ill health. Mr. McNinch

(Continued on page 3624)

COPYRIGHT DEVELOPMENTS

Music copyright continued to claim the principal interest of the broadcast industry, following the annual membership meeting of the NAB, which was concluded at Atlantic City, N. J., on July 13.

Pertinent developments were:

1. The Department of Justice has revived interest in the anti-trust suit against ASCAP instituted in the Federal District Court for the Southern District of New York, the trial of which was recessed during the fall of 1935.
2. The NAB Copyright Negotiating Committee headed by President Neville Miller and the ASCAP Committee, headed by Mr. Gene Buck, are scheduled to meet to discuss the basis for a new contract at New York on August 3.
3. Senator Wheeler, chairman of the Senate Interstate Commerce Committee, has introduced a bill in the Senate which would amend the Copyright Act of 1909 by limiting the application of the damage section to the originating station in the case of network broadcasts.
4. As Congress nears the time for adjournment interest in the resolution of adherence to the International Copyright Union was intensified.
5. All prospect for Congressional action of any kind on the so-called "compromise bill" to amend and consolidate the copyright laws during the present session vanished.

At the invitation of Senator Wheeler of Montana, a five-hour conference was held in Washington on July 12, with a view to discussing some of the problems growing out of the Montana copyright situation. In addition to Senator Wheeler, Mr. Gene Buck, president, and Mr. Frolich, general counsel of ASCAP, Mr. Ed Craney, rep-

McNINCH RESIGNS: J. L. FLY NAMED SUCCESSOR

(Continued from page 3623)

was sworn in as chairman of the FCC on October 1, 1937, filling out the unexpired term of the late Commissioner Anning Prall, who was reappointed to the Commission for a seven-year term from July 1, 1935. The appointment of Mr. Fly will be for the remainder of this unexpired seven-year term, ending July 1, 1942.

"Who's Who" reveals that Mr. Fly was graduated from the Dallas, Texas, High School and in 1920 graduated from the U. S. Naval Academy. He retired from navy service in 1923, became a law clerk and entered Harvard Law School, graduating in 1926. He was engaged in private law practice until 1929 when he became special assistant to the U. S. Attorney General, handling anti-trust suits and regulatory measures under commerce power.

In 1934 he became counsel for the Tennessee Valley Associated Cooperatives, Inc., and from here he went into his association with the TVA. He is married and the father of two children.

COPYRIGHT DEVELOPMENTS

(Continued from page 3623)

resenting Station KGIR, and Mr. Phil Loucks, representing Station KFBB, were present. As a result of the so-called Montana anti-ASCAP law and the litigation instituted in that State, ASCAP has cancelled the licenses of all Montana stations, although the networks are continuing to serve their Montana affiliates with programs. Mr. Buck explained that the Society and the NAB were holding conferences looking toward renewal of the present licenses which expire December 31, 1940, and made it clear that whatever may be the final result of these negotiations the Society in the future would issue but one form of contract for all types of stations. He said that the Society had not decided upon the form of contract that would be acceptable or the basis for compensation, but that a factual survey of the entire broadcast matter as it affected ASCAP was now under way. The results of this survey, he said, would be made available to the ASCAP and NAB Committees. No agreement was reached with respect to the Montana copyright tangle during the conference.

The question of clearing music at the point of origination was raised during the conference and later this same question was discussed at an informal conference attended by Senator Wheeler, President Miller of the NAB, Mr. Frank M. Russell, vice-president of NBC, Mr. Harry C. Butcher, vice-president of CBS, Mr. Craney and Mr. Loucks. Senator Wheeler expressed it as his feeling that legal liability for an unauthorized performance of a copyrighted musical composition ought to rest with the station originating the program in which such work was included and this aspect of the general problem was discussed in detail during the conference.

Following this conference Senator Wheeler introduced in the Senate a bill (S. 2846) which would amend Section 25, the present Copyright Law by adding after paragraph (e) the following language:

"In the case of an infringement by radio broadcasting, the liability for the use of a copyrighted work in broadcasting from and through the facilities of two or more connected stations shall rest solely with the station, person, firm, or corporation from and through whose facilities the performance, transmission, or dissemination of such copyrighted work is originated; except that the liability for the use of a copyrighted work in broadcasting by means of electrical transcriptions or other forms of recording manufactured, sold, leased, or licensed exclusively for broadcasting purposes shall rest solely with the manufacturer of such electrical transcriptions or other forms of recording."

The bill was referred to the Senate Patents Committee of which Senator Homer Bone of Washington is chairman. It is understood that Chairman Bone is favorable to the legislation but because the Congress is preparing for adjournment during the coming week, no action can be expected during the present session.

Because of the acuteness of the Montana situation, Senator Wheeler has taken an active interest in the broadcasters' copyright problem and has promised his assistance in effectuating a settlement.

After several years of inactivity the Department of Justice has revived interest in the anti-trust suit against ASCAP, and Mr. Thurman Arnold, head of the Department's Anti-trust division, has named Mr. Robert M. Cooper Special Assistant to the Attorney General to study the matter.

The NAB Copyright Negotiating Committee, headed by President Miller, and including in its membership Mr. Edward Klauber, executive vice-president of the Columbia Broadcasting System; Mr. Lenox R. Lohr, president of the National Broadcasting Company; Mr. Sam Rosenbaum, chairman of the IRNA group, and Mr. John Elmer of Station WCBM, Baltimore, will meet with the ASCAP Committee headed by Mr. Buck and including Mr. John G. Paine, general manager of ASCAP; Mr. Frolich, general counsel of ASCAP, and several members to be named will meet at New York on August 3 to continue their discussions in line with the resolution adopted by the broadcasters at their Atlantic City meeting.

All prospect for copyright legislation, and for that matter all radio legislation, vanished as Congress prepared for adjournment possibly next week. However, the resolution reported favorably by the Senate Foreign Relations Committee recommending adherence by this country to the International Copyright Convention remains on the Senate's executive calendar and might be brought before the Senate before adjournment. Much opposition has developed to this resolution although proponents of adherence are expected to press for adoption.

Another measure which might receive consideration during the dying days of the Congress is the O'Mahoney bill which would amend penalty sections of the anti-trust laws. This bill (S. 2719) which carries into effect the interim recommendations of the monopoly committee headed by Senator O'Mahoney, might have a bearing upon the ultimate result of the Government's anti-trust suit against ASCAP. A strong eleventh hour fight to secure passage of this measure is anticipated.

News About the *Code*

Copies of the Code have been sent to every member of the Congress and to key people prominent in national life. They have been asked to examine its provisions carefully and to give Headquarters the benefit of any comment or criticism they care to make.

—o—

The Code has also been sent to every major advertising agency and major advertiser, stating that it is the desire of the broadcasting industry to secure their cooperation in raising the public acceptance of radio to a new high level.

—o—

The exact date when the Code will become effective will be announced by the Board of Directors at its September meeting. Though nothing is official at this time, it is anticipated that the Board will select an early fall date. John Shepard, III, this week announced that the Yankee Network had already put the Code into effect on its stations.

—o—

Letters of commendation from civic, religious and educational groups throughout the country continue to come into Headquarters. An analysis of the editorial comment of the press is still under way. It is safe to announce at this time, however, that the overwhelming majority of press opinion is favorable to the step taken by the broadcasters in formulating a new Code and especial praise is given to the religious and controversial public issues planks.

Stations have been supplied with fifty copies of the Code; more upon request. When requested, Headquarters will send out a copy with a covering letter to local and regional advertisers not reached in the general mailing to agencies and national advertisers.

Members are requested to send out copies to all civic, educational, religious and club groups in their listening area. Copies of any pertinent comments or criticisms will be appreciated by Headquarters.

Special material, speeches, and question and answer dialogues on the Code are being prepared for the use of members.

FCC Interprets Broadcast Rule 3.90 (a) (2)

In view of inquiries respecting the meaning of Rule 3.90 (a) (2) of the Rules Governing Standard Broadcast Stations, which become generally effective August 1, an official interpretation by the FCC was requested July 21 (NAB Reports, July 21, p. 3609). The following letters were exchanged between the NAB and the FCC:

July 21, 1939

Mr. T. J. Slowie, Secretary
Federal Communications Commission
Washington, D. C.

Dear Mr. Slowie:

Please permit me to refer to rule numbered 3.90 (a) (2) of the Rules Governing Standard Broadcast Stations which were promulgated by the Commission June 23 and which become generally effective August 1, 1939. Some confusion has arisen with stations as to the information the Commission intends shall be shown on the station logs, particularly with respect to programs which are reproduced from transcriptions and phonograph records, and it will be greatly appreciated if the Commission will clarify the intent of the rule. Subsection (2) reads:

> "(2) An entry briefly describing each program broadcast, such as 'music,' 'drama,' 'speech,' etc., together with the name or title thereof, and the sponsor's name, with the time of the beginning and ending. If a mechanical record is used, the

entry shall show the exact nature thereof such as 'record,' 'transcription,' etc., together with the name or title of each, and the time it is announced as a mechanical record. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered."

The first sentence seems quite clear as applying to live talent broadcasts. To illustrate, the following would appear to be log entries which would meet the requirements of the rule: "9:00-10:00 P. M., Hit Parade, Sponsor Lucky Strike Cigarettes, Music," or "5:15-5:30 P. M., The Johnson Family, Sponsor Ramsdell Products, Drama," or "9:00-10:00 P. M., Good News of 1939, Sponsor Maxwell House Coffee, Music, Drama, Speech," or "5:00-5:15 P. M., John Smith, Democrat, Candidate for Sheriff, Speech."

The second sentence, applying to programs consisting of mechanical reproductions, is not so clear, but it would seem to intend the same type of information as is required of live talent broadcasts in addition to showing that the rendition is from a "transcription" or a "record." The words "together with the name or title of each" are subject to different interpretations depending upon the nature of the program. Where the entire program is prepared for a particular sponsor and transcribed, such as has been done in the case of the Studebaker and Chevrolet automobile companies, these words would seem to refer to the name by which that program is commonly known, such as "Studebaker Champions" or "Chevrolet Musical Moments." The proper log entry, therefore, would seem to be "5:00-5:15 P. M., Transcription, Studebaker Champions, Sponsor Studebaker Corp., Music," or, if drama also is included in the transcription, the designation would include this fact. Of course, the time at which it is announced the program is "transcribed" also must be included.

On the other hand, mechanically reproduced programs, such as the so-called "Musical Clock," which are made up either of musical selections from transcription libraries or from phonograph records, or a combination of both, interspersed with commercial announcements, present a situation in which the words "together with the name or title of each" may be construed as having an entirely different meaning, i.e., as requiring the inclusion in the log of the name of each musical selection used. However, it is assumed such an interpretation was not intended by the Commission, since there appears to be no greater reason for requiring the names of musical selections when performed from a recording than in the case of live talent broadcasts.

Am I correct, therefore, in believing that, as applied to such types of programs, the words "together with the name or title of each" likewise refer to the name of the program, such as "Musical Clock," and not to the name of each musical selection? Such an interpretation would keep the rule uniform in its application to all programs and would minimize the bulk of the log, particularly with small stations primarily dependent on recordings. With this interpretation, the following entry would seem to suffice: "8:00-9:00 A. M., Musical Clock, music-transcription, Commercial XYZ Co.; music-record, Commercial Richard Roe Co.," and so on throughout the period of the hour. Of course, the times when the program is announced as "recorded" should be designated.

In view of the fact that the rules go into effect August 1, it will be greatly appreciated if you will let me know whether the foregoing interpretations as illustrated meet the desires of the Commission, so that our members may be informed before the effective date of the rule.

With kindest personal regards, I am

Sincerely,

(Signed) Andrew W. Bennett, *Counsel.*

July 27, 1939.

Mr. Andrew W. Bennett, Counsel
National Association of Broadcasters
Normandy Building
Washington, D. C.

Dear Sir:

This will reply to your letter of July 21, 1937, in which you request an interpretation of Section 3.90(a)(2) of the Rules Governing Standard Broadcast Stations, which were promulgated by the Commission June 23, and which rule becomes effective August 1, 1939.

Your inquiry relates to the requirement of the rule that if a musical record is used, the log entry shall show the exact nature thereof, together with the name or title of the record or transcription, and you ask, first, where the entire program is prepared for a particular sponsor and transcribed, whether it will be sufficient to make a single entry covering the entire consecutive program, such as "5 to 5:15 P. M., Transcription, XYZ Musical Interlude, XYZ Corp., music." If accompanied with an indication of the time at which the announcement is made that the program is "transcribed," such an entry will be sufficient for the purposes of the rule.

Your remaining question has to do with the type of program in which individual records are played, interspersed with commercial announcements, and you ask whether an entry containing the name of the program and an indication of the commercial announcements made will be sufficient, without listing separately the titles of each one of the musical numbers played. You are informed that the Commission would not regard such an entry as in compliance with the rule, although it will permit such form of abbreviated entry from which the name of the particular record could be ascertained as broadcast stations may find it convenient to use. For example, it would be permissible to use a system of numbers corresponding to the names of the records, as long as it is possible to ascertain on inquiry the names of the records to which the key numbers refer. Also it would be permissible as an alternative to simply incorporate in the log by reference, with copy attached, any list of continuities prepared by the station in advance, containing the names of the records, to which could be added the appropriate time notation.

Very truly yours,

(Signed) John B. Reynolds, *Acting Secretary.*

It will be noted in connection with programs consisting of phonograph records and selections from transcription libraries, that the Commission states the requirement that the log contain "the name or title of each" will be met if the station's recorded library (record or transcription) file number is shown on the log so that the full title of the selection performed may be obtained by reference to the library file. In cases where the program has been prepared in advance and the names of the selections to be performed are contained in the list of continuities, the requirement may be met by referring to the list and attaching a copy thereof to the log. Appropriate time notations must be shown. In all other respects, the interpretations as submitted by the NAB were approved.

FREE OFFERS

The American Bantam Car Company of Butler, Pennsylvania, is offering radio stations a $100 credit toward the purchase of a 1939 de luxe Bantam car or truck in exchange for $100 worth of time on the stations. The credit is transferable.

Further "inducement" is made "if you can also get us a dealer in your territory, he will be given $5 in advertising for every car he takes. Your station will, of course, receive preference."

Headquarters is writing the company that such a proposition constitutes a violation of NAB member stations' business practice, and is informing them that stations will be glad to send in their rate cards and discuss program ideas which can accomplish their purpose.

NEWS SURVEY IN FORTUNE

The August 1939 issue of Fortune Magazine carries an article titled, "The Press and the People—A Survey."

The article undertakes a discussion of the historic background of the Press of the United States and reports the results of a survey of public opinion concerning news, conducted by Elmo Roper, who conducts the regular Fortune Survey.

The prominence of radio in the dissemination of news is discussed in the survey findings.

COMMISSIONER BROWN TO SPEAK

Commissioner Thad H. Brown will address the Summer School of Arts and Sciences and of Education, of Harvard University, Cambridge, Massachusetts, on August 4, 1939. Colonel Brown's speech will be delivered at the Harvard Faculty Club as a part of the concluding session of the Summer School.

NEW LEGISLATION

CONGRESS

S. 2846 (Sen. Wheeler, D. Mont.) COPYRIGHT—Provides that in network and transcription broadcasts, originating station or transcription manufacturer is solely liable for infringement. Referred to Committee on Patents.

STATE LEGISLATION

ALABAMA:

S. 264 (DeVane) RADIOS—To prohibit use for commercial purposes of radios equipped for receiving private official police calls, information or reports sent out by short wave from within this state. Referred to Education Committee.

MASSACHUSETTS:

H. Order (Mackay) RADIO—SLANDER—Requesting the Judicial Council to investigate the subject-matter of Current House document 2402, relative to slander by radio. Referred to Rules Committee.

Significant Remarks of Stahlman, Hays, Miller

On July 12, while the NAB Convention banquet was in session, the appointed leaders of the press, the motion pictures and the radio spoke from the same rostrum in a significant three-way address to the American people, for the first time in radio history.

Mr. Will Hays, president of the Motion Picture Producers and Distributors of America, Inc., spoke from Hollywood; Mr. James G. Stahlman, who has just retired as president of the American Newspaper Publishers Association, spoke from London; and Mr. Miller, who introduced them both, spoke of course from Atlantic City.

Mr. Miller stated: "The cornerstone of each industry—the press, the motion picture and the radio—is based on the constitutional guarantee of freedom of speech and freedom of the press."

Full permission is granted by Mr. Hays and Mr. Stahlman, and of course by Mr. Miller, for any use members care to make of the remarks below.

Following are the texts of the three speakers:

MR. MILLER:

(From Atlantic City)

I am delighted to bring greetings from the National Association of Broadcasters assembled in their seventeenth annual convention. We have considered many problems but the one thing we have done in which you will have the greatest personal interest is the adoption of a new code of program standards. This code will enable us to deliver to you an improved quality of broadcast service. At the same time it is a pledge of fair treatment to all. It is, in short, radio's doctrine of fair play.

Like the press and the motion picture screen, American radio is a mirror reflecting our American way of life. We are free to bring you what you want to read and to see and to hear. In America we are not forced to bring you what somebody else thinks you ought to read or to see or to hear.

We think you will be interested to know how we go about discharging these great responsibilities. We are happy, therefore, to bring you tonight the best qualified man in America to tell us of the democratic and social principles back of the motion picture screen, truly a gigantic mirror bringing so much enjoyment and so much individual enrichment to the American people: Mr. Will Hays, president of the Motion Picture Producers and Distributors of America. I take great pleasure now in presenting Mr. Hays, who will speak to you from Hollywood.

MR. HAYS:

(From Hollywood)

In his remarks, which follow in part, Mr. Hays praised the press and the radio as defenders of freedom and liberty:

The screen owes much indeed to the country of its birth and development. It is distinctively the product of the American spirit—vision, initiative, enterprise and progress. It was born in poverty, in doubt, in the courage of men. No fairy godmother of finance attended its birth. Unlike most of the arts it was not reared in patrician surroundings. It has no vested rights. It must conform to public demands, public taste, and the public's sense of decency and goodness in entertainment. It is a true child of democracy.

Today, in full vigor it recognizes its privileges and opportunities and realizes and acknowledges its responsibilities. Opportunity measures responsibility. Our association, the Motion Picture Producers and Distributors of America, came into being as an outward expression of the industry's public responsibility.

Liberty Essential

The one most necessary factor in the formula for the solution of all our problems is liberty. Destroy freedom and you destroy the possibility for men to help themselves. As long as we have our freedom we will have in our hands the opportunity, and we have the ability to solve every problem that may face us as a nation.

The only thing we have to fear as a people is the deprivation or curtailment of that liberty: freedom of thought, word, and action.

This is the liberty which self-regulation has brought to the screen and this is the right which we propose to protect. This purpose, however, is predicated first on the acknowledgement that with every right there is a corresponding duty. We do well to remember when we insist on the privilege that we are entitled to it only if we recognize and discharge the duties and responsibilities which the rights and opportunities entail.

It is indeed vastly important, if we are surely to preserve the liberties of the republic that the freedom of these instrumentalities be maintained. The immeasurable importance of this eventuality determines exactly the necessity of care on the part of those who happen to be the administrators of the use of the rights, upon their constant realization that liberty is not license. The custodians of this freedom of the screen, the press, and the radio are responsible to these media and to the great public they serve so to use the media that their freedom will be maintained.

The motion picture art-industry for its own welfare and for the maximum service it can thereby render, well intends to make its performances square with its privileges.

Nothing could be more significant of the liberty we possess in America than this occasion. These three great media of public thought and opinion, all of them the free agents of a free people, are meeting tonight in a common cause.

The very fact of their common purposes as here expressed demonstrates the principle of their existence: that liberty is not immunity, but that it is responsibility and accountability, that liberty not alone commands respect; it also demands self-respect.

For the press, liberty has ever been an obligation of honor, and truth, and courage. A free press has been always the fearless champion of liberty, the alert sentinel of the people's independence. It has maintained its place by its intelligence, by its determined courage, by its patriotism—and likewise by its self-control and its ever-present sense of responsibility.

The press, the radio, and the motion pictures have aptly been described as the "three mirrors" of the people. It is true that each reflects the ideals, the inspiration, the aspiration, the hopes, and the art and culture of the people.

Too, each reflects a composite, definite distillation of the character and the intelligence of our civilization.

To the radio—the miracle of yesterday, the delightful companion, the discriminating informant and the charming entertainer of today —we pay our sincere respects. This mighty force in America has been employed magnificently for good under the leadership which has developed it during the amazingly short time of its existence. The radio has shown its determination and its distinguished ability to progressively make itself an agency of good will, of entertainment, and of general public welfare.

MR. MILLER:

Thank you, Mr. Hays.

I certainly believe that the world-wide acceptance of the American motion picture is not only a tribute to the creative genius which produces them, but is also a tribute to our American democracy. Here talent and genius are encouraged and are not frustrated or perverted to serve the self-interest of those who would wipe out democratic principles and use every means of communication to suppress human liberties for their own selfish ends.

Making History

I am told that we are making radio history tonight. This is the first time that the radio and the motion picture and now the press have addressed you from the same radio rostrum. It is peculiarly fitting that this newest medium of communication is the medium through which this significant program is taking place. We have heard from Mr. Hays from Hollywood and now we are about to hop across the Atlantic Ocean to London, where we will hear from Mr. James G. Stahlman, publisher of *The Nashville Banner*, who has just retired as president of the American Newspaper Publishers Association. It is significant, I believe, because it marks the first time that the appointed leaders in these three fields step before you on common ground.

Mutual Foundation

The cornerstone of each industry—the press, the motion picture and the radio—is based on the constitutional guarantee of freedom of speech and freedom of press. We have but to look abroad to see what happens in the destruction of human liberties when these guarantees are taken away.

Just a few days ago, Mr. Stahlman flew to Europe on the new Clipper plane with a group of distinguished newspapermen. He has had an opportunity to learn first-hand of the condition of human liberties in the troubled countries abroad. It is a great privilege, therefore, for me to introduce to you now, Mr. James G. Stahlman, who will speak to you from London.

MR. STAHLMAN:

(From London)

Mr. Miller, Mr. Hays, members of the National Association of Broadcasters: Since "Clippering" the North Atlantic last Sunday it has been my very unusual privilege to have seen and heard many things, the full significance of which you on the other side of the water, by reason of your removal from the scene and your customary American sense of security, would regard, as I now do, with some degree of concern.

I have seen the base of the Nelson Monument plastered with posters reading, "Enroll Now." "Be Prepared." "Join Today." I have seen anti-aircraft searchlights dotting open spaces ready for duty. I have seen bomb-proof shelters being built in London's lovely parks. I have heard the roar of military planes over Britain and France in preparedness maneuvers. I have talked with men in high station, with taxi drivers, merchants, bell boys. I have sensed through it all the dogged determination of both the British and the French to preserve at whatever cost, man's most precious heritage —freedom—which only men of a democracy can appreciate and enjoy.

Freedom from what? Freedom from mental and spiritual slavery, freedom from physical imprisonment, freedom from oppression of any and every kind.

And what is all this about? It is because ideologies at variance with the concept of free constitutional government are being impressed upon helpless peoples and the rights of free men the world over are being ignored and curtailed.

With this side of the world gone haywire, you of the radio, you of the screen, and we of the press, have no higher obligation to the American people than to courageously expose and firmly oppose every effort from within or from without to encroach upon man's right to think, to speak, to worship as he pleases.

Those rights embraced in the First Amendment to the Federal Constitution were put there by men who knew the price of liberty. If they are to be preserved, the radio, the press, the screen, and every agency of mass communication must be unhampered in their ability to present the truth—the truth that makes and keeps men free. Men at times have tried to hide it; others have denied it to their fellows, and wherever such has even been temporarily successful, liberty has perished and democracy has vanished. That is at the bottom of this clash between ideologies on this side of the water.

Access to Truth

I am not worried about dictators in America so long as the people have access to the truth. Remember this, gentlemen of the radio, there is not one single law on the statute books, nor can one be enacted so long as the Constitution is the fundamental law of the land, that restricts factual expression over the radio; there must be none. Yours is the obligation to see that that can't happen there.

The press has fought for and won its freedom; it will continue to defend it. Radio must do the same. Jeopardy to one is jeopardy to the other. There must be no abridgements of the rights of the American people through encroachments upon either of our respective media of mass expression. Ours is the obligation to them, not to ourselves. So long as we respect that obligation from those from whom, after all, we derive all our rights and privileges, we need not fear restriction or censorship.

Fail to observe it, and we shall deserve to lose the thing most essential for the preservation of our democracy. That is no slight task to be regarded lightly; it is as sacred a privilege, as ever could be conferred upon you and me. It isn't simply American in its connotation; it is international.

Democracy has her back to the wall on this side of the Atlantic. The preservation of it on our own side will make certain its future over here. That is the job for radio, the press, the screen. Democracy can exist only where men have unrestricted access to the truth. I call you of the radio to that solemn task with the assurance that in the American press you have a friend and ally who knows the cost of liberty and who is willing to sacrifice to the utmost in order that it shall not perish from the earth.

Good night, gentlemen.

MR. MILLER:

Thank you, Mr. Stahlman. Your first-hand account was indeed stimulating and of great interest, particularly at a time such as this when the National Association of Broadcasters has had occasion to make a serious examination of our democratic principles from which we have been able, we believe, to build a new code which will forever insure a democratic system of American radio in service not to one man or to one group, but in service to all of the people of America.

Service to Nation

American broadcasting has completed another year of brilliant accomplishment and of striking public service. No other broadcasting service in the world even approached its record. We know this is because of those social and economic differences which distinguish the American system from that of all others. Through the American system we have been able to lavish millions of dollars on entertainment and talent for the enjoyment of the American people. We have contributed substantially to their educational, religious and cultural enrichment. And at not one cent of program cost to the listener.

More than this, we have been free to keep our countrymen informed as to what was going on in this country and in other countries. The contributions made by American broadcasters during this war-torn year, especially during the Munich crisis and during the current situation, demonstrate the blessings of our radio democracy and give promise that through such a system of radio as the American system, the peoples of the world may some day be encircled by the bonds of brotherhood and not forever enslaved in the shackles of hate.

There is more to the record of radio in the past year. Again American radio lent its great voice in the saving of human life and in the alleviation of human suffering. Especially was this true during the New England disaster when our New England stations dropped schedules and threw commercial considerations overboard to save lives, to rescue women and children from the ravages of a cruel disaster. Let it be said that our American stations were "not called upon to serve"; they were already there, ready to serve, before any one needed to "call" them.

This is in the American radio tradition.

This is the way it will always be.

This is our promise.

Thank you and good night.

BROOKLYN CASES ASSIGNED FOR REARGUMENT

The Federal Communications Commission has designated for reargument the so-called Brooklyn cases. In this connection on Thursday the Commission issued the following order:

"Upon its own motion in consideration of the above applications it is ordered this 27th day of July, 1939, that said applications be, and the same hereby are set for reargument before the Commission on October 19, 1939, at 10 a. m."

The Brooklyn cases include the Voice of Brooklyn, WLTH; United States Broadcasting Corporation, WARD; Brooklyn Broadcasting Corporation, WBBC. The case involves the modification of license in so far only as the applicant requests the facilities of WARD and WLTH.

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED FINDINGS OF FACT

The Federal Communications Commission in a Proposed Findings of Fact proposed to deny the application of the Yuba-Sutter Broadcasters for authority to construct a new station at **Marysville, California,** to use **1320 kilocycles,** 250 watts, unlimited time, using a directional antenna after local sunset.

In another Proposed Findings of Fact, the Commission proposes to grant the application of KRSC, **Seattle, Washington,** to make changes in its transmitting equipment, to move the transmitter site and increase the power of the station from 250 watts to 1000 watts, operating on **1120 kilocycles,** unlimited time.

The Commission also proposes to grant in a Proposed Findings of Fact the application of Vincennes Newspapers, Inc., to construct a new station at **Vincennes, Indiana,** to operate on **1420 kilocycles,** 100 watts, unlimited time.

The Commission proposes to deny in another Proposed Findings of Fact the application of the Thumb Broadcasting Company to erect a new station at **Brown City, Michigan,** to operate on **880 kilocycles,** 1000 watts, with hours of operation limited to daytime only.

The Commission also proposes in a Proposed Findings of Fact to grant the application of the Niagara Falls Gazette Publishing Company for the erection of a new station at **Niagara Falls, N. Y.,** to operate on **1260 kilocycles,** 1000 watts, daytime only.

DECISIONS OF COMMISSION

The Federal Communications Commission in a decision granted the application of M. L. Medley for the erection of a new station at **Cookeville, Tennessee,** to operate on **1370 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

The application of Broadcasting Station KMJ, **Fresno, California,** to permit it to install new equipment, move transmitter locally, and to increase its daytime power from 1,000 to 5,000 watts on **580 kilocycles,** was granted by the Commission.

The Commission also granted the application of WOLS of **Florence, South Carolina,** to change its hours of operation from daytime to unlimited time, with 100 watts day and night on **1200 kilocycles,** and renewed the license of the station; but denied the application of Pee Dee Broadcasting Company for a construction permit to use **1200 kilocycles,** 100 watts night, 250 watts day, unlimited time.

The application of the Mutual Broadcasting System, Inc., **Chicago,** for authority to transmit programs to broadcast stations in Canada was granted by the Commission.

The Commission granted the application of KTEM, **Temple, Texas,** to change its assignment from operating daytime only on **1370 kilocycles** with 250 watts, to unlimited hours of operation on the same frequency using 100 watts night and 250 watts day.

The application of WFBG, **Altoona, Pennsylvania,** to change its license from sharing time with WJAC, **Johnstown, Pennsylvania,** to unlimited time, operating on **1310 kilocycles,** with 100 watts, was granted by the Commission contingent upon the installation of an antenna in compliance with Rule 131.

The Commission, in a decision, denied the application of WGTM, **Wilson, North Carolina,** to make changes in composite transmitting equipment and the antenna system, and operation with 500 watts power on **1240 kilocycles,** daytime in lieu of operation with 100 watts on **1310 kilocycles,** daytime only.

The Commission granted the application of John R. Pepper to construct a new station at **Greenville, Mississippi,** to operate on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

The application of the Liberty Broadcasting Company for assignment of the license of Station WAGA, **Atlanta, Georgia,** to the Liberty Broadcasting Corporation has been granted by the Commission. The station operates on **1450 kilocycles,** 500 watts night, 1000 watts LS, unlimited time.

In a decision the Commission granted the application of the Pontiac Broadcasting Company for a construction permit for a new station at **Pontiac, Michigan,** to operate on **1100 kilocycles,** 1000 watts, daytime only. In the same decision, the Commission designated for a further hearing the application of King-Trendle Broadcasting Corporation for a construction permit for a new station also at Pontiac to operate on **1440 kilocycles,** 250 watts, unlimited time.

In this same decision, the Commission dismissed with prejudice the application of George B. Storer for a construction permit for a station at the same city to use **600 kilocycles,** 250 watts, unlimited time.

The Commission granted the application of Corn Belt Publishers, Inc., transferor, for consent to transfer control of Drovers Journal Publishing Company, licensee of Radio Station WAAF, **Chicago,** to Ralph W. Dawson, et al, transferees. The station operates on **920 kilocycles,** 1000 watts, daytime.

The Commission, in a decision, granted the application for consent to transfer the control of the Commodore Broadcasting Company, Inc., licensee of WJBL, **Decatur, Illinois,** to Decatur Newspapers, Inc. The station operates on **1200 kilocycles,** 100 watts, sharing time with WJBC.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings are scheduled to be held at the Commission during the week beginning, Monday, July 31.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

September 25

NEW—Union Broadcasting Co., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Lackawanna Broadcasting Co., Inc., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.,** 500 watts, Emission A-3, unlimited, according to Rule 983(a).

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

Hearing Before Commissioner Case

Broadcast

KUMA—Albert H. Schermann, Yuma, Ariz.—Application for hearing upon Order of Revocation of License of Station KUMA. Present assignment: **1420 kc.,** 100 watts, specified hours.

November 6

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license, **1280 kc.,** 500 watts, 1 KW LS, shares time with WCAM and WCAP. Present assignment: **1280 kc.,** 500 watts, shares time with WCAM and WCAP.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KHUB—John P. Scripps, Watsonville, Calif.—Granted modification of license to increase power and time of operation from 250 watts, daytime only, to 100 watts night, 250 watts day, unlimited time.

Columbia Broadcasting System, Inc., New York City.—Granted extension of authority to transmit programs to CFRB and CKAC and other stations under control of Canadian Broadcasting Corp.

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Granted C. P. to move transmitter site locally, install new equipment and vertical radiator, and increase power from 100 watts to 250 watts.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted C. P. to install new equipment and increase day power from 250 watts to 1 KW.

WTAW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted modification of license to omit use of time from 8 to 9 p. m. on Mondays.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted modification of license to increase time of operation from unlimited except 8 to 9 p. m. Mondays, to full unlimited time.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted extension of special experimental authority to operate simultaneously with station KRLD on **1040 kc.,** with 50 KW, for the period August 1, 1939, to February 1, 1940.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted extension of special experimental authority to operate simultaneously with station WTIC on **1040 kc.**, with 50 KW, for the period August 1, 1939, to February 1, 1940.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted extension of special experimental authority to operate on frequency **1140 kc.**, with 25 KW, unlimited time, using DA for nighttime operation, for the period ending February 1, 1940.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted modification of special experimental authority to increase power from 10 KW to 50 KW, simultaneous operation with WTIC, employing DA for day and night operation. Also granted authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted license to cover C. P. authorizing local move of transmitter site, installation of new equipment and DA for day and nighttime operation, increase in power from 10 to 50 KW, and extension of completion date.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted modification of license to change time of operation from simultaneous day, shares WILM night, to unlimited.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Granted modification of license to increase time of operation from simultaneous day, shares night with WAZL, to unlimited.

WBTH—George W. Taylor, Williamson, W. Va.—Granted consent to the transfer of control of Williamson Broadcasting Corp., licensee of WBTH, to W. P. Booker. Station operates on **1370 kc.**, 100 watts, daytime.

WALR—Donald B. Woodyard, Zanesville, Ohio.—Granted consent to transfer control of WALR Broadcasting Corp., licensee of WALR, to West Virginia Broadcasting Corp. Station operates on **1210 kc.**, 100 watts, unlimited time.

KOME—Harry Schwartz, Tulsa, Okla.—Granted voluntary assignment of license of station KOME from Harry Schwartz to Capitol Sales Corp. Station operates on **1310 kc.**, 250 watts, daytime.

WESG—Cornell University, Elmira, N. Y.—Granted extension of special experimental authority to operate on **850 kc.**, with 1 KW, from daylight to sunset at New Orleans, for the period ending February 1, 1940.

WBIL—Ared Bulova, New York City.—Granted renewal of license for the period ending February 1, 1940.

KRLH—Clarence Scharbauer, Midland, Tex.—Granted modification of license to increase time of operation from daytime only to unlimited.

KIEV—Cannon System, Ltd., Glendale, Calif.—Granted renewal of license on a temporary basis only for a period of 90 days (Commissioner Craven voting "No"). The Commission will inquire into differences between promised program service and the service rendered.

W4XCA—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1940.

NEW—The National Life and Accident Ins. Co., Inc., Nashville, Tenn.—Granted license for new facsimile broadcast station on an experimental basis only, frequency **25250 kc.**, 1 KW.

WDEV—Radio Station WDEV, Waterbury, Vt.—Granted modification of license to increase day power from 500 watts to 1 KW.

National Broadcasting Co., Inc., New York City.—Granted extension of authority to transmit programs to CMX, Havana, Cuba, via RCA Communications, Inc., originating in NBC's New York studios, or any points in the U. S. where networks programs may originate, to CMX, Havana, Cuba.

NEW—A. H. Belo Corp., Dallas, Tex.—Granted license for new facsimile broadcast station on an experimental basis, to use frequency **25250 kc.**, 1 KW.

KEUB—Sam G. Weiss, Price, Utah.—Granted authority to transfer control of Eastern Utah Broadcasting Co. (licensee of KEUB) to Jack Richards and A. W. McKinnon, 5542 shares of the issued and outstanding common stock of licensee corporation, for a consideration of $6,500.

KTAT—Raymond E. Buck, Fort Worth, Tex.—Granted authority to transfer all of the outstanding common stock of the Tarrant Broadcasting Company, licensee of station KTAT, to Ruth G. Roosevelt (contingent upon the surrender of license for station KFJZ, Fort Worth, Tex.), for a consideration of $101,570.76 cash.

KROW—H. P. Drey, S. L. Brevitt, R. E. Morgan, Chas. Martin, C. V. Knemeyer, acting on their behalf and as representatives of owners of 95 per cent of stock of Educational Broadcasting Corp., Oakland, Calif.—Granted authority to transfer control of corporation from Drey, Brevitt, etc., to W. I. Dummn, Philip G. Lasky, Fred J. Hart and Wallace F. Elliott. Station operates on **930 kc.**, 1 KW, unlimited time.

WAPI—Alabama Polytechnic Institute, University of Alabama, Alabama College, Birmingham, Ala.—Granted extension of special authorization to operate unlimited time on **1140 kc.**, with 5 KW, with DA system after sunset at Tulsa, Okla., for the period ending February 1, 1940.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted extension of special experimental authority to operate on **1100 kc.**, 50 KW power, unlimited time, employing DA system for nighttime operation, for the period ending February 1, 1940.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted extension of special authorization to operate simultaneously with station KTHS on **1060 kc.**, with 10 KW power, from 6 a. m. to local sunset at Hot Springs, Ark., and from local sunset at Hot Springs, to 9 p. m., EST; and to operate synchronously with station WJZ on **760 kc.**, with 2½ KW, employing DA from 9 p. m., EST, for the period ending February 1, 1940.

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—Granted extension of special experimental authority to operate on frequency **1060 kc.**, with 10 KW power, simultaneously with WBAL, Baltimore, from 6 a. m. to local sunset daily, suspend until 8 p. m., and unlimited from 8 p. m. to midnight, for the period ending February 1, 1940.

DESIGNATED FOR REHEARING

The following application has been designated for hearing by the Commission. Date for the hearing has not yet been set.

WSBT—The South Bend Tribune, South Bend, Ind.—Application for C. P., already in hearing docket, amended so as to request authority to move transmitter site locally; install new equipment and directional antenna system for day and nighttime operation; change frequency from **1360 kc.** to **930 kc.**, and time of operation from S-WGES to unlimited time.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KEX, Portland, Ore.; KFAB, Lincoln, Nebr.; KFI and auxiliary, Los Angeles; KFVD, Los Angeles; KGU, Honolulu, T. H.; KIRO, Seattle; KMOX, St. Louis; KMPC, Beverly Hills, Calif.; KOA, Denver, Colo.; KOAM, Pittsburgh, Kans.; KOB, Albuquerque, N. Mex.; KOWH, Omaha, Nebr.; KPO, San Francisco; KYOS, Merced, Calif.; WBBM and auxiliary, Chicago; WBT, Charlotte, N. C.; WCAU and auxiliary, Philadelphia; WCFL and auxiliary, Chicago; WGY and auxiliary, Schenectady, N. Y.; WHAS, Louisville; WOV, New York City; WPG, Atlantic City, N. J.; WCAZ, Carthage, Ill.; WRVA, Richmond, Va.; WRUF, Gainesville, Fla.; WSAZ, Huntington, W. Va.

The following stations were granted renewal of licenses for the period ending January 1, 1940:

KAWM, Gallup, N. Mex.; KGIW, Alamosa, Colo.; KNET, Palestine, Tex.; KRMC, Jamestown, N. Dak.; KSAL, Salina, Kans.; KYSM, Mankato, Minn.; WGIL, Galesburg, Ill.; WKAT, Miami Beach, Fla.; WMFJ, Daytona Beach, Fla.; WMFO, Decatur, Ala.; WNOE, New Orleans, La.

WESG—Cornell University, Elmira, N. Y.—Granted renewal of license on a temporary basis only, subject to such action as the Commission may take on pending application for renewal.

WJAG—The Norfolk Daily News, Norfolk, Nebr.—Granted renewal of license on a temporary basis only, subject to such action as the Commission may take on pending application for renewal.

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—Granted renewal of license on a temporary basis only for the period ending February 1, 1940, subject to the right of the Commission to make effective any changes or modifications herein which may be necessary in order to comply with any decision of the Commission which may be entered after hearing in any proceeding of which licensee was duly notified or in which licensee participated.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Granted renewal of license on a temporary basis only for the period ending February 1, 1940, upon the express condition that it is subject to whatever action may be taken upon pending applications for renewal of license, and upon the application of WHA for the facilities of WMAQ.

KVGB—Helen Twonsley, Great Bend, Kans.—Present license extended on a temporary basis only, for the period August 1 to September 1, 1939, pending determination upon the application for renewal of license.

KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license extended on a temporary basis only, for the period August 1 to September 1, 1939, pending determination upon the application for renewal of license.

KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Present license extended on a temporary basis only, for the period August 1 to September 1, 1939, pending determination upon the application for renewal of license.

KTRB—Thos. R. McTammany and William H. Bates, Jr., Modesto, Calif.—Present license extended on a temporary basis only, for the period August 1 to September 1, 1939, pending determination upon the application for renewal of license.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Present license extended upon a temporary basis only, pending determination upon renewal application, for the period August 1 to September 1, 1939.

WKAR—Mich. State College, E. Lansing, Mich.—Present license extended upon a temporary basis only, pending determination upon renewal application, for the period August 1 to September 1, 1939.

WSPR—WSPR, Inc., Springfield, Mass.—Present license extended upon a temporary basis only, pending determination upon renewal application, for the period August 1 to September 1, 1939.

W8XWJ—The Eve. News Assn., Detroit, Mich.—Present license for high frequency broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, but in no event longer than September 1, 1939.

W4XBW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Present license for high frequency broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, but in no event longer than September 1, 1939.

WAXG—Fla. Capitol Broadcasters, Inc., Portable-Mobile (Area of Tallahassee, Fla.)—Present license for relay broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, but in no event longer than September 1, 1939.

MISCELLANEOUS

NEW—John F. Arrington, Jr., Valdosta, Ga.—Denied motion to withdraw without prejudice application for new station to use **1230 kc.**, 250 watts day and night, unlimited time; and dismissed application with prejudice.

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Granted motion for continuance of hearing now scheduled for September 6; new date to be fixed by the Office of the Secretary; motion denied in so far as consolidation with other applications is requested.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted motion to dismiss without prejudice, application for modification of license to change frequency power and time of operation.

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—Granted motion to take depositions on September 7, 1939, at Worcester, Mass.; hearing before examiner to be held open.

KECA—Earle C. Anthony, Los Angeles, Cal.—Referred to Commission en banc motion to withdraw or dismiss application for C. P. to move KECA to San Diego, Cal., and assign license to Worcester Broadcasting Corp.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted petition to intervene in the hearing on the application of Portorican American Broadcasting Co., Inc., for a new station in Ponce.

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Action continued for one week on petition to (a) intervene in the hearing on the application of the Gazette Co. for C. P., and (b) that the issues to be determined upon hearing be enlarged.

WELI—City Broadcasting Corp., New Haven, Conn.—Granted special temporary authority to operate station on **930 kc.**, with 500 watts, daytime only, at Benham Road & Paradise Ave., Hamden, Conn., for the period July 23, and until such time as the proof of performance of the directional system is submitted and approved by the engineering department, but ending in no event later than August 21, in accordance with application to operate with either directional or non-directional antenna during same period in order to make comparisons and expedite field intensity survey.

WBRY—American Republican, Inc., Waterbury, Conn.—Granted special temporary authority to operate a portable test transmitter of 100-watts power on **1510 kc.**, during hours from one hour after local sunrise to one hour before local sunset, for the period July 25 to August 23, in order to conduct field intensity measurements to be made to assist in locating new transmitter site for WBRY.

WSUI—State Univ. of Iowa, Iowa City, Iowa.—Granted special temporary authority to reduce hours of operation from unlimited time to minimum of 8 hours daily, for the period August 1 to September 1, in order to observe summer vacation.

RCA—Mfg. Co., Inc., New York City.—Granted special temporary authority to operate general experimental station W3XDS, using frequency **950 kc.**, with power of 1 KW, to conduct a comprehensive field survey to study the effects of fading on amplitude modulated facsimile emission during hours 2 to 7 a. m., DST, on Sundays; midnight to 5 a. m., DST, on Mondays; and 1 to 5 a. m., DST, from Tuesday through Saturday, for a period not to exceed 30 days.

WQDM—Regan & Bostwick, St. Albans, Vt.—Denied special temporary authority to operate from 8 to 8:30 p. m., EST, for the period August 1 to August 30, in order to broadcast local baseball games and scores.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Denied special temporary authority to operate unlimited time, 1 KW power, nighttime, for the period July 25 to August 23, in order to broadcast civic, charitable and other programs of extreme local interest from CBS.

CKLW—Esses Broadcasters, Inc., Detroit, Mich.—Granted special temporary authority to pick up Unitarian Fellowship for Social Justice programs from 9 to 9:30 p. m., EST, on July 24 and 31.

Out West Broadcasting Co., Colorado Springs, Colo.—Granted special temporary authority to use relay broadcast station KAAO, licensed to KLZ Broadcasting Co., for special golf broadcast originating at the Broadmoor Golf Club, during daytime on July 22 and 23, to be broadcast over KVOR.

WPG—City of Atlantic City, Atlantic City, N. J.—Denied special temporary authority to operate Fridays from 2 p. m. to 3 p. m., EST, on July 21, 28, August 4, 11, and 18, 1939, and from 3:15 p. m. to 4:30 p. m. on Sundays, July 23, 30, August 6, 13, 20, 1939, in order to broadcast programs as described in letter dated July 19, 1939.

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Granted special temporary authority to rebroadcast two-way communication between ground station at Chanute Field, Rantoul, Ill., and Army airplane, in connection with War Department expansion program, for period of 30 days, communication to be carried on **7385 kc.**

WQDM—Regan & Bostwick, St. Albans, Vt.—Reconsidered action of July 21 in denying request to operate from 8 to 8:30 p. m. from August 1 to 30, inclusive, to broadcast baseball games, and granted same for EDST as requested.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted extension of special temporary authority to operate unlimited time for the period July 21 to August 29, 1939 (provided WSVS remains silent), in order to broadcast programs as described in letter dated July 18, 1939.

WJHS—John H. Snyder, Baltimore, Md.—Granted extension of special temporary authority to operate licensed aircraft radio transmitter aboard plane NX-21054, call letters KHCTV, as a relay broadcast station on the frequency **2790 kc.**, to relay broadcast program in connection with endurance flight, for the period July 23 to August 15, 1939, to be rebroadcast over station WBAL.

W8XIQ-W8XIR—WGAR Broadcasting Co., Cleveland, Ohio.—Granted extension of special temporary authority to operate relay broadcast (experimental) stations W8XIQ and W8XIR on the frequency **31220 kc.**, pending definite arrangements to be made to eliminate interference with Cleveland's police radio service, for the period July 28 to 3 a. m., EST, August 1, 1939.

WHKC—Associated Radiocasting Corp., Columbus, Ohio.—Dismissed from the hearing docket the application of WHKC for renewal of license, and granted same on a regular basis.

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Denied petition to reconsider action of June 30 in granting the application of Ozarks Broadcasting Co. (KWTO), Springfield, Mo., for modification of license to increase operating time from 5 to 6 a. m., CST, on the frequency **560 kc.**, using 1 KW, and designate same for hearing.

WRTD—Times Dispatch Radio Corp., Richmond, Va.—Denied petition to rescind the announcement of the Commission that the WRTD application would be made the subject of a further hearing "on issues related to the interference problem created by pending 5-KW applications," and to consider the application upon the present record.

W9XBF—WDAY, Inc., area of Fargo, N. Dak., Portable-Mobile.—Granted license to cover C. P. for relay broadcast station upon an experimental basis only, conditionally; frequencies **30820, 33740, 35820, 37980 kc.**, 25 watts.

KDAC—George Harm, area of Fresno, Calif., Portable-Mobile.—Granted license to cover C. P. for relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.**, 25 watts.

WEBC—Head of the Lakes Broadcasting Co., Duluth, Minn.—Denied petition that station be authorized to use one of the following forms for station identification announcements: "This is WEBC—Duluth and Superior," or "This is WEBC with studios in Duluth and Superior."

WLTH—Voice of Brooklyn, Inc., New York City.—Adopted an order citing the licensee (WLTH) to appear and show cause why its license should not be revoked by the Commission, because of complaint of interference with Coast Guard aircraft communications on the frequency **4200 kc.**, by the third harmonic of broadcast station WLTH, which frequency is used by the U. S. Coast Guard station at Floyd Bennet Field, and the various U. S. Coast Guard planes. It appears that such interference has been noted at various times over a period of more than one year; that licensee has been advised concerning said interference on numerous occasions with a promise on the part of licensee to make necessary changes in equipment to eliminate said interference, but the necessary steps to eliminate such interference have not been taken.

NEW—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—Granted petition to reconsider and grant without a hearing application for C. P. for new station to operate on frequency **1310 kc.**, 100 watts night, 250 watts LS, unlimited time. Denied petition of KTHS to intervene.

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted petition to reconsider and grant without a hearing the application for renewal of license for high frequency broadcast station W3XIR.

WESG—Cornell University, Elmira, N. Y.—Granted petition to reconsider and grant without a hearing the application for modification of license that the authority to operate on frequency **850 kc.**, with 1 KW, from 6 a. m. to LS, New Orleans, be authorized on a regular basis instead of special experimental basis.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Denied petition to reconsider and grant without a hearing the application for modification of license requesting authority to increase hours of operation from limited to unlimited time on the frequency **1180 kc.**, with power of 1 KW night, 5 KW day.

W8XUM—WBNS, Inc., Columbus, Ohio.—Granted license to cover C. P. for facsimile broadcast station upon an experimental basis only, conditionally; frequency **25200 kc.**, 100 watt..

WALR—WALR Broadcasting Co., Zanesville, Ohio.—Granted C. P. for approval of transmitter site at Newark Road, Zanesville, Ohio, and installation of vertical radiator, providing tower is marked according to specification.

WPRA—Puerto Rico Advertising Co., Mayaguez, P. R.—Granted modification of C. P. to make changes in composite equipment and approval of transmitter and studio sites, provided tower is marked according to specifications.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period July 23 to August 21, pending KWLC's compliance with Rule 131.

WKAQ—Radio Corp. of Puerto Rico, San Juan, P. R.—Granted special temporary authority to rebroadcast program to be received from international station W3XAU at 2:30 p. m. July 25, in connection with Puerto Rico's Occupation day at World's Fair.

KGKL, Inc., San Angelo, Tex.—Granted special temporary authority to operate a mobile relay broadcast transmitter on frequency **2102 kc.**, from 1 to 5 p. m. CST, on August 4, 5, and 6, in order to relay broadcast programs from Annual Roundup and Rodeo of the Double Hart Ranch.

WAUP—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to operate high frequency broadcast experiment station W1XER as a relay broadcast station in order to pick up and relay program in which Lawson Little will be interviewed from Mt. Washington and to be broadcast over the Yankee Network; station to operate on **31600, 35600, 38600** and **41000 kc.**, 500 watts.

KVAK—Carl Latenser, Atchison, Kans.—Granted modification of C. P. to extend completion date from 7-28-39 to 9-28-39.

WSNJ—Eastern States Broadcasting Corp., Bridgeton, N. J.—Granted license to cover C. P. authorizing changes in equipment and increase in power and time of operation from 100 watts daytime to 100 watts night, 250 watts day, unlimited time.

WJBL—Commodore Broadcasting, Inc., Decatur, Ill.; WBOW—Banks of Wabash, Inc., Terre Haute, Ind.; WJBC—Arthur Malcolm McGregor and Dorothy Charlotte McGregor, Bloomington, Ill.—The Commission modified its order of June 21, 1939, in the matter of the applications of WJBL, WBOW and WJBC, so that paragraph number three thereof shall read as follows: "That the application of Arthur Malcolm McGregor and Dorothy Charlotte McGregor, Docket 5329, be granted subject to the express condition that Station WJBL be licensed to operate upon the frequency of **1310 kc.**, upon completion of construction as authorized in Docket 5207, and the effective date of the modified license authorized hereunder to Station WJBC, if and when issued, shall be the same date upon which Station WJBL is licensed to operate on **1310 kc.**"

NEW—Worcester Broadcasting Corp., San Diego, Cal.—Granted permission to file its application for a new station to operate on the frequency **1430 kc.**, 1 KW night, 5 KW day, and incorporate the record in Dockets 5381 and 5378, in re application of Earle C. Anthony, Inc., to assign license of KECA to Worcester Broadcasting Corp.

American Communications Assn., New York City.—Dismissed petition for leave to intervene and for rehearing on behalf of the American Comm. Assn., in re application of Hearst Radio, Inc., for voluntary assignment of license of KEHE to Earle C. Anthony, Inc.

KECA—Earle C. Anthony, Inc., Los Angeles, Cal.—Dismissed with prejudice the application of Earle C. Anthony, Inc., to assign license of KECA to Worcester Broadcasting Corp., and for C. P. for a station in San Diego.

American Communications Assn., New York City.—Dismissed petition to intervene and appear at oral argument in the matter of the application of Earle C. Anthony, Inc., for voluntary assignment of license of KECA, and for C. P. for a station in San Diego.

W2XWC—Kolorama Laboratories, Inc., Irvington, N. J.—Granted extension of special temporary authority to operate a composite television transmitter to be located in Carlstadt, N. J., for radio television transmission in the **2000-21000 kc.** band, for operation between the hours of 12 midnight and 6 a. m., on a non-interference basis, with power of 500 watts, for test and experimental purposes only, for the period August 6 to September 4, 1939.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate simultaneously with KICA from 7 to 10 p. m., MST, on July 31, August 1 and 2, in order to broadcast benefit amateur boxing tournament.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Ordered that a hearing on the application of WHDH for modification of license to operate station on **830 kc.**, with 5 KW, unlimited time, on a regular basis, be held on October 10, 1939.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Denied petition to reconsider action of July 27, 1938, in designating for hearing its application for special experimental authority to operate on the frequency **830 kc.**, with 5 KW, unlimited time, and grant same without a hearing.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Denied application for special experimental authority to operate on frequency **830 kc.**, with 5 KW, unlimited time, because the program proposed would not constitute a substantial contribution to the development of the radio art.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted special temporary authority to operate simultaneously with KBST from 7:45 to 9:15 p. m., MST, on July 27 in order to broadcast statewide talks relative to safety.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from international broadcast stations W2XE and W3XAU over station WKAQ, on a non-commercial experimental basis only, for the period July 20 to August 18, 1939.

W3XAL-W3XL—National Broadcasting Co., New York City.—Granted extension of special temporary authority to transmit programs consisting of Spanish news to be rebroadcast by Cuban Stations CMX and COCX for the period July 2 to Sept. 27, 1939.

APPLICATIONS FILED AT FCC

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Modification of license to increase power from 500 watts, 1 kw. LS, to 1 kw. power day and night.

620 Kilocycles

KWFT—Wichita Broadcasting Co., Wichita Falls, Tex.—License to cover C. P. (B3-P-1471) as modified for a new station.

680 Kilocycles

WPTF—WPTF Radio Co., Raleigh, N. C.—Modification of license to change hours of operation from limited to unlimited time, using directional antenna from sunset at San Francisco, Calif.

780 Kilocycles

WPIC—Sharon-Herald Broadcasting Co., Sharon, Pa.—Construction permit to install new transmitter and increase power from 250 watts to 1 kw.

890 Kilocycles

KFNF—KFNF, Incorporated, Shenandoah, Iowa—Modification of construction permit (B4-P-1449) as modified, to increase power, move transmitter, install directional antenna for night use, changes in equipment, further requesting extension of commencement and completion dates from 4-15-39 and 8-1-39 to 8-1-39 and 2-1-40 respectively.

920 Kilocycles

WSPA—Virgil V. Evans, d/b as The Voice of South, Carolina, Spartanburg, S. C.—Construction permit to install directional antenna for night use, change frequency from **920 kc.** to **610 kc.**, hours of operation from daytime to unlimited time, using 1 KW power night and day.

1200 Kilocycles

WJNO—WJNO Inc., West Palm Beach, Fla.—Construction permit to install new transmitter.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WJBC—Arthur Malcolm McGregor & Dorothy Charlotte McGregor, a partnership, Bloomington, Illinois—Modification of license to increase power from 100 watts, 250 watts, day to 250 watts day and night.

1210 Kilocycles

WFOY—Fountain of Youth Properties, Inc., St. Augustine, Fla.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WINN—Kentucky Broadcasting Corp., Louisville, Ky.—Modification of construction permit B2-P-1809, for a new station, requesting approval of antenna, changes in transmitting equipment, and approval of studio and transmitter site at 3rd and Jefferson Sts., Louisville, Ky.

WMFG—Head of The Lakes Broadcasting Co., Hibbing, Minn.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KXOX—Sweetwater Radio, Inc., Sweetwater, Texas.—Modification of C. P. (B3-P-2106) for a new station, requesting approval of antenna, changes in transmitting equipment, and approval of studio and transmitter site at # 70, 0.4 mile east of city, Sweetwater, Texas.

NEW—Fort Myers Broadcasting Company, Fort Myers, Fla.—Construction permit for a new station on **1210 kc.**, 100 watts, 250 watts day, unlimited time.

WSIX—WSIX, Incorporated, Nashville, Tenn.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1240 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Construction permit to install new transmitter and antenna, increase power from 1 to 5 KW, change frequency from **1240 kc.** to **620 kc.** Amended: Transmitter site to be determined, San Juan, P. R.

1250 Kilocycles

KIT—Carl E. Haymond, Yakima, Washington.—Modification of license to increase power from 500 watts; 1 kilowatt-day to 1 kilowatt day and night.

1310 Kilocycles

NEW—C. E. Palmer, Hot Springs, Ark.—Construction permit for a new station to be operated on **1310 kc.**, 100 watts power night and 250 watts power daytime, unlimited hours of operation. Amended to give transmitter site as site to be determined, Hot Springs, Ark.

KRMD—Radio Station KRMD, Inc., Shreveport, La.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KCKN—KCKN Broadcasting Co., Kansas City, Kansas.—Construction permit to install new transmitter.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1370 Kilocycles

WEOA—Evansville On the Air, Inc., Evansville, Ind.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WHLB—Head of The Lakes Broadcasting Co., Virginia, Minn.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Texas.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WMFO—James R. Doss, Jr., Decatur, Ala.—Voluntary assignment of license from James R. Doss, Jr., to Tennessee Valley Broadcasting Co., Inc.

NEW—Dallas Broadcasting Corp., Dallas, Texas.—Construction permit for a new station on **1370 kc.**, 100 watts, 250 watts day, unlimited time.

WSAU—Northern Broadcasting Co., Inc., Wausau, Wis.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1420 Kilocycles

WGNC—F. C. Todd, Gastonia, N. C.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WCHV—Community Broadcasting Corporation, Charlottesville, Va.—Transfer of control of corporation from Mrs. Hugh M. (Nancy) Curtler, to Mrs. Marcia Arrington, 2231 shares common stock.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

NEW—Poughkeepsie Broadcasting Corporation, Poughkeepsie, N. Y.—Construction permit for a new station on **1420 kc.**, 250 watts, unlimited time.

1500 Kilocycles

WSTP—Piedmont Broadcasting Corp., Salisbury, N. C.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

KSAL—R. J. Laubengayer, Salina, Kans.—Voluntary assignment of construction permit B4-P-2068, from R. J. Laubengayer, to KSAL, Inc.

WRGA—Rome Broadcasting Corp., Rome, Ga.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

KPQ—Westcoast Broadcasting Co., Wenatchee, Wash.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WDNC—The Durham Radio Corp., Durham, N. C.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

MISCELLANEOUS

NEW—Westinghouse Electric and Manufacturing Co., Boston, Mass.—Construction permit for a new high frequency broadcast station on 42600 kilocycles, 1 kilowatt power, special emission, located at Hotel Tremont, 275 Tremont St., Boston, Mass.

WFYB—Columbia Broadcasting System, Inc., Portable, Mobile, Area of Cincinnati, Ohio.—License to cover C. P. (B2-PRY-181) for a new relay broadcast station.

WHPA—WHP, Incorporated, Portable-Mobile, Area of Harrisburg, Penna.—License to cover C. P. (B2-PRY-158) for a new relay broadcast station.

XXXXX—RCA Communications, Inc., New York, N. Y.—Authority to transmit programs via RCA Communications, Inc., originating at 64 Broad, New York, New York, to CMX, Havana, Cuba.

NEW—Metropolitan Television, Inc., New York, N. Y.—Construction permit for new television station on 102000-108000 kilocycles, 1 kilowatt power A3, A5 and special emission, to be located at Hotel Pierre, 795 Fifth Ave., New York, N. Y.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

America's Medicine and Nu-Mode Company—A complaint has been issued against Harry S. Benham, trading as America's Medicine and Nu-Mode Company, 620 Orleans St., Chicago, alleging false and misleading representations in the sale of medicinal preparations represented as treatments for delayed menstruation, such preparations being designated as "America's Medicine XX Compound", "Nu-Mode XX Compound" or "Kotess Periodic Relief Compound", "America's Medicine XXX Compound", and "Nu-Mode XXX Compound", or "Kotess Periodic Relief Compound".

The complaint alleges that the respondent's products do not, as advertised, accomplish results without pain or inconvenience and are not a competent, safe and effective remedy for delayed menstruation. The complaint further alleges that the respondent's advertisements are false in that they fail to reveal that use of the preparations under the conditions prescribed in the advertisements or under customary or usual conditions may result in serious and irreparable injury to the health of users. (3851)

American Plierench Corporation—A complaint has been issued against American Plierench Corporation, 4611 Ravenswood Ave., Chicago, alleging false representations in the sale and distribution of a combination plier and wrench kit, designated "The Eifel-Geared PlieRench Kit".

The complaint alleges that representations and implications by the respondent as to the earnings of its representatives are false and misleading, for actually its full time representatives do not make from $35 to $85 per week, nor from $1,500 to $4,000 per year as advertised, nor do part-time salesmen make proportionate sums. The complaint further alleges that the respondent does not furnish representatives with a "7-edge end-&-angle screwdriver" "free", or without cost or condition, as advertised, but requires the purchase of one or more articles, which fact is not disclosed to the prospective representatives until after inquiry has been made. (3853)

G. Bernardi—Misleading advertising in the sale and distribution of a medicinal preparation designated "Benaris" is alleged in a complaint issued against G. Bernardi, 1017 Euclid Ave., Cleveland.

The complaint alleges the respondent's advertising to be false in that the preparation "Benaris" is allegedly not, as advertised, a cure or remedy for colds, chronic colds, catarrh, bronchitis, laryngitis, dryness of the throat, irritation or inflammation of the throat, inflamed or enlarged tonsils, hoarseness, rose or hay fever, or congestion of the nasal passages.

It is further alleged that the respondent's preparation will not, as advertised, neutralize the tissues or eliminate colds; will not in all cases relieve headaches or sinus ailments; will not insure a healthful or efficient day, or bring new life or sensation to its user; nor will its use cause greater diaphragmatic breathing or result in finer head tones, or increase the resonance, volume or quality of the voice. According to the complaint, Benaris is not beneficial in the relief of headaches which are not due to congestion of the mucous membranes of the air passages. (3857)

Fairfield Engineering Company, 324 Barnhardt St., Marion, Ohio, in a complaint is alleged to have made false and misleading representations in the sale of "Fairfield Coal Distributors" and "Fairfield NON-SEGREGATING Coal Distributors."

The complaint alleges that the respondent's coal distributors, represented as being non-segregating, are not such within the meaning of that term. The term "non-segregating" when applied to coal distributors is alleged to be understood by the trade to mean a distributor which causes a uniform layer of fine and coarse coal to be delivered across the entire surface of the fire boxes of boilers, in the same proportionate mixture as when the coals leave the bunkers, thus bringing about economy and efficiency in the operation of large steam boilers. (3850)

Nu-Way Manufacturing—A complaint has been issued against L. B. Patterson, trading as Nu-Way Manufacturing, Des Moines, Iowa, alleging false and misleading representations in the sale and distribution of an electric water heater, designated Speed King Water Heater.

The complaint alleges that direct or implied claims of the respondent as to the efficacy of his heater and as to the earnings made by his representatives are false and misleading.

Allegations cited in the complaint as being false are that the Speed King Heater provides the fastest way known of heating water; that it boils water almost instantly or in 60 seconds; saves up to 50 per cent of gas and fuel bills, and does the work of heaters costing 40 to 50 times as much, and that agents selling the heater can make profits of 141 per cent to 218 per cent. (3852)

Positive Products Company—A complaint has been issued against Earl Aronberg, trading as Positive Products Company and Rex Products Company, 6603 Cottage Grove Ave., Chicago, alleging false and misleading representations in the sale of medicinal preparations represented as treatments for delayed menstruation, such preparations being designated as "Triple-X Compound" and "Reliable Perio Compound," also known as "Perio Pills" and "Perio Relief Compound."

It is alleged that the respondent's products do not, as advertised, accomplish results without pain or inconvenience and are not a competent, safe or effective remedy for delayed menstruation. The respondent's advertisements are further alleged to be false in that they fail to reveal that use of the preparations, under the conditions prescribed in the advertisements, or under customary or usual conditions, may result in serious and irreparable injury to the health of users. (3856)

Rex Products Company—See Positive Products Company.

U-Need Candy Company, Inc.—Use of lottery methods in the sale and distribution of candy is alleged in a complaint issued against U-Need Candy Co., Inc., Louis J. Weger, Mrs. Louis J. Weger, and Charles R. Hosey, 1231 West Washington Ave., South Bend, Ind.

The respondents are alleged to have sold to wholesale dealers, jobbers and retail dealers certain assortments of candy so packed and assembled as to involve the use of lottery schemes when sold and distributed to consumers. (3855)

Zelle Company—Under a complaint Leland F. Benham, trading as The Zelle Company, 620 Orleans St., Chicago, is charged with disseminating false advertisements for the purpose of inducing the purchase of "Zellets No. 1" and "Zellets No. 2" represented as treatments for delayed menstruation.

The complaint alleges that the respondent's products do not, as advertised, accomplish results without pain or invonvenience and are not a competent, safe, and effective remedy for delayed menstruation. The complaint further alleges that the respondent's advertisements are false in that they fail to reveal that use of the preparations under the conditions prescribed in the advertisements or under customary or usual conditions may result in serious and irreparable injury to the health of users. (3854)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Chenille Corporation of America, Chicago, was ordered to discontinue misleading representations in the sale and distribution of rugs.

Findings of the Commission are that in 1935 Chenille Corporation of America discontinued its prior practice of employing homeworkers to make its rugs from yarns supplied by the respondent, and substituted therefor an electric machine, thus producing machine-made rugs at a cost of about 45 cents per square foot in contradistinction to a "hand-hooked" or "hand-made" rug costing from 75 cents to $1.25 a square foot. The respondent sold its rugs to department stores, and in some instances, represented directly or impliedly that they were "hand-hooked" or "hand-made."

Under the order, the respondent is to cease using the terms "hand-made" or "hand-hooked" or similar terms to describe rugs which have not been made entirely by hand labor and hand craft. (3201)

Gold Medal Farms, Inc.—Under an order, Gold Medal Farms, Inc., New York milk distributor, and two of its employed officials, are directed to cease and desist from certain unfair competitive practices in connection with the purchase of milk from producers in the New York milk shed.

The order directs that they discontinue deceiving, coercing or intimidating New York or Vermont producers from whom they purchase or receive or may hereafter purchase or receive milk, in the efforts of such producers to form producer-controlled cooperatives; that they cease threatening reprisals or interfering in any way with the organization of cooperative associations of milk producers; that they discontinue disparaging and misrepresenting producers' cooperative bargaining agencies, and cease controlling or dominating the Washington and Rensselaer Counties Producers' Cooperative Association, Inc., or any other producers' cooperative associations. (3380)

STIPULATIONS

The Commission has entered into the following stipulations:

Exelento Medicine Company—In a stipulation entered into Exelento Medicine Company, Atlanta, Ga., agreed to cease representing directly or by implication, that its commodity, "Exelento Quinine Pomade," will cause hair to grow, or have any influence on the growth or falling out of hair, or that it will stop itchy or scaly condition of the scalp, or that its action is sure. (02407)

Gilfillan Bros., Inc., 1815 Venice Boulevard, Los Angeles, entered into a stipulation to discontinue misleading representations in the sale of domestic mechanical refrigerators, designated Gilfillan electric refrigerators.

The respondent will cease representing directly or by implication that the compressors in its mechanical refrigerators have any fewer moving parts than the actual number; that a piston type pump is the most efficient type in all cases; that the capacity of the compressor, evaporator, and condenser individually or collectively is greater by any amount than that of mechanical refrigerators of like size and quality, unless such comparison is based upon scientifically recognized standards and ratings, and that Gilfillan electric refrigerators are lower in price than other mechanical refrigerators of like size and quality by any amount greater than is actually a fact. (02403)

Hexol, Incorporated, 966 Mission St., San Francisco, entered into a stipulation to cease the dissemination of false advertisements in the sale of an antiseptic and disinfectant designated Hexol.

Under the stipulation, the respondent agreed to cease representing that Hexol, in a dilution of 1½ tablespoonfuls to each quart of water, is an effective antiseptic for wounds; that Hexol has all the advantages of phenol or is easier to handle than phenol; that Hexol constitutes an adequate treatment for ulcers, fistulas and exuberant tissue; that Hexol will act as a sterilization agent; that it is a germicide capable of killing pus-forming organisms in concentrations and periods of time less than competent scientific tests show are necessary to produce the results claimed; that the action of Hexol on spores is stronger than phenol; that it is non-toxic and may be employed effectively for all personal and household uses, and that there is no substitute for Hexol. (02404)

Hitchner Biscuit Company, West Pittston, Pa., entered into a stipulation to discontinue the use of lottery schemes in the sale of bakery products.

The respondent stipulated that it will cease supplying others with lottery devices for use in disposal of any merchandise; disposing of any merchandise by the use of lottery devices, or using any method of sale which involves a lottery scheme by which an article is given as a prize or premium in consideration of the purchase of any other article. (2491)

Instant Kleen Laboratories—C. G. Hodapp, trading as Instant Kleen Laboratories, 114 North St. Clair St., Dayton, Ohio, entered into a stipulation to discontinue misleading representations in the sale of an auto polish designated "Instant Kleen."

The respondent agreed to cease representing directly or by implication that salespersons or dealers selling his product may earn any amount which is in excess of amounts normally earned by persons selling his product; that the demand for the product is so great that agents will need additional men to take care of the business; that any percentage of attempts at making sales is successful unless based on reliable statistics, and that there is no competition in the sale of his product, or that sales are guaranteed. (02405)

Charles Monnat—In a stipulation entered into, Charles Monnat, New York, agreed that in connection with his sale and distribution of watch spring products, he will discontinue the use of the word "manufacturer" or any other word of similar meaning which would represent that the products sold by him are made in a plant or factory which he owns or operates or directly and absolutely controls, when such is not the fact. (2490)

G. M. Poix, Inc., 99 Madison Ave., New York, entered into a stipulation to discontinue the dissemination of false representation in the sale of a brassiere designated "AP-Uplift."

Under the stipulation, the respondent agreed to cease representing, directly or by implication, that the "AP-Uplift" is the only device that gives the upward converging control to the breasts, desired by doctors, before and after the birth of a baby; that "AP-Uplift" relieves pain, removes the causes of many bust troubles, applies to all sizes of figures, corrects the defects caused by the bandage type brassiere, and is at variance with nearly every other brassiere. (02406)

Madame Ramsey's—Lorraine Ramsey, trading as Madame Ramsey's, Norfolk, Va., entered into a stipulation to cease representing directly or by implication that her hair preparations, when applied locally to the scalp, will cause hair to grow or will promote its growth or will effectively prevent or cure baldness or cause the growing of hair on bald heads. Among products sold by the respondent are: Mme. Ramsey's Triple Strength Hair Grower and Mme. Ramsey's Double Strength Hair Grower. (2489)

Sozonian Vault Company, Bucyrus, Ohio, has entered into a stipulation to discontinue misleading representations in the sale and distribution of metal grave vaults.

The respondent agreed to cease and desist from causing the exhibition or sanctioning the exhibition by its salesmen or representatives of photographs or any pictorial or other representation of the products of its competitors, the effect of which may tend to falsely represent such competitive products. The respondent further agreed to cease representations to the effect that its products will assure permanent protection to the caskets or bodies encased therein, or that such products will remain permanently rust- or waterproof, when such representations are not warranted in view of various soil, climatic and other burial conditions. (2488)

Vadsco Sales Corporation—In a stipulation entered into, Vadsco Sales Corporation and its subsidiary, V. Vivaudou, Inc., New York, agreed to discontinue false advertising in the sale of talcum powders designated Djer-Kiss Talc and Mavis Talcum Powder.

The respondents stipulated that they will cease representing directly or by implication that Djer-Kiss Talc in any way influences or affects body temperature; that Mavis Talcum Powder is materially different from, or more effective than, similar substances; that the formula of Mavis Talcum Powder is the outcome of scientific research and experiment or that the product has a protective quality not found in any other powder, or that Mavis Talcum Powder to any extent promotes sleep, relaxes or soothes the nerves, or reduces the amount one perspires.

The respondents further stipulated that they will cease advertising that Mavis Talcum Powder has healing properties or contains ingredients which make it beneficial in the treatment of skin disorders, unless such representations are limited to the product's effect in drying the skin or in reducing irritation and friction; that the pores breathe or that Mavis Talcum Powder permits the pores to breathe; that Djer-Kiss Talc and Mavis Talcum Powder completely counteract or mask objectionable body odors, and that Djer-Kiss Talc and Mavis Talcum Powder, with respect to their odor or substance, when applied to the body, remain effective for any purpose during the entire day of their use or for any substantial length of time. (02408)

V. Vivaudou, Inc.—See Vadsco Sales Corporation.

NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 31, August 4, 1939

ASCAP Negotiations Collapse; Special Convention Called For Sept. 15 In Chicago

After trying in vain since last March to find out how much broadcasters would be expected to pay for their music on the expiration of their present contract with the American Society of Composers, Authors and Publishers, Neville Miller, President of the National Association of Broadcasters, announced Thursday that the broadcasters would embark immediately upon efforts to develop such other sources of music as would render them independent of the copyright pool which now controls an overwhelming portion of the music available for use on the air.

Mr. Miller's announcement came immediately after the Negotiating Committee of his organization had met with John Paine, General Manager of the Society, and had been told that the Society still was not ready to make any proposal to the broadcasters, and further, that although the Society's Board of Directors had on July 13 authorized its president, Gene Buck, to appoint a committee of Board members with authority to negotiate with the broadcasters, Mr. Buck had departed on a vacation without even appointing such a committee and that the date of his return to New York had not been set.

Mr. Miller began negotiations with the copyright pool on behalf of the broadcasters last March, and these negotiations have been energetically pressed by the Negotiating Committee for many weeks but the Committee was forced to admit that in view of the Society's attitude it had been able to make absolutely no progress. It immediately got in touch with the Copyright Committee of he broadcasters' organization of which it is a sub-committee. The Copyright Committee thereupon called a convention of the entire broadcasting industry at the Edgewater Beach Hotel in Chicago on September 15 to raise a substantial war chest and to ratify plans which will be formulated meantime and which are expected to create an adequate supply of music from independent sources.

The Copyright Committee will meet in New York on August 9 to set plans and to engage a specialized staff for that purpose. The chief objectives of the broadcasters are:

1. To defend themselves against the Society's requirements that they pay tribute percentage-wise on all programs regardless of whether or not they use any ASCAP music or indeed any music at all.

2. To reduce the broadcasters' annual toll to the Society which is now running around $4,000,000 a year and is rapidly mounting.

3. To bring about a more equitable distribution of the charges among the broadcasters themselves.

4. To foster, encourage and promote the writing of new music and new lyrics by giving

ASCAP NEGOTIATIONS COLLAPSE; SPECIAL CONVENTION CALLED FOR SEPT. 15 IN CHICAGO

(Continued from page 3639)

opportunity to be heard to new composers and authors.

5. To arm themselves with such supply of, or access to, music as will enable them to conduct future negotiations with the Society on terms of some equality.

Mr. Miller said that, while the broadcasters were not yet prepared to disclose their plans fully, their principal effort would be toward the engaging of composers and authors with a view to building up a reservoir of new music and the arranging and popularizing on the air of music now in the public domain which is not controlled by the copyright pool. He added that efforts would be made to enter into making arrangements with such publishers, composers and authors as have not yet renewed their contract with the Society and said that very probably there would be cooperative effort towards entering the music publishing field on a non-profit basis. He stated the desire of the broadcasters to give opportunity to new and non-established composers and any writers who felt that the Society had denied them opportunity to be heard.

Mr. Miller explained that the action taken today was in line with the instruction received by the Copyright Commiteee at the broadcasters' recent convention in Atlantic City and said from the temper of the broadcasters he anticipated no difficulty in obtaining ample funds for the vigorous and effective program. Mr. Miller emphasized that the broadcasters had paid the Society approximately $20,000,000 for the right to use their music during the past six years alone and said that they expected to continue to pay very substantial sums for the use of music, but he declared that he believed that the broadcasters, who are the Society's biggest contributors, could no longer remain so largely dependent upon a single source of music.

The broadcasters' present contract with the Society expires December 31, 1940.

The members of the Negotiating Committee are Neville Miller, President, National Association of Broadcasters; Lenox Lohr, President, National Broadcasting Company, Inc.; Edward Klauber, Executive Vice President, Columbia Broadcasting System; John Elmer, President, WCBM, Baltimore, Maryland; Samuel R. Rosenbaum, President, WFIL, Philadelphia, Pennsylvania; Walter J. Damm, Managing Director, WTMJ, Milwaukee, Wisconsin; and John Shepard, 3rd, President, The Yankee Network, Boston, Massachusetts.

The Copyright Committee of the NAB represents all groups of broadcasters, and in addition to the members of the Negotiation Committee mentioned above, include the following: Edwin W. Craig, Executive Vice President, National Life and Accident Insurance Company (WSM); Gregory Gentling, General Manager, KROC, Rochester, Minnesota; Clair McCollough, General Manager, WGAL, Lancaster, Pennsylvania; Theodore C. Streibert, Vice President, Mutual Broadcasting System, New York, N. Y.; Harold Wheelahan, General Manager, WSMB, New Orleans, Louisiana; and I. R. Lounsberry, Manager, WGR-WKBW, Buffalo, New York.

Fly Visits President

James L. Fly, confirmed by the Senate on August 1 as successor to Frank R. McNinch as a member of the Federal Communications Commission, paid a visit on Thursday afternoon to President Roosevelt, accompanied by Mr. McNinch.

It was reported that they discussed some of the pending problems of the Commission and that Mr. McNinch told the President that it would probably be six months before the Commission will be ready to make public the results of its monopoly investigation in the broadcast industry.

Mr. McNinch, under date of July twenty-fifth, gave the President the following letter of resignation:

"Dear Mr. President:

"On October 1, 1937, you requested me to resign as Chairman of the Federal Power Commission and assume the duties of the Chairmanship of the Federal Communications Commission and effect such reorganization of its work as I might deem necessary to enable it to function more speedily and uniformly and more nearly to your satisfaction.

"We both expected this task would be accomplished long before this time. Once having undertaken this work, however, I found it so fraught with problems and difficulties and the Commission so disunited that not until now have I felt justified in respectfully requesting you to release me from further service at the Commission. I do not believe I could contribute a great deal more by continuing as Chairman unless I desired to continue in the work indefinitely, which I have no desire to do.

"It was our understanding that you would release me when I had done what I could to improve conditions within and the functioning of the Commission. The procedure for handling the work of the Commission has been radically reorganized and certain personnel changes effected, all of which have contributed toward a marked improvement in the efficiency of the Commission but, in my judgment, it is not possible to reach the maximum of efficiency in the public interest with the present personnel and within the inadequate framework of the Communications Act. It was this conviction that moved me to recommend to you last winter a reorganization of the Commission and a revision of the Act, both of which recommendations I now renew.

"I found a great accumulation of pending cases and other work which has been brought up to date but which necessitated working unbearably long hours. This resulted recently, as you know, in a temporary impairment of my health, but I am happy to inform you now that I am rapidly improving.

"I am now convinced that, in justice to my family and to myself, I should not continue to carry the onerous burdens of an administrative position and have decided to reenter the practice of law, which I hope may be more lucrative but which will certainly be less burdensome and exacting physically than my present duties, and I hereby tender my resignation to be accepted at your pleasure, preferably not later than September 1, 1939.

"It was this same feeling which prompted me to advise you that I did not feel like undertaking another term as Chairman of the Federal Power Commission.

"At the close of my period of service I shall submit to you a summary report of the major improvements in the Federal Communications Commission since I took office.

"With renewed assurances of my unqualified loyalty to you personally and to the constructive and vital reforms in the interest of the people under your leadership, I am

"Faithfully yours,

"s/ Frank R. McNinch."

Under this date the President advised Mr. McNinch that his resignation had been reluctantly accepted. His letter read as follows:

"My Dear Frank:

"Because of the considerations which you urge in your letter of July twenty-fifth I have no alternative but to accept your resignation, effective at the close of business on August 31, 1939. I take this action with reluctance and sincere regret because of the high type of service you have rendered in the public interest.

"But your health is of paramount importance and you are perhaps wise in taking your recent illness as a warning that you must return to private pursuits, less exacting, physically and less onerous in their demands on both your time and your strength.

"I realize that I imposed a heavy burden upon you when I asked you to resign as Chairman of the Federal Power Commission and assume the duties of the Chairmanship of the Federal Communications Commission. I know that the task of reorganization, with which you were confronted, was a heavy one, and I appreciate your present conviction that you could not see the work through to completion without continuing with the Commission indefinitely.

"For all that you have done—much of it imposing a tremendous strain on your physical strength—I desire to express gratitude and appreciation. And although your retirement from the public service is deeply regretted I do hope that in the less exacting demands of private life you will find speedy restoration to health and strength. With every good wish.

"Very sincerely yours,

"Franklin D. Roosevelt."

INTERNATIONAL COPYRIGHT TREATY

Senator Thomas (D-Utah) on August 1 announced on the floor of the Senate that the International Copyright Treaty would not be taken up at this session of Congress. This Treaty, known as Executive E, 73rd Congress, has been on the executive calendar of the Senate for some months, and its adoption prior to the passage of adequate copyright amendments has been opposed by most groups affected by the copyright laws. Adherence by the United States to the International Copyright Convention is sponsored by the State Department. A strenuous effort probably will be made at the next session of Congress to obtain Senate approval.

MEMBERSHIP CERTIFICATES

A membership certificate was mailed to all active members of the Association this week. It is hoped that this certificate will be displayed prominently some place in the station. If, after a reasonable length of time, your copy is not received, please advise Headquarters Office as each member was mailed a certificate.

NEW LEGISLATION

CONGRESS

H. R. 7456 (Mr. Kennedy, D-NY) COPYRIGHT—Provides that in network and transcription broadcasts originating station or transcription manufacturer is solely liable for infringement. Referred to Committee on Patents.

FCC CLOSES 290 CASES

The Federal Communications Commission has announced that since November 15, 1938, it had disposed of 290 of a total of 325 broadcast hearing docket cases. Of the 35 not disposed of by the Commission, 12 cannot be acted upon by reason of contingencies beyond the control of the Commission, such as possible conflict with Havana Radio Broadcast Treaty and pending litigation. Of the remaining 23 docket cases decisions are in the course of preparation for early action by the Commission.

In addition to the foregoing 325 cases there are 19 cases recently heard which are not available to the Commission for action because of lack of completion of the cases by litigant parties to the proceedings.

RELAY RULES AMENDED

FCC has amended relay rules, section 41.05(c) to read as follows:

Sec. 41.05—*Power Limitations*

(c) A relay broadcast station assigned frequencies in Groups H and I will be licensed to operate with a power output not in excess of that necessary to transmit the program and orders satisfactorily to the receivers and shall not be operated with a power greater than that licensed. In event interference may be caused to stations on adjacent channels, licensees shall endeavor to make arrangements to reduce power to a point where interference will not be objectionable. If a satisfactory arrangement cannot be agreed upon, the Commission will determine and specify the maximum power or conditions of operation of each such station.

FCC ANNOUNCES ADMINISTRATIVE CHANGES IN ORDER NO. 2

A new administrative order, No. 2, has been issued by the Federal Communications Commission which changes and announces in detail the duties of various officials of the Commission as follows:

Under the authority of the Communications Act of 1934, as amended, particularly Sections 5(e) and 409 thereof,

IT IS ORDERED:

(1)(a)[1] That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, upon:

(a) all applications for operator licenses, and
(b) all applications for amateur and ship stations, and
(c) all applications for renewal of aircraft station licenses, and for new aircraft station licenses in cases where the applicant is the holder of a station license;

(b) That the Secretary of the Federal Communications Commission is hereby authorized to enter the appropriate final order of the Commission in all cases involving applications for radio station authorizations in which proposed findings and conclusions of the Commission have been issued pursuant to the provisions of Section 1.231 of the Commission's Rules of Practice and Procedure and in which no exceptions have been filed within the time prescribed in said section.

(2) That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests and to make appropriate order in letter form for the signature of the Secretary in the following matters:

(a) temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment:
  (1) operation without an approved frequency monitor;
  (2) operation without an approved modulation monitor;
  (3) operation without thermometer in automatic temperature control chamber;
  (4) operation without antenna ammeter, plate voltmeter or plate ammeter;
  (5) operation with substitute ammeter, plate voltmeter or plate ammeter;
  (6) operation with temporary antenna system;
  (7) operation with auxiliary transmitter as main transmitter;
(b) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application;
(c) where formal application is not required, application for new or modified equipment or antenna system;
(d) change of specifications for painting and lighting antenna towers where formal application is not required;
(e) operation to determine power by direct method during program test period;
(f) relocation of transmitter in same building;
(g) operation with reduced power or time under Sections 3.57 and 3.71;
(h) approval of types of equipment as to compliance with outstanding rules and standards;
(i) all authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit;
(j) denial of requests for equipment and program tests where specifications of construction permit have not been met;
(k) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorizations it appears that the terms of the construction permit have not been met;
(l) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission;
(m) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications);
(n) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it become impossible to continue operating at the licensed location;

(2A) That the Chief Accountant of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act upon and to make appropriate order in letter form for the signature of the Secretary in the following matters:

(a) administration and application of regulations promulgated by the Commission pursuant to Section 220 of the Act, relating to accounts, records, and memoranda to be kept by carriers subject to the jurisdiction of the Commission;
(b) applications for extensions of time in which to file annual, monthly, and special reports required by the Commission pursuant to Section 219 of the Act;
(c) administration and application of orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of standard broadcast stations and broadcast networks or chains;

(3)[1] That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to hear and determine, order, certify and report or otherwise act upon all applications for the Aviation, Emergency, and Miscellaneous services, and for special authorizations other than those falling under paragraph (1), (2), (4), (5) or (6) (b) of this Order; and for emergency exemptions from the provisions of Section 352 (b) of the Act:

(4)[1] That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon all applications in the broadcast service as follows: for licenses following construction which comply with the construction permit; applications for construction permit and modification of construction permit involving only a change in equipment; applications for extensions of time within which to commence and complete construction; applications to install frequency control equipment; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization, in a manner not inconsistent with the established policy of the Commission; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter sites; and applications for relay broadcast stations;

(5)[1] That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon all radio matters of every character (except broadcast, and cases falling under paragraph (1) of this Order) within the territory of Alaska;

(6) That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to determine, order, certify, report or otherwise act upon all uncontested proceedings involved in:

(a) the issuance of certificates of convenience and necessity and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act;

(b)[1] applications for instruments of authorization for the Fixed Public or Fixed Public Press radio services, except applications involving (1) new points of communication (2) changes in transmitter location other than local in character, (3) assignment of additional frequencies, or (4) involving change of policy by the Commission the revocation of station license, or the establishment of a new type of service.

(7) That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to determine and act upon all matters arising in connection with the administration of tariff regulations promulgated by the Commission pursuant to Section 203 of the Act and in connection with the administration of this section in so far as it relates to the modification of requirements

---

[1] Applications for Class II experimental stations, directed toward the development of an established radio service only, shall be included among the classes of applications covered by the delegation of authority contained in the paragraphs designated [1], for the classes of service covered in such paragraphs.

[1] Applications for Class II experimental stations, directed toward the development of an established radio service only, shall be included among the classes of applications covered by the delegation of authority contained in the paragraphs designated [1], for the classes of service covered in such paragraphs.

thereof or made pursuant thereto, as authorized in particular instances by subsection (b) thereof, and to the rejection of tariffs as authorized by subsection (d) thereof.

(8) That a Commissioner, to be selected and appointed by subsequent supplement or supplements to this Order by the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided however that except in cases of emergency such matters shall be heard upon the motions docket in accordance with the provisions of Sections 1.251 to 1.256, inclusive, of the Commission's Rules of Practice and Procedure;

IT IS FURTHER ORDERED:

That this Order shall become effective August 1, 1939, and that effective simultaneously Commission Order No. 28 of November 29, 1937, as amended, be and the same is hereby, repealed.

FEDERAL COMMUNICATIONS COMMISSION,
John B. Reynolds,
Acting Secretary.

Adopted: July 12, 1939.
Amended: July 26, 1939.

TELEVISION BANDS

The FCC has simplified the identification of various television bands. In this connection the Commission has made the following statement:

> The Commission on July 12, 1939, amended Section 43.13(a) (to be renumbered Sec. 4.74(a)), of the Commission's Rules governing television service, to read as follows:
>
> Sec. 43.13(a).
>
> (a) The following groups of channels, as indicated by a channel designation, are allocated for assignment to television broadcast stations licensed experimentally:
>
> *Group A*
>
> Channel No. 1—44,000–50,000 kc.
> " " 2—50,000–56,000 kc.
> " " 3—66,000–72,000 kc.
> " " 4—78,000–84,000 kc.
> " " 5—84,000–90,000 kc.
> " " 6—96,000–102,000 kc.
> " " 7—102,000–108,000 kc.
>
> *Group B*
>
> Channel No. 8—156,000–162,000 kc.
> " " 9—162,000–168,000 kc.
> " " 10—180,000–186,000 kc.
> " " 11—186,000–192,000 kc.
> " " 12—204,000–210,000 kc.
> " " 13—210,000–216,000 kc.
> " " 14—234,000–240,000 kc.
> " " 15—240,000–246,000 kc.
> " " 16—258,000–264,000 kc.
> " " 17—264,000–270,000 kc.
> " " 18—282,000–288,000 kc.
> " " 19—288,000–294,000 kc.
>
> *Group C*
>
> Any 6,000 kc. band above 300,000 kc., excluding the band 400,000–401,000 kc.

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF COMMISSION

The Federal Communications Commission has granted the application of Orville W. Lyerla for a construction permit for the erection of a new station at **Herrin, Illinois,** to operate on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

The application of Station KFVS at **Cape Girardeau, Missouri,** to operate unlimited time on **1210 kilocycles,** 100 watts night, 250 watts LS, instead of sharing time with Station WEBQ was denied without prejudice by the Commission.

In the same decision, the Commission also denied without prejudice the application of WEBQ requesting change in frequency from **1210 kilocycles** to **1310 kilocycles,** with power of 100 watts night, 250 watts LS, sharing time with KFVS.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The next regular meeting of the Commission will be on August 8.

The following hearing is scheduled by the Commission in a broadcast case during the week beginning Monday, August 7. It is subject to change.

Monday, August 7

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—In the Matter of: Order to show cause why the license to operate Radiobroadcast Station WLTH should not be revoked.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings and oral arguments. They are subject to change.

September 14

Oral Argument Before the Commission

WPG—Greater New York Broadcasting Corp., Atlantic City, N. J. (proposed studio location, New York, N. Y.) (proposed transfer location, Kearney, N. J.).—C. P., **1100 kc.,** 5 KW, unlimited time (requests facilities of WOV and WBIL). Present assignment: **1100 kc.,** 5 KW, specified hours (WBIL).

WPG—City of Atlantic City, (Assignor), Greater New York Broadcasting Corp. (Assignee), Atlantic City, N. J.—Voluntary assignment of license, **1100 kc.,** 5 KW, specified hours (WBIL).

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—C. P., **1240 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—The Moody Bible Institute, Radio Station, Chicago, Ill.—C. P., **41,300 kc.,** 100 watts Emission A-3, unlimited time.

October 10

WHDH—Matheson Radio Co., Inc., Boston, Mass.—C. P., **830 kc.,** 5 KW, 5KW LS unlimited time (DA night). Present assignment: **830 kc.,** 1 GW daytime.

October 19

Reargument Before the Commission

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—Renewal of license., **1400 kc.,** 500 watts, shares WARD, WBBC and WVFW.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Renewal of license, **1400 kc.,** 500 watts, shares WBBC, WLTH and WVFW.

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Modification of license, **1400 kc.,** 500 watts, shares WARD, WLTH and WVFW.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

KNEL—G. L. Burns, Brady, Tex.—Granted Order to Take Depositions in re application for modification of license.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Overruled motion to dismiss respondent's appearance (WFBR, Baltimore), in re application of WLAP for C. P. to change frequency, etc.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Overruled motion to dismiss respondent's appearance (WHIO, Miami Valley Broadcasting Corp.), in re WLAP's application for C. P. to change frequency, etc.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Overruled motion to dismiss respondent's appearance (WASH and WOOD—King-Trendle Broadcasting Corp.), in re WLAP's application for C. P. to change frequency, etc.

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Motion overruled, exception noted by counsel for WMT, for petition to intervene and that the issues to be determined upon hearing be enlarged, in re application of The Gazette Co., Cedar Rapids, Iowa, for a new station.

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Attorney for WXYZ allowed to withdraw petition to dismiss without prejudice or for leave to amend application for C. P. to increase power from 1 KW to 5 KW.

WDAF—The Kansas City Star Co., Kansas City, Mo.—Granted motion to accept amendment so that the application will be considered as a modification of license to increase night power to 5 KW.

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted special temporary authority to broadcast test signals radiated from general experiment station W2XGB from 10:15 to 10:30 p. m., EST, July 27, in connection with a special program attempting to communicate with Mars.

WBRY—American Republican, Inc., Waterbury, Conn.—Granted special temporary authority to operate with the present two unit directional antenna in accordance with experimental authority granted under license for period August 1 to August 30, 1939, in order to determine necessary steps to change from a special to a standard broadcast station.

NEW—Bellingham Broadcasting Co., Bellingham, Wash.; KVOS, Inc., Bellingham, Wash.—Postponed hearing scheduled in Bellingham for August 10, until August 16, to be heard by Commissioner Payne.

WCMI—J. T. Norris and B. F. Forgey, Ashland, Ky.—Granted application for transfer of control of Ashland Broadcasting Company (Radio Station WCMI), to Gilmore N. Nunn and J. Lindsay Nunn.

KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—Granted license to cover C. P. authorizing increase in nighttime power from 500 watts to 1 KW, employing DA at night, and changes in equipment.

KWFT—Wichita Broadcasting Co., Wichita Falls, Tex.—Granted license to cover C. P. authorizing new station to operate on **620 kc.,** 250 watts night, 1 KW day, unlimited time.

WAIF—WGN, Inc., Chicago, Ill., Portable-Mobile.—Granted license to cover C. P. for high frequency relay broadcast station; frequencies **31620, 35260, 37340** and **39620 kc.;** 25 watts.

WAIG—WGN, Inc., Chicago, Ill., Portable-Mobile.—Granted license to cover C. P. for high frequency relay broadcast station; frequencies **31620, 35260, 37340** and **39620 kc.;** 1 watt.

WAIH—WGN, Inc., Chicago, Ill., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station; frequencies **1622, 2058, 2150** and **2790 kc.;** 50 watts

W9XEG—Martin R. O'Brien, Aurora, Ill., Portable-Mobile.—Granted license to cover C. P. for new high frequency broadcast station; frequencies **30820, 33740, 35820** and **37980 kc.;** 6 watts

W7XCY—Oregonian Publishing Co., Portland, Ore., Portable-Mobile.—Granted license to cover C. P. for relay broadcast station; frequencies **31220, 35620, 37020** and **39260 kc.;** 4.5 watts.

WPIV—Petersburg Newspaper Corp., Petersburg, Va.—Granted modification of C. P. approving transmitter and studio sites at Colonial Heights, Va., and corner Sycamore and Tabb Sts., Petersburg, respectively, and installation of vertical radiator.

W9XAZ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of C. P. to extend commencement date to 30 days after grant, and completion date to 90 days thereafter; to permit change of transmitter site locally; and to specify frequency of **42260 kc.** as provided by new rules in lieu of frequencies now specified in terms of C. P.; frequency **42260 kc.** on an experimental basis conditionally.

W3XIS—WLBG, Inc., Richmond, Va., Portable-Mobile.—Granted modification of license to change corporate name from WLBG, Inc., to Richmond Radio Corp.

WAHM—WLBG, Inc., Richmond, Va., Portable-Mobile.—Granted modification of C. P. to change corporate name from WLBG, Inc., to Richmond Radio Corp.

WJNO—WJNO, Inc., West Palm Beach, Fla.—Granted C. P. to install new equipment in broadcast station.

NEW—Central New York Broadcasting Corp., Syracuse, N. Y., Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station; frequencies **31220, 35620, 37020** and **39260 kc.;** 12 watts.

NEW—WJR, The Goodwill Station, Area of Detroit, Mich., Portable-Mobile.—Granted C. P. for new relay broadcast station to use frequencies **1646, 2090, 2190, 2830 kc.;** 150 watts.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted extension of special temporary authority to operate from 11 p. m. to 12 midnight, EST, for the period August 1 to August 30, in order to broadcast programs as described in letter of May 27.

KVEC—The Valley Electric Co., San Luis Obispo, Calif.—Granted special temporary authority to rebroadcast a special sky interview between the California Guard North American 0-47 airplane operating on National Guard frequencies and the ground at 1:30 p. m., PST, July 28.

WPG—City of Atlantic City (Assignor), and Greater New York Broadcasting Corp. (Assignee).—Oral argument scheduled for September 14, 1939.

WMFF—Plattsburg Broadcasting Corp., New York City.—Oral argument scheduled for September 14, 1939.

NEW—The Moody Bible Institute Radio Station, Chicago, Ill.—Oral argument scheduled for September 14, 1939.

W9XJM—WCBS, Inc., Springfield, Ill., Portable-Mobile.—Granted C. P. to make changes in equipment and increase power in relay broadcast station to 10 watts.

KFXJ—Western Slope Broadcasting Co., Grand Junction, Colo.—Granted C. P. to install new equipment and vertical radiator, upon condition that towers are marked according to specifications.

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Granted license to cover C. P. authorizing installation of DA system for day and nighttime operation.

WAHM—Richmond Radio Corp., Portable-Mobile, Richmond, Va.—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2748 kc.,** 50 watts.

WAHF—WTAR Radio Corp., Norfolk, Va., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.,** 50 watts.

NEW—Central Broadcasting Corp., Worcester, Mass.—Dismissed with prejudice the application of Central Broadcasting Corp. for C. P. to operate on **1500 kc.,** 100 watts night, 250 watts LS, at request of applicant.

NEW—Hannibal Broadcasting Co., St. Louis, Mo.—Denied as in case of default application for C. P. for new station to operate on **1310 kc.,** 100 watts, unlimited time, which was set for further hearing in conjunction with Courier Post Publishing Company's application, as applicant failed to file written appearance.

W6XAO—Don Lee Broadcasting System, Los Angeles, Calif.—Granted C. P. to change present location of television station from Los Angeles to 1 Lee Drive, Hollywood, and specify specific frequency band of **44000-50000 kc.**, as provided under new rules in lieu of frequencies specified in present authority, frequencies **44000** to **50000 kc.**, on an experimental basis only conditionally, 150 watts aural, 1 KW visual.

NEW—Central New York Broadcasting Corp., Syracuse, N. Y., Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.**, 12 watts.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted license to cover C. P. for auxiliary transmitter.

WDAC—University of Wisconsin, Madison, Wis.—Granted license to cover C. P. for new relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.**, 10 watts.

WDAC—University of Wisconsin, Madison, Wis., Portable-Mobile.—Granted modification of C. P. to make changes in equipment of relay station.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted license to cover C. P. authorizing changes in equipment.

W9XER—Midland Broadcasting Co., Inc., Kansas City, Mo.—Granted license to cover C. P. for high frequency broadcast station to use frequency **42460 kc.**, conditionally, 500 watts.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Granted extension of commencement date to 8-1-39 and completion date to 2-1-40, covering move of station, increase in power, and installation of new equipment.

WMAN—M & M Broadcasting Co., Marinette, Wis.—Granted modification of C. P. authorizing new station, approving antenna and studio transmitter site.

W9XZY—The Pulitzer Publishing Co., St. Louis, Mo.—Granted special temporary authority to operate upon present assigned frequencies **31600, 35600, 38600** and **41000 kc.**, instead of upon new frequencies, effective under new rules for period of 10 days, pending receipt and installation of new crystal and modifications of equipment in the receivers.

W9XPD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted special temporary authority to operate station W9XPD (high frequency broadcast) upon the present assigned frequencies **31600, 35600, 38600** and **41000 kc.**, instead of **25900 kc.** to be assigned August 1 under new rules, for period of 10 days in order to maintain a continuity of service and experimentation pending installation of new crystal.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate from 6:45 p. m., CST to midnight or later on August 5, in order to broadcast primary election results, using 100 watts only.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted special temporary authority to operate from local sunset (August, 7:30 p. m., EST), to 11 p. m., EST on August 1, in order to broadcast civic celebration in City of Williamson.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Granted special temporary authority to operate on the frequency **2012 kc.** for period August 1 to August 30, in order to avoid interruption of important experiments with improved independent synchronization system.

WEHA—City of New York, Municipal Broadcasting System, Portable-Mobile.—Granted special temporary authority to operate on formerly assigned frequencies **300,000, 450,000, 600,000** and **750,000 kc.**, in lieu of frequencies assigned under new rules, for the period August 1 to August 30, pending transmitter modification.

WNYC—City of New York, Municipal Broadcasting System, Portable-Mobile, New York City.—Granted special temporary authority to operate from 8:15 to 9 p. m., EST, on August 6, in order to broadcast continuation of New York Philharmonic Symphony concert and from 8:15 to 9 p. m., EST, on August 7, in order to broadcast continuation of Goldman Band concert.

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.—Granted special temporary authority to operate from 6:30 to 8 p. m., CST, on August 10 and 11 and from 12:30 to 3:30 p. m., and 6:30 to 8 p. m., CST, on August 12, in order to broadcast district softball tournament.

WAID—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted special temporary authority to use equipment described in application with 20 watts on frequencies **2190** and **2830 kc.**, various hours between 12 noon and 6 p. m., EDST, on August 11, 12 and 13, in order to broadcast description of Eastern Amateur Golf Tournament, Syracuse Yacht Club, Oneida Lake, N. Y.

APPLICATIONS FILED AT FCC

580 Kilocycles

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Modification of C. P. (B2-P-2334) to make changes in transmitting equipment, increase power, further requesting authority to change type of transmitting equipment.

610 Kilocycles

WIOD-WMBF—Isle of Dreams, Broadcasting Corp., Miami, Fla.—Construction permit to make changes in equipment.

640 Kilocycles

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—Construction permit to make changes in transmitting equipment and move transmitter locally from College Campus, to Campus Iowa State College (700 feet), Ames, Iowa, and move studio from Engineering Annex, College Campus, to Service Bldg., Iowa State College, Ames, Iowa.

650 Kilocycles

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Construction permit to install now transmitter, make antenna changes, change frequency from **650** to **710 kc.**, increase power from 250 watts to 5 kilowatt; 10 kilowatts day, time from limited to unlimited, and move transmitter from 2nd and Union Sts., Seattle, Wash., to site to be determined, near Seattle, Wash.

850 Kilocycles

KWKH—International Broadcasting Corp., Shreveport, La.—Modification of MSA (B3-MSA-46) to install new transmitter, increase power from 10 to 50 kilowatts, move transmitter, further requesting changes in equipment.

1200 Kilocycles

WIL—Missouri Broadcasting Corporation, St. Louis, Mo.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KVEC—Christina M. Jacobson, tr/as The Valley Electric Co., San Luis Obispo, Calif.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1210 Kilocycles

WTMA—Y. W. Scarborough and J. W. Orvin, d/b as Atlantic Coast Broadcasting Co., Charleston, S. C.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1270 Kilocycles

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—License to cover C. P. B1-P-2421 to move old RCA 1001-D transmitter to site of new transmitter, to be used as auxiliary transmitter; increase power to 1 KW; use directional antenna day and night, for emergency use only.

1290 Kilocycles

KDYL—Intermountain Broadcasting Corporation, Salt Lake City, Utah.—Modification of license to increase power from 1 KW, 5 KW LS, to 5 KW day and night.

1310 Kilocycles

NEW—L. J. Duncan, Lelia A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Construction permit for a new station on **1310 kc.**, 100 watts night, 250 watts day, unlimited time. Amended to request 250 watts power day and night.

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

KBND—The Bend Bulletin, Bend, Ore.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Construction permit to move transmitter 50 feet from Lower Hogback, Jerome, Ariz., to Main Road, Jerome, Ariz., and studio from 711 Main St., Jerome, Ariz., to Main Road (across from High School), Jerome, Ariz. Amended: Antenna.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KSRO—Press Democrat Publishing Co., Santa Rosa, Calif.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1320 Kilocycles

KGHF—Curtis P. Ritchie, Pueblo, Colo.—Construction permit to install new vertical antenna, move transmitter from 111 Broadway, Pueblo, Colo., to corner Lake and Maryland Ave., Pueblo, Colo.

1370 Kilocycles

WCNC—Aubrey G. McCabe and Trim W. Aydlett, d/b as Albemarle Broadcasting Co., Elizabeth City, N. C.—Modification of C. P. (B3-P-2269) for a new station, requesting approval of antenna, installation of new transmitter, approval of studio site at 104 E. Colonial Ave., Elizabeth City, N. C., and transmitter site at Parsonage St., Extended, 3 miles northwest of city limits, Elizabeth City, N. C.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Modification of C. P. (B2-P-2287) to install new antenna for auxiliary transmitter and move, further requesting extension of completion date to 11-1-39.

1420 Kilocycles

WCHV—Community Broadcasting Corp., Charlottesville, Va.—Modification of license to increase power from 100; 250 watts LS to 250 watts day and night.

WMBC—Michigan Broadcasting Co., Detroit, Mich.—Modification of license to increase power from 100; 250 watts LS to 250 watts day and night.

KCMC—KCMC, Inc., Texarkana, Tex.—Modification of license to increase power from 100; 250 watts day to 250 watts day and night.

WEED—William Avera Wynne, Rocky Mount, N. C.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WJMS—WJMS, Inc., Ironwood, Mich.—Construction permit to make changes in equipment and increase power from 100 watts to 100 watts night, 250 watts day. Amended to request 250 watts power day and night.

WSLI—Standard Life Insurance Company of the South, Jackson, Miss.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

1500 Kilocycles

KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Calif.—Construction permit to install new transmitter and antenna; change frequency from **1500 kc.** to **1430 kc.**; increase power from 100 watts night, 250 watts day, to 1 KW day and night; move transmitter from 15-17 East Haley St. to site to be determined, Santa Barbara, Calif.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Construction permit to install new transmitter and antenna and move transmitter from 134 Miami St., Pittsburgh, Pa., to 341 Rising Main St., Pittsburgh, Pa. Amended: Make changes in antenna and change type of transmitting equipment.

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

MISCELLANEOUS

NEW—National Broadcasting Company, Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station on **42600 kc.**, 1 KW power, A-3 and special emission, to be located at 350 Fifth Avenue, New York, N. Y.

NEW—Bell Telephone Laboratories, Inc., Whippany, N. J.—Construction permit for a new developmental broadcast station at Whippany, N. J., on **43200 kc.**, 5 KW power, special emission.

WFYA—Central New York Broadcasting Corp., Portable-Mobile, area of Syracuse, N. Y.—License to cover C. P. (B1-PRY-182) for new low frequency relay station.

W1XEH—Travelers Broadcasting Service Corp., Avon, Conn.—Modification of license to change class of station from developmental broadcast to high frequency broadcast and change frequency from **63500** to **42460 kc.**, A-3 emission.

NEW—The Cincinnati Times-Star Company, Cincinnati, Ohio.—Construction permit for a new facsimile station at Vernon Manor, Hotel, Oak St., and Burnet Avenue, Cincinnati, Ohio, on **25175 kc.**, 100 watts power, A-4.

WJRA—WJR, The Goodwill Station, Portable-Mobile, area of Detroit, Michigan.—License to cover C. P. (B2-PRY-170) for a new low frequency relay broadcast station.

WEGY—Chicago Federation of Labor, Portable-Mobile, Chicago, Ill.—Construction permit for change in equipment and reduce power from 30 watts to 15 watts.

NEW—WDZ Broadcasting Co., Portable-Mobile, area, Tuscola, Ill.—Construction permit for a new relay broadcast station (Portable-Mobile), on **1622, 2058, 2150** and **2790 kc.**, 10 watts power, A3.

NEW—Peoria Broadcasting Co., Portable-Mobile, area of Peoria, Ill.—Construction permit for a new relay broadcast station on **1622, 2058, 2150,** and **2790 kc.**, 25 watts, A3.

NEW—Symons Broadcasting Co., Spokane, Wash.—Construction permit for new facsimile station located at Symons Bldg., S. 7th Howard St., Spokane, Wash., on **25150 kc.**, 100 watts power, A4.

NEW—Midland Broadcasting Co., Kansas City, Mo.—C. P. for new television station located at 106 West 14th St., Kansas City, Mo., operated on **50000-56000 kc.**, 1 KW power, for visual, and 500 watts for aural, A3 and A5, emission.

XXXXX—National Broadcasting Company, Inc., New York, N. Y.—Extension of authority to transmit recorded programs to all broadcast stations in Canada licensed to operate by the Canadian Government which may be heard consistently in the United States, for period beginning 9-15-39.

XXXXXX—First Baptist Church, Pontiac, Mich.—Extension of authority to transmit programs from First Baptist Church at Pontiac, Mich, to Radio Station CKLW, Windsor, Ontario, Canada, for period beginning 8-13-39.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Heller & Newman, Inc.—A complaint against Heller & Newman, Inc., 250 West 39th St., New York, alleges false representations in the sale and distribution of ladies' coats.

The complaint charges that the respondent labelled garments with the legend "Harris Tweed," when such garments were not made of genuine "Harris Tweed" but were manufactured in the United States from wool imported from England. According to the complaint, "Harris Tweed" is a cloth made from pure virgin wool produced in Scotland, spun, dyed and finished in the Outer Hebrides Islands and hand woven by the Islanders at their homes in the Outer Hebrides. (3859)

National Coin Corporation and John Romano, 8 South Oleander Ave., Daytona Beach, Fla., were charged, in a complaint with false and misleading advertising in the sale of a coin catalog.

It is alleged that in order to induce the purchase of their coin catalog, the respondents advertised prices to be paid by them for old and rare coins, specifying that purchases would be made only from those persons having the respondents' coin catalog. Representations as to the values of old coins generally, and the price that the respondents will pay for them are alleged to be false and misleading. For example, the respondents allegedly advertise that they will pay $450 or more for all dimes bearing dates prior to the year 1895. Members of the purchasing public, it is charged, then purchase the respondents' catalog only to find that the respondents do not pay such sums for all dates prior to 1895, but for only one dime dated prior to 1895, which is an "1894 Mint" dime.

An alleged condition which the respondents place on their purchase of rare coins and with respect to which prospective purchasers of the coin catalog are not advised is the requirement for prospective sellers of coins to post with the respondents a $1 appraisal fee, which fee is returned by the respondents only in the event of the purchase of a coin or coins by the respondents in the amount of $5 or more. (3862)

Shanks Laboratories—In a complaint, W. H. Shanks, W. J. Goggin, Clara Shanks, and Jessie G. Goggin, all trading as Shanks Laboratories, Columbus, Ohio, are alleged to have made false representations in the sale of a medicinal preparation designated "Shanks Mange Lotion."

The complaint alleges the respondents' advertising to be false in that their preparation is not, as advertised, a remedy, cure, or competent treatment for eczema, abscesses, all types of mange, all varieties of cuts or sores, or for all other diseases or disorders of the skin on dogs, and that use of "Shanks Mange Lotion" will not, in all cases, cause hair to grow on dogs. According to the complaint, the respondents' preparation is not a therapeutically guaranteed treatment for itching scalps or scratching dogs. (3860)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Mme. Adele—Adele Millar, trading as Mme. Adele and Chez Adele, San Francisco, has been ordered to discontinue false representations in the sale and distribution of a cosmetic preparation designated "Wonder Peel Paste," or any other similar preparation.

Under the order, the respondent is prohibited from representing that her preparation will withdraw toxins from the skin, accelerate chemical changes in the living skin cells, or supply materials to the skin to repair waste tissues; that its use will prevent or remove freckles, liver spots or wrinkles; that it will prevent or remove or have any beneficial effect in aiding in the removal of, any blemishes or other conditions of the skin which are due to or persist because of a systemic or metabolic disorder or condition; that it will prevent pimples, blackheads, puffs, scars, pits, acne or crepey neck, and that it has any beneficial effect in aiding in the removal of pimples, blackheads, puffs, scars, pits, acne or crepey neck, unless such representation is limited to those conditions which are of a surface character only. (3346)

Philadelphia Rubber Waste Company, Philadelphia, and Albert Schwartz, Isadore M. Engel, and Simon Sperberg, copartners, trading as Philco Rubber Company, Philco Rubber Sales Company, Philco Auto Supply, Philco Auto & Rubber Supply, and Philco Spark Plug Company, Washington, D. C., and Richmond, Va., were ordered to discontinue the unauthorized use of a well-known trade name in the sale and distribution of their merchandise.

The Commission finds that by labelling automobile inner tubes, spark plugs, and repair parts for tires and tubes with the designation "Philco" and by using the term "Philco" in their trade names, the respondents had represented to the purchasing public that their products were manufactured by the Philadelphia Storage Battery Company, a firm which for many years has manufactured radios and other electrical devices and had used the trade name "Philco" long before its adoption by the respondents.

Under the order, the respondents are prohibited from representing, directly or by inference, through the use of the trade name "Philco" or any colorable simulation thereof, or in any other manner, that merchandise manufactured by manufacturers other than the Philadelphia Storage Battery Company or its licensees, successors or assignees, are "Philco" products or are made by or under license from the Philadelphia Storage Battery Company. (3010)

Philco Auto Supply—See Philadelphia Rubber Waste Company.

Philco Auto & Rubber Supply—See Philadelphia Rubber Waste Company.

Philco Rubber Company—See Philadelphia Rubber Waste Company.

Philco Spark Plug Company—See Philadelphia Rubber Waste Company.

STIPULATIONS

The Commission has entered into the following stipulations:

Consumers Glue Company, St. Louis, Mo., engaged in the manufacture, sale and distribution of casein glue, entered into a stipulation to discontinue representations that its casein glue is "waterproof," when such is not the fact. (2497)

Hagen Import Company and its officers, H. E. Becker, Mrs. Anna Becker and Arthur K. Lueders, St. Paul, Minn., entered into a stipulation to discontinue false representations in the sale and distribution of medicinal products. (2495)

Howard Drug and Medicine Company, trading as Planter Medicine Company, Baltimore, entered into a stipulation to discontinue false representations in the sale and distribution of pills or tablets designated "Planter's Benedicta Tablets" and formerly known as "Planter's Monthly Regulating Pills."

Under the stipulation, the respondent agreed to cease representing directly or by implication that its preparation will correct all, or any, irregularities of the menses or monthly flow, or will make women's pains unnecessary, or that the use of its preparation will have any beneficial effect in such conditions other than as a purgative in cases of intestinal stasis. (2493)

Hudgins Fish Company, West Palm Beach, Fla., entered into a stipulation to discontinue misleading representations in the sale and distribution of food fish products.

The stipulation shows that the respondent advertised sea crayfish obtained off the coast of Florida as "Choice Southern Lobsters," "Fresh Picked Lobster Meat" and as "Lob. Meat," which product was then offered by retailers to the public as "Fresh Fancy Lobster Meat." The stipulation further indicates that the term "Lobster" has long been associated by the consuming public with the genus Homarus, the true American lobster found only along the coast from North Carolina to Labrador. (2494)

Lambert Pharmacal Company, St. Louis, manufacturer of "Listerine Antiseptic", has entered into a stipulation to cease and desist from representing by direct statement or by inference that all dandruff is due to an infection with Pityrosporon ovale or any other organism; that dandruff necessarily is a germ disease; that the dandruff germ has been isolated or identified; that the presence of Pityrosporon ovale necessarily means dandruff or that with its destruction dandruff disappears; that dandruff is necessarily infectious, contagious or "catching" or is in all instances passed from one person to another, or that any of the foregoing assertions have been proven by findings of scientists or otherwise, or is a "scientific fact" or a "fact definitely established by scientists".

It is also stipulated that the respondent desist from representing that the product either cures or permanently relieves dandruff; that the product "kills the dandruff germ", "attacks the cause of dandruff" or "gets at the cause" or "at the root of the trouble" or penetrates infected hair follicles or "annihilates" the dandruff germ; that the product frees the scalp and hair follicles of the parasite that saps their vitality or "spreads a germ-killing film over the scalp"; that the product has "marked curative properties due to certain ingredients in a unique combination shared by no other antiseptic"; that ordinary remedies "aren't even antiseptic", are "smelly", affect only surface symptoms, or merely remove surface symptoms temporarily, or that competitive products are obviously inferior to "Listerine Antiseptic" as a remedy for dandruff—when such are not the facts. (2502)

Planter Medicine Company—See Howard Drug & Medicine Company.

T. Riessner—George Lerch, trading as T. Riessner, New York, entered into a stipulation to discontinue the misbranding of bronze powder.

In the stipulation, the respondent agreed to cease labeling containers of bronze powder with the word "aluminum" either alone or in connection with the word "pure" or with the words "chemically pure" or any other words which would imply that the product is composed of aluminum or of pure aluminum or of chemically pure aluminum. (2492)

Seaboard Novelty Company—In a stipulation entered into, Ben Mermelstein, trading as Seaboard Novelty Company, 1909 Quentin Road, Brooklyn, N. Y., agreed to discontinue lottery methods in the sale and distribution of merchandise novelties to ultimate consumers.

Under the stipulation, the respondent is to cease supplying others with lottery devices which may enable such persons to dispose of or sell any merchandise, and to cease selling or disposing of any merchandise by the use of lottery devices. (2500)

William E. Wright & Sons Company, a New Jersey corporation, of West Warren, Mass., entered into a stipulation to discontinue false and misleading representations in the sale and distribution of seam bindings, including bias tapes, rickrack (braid), frillings and novelty trimmings.

Under the stipulation, the respondent agreed to cease using the word "Taffeta" to describe a product not composed of silk, or implying in any other way that the product referred to is composed of silk, when such is not the fact. If the word "Taffeta" is used properly to describe the type of construction of a rayon or celanese rayon fabric, the respondent shall cause the word "Taffeta" to be immediately accompanied by the word "rayon" or the words "celanese rayon" printed in equally conspicuous type so as to indicate clearly that the product is in fact rayon or celanese rayon. The respondent also agreed to cease representing a rayon or celanese rayon product as being something other than such rayon. (2496)

FCC Assignments For August

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF August
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	Commissioner Paul A. Walker
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	Commissioner Norman S. Case
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	Commissioner T. A. M. Craven
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	Commissioner George Henry Payne
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	Commissioner Frederick I. Thompson
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	Commissioner Thad H. Brown
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	Secretary T. J. Slowie
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location."	Chief Engineer Ewell K. Jett

Reports
NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 32, August 11, 1939

New Sources of Music Sought, Independent of ASCAP

Sydney M. Kaye yesterday was engaged as special counsel to complete the drafting of final plans to develop new sources of music for the radio industry independent of ASCAP.

This announcement was made by Neville Miller, NAB president, following a two-day meeting of the NAB Copyright Committee in New York.

Mr. Kaye is regarded as one of the outstanding copyright lawyers in the nation. He is thoroughly conversant with broadcasting and its operating problems. He possesses a wide knowledge of the music publishing business and has extensive acquaintances throughout the music publishing world.

Mr. Kaye's appointment was the latest in a series of developments which followed the collapse of negotiations with ASCAP last week when John Paine, General Manager of the Society, told the NAB Committee that ASCAP had no proposal to make, and that Mr. Buck, its president, had departed on vacation without appointing a committee to negotiate with NAB.

Following this development, Mr. Miller and his committee called a special convention of the industry to be held in Chicago, September 15. The committee acted upon the direct mandate of the July NAB Convention, which empowered it to call an emergency meeting if it felt that the welfare of the industry was threatened by tolerating further delay in ASCAP negotiations.

Phonograph Record Fee Conferences

A special committee consisting of Neville Miller; John Elmer, WCBM, Baltimore, Maryland; and Clair McCollough, WGAL, Lancaster, Pennsylvania, met with representatives of the Victor Record Manufacturing Company, August 10, to discuss a plan proposed by the Victor Record Company for licensing radio stations to play their records. It is reported that the Victor Record Company has prepared contracts to be submitted to stations. However, they have agreed to meet again on August 22, in New York City, with a NAB committee. Neville Miller appointed the following committee to carry on negotiations with record manufacturers: Neville Miller, Chairman; John Elmer; Clair McCollough; John Shepard, 3rd, Yankee Network, Boston, Massachusetts; and Alexander Dannenbaum, Jr., WDAS, Philadelphia, Pennsylvania.

The committee of three mentioned above contacted the Decca Record Company and the Columbia Recording Company also on August 10 in regard to their plans for licensing radio stations to use their records. Both of these companies agreed

PHONOGRAPH RECORD FEE CONFERENCES

(Continued from page 3651)

to meet with the newly appointed committee at a later date.

Mr. Miller stated that final terms of the proposed RCA plan of the licensing arrangements had not yet been devised and probably would be consummated at the August 22 conference.

RCA TO DEMAND PAYMENT FOR USE OF RECORDS

The RCA Manufacturing Company, Inc., has sent the following letter to broadcasting stations, stating that it will demand payment for use of Victor and Bluebird records after October 1, 1939:

RCA MANUFACTURING COMPANY, INC.
Camden, N. J.

August 5, 1939.

Radio Station ———

GENTLEMEN:

Under date of January 4, 1938, we wrote to all broadcasting stations in connection with the use of our Victor and Bluebird phonograph records for radio broadcast purposes. Copy of the letter is enclosed herewith for your ready reference. In our letter we requested that stations which were using our records over the air arrange for prompt discontinuance of that practice. Following the sending of the letter a great many of the stations replied that they had a number of our records on hand and in some instances had made commitments to customers involving the use of such records. These stations asked for additional time within which to make the necessary changes.

Because we wished to be entirely fair and reasonable with the stations and because of the pendency of certain litigation which we believed would judicially determine our rights in the matter, we then issued to stations requesting it, written assurance that until further notice from us to the contrary we would not make their use of our records the basis of any claim against them.

The litigation referred to has now been determined and the court has held that the use of our phonograph records for radio broadcast purposes infringes our rights, constitutes unfair competition and may be enjoined by us (RCA Manufacturing Company, Inc. vs. W. B. O. Broadcasting Corporation, Elin, Inc., and Paul Whiteman, decided in the United States District Court for the Southern District of New York on July 24, 1939).

The use of our records for radio broadcast purposes has resulted in materially increasing our production costs. Musicians have made the practice one of the reasons for substantially increasing their charge to us for their services. Indiscriminate use of records over the air shortens the period during which the records are salable and deprives us of many potential customers. Certain of our recording artists have complained that they do not like it and in some instances have actually refused to make any additional records unless we could and would undertake to keep them off the air, thus depriving us of the opportunity to contract for the services of these artists.

In view of this situation we have concluded that we cannot continue to permit stations to use our phonograph records unless they are prepared to pay us reasonable compensation therefor and to abide by such reasonable regulations as may be necessary. We are therefore preparing a plan which will make available to the stations a majority of our Victor and Bluebird phonograph records. Details of this plan will be sent to you within the next few days so that you may study it and determine whether you wish to adopt it.

Pending announcement of the plan and so that you may have a further opportunity to determine what course you will wish to pursue in the matter, we now advise you that, effective October 1, 1939, all of the letters of assurance from time to time issued by us to radio broadcasting stations in connection with their use of our records for broadcasting purposes are withdrawn. This notice does not of course apply to our record programs "Music You Want," "Weekly Victor Record Review" and "RCA Victor Musical Clock," which programs are broadcast pursuant to the terms of special licenses heretofore issued to us.

With renewed assurances of our desire to cooperate with you at all times, we are,

Very truly yours,
RCA MANUFACTURING COMPANY, INC.
By W. W. EARLY, *Manager,*
Recording and Record Sales.

BROWN DISCUSSES CENSORSHIP

Commissioner Thad H. Brown of the FCC made the following remarks about government censorship of broadcasting at the closing session of the conference on the use of radio for the public welfare at Harvard University on August 4:

I deem it a high honor and a distinct privilege to address this concluding session of the Conference on the Use of Radio for the Public Welfare at the Harvard Summer School. I speak to you tonight as one who has had over twelve years of experience in radio broadcasting, first as President and General Manager of a broadcasting station in the city of Cleveland, Ohio; then in 1929 as General Counsel and later as a member and Vice Chairman of the Federal Radio Commission; and for the past five years as a member of the Federal Communications Commission. I am giving you my own philosophy on the regulation of broadcasting in the public interest, and am not in any way speaking for the Commission of which I am a member.

In reviewing the scope of this Conference I was impressed with the seriousness and the comprehensiveness with which you have set about to examine the American broadcasting system. It would be difficult to over-estimate the role which radio broadcasting plays in educational and social affairs and the contribution it makes to American culture.

The problems which you have been considering are each and every one influenced by the trend which the regulation of broadcasting takes. It will be my purpose tonight to discuss with you some of the underlying principles of regulation of communications and to sketch briefly the accomplishments of Federal regulation in this important field.

It would be a mistake to assume at the outset that the regulatory problems of communication are really new, or that they require an abrupt break with the past. Our accomplishments of the present rest upon the tremendous progress of the past, and, here as elsewhere, it has been our experience that each advance instead of tending to reduce the possibilities seems to increase them. I venture the statement that there is no more pressing problem in the whole fabric of our civilization than the extent to which we shall control the avenues of communication between human minds. Wise and judicious control of this socializing instrument is imperative. Indeed, it is the measure of difference between our own free democratic system and the varying types of totalitarian governments observed abroad.

Constitutional guarantees of freedom of speech are to be guarded as carefully as our precious freedom of the press. Our present system of Federal regulation of communication rests upon the preservation of that ideal. It is a striking contrast to the regulations imposed upon the press during its early history. The press, you will recall, was born to a license system which persevered under the Tudors and the Stuarts in England. Statutes of Parliament and the Ordinances of the Star Chamber regulated the manner of printing, the number of presses throughout the kingdom, and prohibited all printing against the force and meaning of any of the laws of the realm.

Broadcasting, and other types of radio communication in the United States, were born to a system of licensing conceived in a far different spirit. All Federal regulation has been designed to protect our sacred constitutional guarantees so that there is full freedom of speech in America. I wish to take this occasion tonight to reaffirm emphatically this principle and to outline the definite prohibitions against any type of censorship contained in the basic regulatory acts. But, first, let me review briefly the history of radio regulation in the United States.

Federal regulation of communications in the United States may be said to have had its beginning with the passage by Congress in 1866 of the Post Roads Act. The first Federal statute relating to radio communication, however, was the Wireless Ship Act of June 24, 1910, relating to the safety of life and property at sea. This Act was amended in 1912 to expand regulation of communication and in order to enable the United States to carry out its treaty obligations under the Berlin Convention. Even before the outbreak of the World War directed increased attention to radio communication the Act of 1912 was attacked, foreshadowing the ultimate breakdown of the law.

The Secretary of Commerce, who administered the law at that time, suspected German ownership of an American station and submitted to the Attorney General the question whether, under the 1912 Act, he had authority to refuse the license on this ground. The Attorney General replied that he did not, the Act reposing in him no discretionary power in the matter of issuing licenses if the applicant came within the class to which licenses were authorized to be issued.

Up to 1921 the only use for radio had been for point-to-point communication services. Few applications for broadcasting licenses were made in these early years, but as the technique improved, broadcasting grew apace and by 1923 there were several hundred stations trying to operate simultaneously on two frequencies. Utter chaos resulted.

It was in February 1927 that the Congress enacted the Federal Radio Act, predicating it upon the theory that radio communication is interstate commerce, and that Congress has the power, under Article I, Section 8, Clause 3 of the Constitution, to regulate commerce with foreign nations and among the several states. Thus did the Federal Radio Commission come into being.

This Commission continued its performance of the duties placed upon it by the Congress until the establishment of the Federal Communications Commission under the Communications Act of 1934. Congress clearly set forth the purposes of the Act when it declared that the Commission was created to regulate "interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States a rapid, efficient, nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges, for the purpose of the national defense, for the purpose of promoting safety of life and property through the use of wire and radio communication, and for the purpose of securing a more effective execution of this policy by centralizing authority heretofore granted by law to several agencies and by granting additional authority with respect to interstate and foreign commerce in wire and radio communication."

The communications industry in the United States, which is the subject of this regulation, is a vast one, with over six billion dollars invested in the various companies controlling telephone, telegraph and radio broadcasting. Recent statistics show that there are over 40,800,000 radio sets in the United States today, with 28,000,000 homes equipped with radios as of January 1, 1939. Over 88 million miles of telephone wires span our country, with over two million miles of telegraph wires serving that medium of communication.

Time does not permit us to touch upon the complex regulatory problems facing the Commission in the telephone and telegraph fields nor to consider the various phases of radio regulation other than broadcasting. However, I would not leave you under the impression that broadcasting is the only use of radio today. Indeed, broadcasting is but one of 27 services of radio.

We are familiar with some of the more common uses of radio in connection with telegraph and telephone to foreign countries, as well as with the amateur and maritime services. In the field of aviation radio has become indispensable, and as a method of increased public safety police radios are now in operation in nearly every city. Again, radio is used in the transmission of news to newspapers by what is known as a multiple address radio telegraph service. There are, of course, many lesser known uses of radio in the experimental services, including television and facsimile. The Commission has outstanding over 55,000 station licenses for its various services.

The controlling principles governing radio in the United States are expressed clearly in the opening section of Title III of the Communications Act of 1934, which language was taken from the Radio Act of 1927. It reads as follows: "It is the purpose of this Act, among other things, to maintain the control of the United States over all the channels of interstate and foreign radio transmission; and to provide for the use of such channels, but not the ownership thereof, by persons for limited periods of time, under licenses granted by Federal authority, and no such license shall be construed to create any right, beyond the terms, conditions, and periods of the license."

A further expression of the legislative standards laid down by the Congress is found in the Act, which says that, "The Commission, if public convenience, interest, or necessity will be served thereby, subject to the limitations of this Act, shall grant to any applicant therefor a station license provided for by this Act."

It is a little understood, but nonetheless interesting, fact that neither the Federal Radio Commission nor the Federal Communications Commission have ever exercised their *legislative* power outlining program service and standards for the operation of radio broadcasting. Both Commissions have exercised their *judicial* power in individual cases with reference to programs which have already been broadcast.

The Commission is charged with being indefinite and vague with regard to those things which constitute sufficient grounds for a finding that a station is not serving public interest, convenience and necessity. It is not always possible to be definite and specific. I am reminded of the situation which former President Woodrow Wilson faced when he made his statement that the United States would declare war on Germany only when Germany committed some overt act violating the neutrality of the United States. When asked what he meant by "an overt act," he said, frankly, that he could not define it but that he would recognize it when he saw it.

However, the Commission has been more definite with regard to what it considers to be in the public interest. Already in the Great Lakes Broadcasting Company case, decided in 1928, the Commission said, "Insofar as a program consists of discussion of public questions, public interest requires ample play for the free and fair competition of opposing views * * *. * * * the tastes, needs and desires of all substantial groups among the listening public should be met, in some fair proportion, by a well-rounded program, in which entertainment, consisting of music of both classical and lighter grades, religion, education and instruction, important public events, discussion of public questions, weather, market reports, and news, and matters of interest to all members of the family find a place."

The test of "public interest, convenience or necessity" contained in the Act provides ample authority for examination of broadcast programs by the Commission in passing upon license applications.

Both the Radio Act of 1927 and the Communications Act of 1934 contain definite prohibitions against censorship. Congress has clearly stated that, "Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication."

Congress has only qualified this with the further prohibition that, "No person within the jurisdiction of the United States shall utter any obscene, indecent, or profane language by means of radio communication." This section is clearly within the spirit and letter of the first amendment to the United States Constitution which provides that, "Congress shall make no law * * * abridging the freedom of speech * * *."

Judge Cooley has admirably expressed the full purport of this section of the Bill of Rights in his "Treatise on Constitutional Limitations" where he says: "The constitutional liberty of speech and of the press, as we understand it, implies a right to freely utter and publish whatever the citizen may please, and to be protected against any responsibility for so doing, except so far as such publications, from their blasphemy, obescenity, or scandalous character, may be a public offense, or as by their falsehood and malice they may injuriously affect the standing, reputation or pecuniary interests of individuals."

It is appropriate here to examine the decided cases in which the question of censorship has been alleged. The Commission denied an application for renewal of license of Station KFKB at Milford, Kansas, operated by Dr. J. R. Brinkley, on the ground that a review of its past operation convinced the Commission that the future operation of this station would not serve public interest, convenience and necessity. The station appealed from this denial, asserting that the Commission's decision constituted a violation of the Radio Act in that it was censorship.

The Court of Appeals for the District of Columbia sustained the Commission saying, "In considering an application for a renewal of the license an important consideration is the past conduct of the applicant for 'by their fruits ye shall know them'. Matt. VII:20. Especially is this true in a case like the present, where the evidence clearly justifies the conclusion that the future conduct of the station will not differ from the past. * * *

"Appellant contends that the attitude of the Commission amounts to a censorship of the station * * *. The contention is without merit. There has been no attempt on the part of the Commission to subject any part of appellant's broadcasting matter to scrutiny prior to its release. In considering the question whether the public interest, convenience or necessity will be served by a renewal of appellant's license, the Commission has merely exercised its undoubted right to take note of appellant's past conduct, which is not censorship. * * *"

In enforcing the provisions regarding obscene, indecent or profane language by means of radio communication, the first conviction was had in the District Court of the United States for the District of Oregon. The defendant, Robert Duncan, known as the "Oregon Wild Cat," was accused of willfully and feloniously uttering obscene, indecent and profane language over Station KVEP, Portland, Oregon. On appeal to the United States Circuit Court for the Ninth Circuit the conviction was affirmed and the defendant was given a $500 fine and imprisonment for six months. The Supreme Court of the United States refused certiorari. The Commission, in a consideration of the application of the station for a renewal of its license, after a hearing, denied it, holding that the public interest was not served by such broadcasts.

I should like to refer now to the case of Trinity Methodist Church, South which raised the issue of free speech, implicit in all cases where licenses are refused because of character of programs. An application for a renewal of its license was made by the Church, licensee of a broadcast station in Los Angeles, California, devoted chiefly to programs furnished by religious, philanthropic, educational and musical organizations. For three hours each week, Reverend Shuler, militant pastor of the Church, used the facilities of the station to broadcast alleged unbridled attacks upon other religious groups, judges, and other public officials and various independent organizations. He was twice found in contempt of court for his radio comments upon pending litigation.

The Commission in considering the application of this station for a renewal of its license, being unable to determine that the public interest, convenience and necessity would be served by the continued operation of it, set the application for hearing as required by law. After a full and complete hearing, held in the City of Los Angeles, the application was denied.

The applicant then appealed to the Court of Appeals for the District of Columbia, claiming that the action of the Commission constituted censorship and that Reverend Shuler had been deprived of his constitutional rights of freedom of speech. The court, in considering the case, stated that, "the evidence abundantly sustains the conclusion of the Commission that the continuance of the broadcasting programs of the appellant is not in the public interest."

In a prior case, in a proceeding for contempt against Reverend Shuler, he appealed to the Supreme Court of the State of California and that court stated, "that the broadcast utterances of Doctor Shuler disclosed throughout the determination on his part to impose on the trial courts his own will and views with respect to certain causes then pending or on trial and amounted to contempt of court. Appellant, not satisfied with attacking the judges of the courts in cases then pending before them, attacked the bar association for its activities in recommending judges, charging it with ulterior and sinister purposes. With no more justification, he charged particular judges with sundry immoral acts. He made defamatory statements against the board of health. * * * He alluded slightingly to the Jews as a race, and made frequent and bitter attacks on the Roman Catholic religion and its relations to government. However inspired Doctor Shuler may have been by what he regarded as patriotic zeal, however sincere in denouncing conditions he did not approve, it is manifest, we think, that it is not narrowing the ordinary conception of 'public interest' in declaring his broadcasts—without facts to sustain or to justify them—not within that term, and since that is the test the Commission is required to apply, we think it was its duty in considering the application for renewal to take notice of appellant's conduct in his previous use of the permit, and, in the circumstances, the refusal, we think, was neither arbitrary nor capricious."

In its decision in this case the Court of Appeals for the District of Columbia stated, "If it be considered that one in possession of a permit to broadcast in interstate commerce may, without let or hindrance from any source, use these facilities, reaching out, as they do, from one corner of the country to the other, to obstruct the administration of justice, offend the religious susceptibilities of thousands, inspire political distrust and civic discord, or offend youth and innocence by the free use of words suggestive of sexual immorality, and be answerable for slander only at the instance of the one offended, then this great science, instead of a boon, will become a scourge, and the Nation a theater for the display of individual passions and the collision of personal interests. This is neither censorship nor previous restraint, nor is it a whittling away of the rights guaranteed by the first amendment, or an impairment of their free exercise. Appellant may continue to indulge his strictures upon the characters of men in public office. He may just as freely as ever criticize religious practices of which he does not approve. He may even indulge private malice or personal slander—subject, of course, to be required to answer for the abuse thereof—but he may not, as we think, demand, of right, the continued use of an instrumentality of commerce for such purposes, or any other, except in subordination to all reasonable rules and regulations Congress, acting through the Commission, may prescribe." An attempt was made to have the Supreme Court of the United States review this case on certiorari, which was denied.

It has been almost the constant plaint of the broadcaster that talk of censorship results from the short broadcast license period. The Communications Act of 1934 gives the Commission authority to grant broadcast licenses for a period not to exceed three years. As early as December 21, 1934, I proposed the extension of the broadcast license period from the six-month license, which was standard at that time, to twelve months. However, on June twenty-third of this year the Commission adopted rules and regulations governing standard broadcast stations with the license period extended to one year. This provision should be an effective indication of the Commission's desire to demonstrate its lack of even slight intention to exercise any degree of censorship.

In my estimation there need be no inevitable conflict between the censorship provision of the law and the Commission's established policy of interpreting public interest, convenience and necessity broadly enough to include consideration of program service. Unless Commission regulation goes beyond mere supervision of technical operations there can be no effective regulation in the public interest.

The question of censorship of radio broadcasting continues to be one of the most discussed topics today, but censorship of broadcasting or any such control which would seek to bring it about, is abhorrent to the finest of American social instincts.

Our press is free, and its strongest form of censorship, it is freely admitted, is native in the press itself and promoted by a rigid enforcement of its fairly drawn code of ethics. Telephone and telegraph have not been throttled by censorship.

The very nature of broadcasting requires that these channels of thought shall be open to all matters of public interest, regardless of race, creed, color or political party. Emerson has expressed the importance of this concept when he says, "The revelation of thought takes man out of servitude into freedom."

Broadcasting in the public interest must, of necessity, enlarge freedom of thought, of opinion, and of democratic action. It must not and can not become the tool of autocracy and dictatorship. Freedom of speech and freedom of the press, which are inseparable, constitute our greatest bulwark against subversive influences.

During my years of service as a member of two Commissions regulating broadcasting under two administrations—one, Republican, and the other, Democratic—I can say without hesitation or reservation that at no time during this entire period has there been even the slightest attempt made to exercise any degree of censorship.

Your speaker, as Acting Chairman of the Commission, on June nineteenth of this year, before a Congressional committee, in answer to a question as to whether the Commission, either domestically or internationally, considers that it has the right and should exercise the power of censorship over programs, stated: "Speaking for the Commission, I am sure that every member of the Commission does not consider that it has any right of censorship either domestically or internationally. The statute definitely prohibits censorship."

Broadcasting stations and their managers sometimes state, when they do not want to take a certain program, that it is barred by the Federal Communications Commission, when, as a matter of fact, they merely want an excuse for not using that particular material. The Commission has issued no instructions or regulations and can not and does not require stations to accept any and all programs offered to them. Under the Act, broadcast stations are not deemed to be common carriers. Inasmuch as stations have the responsibility for selecting the program material to be used, they are within their rights in refusing programs if they choose, but they are not justified in asserting that the rejection is based upon any direction of the Commission.

Your speaker, again as Acting Chairman of the Commission, at the opening of a hearing on July fourteenth on a petition of The American Civil Liberties Union for revision, amendment or modification of the Commission's rules and regulations governing international broadcast stations, stated that, "the applicable provisions of the Communications Act of 1934, as amended, require that licenses be issued to serve the public interest, convenience or necessity. To comply with this statutory mandate, the Commission is required before it may issue a license or assign any frequency for any particular service to define the purpose and objective for such service in such a way that the public interest, convenience or necessity will be served by the station licensed to operate on frequencies assigned to this service. This is true whether the service be international broadcast service, telephone or telegraph service, domestic broadcast service, police service, aviation service or any of the other various classes of radio service authorized by the Commission. * * *

"It can not be emphasized too strongly that the Commission has no desire, purpose or intention of setting itself up as a board of censorship, and that it does not and will not exercise any such jurisdiction."

Thus in the national and international broadcast fields, it is clear that the Commission has not and can not exercise any censorship. The voice that speaks in America must be the voice of free men and not the voice of despots. The Commission and the broadcaster serve public interest when they cooperate to maintain our free institutions and to develop radio as an instrument of real public service. The Constitution guarantees to all of us the right of freedom of speech, and Congress, in enacting the Communications Act of 1934, provided specifically that there should be no censorship in broadcasting. It is the solemn duty of the Commission to safeguard that sacred right.

STRINGER ADDED TO NAB STAFF

With a view of enlarging the industry-wide promotion of broadcasting, Neville Miller, President, announces the addition of Arthur Stringer, promotion specialist, to the Headquarters Staff. Mr. Stringer will be assigned to the Public Relations Department and will report to its director, Ed Kirby.

Mr. Stringer, a resident of Chicago, has had a long and extensive career in radio promotion. He began work as a member of the Advertising Department of the Chicago Tribune. He was at one time Associate Director of Gorgas Memorial Institute. In 1926 he became Publicity Director for the first New York and Chicago Radio Shows and during their existence was a leading factor in their successful exploitation. For a short period, he was engaged for special promotional work by WLW-WSAI. In recent years he has engaged in private consulting promotional work. He brings Headquarters an extensive acquaintance and experience in the radio field. He is a graduate of the University of Michigan.

Plans for the "curtain-raiser promotion on the new fall programs will proceed at once. Cooperation of stations, networks and all radio advertisers will be sought.

FCC APPROVES ATTORNEYS

Applications for the following attorneys to practice before the Commission, approved by the Bar Committee on August 3, were approved by the Commission today:

David Diamond, Buffalo, N. Y.; Frank M. Fish, Evansville, Ind.; Fred C. Maloney, Buffalo, N. Y.; Harold F. McGuire, Washington, D. C.; Leo A. McNamee, Las Vegas, Nevada; Rush H. Limbaugh, Cape Girardeau, Mo.; Harvey S. Reynolds, Providence, R. I.; William T. Welch, Portland, Ore.

FEDERAL LEGISLATION

The status of all bills and resolutions affecting broadcasting which were introduced in Congress during the session just ended is given below. All these bills and resolutions in their present status will still be before Congress when it reconvenes next January.

HOUSE BILLS

H. R. 94 (Mr. Maloney, La.) PAID TESTIMONIALS—To require announcement of paid "recommendations" (testimonials), if any, at time of broadcast. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 251 (Mr. Culkin, N. Y.) LIQUOR ADVERTISING—To prohibit radio advertising of alcoholic beverages. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 252 (Mr. Culkin, N. Y.) LIQUOR ADVERTISING—Same as H. R. 251, except that it specifically defines "alcoholic beverage" as including "beer, ale, wine, gin, whiskey, or brandy." Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 253 (Mr. Culkin, N. Y.) LIQUOR ADVERTISING—To prohibit the transportation in interstate commerce of intoxicating liquor advertising, either by mail or otherwise, including radio broadcasting. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 924 (Mr. Culkin, N. Y.) LIQUOR ADVERTISING—Same as H. R. 253, except that it pertains to "alcoholic beverages" and is not limited to "intoxicating liquor." Referred to the Interstate and Foreign Commerce Committee. No action.

H. R. 926 (Mr. Daly, Penna.) COPYRIGHTS—To amend and consolidate acts respecting copyright, including the creation of a copyright in recording artists for renditions reproduced on phonograph records, disks, sound tracks, or any other substances. Referred to Patents Committee. No action.

H. R. 1651 (Mr. Dickstein, N. Y.) IMMIGRATION OF PERFORMING ARTISTS—Denies admission to United States for professional engagement of actor, singer or dancer where country of origin does not grant, both in law and in fact, substantially similar privileges to citizens of the United States. Referred to Immigration and Naturalization Committee. No action.

H. R. 1964 (Mr. Lucy, Mass.) COPYRIGHTS—To create renewal rights in author of articles in periodicals, encyclopedias, etc., when such articles are not separately copyrighted. Same as S. 547. Referred to Patents Committee. No action.

H. R. 2721 (Mr. Celler, N. Y.) GOVERNMENT RADIO STATION—To construct and maintain Government radio broadcasting station in vicinity of Washington by Secretary of the Navy, with programs under direction of the United States Commissioner of Education. Referred to Naval Affairs Committee. No action.

H. R. 2981 (Mr. Celler, N. Y.) LIBEL—SLANDER—Exempts station from liability for libel or slander when station proves the exercise of due care to prevent the utterance of such statements. Referred to Judiciary Committee. No action.

H. R. 3582 (Mr. Flannery, Penna.) ADVERTISING—Requires informative advertising of imported articles. Referred to Interstate and Foreign Commerce Committee. Superseded by H. R. 5985. No action.

H. R. 3752 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To amend Section 303 (1). Limits the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4224 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To reorganize Communications Commission. Same as S. 1268. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4433 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposit of copyrightable material and prompt registration of claims to copyright in the copyright office. Referred to Committee on Patents. Hearing held. Superseded by H. R. 5319. No action.

H. R. 4684 (Mr. McLeod, Mich.) COMMUNICATIONS ACT—To amend Section 307, subdivisions (d) and (e), by requiring that broadcasting licenses be issued for a period not less than three years nor more than five years and to provide against denial of renewal application because of political views expounded over station. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4871 (Mr. Daly, Penna.) COPYRIGHT ACT—To amend the Copyright Act in various respects, including the creation of copyright in recording artists covering the rendition of their recordings when reproduced mechanically. Referred to Committee on Patents. No action.

H. R. 5319 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposits of copyrightable material with Register of Copyrights and prompt registration of claims to copyright. Referred to Committee on Patents. No action.

H. R. 5435 (Mrs. Norton, N. J.) WAGE AND HOUR ACT—To amend, to remove hours restrictions on employees making $200 or more a month, et al. Reported to House.

H. R. 5508 (Mr. Peterson, Florida) COMMUNICATIONS ACT—To amend the Communications Act of 1934 by adding Section 307½, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network programs. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 5791 (Mr. Schulte, Ind.) COMMUNICATIONS—To prohibit recording for profit or gain any program without consent in writing of the performers. To Interstate and Foreign Commerce Committee. No action.

H. R. 5985 (Mr. Flannery, Pa.) ADVERTISING—To require announcement of place of origin of all imported articles or articles assembled in the United States from imported products, ingredients, parts or materials. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 6160 (Mr. McGranery, D.-Pa.) COPYRIGHTS—To amend the Copyright Act of 1909 in many respects, including the creation of copyright in phonograph records, the extension of the duration of copyright to 56 years. Referred to Committee on Patents. No action.

H. R. 6219 (Mr. Doughton, D.-N. C.) ALCOHOLIC BEVERAGES—To amend the Federal Alcohol Administration Act so as to prohibit, among other things, the advertising of alcoholic beverages by radio. Referred to Committee on Ways and Means. No action.

H. R. 6243 (Mr. Moser, D.-Pa.) COPYRIGHTS—Regulating use of copyrighted works. Authorizes Federal Communications Commission to grant licenses and fix the fees for use of copyrighted works when an agreement with copyright owner cannot be secured. To Committee on Patents. No action.

H. R. 6695 (Mr. McGranery, D.-Pa.) COMMUNICATIONS ACT—To prohibit recording for profit or gain any program without consent in writing of the performers. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 6973 (Mr. Lea, Calif.) GOVERNMENT RADIO STATIONS—Authorizing the purchase of site and erection of building in Massachusetts for use as radio-monitoring station at cost not to exceed $30,000. Referred to Committee on Interstate and Foreign Commerce. Same as S. 2611. No action.

H. R. 7035 (Mr. Hobbs, D.-Ala.) ANTITRUST LAWS—To amend Sec. 8 of the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," and to provide additional civil remedies against violations. Referred to Judiciary Committee. No action.

H. R. 7188 (Mr. Cochran, D.-Mo.) COMMUNICATIONS ACT—To abrogate FCC Rule 42.03(a), adopted by FCC May 23, 1939, requiring international broadcast stations to limit programs to those which reflect the culture of the United States and promote international goodwill, understanding and cooperation, and to prohibit FCC adopting any similar rule. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 7192 (Mr. Fay, D.-N. Y.) PATENTS—To provide for the compulsory granting of licenses under patents which are brought by competitors within a single control in order to dominate an industry. Referred to Patents Committee. No action.

H. R. 7456 (Mr. Kennedy, D.-N. Y.—COPYRIGHT—Provides that in network and transcription broadcasts originating station or transcription manufacturer is solely liable for infringement. Referred to Committee on Patents. No action.

HOUSE RESOLUTIONS

H. Res. 70 (Mr. Connery, Mass.) FCC INVESTIGATION—Provides for exhaustive investigation of Federal Communications Commission. Referred to Rules Committee. No action.

H. Res. 72 (Mr. Wigglesworth, Mass.) BROADCASTING AND FCC INVESTIGATION—Provides for investigation of the broadcasting industry in the United States and of the acts, rules, regulations and policies of the Communications Commission. Referred to Rules Committee. No action.

H. Res. 234 (Mr. Larrabee, D.-Ind.) FCC—To authorize the FCC to take steps to provide an adequate method to obtain data and other factual information and material necessary to determine the effects of power in excess of fifty kilowatts, and to provide that the FCC shall not be restrained from licensing one or more than one station to operate on power of more than fifty kilowatts for such experimental operation as may be necessary. Referred to Interstate and Foreign Commerce. No action.

HOUSE JOINT RESOLUTIONS

H. J. Res. 149 (Mr. Sirovich, N. Y.) COPYRIGHT—To create a Bureau of Fine Arts in the Department of the Interior with authority in the Secretary of the Interior to undertake and carry on "such projects and activities as may be necessary or appropriate to foster, develop and encourage the use of copyrighted and copyrightable material." Referred to Patents Committee. No action.

SENATE BILLS

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Same as H. R. 251. Referred to Interstate Commerce Committee. Hearings held. Reported to Senate.

S. 547 (Sen. Lodge, Mass.) COPYRIGHT—To create renewal rights in author of articles in periodicals, encyclopedias, etc., when such articles are not separately copyrighted but were included in copyright of periodical or other composite work. Referred to Patents Committee. Passed by Senate.

S. 550 (Sen. Sheppard, Texas) COMMUNICATIONS ACT—To amend Section 303 by limiting the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate Commerce Committee. The bill as introduced refers to Section 303 (e), whereas the correct designation is 303 (1). A corrected bill will be introduced. No action.

S. 575 (Sen. Capper, Kans.) LIQUOR ADVERTISING—Same as H. R. 924. Referred to Interstate Commerce Committee. No action.

S. 594 (Sen. Reynolds, N. C.) GOVERNMENT RADIO STATIONS—To establish marine schools in each state and other purposes, including the construction and operation by each school of one or more stations on "a wave-length and power prescribed by the Maritime Commission." Referred to Commerce Committee. No action.

S. 635 (Sen. Schwellenbach, Wash.) COMMUNICATIONS ACT—To strike Section 315 of the Communications Act and to require each station to set aside regular and definite periods of desirable day and evening time for uncensored discussion on "non-profit basis of public, social, political, and economic problems, and for educational purposes." Qualified candidates for public office are not covered by the amendment. Referred to Interstate Commerce Committee. No action.

S. 636 (Sen. Schwellenbach, Wash.) COMMUNICATIONS ACT —To add to Section 315 with respect to candidates for public office the requirement that the station shall keep complete records open to public inspection. Referred to Interstate Commerce Committee. No action.

S. 637 (Sen. Schwellenbach, Wash.) COMMUNICATIONS ACT —To strike Section 326 and substitute in lieu thereof a similar provision with respect to censorship by the Commission with the proviso that it does not exempt stations from liability for defamatory, profane, indecent or obscene language or action broadcast by any officer, employee, agent or representative of the station. Referred to Interstate Commerce Committee. No action.

S. 1095 (Sen. Sheppard, Texas) COMMUNICATIONS ACT—To amend Section 303 (1). Corrected bill in substitution for S. 550. Limits the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate Commerce Committee. No action.

S. 1268 (Sen. Wheeler, Mont.) COMMUNICATIONS ACT—To reorganize the Communications Commission by creating a new agency to be known as the Federal Communications and Radio Commission, consisting of an administrative board of three members. Referred to Interstate Commerce Committee. No action.

S. 1520 (Sen. White, Maine) COMMUNICATIONS ACT—To amend the Communications Act by creating an eleven-man commission and for other purposes. Referred to Committee on Interstate Commerce. No action.

S. 2058 (Nye, N. D.) PRIZE CONTESTS—Requires publication of prize winners and the prize winning entry in all promotion contests carried on through the use of the mails or any facilities of interstate or foreign commerce. Referred to Committee on Post Offices and Post Roads. No action.

S. 2251 (Chavez, N. M.) GOVERNMENT BROADCASTING STATION—Directs Secretary of Navy to construct, maintain and operate high frequency stations to broadcast programs to all nations in Western Hemisphere; to appropriate 3 million dollars for construction purposes and one hundred thousand dollars for operative expense during year ending June 30, 1940. To Committee on Foreign Relations. No action.

S. 2466 (Sheppard, D.-Texas) COMMUNICATIONS ACT—Same as H. R. 5508. To amend the Communications Act of 1934 by adding Section 307½, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network programs. Referred to Committee on Interstate Commerce. No action.

S. 2611 (Wheeler, Mont.) GOVERNMENT RADIO STATION—Authorizing the purchase of site and erection of building in Massachusetts for use as radio-monitoring station at cost not to exceed $30,000. To Committee on Interstate Commerce. Passed by Senate.

S. 2689 (Bone, D.-Wash.) COPYRIGHT—To amend Sec. 33 of Copyright Act with respect to rules covering importation of copyrighted items. To Committee on Patents. Passed by Senate.

S. 2719 (O'Mahoney, D.-Wyo.) ANTITRUST LAWS—Same as H. R. 7035. To Committee on Judiciary. No action.

S. 2846 (Wheeler, D.-Mont.) COPYRIGHT—Provides that in network and transcription broadcasts originating station or transcription manufacturer is solely liable for infringement. To Committee on Patents. No action.

SENATE RESOLUTION

S. Res. 94 (White, Maine) COMMUNICATIONS COMMISSION—To authorize investigation of the acts, rules, regulations, organization and policies of the FCC with respect to censorship of communications, ownership of broadcasting stations and other matters. To Interstate Commerce Committee. No action.

THE AMERICAN FAMILY ROBINSON

In the June 16th issue of NAB Reports reference was made to information concerning the American Family Robinson programs of the National Association of Manufacturers. Since then the following statement concerning the programs has been received from the N.A.M.:

"It cannot be over-emphasized that the American Family Robinson program or any other program offered by the National Association of Manufacturers is not 'anti-' anything or anybody. The programs are, as are naturally other activities of the Association, 'pro-business', based on our conviction and recognition by the public generally that the United States is an industrial nation which has reached its world superiority as the result of the development of and by industry. This being the case and with industrial recovery a prime essential to the continuance of our way of life, we feel it to be our duty to emphasize to the American people constantly the fundamentals of the industrial system which is so typically American and which has built the high standards of living enjoyed by Americans. In this same connection, it is the avowed purpose of the American Family Robinson program to present openly, and as effectively and attractively as radio will permit, the fundamental principle that freedom of speech and of the press, freedom of religion and freedom of enterprise are inseparable and must continue to be if the system of democratic government under which this country has flourished is to be preserved. That principle we hold not to be controversial in this of all countries.

"There are, of course, some who would challenge that traditional American principle. We believe the existence of such doubts in this country at such a critical time in the world's history and in the face of the tragic fate which has befallen human liberties under other systems justifies the National Association of Manufacturers in taking the issue to the people through whatever facilities, including the radio, are available."

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF THE COMMISSION

The Federal Communications Commission adopted its Final Order (No. B-25), granting the application of W. O. Pape, tr/as Pape Broadcasting Company, (WALA), **Mobile, Alabama,** for a construction permit to change transmitter site locally, install vertical radiator and increase its nighttime power from 500 watts to 1 KW.

Proposed Findings in this matter were made and entered June 21, 1939, and no exceptions have been filed nor request for oral argument.

The Commission announced its Final Order (No. B-21), granting the application of Mariannina C. Iraci, Administratrix (transferor), and Arde Bulova (transferee), for consent to transfer control of William Penn Broadcasting Company, licensee of station WPEN, **Philadelphia, Pa.** Station operates on **920 kc.** with 1 KW power, unlimited time, using directional antenna at night.

The Order in this case will become effective August 9, 1939.

The Commission en banc adopted an order directing John H. Stenger, Jr., licensee of WBAX, **Wilkes-Barre, Pa.,** to show cause why license of station should not be revoked, because of circumstances in re management and control of station.

PROPOSED FINDINGS OF FACT

The Federal Communications Commission August 8, announced its Proposed Findings of Facts and Conclusions (No. B-62), proposing to deny the application of

Florida Broadcasting Company (WMBR), **Jacksonville, Florida,** for authority to change frequency from **1370** to **1120 kc.,** increase power from 100 watts night and 250 watts day to 500 watts night and 1 KW day, on an unlimited time basis, and move the transmitter locally, using a directional antenna at night.

The Commission's Proposed Conclusions based upon its proposed findings, are as follows:

1. That the operation of Station WMBR on the requested assignment would be so limited during the nighttime operation that, while its service would be extended to increased areas, the increase in population served would be comparatively small; and a consistent interference-free service could not be rendered to the beach areas, which appears to be one of the objectives of the application.

Under the allocation plan of the Commission, regional stations are designed to serve a metropolitan district and large rural areas adjacent; a regional assignment should provide a service distinct from that provided by local stations. In this instance the applicant will not render the service to be expected of a regional assignment.

2. The granting of the application will not serve public interest, convenience or necessity.

All parties will have opportunity to file exceptions within 20 days and thereafter to request oral argument on the proposed report and exceptions.

The Commission August 8, announced its Proposed Findings of Facts and Conclusions (No. B-73), proposing to grant the application of WJMS, Inc., **Ashland, Kentucky,** for authority to construct a new station to operate on **1370 kc.,** with power of 100 watts, unlimited time.

The Commission's proposed conclusions based upon its proposed findings, are as follows:

1. No objectionable interference will result to Station WSAU and WHLS by the operation of the proposed station.

2. Upon consideration of all the facts of record as to the application of WJMS, Inc., for a construction permit, the Commission concludes that public interest, convenience and necessity will be served by a grant of said application, subject to the following conditions:

(a) That the applicant herein shall, within a period of 30 days from the effective date of the Commission's final order, furnish the Commission with satisfactory proof of its authority to issue the capital stock proposed to be issued and to do business in the State of Wisconsin; and

(b) That if a construction permit be subsequently issued to the applicant, upon compliance with the above conditions, said permittee shall, within three months after the effective date of this order, file an application for modification of construction permit, specifying the exact transmitter location and complete radiating system. If for any reason such application cannot be submitted within the time allowed, an informal request for extension of time must be submitted stating the necessity therefor.

All parties will have opportunity to file exceptions within 20 days and thereafter to request oral argument on the proposed report and exceptions.

The Commission August 8, announced its Proposed Findings of Fact and Conclusions (No. B-68), proposing to deny the applications of Northside Broadcasting Corporation (WGRC), **New Albany, Ind.,** for a change of operating assignment to change frequency from **1370 kc.** to **880 kc.,** with power of 250 watts unlimited time, using directional antenna at night, instead of 250 watts daytime only, as now operating; and the application of The Gateway Broadcasting Company, Louisville, Ky., for a new station to operate on **880 kc.** with 500 watts, unlimited time.

The Commission's proposed conclusions, based upon its proposed findings, are as follows:

1. Station WGRC and the station proposed by The Gateway Broadcasting Company, operating as proposed, would be limited at night to the approximate 5 or 5.2 millivolt per meter contour, and would not render primary service day and night to the entire metropolitan district of Louisville. Under the allocation practice of the Commission it appears, and the Commission finds, that a grant of these applications, or either of them, would not be in accordance with the proper allocation of regional frequencies and good engineering practice, and would not be in the public interest.

All parties will have opportunity to file exceptions within 20 days and thereafter to request oral argument on the proposed report and exceptions.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Wednesday, August 16

Broadcast

Hearing to Be Held Before Commissioner George H. Payne in the Federal Court Room, Bellingham, Washington

NEW—Bellingham Broadcasting Co., Inc., Bellingham, Wash.—C. P., **1200 kc.,** 100 watts, 250 watts LS, unlimited time (requests facilities of KVOS).

KVOS—KVOS, Inc., Bellingham, Wash.—Renewal of license, **1200 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

Monday, September 25

During the week the Commission has announced the following tentative dates for future broadcast hearings and oral arguments. They are subject to change.

NEW—Union Broadcasting Co., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Lackawanna Broadcasting Co., Inc., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unliimted time.

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz.—C. P., **1420 kc.,** 100 watts, specified hours.

Hearing Before Commissioner Case

KUMA—Albert H. Schermann, Yuma, Ariz.—Application for hearing upon Order of Revocation of License of Station KUMA. Present assignment: **1420 kc.,** 100 watts, specified hours.

Tuesday, October 24

NEW—C. L. Weathersbee, W. H. Nichols, C. L. Pickler, E. M. Thompson, d/b as Albemarle Broadcasting Station, Albemarle, N. C.—C. P., **1370 kc.,** 100 watts, daytime.

Wednesday, October 25

WABI—Community Broadcasting Service, Inc., Bangor, Maine.—C. P., **560 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

Monday, October 30

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—C. P., **1360 kc.,** 1 KW, unlimited time. Present assignment: **1360 kc.,** 500 watts, 1 KW LS, unlimited time.

Monday, November 13

NEW—Richard T. Sampson, Riverside, Calif.—C. P., **1390 kc.,** 250 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

NEW—Hot Springs Broadcasting Co., Hot Springs, Ark.—Adopted an amended order in this case, as the original order failed to include the necessary conditions upon which the grant was made.

KTEM—Bell Broadcasting Co., Temple, Tex.—Effective date of Commission's order in re application of KTEM for full time operation was extended to August 8, 1939. (Action taken 8-2-39.)

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted special temporary authority to operate with DA during daytime for a period of 2 days on the frequency **1450 kc.,** with power of 1 KW, in order to measure station's 2½ millivolt contour.

KGW—Oregonian Publishing Co., Portland, Ore.—Granted special temporary authority to do TC broadcast on August 6 from Tillamock Rock Light, Oregon, received at Tonguepoint, Ore., involving use of U. S. Lighthouse Service radio link from lighthouse to Tonguepoint, on **3410 kc.,** 50 watts, call letters KCBO, transmitter USLHS Type 319.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Granted special temporary authority to operate unlimited time on August 7 and 8, in order to broadcast political talks and election returns.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted special temporary authority to operate simultaneously with KBST from (local sunset, August 6:45 p. m., MST) to 10 p. m., MST, on August 8, in order to broadcast activities relative to observance of station KWEW's anniversary.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted extension of special temporary authority to operate with 5 KW night, using DA, for the period August 13 to September 11, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.** or reduces power so additional interference is not involved, or until defective directional system is corrected.

WABD—Central New York Broadcasting Corp., Portable-Mobile. —Granted special temporary authority to operate a high frequency relay station on the frequencies **31220, 35620, 37020, 39260 kc.,** with power of 12 watts, A3 Emission, for the period August 8 to August 13, in order to broadcast description of Eastern Amateur Golf Championship matches.

WABE—Central New York Broadcasting Corp., Portable-Mobile. —Granted special temporary authority to operate low frequency relay station on frequencies **1606, 2022, 2102, 2758 kc.,** with power of 12 watts, A3 emission, for the period August 8 to 13, in order to broadcast a description of the Eastern Amateur Golf Championship matches.

W2XDA—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to test high frequency broadcast equipment of Station W2XDA on frequencies **39420, 39460, 39500** and **39540 kc.,** 50 watts, for a period not to exceed 30 days, for the purpose of conducting amplitude and frequency modulated experimental transmissions on these frequencies.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to test high frequency broadcast equipment of Station W2XOY on frequencies **39420, 39460, 39500** and **39540 kc.,** 150 watts, for a period not to exceed 30 days, for the purpose of conducting amplitude and frequency modulated experimental transmissions on these frequencies.

WMI—Lorain County Radio Corp., Lorain, Ohio.—Granted special temporary authority to communicate with steamer Ralph H. Watson on frequency **4282.5 kc.,** on "unlimited" basis, for period of 10 days. (Action taken August 4.)

WNUE—Lorain County Radio Corp., Steamer Ralph H. Watson.—Granted special temporary authority to communicate with station WMI, Lorain, Ohio, on frequency **4422.5 kc.,** on "unlimited" basis, for a period of 10 days. (Action taken August 4.)

NEW—Thomas J. Watson, Endicott, N. Y.—Granted petition to intervene in the matter of the application of WSPR, Springfield, Mass., for modification of license which is designated for hearing on September 26.

KGHF—Curtis P. Ritchie, Pueblo, Colo.—Dismissed without prejudice the application of applicant for C. P. to move transmitter, increase power, and install new vertical radiator.

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Dismissed without prejudice application of WXYZ for C. P. to operate with 5 KW day and night.

WARN—Aeronautical Radio, Inc., Montgomery, Ala.—Granted exemption from continuous hours of operation of airport station, and in lieu thereof shall maintain a listening watch and be prepared to render service during continuous hours, except on Sunday, between the hours of 7 a. m. to 2 p. m., CST, and at such other times as may be specifically requested by aircraft desiring to use facilities of that airport. The Commission's order of July 5, 1939, exempting station from continuous hours of service, was revoked.

KNFE—City of Duluth, Minn.—Police Department.—Granted modification of C. P. authorizing commencement date as 7-21-39 and completion date as 12-10-39, in re 5 mobile units.

The Commission en banc today took the following action:

NEW—Hiawathaland Broadcasting Co., Sault Ste. Marie, Mich.—Granted C. P. for new station to operate on frequency **1200 kc.,** 100 watts night, 250 watts day, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

NEW—The Travelers Broadcasting Service Corp., Hartford, Conn. —Granted C. P. for new high frequency broadcast station to operate on frequency **43200 kc.,** experimentally, conditionally, with 1 KW power, unlimited time.

WMBI—Moody Bible Institute Radio Station, Chicago, Ill.—Granted voluntary assignment of license of station WMBI from The Moody Bible Institute Radio Station to The Moody Bible Institute of Chicago.

NEW—WOKO, Inc., Albany, N. Y.—Granted C. P. for new facsimile broadcast station to operate on frequency **25050 kc.,** conditionally, 500 watts.

KNOW—Frontier Broadcasting Co., Inc., Austin, Tex.—Granted C. P. to move transmitter site locally, the exact site to be determined with Commission's approval; install new equipment, and increase day power from 100 watts to 250 watts.

WOKO—WOKO, Inc., Albany, N. Y.—Granted special experimental authority to operate broadcast transmitter to transmit facsimile signals experimentally from 2 to 5 a. m., EST, using 500 watts power on frequency **1430 kc.,** for the period ending November 1, 1939.

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted C. P. to install new equipment, make changes in directional antenna system, and increase day power from 1 KW to 5 KW.

W1XAR—World Wide Broadcasting Corp., Boston, Mass.—Granted modification of license to use frequency **25600 kc.** in addition to the now authorized frequencies of **11730** and **15130 kc.**

W2XH—General Electric Co., Schenectady, N. Y.—Granted modification of license for change in frequencies from **42000-56000 kc.** to **288000-294000 kc.**

WSAV—Arthur Lucas, Savannah, Ga.—Granted voluntary assignment of C. P. to WSAV, Inc. The C. P. is for a new station to operate on **1310 kc.,** 100 watts, unlimited time.

WHAI—John W. Haigis, Greenfield, Mass.—Granted modification of license to increase night power from 100 watts to 250 watts.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Granted modification of license to increase night power from 100 watts to 250 watts.

WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—Granted modification of license to increase night power from 100 watts to 250 watts.

WBLK—The Exponent Co., Clarksburg, W. Va.—Granted modification of license to increase night power from 100 watts to 250 watts.

KTOK—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted modification of license to increase night power from 100 watts to 250 watts.

WACO—Frontier Broadcasting Co., Inc., Waco, Texas.—Granted modification of license to increase night power from 100 watts to 250 watts.

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Granted modification of license to increase night power from 100 watts to 250 watts.

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted modification of license to increase night power from 100 watts to 250 watts.

WLBC—Donald A. Burton, Muncie, Ind.—Granted modification of license to increase night power from 100 watts to 250 watts.

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Granted modification of license to increase night power from 100 watts to 250 watts.

WCLO—Gazette Printing Co., Janesville, Wis.—Granted modification of license to increase night power from 100 watts to 250 watts.

WSBC—WSBC, Inc., Chicago, Ill.—Granted modification of license to increase night power from 100 watts to 250 watts.

W5XGO—Beaumont Broadcasting Assn., Beaumont, Tex., Portable-Mobile.—Granted voluntary assignment of relay broadcast station license from Beaumont Broadcasting Assn. to KRIC, Inc.

WEBR—WEBR, Inc., Buffalo, N. Y.—Granted modification of license to increase night power from 100 to 250 watts.

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—Granted extension of special experimental authority to operate as a facsimile broadcast station from 12 midnight to 6 a. m., PST, for the period September 1, 1939, to March 1, 1940.

NEW—Yuma Broadcasting Co., Yuma, Ariz.—Granted C. P. for new station to operate on frequency **1210 kc.**, 100 watts night, 250 watts local sunset, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval.

KHBG—Harry B. Greaves, T. B. Lanford, R. M. Dean and John Caruthers, Okmulgee, Okla.—Granted authority to transfer control of the Okmulgee Broadcasting Corp., licensee of station KHBG, to Mrs. Lucille Buford, Paschel Buford, Mrs. S. P. Ross and Sam W. Ross. (Station operates on **1210 kc.**, 100 watts, daytime.)

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted C. P. to move transmitter site locally, install new equipment and vertical radiator, and increase day power from 1 KW to 5 KW.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Present license extended on a temporary basis to October 1, 1939, pending inspection of the station to determine if station is operated in accordance with the Rules of the Commission, particularly 130, 132, 144 and 176.

KYCA—Southwest Broadcasting Co., Prescott, Ariz.—On June 22, 1938, the Commission granted an application of Southwest Broadcasting Co. to establish a new station to operate on frequency **1500 kc.**, with 100 watts night, 250 watts day, unlimited time. Thereafter W. P. Stuart filed an appeal in the U. S. Court of Appeals. On June 12, 1939, the Court handed down its decision dismissing the appeal. Accordingly, the Commission directed the Secretary to reissue a C. P. to Southwest Broadcasting Co., the date of commencement of construction to be advanced 60 days from date and completion date to 180 days thereafter.

WOMI—Owensboro Broadcasting Co., Owensboro, Ky.—Denied petition for rehearing or reconsideration of the Commission's decision of June 21, 1939, in denying application of WOMI for modification of license to change operating assignment from **1500 kc.**, with 100 watts night, 250 watts day, unlimited time, to **1200 kc.**, with same power and hours of operation.

NEW—Summit Radio Corp., Akron, Ohio.—Granted supplemental petition for reconsideration of action of May 11, 1938, in denying application of Summit Radio Corp., revoked its order of May 11, 1938, and adopted in lieu thereof an order granting the application to construct and operate a standard broadcast station to operate on **1530 kc.**, 1 KW, unlimited time, effective August 15, 1939.

NEW—Publix Banford Theatres, Inc., Asheville, N. C.—Remanded for further hearing the application for C. P. to use **1430 kc.**, 1 KW, unlimited time, using DA at night, upon the following issues: To determine the availability and suitability of antenna site which applicant proposes to use; to determine whether the granting of the assignment requested would be in accordance with the Commission's plan of allocation and standards of good engineering practice.

KEHE—Earle C. Anthony, Inc., Los Angeles, Calif.—Granted petition of Earle C. Anthony, Inc., to change call letters of KEHE to KECA.

WPG—Greater New York Broadcasting Corp., New York City.—Denied motion to dismiss exceptions of Interstate Broadcasting Company, Inc. (WQXR), in re Docket No. 5350.

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—Granted authority to take depositions in re application for new station.

W6XKG-W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Granted petition for order to take depositions in re applications for renewal of licenses, scheduled for hearing on September 16.

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Granted C. P. to install new equipment.

NEW—Edwin H. Armstrong (New York City and vicinity), Portable-Mobile.—Granted C. P. for new special high frequency relay broadcast station to use frequencies **133030, 134850, 136810** and **138630 kc.**, 50 watts.

KCKN—The KCKN Broadcasting Co., Kansas City, Kans.—Granted C. P. to install new equipment.

WFYB—Columbia Broadcasting System, Inc. (Cincinnati, Ohio), Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.**, 50 watts.

WHPA—WHP, Inc., Harrisburg, Pa., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.**, 40 watts.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted C. P. approving transmitter site, installation of vertical radiator, and changes in transmitting equipment.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted C. P. to make changes in equipment.

WCLS—WCLS, Inc., Joliet, Ill.—Granted C. P. to move transmitter and studio site locally, make changes in composite equipment and install vertical radiator.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted modification of C. P. authorizing move of auxiliary transmitter from present main transmitter site to studio location, and install new antenna for auxiliary purposes only.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted modification of special authority to make changes in equipment.

WISE—Asheville Daily News, Harold Thoms, Owner, Asheville, N. C.—Granted modification of C. P. approving transmitter and studio sites, changes in equipment, and installation of vertical radiator.

KPAC—Port Arthur College, Port Arthur, Tex.—Granted modification of C. P. to install new equipment and make changes in directional antenna system for nighttime operation; extend commencement date to 20 days after grant, and completion date to 120 days thereafter.

KTEM—Bell Broadcasting Co., Temple, Tex.—The effective date of the Commission's order of July 27 granting the application of KTEM was extended to August 8.

KFOX—Nichols & Warinner, Inc., Long Beach, Calif.—Retired to the closed files an application for C. P. for authority to install new equipment and increase power, which was granted contingent upon selection of a satisfactory transmitter site, since an application for modification of C. P. was filed with the Commission. No satisfactory reply has been received to numerous letters relative to site so the modification of C. P. has been returned to applicant.

WBAX—Stenger Broadcasting Corp. (Assignee), Wilkes-Barre, Pa.—Dismissed application of John H. Stenger, Jr., licensee of station WBAX, as assignor, and the Stenger Broadcasting Corp. for transfer of license to the Stenger Broadcasting Corp., because the application does not meet the requirements of the Rules of the Commission, in that it is not executed by both the assignor and the assignee. The assignor refuses to sign said application.

DESIGNATED FOR HEARING

NEW—Springfield Radio Service, Inc., Springfield, Ohio.—Application for C. P. for new station to operate on **780 kc.**, 250 watts, daytime only. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Application for C. P. to move transmitter site locally from 201 Randolph St. to Holston Hills Road, near Knoxville; install new equipment and DA system; change frequency from **1310 kc.** to **620 kc.**, and increase power from 100 watts night, 250 watts day, to 500 watts night, 1 KW day, employing DA system for nighttime operation. Application designated for hearing to determine if interference might result to existing stations, and pending applications involve increase in service.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Application for C. P. to move transmitter site locally, exact site to be determined with Commission's approval; install new equipment and vertical radiator; and change frequency from **1420 kc. to 630 kc.;** increase power from 100 watts night, 250 watts day, to 1 KW night, 5 KW day. Application designated for hearing to determine if interference might result, and pending applications involve increase in service.

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Application for C. P. to install new equipment and DA system; change frequency from **640 kc.** to **1390 kc.;** and increase power from 500 watts, limited time, employing DA system, to 1 KW night, 5 KW day, unlimited time, employing DA system for nighttime operation. Application designated for hearing to determine whether interests of any other station may be adversely affected by reason of interference, pending applications with which conflict may be had by reason of interference, and whether operation of station as proposed will be in accord with Commission's plan of allocation and standards of good engineering practice.

FEDERAL TRADE COMMISSION ACTION

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

The United Corporation, trading as Virginia Products Company, and George M. Crump, president of the United Corporation, New York, were ordered to discontinue misleading representations in connection with the use of the name "Virginia" in the sale and distribution of deviled ham and corned beef hash.

Findings of the Commission are that, excepting for the deviled ham packed for the respondents by one meat packing company, the meats in the deviled ham and corned beef hash sold by the respondents are not obtained from cattle or hogs grown in Virginia, nor cured nor processed by the well-known Virginia method nor in the State of Virginia. (3093)

Fred Adelmann, also known as Frank Adelmann, trading as **Vit-O-Net Company, Vit-O-Net Corporation,** and **Electric Blanket Company,** 1716 South Michigan Ave., Chicago, was ordered to discontinue misleading representations in the sale and distribution of "Vit-O-Net," described as an electrical blanket device for treating diseases.

Under the order, the respondent is to cease representing that "Vit-O-Net," or any similar device, sets up a radio-magnetic energy which is transmitted to the patient thus causing an increased activity and revitalizing of the organs and cells of the body and a charging of the blood stream with electromagnetic energy with beneficial results. The respondent is also ordered to cease representing that his device is an amazing discovery, and that it aids in the elimination of wastes and poisons; has a therapeutic value in treating all diseases known to man, or that it has any therapeutic value at all on the body other than that which would be produced by the heat generated by the device. (3533)

Sam Bell, trading as **Longwear Paint and Varnish Works,** North Kansas City, Mo., was ordered to discontinue misleading representations in the sale and distribution of paint products.

Under the order, the respondent is to cease representing as paint any product which does not contain the necessary ingredients in quantities sufficient to give it the quality, character or value of paint. The respondent is further directed to cease misrepresenting the composition, properties or value of his products.

The order also prohibits representations that the respondent's paint products are manufactured at any place other than the actual place of manufacture, or that they are made by any person, firm or corporation other than the actual manufacturer. (3632)

United Educators, Inc.; General Research Foundation, Inc.; Publishers Finance Company, Inc.; Warren T. Davis, Joseph J. Rink and Elmer C. Wolford, Chicago, have been ordered to cease and desist from misrepresentations in the sale and distribution of a set of reference books known as the **"American Educator Encyclopedia,"** certain research services and a loose-leaf extension service.

Warren T. Davis, Joseph J. Rink and Elmer C. Wolford are executive and principal owners of the three corporations carried on as different branches of one business concern.

Findings of the Commission are that 25 to several hundred canvassers were employed by the respondents, and that 17,937 sets were sold between April, 1931, and April, 1936, at prices ranging from $49.50 to $80. To promote sales, the Commission finds, representations were made to prospective purchasers that volumes of the encyclopedia were free, and the buyer was to pay for only loose-leaf extension service at a stated price, or that volumes of the encyclopedia were given at an especially low price as part of an advertising program because of the prominence of the prospective purchaser, or for other reasons; that notes signed in connection with the sale of the units were simply receipts or order blanks; that the research service was furnished by "General Research Foundation," of which the purchaser became a member, and that the purchase price represented the entire cost of the unit.

The Commission finds that the purchase price of the unit as shown in the respondents' contract order forms did not show its entire ultimate cost, and that to enforce collection of accounts due, the respondents represented to buyers that the debts had been purchased by Publishers Finance Company, Inc., before maturity and that the finance company was an innocent purchaser of such obligations. Buyers are alleged to have been threatened with action through local banks, and in case of teacher-purchasers, through school authorities.

It was also found that the finance company was not an innocent purchaser, but had full knowledge of the facts.

The respondents were ordered to cease and desist from advertising or representing that any books or set of books offered for sale by them will be given free of cost; that purchasers are only buying or paying for loose-leaf extension supplements intended to keep the set of books up to date for a period of years; that any books are offered for sale at an especially low price, unless the price is less than the one at which they are customarily offered for sale; that any instrument presented to prospective customers for signature in connection with the sale of the books is a mere receipt or order blank, when such instrument is an agreement to pay a specified sum; that any such instrument presented for signature is not a promissory note, when such instrument contains an agreement by the signer to pay specified sums on certain dates. The respondents will cease representing as a "foundation" any organization other than one in whole or in part supported by disinterested or eleemosynary funds, and advertising or representing that any specific sum is the full price of any set of books and supplemental services unless all the terms and conditions which must be met for the services to be obtained are clearly and conspicuously stated in immediate connection therewith. (3428)

Samuel L. Presner, Miami, Fla., former president of the now dissolved corporation, Federal Organization, Inc., New York, was ordered to discontinue misleading representations in the sale and distribution of medicinal preparations and devices.

The order directs the respondent to cease representing through the word "Federal" that his products have been tested by the United States Government, or through the use of the words "Laboratories" or "Research Laboooratories," as part of his trade name, or in any other manner, that he maintains a laboratory for making scientific tests on products sold by him.

Under the order, the respondent is to cease representing directly or by implication that certain devices will be of aid in male sexual disorders; that "Stamina Kel-Pep" will assist digestion or build up energy, blood or tissues; that certain preparations are tonics for the sexual organs, or are beneficial treatments for prostate and kidney disorders.

The order further directs the respondent, Presner, to discontinue advertisements which fail to reveal that "Stamina Kel-Pep," "Spanish Passion Extract," "Double Strength Spanish Passion Extract" and "African Jungle Tree" are not wholly safe for use by the lay public in self medication. The case was closed as to the dissolved corporation. (3782)

The Knox Company, 811 West 7th St., Los Angeles, was ordered to cease advertising that its preparation "Cystex" is an adequate treatment for kidney and bladder ailments unless such representations are restricted to the non-organic and non-systemic disorders. The order further prohibits representations that "Cystex" is an adequate treatment for conditions the symptoms of which are swollen joints, leg and rheumatic pains, backache, nervousness, dizziness, burning of the urinary passage, "getting up nights," circles under the eyes, and excess acidity or loss of energy. The respondent is also ordered to discontinue representing that its preparation "Mendaco," has any therapeutic value in the treatment of asthma in excess of furnishing, in some cases, temporary relief from the symptoms of asthma, or that it has any beneficial effect on the blood or promotes body metabolism. (3597)

Harry Epstein, trading as Restoria Company, 805 East Mason St., Milwaukee, was ordered to cease representing "Restoria" or any similar preparation as an effective treatment for bad blood, ulcers, swollen glands, eczema, neuritis, neurasthenia, rheumatism, or syphillis. The order further forbids the representation that the respondent's preparation is manufactured in a modern laboratory or under the supervision of skilled scientists, until such is a fact, or the dissemination of advertisements which fail to reveal the preparation as being not a wholly safe drug for use by the lay public in self medication. (3737)

William G. Nash, Sr., William G. Nash, Jr., and **Florence Nash Cox,** trading as Nash Brothers Drug Company, Jonesboro, Ark., were ordered to discontinue representations that "Nash Chill and Liver Tonic" or "Nash's C. & L. Tonic," is a cure or remedy for malaria or that it will restore the normal functioning of the bowels, add red corpuscles to the blood, aid digestion, increase the appetite, restore vigor or vitality, or that it will cure numerous ills among which are liver trouble, colds, chills and headache. The order further forbids advertisements which represent that the preparation is safe for use in unsupervised self-medication, or which fail to reveal that it is not a wholly safe drug to be used by the lay public in self-medication.

The respondents were also ordered to cease representing that their preparation has received the endorsement of medical opinion throughout the southern United States. (3775)

Waco Drug Company, Portland, Ore., was ordered to cease representing its preparation "Omodyne," or any similar product, as being an effective treatment for arthritis, neuritis, lumbago, sciatica, gout, neuralgia, or rheumatism, or as being of value in relieving the aches or pains which are due to such conditions. The order also forbids representations that the use of "Omodyne" will cause the elimination of poisons from the system, or that it is prepared in accordance with a scientific formula. (3468)

Weiss Bedding Company, Inc., and **Dan Weiss, Jr.,** 365 Baxter Ave., Louisville, Ky., were ordered to discontinue misleading representations in the sale and distribution of mattresses.

The order directs the respondents to cease using the term "Cotton Felt," or similar terms, to describe any mattress which is not made of cotton fibers garnetted together into a mat or web; representing that such mattresses are new or sanitary unless all materials made a part of them are new or sanitary, and representing that their mattresses comply with all State laws, unless that is a fact. (3809)

STIPULATIONS

The Commission has entered into the following stipulations:

P. H. Davis Tailoring Company, Cincinnati, Ohio, entered into a stipulation to discontinue misleading representations in the sale and distribution of men's clothing.

Under the stipulation, the respondent is to cease representing as "wool," "woolen," "pure wool" or "worsted" the fabrics used in the manufacture of its clothing when such fabrics are not wholly composed of wool. It was also agreed that the respondent will cease representing the fabric used in its garments as containing silk either alone or in combination with other materials as a decoration or otherwise, when such decoration or thread is not silk but some other thread. (02413)

Miles Laboratories, Inc., Elkhart, Ind., entered into a stipulation with the Federal Trade Commission to discontinue misleading representations in the sale and distribution of "Alka-Seltzer."

The respondent company agreed to cease the use of advertising matter implying that colds, neuralgia, distress after meals, and "common everyday ailments" result from excess acidity of the blood, an acid condition of the blood, or deficient alkaline reserve of the blood, and that the alkalinizing effect of "Alka-Seltzer," by correcting such acid condition or restoring the alkaline reserve, will be a proper treatment for the ailments mentioned.

The respondent further agreed to discontinue representations implying that headaches, upset stomach, and aches and pains result from, or are associated with, excess acidity of the blood, an acid condition of the blood, or a deficiency in the alkaline reserve of the blood, except when the ailments mentioned may be shown by competent scientific evidence to be directly associated with such conditions of the blood, and subject to this exception, to cease making representations implying that the taking of "Alka-Seltzer," by correcting the acid condition of the blood or restoring its alkaline reserve, will be a proper treatment for such ailments.

The respondent also stipulated that it would cease representing that other therapeutic effects of "Alka-Seltzer" exceed the recognized benefits to be derived from neutralization of hyper-acidity of the gastric contents or the analgesic and other effects of sodium acetylsalicylate together with the action of buffer salts. (2503)

Slatedale Knitting Mills, Inc., Slatedale, Pa., engaged in manufacturing and selling children's hosiery, stipulated that it would cease representing that its products are composed of fibers in any designated proportion, when such is not a fact, and cease using the word "wool," either alone or together with the word "rayon," or with any other words, as descriptive of hosiery not containing wool in substantial part. The stipulation provides that if the hosiery is composed of a mixture of fibers, as rayons and cotton with only a small proportion of wool, then the word "wool" shall be immediately accompanied by suitable disclosure of the amount of wool actually present and by the names of the other content fibers, arranged in the order of their predominance by weight and printed in type equally conspicuous; as, for example, "rayon, cotton and 5 per cent wool".

The respondent company also agreed to desist from branding or labeling products composed of rayon and other kinds of fiber or substances without full disclosure of the rayon and other content, made by accurately designating each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber present in a proportion of 5 per cent or less by weight; as, for example, "Cotton and Rayon". (2498)

The A. Nash Company, also trading as Schaefer Tailoring Company, 1916 Elm St., Cincinnati, agreed that in connection with the sale and distribution of men's clothing it would cease representing the principal fabrics used in the manufacture of its clothing as "Wool," "All Wool," "Pure Wool," "Woolen," "Fleece," or "Worsted," when such fabrics are not wholly composed of wool, and would discontinue representing as "Wool," "All Wool," "Pure Wool," "Woolen," "Worsted," or "Fleece" the principal fabric used in the manufacture of its clothing which is composed partly of wool and partly of cotton, silk, rayon, linen, or any other fiber, unless the same is represented as "Wool and Cotton," "Wool and Rayon," "Wool and Linen," etc., in the order of the predominating fiber content.

The A. Nash Company also agreed to cease representing that sales-persons may expect to earn $35 a week during their first season selling its garments. (02409)

Frederick Stockhausen, trading as Kayak Boat Company, 152 East 129th St., New York, agreed to cease representing: That his plant or factory makes or builds kayaks exclusively, when such is not a fact, and, either by direct statement or by inference, that the kayaks made and sold by him are "non-sinkable" in all circumstances. Stockhausen also stipulates that he will discontinue advertising, unqualifiedly, that the kayaks sold by him can be navigated through the "heaviest waters"; that they are so constructed that it is impossible for any wave to reach the deck and pour into the cockpit; that their construction is patented, and that the design of these boats "eliminates all danger". (2501)

Harry T. Bedman and **Chester N. Olson,** trading as Alexandria Boat Works, Alexandria, Minn., agreed to cease representing directly or by implication that boats built with red cedar plankings are inferior to those planked with redwood; or that boats built of redwood planking will outwear two or three red cedar planked boats, or will outwear any such boats; or that red cedar is a cheaper material than redwood, when such representations are not warranted by the facts and are not supported by the weight of scientific evidence. (2499)

L. Lewellyn, trading as Lewellyn Products Company, 489 W. Ferry St., Buffalo, agreed to cease representing directly or by implication that his product, "Lewellyn's Pure Wheat Germ," is rich in Vitamins A, B, E and G, and valuable mineral salts; aids digestion; nourishes nerve tissues; prevents premature old age symptoms, or builds up the health of the entire body. The respondent also stipulated that he will discontinue advertising that the ingestion of "Lewellyn's Pure Wheat Germ" fortifies food in essential vitamins and mineral salts and that the preparation contains ingredients or elements beneficial in treating loss of appetite, loss in weight, constipation, and nervous disorders, and is essential for well-being at all ages. (02410)

E. T. Browne Drug Company, Inc., 127 Water St., New York, stipulated that it will cease making direct or implied representations that users of "Palmer's Skin Success Ointment" can be confident of receiving beneficial results and that use of this preparation is beneficial in the treatment of blackheads, bumps or blotches on the skin, or sunburn or any other similar condition.

The respondent agrees to discontinue advertising that use of Palmer's Skin Success Soap will completely remove blackheads, protect the skin, or prevent conditions resulting from exposure to climate or use of cosmetics. (02411)

Robert Quirk, trading as The Ohio Products Company, North Madison, Ohio, entered into a stipulation with the Federal Trade Commission to discontinue misleading representations in the sale and distribution of a rat poison designated "Quick-Death."

According to the stipulation, the respondent is to cease representing directly or by implication that "Quick-Death" is nationally known or that its active ingredient, red squill, is a new or original ingredient for rat poison. The respondent further agreed to discontinue representing that "Quick-Death" is non-poisonous or absolutely harmless under all circumstances to other animals and human beings; that it is 100 per cent effective in the destruction of rodents, and that all rodents who eat "Quick-Death" will go outside of the buildings to die.

It was also agreed by the respondent that he will cease representing that prospective representatives can make profits in a specified period of time in excess of that made by its active representatives in a like period under normal conditions. (02412)

COURT ACTION

The United States District Court for the Eastern District of Missouri on August 7, granted a temporary restraining order on petition of the Federal Trade Commission to prohibit **Charles L. Klapp,** trading as The Cardinal Company, and as The Cardinal Company of St. Louis, 406 Market St., St. Louis, from further dissemination of false advertisements of a medicinal product pending hearing on a petition for a preliminary injunction.

The FCC alleges that the defendant's advertisements are false in that they represent his preparation, Fema-Lade, as being a safe, competent, and scientific treatment for delayed menstruation and as having no ill effects on the body, and in that they fail to reveal that the use of this preparation under the conditions prescribed in the advertisements, or under such conditions as are customary and usual, may result in serious and irreparable injury to the health of users.

Highly Important Meetings Next Week

Copyright, the new code and record licensing top the agenda for highly important NAB committee meetings in New York next week.

The Executive Committee will meet Tuesday, August 22, at 10 a. m. in the Ritz Tower to review developments and discuss policy in all three matters.

On Wednesday, the Executive Committee will meet with the Copyright Negotiating Committee, augmented by Walter Damm, WTMJ, Milwaukee, and John Shepard, 3rd, the Yankee Network, to discuss the whole copyright situation and the forthcoming special NAB convention. The negotiating committee includes Major Lenox Lohr, NBC; Edward Klauber, CBS; Sam Rosenbaum, WFIL; Mr. Elmer and Mr. Miller.

In connection with the record licensing problem, Mr. Miller sent the following wire to officials of the Columbia Recording Corporation, Decca Records, Inc., and the RCA Manufacturing Company:

> "The NAB Copyright Committee at recent meeting considered various angles resulting from decision in Whiteman case and passed resolution requesting companies to hold up action concerning contracts with stations until after entire subject and details of proposed contract could be fully considered at conferences between NAB Committee and recording companies. In conformity with the above resolution I make this request of your company and am making the same request of RCA and Decca. Believe it would be advantageous to all concerned if further action can be deferred until after proposed conference. Will telephone your office Friday morning to arrange for conference in New York next week."

The special committee on phonograph record licensing was appointed last week by Mr. Miller. It consists of the following: Neville Miller; John Elmer, WCBM, Baltimore; and Clair McCollough, WGAL, Lancaster, Pa.

RCA Victor Contract

Below is the text of the proposed license contract submitted to all stations by RCA Victor, to permit the station in return for a fee to broadcast Victor and Bluebird records under certain conditions. Decca also has notified stations that it will demand a license fee.

IN CONSIDERATION of the making of the payments at the times and in the amounts hereinafter set forth, RCA MANUFACTURING CO., INC., of Camden, New Jersey, producer of Victor and Bluebird phonograph records, does hereby grant to operator of Radio Station ...., whose broadcasting studio is located at a personal, non-exclusive, indivisible and non-assignable license under Licensor's property rights hereinafter referred to, to broadcast the phonograph records hereinafter identified, subject to the terms and conditions of this license agreement, to each of which Licensee expressly agrees:

1. Licensee is licensed by Licensor to broadcast over Licensee's above-mentioned radio station, either as an original broadcast or as part of a network program, programs containing Victor and/or Bluebird phonograph records produced by Licensor of its predecessor companies and licensed hereunder, but (a) new releases shall not be broadcast by Licensee more than twice a day for the

RCA VICTOR CONTRACT

(Continued from page 3665)

first third (30) days following the release date thereof as fixed by Licensor in announcements to be sent by it to Licensee from time to time; (b) Licensor's records when broadcast by Licensee shall be clearly announced as Victor or Bluebird phonograph records at least once during each broadcast period in which they are used and in any event at least once during each fifteen minute period, and no statement shall be made in conjunction with any broadcast which might in any wise tend to mislead listeners into believing that the artists whose performances are recorded on the records broadcast are personally present and performing in Licensee's studio unless that be the fact; and (c) worn, scratched or damaged records shall not be used by Licensee for broadcasting purposes, and all reasonable efforts shall at all times be made by Licensee to conduct broadcasts of Licensor's records in a manner which will not be detrimental to the prestige and standing of the product and business of Licensor or Licensee.

2. All Victor and Bluebird records heretofore or hereafter during the continuance of this license produced by Licensor or its predecessor companies are licensed hereunder with the exception of those records specified in Schedule A attached hereto and made part of this license and with the exception of such additional records as may from time to time be specified by Licensor as additions to said Schedule A; provided, however, that if the total number of records included in said Schedule A by Licensor shall at any time exceed one-third of the total number of records then contained in Licensor's entire record catalog, Licensee may at its option elect to terminate this license at the end of any month by giving Licensor ten days' written notice of its intention so to do.

3. This license is granted under Licensor's property right in its records, as manufacturer thereof, and under any common law property right of the artists whose performances are recorded on the records licensed hereunder. This license is not intended to constitute, nor does it constitute, a license to publicly perform for profit, copyrighted material which may be embodied in any of the Licensor's records.

4. The annual license fee payable to Licensor by Licensee in United States currency shall be in accordance with the following schedule of rates:

Class	Highest Half-Hour Rate as Published in "Standard Rate and Data"*	Monthly Fee
A	$200 and over	$300.00
B	$175 to $199	$275.00
C	$150 to $174	$250.00
D	$125 to $149	$225.00
E	$100 to $124	$208.33
F	$ 80 to $ 99	$187.50
G	$ 60 to $ 79	$166.67
H	$ 40 to $ 59	$145.83
I	$ 20 to $ 39	$125.00
J	$ 19 and under	$100.00
K	Stations which do not sell time and whose broadcasts are confined solely to educational and religious programs	$10.00

Licensee represents and warrants that its highest half-hour rate is $........ and that it therefore belongs in Class ...., as set forth in the foregoing Schedule. Licensee's annual license fee is therefore fixed at $........, payable in equal monthly instalments of $........ each, in advance, on or before the tenth day of each month, beginning with the date of this license, which fee is subject to upward or downward revision at the end of each month in the event Licensee shall from time to time change its time rates so as to cause it to fall into a different classification, as set forth in said Schedule.

5. The term of this license is one year from the date hereof but it may be terminated by Licensor at any time upon ten days' written notice sent to Licensee at its broadcasting studio by telegraph or mail in the event of non-payment of license fees promptly when due, or failure of Licensee promptly to comply with and fulfill all of the terms and conditions of this license.

Station Call Letters ....

FCC BROADCAST RULE 3.90 (a)(2)

The FCC has agreed to reconsider Section 3.90 (a)(2) of the Rules Governing Standard Broadcast Stations in the light of facts presented to the Commission by the NAB. On July 21, an interpretation of the rule was requested, and on July 27, the Commission replied stating that official logs must identify each recorded musical composition broadcast (NAB REPORTS, July 28, pp. 3625-26). Probably several weeks will elapse before the question of modifying the rule can be considered, as a number of the Commissioners are on vacation. The additional letters exchanged between the NAB and the FCC follow:

August 3, 1939

Mr. John B. Reynolds, Acting Secretary
Federal Communications Commission
Washington, D. C.

Dear Mr. Reynolds:

Many thanks for your letter of July 27 interpreting the log requirements of Section 3.90 (a)(2) of the Rules Governing Standard Broadcast Stations which were promulgated by the Commission June 23.

It is noted that the Commission agrees with the interpretation suggested in my letter of July 21 in all respects except that portion relating to recorded programs, such as the so-called "Musical Clock," which are made up of individual selections contained in transcription libraries or phonograph records interspersed with commercial announcements. It is with reluctance that I again call to your attention the discrimination which the commission's interpretation imposes and the increased burden placed on small stations least able to absorb that burden.

These small stations, as you know, must of necessity use recorded music almost exclusively. Not only is live musical talent not available to them, but even if available, the increased expense would be prohibitive. Yet it is these stations upon which falls the greatest burden of keeping the voluminous logs. The Commission may have some objective to be achieved with which the industry is not familiar, though one cannot but wonder why it should be necessary to identify in the log the particular musical composition performed from a recording and the identification be unnecessary when the same number is performed by live talent.

---

* Radio Advertising Rates and Data, published by Standard Rate and Data Service.

As you know, many of these recorded programs are made up from telephone requests received during the course of the program. In many stations, the announcer does all the work of operating the turntable, locating the musical compositions in the station's recorded library, announcing, and making the suitable notations in the station log. In many instances, the control operator must operate the turntable, keep the log, etc., and the increased burden may result in less efficient control. Since the average recorded musical selection runs only slightly over 2½ minutes, it will be seen that the announcer or control operator has little, if any, available time for additional duties.

The Commission's interpretation of the rule will require some twelve to fifteen separate log notations for each fifteen minute program, depending on the number of commercial announcements, and over half of these are necessitated by the requirement that each recorded musical composition be identified and the time of broadcast noted. When this is multiplied by the total number of such programs during the course of the broadcast day, the extent of the burden is more readily appreciated.

To illustrate the foregoing, permit me to call attention to the operating schedule of two small stations, one located in the East and one in the Middle West. These stations were picked at random, and are believed to be representative. In both instances, the operating schedule is for June 1, 1939. The eastern station was operated a total of thirteen hours from 6:30 a. m. to 7:30 p. m., with seven hours and twenty minutes of this total devoted to the rendition of recorded music contained in the station's transcription and phonograph record library. Some 350 log entries will be necessary with respect to these recorded programs exclusive of commercial announcement entries, and approximately 270 of these entries are caused by the requirement that the individual musical compositions performed be identified by name or symbol and by time of performance.

An even worse situation is disclosed in the case of the midwestern station. This station operated thirteen and one half hours from 7:30 a. m. to 9:00 p. m., with eleven hours and forty-five minutes devoted to musical programs created from selections contained in the station's transcription and phonograph record library. In this case, some 560 log entries will be necessary exclusive of commercial announcements, which includes approximately 330 entries caused by the Commission's requirement. It should be pointed out that the above-referred-to stations do not normally keep the detailed record from which the above information was obtained but did so on the day mentioned at the request of the Association in another matter.

In view of the great burden upon small stations disclosed by the foregoing, it is hoped the Commission will reconsider its interpretation and modify either the rule or its interpretation so as to permit stations to make similar log entries with regard to music created from transcription and phonograph record libraries as is permitted where the music is created by live talent.

With kindest personal regards, I am

Sincerely,

Andrew W. Bennett.
Counsel.

August 10, 1939

Mr. Andrew W. Bennett, Counsel
National Association of Broadcasters
Washington, D. C.

Dear Mr. Bennett:

This will reply to your letter of August 3, 1939, relating to Section 3.90 (a)(2) of the Rules Governing Standard Broadcast Stations which became effective August 1, 1939.

As Section 3.90 (a)(2) is now worded, it would be impossible by interpretation of the rule to authorize licensees of radio broadcast stations to make log entries pertaining to music created from transcriptions and phonograph recordings in the same manner as that authorized where music is created by live talent. In our letter to you of July 27, 1939, we suggested a manner of keeping logs in accordance with Section 3.90 (a)(2) so as to impose the least possible burden upon station licensees.

Your request that the Commission reconsider the rule and modify it so as to permit stations to make similar log entries with regard to recorded music as permitted where music is created by live talent will be presented to the Commission on the earliest possible date for consideration as to possible modification, in the light of the matters pointed out in your correspondence on the subject.

Very truly yours,

T. J. Slowie,
Secretary.

Highly Important Meetings Next Week	3665
RCA Victor Contract	3665
FCC Broadcast Rule 3.90 (a)(2)	3666
Operators' Licenses	3667
794 Stations	3668
Correction	3668

OPERATORS' LICENSES

The FCC has sent the following notice to all stations:

Your attention is invited to Section 164.06 of the revised Rules Governing Commercial Radio Operators, effective July 1, 1939, which reads as follows:

> "Sec. 164.06. *Endorsement of service record.*—A station licensee or his duly authorized agent, or the master of a vessel acting as the agent of a licensee, shall endorse the service record appearing on said operator license, showing the call letters and types of emission of the station operated, the nature and period of employment, and quality of performance of duty."

It is the responsibility of a station licensee to insure correct certification on the operator's license as to the extent and quality of service performed by the operator. To assist in the execution of this responsibility, the following may be used as a guide in determining the type of employment which entitles an operator to endorsement attesting service, particularly with respect to operators employed for maintenance duties.

An operator is entitled to service endorsement of his license:

1. When he is actually employed with responsibility as watch operator and stands regular watch at a station maintaining a regular service (such as broadcast or ship). The Chief Operator or Chief Radio Engineer who is responsible on a twenty-four-hour basis for the proper operation of the transmitter should likewise be given credit for service.
2. In the case of stations having intermittent hours of service (such as experimental or special emergency) when he is the operator employed and responsible for the operation of the station, if and when needed. In this case the period should be the period of his responsibility even though the transmitter was operated only intermittently during that period.
3. When regularly employed, or under contract as an individual, as the operator responsible on a twenty-four-hour basis for the repair and maintenance of a station. In this case, credit should be given for service during the full period of employment whether or not it is necessary to conduct service or maintenance operation. (See next paragraph for discussion of conditions if a service company is employed.)
4. When continuously employed by a commercial radio transmitter service agency as the operator responsible for maintenance and service of miscellaneous transmitters licensed to various persons. In this case, credit should be allowed for the period when the operator was employed in this activity during the usual hours of labor.

Credit for service should not be given if:

1. A licensed operator, although available for relief, is not responsible in any manner for the station except during those periods when he is actually acting as a relief operator. Of course, credit for service should be given for any periods during which he acts as relief. As an example, the Desk Sergeant in a police department holding a radio operator's license but who, normally, has nothing to do with the operation of the radio division should not be given credit for service even though he were available as an operator in the case of an emergency. Should he act for two weeks as a relief operator in case of sickness or vacation, it would be proper to give him service for the two-week period. Similarly, the studio operator in a broadcast station is not entitled to credit except for those periods during

which he is actually on duty as watch operator at the transmitter.

2. A maintenance man is not regularly employed under contract to maintain a station even though it may be the practice of the station licensee to call upon him upon occasion for assistance. Service credit is only proper for those days during which actual service was performed.

3. A service man is not actually engaged in the business of servicing equipment. An operator is not entitled to credit for the repair and maintenance of miscellaneous transmitters other than for the time actually spent on those transmitters unless he is in fact in the business. In other words, an operator licensee cannot endorse his own license for service as a maintenance man by merely printing a letterhead establishing himself as a service man. He must be actually so engaged.

An operator holding separate radiotelegraph and radiotelephone class licenses or a radiotelegraph license with a radiotelephone endorsement, who has operated at a station licensed for and actually using A1, A2, and A3 emission is entitled to service endorsement for both licenses.

In computing service, fractions of a day in which the operator is on watch and *responsible for* a station's operations shall be considered as a day. It is not sufficient for an operator to post his license and mainly serve as an additional operator. He must have operation responsibility to obtain service.

Credit should be given for a week or any similar extended period which includes Sundays and holidays if the operator is regularly employed; that is, has a regular schedule during which he is responsible for the station's operation, which schedule includes a substantial percentage of the total period considered.

In the event that special cases arise which are not covered by the above, additional information may be obtained from this office.

T. J. Slowie,
Secretary.

Adopted: August 8, 1939.

794 STATIONS

The Federal Communications Commission dropped one station during the month of July, 1939, and issued operating licenses to four new stations. The Commission also granted seventeen permits for the construction of new stations during the month. A comparative table by months follows:

	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1
Operating stations..	722	727	729	732	734	735	735	738
Construction permits	42	39	37	37	38	38	43	56
Total	764	766	766	769	772	773	778	794

CORRECTION

In the NAB Reports of August 11, 1939, p. 3658, the location of Station WJMS should have been *Ashland, Wisconsin.*

FEDERAL COMMUNICATIONS COMMISSION

DECISIONS OF THE COMMISSION

The Commission on August 9 issued the following order:

Upon consideration of the Supplemental Petition for Reconsideration of Summit Radio Corporation, and the oppositions thereto of American Republican, Inc. (WBRY) and Allen T. Simmons (WADC), respondents, filed respectively on July 5, 6, and 10, 1939:

IT IS ORDERED, This 8th day of August, 1939:

1. That the Supplemental Petition for Reconsideration of Summit Radio Corporation BE, AND IT IS HEREBY, GRANTED in so far as it requests the Commission to reconsider the above application and its decision and order thereon of May 11, 1938, with particular regard to the repeal of Rule 120.1 and the adoption of Rule 3.26, effective August 1, 1939, and the modification of its findings based upon the evidence now material.

2. That the Commission's order of July 13, 1938, granting the petition of Summit Radio Corporation filed July 11, 1938, for rehearing, BE, AND IT IS HEREBY, REVOKED.

3. That the Commission's findings of fact contained in the "Statement of Facts, Grounds for Decision, and Order" of May 11, 1938, BE, AND THEY ARE HEREBY, AFFIRMED, except that all of said findings and conclusions which relate in any manner to the applicant's proposed program of experimentation and research, and the finding contained in sentence 1, paragraph 3, page 5, of the "Statement of Facts," BE, AND THEY ARE HEREBY, DELETED.

4. That the "Grounds for Decision" of May 11, 1938, BE, AND THEY ARE, HEREBY REVOKED, and the following "Grounds for Decision" substituted therefor:

> 1. The applicant is qualified in all respects to construct and operate a standard broadcast station of the character proposed herein.
>
> 2. That the proposed service would be expected to render substantial benefits to the area to be served.
>
> 3. That the operation of a broadcast station as proposed herein will not be expected to cause any objectionable interference to any existing broadcast service.
>
> 4. Sufficient potential sources of advertising are shown to exist in the Akron, Ohio, area from which the applicant may reasonably be expected to derive adequate commercial support to insure the successful operation of the proposed station.
>
> 5. A grant of the application will serve public interest, convenience, and necessity.

5. That the Commission's order of May 11, 1938, BE, AND IT IS HEREBY, REVOKED, and the following order adopted in lieu thereof: "Upon consideration of the entire record, IT IS ORDERED, that the application of Summit Radio Corporation, Docket No. 4438 (in so far as it requests authority to construct and operate a standard broadcast station), BE, AND IT IS HEREBY, GRANTED."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Thursday, August 17, 1939

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—In the matter of: Order to show cause why the license to operate radiobroadcast station WLTH should not be revoked.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MISCELLANEOUS

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—Granted special temporary authority to use relay broadcast transmitter KABF for location tests at KMJ on frequency **580 kc.**, with power of 50 watts, between the hours 3 and 6 a. m., PST, for the period August 11 to 18

WPRA—Puerto Rico Advertising Co., Mayaguez, P. R.—Granted special temporary authority to operate from 10 p. m., August 18 to 1 a. m., AST, August 19, in order to broadcast graduation exercises of the Gomez Commercial School.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate from 9 p. m. to 12 midnight, EST, August 14, in order to broadcast Macon-Spartanburg Baseball game with special ceremonies in celebration of Baseball's Hundredth Anniversary.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted extension of special temporary authority to operate with 5 kw. at night, using DA, for the period August 13 to September 11, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on **780 kc.**, reduces power so that additional interference is not involved, or until defective directional system is corrected by installing new tuning condensers. (Action taken 8/11.)

WRUF—University of Florida, Gainesville, Fla.—Granted special temporary authority to rebroadcast the Navy time signals from Arlington for the period ending 3 a. m., EST, February 1, 1940. (Action taken 8/11.)

KIIP—Jack M. Karterman, Luckyshot, Alaska.—Granted special temporary authority to operate a point to point telephone station KIIP at Luckyshot, Alaska, on frequency **3092.5 kc.**, with power of 30 watts, for a period of 3 months, subject to receipt and consideration of application for CP and license.

First Baptist Church, Pontiac, Mich.—Granted authority to transmit religious programs to radio station CKLW, Windsor, Ontario, Canada, through the facilities of Michigan Bell Telephone Co., for the period August 13, 1939, to August 13, 1940.

The Commission (by Walker, Commissioner) on August 7, took the following action:

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate simultaneously, non-synchronously, with KFAB, commencing 4:45 a. m., CST, for the period August 9 to September 7, in order to conform to Daylight Saving Time.

KFAB—KFAB Broadcasting Co., Lincoln, Neb.—To operate as above except simultaneously non-synchronously with station WBBM.

KWLC—Luther College, Decorah, Ia.—Granted extension of special temporary authority to reduce the broadcasting schedule to one hour daily, for the period August 13 to September 14, in order to observe summer vacation.

W2XBT—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate Television Broadcast Station (experimental) on frequency band **156-162 megacycles,** for the period August 13 to September 11, pending adjustment of the license to conform with provisions of Rule 43.13.

NEW—Bellingham Broadcasting Co., Bellingham, Wash.; KVOS—KVOS, Inc., Bellingham, Wash.—The Commission amended its order assigning Commissioner Payne to preside at the hearing on the application of KVOS for renewal of license, and the application of Bellingham Broadcasting Co. for C. P., scheduled for August 16, and assigned George B. Porter to act as Examiner in the case if Commissioner Payne cannot be present.

KGVO—Mosby's Inc., Missoula, Mont.—Dismissed without prejudice, application for modification of license to change operating assignment, granting applicant's motion to dismiss.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to operate from 7:15 to 9:15 p. m., CST, on September 5, 7, 12, 14, 19, 21, 26 and 28, and 8:15 to 9:15 p. m., CST, on September 6, 13, 20 and 27, in order that station WNAD may remain silent during summer vacation (provided WNAD remains silent).

WNAD—Univ. of Okla., Norman, Okla.—To remain silent 7:15 to 9:15 p. m., CST, on September 5, 7, 12, 14, 19, 21, 26 and 28, and 8:15 to 9:15 p. m., CST, on September 6, 13, 20 and 27, in order to observe summer vacation; also to be excused from the regular frequency monitor test on September 9, 3:30 to 3:50 a. m., CST.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from international broadcast stations W2XE and W3XAU over station WKAQ, on a non-commercial experimental basis only, for the period August 19 to September 18.

WLOK—The Fort Industry Co., Lima, Ohio.—Granted special temporary authority to operate from local sunset (7:30 p. m., EST), until midnight on August 8, in order to broadcast returns on the local primaries and election, the time not devoted to such returns to be taken up by non-commercial programs.

WNEL—Juan Piza, San Juan, P. R.—Granted special temporary authority to rebroadcast sustaining programs to be received from International broadcast stations W3XL and W3XAL over station WNEL, on a non-commercial experimental basis only, for a period not to exceed 30 days.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Granted special temporary authority to operate unlimited time (August 6:45 p. m., CST), August 29, in order to broadcast election returns of second primary in state and county elections.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted special temporary authority to operate between the hours of 9 a. m. and 5 p. m., EST, with power of 5 KW on the frequency **1450 kc.**, with DA for the period August 15 to August 24, in order to make a survey of WGAR's night primary service area.

WEOD—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate Relay Broadcast Station WEOD with power of 250 watts, in accordance with Section 40.04, in order to carry out program of experimentation outlined in application for C. P. granted January 24, 1939, for the period August 11 to September 9, 1939.

KFRU—KFRU, Inc., Columbia, Mo.—Granted motion to withdraw without prejudice, application for modification of license to change operating assignment of KFRU.

KMMJ—M. M. Johnson Co., Clay Center, Neb.—Granted motion to dismiss without prejudice, application for C. P. to increase power.

WEGY—Chicago Fed. of Labor, Portable-Mobile, Chicago, Ill.—Granted C. P. to make changes in equipment and decrease power in relay station from 30 to 15 watts.

WOI—Iowa State College of Agr. and Mechanic Arts, Ames, Ia.—Granted C. P. to move transmitter locally on campus of college; change studio location from Engr. Annex to Service Bldg., and install new equipment.

KCRJ—Central Ariz. Broadcasting Co., Jerome, Ariz.—Granted C. P. to move transmitter and studio locations locally, and make changes in antenna.

KGHF—Curtis P. Ritchie, Pueblo, Colo.—Granted C. P. to move transmitter site locally and install vertical radiator.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Granted modification of C. P. to make changes in transmitting equipment.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted modification of C. P. extending completion date from August 27, 1939 to February 27, 1940.

NEW—WDZ Broadcasting Co., Portable-Mobile (Area of Tuscola, Ill).—Granted C. P. for new relay broadcast station; frequencies **1622, 2058, 2150** and **2790 kc.**, 10 watts.

NEW—Peoria Broadcasting Co., Peoria, Ill. (Portable-Mobile).—Granted C. P. for new portable-mobile relay broadcast station to operate on frequencies **1622, 2058, 2150** and **2790 kc.**, 25 watts.

WJRA—WJR, The Goodwill Station, Detroit, Mich., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station; frequencies **1646, 2090, 2190** and **2830 kc.**, 250 watts.

WFYA—Central New York Broadcasting Corp., Syracuse, N. Y., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station; frequencies **1606, 2022, 2102,** and **2758 kc.**, 100 watts.

WEDC—Emil Denemark, Inc., Chicago, Ill.—Granted modification of C. P. to make changes in equipment.

WING—WSMK, Inc., Dayton, Ohio.—Granted license to cover C. P. authorizing move of transmitter site locally, installation of new equipment and DA for night time operation, and increase in power from 250 watts night and day, to 250 watts night, 500 watts day, unlimited time instead of simultaneously day and SH-N; DA for nighttime operation.

WCHD—City of Martinsburg, W. Va.—Granted C. P. for new municipal police station, frequency **2490 kc.**, 100 watts (rated 140 watts). Also granted license to cover same.

KRRV—Red River Valley Broadcasting Corp., Sherman, Tex.—Scheduled oral argument for September 21, 1939.

NEW—Spartanburg Advertising Co., Spartanburg, S. C.—Scheduled oral argument for September 21, 1939.

NEW—Brown County Broadcasting Co., Brownwood, Tex.—Scheduled oral argument for September 21, 1939.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted special temporary authority to rebroadcast Washington National Guard planes in radio maneuvers in connection with American Legion Convention and interest of national defense; Guard planes using government equipment on **3485 kc.**, 9 to 9:30 p. m., PST, August 22.

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.—Granted special temporary authority to operate from 6:30 to 8:30 p. m., CST, August 14, in order to broadcast District Softball Tournament.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Granted extension of special temporary authority to operate evenings (LS August 7:15 p. m., September 6:30 p. m., CST) for the period August 16 to September 14, in order to broadcast civic, charitable, religious, educational, fraternal, and commercial programs of local interest from Mutual Broadcasting System.

WCBS—WCBS, Inc., Springfield, Ill.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night (Section 15.16).

FEDERAL TRADE COMMISSION ACTION

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Leon E. Van Laethem, trading as **Van Products Company**, New Milford, N. J., was ordered to discontinue misleading representations in the sale of **"No-No Germ Control"**.

The respondent's preparation was found to be a formaldehyde solution effective as an antiseptic rather than as a germicide.

Under the order, the respondent is to cease representing directly or by implication that "No-No Germ Control", or any similar preparation, is a germicide; will kill germs which cannot be reached by powder or liquid preparations; will prevent pregnancy or is a competent and effective contraceptive, or is non-irritating and odorless.

The respondent was further ordered to discontinue representing that his product will clear the nasal passages, reduce swollen membranes or clear away mucous; is an effective treatment for head colds or hay fever; will remove calluses or bunions, or relieve pains caused thereby.

It was also ordered that the respondent cease the dissemination of advertisements which fail to reveal that his preparation is not a wholly safe drug to be used by the lay public in self-medication. (3743)

Usona Shirt Company, 230 Fifth Ave., New York, was ordered to discontinue misleading representations in the sale and distribution of textile fabrics including men's shirts.

The order prohibits the respondent from using the words "Shrunk", "Pre-Shrunk", or "Full Shrunk", or similar words, to describe any fabric which is not shrink-proof or non-shrinkable, or which has not been fully shrunk or pre-shrunk to the extent that no residual shrinkage is left.

The respondent is further ordered to cease using the words "Custom Made", or similar words, to designate products which are not made especially for each individual customer, and to discontinue representing that its products possess a quality, grade, character or condition superior to, or different from, that which they actually possess. (3842)

Ostrex Company, Inc., New York, was ordered to discontinue misleading representations in the sale and distribution of a medicinal preparation designated as **"Ostrex"**, or any similar product.

Under the order, the respondent is to cease representing that the use of "Ostrex" has any beneficial effect on the blood unless such representation is limited to those cases of persons having an abnormal blood count and hemoglobin percentage and having a type of anemia which may be beneficially affected by the administration of iron; that its use is beneficial in stimulating or invigorating any glands of the human body, unless such representation is limited to the effectiveness of the iodine and calcium contained in the preparation on the thyroid or parathyroid glands, and that "Ostrex" will carry new life and power to nerve cells or will invigorate or revitalize weak organs of the human body. (3354)

Julius M. Firk, trading as **Strauss Tailoring Company, Federal Tailoring Company, Bell Tailoring Company, and Arlin Tailoring Company,** 224 South Wells St., Chicago, was ordered by the Federal Trade Commission to discontinue misleading representations in the sale and distribution of men's clothing. (3788)

T. Noonan & Sons Company, 38 Portland St., Boston, was ordered to discontinue false representations in the sale and distribution of **"Noonan's Vitamin F Scalp Cream"**, or any other similar product.

Under the order, the respondent is to cease advertising that dandruff or itching scalp, singly or in combination, are a usual cause of baldness in the male or impairment of the texture or color of the hair in the female, or that its preparation will permanently eradicate dandruff or itching scalp, invigorate the roots of the hair, prevent the natural oil of the scalp from being lost and the hair from falling out, avert baldness, promote the growth of new hair, restore unhealthy hair to health, or have more than a transitory effect upon the texture or appearance of the scalp or hair.

The order also prohibits the respondent from representing that any condition of the hair or scalp is due to a dietary deficiency, or that "Noonan's Vitamin F Scalp Cream" contains "Vitamin F." (3640)

William C. Steffy and G. V. Parkinson, trading as **Atlas Globe China Company, Advertising Department, Rogers Silverware Distributors, Bordeaux China Company and China Sales Syndicate,** 549 West Washington Boulevard, Chicago, were ordered to discontinue false representations in the sale and distribution of silverware, earthenware, chinaware, radios or sales promotional plans, and to also discontinue the use of lottery methods in the sale of merchandise.

Under the order, the respondents are to cease representing through the use of the term "Rogers Silverware", or similar terms, that they are connected with the manufacturers of Simon L. and George H. Rogers Silverware, or that premium certificates, cards, coupons or similar devices can be redeemed in Simon L. and George H. Rogers Silverware. The order further directs the respondents to discontinue claims that they are connected with any other manufacturer of silverware, chinaware, or earthenware or that their certificates, cards, or coupons are redeemable in any merchandise unless that is a fact and unless the terms of such offers are clearly stated.

The order further forbids the respondents' representing that they are conducting any special campaign on behalf of a manufacturer or that they are dealing in any locality exclusively to any purchaser, unless these are the facts. The respondents are also ordered to cease making representations as to refunds they will give purchasers of premium certificates, cards or coupons, or that they will supply to their customers without charge display sets of silverware, unless the terms of such offer are clearly stated.

The respondents are further prohibited from misrepresenting the retail price of radios; selling any merchandise by means of a lottery scheme, or supplying others with lottery devices so as to enable such persons to sell any merchandise.

It is also ordered that the proceeding in relation to Lorina Steffy, mentioned as a respondent in the Commission's complaint, be closed without prejudice. (3238)

Isadore H. Lukacher, trading as **Casa Blanca Cigar Company** and as **Belvedere Tobacco Company,** and **Bert Lukacher,** both of York, Pa., were ordered by the Federal Trade Commission to discontinue misleading representations in the sale and distribution of cigars.

The order directs the respondents to cease using the term "Havana" or "Vuelta Havana" or any other terms or picturizations indicative of Cuban origin, or descriptive of Cuba, to refer to cigars which are not made entirely from tobacco grown in Cuba; representing, through the use of the term "Made in Tampa", or any similar term, that cigars which have not been made in Tampa, Fla., are Tampa cigars or have been made in Tampa, Fla., and using the term "Cuban Workmanship", or any similar term, to refer to cigars which have not been made by Cubans or by the Cuban style of workmanship.

The respondents were also ordered to cease using the term "Havana Blend" or any similar term to designate cigars which do not contain a substantial amount of tobacco grown in Cuba. (3589)

The Commission has dismissed its complaint in which **Hitt Fireworks Company,** Seattle, Wash., had been charged with disseminating misleading representations in the sale of fireworks and firecrackers. (3382)

John Grey The Fur Designer, Inc., 350 Seventh Ave., New York, was ordered to discontinue false representations in the sale and distribution of patterns for fur coats and fur clothing.

The Commission finds that the respondent had falsely advertised that its patterns were made in Paris, France, and designed by French designers there. (3658)

James Heddon's Sons, Dowagiac, Mich., was ordered to discontinue misleading representations in the sale and distribution of its **"Improved Heddon Pal"** hollow steel fishing rod, or other fishing rods.

Under the order, the respondent is to cease representing that all hollow steel fishing rods, other than its own, have walls which are thicker at the butt than at the tip; representing in incorrect proportion the relative thickness of the walls at the tip and butt of respondent's or other hollow steel fishing rods, or making representations relative to tests of its own or other fishing rods, unless such tests were made by competent persons independent of the respondent, provided that if such tests are made by persons not independent of the respondent, the connection of such persons with the respondent must be clearly stated. (3792)

COMPLAINTS

The Commission has issued the following complaints:

Walter Kidde & Co., Inc., 140 Cedar St., New York, was charged with dissemination of misleading representations in the sale and distribution of fire-extinguishing equipment, including carbon dioxide fire-extinguishing apparatus having the trade name **"Lux".** (3866)

The Commission issued a complaint against Edward L. Jenkins and Mildred Jenkins, trading as **Antisepto Products Company, Antisepto Products, Educational Products Company, Sanitol Products Company, XL Products Company and XL Products,** 3335 Belle Plaine Ave., Chicago, charging false representations in the sale of medicinal preparations.

The complaint alleges that the respondents had falsely represented **"Guaranteed Antisepto Anti-Delay Compound Regular"** and **"Guaranteed Antisepto Anti-Delay Compound Super**

Strength" as being safe, competent and effective treatments for delayed menstruation.

It is further alleged that respondents' **"Guaranteed Prosaid Gland Medicine Double XX"** and **"Guaranteed Prosaid Gland Medicine Triple XXX"**, are not competent, safe, or effective treatments for prostate gland weakness, as advertised. (3867)

The Commission has amended its complaint issued in June, 1932 in which Joseph A. Villone, trading as **Excelsior Hat Works**, 275 Fifteenth St., Jersey City, N. J., was charged with failing to designate renovated hats as such, thus indicating to the purchasing public that they were new hats. (2046)

Movie Cosmetics Corporation and W. K. Max Hassenstein, Hollywood, Calif., were charged with dissemination of misleading representations in the sale and distribution of hair waving preparations and devices.

Representations that the respondents' hair waving preparations and devices are the first or only of their kind are false, the complaint charges. It is further alleged that the respondents have not, as advertised, conducted a constant search for ideas and methods to aid women in their quest for charm, nor have they finally solved such problems. The respondents, the complaint continues, falsely advertise their preparations and devices as representing the completed result of seven years of experimentation and tireless efforts of hair experts and scientists, when this is not the fact. (3864)

The Commission has issued a complaint against Robert C. Oberlin, trading as **Research Products Co.**, 3170 Berkshire Road, Cleveland Heights, Ohio, alleging false and misleading representations in the sale of medicinal preparations.

The complaint alleges that **"Dupree Pills"**, **"Dupree Double Strength Pills"** and **"Dr. Gordon's Special Formula Double Strength Pills"**, which the respondent represents as treatments for delayed menstruation, do not, as advertised, constitute competent, safe and harmless treatments therefor. It is also charged that the respondent's advertisements are false in that they fail to reveal that use of the preparations under the conditions prescribed in the advertisements or under customary or usual conditions may result in serious and irreparable injury to the health of users.

The complaint further alleges that the respondent's preparation known as **"Van Dyke Dutch Brand Haarlem Oil Capsules"** is not, as claimed, a remedy for ailments of the prostate gland or the kidneys or bladder, nor is it a cure for rheumatism, sleeplessness, nervousness or pains in the back, nor will its use serve to flush poisons out of the kidney or bladder.

The respondent falsely advertises another preparation designated as **"Dr. Gordon's Vitam-Perles"** or **"Vitamin E Perles"**, the complaint continues, since it has no potency as a tonic or nerve stimulant for either male or female, nor is it a cure or remedy for lack of ambition, loss of strength, loss of blood or anemia, or run-down condition. (3863)

Philip Morris & Co., Ltd., Inc., a Virginia corporation, 119 Fifth Ave., New York, was charged, in a complaint issued by the Federal Trade Commission, with the dissemination of misleading representations in the sale and distribution of cigarettes designated as **"Philip Morris"**, **"English Oval"**, **"Player's Navy Cut"** and **"Marlboro"**.

The respondent's cigarette containers are alleged to contain printed matter bearing the following depictions:

"Established over 80 years"
"FACTORIES
London, Cairo, Hamilton, Canada, Richmond, Va."
"Agents and Depots all over the world"
"Established by
John Player & Sons,
England."

According to the complaint, these and other advertisements had falsely represented the respondent as being established for over eighty years and as having factories in Cairo, Egypt, and in Hamilton, Canada, when such were not the facts. It is further alleged that the respondent does not maintain warehouses all over the world, as advertised.

The complaint further charges the respondent with having falsely represented that it was an English corporation and that it held a warrant entitling it to display the British Royal Arms, when such was not the truth. The respondent's representations are also allegedly false in that they represent "Philip Morris", "English Ovals" and "Player's Navy Cut" cigarettes as being manufactured in England, when this is not a fact.

"Players Navy Cut" cigarettes, the complaint continues, are not manufactured by John Player & Sons, as indicated on the containers, nor are they the same cigarettes as those generally and widely sold in England under that name. (3865)

Oppenheim, Collins & Company, Inc., 33 West 34th St., New York, is charged with misleadingly representing its furs and fur garments.

It is alleged in the complaint that the respondent designated certain of its furs and fur garments in conspicuous type, as "HUDSON SEAL", "MENDOZA BEAVER", "FRENCH SEAL", "CARACUL", "BLACK CARACUL" and "BROWN CARACUL". In connection with such designations, the complaint continues, certain of the advertisements contained in a less conspicuous form, either as an asterisked footnote or as a parenthesized phrase, the words "dyed muskrat" or "dyed rabbit" or "dyed kidskin". (3869)

STIPULATIONS

The Commission has entered into the following stipulations:

C. Howard Hunt Pen Company, Camden, N. J., entered into a stipulation to discontinue misleading representations in the sale and distribution of fountain pen points.

The stipulation states that the respondent designated certain of its pen points with the words "Durium," "Durium Tipped", "Durium Pointed", "Duridium", "Warranted Durium", "Warranted Durium Tipped", "Guaranteed Durium Tipped" and "Warranted Duridium", when in fact such pen points were made of chromium steel or stainless steel alloy, there being no substances known to science or industry at "Durium" or "Duridium". (2506)

Gore Products, Inc., New Orleans, La., agreed to discontinue the dissemination of misleading representations in the sale and distribution of a medicinal preparation designated **HF**, for the treatment of Athlete's Foot.

According to the stipulation, the respondent is to cease representing directly or by implication that HF is a remedy, a complete treatment or cure for Athlete's Foot; that other preparations or treatments are not beneficial in the treatment of Athlete's Foot, or will not contact or reach the parasites causing this disease; that HF will "rid" a person of this disease; that HF will cause any part of the body to become well or healed, or that it will eradicate the germs or parasites causing Athlete's Foot. (02417)

Joseph H. Goldstein and Moe Siegle, trading as **Goldstein & Levin**, New York, entered into a stipulation in which they agreed to cease representing directly or by implication that dresses or other articles of merchandise sold by them are made in, or imported from, London, England, or any other foreign country, when such is not the fact. (2505)

Louis Shapiro and Wm. J. Mishel, trading as **Tanners Shoe Company**, 493 C St., Boston, agreed to discontinue misleading representations in the sale and distribution of shoes and clothing.

Under the stipulation, the respondents are to cease representing that their firm is the oldest of its kind in the United States, or the largest of its kind in the world; that no shoe store in the world can place before a customer the range of styles, sizes and widths that the advertisers or any of their agents can offer; that the wearing of their shoes will keep normal feet healthy; that the shoes afford greater comfort than anyone has ever known, or that a person will make any definite number of sales within a definite period of time. (02416)

Vadsco Sales Corporation and its subsidiary, **Delettrez, Inc.**, 2109 Borden Ave., Long Island City, N. Y., agreed to discontinue misleading representations in the sale and distribution of a cosmetic preparation designated **"Delettrez Cleansing Cream."**

According to the stipulation, the respondents will cease representing that "Delettrez Cleansing Cream" penetrates to, or has a cleansing effect upon, skin below the surface layer, or that it penetrates to the depths of the pores; that it vitalizes the skin or brings new life or a younger complexion to the skin; that it differs materially from other creams used for the same and similar purposes or that it has any influence upon the action or condition of glands in the skin or upon the size of the pores. It was further agreed by the respondents that they will cease representing that pores in the skin have any appreciable depth or are capable of holding any material amount of foreign substance, or that pores breathe.

It was also stipulated that the respondents will cease using the word "Paris" in connection with their products, or in any other way representing such preparations as being of French origin when they are manufactured, compounded, or packaged in the United States. (02415)

Rhea's, Inc., 441 Market St., Pittsburgh, entered into a stipulation to discontinue misleading representations in the sale and distribution of **"Manna Miracle Health Bread".**

By the stipulation, the respondent agreed to cease advertising that "Manna Miracle Health Bread" contains all the necessary minerals required in the dietary; is non-fattening, without qualification and irrespective of whether or not it is taken in excess of caloric requirements or used in connection with a diet exceeding caloric requirements; will correct any faulty diet; will be of value in cases of high blood pressure; will be of value in gall bladder "conditions"; will obviate the necessity for laxatives, or is a "magic" aid in promoting good health.

The respondent further agreed to cease representing that Vitamin G, or that "Manna Miracle Health Bread" by reason of its Vitamin G content, or otherwise, will prolong life or prevent skin diseases; that Vitamin B, or that "Manna Miracle Health Bread" by reason of its Vitamin B content, aids in building nerve tissue or in promoting digestion; that "Manna Miracle Health Bread" contains the most costly ingredients ever used in bread baking, or that it is the original and only bread containing all essential vitamins. (02414)

Vanetta Velvet Corporation, 1441 Broadway, New York, engaged as licensee under patents owned by **Fur Resembling Fabrics Co., Inc.,** New York, entered into a stipulation with the Federal Trade Commission in which it agreed to discontinue the use of the word "Fur" either alone or in connection with the word "Tone" or with the picturization of a leopard or other fur-bearing animal, or in any other way, so as to convey the belief to purchasers that their fabric products so designated are made from the skin or pelt of a leopard or fur-bearing animal or from a fabric of fur, when such is not the fact. (2504)

COURT ORDER

Under the Wheeler-Lea amendment to the Federal Trade Commission Act, which provides injunctive relief in cases involving an advertised commodity the use of which may be injurious to health, the United States District Court for the Eastern District of Missouri, on August 14, enjoined Charles L. Klapp, trading as **The Cardinal Co.** and as **The Cardinal Company of St. Louis,** 406 Market St., St. Louis, from the false advertisement of a medicinal preparation described as a treatment for delayed menstruation, pending issuance, trial and disposition of a complaint under the Federal Trade Commission Act.

The decree granting the injunction was a consent decree. It prohibited dissemination of advertisements which represent the respondent's preparation, **Fema-Lade,** as being a safe, competent and scientific treatment for delayed menstruation and as having no ill effects, and which fail to reveal that use of the preparation, under the conditions prescribed in the advertisements or under customary and usual conditions, may have serious consequences.

Committee Reports on Record Licenses

After an all-day conference about licenses Thursday with representatives of three leading phonograph record companies, a special NAB committee issued the following statement:

> "A committee of the industry met with representatives of the Columbia Recording Corporation, Decca Records and the RCA Manufacturing Company, and discussed at length all phases of the question. The RCA Manufacturing Company is the only company which as yet has formulated its policy and has sent out a proposed agreement. The committee requested that the arguments advanced by the committee be given thoughtful consideration and that the effective date for the contract be postponed. The RCA Manufacturing Company agreed to give consideration to this request and to advise NAB Headquarters of its decision at an early date. The Columbia Recording Corporation and Decca Records have not as yet formulated any policy and agreed to notify the NAB as soon as any policy is formulated. A full report will be made to the Directors and members at the convention in Chicago."

Broadcasters present were John Elmer, WCBM, Baltimore; John Shepard, 3rd, The Yankee Network; Alexander Dannenbaum, Jr., WDAS, Philadelphia; Walter Damm, WTMJ, Milwaukee; Clair McCollough, WGAL, Lancaster; William S. Pote, WMEX, Boston; Roger W. Clipp, WFIL, Philadelphia. The NAB was represented by Neville Miller and Edwin M. Spence.

The Executive Committee met all day Tuesday in New York, discussing code, copyright and other problems, in preparing a report for the Board of Directors which is to meet September 13 at 10 A. M., in the Palmer House, Chicago. The special copyright convention will be held in the same hotel at 10 A. M., Friday, September 15. IRNA is to meet at the Palmer House all day Thursday, September 14.

The Executive Committee met with the Copyright Negotiating Committee Wednesday, and after going over all phases of the problem as it now stands, directed Sydney Kaye, special counsel, to present to the Board on September 13 a plan for creation of a supply of music other than ASCAP numbers.

Executive Committee members at the meeting were: John Elmer, WCBM, Baltimore; Herbert Hollister, KANS, Wichita; John A. Kennedy, WCHS, Charleston, West Virginia;

COMMITTEE REPORTS ON RECORD LICENSES

(Continued from page 3675)

Paul W. Morency, WTIC, Hartford, Connecticut; Harry C. Wilder, WSYR, Syracuse, New York.

The Copyright Negotiating Committee consists of Major Lenox R. Lohr, NBC; Edward Klauber, CBS; Sam Rosenbaum, WFIL; John Elmer, WCBM, Baltimore, and Mr. Miller. Walter Damm and John Shepard, 3rd, took part in the negotiating committee discussion with the Executive Committee.

Court Gives FCC Sweeping Regulatory Powers

A decision of momentous importance to the broadcasting industry, giving the FCC sweeping powers over the broadcasting business, has been handed down by the Circuit Court of Appeals here in the WMEX case.

Throughout the decision, the court compared the broadcasting industry to the railroads, and said, at one point, that the Communications Act was intended "to anticipate and prevent desperate and chaotic (economic) conditions" such as the railroads now face.

"In both instances the privilege of free enterprise was curtailed," the court added.

At another point, the court said:

"The Commission is authorized to regulate and to discipline existing licensees and to determine, upon the basis of their performances, whether their licenses shall be renewed."

Because of the importance of the decision, it is printed in full:

UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA
No. 7250
THE YANKEE NETWORK, INC., APPELLANT
v.
FEDERAL COMMUNICATIONS COMMISSION; THE NORTHERN CORPORATION, licensee of Station WMEX, Boston, Massachusetts, INTERVENER
Appeal from the Federal Communications Commission
Decided August 14, 1939.

Paul D. P. Spearman, Alan B. David, and *Frank Roberson,* all of Washington, D. C., for appellant.

Hampson Gary, William H. Bauer, Fanney Neyman, William J. Dempsey, and *Andrew G. Haley,* all of the Federal Communications Commission, for appellee.

Arthur W. Scharfeld, Philip G. Loucks, Joseph F. Zias, and *J. P. Tumulty,* all of Washington, D. C., for intervener.

Before GRONER, Chief Justice, and STEPHENS and MILLER, Associate Justices.

MILLER, *Associate Justice:* Prior to May 29, 1936, eight radio broadcasting stations—including the stations now owned by appellant and intervener herein—were operating in and near Boston, Massachusetts. On that date Intervener, The Northern Corporation (WMEX) was operating on the frequency of 1500 kilocycles, with power of 100 watts night, 250 watts day, local sunset, unlimited time. It applied for a construction permit to operate on the 1470 kilocycle frequency, with 5 kilowatts power, unlimited time, using directional antenna both day and night. The Communications Commission granted the application, without a hearing subject to protest. Thereafter protests were filed by Bay State Broadcasting Corporation (WAAB), appellant's predecessor in interest, and by three other radio broadcasting station licensees. After appearances and hearing the Examiner recommended that all protests be dismissed and the application granted. The Commission acted accordingly, following oral arguments, and issued an order dated May 25, 1938, granting the application of WMEX, effective June 4, 1938. The Yankee Network, Inc., successor in interest of Bay State Broadcasting Corporation, and other licensees, filed petitions for rehearing, which were denied on September 6, 1938, and on September 24, 1938, The Yankee Network, Inc., appealed from the Commission's decision granting the application.

The Commission challenges the power of this court to hear the appeal. It contends in its brief that no appeal is contemplated by the Communications Act[1] from a decision of the Commission granting an application—on behalf of an existing licensee claiming to be economically affected. On oral argument it expanded its contention to include any possible grievance or affectation of interest, electrical, economic or otherwise, although in the present case, aggrievance resulting from affectation of economic interest is alone involved. In *Journal Co.* v. *Federal Radio Comm.,* 48 F. (2d) 461, 463, 60 App. D. C. 92, 94,[2] we recognized the right of an aggrieved person to appeal from a decision of the Commission *granting* an application. Moreover, we have recently decided the issue, adversely to the Commission's contention in *Sanders Bros. Radio Sta.* v. *Federal Communications Comm.,* (No. 7087, decided January 23, 1939) —— F. (2d), ——, —— App. D. C. ——. However, since the Commission has strenuously urged that we reconsider the problem, a thorough analysis of its arguments in the present case will conduce to a final determination of this important question.

The court's jurisdiction depends, in this case, upon the meaning of Section 402(b)(2): "An appeal may be taken . . . By any other person aggrieved or whose interests are adversely affected by any decision of the Commission *granting* or *refusing* any such application."[3] [Italics supplied] It will not be seriously contended that this language should be given its broadest literal meaning. Congress could not have intended to permit an appeal by any person who might suffer pain or sorrow as a result of the Commission's action, because, for instance, he might dislike, generally, all radio broadcasting, or certain phases thereof in particular. The Commission suggests that the necessary implications of the interpretation given to the appeal section in the *Sanders* case—permitting appeal by one adversely economically affected—would produce a result almost as extreme and would extend its operation to include newspapers, magazines and other advertising media of all kinds. But there is nothing in the Act to suggest that the section should be extended so far. The Act pertains to radio broadcasting. The Commission's power in this respect is confined to the regulation of those whom it licenses or declines to license to broadcast and to those who provide facilities for broadcasting.[4] Without deciding whether there may be others who come within the privilege of appeal granted by Section 402(b)(2), it seems obvious that the clause was intended to include existing licensees—assuming they are able to show, in the particular case, actual aggrievance or affectation of interest. Who could have been more in the con-

---

[1] Act of June 19, 1934, c. 652, 48 Stat. 1064, 47 U. S. C. A. § 151 *et seq.*

[2] In that case it was held that before the Radio Act of 1927 was amended in 1930, a person prejudiced by the Commission's action in granting an application of another person for increased power had no right to appeal; that the Act was amended to give existing licensees just that right. This portion of the Radio Act was reenacted in the form of Section 402(b) of the 1934 Act and we can presume that the language was used in the latter Act in the same sense as in the former. Pott v. Arthur, 104 U. S. 735, 736.

templation of Congress as aggrieved persons than existing licensees, whose very existence and possibility of success, depend upon the wise exercise by the Commission of its discretionary powers.[5]

The Commission concedes in its brief that existing licensees may actually be aggrieved by its action in granting new applications.[6] Moreover, the Commission concedes the possibility of arbitrary action upon its part, which should be subjected to judicial review.[7] But it contends that however improperly it may have acted in a given case, this court has no jurisdiction to entertain an appeal brought by an existing licensee, under Section 402(b)(2) because, it says, an erroneous decision of the Commission invades no *legal rights* or *legal interests* of such a licensee, and under such circumstances, "this court may not, regardless of the merits of the case, assume jurisdiction." It urges that the test by which a person's appealable interest under Section 402(b)(2) may properly be determined is to inquire whether—if that section were not in effect—he would have a right to resort to the District Court for the protection of the legal right or interest which he claims to be aggrieved or adversely affected. Measured by this test, it is contended that appellant in the present case has no appealable interest, for, the Commission says, it has been held many times that, in the absence of statute, a person has no legal right to be free of competition and that injury suffered or threatened by competition is *damnum absque injuria*.[8]

However, the criterion proposed is not a proper one, for here we are dealing with rights not as they existed at common law but as they exist and are administered under an act of Congress. *Cf. Alabama Power Co.* v. *Ickes*, 302 U. S. 464, 484-485. Many of the acts which have established administrative agencies such as the Federal Communications Commission, have created rights and interests[9] as to which administrative remedies must first be exhausted before judicial review may be sought of administrative action concerning them.[10] Such rights are none the less valuable from a practical point of view.[11] The Commission concedes that if a statute confers a right upon a licensee to be protected against competition then he has a right to complain, under the authority of *Clarksburg-Columbus Short Route Bridge Co.* v. *Woodring*, 89 F. (2d) 788, 796, 67 App. D. C. 44, 52, *r'vd. on other grounds,* 302 U. S. 658. The dissent in that case, upon which the Commission relies, maintained that the statute conferred no substantive "and therefore no adjective rights" upon the party affected because the statute imposed no duty upon the Secretary of War to consider competitive effects upon that party. It is difficult to reconcile the Commission's position respecting that case with its admission that the Commission—in determining whether public interest, convenience and necessity will be served by the granting of a new license—must consider the effect thereof upon existing licensees.

No language of the present Act, relating to grants of rights to licensees, suggests an intent to recognize or to vitalize any common law rights in radio broadcasting or in the use of frequencies therefor. Some of its language definitely repudiates the idea.[12] The purpose expressly declared in Section 301, and revealed in subsequent sections, is inconsistent with recognition of common law rights. But the Act does definitely recognize the *rights* of license holders in express terms no less than seven times.[13] Moreover, in Section 606 of the Act licensees are referred to as *owners* of stations. And their ownership is recognized by the Commission in its brief where it says: "It should be noted that as of the date this appeal was taken, Stations WNAC and WAAB were owned and operated by the same licensee, namely, The Yankee Network, Inc." This admission must be read in the light of the fact that no person is permitted to use or operate a radio broadcasting station in the United States except pursuant to a license granted under the provisions of the Communications Act (§ 301). The Act provides that one shall be guilty of a crime if he does wilfully and knowingly operate such a station without a license (§ 501), or even if he shall wilfully and knowingly violate any rule, regulation, restriction or condition made or imposed by the Commission under authority of the Act (§ 502). It is apparent, therefore, that a radio broadcasting station is valueless without a license to operate it. It is equally apparent that the granting of a license by the Commission creates a highly valuable property right, which, while limited in character, nevertheless provides the basis upon which large investments of capital are made and large commercial enterprises are conducted.[14] As it is the purpose of the Act to secure the use of the channels of radio communication by private licensees under a competitive system, those licensees must be protected in that use, not merely from unlicensed stations[15] and unlicensed operators,[16] but from improper activities of licensed stations[17] and operators[18] and from arbitrary action by the Commission, itself, in the exercise of its regulatory power.

In asserting its rights as a licensee, appellant is not limited, therefore—as the Commission's argument seems to imply—either to the appeal section, or to the Commission's procedural rules governing intervention.[19] The legal rights or interests which are asserted in a petition for intervention are created under the Act by the grant of a license, and the same rights are asserted on appeal under either subdivision (1) or (2) of Section 402(b). The importance of intervention is that it advises the Commission of the rights or interests which are asserted, and provides opportunity for it to make a determination consistent with those rights and interests, and consistent with the public interest, convenience and necessity as well. We have held[20] that one who claims to be an interested party—if he has notice of the proposed action of the Commission—should intervene. We have held, also, that under some circumstances it may be proper and perhaps even essential for an interested person to petition for a rehearing.[21] The use of these procedural devices is not for the purpose of creating rights or interests, however, but for protecting existing rights and interests. See *Red River Broadcasting Co., Inc.* v. *Federal Communications Comm.*, 98 F. (2d) 282, 286, 69 App. D. C. 1, 5, *cert. denied,* 305 U. S. 625.

---

[5] *Cf.* Telegraph Herald Co. v. Federal Radio Comm., 66 F. (2d) 220, 62 App. D. C. 240.

[6] It says: "Unquestionably, the Commission should, in determining whether the 'public interest, convenience, and necessity' will be served by the licensing of a new station in a community, give careful and painstaking consideration to the question of whether the effect of granting the new license will be to defeat the ability of the holder of any one or more outstanding licenses to carry on in the public interest. The Commission is entirely in accord with the view that, if the effect of granting a new license would be to defeat the ability of the holder of an outstanding license to carry on in the public interest, the application for the new station should be denied unless there are 'overweening' reasons of a public nature for granting it. And the Commission also believes that it is obviously a stronger case where neither licensee will be financially able to render adequate service."

[7] Upon this point it says: "It is also the Commission's position that whenever the Commission, in considering an application for a new station does not so apply the standard of public interest, convenience and necessity as required by the statute, this court, *upon an appeal properly taken*, may and should set aside the decision of the Commission."

[20] Red River Broadcasting Co., Inc. v. Federal Communications Comm., 98 F. (2d) 282, 69 App. D. C. 1, *cert. denied,* 305 U. S. 625.

In the same manner as the rights and equities of licensees are statutory in character so are their remedies.[22] The Commission is empowered by the Act to grant or deny an application for a station license.[23] But the applicant is privileged to appeal from an adverse decision.[24] The Commission is authorized to regulate and to discipline existing licensees, to modify their licenses and to determine, upon the basis of their respective performances, whether their licenses shall be renewed. But if the Commission decides their applications for modification or renewal adversely, such licensees are entitled to appeal.[25] A radio operator whose license has been suspended is entitled to appeal from the Commission's decision.[26] Provision is made by Section 606 of the Act that an existing licensee whose radio station is closed or whose station and equipment are used or controlled by the Government during war, threat of war, public peril, disaster or emergency or to preserve the neutrality of the United States, shall be given compensation therefor. In fact express provision is made for suit by such licensee against the United States to recover compensation.[27] In none of these situations can it be contended that a legal right or legal interest known to the common law, must be violated before the privilege of appeal may be enjoyed. And in none of them would a licensee be privileged to assert its rights and equities except in the manner prescribed by the statute.[28] To contend that an administrative remedy provided under such circumstances must be interpreted in terms of rights which might have been protected in a court of law, would beg the question.

By the same token the Commission's contention fails when applied to the appellant in the present case. There is no difference between its rights and equities and those of the licensees mentioned in the preceding paragraph. In each case they are the statutory rights referred to throughout the Act, and which arise from the granting of the license. In each case they are the equities to which the Supreme Court referred in the *Nelson Brothers* case.[29] It was equally the intention of Congress to protect the rights and equities of licensees against arbitrary action of the Commission in one case as in the other.

In an effort to distinguish the *Nelson Brothers* case[30] and to show that our reference to it was unjustified in our recent decision in the *Sanders Brothers* case,[31] the Commission urges that Nelson Brothers had a *statutory right* to appeal. It is for exactly that reason that all three cases are analogous. In the *Nelson Brothers* case, as in the present case, the owner of an existing station applied for the allocation of another frequency. The frequency applied for happened to be the one theretofore assigned to Nelson Brothers. The latter protested, but the Commission nevertheless granted the application and Nelson Brothers appealed from its decision. In that case—upon the applicant's suggestion[32]—the Commission included in its order the deletion of the Nelson Brothers station. It should be noted, therefore, that in that case, as in the present case, the appeal was from a decision granting—not denying—an application. It is true, as the Commission contends, that the injury suffered or to be suffered in the *Nelson Brothers* case resulted from a reallocation of frequencies and a deletion of an existing station. But it may be equally disastrous to the first licensee, for the Commission to license so many new competing stations as to destroy it. There would be no value in a *right* to use a designated frequency or in *equities* relating thereto—which would justify the great financial outlays involved in station construction and operation—if the licensee were not protected from destructive competition. Equities and rights do not exist in a vacuum but in relation to the total situation of which they are a part. The Commission has control of that situation, by virtue of its power to grant or deny licenses. But the power is not absolute. "In granting licenses the Commission is required to act 'as public convenience, interest or necessity requires.' This criterion is not to be interpreted as setting up a standard so indefinite as to confer an unlimited power. Compare *N. Y. Central Securities Co.* v. *United States,* 287 U. S. 12, 24. The requirement is to be interpreted by its context, by the nature of radio transmission and reception, by the scope, character and quality of services, and, where an equitable adjustment between States is in view, by the relative advantages in service which will be enjoyed by the public through the distribution of facilities. In making such an adjustment the equities of existing stations undoubtedly demand consideration. They are not to be the victims of official favoritism."[33]

The only difference, therefore, between the situation of the present case and those contemplated in Section 402(b) (1) is the way in which the threatened destruction of appellant's rights and equities is alleged to have occurred. This is no sufficient difference to require us to hold that Congress intended to limit aggrieved persons or interested persons to those whose applications had been denied or to those possessed of legal rights known to the common law. If it had so intended it could easily have said so. As it did not, and as reason and justice require the opposite result, the conclusion follows logically that the appellant is definitely the person whom Congress had in mind in Section 402(b) (2). This becomes particularly obvious when we consider that to accept the argument of the Commission on this point would not only leave the licensee without opportunity for any relief whatever, even from action so arbitrary as to destroy it, but would deprive Section 402(b) (2) of meaning and eliminate it from the Act as effectively as if it were repealed. We cannot impute to Congress an intent to produce an absurd result.[34] "There is a presumption against a construction which would render a statute ineffective or inefficient or which would cause grave public injury or even inconvenience."[35] It would require a statute susceptible of no other possible interpretation to persuade us to adopt such a construction in the present case. In order to safeguard the great values of administrative procedure it is necessary to avoid extremes of administrative absolutism.

In our decision in the *Sanders Brothers* case,[36] we referred to dicta which appears in previous decisions of this court;[37] and to the opinion of Justice Groner in the *Jenny Wren* case.[38] The latter paraphrases language—originally used in the *Texas and Pacific* case[39]—to describe the underlying purpose of the Communications Act as follows: " . . . the act recognizes the preservation of the earning capacity, and conservation of the financial resources, of the individual broadcasting station as a matter of national concern, for the reason that the property employed must be permitted to earn a reasonable return or the system will break down; thus indicating, as it sems to me, an identical or reciprocal interest between the owner and the public, in which it is the right of either to see that competition between stations is not carried to the point of destruction."

C. 379, 384: "Granting that those who operate broadcasting stations do so subject to the Commission's power of regulation, this power is not an unlimited power; and the Commission's licensees, who on the faith of the license have invested money and established a goodwill, thereafter undoubtedly have rights which, though they may be revoked in the public interest, nevertheless may not be arbitrarily or capriciously destroyed. . . . If it were otherwise, the millions of dollars invested in radio broadcasting stations would be wholly subject to the caprice or favor of the regulatory body. Such a grant of power would be so clearly unreasonable, so oppressive, and so partial as to make it unthinkable, without more, that the Congress ever intended to grant it. Yick Wo v. Hopkins, 118 U. S. 356 . . . ."

[39] Texas & Pacific Ry. v. Gulf, Colorado & Santa Fe Ry., 270 U. S. 266.

The Commission denies the applicability of the paraphrased language to radio broadcasting. It calls attention to the fact that in the Communications Act Congress specified a different method of regulation for common carriers engaged in interstate communication by radio than for radio broadcasters;[40] that broadcast licensees are expressly exempted, in the definition section of the Act, from the classification of common carriers;[41] and that such a licensee "has unregulated discretion to determine the rates necessary to insure the profitable operation of his station in the area served." It refers to the decision of this court in *Pulitzer Pub. Co.* v. *Federal Communications Comm.*, 94 F. (2d) 249, 251, 68 App. D. C. 124, 126, in which we said that a radio broadcasting station is a public utility in a more restricted sense than a railroad or other common carrier and that the term, "public convenience, interest, or necessity," should be given a less broad meaning than is applied to it elsewhere in public utility legislation. It contends that in the regulation of radio broadcasting Congress intended that monopolies should be prevented rather than protected; that while under the Transportation Act, the power to regulate rates and the necessity of maintaining fair competition, resulted logically in requiring that a carrier should have a right to protest against regulatory action which produced economic injury, under the Communications Act "A station owner's rights are subject to the paramount authority of Congress to exercise reasonable regulation of broadcasting." And, the Commission concludes, the interpretation placed by the Supreme Court upon the Transportation Act cannot properly be applied by analogy to that portion of the Communications Act which deals with radio broadcasting as distinguished from radio communication for hire by a common carrier.

But in spite of these differences the two Acts contain vital similarities which make analogy proper, and the conclusion of the Commission is a *non sequitur*. Radio broadcasting, the subject of one, is affected with a public interest in fully equal measure as is railway transportation, the subject of the other. Congress recognized this fact by making the Communications Act speak in terms of the public interest from beginning to end. "There is no closed class or category of businesses affected with a public interest . . . the phrase . . . can, in the nature of things, mean no more than that an industry, for adequate reason, is subject to control for the public good."[42] This court has said that the radio business is impressed with a public interest,[43] and, further, that Congress, in establishing the standard of public interest, convenience, and necessity, evidently had in mind that broadcasting should be of a public character rather than a mere adjunct of a particular business.[44] Rate fixing is only one of many regulatory procedures.[45] The fact that it is specified for carriers and not for broadcasters is by no means conclusive. In both Acts other forms of regulation are specified, which are closely similar; as for example, the power of the appropriate commission in each case to require adequate facilities.[46] The powers of regulation possessed by the Federal Communications Commission over broadcasters are comprehensive and inclusive;[47] and judicial review of its actions is highly important just as it is in the case of the Interstate Commerce Commission.

In the regulation of radio broadcasting as distinguished from transportation or radio communication, Congress was dealing with a newer and less well established form of public service. As the Supreme Court said in the *Panama Refining* case:[48] "Undoubtedly legislation must often be adapted to complex conditions involving a host of details with which the national legislature cannot deal directly. The Constitution has never been regarded as denying to the Congress the necessary resources of flexibility and practicality, which will enable it to perform its function in laying down policies and establishing standards, while leaving to selected instrumentalities the making of subordinate rules within prescribed limits and the determination of facts to which the policy as declared by the legislature is to apply." In some respects the powers delegated by Congress for the regulation of broadcasters are even more drastic than those possessed by the Interstate Commerce Commission over railroad carriers; notably the power of the Federal Communications Commission to issue licenses for short periods, and to require, each time, a full showing of financial and other qualifications, as a condition of renewal. Such a regulation applied to the railroads of the United States would probably soon disrupt them.

Congress had power to provide safeguards against destructive economic injury to existing licensees, and did so in both Acts, in order to secure a similar legislative purpose in each. In the case of the railroads Congress waited until the condition of many of them was desperate. The Commission argues that the Transportation Act and the recent Emergency Railroad Transportation Act[49] were intended "to administer oxygen to critical patients."[50] But in the case of radio broadcasters the intent of Congress was to anticipate and prevent desperate, chaotic conditions.[51] The latter form of statesmanship is equally as commendable as the former, and may serve better the interests of the people. In both instances the privilege of free enterprise was curtailed.

In each case Congress has delegated the power to regulate public utilities in interstate commerce for the purpose of safeguarding a dual interest, involving a reciprocal and correlative relationship between the public and the owner of the utility. As between the two, the public interest is of greater importance. Therein lies the justification for governmental regulation, and for placing in the hands of such administrative agencies as the Federal Communications Commission powers, which if arbitrarily exercised, may destroy the very subject of regulation. It is entirely true, as the Commission in this case argues, that "A station owner's rights are subject to the paramount authority of Congress to exercise *reasonable regulation* of broadcasting." [Italics supplied] It is equally true that carriers are subject to *similar reasonable* regulation of transportation. But it would be absurd, in one case as well as in the other, to contend that Congress intended to permit such arbitrary and uncontrolled exercise of power as would destroy meritorious and respectable licensees which had been thus selected to serve the public interest and to achieve the major purpose of each Act. We said in *Journal Co.* v. *Federal Radio Comm.*, that "The installation and maintenance of broadcasting stations involve a very considerable expense. Where a broadcasting station has been constructed and maintained in good faith, it is in the interests of the public and common justice to the owner of the station that its status should not be injuriously affected, except for compelling reasons."[52]

[45] Regulation has taken many forms: Federal regulation of labor conditions (National Labor Relations Board v. Jones & Laughlin Steel Corp., 301 U. S. 1); limiting hours of labor in particular occupations (Holden v. Hardy, 169 U. S. 366); prohibiting child labor (Sturges & Burn Mfg. Co. v. Beauchamp, 231 U. S. 320); insuring compensation for industrial accidents (New York Central R. R. v. White, 243 U. S. 188); prohibiting night work for women (Radice v. New York, 264 U. S. 292), forbidding or regulating particular business (Great Atlantic & Pacific Tea Co. v. Grosjean, 301 U. S. 412, 426-427); establishing minimum wages for women (West Coast Hotel Co. v. Parrish, 300 U. S. 379); reducing hours of labor for women (Muller v. Oregon, 208 U. S. 412; Miller v. Wilson, 236 U. S. 373), requiring public weighing of grain (Merchants Exchange v. Missouri *ex rel.* Barker, 248 U. S. 365); regulating sales in bulk of stock in trade (Lemieux v. Young, 211 U. S. 489); providing for guarantee of bank deposits (Noble State Bank v. Haskell, 219 U. S. 104); prohibiting monopolies (United Shoe Machinery Corp. v. United States, 258 U. S. 451, 462-464; United States v. Joint Traffic Assn., 171 U. S. 505, 559, 571-573); preventing unfair trade practices (Federal Trade Comm. v. Klesner, 274 U. S. 145, 151; Federal Trade Comm. v. Raladam Co., 283 U. S. 643, 647); prescribing terms upon which business may contract (Hardware Dealers Mut. Fire Ins. Co. v. Glidden Co., 284 U. S. 151).

[46] Transportation Act. 49 U. S. C. A. § 1 (21), 41 Stat. 474-478.

[47] The large scope of the Commission's regulatory powers includes the following: Power (§ 303) to classify stations; prescribe the nature of the service to be rendered by each class of stations and by each station within a class; assign frequencies to classes and to stations; determine the location of stations; regulate the apparatus to be used by each station; make regulations to prevent interference between stations; establish areas or zones to be served by stations; make special regulations applicable to chain broadcasting; require stations to keep records of programs and transmissions of energy; prescribe qualifications of station operators; classify, license, and suspend licenses of such operators; inspect radio installations; designate call letters; require painting and/or illumination of radio towers; make such rules and regulations and prescribe such restrictions and conditions not inconsistent with law, as may be necessary to carry out the provisions of the Act; (§ 308) grant station licenses; modify and review licenses; specify the form of applications and require that they set forth information concerning citizenship, character, financial, technical and other qualifications of applicants, the ownership and location of proposed stations and other information; (§ 309) determine whether station licenses, the rights therein granted, and the authorized frequencies may be transferred, assigned, or otherwise disposed of; (§ 312) revoke licenses for failure to operate as set forth therein, or for violation of or failure to observe "any of the restrictions and conditions of this Act or of any regulation of the Commission authorized by this Act"; (§ 315) make rules and regulations to carry into effect the requirement of the Act that equal opportunities must be provided for use of candidates for public office; (§ 317) announcement of sponsorship of broadcast advertising; (§ 318) make special regulations governing the use and operation of automatic radio devices; (§ 319) grant construction permits; (§ 320) designate stations liable to interfere with distress signals and to require that a licensed radio operator be kept listening in for such signals "during the entire period the transmitter of such station is in operation." Prohibitions contained in the Act, with respect to which the Commission is empowered to adopt implementing rules and regulations, include (§ 316) prohibition against broadcasting any advertisement of or information concerning any lottery, gift enterprise, or similar scheme: (§ 317) against broadcasting any matter for which service, money, or any other valuable consideration is paid without announcing that it is so paid for or furnished and by whom; (§ 326) against the uttering of obscene, indecent, or profane language by means of radio communication.

[48] Panama Refining Co. v. Ryan, 293 U. S. 388, 421.

[49] Act of June 16, 1933, 48 Stat. 211, 49 U. S. C. A. § 250 *et seq.* (Supp. 1938).

[50] Louisville & N. R. Co. v. United States, N. D. Ill. E. D., 10 F. Supp. 185, 192.

[51] General Electric Co. v. Federal Radio Comm., 31 F. (2d) 630, 633, 58 App. D. C. 386, 389: "Without such national regulation of radio, a condition of chaos in the air would follow, and this peculiar public utility, which possesses such incalculable value for the social, economical, and political welfare of the people, and for the service of the government, would become practically useless."

The Commission attempts to support its position by arguing that "one of the chief concerns of Congress, as evidenced by the reports and debates, was to guard against monopolies and to preserve competition." It is difficult to understand how this result could be achieved by deliberately or carelessly licensing so many new competing stations as to destroy already existing ones, and possibly the newly created ones as well. While it is true that it was the intention of Congress to preserve competition in broadcasting, and while it is true that such intention was written into Section 314 of the Communications Act, it certainly does not follow therefrom that Congress intended the Commission to grant or deny an application in any case, other than in the interest of the public. Just as a monopoly—which may result from the action of the Commission in licensing too few stations—may be detrimental to the public interest, so may destructive competition, effected by the granting of too many licenses. The test is not whether there is a monopoly, on the one hand, or an overabundance of competition, on the other, but whether the granting or denying of the application will best serve the interest of the public.

In order to attain the purposes of the Act, the Commission must assume the full responsibility cast upon it by Congress with respect to each applicant and each protesting licensee. In order to insure full assumption of that responsibility and full performance of its duty, in situations such as exist in the present case, Congress made the Commission's action subject to judicial review. In the absence of such possibility of review the Commission—while admitting its duty—could arbitrarily avoid it; thus indulging in an abusive exercise of its administrative discretion. While the Commission was largely occupied, in its earlier years, with finding qualified licensees and controlling electrical interference; now a new problem has developed, which is just as important as electrical interference and which the Commission must meet and solve. The rapidly increasing number of stations and the resulting competition for advertising as well as program "talent" has just as dangerous possibilities as electrical interference. The public interest requires not merely that a maximum quantity of minimum quality service shall be given. If competition is permitted to develop to that extent, then "the larger and more effective use of radio in the public interest"[53] cannot be achieved.

The method of uncontrolled competition argued for by the Commission in the present case is in fact one way of creating monopolies. If it were allowed to go on unrestrained, according to its theory of non-reviewable arbitrary power, none but a financial monopoly could safely exist and operate in the radio broadcasting field. The Commission justifies its action in the present case, and justifies its contention in theory, by assuming that if a chain, operating several broadcasting stations, or a company which owns both newspapers and broadcasting stations, is able to carry one of them financially, even though the latter station is not able to support itself, then the latter cannot protest against destructive competition. The result of this policy might well be to destroy or frighten from the radio broadcasting industry, any independent station attempting to operate on its own resources; and to leave in the field only monopolies which were sufficiently supported financially to withstand the destructive competition which might result from arbitrary, careless action upon the part of the Commission in the granting of new station licenses. It was undoubtedly with just such considerations of possible arbitrary administrative action in mind that Congress provided for judicial review under the Communications Act on behalf of any person aggrieved or whose interests are adversely affected; as it likewise did under the Transportation Act. In each instance the remedy is statutory in character, and in each instance designed to protect rights and equities also deriving from statutes in derogation of the common law.[54]

We come then to the next important question, *i.e.*, whether appellant has assigned sufficient reasons of appeal to give this court jurisdiction. The Supreme Court has held that the jurisdiction of a district court is to be "determined by the allegations of the bill, and usually if the bill or declaration makes a claim that if well founded is within the jurisdiction of the Court it is within that jurisdiction whether well founded or not."[55] Similarly, our jurisdiction on appeal under the Communications Act depends upon whether reasons of appeal are assigned, which, if well founded, would show that the appellant is a person aggrieved or whose interests are adversely affected by the decision of the Commission from which the appeal is taken.[56] If, however, upon an examination of the record we find that the appellant is not a person aggrieved or adversely affected by the order of the Commission, it then becomes our duty to dismiss the appeal. *Woodmen of the World Life Ins. Co.* v. *Federal Communications Comm.*, (No. 7208, decided April 17, 1939) F. (2d) , App. D. C.

We have held that the reasons assigned in the *Sanders Brothers* case[57] were sufficient to furnish proper grounds of contest on appeal upon the issue of "economic injury to an existing station through the establishment of an additional station." In that case the reasons given showed (1) that the appellant was a licensee under the Act; (2) that it was engaged in the operation of a broadcasting station; (3) that the Commission had granted an application for a competing station license; (4) that the operation of the proposed station would necessarily result in such severe loss of operating revenue as to impair the service rendered by appellant; and (5) destroy its ability to render proper service in the public interest. Such a showing is sufficient to present the issue on appeal.

In the present case the following reasons for appeal were assigned:

> 1. The Commission erred as a matter of law in failing to find and conclude and on the basis of such conclusion to sustain the claim of appellant (successor to and assignee of protestant before the Commission) that the financial and economic interests of Station WAAB would be adversely affected by the establishment and operation of an additional regional station in Boston.
>
> 2. The conclusion that "the protestants have failed to sustain their respective protests" is arbitrary and capricious on the record as a whole, and specifically so, in holding:
>
> (a) "The protestants have failed to establish facts to show that operation by the applicant, as proposed, would adversely affect their economic interests. There is nothing in the record indicating that the entry of the applicant into the regional field would so affect the economic welfare of the protestants, or any of them, as to have any ultimate effect whatsoever on the public interest, convenience and necessity"; and,
>
> (b) "The charge that the granting of the application under consideration would increase competition wherein the protestants will be involved and will inflict upon them pecuniary loss is mostly a matter of conjecture; and the testimony offered to sustain the charge leaves the prospect so problematic as not to furnish a present substantial basis for the protests made or for any sound judgment based thereon"; and,
>
> (c) "Station WMEX, operating as proposed and the protesting stations in the Boston area operating as at present, would serve to a large extent the same territory; and the protestants contend that if the applicant becomes a regional station and enters into competition with them for regional business, it will adversely affect their economic interests; but the protestants failed to develop any facts sufficient to indicate the extent of the competition that might result from the granting of the application or to show the effect of that competition upon the business of the protestants."

The foregoing statement of reasons fails to present an issue as to whether the anticipated competition will necessarily result in such severe loss of operating revenue as to impair the service rendered by appellant, or whether it will destroy appellant's ability to render proper service in the public interest. It falls far short, therefore, of the reasons which, on the record presented in the *Sanders Brothers* case, we held to be sufficient. In no event should the statement in the present case be regarded as a model for the future. However, reason numbered 2(a) does at least suggest the issue, and we will consider it as sufficient, solely for the purposes of this appeal.[58]

[57] (No. 7087, decided January 23, 1939) F. (2d) , App. D. C. .

The Commission contends, however, that even if destructive economic competition may constitute a sufficient basis for contest on appeal, the appellant has failed to show any such injury in fact. Upon this point the Commission made the following findings, which for convenience we number:

1. "Shepard Broadcasting Company, Inc. (WNAC), Boston, operates on 1230 kilocycles with 1 kilowatt night and 5 kilowatts day; Bay State Broadcasting Corporation (WAAB), Boston, on 1410 kilocycles with 500 watts day and night; Massachusetts Broadcasting Corporation (WCOP), Boston, on 1120 kilocycles with 500 watts daytime only; and WLAC, Inc., Nashville, Tennessee, on 1470 kilocycles with 5 kilowatts, day and night."

2. "Station WMEX, operating as proposed [1470 kilocycles, 5 kilowatts unlimited] and the protesting stations in the Boston area operating as at present, would serve to a large extent the same territory; and the protestants contend that if the applicant becomes a regional station and enters into competition with them for regional business, it will adversely affect their economic interests; but the protestants failed to develop any facts sufficient to indicate the extent of the competition that might result from the granting of the application or to show the effect of that competition upon the business of the protestants."

3. "The Census of Business Radiobroadcasting for Boston (1935) when seven stations were operating, shows that their net sales of time amounted to $1,649,000; that $895,000 were for local service and $754,000 were for national and regional service. Station WMEX is already in the field competing for a part of the radio revenue to be derived therefrom. If it becomes a regional station, it will raise its service rates. (And if a redistribution of regional advertising should occur the reasons therefor would, no doubt, also tend toward a realignment of local advertising.) The protestants have failed to establish facts to show that operation by the applicant, as proposed, would adversely affect their economic interests to any greater extent than operation by the applicant, at present, adversely affects their economic interests. There is nothing in the record indicating that the entry of the applicant into the regional field would so affect the economic welfare of the protestants, or any of them, as to have any ultimate effect whatsoever on the public interest, convenience and necessity."

4. "In the protest of Shepard Broadcasting Service, Inc. (WNAC), it is claimed that if the application is granted, Station WMEX will become a direct competitor of the protestant for advertising patronage as well as a direct competitor for listener audience and attention; that such competition will tend to decrease the income of the protestant or to make it more difficult for protestant to sell time on its station; and that the value of Station WNAC as an advertising medium will thus be depreciated."

5. "The protest of Bay State Broadcasting Corporation (WAAB) is similar to that of Shepard Broadcasting Service, Inc."

6. "The protest of the Massachusetts Broadcasting Corporation (WCOP) states that the granting of the application will work an economic hardship on that protestant. The Shepard Broadcasting Service, Inc., filed no statement of profit and loss account. Bay State Broadcasting Corporation filed a statement covering a period of 34 weeks ending on September 26, 1936, and showing a loss of $24,213.22. Massachusetts Broadcasting Corporation introduced a statement covering a period of 7 months ending on January 31, 1937 showing a net loss for the period in the amount of $1,750.19."

7. "The charge that the granting of the application under consideration would increase competition wherein the protestants will be involved and will inflict upon them pecuniary loss is mostly a matter of conjecture; and the testimony offered to sustain the charge leaves the prospect so problematic as not to furnish a present substantial basis for the protest made or for any sound judgment based thereon."

Except for number seven, these findings are sufficient to support the determination of the Commission, adverse to the contention of the appellant. Number seven is ambiguous. Standing alone and read literally it suggests that the Commission was unable to determine the issue presented by appellant and the other protestants. The Supreme Court has said that it is not the duty of a reviewing court to "...search the record to ascertain whether, by use of what there may be found, general and ambiguous statements in the report intended to serve as findings may by construction be given a meaning sufficiently definite and certain to constitute a valid basis for the order."[59] That court has also said, "We must know what a decision means before the duty becomes ours to say whether it is right or wrong."[60] The use in finding number seven of language similar to that used by us in *WGN, Inc.* v. *Federal Radio Comm.*, 68 F. (2d) 432, 62 App. D. C. 385, cannot excuse its ambiguity and inadequacy. In that case the language was used to indicate the *insufficiency* of a statement of reasons on appeal. However, in view of the clear and unequivocal statements contained in findings two and three, there is sufficient basis for the Commission's determination. In fact, it was only by incorporating and denying those statements, in its reasons for appeal, that appellant succeeded in presenting the issue to us.

Moreover, we are unable to accept appellant's contention that the findings of the Commission are arbitrary and capricious. It is true that the evidence is susceptible of other conclusions than those drawn from it by the Commission; but that is not determinative. Neither is it material that this court might have arrived at other conclusions. As was recently said by the Supreme Court in *Rochester Telephone Corp.* v. *The United States,* (No. 481, decided April 17, 1939) U. S. : "So long as there is warrant in the record for the judgment of the expert body it must stand. . . . . Having found that the record permitted the Commission to draw the conclusion that it did, a court travels beyond its province to express concurrence therewith as an original question. 'The judicial function is exhausted when there is found a rational basis for the conclusions approved by the administrative body.'"[61] To hold otherwise would be to substiute the judgment of the court for that of the Commission.[62] The record as a whole reveals a substantial basis both for the Commission's findings and for its determination. This being true they are neither arbitrary nor capricious.

We have carefully examined appellant's other contentions, but in the view we take of the case we find it unnecessary to decide the qustions presented therein.

Appeal dismissed.

STEPHENS, *Associate Justice,* concurs in the result.

FREE OFFERS

Two advertising agencies have withdrawn cost-per-inquiry proposals as a result of notification from the NAB that acceptance would constitute violation of the NAB Code of Ethics.

They were the Western Agency, Inc., Seattle, and the A. N. Baker Advertising Agency, Inc., Chicago.

The NAB is investigating a transcription offer from the Cadle Tabernacle, Indianapolis, and expects to have information available within a few days.

Lucien Lelong, Inc. (cosmetics), "Mademoiselle" (magazine), and the Kerr Glass Manufacturing Corporation (fruit jars) have sent out scripts, the use of which would constitute code violation.

"Congressional Intelligence," a Washington publication, is offering a "Washington column" in return for a plug.

The NAB has advised the Pruitt Company, Chicago, that most broadcasters feel it would be poor business practice to give a discount on advertising in return for a discount on office machinery.

ROSENBAUM SUGGESTS CHANGES IN OPERATOR REQUIREMENTS

Sam Rosenbaum, WFIL, chairman of the NAB Labor Committee, has suggested modification of the FCC requirements for renewal of operators' licenses.

In a letter to the FCC, Mr. Rosenbaum stated that it appeared that "the scope of the present knowledge requirements covered by the examination questions is incompatible with the nature of the work demanded of the majority of present radio operators" and that "a required service record of three out of five years (at the transmitter) for technical men constantly in the employ of a broadcast station and receiving intermittent transmitter operation experience interspersed with their studio work, seems to be too strict a requirement."

Mr. Rosenbaum suggested the following modification:

"For the renewal of first and second class Radio-telephone broadcast licenses with respect to operators employed on the technical staffs of broadcast stations, at least fifteen percent of the employed time shall be devoted yearly to transmitter operation over the period of the license term; or at least fifteen percent of the employed time during any four year period of the license term; or twenty percent during any three years except that the last year of the license period shall be considered as one of the years; or twenty-five percent during two years, the last year of which shall be counted as one of the years; or fifty percent of the last year prior to application for renewal, or a total of one (1) year in the aggregate over the period of the entire license term plus ninety days within the last six months prior to the date of application for renewal.

In all cases, in computing percentages, the last year of the license term shall be considered as having ten months because the application date for renewal of licenses is sixty days prior to expiration."

The pattern and effect of the above may be more conveniently studied in the following tabulations:

Service Record Requirements for the Renewal of Radio-telephone first and second class Operators Licenses

Transmitter Operation	*Aggregate*
1) 15% of the time per year for the 5 yr. license term	9 months
2) 15% of the time per year for any 4 yrs. of the license term	9 "
3) 20% of the time per year for any 3 yrs. of the license term except that the last year shall be counted as one of the years	6.8 "
4) 25% of the time during 2 yrs., the last yr. of which shall be counted as one of the years	5.5 "
5) 50% of the time of the last year prior to renewal	5.0 "
6) or, 1 year in the aggregate over the 5 year period plus 90 days during the last six months prior to renewal application	14 "

BROADCAST MEASUREMENTS

During the month of July officials of the Federal Communications Commission measured 705 broadcast stations. Of this number 629 showed a maximum deviation within 0-10 cycles; 69 stations a deviation of 11-25 cycles; 6 a maximum deviation within 26-50 cycles and one station showed a deviation of over 50 cycles.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings are scheduled to be held at the Commission during the week beginning Monday, August 28.

No date for a regular meeting has been designated. It is not expected, however, that a meeting will be held until after Labor Day.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

October 2

NEW—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Las Vegas Broadcasting Co., Inc., Las Vegas, Nev.—C. P., **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

October 3

WSVS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Renewal of license, **1370 kc.,** 50 watts, specified hours.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license, **1370 kc.,** 100 watts, 250 watts LS, unlimited time (requests facilities of WSVS). Present assignment: **1370 kc.,** 100 watts, 250 watts LS; time: all hours except those WSVS operates.

October 4

NEW—Publix Bamford Theatres, Inc., Asheville, N. C.—C. P., **1430 kc.,** 1 KW, unlimited time (DA night).

FEDERAL COMMUNICATIONS COMMISSION ACTION

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KARK, Little Rock, Ark.; KFDM, Beaumont, Tex.; KFEL, Denver; KFRC, San Francisco; KFRU, Columbia, Mo.; KFUO, Clayton, Mo.; KFYR, Bismarck, N. Dak.; KGHL, Billings, Mont.; KHQ, Spokane, Wash.; KOMO and auxiliary, Seattle; KMJ, Fresno, Calif.; KPOF, Denver; KSFO, San Francisco; WDEV, Waterbury, Vt.; WELI, New Haven, Conn.; WFIL and auxiliary, Philadelphia; WEAN, Providence, R. I.; WICC, Bridgeport, Conn.; WJAR and auxiliary, Providence, R. I.; WKBN, Youngstown, Ohio; WLBL, Stevens Point, Wis.; WORL, Boston; KMTR, Los Angeles; WCAO and auxiliary, Baltimore, Md.; WQAM and auxiliary, Miami, Fla.; WSYR-WSYU, Syracuse, N. Y.; WWJ and auxiliary, Detroit, Mich.

The following stations were granted renewal of licenses for the period ending February 1, 1940:

KTHS, Hot Springs National Park, Ark.; WIBC, Indianapolis, Ind.; WKAR, East Lansing, Mich.

KVGB—Helen Townsley, Great Bend, Kans.—Granted renewal of license for the period ending January 1, 1940.

MISCELLANEOUS

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.; NEW—Copper County Broadcasting Co., Hancock, Mich.—Adopted final order, effective August 20, granting the application of WHDF for modification of license to authorize full-time operation on frequency **1370 kc.** instead of specified hours, and denying application of Copper County Broadcasting Co. for a new station to operate on **1370 kc.**, 250 watts day and 100 watts night, unlimited time.

NEW—Suffolk Broadcasting Corp., Suffolk, Va.—Adopted final order, effective August 20, granting the application of Suffolk Broadcasting Corp. for a new station to operate on **1420 kc.**, 100 watts night, 250 watts LS.

WHMA—Harry M. Ayers, Anniston, Ala.—Adopted final order, effective August 20, granting the application of WHMA for modification of license to change hours of operation from daytime only to unlimited, on **1420 kc.**, 100 watts.

KPLT—North Texas Broadcasting Co., Paris, Tex.—Adopted proposed findings issued on July 13, 1939, and entered final order granting modification of license of KPLT to change power from 250 watts daytime on **1500 kc.** to 100 watts night, 250 watts LS, on same frequency.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test high frequency broadcast equipment of station W1XOJ authorized by modification of C. P. on frequency **43000 kc.**, with power not to exceed 2 KW, for the period August 18 to September 16, in order to make adjustments on equipment installed and for tuning and adjustments of antenna elements which are now assembled for erection atop 400-foot mast.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted special temporary authority to operate a 50-watt portable transmitter with 100-foot vertical antenna, on the frequency **1360 kc.**, at the proposed location of WSAI, for a period of 30 days, during the hours of 7 a. m. to 6 p. m., EST, in order to make preliminary field survey of proposed site.

WMEF-WEJW—National Broadcasting Co., Inc., New York City.—Granted special temporary authority to utilize relay broadcast stations WMEF and WEJW for the period August 19 to August 24, to transmit program material by radio station WMFF describing Army maneuvers as occasion requires for broadcast over radio station WMFF.

WAAF—Drovers Journal Publishing Co., Chicago, Ill.—Granted special temporary authority to operate from 5 to 6 a. m., CST, for the period September 1 to September 23, in order to conform with adoption of Daylight Saving Time in Chicago.

WELI—City Broadcasting Corp., New Haven, Conn.—Granted extension of special temporary authority to operate station WELI on **930 kc.**, with 500 watts, daytime only, at Benham Road and Paradise Ave., Hamden, Conn., for the period August 22 and until such time as proof of performance of the directional antenna system is submitted and approved by the Engineering Department but ending in no event later than September 21, and to operate with either DA or non-DA during same period in order to make comparisons and expedite field intensity survey.

KGEK—Elmer G. Beehler, Sterling, Colo.—Granted special temporary authority to operate from 1:30 to 3 p. m., MST, August 23, 24 and 25, in order to broadcast the main part of the Logan County Fair and Rodeo from Sterling Fair Grounds.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 10 to 11 a. m. and 2 to 4 p. m., EDST, on August 28, 29, 30 and 31, 1939, in order to broadcast events of the Northern Maine Fair.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate unlimited time for the period August 30, 1939, to September 10, 1939, and from 2 to 3 p. m., EST, on Saturdays, September 16 and 23, 1939; from 8:30 to 10 a. m. and 2 to 3 p. m., EST, on Sundays, September 17 and 24, 1939, in order to broadcast programs as described in letter dated August 15, 1939.

WBRY—American-Republic, Inc., Waterbury, Conn.—Granted extension of special temporary authority to operate with the present two-unit directional antenna in accordance with the experimental authority granted under license, for the period August 31 to September 29, 1939, in order to determine necessary steps to change from a special broadcast to a standard broadcast station.

WCLE—Cleveland Radio Broadcasting Corp., Cleveland, Ohio.—Granted special temporary authority to operate from local sunset (August, 7:30 p. m., EST) August 22, 1939, until conclusion of the night baseball games for the purpose of broadcasting game.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Granted modification of C. P. to change transmitter location to 583 Meserole St., Brooklyn, N. Y. (local move of approximately two blocks (1000 ft.), and extend commencement date to 30 days after grant and completion date to 90 days thereafter; towers to be marked in accordance with Sec. 3.45(d); granted conditionally.

KAND—Navarro Broadcasting Association, Corsicana, Tex.—Adopted final order, effective August 22, denying application for authority to install new equipment and operate with power of 250 watts daytime, and granting the application for authority to operate station KAND unlimited time, with its present power of 100 watts.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted C. P. to make changes in transmitting equipment.

KFDA—Amarillo Broadcasting Corp., Amarillo, Tex.—Granted license to cover C. P. authorizing new station to operate on **1500 kc.**, 100 watts, unlimited time.

KVAK—Carl Lastenser, Atchison, Kans.—Granted license to cover C. P. authorizing new station to operate on **1420 kc.**, 100 watts, daytime only.

WCNC—Albemarle Broadcasting Co., Elizabeth City, N. C.—Granted modification of C. P. approving transmitter and studio sites, changes in approved transmitter and installation of a vertical radiator.

NEW—WAVE, Inc., Louisville, Ky., Portable-Mobile.—Granted C. P. for new relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.**, 50 watts.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted modification of C. P. extending completion date to November 19, 1939.

KXOX—Sweetwater Radio, Inc., Sweetwater, Tex.—Granted modification of C. P. for changes in equipment and approval of transmitter site; antenna system authorized to be determined by C. P. which authorized a new station to operate on **1210 kc.**, 250 watts, daytime only.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9 to 10 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period August 31 to September 29, in order to broadcast educational programs.

W3XO—Jansky & Bailey, Washington, D. C.—Granted special temporary authority to test the high frequency broadcast equipment of station W3XO, as described in application for modification of C. P., on frequency **43200 kc.**, with power of 1 KW, for a period not to exceed 30 days, to conduct frequency modulation tests on this frequency.

KOIN—KOIN, Inc., Portland, Ore.—Granted motion to dismiss without prejudice application for modification of license to operate with 5 KW day and night.

WMRO—Martin B. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts only from local sunset (August 7 p. m., CST) until 9 p. m., CST, August 23, in order to broadcast civic music and entertainment.

WCLE—Cleveland Radio Broadcasting Corp., Cleveland, Ohio.—Granted special temporary authority to operate from local sunset (September 6:45 p. m., EST) to 7 p. m., EST, on September 1, 4, 6, 8, 11, 13, 15, 18, 20, 22, 25, 27 and 29, in order to continue to carry the "Lone Ranger" program.

WQDM—Regan and Bostwick, St. Albans, Vt.—Granted temporary extension of license for period of two months ending November 1, 1939, subject to whatever action may be taken on renewal application.

KVNU—Cache Valley Broadcasting Co., Inc., Logan, Utah.—Granted temporary extension of license for period of one month ending October 1, 1939.

APPLICATIONS FILED AT FCC

610 Kilocycles

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Construction permit to install new transmitter, directional antenna for day and night use, and increase power from 1 to 5 KW, move transmitter from 18th Ave. and 32nd St. to Northside of 79th Street, Causeway, Miami, Florida.

680 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Construction permit to install new transmitter, directional antenna for night use, increase power from 500 watts, 2½ KW-LS to 5 KW, hours of operation from daytime (LS at San Francisco, Calif.), to unlimited time, and move transmitter from Pickett Road, 5⅜ miles S. E. of St. Joseph, Mo., to 5¼ miles N. N. E. of St. Joseph, Mo.

890 Kilocycles

KFNF—KFNF, Inc., Shenandoah, Iowa.—Authority to determine operating power by direct measurement of antenna power.

1010 Kilocycles

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Modification of C. P. (B5-P-1712) as modified, for a new transmitter, install directional antenna for day and night use, increase power, move of transmitter, requesting extension of completion date from 9-24-39 to 11-24-39.

1200 Kilocycles

KAST—Astoria Broadcasting Co., Astoria, Ore.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WFTC—Jonas Weiland, Kinston, N. C.—Modification of license to increase power from 100 watts, 250 watts day to 250 watts day and night.

WOLS—O. Lee Stone, Florence, S. C.—Construction permit make changes in equipment and increase power from 100 to 250 watts.

1210 Kilocycles

WJTN—James Broadcasting Co., Inc., Jamestown, N. Y.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—License to cover C. P. (B1-P-2317) to install new equipment and increase power.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Construction permit for equipment changes, increase power from 100 watts to 250 watts.

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WGRM—P. K. Ewing, Grenada, Miss.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

1280 Kilocycles

WTNJ—WOAX, Inc., Trenton, N. J.—Construction permit to install auxiliary transmitter for emergency use only.

1300 Kilocycles

NEW—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Construction permit for a new station on **1300 kc.,** 1 KW power, unlimited time, using directional antenna day and night.

1310 Kilocycles

KFYO—Plains Radio Broadcasting Co., Lubbock, Texas.—Construction permit to install new transmitter and vertical antenna, change frequency from **1310** to **1380 kc.,** increase power from 100 watts, 250 watts LS to 500 watts; 1 KW LS, and move transmitter from 2312 Fifth St., Lubbock, Texas, to site to be determined, in or near Lubbock, Texas.

WJPR—John R. Pepper, Greenville, Miss.—Modification of C. P. (B3-P-2312) for new station, requesting approval of antenna and approval of transmitter site at State Road No. 1, at Levee, Greenville, Miss., and move studio from 808 Harvey St., to Washington and Hinds Sts., Greenville, Miss.

WCLS—WCLS, Inc., Joliet, Twp., Ill.—Modification of C. P. (B4-P-2404) for equipment changes and antenna changes, move of transmitter, further requesting changes in equipment, and increase in power from 100 to 250 watts, change hours of operation from specified hours to unlimited. Extend commencement and completion dates, 90 days after grant and 90 days thereafter.

WCMI—Ashland Broadcasting Co., Ashland, Ky.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1370 Kilocycles

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Modification of construction permit (B3-P-2390) for a new station, requesting approval of antenna and installation of new transmitter, and approval of studio and transmitter site at State Route 37, N. E. of Moultrie, Georgia.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Authority to determine operating power by direct measurement of antenna power.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—License to cover C. P. (B3-P-2043) as modified, for new station.

WGL—Westinghouse Radio Stations, Inc., Baltimore, Md.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WHLS—Harmon LeRoy Stevens and Herman LeRoy Stevens, d/b as Port Huron Broadcasting Co., Port Huron, Mich.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

KRMC—Robert McNab Co. (A. L. Roberts, R. B. McNab, A. J. Brietbach, Gen. Manager), Jamestown, N. Dak.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

1400 Kilocycles

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Modification of construction permit (B1-P-2254) for new equipment, new antenna, and move of transmitter, further requesting authority to move from 204 Scholes St., to 583 Meserole St., Brooklyn, N. Y., and extend commencement and completion dates 30 and 90 days respectively.

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—Construction permit to move transmitter from 2568 Flatbush, Brooklyn, N. Y., to Provost and Huron Sts., Brooklyn, N. Y.

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Modification of license to increase power from 1 KW; 5 KW LS to 5 KW day and night, make changes in present directional antenna system, for use nighttime only.

KTUL—Tulsa Broadcasting Co., Inc., Tulsa, Okla.—Modification of license to increase power from 1 KW; 5 KW LS to 5 KW day and night. Using directional antenna at night.

1420 Kilocycles

KWAL—Chester J. Howarth and Clarence Berger, Wallace, Idaho.—Modification of C. P. (B5-P-1967) as modified, for a new station, requesting changes in transmitting equipment, move of studio from U. S. Highway No. 10, between Wallace and Kellog, Idaho, to Samuels Hotel, Wallace, Idaho.

WMAS—WMAS, Inc., Springfield, Mass.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

1430 Kilocycles

KINY—Edwin A. Kraft, Seattle, Wash.—Modification of construction permit (B5-P-2401) for changes in equipment and increase in power, requesting further changes in equipment.

1480 Kilocycles

KOMA—KOMA, Inc., Oklahoma City, Okla.—Authority to determine operating power by direct measurement of antenna power.

1500 Kilocycles

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Modification of construction permit (B3-P-2413) for installation of new transmitter, antenna changes, increase in power from 100 watts to 100 watts, 250 watts LS, move of transmitter, further requesting authority to increase power to 250 watts day and night.

WKIN—Kingston Broadcasting Corp., Ulster Twp., N. Y.—Modification of construction permit (B1-P-2112) for a new station, requesting changes in transmitting equipment, approval of antenna, and approval of studio and transmitter site at Plainfield St., Ulster Twp., N. Y.

WOMI—Owensboro Broadcasting Co., Owensboro, Ky.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

MISCELLANEOUS

XXXXX—King-Trendle Broadcasting Corp., Detroit, Mich.—Extension of authority to transmit programs from Station WXYZ to stations of Canadian Broadcasting Corporation, period beginning 10-16-39.

NEW—WHEC, Inc., New York, N. Y.—Construction permit for new high frequency broadcast station on **42600 kc.**, 1 KW power special emission, site to be determined, New York, antenna to be determined.

WSLA—World Wide Broadcasting Corp., Boston, Mass.—Construction permit to change present location of transmitter from 70 Brookline Ave., Boston, Mass., to new site known as Hatherly Beach, near the town of Scituate, Mass.

NEW—The May Department Stores Co., Los Angeles, Calif.—Construction permit for a new television broadcast (experimental) station on frequencies **78000-84000 kc.**, aural and visual, power 1 KW, emission A3 and A5, to be located at Wilshire Boulevard at Fairfax St., Los Angeles, Calif.

XXXXX—Mutual Broadcasting System, Inc., Chicago, Ill.—Extension of authority to transmit programs to Station CKLW, stations owned and operated by the Canadian Broadcasting Corp., and stations licensed by the Canadian Minister of Transport.

WNEI—WFBM, Inc., Portable-Mobile, area of Indianapolis, Ind.—Modification of C. P. (B4-PRY-157) for changes in equipment.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Dearborn Sales Company—A complaint has been issued against Sam Luber, trading as Dearborn Sales Company, 711 South Dearborn St., Chicago, charging the use of lottery methods in the sale and distribution of radios, coffee sets, roasters, silverware, waffle irons, toaster tray sets, and other articles of merchandise. (3870)

Globe Clock Company—See Sales Stimulators.

Marlin Firearms Company, New Haven, Conn., was charged, in a complaint, with falsely representing that it is the manufacturer of "Marlin" razor blades.

The complaint alleges that the respondent does not manufacture razor blades, and that the blades sold under its trade-mark and represented as "Marlin" blades are manufactured by another company, whose output, in part, is purchased by the respondent. It is further alleged that the respondent does not own or control the manufacturing plant in which the blades are made. (3871)

Sales Stimulators—A complaint has been issued against Ben Braude, trading as Sales Stimulators and as Globe Clock Company, 337 West Madison St., Chicago, alleging misleading representations in the sale of a sales stimulator plan.

According to the complaint, the respondent exaggerated the earnings of his salesmen and the retail values of premium merchandise such as silverware, clocks, and electric dry shavers.

It is further alleged that the cost of the stimulator plan to the retail merchants was in excss of that claimed by the respondent, and that he did not make refunds to the retail merchants in the manner advertised. (3873)

Scientific Manufacturing Company, Inc.—Alleging publication of misleading representations which unfairly disparage aluminum cooking utensils a complaint has been issued against Scientific Manufacturing Company, Inc., and its president, Howard J. Force, of Scranton, Pa.

The pamphlets, designated "Poisons Formed by Aluminum Cooking Utensils" and "Are You Heading for the Last Round Up," are alleged to contain representations of which the following are typical: "A friend of mine after having 17 carbuncles, threw out his fancy aluminum ware. The carbuncles disappeared."—"Another fed his dog from an aluminum dish; the dog died from cancer of the face."—"Two others each gave a dozen young ducks water in aluminum pans and all the ducks died in less than two weeks."—"Cancer has increased in Austria in proportion to the increased use of aluminum ware."

These, and similar representations, the Commission charges, deceive the public into the erroneous belief that aluminum utensils are a menace to the health of users, when in truth, they are not unsafe, poisonous, nor deleterious to mankind when properly used in the preparation or keeping of foods, and are used extensively in hospitals. (3874)

STIPULATIONS

The Commission has entered into the following stipulations:

Ane Company—R. W. Harris, trading as The Ane Company, Baltimore, entered into a stipulation to discontinue misleading representations in the sale of "Ane Herb Tonic."

Under the stipulation, the respondent will cease representing Ane Herb Tonic as being a tonic, a prescription, of botanical origin, or as containing several of the finest ingredients known to medical science.

The respondent will further cease advertising that Ane Herb Tonic is a competent remedy in the treatment of run-down and weakened condition, sore and stiff muscles and joints, faulty elimination, constipation (unless limited to temporary constipation), acid indigestion, dizziness, jitteryness, sleepless nights, indigestion, headaches, poor sleep, dizzy spells or so-called rheumatic pain. (02420)

Elmer E. Cary Company—Elmer E. Cary, trading as Elmer E. Cary Company, 1116 West Washington Blvd., Los Angeles, entered into a stipulation to cease disseminating misleading representations in the sale and distribution of the "Cary Economy Cooker."

Under the stipulation, the respondent is to cease representing that he is the manufacturer of the Cary Economy Cooker; that he manufactures utensils for, or to be sold to, the United States Government; that the Cary Economy Cooker is the only perfect method known to medical science of preparing food, or that this cooker is guaranteed to save the average family $5 a month or any other amount which has not been determined by figures obtained in such a way as to verify the claims made. (2507)

France System—M. W. France, trading as The France System, 1424 North Occidental Blvd., Los Angeles, entered into a stipulation agreeing to discontinue misleading represenations in the sale of San-Sur, for feminine hygiene, and a booklet, "The France System".

Under the stipulation, the respondent is to cease representing that San-Sur enables women to avoid delay; is sure, certain or positive in its results; is a "marvelous" or "new" discovery for feminine hygiene, or is a contraceptive. The respondent also agreed to cease using the word "San-Sur" or any similar word to designate the name of the product.

It was also stipulated that the respondent will cease representing that the booklet entitled "The France System" is a "prescription", or that it rebuilds sex strength for men and women, or increases sex vitality. (02419)

J. B. Simpson, Inc., 831 West Adams St., Chicago, entered into a stipulation to discontinue misleading representations in the sale of men's clothing.

The respondent agreed to cease representing as "Wool", "All Wool", "Woolen", "Virgin Wool", "100% Virgin Wool", "Australian Wool", "Worsted", or "All Pure Wool Worsted" the principal fabrics used in the manufacture of its clothing when such fabrics are not composed wholly of wool. The respondent is also to cease designating as "Wool", "All Wool", "Woolen", "Virgin Wool", "100% Virgin Wool", "Australian Wool", "Worsted", or "All Pure Worsted" the principal fabric used in the manufacture of its clothing which is composed partly of wool and partly of cotton, silk, rayon, linen, or any other fiber, unless it is described as "Wool and Cotton", "Wool and Rayon", "Wool and Linen", etc., or by similar words in the order of the predominating fiber. (02418)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Mrs. Fannye Cohn, 6227 North Broadway, Chicago, has been ordered to discontinue misleading representations in the sale of a sales stimulator plan, including certificates, coupons and cards, redeemable in chinaware or other merchandise.

Under the order, the respondent is to cease representing that certificates, coupons or cards can be redeemed in chinaware or other merchandise, unless all of the terms and conditions of such offers are clearly stated; that she supplies advertising matter relating to her sales stimulator plan when such is not a fact, or that payment made by respondent's customers for the sales stimulator plan is a refundable temporary deposit, unless such is the fact and unless all conditions of such offers are clearly stated. The respondent is further directed to cease misrepresenting the actual cost to the respondent of her products or the actual cost of packing, handling and distribution. (3497)

Dearborn Supply Company, 2350 Clybourn Ave., Chicago, was ordered to discontinue misleading representations in the sale of cosmetic preparations.

Under the order, the respondent is to cease representing that "Mercolized Wax" absorbs surface skin, surface discolorations, or removes coarseness, blackheads, freckles or sunburn, or softens the skin, and to discontinue advertisements which fail to reveal that "Mercolized Wax" contains ammoniated mercury or that its use by some persons under certain conditions may produce injurious effects.

The order further forbids representations that "Parker-Belmont Beauty Cream" is a skillful or scientific blend of creams; that "Saxolite Astringent" is a skin tonic or smooths out wrinkles or age lines; that "Powdered Tarkroot", when used as a beauty mask, will revive or refresh a fatigued or drooping face more quickly or completely than other similar products, and that "Phelactine" is different from, or quicker and simpler to use than other hair removers. (3593)

Fairfield Engineering Company, 324 Barnhardt St., Marion, Ohio, was ordered to discontinue misleading representations in the sale of its "Fairfield Coal Distributors," "Failfield Non-Segregating Coal Distributors," or any other similar devices.

Under the order, the respondent is to cease representing, through use of the term "non-segregating" or any similar term, that such coal distributors are non-segregating or that they cause a uniform layer of fine and coarse coal to be delivered across the entire surface of the fire boxes of boilers. (3850)

McDowell, Pyle & Company, Inc.—See Ohio Novelty Company.

Mode Novelty Company and its officers, Wolf Alboum and Samuel Weisman, Newark, N. J., has been ordered to discontinue misrepresenting the quality and type of the material out of which hats and caps, which they manufacture and sell, are made.

The respondents, in September 1936, entered into a stipulation with the Federal Trade Commission to cease selling baseball or novelty caps made from second hand, old, worn or discarded materials unless they clearly indicated that such products were not made from new and unused materials. The Commission finds that subsequently the respondents failed to abide by the terms of the stipulation.

Under the order, the respondents are to cease representing that hats or caps composed in whole or in part of used or second hand materials are new or are composed of new materials, either by direct assertions or by failure to indicate, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands or hat body, the fact that such products are composed of second hand or used materials. (3473)

Ohio Novelty Company—Samuel Ravid, trading as Ohio Novelty Company, 107 Westmoreland Terrace, Akron, Ohio, and McDowell, Pyle & Co., Inc., 221 West Pratt St., Baltimore, were prohibited from using lottery methods in the sale and distribution of merchandise.

The Ohio Novelty Company, engaged in the sale of dresser sets, cigarette cases and lighters, tableware, kitchenware, pen and pencil sets, dolls, clocks, watches, blankets, bedspreads, tablecloths, wearing apparel and other novelty merchandise, and McDowell, Pyle & Co., Inc., engaged in the sale of peanuts and confectionery products, were ordered to cease selling any merchandise by means of lottery devices, or supplying others with lottery devices to enable such persons to sell merchandise. (3594-3832)

Zo-Ro-Lo, Inc., Ada, Ohio, was ordered to discontinue misleading representations in the sale of "Zo-Ro-Lo," a medicinal preparation.

Under the order, the respondent is to cease representing that its preparation is a cure or remedy for arthritis, asthma, brain disease, Bright's disease, diabetes, acidity, epileptic convulsions, gall stones, inward goitre, rheumatism, neuritis, sciatica, or sinus, kidney or prostate gland trouble.

The order further forbids representations that Zo-Ro-Lo neutralizes toxic poisons, relieves all pain, or has any therapeutic value in the treatment of ailments which are due to intestinal autointoxication, other than as a laxative or purgative. (3030)

RCA-Victor Postpones Licensing

The RCA Manufacturing Company has agreed to postpone the effective date of its Victor and Bluebird record licensing agreements until December 1.

The two-month postponement was made at the request of Neville Miller, NAB President, to permit further discussion of the question.

The licensing system, which would require every broadcaster using Victor or Bluebird records to buy a license from RCA, was to have gone into effect October 1. As soon as the proposed agreements were sent to member stations, Mr. Miller arranged conferences with RCA, Decca and Columbia officials. As a result of these, Lawrence Morris, counsel to RCA Manufacturing, sent Mr. Miller the following radiogram:

> "IN COMPLIANCE WITH YOUR REQUEST AND IN ORDER TO EXTEND TO BROADCASTERS EVERY POSSIBLE CONSIDERATION WE ARE WILLING TO FURTHER POSTPONE EFFECTIVE DATE OF OUR LICENSE AGREEMENT TO DECEMBER FIRST 1939 PROVIDED OTHER PHONOGRAPH RECORD COMPANIES WILL DO THE SAME."

Neither Columbia or Decca has as yet proposed a licensing system for its records.

Special Convention in Chicago September 15

A special NAB convention will meet at 10 a. m., central daylight saving time, in the Palmer House, Chicago, to decide whether to set up the machinery for creating a supply of tax-free and non-ASCAP music for the broadcasting industry. Nonmembers as well as members have been invited to this most important meeting.

The convention schedule:

September 13—The NAB board of directors will meet at the Palmer House at 10 a. m.

September 14—Both IRNA and the Independents will hold meetings at 10 a. m. in the Palmer House.

September 15—The special NAB convention will start at 10 a. m. in the Palmer House.

Free Offers

Only two companies trying to chisel free time on the air were reported to NAB Headquarters this week, but both are prominent and probably well able to pay for time if they choose. Both are big newspaper advertisers.

The Motion Picture Industry, an old offender in the chiseling game, produced one of the free time proposals.

The latest attempt is in the form of a letter sent to many member stations by Towne and Baker Productions, Hollywood, Cal., offering "a 15-minute all-star transcribed program *which you may air free of charge.*" The offer, while frankly admitting that the program is based on the new RKO picture, "Swiss Family Robinson," soon to be released, states that there is "no commercial advertising or subtle exploitation."

Many member stations have forwarded this latest "time-chiseling" attempt to NAB Headquarters, and at least two stations have written strong replies direct to Towne and Baker. No doubt other members have received the same request for free time, and are invited to forward them to Headquarters.

The NAB reply to Towne & Baker, and the direct replies from those broadcasters who have sent copies to Headquarters, are reprinted below:

August 30, 1939.

Mr. James Allen
RKO Radio Studios
Hollywood, California

Dear Mr. Allen:

In reply to your letter of August 26, please be advised that this station is not interested in you free offer of the transcribed version of "SWISS FAMILY ROBINSON."

You may not realize it, but this radio station is flooded with requests similar to yours, all of which are promptly tossed in the wastebasket. However, since you asked for the courtesy of a reply, I am giving you one.

We are no different than RKO Pictures, in that we too are in business to make money. There's hardly a week goes by that some traveling act doesn't pound on our door asking us if we wouldn't like to have a good program on the air free. That good program is nothing more than a fifteen minute show plugging their personal appearance at one of the theaters in a community served by this station. We do not accept these "good shows" unless these acts are willing to pay for their time, and nine times out of ten they do, for they have discovered that WQDM serves more people in this area than they can reach through any other medium. WQDM offers the facilities to RKO on the same basis.

Sincerely yours,

G. S. Wasser.
Manager WQDM.

GSW:ES

August 29, 1939.

Mr. James Allen,
Towne and Baker Productions,
RKO Radio Studios,
Hollywood, California.

Dear Mr. Allen:

We are not interested in the offer in your letter of August 25, and while the program perhaps does not have any subtle exploitation, as you put it, still somewhere there is going to be a build-up for your coming production. We, at this station, feel that it is time that motion pictures pay for such services. Perhaps you say there is not enough commercial on this to warrant payment, and our answer to that would be, then put out a strictly commercial program and pay for the time on the air.

We feel that we should have compensation for a show of this type.

Very truly yours,

A. K. Redmond,
Manager WHP, Inc.

AKR:BP

August 30, 1939.

Mr. James Allen, Radio Director
Towne and Baker Productions
Hollywood, California.

Dear Mr. Allen:

Several of our member stations have forwarded to this office your recent requests for free time on the air in connection with the exploitation of the new RKO picture "Swiss Family Robinson."

Although radio has cooperated with the motion picture industry in the past, most of our stations feel that it is not good business practice to accept such material as you offer on a free time basis. However, the industry is certainly glad you appreciate the value of radio advertising and hope that you will see fit to use our medium on a regular basis, as do so many outstandingly successful advertisers.

Sincerely yours,

NATIONAL ASSOCIATION OF BROADCASTERS,
Samuel J. Henry, Jr.

Ringling Brothers-Barnum & Bailey Combined Shows has asked at least one station to provide free time for a complete program ballyhooing its circus. KFPY, Spokane's strong reply is reprinted below:

Our Seventeenth Year
August 26, 1939.

Dear Mr. Kelley:

Reply to your letter of August eleventh has been delayed until the date of your Spokane showing and until, also, we might meet and talk with members of your publicity department who might accompany the show. Incidentally, the transcription discussed in your letter was received in due time and has been delivered to Mr. F. L. Morrissey of your radio publicity department, who called on us last Monday, without having been broadcast.

We took occasion, during the course of a very enjoyable chat with Mr. Morrissey, to discuss this entire subject of circus advertising, and we told him then, as we tell you now, some of our reasons for not broadcasting not only the records you sent us, but also shows from your organization which Mr. Morrissey wanted put on the air.

All requests from your company have been for gratis time. Not one suggestion was made that you would buy time. And yet all appearances in broadcast would have been strictly commercial, designed to recruit attendance at your two Spokane shows. And as we explained to Mr. Morrissey, we know not a single reason why we should give free time to your commercial enterprise while selling it to others; nor, as a matter of policy, do we, or will we, or have we, for the past six years, given any free time to any circus, simply for the reason that your activity is just as commercial as that of any other business, and therefore should not seek, or expect to receive, free time, while all other commercial accounts are buying it.

Every time a circus comes to town it buys display space in the local newspapers, and when circus managements come to the point where they treat radio in the same manner, and provide a budget for it, I can't help but feel that radio too will go just as far as the newspapers have ever gone, maybe even farther in affording just as much cooperation as do the newspapers.

At any rate, whether you do or do not provide a radio budget for the future, KFPY will give away no free time for commercial advertising.

Sincerely,

Arthur L. Bright,
Vice President.

F. Beverly Kelley, Esq.,
Ringling Bros.-Barnum & Bailey Combined Shows, Inc.,
331 Madison Avenue,
New York City.

S. J. HENRY APPOINTED TO HEAD RADIO ADVERTISING BUREAU

President Miller today announces the appointment of Samuel J. Henry, Jr., to the Headquarters Staff. Mr. Henry will be assigned to the Bureau of Radio Advertising. He comes direct from the World Broadcasting System, where he served as advertising and sales promotion manager.

A specialist in the preparation of radio sales presentations, Mr. Henry brings a wealth of experience to the Bureau.

He is a graduate of Brown University and was a one-time newspaperman on the Washington Herald. He wrote copy and radio continuity for the Cecil, Warwick and Cecil advertising agency, and for awhile was engaged in sales work in the Radio Sales Division of the Columbia Broadcasting System.

His experience at the World Broadcasting System placed him in contact with the local selling problems of hundreds of radio stations throughout the country. Much of his new work will center around the production of presentations and promotional pieces primarily designed for the development of local and regional radio advertising accounts.

The Bureau of Radio Advertising was established as a new service for members last spring. It has been jointly administered by Paul Peter, Director of Research, and Ed Kirby, Director of Public Relations. With the addition of a full-time man to the Bureau's work, Headquarters feels that a highly beneficial service will be rendered all member stations.

MILLER PRAISES INDUSTRY FOR WAR NEWS REPORTING

Praising the public service work of stations and networks in bringing the nation the most comprehensive war-crisis coverage in history, Neville Miller, president of the NAB, congratulated the industry in the following statement:

"The broadcasting industry is performing a monumental public service in this war crisis period. Commercial schedules have been abandoned at real financial sacrifice in order that the public interest may be served. No other industry can boast such an unselfish performance. Once again American broadcasters are proving their stewardship. Operations have been on a twenty-four hour basis. Radio staff men and women have stuck to their posts day and night, that the American people may be informed of the startling minute-to-minute developments.

"The comprehensive news reports and on-the-spot-broadcasts have undoubtedly gathered the greatest audience in the history of radio.

"In every home in America, from the White House to the most humble, radios are turned on, and people are listening and hoping that the holocaust may yet be averted.

"Through it all, there is a perceptible growth in public appreciation of the private and competitive character of the American System of Broadcasting which is rendering such a superb service. I congratulate the industry.

"And let me convey the gratitude of the industry to the gentlemen of the press who have cooperated so splendidly with us."

FLY TAKES FCC OFFICE

Frank R. McNinch stepped out Thursday as Chairman of the Federal Communications Commission and it is expected that James Lawrence Fly will take the oath tomorrow. Mr. McNinch has been Chairman since October 1, 1937.

President Roosevelt, in a communication which he sent to members of the Commission a couple of weeks ago, indicated that Mr. Fly would be Chairman to succeed Mr. McNinch.

SEPTEMBER DATES

September 5th—First Continental Congress opened in Philadelphia, 1774.

September 6th—Lafayette Day (Lafayette born 1757). Also celebration of Battle of Marne, 1914.

September 10th—Elias Howe patented sewing machine, 1846.

September 11-13th—Constitution Week, September 11-17.

September 13th—Star-Spangled Banner written 1814.

September 14th—Rosh Hashanah (1st day). (Jewish New Year.)

September 15th—Rosh Hashanah (2nd Day). National Felt Hat Day.

September 17th—Constitution Day (Constitution adopted, 1787). National Dog Week, September 17-23.

September 23rd—Yom Kippur (Day of Atonement). Jewish holiday. Autumn begins today. First air mail flight in U. S. in 1911, Earl Ovington, first mail pilot.

September 24th—Daylight Savings ends. Gold Star Mother's Day. National Newspaper Boys' Week, September 24-30. American Indian Day (21st).

September 30th—National Furniture Week, September 30-October 7. College football season starts.

NEW MEMBERS

At the meeting of the Executive Committee held in New York, August 22, the following membership applications were approved:

KOVO—Provo, Utah
KVGB—Great Bend, Kansas
KDRO—Sedalia, Missouri
WJHL—Johnson City, Tennessee
WMBG—Richmond, Virginia
WAPI—Birmingham, Alabama.

FCC MOTIONS DOCKET

The Federal Communications Commission has announced that the next meeting of the Motions Docket will be held at 10 a. m., Friday, September 8th, in Room 1411 of the New Post Office Building. Hearing of the Motions Docket was suspended during the month of August.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, September 4. They are subject to change.

Tuesday, September 5

KGLO—Mason City Globe Gazette Co., Mason City, Iowa—C. P., **1270 kc.,** 1 KW, unlimited time (DA-night), (requested facilities of KWLC and KGCA). Present assignment: **1210 kc.,** 100 watts, 250 watts LS, unlimited time.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Renewal of license, **1270 kc.,** 100 watts, daytime. Shares KWLC.

KWLC—Luther College, Decorah, Iowa.—Renewal of license, **1270 kc.,** 100 watts, daytime. Shares KGCA.

Thursday, September 7

ORAL ARGUMENT BEFORE THE COMMISSION

Report No. B-5:

NEW—Saginaw Broadcasting Co., Saginaw, Mich.—C. P., **1200 kc.,** 100 watts, 250 watts LS, specified hours.

NEW—Harold F. Gross and Edmund C. Shields, Saginaw, Mich.—C. P., **950 kc.,** 500 watts, daytime.

Friday, September 8

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—C. P., **1200 kc.,** 100 watts, daytime.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

October 11

WNBX—Twin State Broadcasting Corp., Springfield, Vt. (Proposed Studio and Trans. location, Keene, N. H.).—C. P., **1260 kc.,** 1 KW, unlimited time (DA-day and night). Present assignment: **1260 kc.,** 1 KW, unlimited time (DA-night).

FURTHER HEARING

NEW—Presque Isle Broadcasting Co., Erie, Pa.—C. P., **1500 kc.,** 100 watts, 250 watts LS, unlimited time.

October 20

October 25

WABI—Community Broadcasting Service, Inc., Bangor, Maine.—C. P., **560 kc.,** 1 KW, unlimited time (DA-night). Present assignment: **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.,** 100 watts, unlimited time. Present assignment: **1200 kc.,** 100 watts, specified hours.

WJBW—Charles C. Carlson, New Orleans, La.—Renewal of license, **1200 kc.,** 100 watts, specified hours.

November 10

WHA—University of Wisconsin, Madison, Wisc.—C. P., **670 kc.,** 50 KW, unlimited time (request facilities of WMAQ). Present assignment: **940 kc.,** 5 KW, daytime.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Renewal of license, **670 kc.,** 50 KW, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KECA and auxiliary, Los Angeles; WFNF and auxiliary, Shenandoah, Iowa; WFRC and auxiliary, San Francisco; KSAC, Manhattan, Kans.; KSD, St. Louis, Mo.; WMMN and auxiliary, Fairmont, W. Va.; WMT, Cedar Rapids, Iowa; WPEN and auxiliary, Philadelphia; WSVA, Harrisonburg, Va.; WTAG and auxiliary, Worcester, Mass.; KFKA, Greeley, Colo.; KGFX, Pierre, S. Dak.; KTAR, Phoenix, Ariz.; WCOC, Meridian, Miss.

WSPR—WSPR, Inc., Springfield, Mass.—Granted renewal of license for the period ending February 1, 1940.

KUSD—University of South Dakota, Vermillion, S. Dak.—Present license extended on a temporary basis only for the period ending October 1, 1939, pending determination upon application for renewal.

KGBU—Alaska Radio & Service Corp., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only for the period ending October 1, 1939, pending determination upon application for renewal.

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Calif.—Present license further extended upon a temporary basis only for the period ending October 1, 1939, pending determination upon application for renewal.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Present license extended upon a temporary basis only for the period ending October 1, 1939, pending receipt of and determination upon application for renewal.

WSPA—Virgil V. Evans, tr/as The Voice of South Carolina, Spartanburg, S. C.—Present license extended upon a temporary basis only for the period ending October 1, 1939, pending determination upon application for renewal.

W8XWJ—The Evening News Assn., Detroit, Mich.—Present license for high frequency broadcast station further extended upon a temporary basis only until October 1, 1939, pending determaination upon application for renewal.

W4XBW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Present license for high frequency broadcast station further extended upon a temporary basis only until October 1, 1939, pending determination upon application for renewal.

WAXG—Florida Capitol Broadcasters, Inc., Portable-Mobile (area Tallahassee, Fla.)—Present license for relay broadcast station further extended upon a temporary basis only until October 1, 1939, pending determination upon application for renewal.

MISCELLANEOUS

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m., EST) to 7:00 p. m., EST, for the month of September in order to broadcast late weather forecasts.

W3XDS—RCA Manufacturing Co., Inc., New York City.—Granted special temporary authority to operate general experimental station W3XDS using the frequency **950 kc.,** with power of 1 KW, to conduct a comprehensive field survey to study the effects of fading on amplitude modulated facsimile emission during the hours 2 to 7 a. m., DST, on Sundays; midnight to 5 a. m., DST, Mondays; and 1 to 5 a. m., DST, from Tuesday through Saturday, for a period not to exceed thirty days.

KPAC—Port Arthur College, Port Arthur, Texas.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m., CST) to 12:00 midnight, CST, with power of 100 watts on September 15, 1939, in order to broadcast local high school football game.

KPAC—Port Arthur College, Port Arthur, Texas.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m., CST) to 12:00 midnight, CST, with power of 100 watts on September 22, 1939, in order to broadcast local high school football game.

KPAC—Port Arthur College, Port Arthur, Texas.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m., CST) to 12:00 midnight, CST, with power of 100 watts on September 29, 1939, in order to broadcast local high school football game.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted special temporary authority for excitation of a single radiator with a power of 100 watts on the frequency of **1170 kc.** for the period August 28, 1939, to September 26, 1939, beginning one hour after sunrise and ending one hour after sunset (August 7 p. m., September 6:30 p. m., CST), for the purpose of making field intensity measurements in connection with the production of a proof of performance report.

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Granted special temporary authority to operate from 5:30 a. m. to 6:30 a. m., EST, on August 27, 1939, for the purpose of broadcasting a speech to be delivered at Tannenberg, Germany, by the head of the German nation.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to rebroadcast on W8XWJ material transmitter from relay station WERO aboard crash boat on Gold Cup Race course during description of Gold Cup Race, 1 to 6 p. m., EST, on September 4.

WJBW—Charles C. Carlson, New Orleans, La.—Continued hearing on renewal of license and modification of license, from September 8 to October 25.

NEW—Lackawanna Broadcasting Co., Inc., Scranton, Pa.—Granted authority to take depositions at Scranton on September 13, in re application for new station to operate on **1370 kc.,** 100 watts, 250 watts LS, now scheduled for hearing on September 25.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of special temporary authorization to operate unlimited time on **1180** kc., using 10 KW, employing DA system after sunset at Portland, Ore. (August, 7:15 p. m.; September, 6:30 p. m., PST), for the period August 31 to September 29.

KEX—Oregonian Publishing Co., Portland, Ore.—To operate unlimited time on **1180 kc.,** using 5 KW power, for the period August 31 and ending not later than September 29.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period August 22 and ending no later than September 20, pending KWLC's compliance with Rule 131.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted special temporary authority to rebroadcast over station WFBR program describing activities of the Fishing Fair at Annapolis, Md., on August 26, between 12:45 and 1 p. m., EST, and August 27, between noon and 12:15 p. m., EST, program to originate in Natl. Guard Plane operating on frequency **4060 kc.**

KHAS—The Nebraska Broadcasting Co., Hastings, Neb.—Granted special temporary authority to conduct site survey for station KHAS, using Collins Type 45-A Transmitter, crystal controlled, 50 watts output, frequency **1200 kc.,** daytime hours, for the period August 28 to September 6.

WNEL—Juan Piza, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining program to be received from International broadcast station W9XAL and W3XAL over Station WNEL for the period September 7 to October 6, 1939.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted extension of special temporary authority to operate from 11 p. m. to 12 p. m., EST, for the period August 31 to September 29, in order to broadcast programs as described in letter of previous date.

WHA—University of Wis., Madison, Wis.—Granted special temporary authority to remain silent September 4, in order to observe legal holiday on Labor Day.

KFRO—Voice of Longview, Longview, Texas.—Granted special temporary authority to operate from local sunset (September, 6:30 p. m., CST), to 11:05 p. m. CST, using 100 watts power, September 4, Special Labor Day Celebration; September 11, 12, 13, 14, 15, 16, Gregg County Free Programs; September 26, Longview vs. Adamson Game; September 29, Longview vs. Port Arthur football game.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted special temporary authority to operate unlimited time during crisis in international situation and as long as international emergency exists but in no event longer than for a period of 10 days.

Unitarian Fellowship for Social Justice, Toledo, Ohio.—Granted special temporary authority to transmit programs by remote wire from WSPD to Station CKLW from 9 to 9:30 p. m., EST, on August 30, September 6, 13 and 20.

WLBL—Board of Regents, University of Wisconsin, Stevens Point, Wis.—Granted special temporary authority to remain silent September 4, in order to observe the legal holiday, Labor Day.

WWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to transmit by wire description of Gold Cup Races to Canadian Broadcasting Corp., Windsor, Ontario, for rebroadcast on Canadian Network stations 1:30 to 2 p. m., and 4:45 to 5:30 p. m., EST, on September 4.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—Granted special temporary authority to operate from 9:30 to 9:45 p. m., EST, August 31, with transmitting equipment and antenna system authorized in outstanding CP, in order to broadcast a special feature acquainting the audience with the time of the formal opening and presenting in dramatic form the part that radio plays in modern affairs.

WQDM—Regan and Bostwick, St. Albans, Vt.—Granted extension of special temporary authority to operate from 8 to 8:30 p. m., EDST, August 31, and from 7 to 8:30 p. m., EDST, September 1 to 8, inclusive, in order that station might complete its commercial broadcast of local baseball games.

WMBI—Moody Bible Institute Radio Station, Chicago, Ill.—Granted motion to dismiss without prejudice application for modification of license to change hours of operation to unlimited.

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Granted motion to dismiss without prejudice applications for renewal and modification of high frequency broadcast station license.

KMAC—W. W. McAllister and Howard W. Davis, d/b as Walmac Co., San Antonio, Texas.—Granted petition to accept written appearance filed August 16 in re Docket No. 5626, application for CP to move transmitter, change frequency and increase time of operation and power.

W2XWC—Kolorama Labs., Inc., Irvington, N. J.—Granted extension of special temporary authority to operate a composite television transmitter to be located in Carlstadt, N. J., for radio television transmission in the **2000-2100 kc.** band, for operation between the hours of 12 midnight and 6 a. m., on a non-interference basis, with power of 500 watts, for test and experimental purposes only, for the period September 5 to October 4.

WGAN—Portland Broadcasting System, Inc., Portland, Me.—Granted motion to dismiss without prejudice application for C. P. to change frequency, power and time of operation.

KRSC—Radio Sales Corp., Seattle, Wash.—Scheduled oral argument for September 28, 1939.

NEW—Vincennes Newspapers, Inc., Vincennes, Ind.—Scheduled oral argument for September 28, 1939.

NEW—Yuba-Sutter Broadcasters, Marysville, Calif.—Scheduled oral argument for September 28, 1939.

NEW—Thumb Broadcasting Co., Brown City, Mich.—Scheduled oral argument for September 28, 1939.

NEW—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—Granted petition to take depositions on September 18 in Las Vegas in re application for C. P. to erect a new station; the words in the order, "or any other disinterested person qualified to administer oaths in the State of Nevada," to be omitted.

WHA—University of Wisconsin, Madison, Wis.—Granted petition to continue hearing on the application for C. P. requesting the facilities of WMAQ, Chicago, from September 11 to November 10, 1939.

KOAC—Oregon State Agricultural School, Corvallis, Ore.—Granted extension of special temporary authority to operate from 9 a. m. to 1 p. m., and from 6 to 10 p. m., PST, during the month of September (instead of unlimited time as licensed), in order to observe regular vacation period.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted extension of special temporary authority to operate simultaneously, non-synchronously, with station KFAB commencing 4:45 a. m., CST, for the period September 8 to September 24, in order to conform to Daylight Saving Time.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—To operate as above except simultaneously, non-synchronously, with station WBBM.

WSUI—State University of Iowa, Iowa City, Iowa.—Granted extension of special temporary authority to reduce hours of operation from unlimited time to a minimum of eight hours daily for the period September 1 to September 23, in order to observe summer vacation.

KTHS—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted special temporary authority to operate unlimited time during international crisis but in no event for a period exceeding 10 days.

WGTM—WGTM, Inc., Wilson, N. C.—Granted special temporary authority to operate unlimited time for a period not to exceed 10 days in order to broadcast events concerning present European crisis.

W1XSL—WDRC, Inc., Hartford, Conn.—Granted modification of C. P. extending completion date from September 9 to November 9, 1939, for developmental broadcast station.

WOED—The Yankee Network, Inc., Boston, Mass.—Granted modification of license for additional power of 250 watts, not requiring new construction in high frequency relay broadcast station.

Amendment of Rule 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.—Continued hearing now scheduled for September 11 until October 16, 1939.

WCOV—Capitol Broadcasting Co., Inc., Montgomery, Ala.—Granted special temporary authority to operate unlimited time for the period ending in no event later than September 9, in order to broadcast during war crisis.

WEJT—National Broadcasting Co., Inc. (area of Washington, D. C.), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

WEJS—National Broadcasting Co., Inc. (area of Washington, D. C.), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

WEJR-WEJJ—National Broadcasting Co., Inc. (area of New York City), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

WEJO—National Broadcasting Co., Inc. (area of Cleveland), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

WEJK—National Broadcasting Co., Inc. (area of Chicago), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

KEJH-KEJI—National Broadcasting Co., Inc. (area of San Francisco), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

KEJD-KEJC—National Broadcasting Co., Inc. (area of Denver), Portable-Mobile.—Granted license to cover C. P. authorizing changes in equipment of relay broadcast station; increase power to 2 watts and use frequencies **31220, 35620, 37020** and **39260 kcs.**

WEJU—National Broadcasting Co., Inc. (area of New York City), Portable-Mobile.—Granted license to cover C. P., to make changes in equipment and decrease power to 25 watts; frequencies **31220, 35620, 37020** and **39260 kc.**

WBZ—Westinghouse E and M Co., Boston, Mass.—Granted C. P. to install new transmitter and DA system for day and night use and move transmitter to proposed site, Newport Road, Hull, Mass.

W8XCN—Onondaga Radio Broadcasting Corp., Portable-Mobile, Syracuse, N. Y.—Granted C. P. to install new equipment and increase power in high frequency relay broadcast station to 20 watts.

WEHH—Columbia Broadcasting System, Inc. (Portable-Mobile), New York City.—Granted C. P. to make changes in equipment and decrease power in high frequency relay broadcast station from 50 to 15 watts.

WEGI-WEGJ—The Baltimore Radio Show, Inc. (Portable-Mobile), Baltimore, Md.—Granted C. P. to make changes in equipment of high frequency relay broadcast station and increase power to 2 watts.

KEHA—The Associated Broadcasters, Inc., San Francisco, Cal. (Portable-Mobile).—Granted license to cover C. P. for new high frequency relay broadcast station; frequencies **33380, 35020, 37620** and **39820 kc.,** 2 watts.

APPLICATIONS FILED AT FCC

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Authority to determine operating power by direct measurement of antenna power.

630 Kilocycles

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Modification of construction permit (B1-P-2369) for new equipment, changes in directional antenna, increase in power, move of transmitter, requesting further changes in equipment and directional antenna for night, increase power from 1 KW, 5 KW-LS to 5 KW day and night, and extend commencement and completion dates to 30 days after grant and 180 days thereafter respectively.

KRGV—KRGV, Inc., Weslaco, Tex.—Modification of license to change frequency from **1260 kc.** to **630 kc.**

710 Kilocycles

NEW—Port Broadcasting Co., Houston, Tex.—Construction permit for a new broadcast station on **710 kc.,** 5 KW, unlimited time, directional antenna day and night.

770 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Construction permit to make changes in transmitting equipment.

940 Kilocycles

WICA—WICA, Inc., Ashtabula, Ohio.—Modification of construction permit (B2-P-2316) for an increase in power and new equipment, requesting further changes in transmitting equipment, and extend commencement and completion dates 60 days after grant and 90 days thereafter.

950 Kilocycles

WRC—National Broadcasting Co., Inc., Washington, D. C.—Construction permit to increase power from 1 KW, 5 KW-LS to 5 KW day and night. Amended: to install directional antenna for night use.

970 Kilocycles

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—License to cover construction permit (B2-P-2268) as modified for installation of new transmitter, antenna and move transmitter from Elkins Park, Pa., to Hill Crest, Pa.

1100 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of license to change frequency from **1100 kc.** to **1530 kc.,** hours of operation from daytime to unlimited, using 1 KW day and night.

1200 Kilocycles

KWBD—W. B. Dennis, Plainview, Texas.—Modification of construction permit (B3-P-2381) for a new station, requesting approval of antenna and approval of studio and transmitter site on Highway 70, east of Court House, 1.2 miles, Plainview, Texas.

WSKB—McComb Broadcasting Corp., McComb, Miss.—License to cover construction permit (B3-P-2002 and B3-MP-784) for new station.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—Modification of license to increase power from 100 watts, 250 watts-LS, to 250 watts day and night.

1210 Kilocycles

WOCB—Harriett M. Alleman and Helen W. MacLellan, d/b as Cape Code Broadcasting Co., near Hyannis, Mass.—Modification of construction permit (B1-P-1140 and B1-MP-681) for new station, requesting extension of required date of completion from 9-24-39 to 1-1-40.

NEW—Louis R. Spiwak and Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—Construction permit for a new broadcast station on **1210 kc.,** 250 watts, unlimited time.

WJIM—WJIM, Inc., Lansing, Mich.—Modification of license to increase power from 100 watts, 250 watts-LS to 250 watts day and night.

WJW—WJW, Inc., Akron, Ohio.—Modification of license to increase power from 100 watts, 250 watts-LS to 250 watts day and night.

WSAY—Brown Radio Service and Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Modification of license to increase power from 100 watts, 250 watts-LS to 250 watts day and night.

1220 Kilocycles

WGNY—Peter Goelet, Newburgh, N. Y.—Voluntary assignment of license from Peter Goelet to Courier Publishing Corp.

1230 Kilocycles

WFBM—WFBM, Inc., Indianapolis, Ind.—Modification of license to change power from 1 KW, 5 KW-LS to 5 KW day and night, using directional antenna at night. Amended: change name to WFBM, Inc.

1240 Kilocycles

KFJZ—Tarrant Broadcasting Co., Fort Worth, Texas.—Construction permit to install new transmitter, increase power from 1 KW to 5 KW.

1310 Kilocycles

WJPR—John R. Pepper, Greenville, Miss.—Modification of construction permit (B3-P-2312) for a new station, requesting approval of antenna and approval of transmitter site at State Road #1, at Levee, Greenville, Miss., and move studio from 808 Harvey St. to Washington and Hinds Sts., Greenville, Miss. Amended: re equipment and give studio site at 110 North Shelby St., Greenville, Miss.

KRBA—Red Lands Broadcasting Assn., Ben T. Wilson, President, Lufkin, Texas.—License to cover construction permit (B3-P-2307) for changes in equipment and increase in power.

KCKN—The KCKN Broadcasting Co., Kansas City, Kans.—License to cover construction permit (B4-P-2440) for installation of new transmitter.

1320 Kilocycles

WADC—Allen T. Simmons, Village of Tallmadge, Ohio.—Construction permit to install directional antenna for day and night use; increase power from 1 KW, 5 KW LS, to 5 KW; move studio and transmitter from Cuyahoga Falls Road, Village of Tallmadge, Ohio, to State Road No. 8, R.F.D., North of Akron, Ohio.

1330 Kilocycles

KMO—KMO, Inc., Tacoma, Wash.—Voluntary assignment of license from KMO, Inc., to Carl E. Haymond.

1360 Kilocycles

KSLM—Oregon Radio, Inc., Salem, Ore.—Modification of license to increase power from 500 watts to 500 watts night, 1 KW day.

1370 Kilocycles

NEW—Chilton Radio Corp., Dallas, Tex.—Construction permit for a new broadcast station on **1370 kc.,** 250 watts, unlimited time. Requests facilities relinquished by station KFJZ.

KTEM—Bell Broadcasting Co., Temple, Tex.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

NEW—V. O. Stamps, Dallas, Tex.—Construction permit for new broadcast station on **1370 kc.,** 250 watts, unlimited time. Requests facilities to be relinquished by station KFJZ.

WIBM—WIBM, Inc., Jackson, Mich.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WMAN—Richland, Inc., Mansfield, Ohio.—Modification of construction permit (B2-P-2121) for approval of antenna, approval of studio site at 140 Park Ave., West, and transmitter site at Longview Ave., 400 feet west of Main St. Rd., Mansfield, Ohio, and installation of new transmitter.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Construction permit to make changes in equipment, increase power from 100 watts to 250 watts day and night, change hours of operation from daytime to unlimited time.

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WDAN—Northwestern Publishing Co., Danville, Ill.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WTMV—Mississippi Valley Broadcasting Co., Inc., East St. Louis, Ill.—Authority to transfer control of corporation from Lester E. Cox to Wm. H. West, Jr., 184 shares common stock.

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Authority to determine operating power by direct measurement of antenna power.

NEW—E. W. Williams, Corbin, Ky.—Construction permit for new broadcast station on **1500 kc.**, 100 watts, unlimited time.

MISCELLANEOUS

NEW—The Louisville Times Co., area of Louisville, Ky.—Construction permit for a new relay broadcast station on **30820, 33740, 35820, 37980 kc.**, 0.5 watts, emission A-3.

NEW—The Louisville Times Co., area of Louisville, Ky.—License to cover above.

NEW—The Louisville Times Co., area of Louisville, Ky.—Construction permit for a new relay broadcast station on **30820, 33740, 35820, 37980 kc.**, 0.5 watts, emission A-3.

NEW—The Louisville Times Co., area of Louisville, Ky.—License to cover above.

KEGN—Don Lee Broadcasting System, area of San Francisco, Calif.—Construction permit to install new equipment.

KADB—Nichols & Warinner, Inc., area of Long Beach, Calif.—Construction permit to install new equipment.

NEW—Bamberger Broadcasting Service, Inc., area of New York, N. Y.—Construction permit for a new high frequency broadcast station, site to be determined in the New York metropolitan area, on the frequency **43400 kc.**, 1 KW, emission Special for frequency modulation.

WEOB—Ashland Broadcasting Co. (area of Ashland, Ky.).—License to cover construction permit (B2-PRE-250) for reinstatement of relay station.

W2XB—General Electric Co., Albany, N. Y.—License to cover construction permit (B1-PVB-11) to request frequency channel **66000-72000 kc.**, and to specify location as being Town of New Scotland, N. Y.

WSLR—World Wide Broadcasting Corp., Boston, Mass.—Construction permit to change present location of transmitter from Boston, Mass., to Hatherly Beach, near Scituate, Mass.

W9XC—Central Broadcasting Co., near Mitchellville, Iowa.—Modification of construction permit (B4-PEX-23) for a new developmental broadcast station on **1000 kc.**, 1 KW, A-3 emission, requesting extension of completion date from 9-18-39 to 12-18-39.

WAIE—Joe L. Smith, Jr., area of Beckley, W. Va.—License to cover construction permit (B2-PRY-178) for new relay broadcast station on **1622, 2150** and **2790 kc.**, power 75 watts, A-3 emission.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

No complaints have been issued by the Commission this week.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Alle-Rhume Remedy Company, Inc., and Block Drug Company, Inc., both of Jersey City, N. J., were ordered to cease representing, directly or by implication, that "Allenru," or any similar preparation, will rid joints or muscles of all uric acid deposits; is compounded from a safe or scientific formula; is free from harmful drugs, or is a remedy or cure for, or has any substantial therapeutic value in the treatment of, rheumatism, sciatica, neuritis, lumbago or neuralgia.

The respondents were further ordered to cease representing that "Allenru" will quickly stop the distress and pain of rheumatism, neuritis, or sciatica caused by excess uric acid or other circulating poisons, or will remove the cause of, or effect a quick relief from, sciatica, neuritis or lumbago.

The order also forbids advertisements which claim that excess uric acid causes or aggravates most cases of rheumatism, or which fail to reveal that the respondents' preparation is not a wholly safe drug to be used by the lay public in self-medication. (3678)

Block Drug Company, Inc.—See Alle-Rhume Remedy Company, Inc.

Lead Pencil Association, Inc.—Thirteen companies manufacturing approximately 75 per cent of the wood-cased lead pencils produced in the United States were ordered to discontinue entering into agreements resulting in unlawful restraint of competition through fixing and maintaining uniform prices for their products, and other practices.

The Lead Pencil Association, Inc., and its president and commissioner, William A. McDermid, 21 East 40th St., New York, and the following pencil manufacturers, twelve of which are members of The Lead Pencil Association, Inc., are named respondents in the order:

The Joseph Dixon Crucible Company, Jersey City, N. J.; The Eberhard Faber Pencil Company, Brooklyn; The American Lead Pencil Company (which withdrew from The Lead Pencil Association, Inc., in June, 1938), Hoboken, N. J.; Eagle Pencil Company, Inc., New York; Richard Best Pencil Company, Irvington, N. J.; Blaisdell Pencil Company, Philadelphia; General Pencil Company, Jersey City, N. J.; Hassenfeld Brothers, Inc., Providence, R. I.; National Pencil Company, Shelbyville, Tenn.; Reliance Pencil Company, Mt. Vernon, N. Y.; Universal Pencil Company, Oakland, Calif.; Red Cedar Pencil Company, Lewisburg, Tenn., and Wallace Pencil Company, St. Louis.

Findings are that The Lead Pencil Institute was formed in May, 1929, its membership comprising practically all of the companies engaged in the wood-cased pencil industry at that time, and that following a price war in 1935 and 1936, and for the purpose of eliminating that condition, the industry in January, 1937, reorganized the Institute and subsequently changed its title to The Lead Pencil Association, Inc., of which the respondent William A. McDermid was the president and commissioner. Further findings are that from about January to November, 1937, the manufacturers, acting through The Lead Pencil Association, Inc., or among themselves, carried out agreements and understandings resulting in an unlawful restraint of competition in the industry.

Under the order, the respondents are to cease fixing or maintaining uniform prices, terms or conditions for the sale of comparable wood-cased lead pencils; changing simultaneously the prices at which such pencils are to be sold; adopting, fixing or determining uniform schedules of quantity or annual cumulative discounts on comparable wood-cased lead pencils; fixing or determining uniform prices of lead pencils known as "blanks" (pencils on which neither the name or any brand of the manufacturer appears), or offering uniform bids on comparable wood-cased pencils to prospective purchasers. (3643)

Puritan Undergarment Corp., 950 Hart St., Brooklyn, N. Y., was ordered to discontinue misleading representations in the sale of women's wearing apparel.

Under the order, the respondent is to cease representing that its products are composed of fibers or materials other than those of which they are actually composed, or that any garment or fabric has a stated percentage of wool unless that is a fact.

The respondent was also ordered to cease advertising or selling wearing apparel or fabrics composed in whole or in part of rayon without clearly disclosing that fact, and when such garments or fabrics are composed in part of rayon and in part of other fibers or materials, such fibers or materials, including rayon, shall be named in the order of their predominance by weight, beginning with the largest single constituent. (3810)

Saks & Co., trading as Saks at 34th Street, Broadway and 34th St., New York, was ordered to discontinue misleading representations in the sale of perfumes and other toilet preparations.

Under the order, the respondent is to cease representing through the use of the term "Famous in France," or in any other manner, that perfumes or other toilet preparations which are made or compounded in the United States are made or compounded in France or in any other foreign country, provided that the country of origin of the various ingredients may be stated when immediately accompanied with an explanation that such products are made or compounded in the United States.

The respondent was further ordered to cease using the term "Renaud's Perfume—Famous in France," or any other terms indicative of French origin, or any French or other foreign words or terms, as brand or trade names for perfumes, or other toilet preparations, made or compounded in the United States, without clearly and conspicuously stating that such products are made or compounded in the United States. (3298)

Sifers Candy Company—Samuel I. Sifers, trading as Sifers Candy Company, Iola, Kans., was ordered to discontinue the use of lottery methods in connection with the sale and distribution of candy to ultimate consumers.

Under the order, the respondent is to discontinue selling and distributing candy or other merchandise so packed and assembled that sales to the public may be made by means of a lottery device, or supplying dealers with lottery devices which may be used in the sale of candy or other merchandise to the public.

The order also prohibits the respondent from supplying dealers with lottery devices, either with assortments of candy or other merchandise, or separately, such devices to be used in selling or distributing the candy or other merchandise to the public. (3311)

Simmons Company, New York, manufacturer of metal beds, mattresses and allied products, was ordered to discontinue unlawful price discriminations in violation of the Robinson-Patman Act. This company sold approximately $24,600,000 worth of its products in 1938.

The order specifically prohibited price discrimination between different retailer purchasers of its products of like grade and quality paying the cumulative discounts of the "Simmons Plan" under which discounts of 3½ per cent were paid on purchases of $75,000; 4 per cent on purchases of $100,000; 4½ per cent on purchases of $150,000; and 5 per cent on purchases of $200,000 and more. No discount was paid on purchases of less than $50,000.

Discriminations were also prohibited through payment to customers, whether individuals, central organizations or syndicate heads, of any cumulative or retroactive quantity discounts either under the Simmons Plan or any similar plan or method making provision for granting of cumulative or retroactive quantity discounts.

It was found that under the respondent's discount plan aggregate purchases of a customer during a calendar year not only determined the rate of discount, but the rate so determined was retroactively applied to all purchases made during such year, even to those purchases in the no-discount zone. (3840)

Sprague-Kitchen & Company—Mary Eloise Gauss, trading as Sprague-Kitchen & Co., 4254 North Hermitage Ave., Chicago, was ordered to discontinue misleading representations in the sale of a cosmetic preparation for the scalp and hair designated "Graolene".

The order prohibits representations in advertisements that "Graolene," or any similar preparation, is not a dye or is other than a dye; will cause gray hair to change color without dyeing the hair; will restore the original or natural color to gray hair; will supply to the hair shaft the materials in which gray hair is deficient, or will cause the scalp, the hair or the roots of the hair to be normal or healthy. (3821)

Sumlak Company, Cincinnati, Ohio, engaged in the sale of "Sumlakia," a compound found to contain various bromides, was ordered to discontinue advertising, directly or by implication, that their preparation is a cure or remedy or a competent treatment for epilepsy, or that it is safe for use. The respondent was further ordered to cease the dissemination of advertisements which fail to reveal that the long continued or excessive use of the preparation may cause serious injury to the health of the user. (3828)

Williams and Wilkins Company, Mount Royal and Guilford Avenues, Baltimore, have been ordered to discontinue violation of the Robinson-Patman Act through price discrimination in the sale of medical and scientific books.

Findings of the Commission are that, by granting price discounts ranging from 20 per cent to 35 per cent, the respondent discriminated in price between different purchasers buying the same books for resale to retail dealers or ultimate users in the same area, thus enabling some purchasers to buy these books at lower prices than their competitors.

Under the order, the respondent is to cease discriminating in price between competing purchasers for resale of its medical and scientific books as related in the findings, or by granting or allowing differing discounts, the effect of which may be to lessen competition or tend to create a monopoly, or destroy or prevent competition with any customer receiving the benefit of the discrimination, except where such discount makes only due allowance for differences in the cost of manufacture, sale or delivery resulting from differing methods or quantities in which such books are sold. (3844)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

Banker Pen Company—See James Kelly Fountain Pen Company.

J. Bennett, Inc.—See A. Cohen & Sons Corp.

A. Cohen & Sons Corp.—Two companies engaged in the wholesaling of novelty goods and glassware, including glass ash trays, entered into stipulations to discontinue using the word "cut", alone or in connection with any other words, so as to imply that the product referred to is cut by hand, when such is not a fact. The respondents are A. Cohen & Sons Corporation, 584 Broadway, New York, and J. Bennett, Incorporated, 360 Furman St., Brooklyn, N. Y. (2513-2516)

Louis Eckert Brewing Company, 666 Gibbons St., Los Angeles, entered into a stipulation to discontinue misleading representations in the sale of beer.

According to the stipulation, the respondent will cease representing that quality beer cannot be made and sold in large quantities or that its beer products are all brewed under the watchful eye, skillful hand, or personal supervision of Louis Eckert, president and brewmaster of the respondent company, when such are not the facts. (2510)

James Kelly Fountain Pen Company—James Kelly, trading as James Kelly Fountain Pen Company, and as The Banker Pen Company, 487 Broadway, New York, entered into a stipulation to discontinue misleading representations in the sale of fountain pens.

The respondent stipulated that he will cease using the words "Durium Pointed" or other expressions which imply that his pen points are tipped with any purported substance, fanciful or real, when such is not a fact. It was further agreed that the respondent will discontinue use of the designation "14 K" on pen points, with or without the words "Gold Plate", when the gold content is not actually of 14 carat fineness, or in any way convey the impression that the pen point is of 14 carat solid gold, when such is not a fact. (2508)

Perry Jett LeRoy, Jackson Heights, Long Island, N. Y., in connection with the sale of "LeRoy's Easy Piano Lessons", stipulated that he will cease representing that his sale offer is either "limited" or must be accepted "immediately" or is "for a short time only" or is "positively your last opportunity" to procure his course for $1, when such is not a fact; or that the customary price for the course is limited or special, or that it will not be available in the near future, unless orders thereafter received at the price advertised are refused and the money returned to the senders.

LeRoy also agreed to cease representing that any person without regard to aptitude or circumstance, can, by taking his course, play the piano within five weeks or any other specified time "as he (LeRoy) plays"; or unreservedly that within such or any comparable time all those sending for the course will be gracefully playing the tunes they love. The respondent also agreed to discontinue claims that "thousands", or any other impressive and unverified number, have "learned to play" the piano through the aid of his course. (2514)

Master Electric Company—In a stipulation entered into, Master Electric Company, Dayton, Ohio, agreed to discontinue misleading representations in the sale of electric fans.

The respondent stipulated that it will cease using the word "rubber" or any other words connoting rubber, as descriptive of the blades of its products which are not composed of rubber, and will discontinue using the word "rubber" in any way as to imply that the blades of such products are made wholly of rubber, when such is not a fact. The stipulation provides that if the blades are composed in substantial part of rubber and in part of some other material, and the word "rubber" is used to describe the rubber part, then that word shall be accompanied by other words printed in equally conspicuous type so as to indicate clearly that the blades are composed in part of some other material. (2512)

New England Ribbon Mills—Louis Segal, trading as New England Ribbon Mills, Boston, entered into a stipulation in which he agreed to discontinue using the word "Mills" as part of his trade name, or in any other manner implying that he makes the products offered for sale, or that he actually owns and operates or controls the mill or factory in which his products are manufactured, when such is not a fact. (2511)

Jacob Ries Bottling Works, Inc., Shakopee, Minn., entered into a stipulation in which it agreed to cease representing either directly or by implication that "Sparkling Rock Spring Water," or any similar products, will prevent, counteract or otherwise effectively avoid or eliminate an excessive acid condition in the system resulting from the use of liquor. (2509)

Ruth Hosiery Mills, Inc., Durham, N. C., entered into a stipulation to discontinue misleading representations in the sale of hosiery.

Under the stipulation, the respondent will cease using the term "Rayon and Silk" as purportedly descriptive of any product not composed throughout of such fibers, or as descriptive of hosiery the top, heel and toe of which are composed of other materials. The stipulation provides that if silk, rayon or other fiber is present in less than a substantial amount or in an amount not exceeding 5 per cent by weight of the product, the name of such fiber shall be accompanied by the percentage in which it is present, or when confined to a decorative stripe shall be designated as being contained in such decoration, as, for example, "Rayon with decorative silk stripe." If the boot or leg is properly represented as rayon with decorative silk stripe but the top, heel and toe are composed of other materials, then such designation shall be immediately accompanied in equally conspicuous type by disclosure of the fiber content of the top, heel and toe.

The respondent will also cease advertising, branding, labeling or selling any product composed in whole or in part of rayon or in part of silk, and other kinds of fiber or substances, unless full and nondeceptive disclosure of the fiber and other content of such product is made by clearly designating and naming each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber which is present in less than a substantial amount, or in any case less than 5 per cent, as, for example, "Cotton and Rayon," when the product is composed of cotton and rayon throughout, with the amount of cotton at least equal to or greater than the proportion of rayon present. (2517)

United Civil Service Training Bureau, Portland, Ore., in connection with the sale of its correspondence school courses intended to prepare students for United States Civil Service examinations, agreed to cease using the words "United," "Civil Service," "Bureaus" or "Bureau" as a part of its corporate or trade name, or using these words or any other representations so as to imply any connection with the Civil Service Commission or the United States Government. (2515)

FCC Assignments For September

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF September
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	Commissioner Thad H. Brown
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	Commissioner Paul A. Walker
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	Commissioner Norman S. Case
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	Commissioner T. A. M. Craven
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	Commissioner George Henry Payne
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	Commissioner Frederick I. Thompson
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	**Secretary** **T. J. Slowie**
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location."	Chief Engineer Ewell K. Jett

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 36, September 8, 1939

The War

President Roosevelt has let it be known that he wants no censorship of press or radio in this country unless and until America goes to war.

However, the FCC has discussed "the problem of radio broadcasting in this country in its relation to the European situation" and has appointed a special committee to give that problem further study.

It is also known that the Administration is keeping close tab on how the broadcasting industry handles its war programs during the period of America's neutrality, and will attempt to judge what effect war broadcasts have on the American public.

James L. Fly, new FCC chairman, told reporters the day he took office that the commission would do everything it could to prevent unneutral statements on the air, but there has been no elaboration of this statement.

Above are the facts. Rumors come at a dime a dozen.

In making a statement for the President, Wednesday, the White House gave it as his view that press censorship might be unnecessary even in event of war, but that radio had yet to prove its quality in a period of national emergency.

Speaking for the President at his meeting with newspaper men, Stephen T. Early,

(Continued on page 3700)

Convention September 15

The special NAB convention will be held, as scheduled, at the Palmer House, Chicago, September 15 at 10 a. m.

War problems led some members to suggest postponement, but Neville Miller canvassed the board of directors and found the overwhelming majority in favor of holding the meeting as planned.

Nearly all the directors expressed the opinion that the industry's music problem was of such importance that there should be no delay in a united attempt at solution.

Undoubtedly the War will figure in the discussions of the board of directors which is to meet September 13 at the Palmer House. IRNA and the Independents are to meet at the same place September 14.

THE WAR

(Continued from page 3699)

White House secretary, described the press as a veteran of many campaigns which had performed well in war and peace as well as in periods of proclaimed neutrality.

Radio, on the other hand, he went on, was a "rookie" which had yet to prove its capacity for self-discipline without government control over its dissemination of news.

Mr. Early's discussion of the relative position of the press and radio in the news field was provoked by a question as to whether the President was considering any implementation of his drive against alien propaganda and espionage. Mr. Roosevelt said Tuesday that the government was determined to put down communistic and pro-dictatorship propaganda and to prevent this country's use as a center for clearing information to belligerent nations.

Mr. Early replied that there were various plans for implementing counter-espionage and anti-propaganda activities in times of peace and of war. In addition, he said, the general staff of the army had perfected plans for use in time of a national emergency, which all hoped would never come.

Then Mr. Early said he was satisfied that for the present the President did not want censorship of either the press or radio and hoped somehow to establish a "parity" between the two.

It was sometime later in the day that he explained in answer to further questions that, by "for the present" he meant there would be no censorship unless America went to war.

How the President proposed to bring about press censorship in event of war Mr. Early did not explain. There is not now any legal authority for it and the secretary indicated his own belief that the press was capable of controlling itself in such emergencies.

It was recalled by observers that the press itself invoked a "voluntary censorship" on its handling of official government information during the World War after Postmaster General Burleson failed to obtain legislation from Congress intended to accomplish the same result. The censorship consisting largely of clearing all official information through a committee on public information established for the purpose.

Among plans already in existence for controlling the handling of news in war time, Mr. Early mentioned that the Communications Act contained a provision authorizing the Federal Government to take over radio broadcasting facilities in such periods. He pointed out, however, that such control did not extend to peace times.

Then Mr. Early went on to say that there was a general feeling throughout the government that radio, because of its youth, was coming into a period in history which is new to it.

He added that if radio proved itself to be a "good child" and was well-mannered and showed that it had been well reared, it would be left to move along on its own. On the other hand, if radio proved itself to be a "bad child," the disposition would be to teach it some manners—to correct it so that it would behave itself, the secretary explained.

Meanwhile the President was said to be somewhat concerned about the position of international short-wave radio broadcasting from this country and its potential effect on the nation's neutral status.

The thought has been, according to Mr. Early, that both standard and amateur short-wave radio stations were in a position to give aid and comfort to belligerents with obvious adverse effect on America's neutral stand.

The government, he said, holds that all short-wave broadcasters should be increasingly careful of their operations and that the government itself should watch their activity more closely than ever before.

The government was particularly anxious to prevent their use as clearing center for information to warring countries, he explained.

This declaration was borne out by FCC experts who said that the problem of apprehending small radio sets broadcasting information about ship or merchandise movements, for example, would present serious difficulties. Extensive monitoring of the ether waves they indicated, would be necessary.

Mr. Early was asked in what way the radio in the new field might manifest its "bad manners." Without answering the question directly, he pointed out that the press had gone through wars and peace times and through periods of proclaimed neutrality by the United States whereas the radio had not.

The FCC committee of three members to study broadcasting war problems is composed of Chairman Fly and Commissioners Brown and Craven.

Mr. Fly stated, when he took office, that any plans for reorganization of the commission will only be put into effect after careful consideration and these changes, if any are made, are matters for the full commission. The Chairman said he would not take any impulsive action.

Frank R. McNinch, former Chairman, who attended the press conference, stated that he believed that the commission's staff will be able to report to the committee the monopoly network study within the next three weeks. He said also that the Interdepartmental Radio Committee of which he is Chairman, will make a report to the President within the next ten days.

Mr. Fly was asked for his attitude on newspaper ownership and he said that he doesn't assume to make any statement on newspaper ownership or any other basic issues until he has made a careful survey of the subjects. He said he was very much impressed with the part the broadcasters are playing in the present war crisis.

Mr. Fly took his oath of office at the Commission on September 1, at which time he announced he had received a letter from the President designating him Chairman of the commission to succeed Mr. McNinch. A number of members of the commission attended the ceremony. Attorney General Murphy announced last week that Mr. McNinch had been retained by the Department of Justice as a communications expert in the Western Union and other cases.

Radio Neutrality

Promulgation of the Neutrality Proclamation by President Roosevelt last Tuesday has quite naturally raised in the minds of broadcasters the question "What is radio neutrality?"

In considering the broad implications of the Neutrality Proclamation in the broadcasting field, Headquarters feels that the caution exercised by broadcasters should go to points even beyond those covered by the Controversial Public Questions and the News sections of the new NAB Code.

Though it is felt every broadcaster has endeavored to broadcast factual news, free from bias or editorial opinion, even before the Code was adopted last July, Headquarters would like to point out that the *method* and *manner* in which news is handled during the present situation is being as carefully scrutinized as is the content of the news broadcast itself.

While it should not be necessary for any newscaster or announcer to change his style of delivery, it should be pointed out that all news broadcasts, especially news "flashes" interrupting another program already on the air, should be handled with the greatest degree of restraint.

News matter which is obviously sensational, though thoroughly accredited to a responsible source, should be carefully checked and confirmed as far as possible before it is broadcast. Statements in conflict coming from censored belligerent sources should be paired and notice to the public should be given that all news from belligerent countries has passed under the blue pencil of the government censor before becoming available to American listeners.

Developmental Broadcast Stations	3703

Though President Roosevelt stated that the declared neutrality of the United States did not deprive the right of the individual to his own opinion, broadcasters face a difficult and complex problem in alloting time to speakers. In general, Headquarters feels that the Public Controversial plank of the new Code is a safe guidepost for members to follow. While the Code is not yet in effect (the effective date is to be announced by the NAB Board at its meeting next week), it will be recalled that the Code bars all discussion of public controversial matter from paid time (except political—during a political campaign) and requires that time for such discussions shall "be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy."

In pointing out the seriousness and complexity of the problem of radio neutrality, Headquarters would like to quote two paragraphs from a recent column by Dorothy Thompson published this week:

"It would seem essential that while we are considering means of cushioning this country against the economic shock of war, and reconsidering whether the existing neutrality legislation is actually in the best interests of our neutrality, we should also have a policy adopted regarding propaganda, and particularly regarding propaganda on the air.

"The spoken word is provably far more inflammatory than the written word. The human voice is a more potent conveyor of emotion than is the printed page; it is less likely to appeal to reason; it is more capable of being misunderstood; from time immemorial it has been used to sway and control masses, and this possibility has been incalculably augmented by the radio and the power of reaching millions."

Headquarters is aware of the delicate problem of station management and supervision raised by the war period. It is closely following each development on the Washington front and within the industry so as to be in a position to advise members when unforeseen problems arise. A fuller discussion of the matter will be made at the convention next week.

Free Offers

American Express Company, through the Travel Radio Service, has recently offered member stations a series of 78 fifteen minute travel scripts, available "free of charge" if station uses credit line.

Ringling Brothers-Barnum & Bailey Circus is continuing its efforts to get free time by offering station managers passes to the circus in return for broadcasting of one or more 15-minute "educational" programs about circus life, etc.

Headquarters has advised the above companies that NAB policy forbids the granting of free time for such obviously commercial purposes.

TOM HAFFEY

WGAR, Cleveland, wants to know the whereabouts of Tom Haffey.

PERFORMERS' RIGHTS

The International Labour Office has issued Report A on a proposal to adopt an international agreement on the rights of performers in broadcasting, television and recording, to be considered at next year's June conference in Geneva.

Copies of the report are on sale at the International Labour Office, 734 Jackson Place, Washington, D. C.

The ILO is questioning the United States and all other member governments as to their opinion on giving performers now-disputed rights in this field.

The NAB is following the situation carefully and will report important developments.

C. C. I. R. MEETINGS

Meetings of the Conference Committee, under the Chairmanship of Dr. J. H. Dellinger, preparing for United States participation in the Fifth Meeting of the International Radio Consulting Committee (C. C. I. R.), to be convened at Stockholm, Sweden, about June 25, 1940, are to be held in Room 474, Department of State, on September 11 and 12.

The reports of the several subcommittees studying specified questions in which the United States is a collaborating administration, will be examined by the Conference Committee for final approval before transmission to the Bern Bureau and to foreign centralizing and collaborating administrations. The meeting will be open to any one interested in the deliberations.

DOMINICAN REPUBLIC, BRAZIL RATIFY AGREEMENTS

The State Department has issued the following announcements relative to telecommunications:

North American Regional Broadcasting Agreement

Dominican Republic

The American Legation at Ciudad Trujillo transmitted to the Department with a despatch dated July 26, 1939, a copy of the *Official Gazette* of July 8, 1939 (No. 5332), which contains the text of Resolution No. 135, promulgated by the President of the Dominican Republic on June 27, 1939, by which the Dominican Congress approves the ratification of the North American Regional Broadcasting Agreement signed at Habana on December 13, 1937. According to the information of the Department the countries which have deposited their instruments of ratification of this agreement are the United States, Canada, Cuba, and Haiti.

This agreement has not yet entered into force.

Inter-American Arrangement Concerning Radiocommunications

Dominican Republic

The *Official Gazette* of July 8, 1939 (No. 5332), transmitted to the Department by the American Legation at Ciudad Trujillo under date of July 26, 1939, publishes the text of Resolution No. 136 of the Dominican Congress promulgated by the President of the Dominican Republic on June 27, 1939, approving the ratification of the Inter-American Arrangement Concerning Radiocommunications signed at Habana on December 13, 1937. According to the information of the Department the countries which have deposited instruments of ratification of this arrangement are the United States, Canada, Chile, Haiti, Mexico, Panama, and Peru.

Inter-American Radiocommunications Convention (Treaty Series No. 938)

Brazil

The American Embassy at Rio de Janeiro transmitted to the Department with a despatch dated August 4, 1939, a copy of Decree Law No. 1435, of July 20, 1939, published in the *Diario Oficial* of July 27, 1939, by which the Brazilian Government approves, with reservations, the Inter-American Radiocommunications Convention signed at Habana on December 13, 1937, and annexes.

According to the information of the Department the countries which have deposited their instruments of ratification of this convention are the United States of America, Canada, Cuba, Dominican Republic, Haiti, Mexico, Panama, and Peru.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, September 11. They are subject to change.

Monday, September 11

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.**, 250 watts LS, limited time.

Wednesday, September 13

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—C. P., special experimental authorization, **1420 kc.**, 250 watts night, 1:05 to 2:15 a. m., CST.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—C. P., **1270 kc.**, 1 KW, unlimited time (DA night). Present assignment: **1420 kc.**, 100 watts, 250 watts LS, unlimited time.

Thursday, September 14

Oral Argument Before the Commission

Report No. B-8:

WPG—Greater New York Broadcasting Corp., Atlantic City, N. J. (proposed studio location, New York, N. Y.) (proposed transmitter location, Kearney, N. J.).—C. P., **1100 kc.**, 5 KW, unlimited time (requests facilities of WOV and WBIL). Present assignment: **1100 kc.**, 5 KW, specified hours (WBIL).

WPG—City of Atlantic City (Assignor), Greater New York Broadcasting Corp (Assignee), Atlantic City, N. J.—Voluntary assignment of license, **1100 kc.**, 5 KW, specified hours (WBIL).

Report No. B-28:

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—C. P., **1240 kc.**, 1 KW, unlimited time (DA night). Present assignment: **1310 kc.**, 100 watts, 250 watts LS, unlimited time.

Report No. B-31:

NEW—The Moody Bible Institute Radio Station, Chicago, Ill.—C. P., **41300 kc.**, 100 watts, emission A-3, unlimited time.

Friday, September 15

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, **25950 kc.**, 1000 watts, 1000 watts LS, emission A-3, unlimited, according to Rule 983 (a).

W6XRE—Ben S. McGlashan, Los Angeles, Calif.—Renewal of license, **88000, 120000, 240000** and **500000 kc.**, 500 watts, 500 watts LS, emission A-3, unlimited, according to Rule 983 (a).

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings and oral arguments. They are subject to change.

September 28

Oral Argument Before the Commission

Report No. B-52:

KRSC—Radio Sales Corp., Seattle, Wash.—C. P., **1120 kc.**, 1 KW, unlimited time. Present assignment: **1120 kc.**, 250 watts, unlimited time.

Report No. B-65:

NEW—Vincennes Newspapers, Inc., Vincennes, Ind.—C. P., **1420 kc.**, 100 watts, unlimited time.

Report No. B-70:

NEW—Yuba-Sutter Broadcasters, Marysville, Calif.—C. P., **1320 kc.**, 250 watts, unlimited time (DA night).

Report No. B-71:

NEW—Thumb Broadcasting Co., Brown City, Mich.—C. P., **880 kc.**, 1 KW, daytime.

October 5

Oral Argument Before the Commission

Report No. B-62:

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—C. P., **1120 kc.**, 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1370 kc.**, 100 watts, 250 watts LS, unlimited time.

Report No. B-68:

WGRC—Northside Broadcasting Corp., New Albany, Ind.—C. P., **880 kc.**, 250 watts, unlimited time. Present assignment: **1370 kc.**, 250 watts, daytime.

NEW—The Gateway Broadcasting Co., Louisville, Ky.—C. P., **880 kc.**, 500 watts, unlimited time (DA day and night).

Report No. B-73:

NEW—WJMS, Inc., Ashland, Wis.—C. P., **1370 kc.**, 100 watts, unlimited time.

October 16

Hearing Before the Committee

To Be Held in Room 1411

In the Matter of Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.

November 8

NEW—The Gazette Co., Cedar Rapids, Iowa.—C. P., **1420 kc.,** 100 watts, unlimited time.

November 14

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Company, San Antonio, Tex.—C. P., **930 kc.,** 1 KW, unlimited time. Present assignment: **1370 kc.,** 100 watts, 250 watts LS, shares KONO.

WSBT—The South Bend Tribune, South Bend, Ind.—C. P., **930 kc.,** 500 watts, unlimited time (DA day and night). Present assignment: **1360 kc.,** 500 watts, shares WGES.

November 27

WINS—Hearst Radio, Inc. (Assignor), Metropolitan Broadcasting Corp. (Assignee), New York, N. Y.—Voluntary assignment of license, **1180 kc.,** 1 KW, limited time (KEX and KOB).

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—Worcester Telegram Publishing Co., Inc., Holden, Mass.—Granted C. P. for new high frequency broadcast station to operate on frequencies **43400 kc.,** conditionally; 1 KW.

WJMS—WJMS, Inc., Ironwood, Mich.—Granted C. P. to make changes in equipment and increase day and night power from 100 to 250 watts.

NEW—Stromberg-Carlson Tel. Mfg. Co., Rochester, N. Y.—Granted C. P. for new high frequency broadcast station to operate on **43200 kc.,** conditionally; 1 KW.

WSYB—Philip Weiss Music Co., Rutland, Vt.—Granted C. P. to make changes in equipment and increase power from 100 watts to 250 watts, unlimited time.

NEW—The Journal Company (The Milwaukee Journal).—Granted C. P. for new high frequency broadcast station to operate on frequency **42600 kc.,** with 1 KW power.

National Broadcasting Co., New York City.—Granted extension of authority to transmit recorded programs to all broadcast stations in Canada licensed to operate by the Canadian Government, for a period of 1 year from September 15.

NEW—Bell Tel. Labs., Inc., Whippany, N. J.—Granted C. P. for new developmental broadcast station to operate on frequency **43200 kc.,** conditionally; 5 KW power.

NEW—Allen B. DuMont Labs., Inc. (Passiac, N. J., area of USA), Portable-Mobile.—Granted C. P. for new portable-mobile television relay station to be operated in the New York area on an experimental basis; frequencies **156000-162000 kc.,** auran and visual power 50 watts.

W1XEH—The Travelers Broadcasting Corp., Avon, Conn.—Granted license for a new high frequency broadcast station to use frequency **42460 kc.,** 150 watts.

W6XDU—Don Lee Broadcasting System, Los Angeles, Portable-Mobile.—Granted modification of C. P. to make changes in equipment, reduce power from 100 watts to 6.5 watts, and change frequencies to **321000-327000 kc.**

The following stations were granted modification of licenses to increase operating power to 250 watts, unlimited time:

WCHV, Charlottesville, Va.; WRAL, Raleigh, N. C.; WRGA, Rome, Ga.; WSLI, Jackson, Miss.; KRMD, Shreveport, La.; KMLB, Monroe, La.; WJBC, Bloomington, Ill.; KLUF, Galveston, Tex.; WEOA, Evansville, Ind.; KPQ, Wenatchee, Wash.; WDNC, Durham, N. C.; WGNC, Gastonia, N. C.; WSIX, Nashville, Tenn.; WSTP, Salisbury, N. C.; KCMC, Texarkana, Tex.; WHLB, Virginia, Minn.; WMFG, Hibbing, Minn.; WSAU, Wausau, Wis.; WTRC, Elkhart, Ind.; KSRO, Santa Rosa, Calif.; WIL, St. Louis, Mo.; WTMA, Charleston, S. C.; WKBZ, Muskegon, Mich.; WEED, Rocky Mount, N. C.; WAML, Laurel, Miss.; KBND, Bend, Ore.; KVEC, San Luis Obispo, Calif.; KPLC, Lake Charles, La.; WMBH, Joplin, Mo.; WCAX, Burlington, Vt.; WCBM, Baltimore, Md.; KOCY, Oklahoma City, Okla.; WAYX, Waycross, Ga.; WEBQ, Harrisburg, Ill.; WNOE, New Orleans, La.; WBBZ, Ponca City, Okla.; KELO, Sioux Falls, S. Dak.; WIBU, Poynette, Wis.; KXRO, Aberdeen, Wash.; KPFA, Helena, Mont.; KWYO, Sheridan, Wyo.; WABY, Albany, N. Y.; WNBF, Binghamton, N. Y.; WBEO, Marquette, Mich.; WEST, Easton, Pa.; WGH, Newport News, Va.; WATL, Atlanta, Ga.; WMBS, Uniontown, Pa.; WSNJ, Bridgeton, N. J.; WPAX, Thomasville, Ga.; KOBH, Rapid City, S. Dak.; WHFC, Cicero, Ill.; KFAM, St. Cloud, Minn.; KGHI, Little Rock, Ark.; KGKL, San Angelo, Tex.; KVOX, Moorhead, Minn.; WTMV, E. St. Louis, Ill.; KRBC, Abilene, Tex.; WMIN, St. Paul, Minn.; KRE, Berkeley, Calif.; WIBX, Utica, N. Y.; WBRE, Wilkes-Barre, Pa.; WDAS, Philadelphia, Pa.; WMBO, Auburn, N. Y.; WCPO, Cincinnati, Ohio; WRBL, Columbus, Ga.; WJNO, West Palm Beach, Fla.; WRDW, Augusta, Ga.; KWOS, Jefferson City, Mo.; KCKN, Kansas City, Mo.

NEW—Westinghouse E. and M. Co., Boston, Mass.—Granted C. P. for new high frequency broadcast station to operate on **42600 kc.,** conditionally, 1 KW.

NEW—National Broadcasting Co., Inc., New York City.—Granted C. P. for new high frequency broadcast station to operate on **42600 kc.,** conditionally, 1 KW.

NEW—The Cincinnati Times-Star Company, Cincinnati, Ohio.—Granted C. P. for new high frequency facsimile broadcast station on an experimental basis to operate on frequency **25175 kc.,** conditionally, 100 watts.

Columbia Broadcasting System, Inc., New York City.—Granted extension of authority to transmit programs to CFRB and CKAC and other stations under the control of the Canadian Broadcasting Corp.

National Broadcasting Co., Inc., New York City.—Granted extension of authority to transmit programs to stations CFCF, CBL and the Canadian Broadcasting Corp., for period of 1 year.

KIT—Carl E. Haymond, Yakima, Wash.—Granted modification of license to increase night power to 1 KW.

DESIGNATED FOR HEARING

The following application has been designated for hearing by the Commission. Dates for the hearing have not yet been set.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Application for C. P. for new station, already in hearing docket, amended so as to request operation on frequency **680 kc.,** 250 watts, daytime only. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

RENEWAL OF LICENSES

The following broadcast stations were granted renewal of licenses:

KFBB, Great Falls, Mont.; KFIO, Spokane, Wash.; KFJZ, Fort Worth, Tex.; KFKU, Lawrence, Kans.; KGCU, Mandan, N. Dak.; KGGF, Coffeyville, Kans.; KGVO, Missoula, Mont.; KIT, Yakima, Wash.; KLS, Oakland, Calif.; KFWB, Los Angeles, Calif.; KMBC and auxiliary, Kansas City, Mo.; KOIL, Omaha, Nebr.; KOIN, Portland, Ore.; KOL, Seattle, Wash.; KPAC, Port Arthur, Tex.; KQW, San Jose, Calif.; KTFI, Twin Falls, Idaho; KTMS, Santa Barbara, Calif.; KTW, Seattle, Wash.; KUOA, Siloam Springs, Ark.; KWSC, Pullman, Wash.; KXOK, St. Louis, Mo.; KMA, Shenandoah, Iowa; WAAT, Jersey City, N. J.; WATR, Waterbury, Conn.; WAVE, Louisville, Ky.; WBRC, Birmingham, Ala.; WCAD, Canton, N. Y.; WCAE and auxiliary, Pittsburgh, Pa.; WCOP, Boston, Mass.; WDAE, Tampa, Fla.

The following applications for renewal of relay broadcast stations were granted for a period of one year:

WOEB, Agricultural Broadcasting Co.; KIEO, Airfan Radio Corp., Ltd.; KAIH and KAXA, Earle C. Anthony, Inc.; WATA, Ashland Broadcasting Co.; WBAM, WBAO and WBAQ, Bamberger Broadcasting Service, Inc.; KAXD, A. H. Belo Corp.; KNED, Carter Publications, Inc.; KABJ, Central States Broadcasting Co.; WAHJ and WBGN, The Champaign News-Gazette, Inc.; WADA, Charleston Broadcasting Co.; WASJ, WNYK, WNYL, WNYN and

WNYO, City of New York, Municipal Broadcasting System; KAAC, KAAZ, WAAU, WAEW, WCBN, WIEK, Columbia Broadcasting System, Inc.; WLWA and WLWB, The Crosley Corp.; WAUT, Evansville on the Air, Inc.; WAAS, WENM, WKFB, The Evening News Assn.; KABB, KABD and KAOG, Don Lee Broadcasting System; KIEL, Fisher's Blend Station, Inc.; WGHB and WTHB, Florida West Coast Broadcasting Co., Inc.; WOEG, General Electric Co.; WQER and WQET, Georgia School of Technology; KIIS, Harris County Broadcast Co.; WAXE, Havens & Martin, Inc.; WBGL, Head of the Lakes Broadcasting Co.; KAGM, Hirsch Battery and Radio Co.; WATB, Indianapolis Broadcasting, Inc.; KILB, International Broadcasting Corp.; WMFT, Isle of Dreams Broadcasting Corp.; WAHB and WJER, The Journal Company (The Milwaukee Journal); KDEA, The KANS Broadcasting Co.; KIIH, KFAB Broadcasting Co.; KAOE and KAOF, KFNF, Inc.; KAXY, KGKO Broadcasting Co.; KAAO and KAAR, KLZ Broadcasting Co.; WIEH, Knickerbocker Broadcasting Co., Inc.; KAAJ, KVOX Broadcasting Co.; WAXJ, Lamar Life Ins. Co.; WAIC, The Louisville Times Co.; KSCR, McClatchy Broadcasting Co.; KABG, Ben S. McGlashan; WAAO, Arthur Malcolm McGregor and Dorothy Charlotte McGregor; WAUC, Matheson Radio Co., Inc.; KEMA, May Seed and Nursery Co.; WIEF, Miami Broadcasting Co.; WAFY, Minn. O'Brien; WAUQ and WGBE, Onondaga Radio Broadcasting Corp.; WAHL, Paducah Broadcasting Co., Inc.; WAEA, W. A. Patterson; KNEB and KNEC, Puget Sound Broadcasting Co., Inc.; KQCB, Queen City Broadcasting Co., Inc.; KBIC, Radio Service Corp. of Utah; WAAR, Rockford Broadcasters, Inc.; KIEF and KIEG, Seattle Broadcasting Co.; WATD, South Bend Tribune; WAEB, Southeastern Broadcasting Co., Inc.; KAAN, Southern Minn. Broadcasting Co.; WJEN and WJEP, Stromberg-Carlson Tel. Mfg. Co.; WDAJ, Tampa Times Co.; KABH, Tri-State Broadcasting System, Inc.; WAUI, University of Illinois; WATC, WAVE, Inc.; WBNT, WBNX, Inc.; WJLF, WBNS, Inc.; WMFZ, WCBS, Inc.; WAAC and WAAE, WDZ Broadcasting Co.; KAOD, Wescoast Broadcasting Co.; WBGM, WEMC and WHER, Westinghouse E. and M. Co.; WAAH, West Virginia Broadcasting Corp.; WAAI and WAAQ, The WGAR Broadcasting Co.; WGNA, WGN, Inc.; KAXB and KAZA, WKY Radiophone Co.; WABA, Wodaam Corp.; WLEB, WOKO, Inc.; KAID, Woodmen of the World Life Ins. Society; WAUD, WSIX, Inc.; WSMA and WSMC, WSMB, Inc.; WAAK, WSOC, Inc.; WAHE, WTAR Radio Corp.; KIFI, George W. Young.

MISCELLANEOUS

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted special temporary authority to operate a 50 watt portable transmitter on **1360 kc.,** between the hours of 1 and 6 a. m., for a period not to exceed thirty days to conduct tests for transmitter site.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted special temporary authority to rebroadcast over Station WMC from 3:30 to 3:45 p. m., CST, on Sunday, September 3, 1939, Drill Session of "Emergency Network of Amateur Stations" as follows: W5HON, W4FQD, W5GYR, W5HDC, W4FTN, W4GFK, W4FTC, W4GCB.

WEOD—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate Relay Broadcast Station WEOD with the power of 250 watts, in accordance with Section 40.04, for the period September 10 to October 9, 1939, in order to carry out the program of experimentation outlined in the application for construction permit granted January 24, 1939.

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate with power of 250 watts, from 6:15 p. m., EST, to midnight for the period September 1 to September 10, 1939, in order to broadcast War News.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate unlimited time with power of 1 KW in order to broadcast matters concerning present European crisis, for the period September 1 to September 10, 1939

Saginaw Broadcasting Co., Saginaw, Mich.—Denied petition of Saginaw Broadcasting Company for a continuance of the oral argument in the matter of the applications of Saginaw Broadcasting Company, Saginaw, Michigan (Docket No. 3651), and Harold F. Gross and Edmund C. Shields, Saginaw, Michigan (Docket No. 3899) (B-5).

KFRO—Voice of Longview, Longview, Tex.—Denied special temporary authority to operate from local sunset (September, 6:30 p. m., CST), to 11:05 p. m., CST, using 100 watts power on September 1, 2, 5, 6, 7, 8, 9, 18, 19, 20, 21, 22, 23, 25, 27, 28 and 30, 1939, in order to broadcast civic, charitable, religious, educational, fraternal and commercial programs.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Denied special temporary authority to operate from 6:45 p. m., CST, to sunset, Station KNX, Los Angeles, Calif. (September, 6:00 p. m., PST), for the month of September, in order to broadcast civic, charitable, religious, educational, fraternal and commercial programs of outstanding local interest.

KFRU—KFRU, Inc., Columbia, Mo.—Accepted amendment to application for C. P. to change frequency and power so as to request 250 watts power at night in lieu of 100 watts.

NEW—Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Adopted proposed Findings of Fact and Conclusions (B-61), entered on August 2, and entered Final Order granting application for a new station to operate on **1260 kc.,** with 1 KW power during daytime hours, effective September 1, 1939.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Denied special temporary authority to operate Saturdays, September 2, 9, 16, 23 and 30, 1939, from 10 p. m. to 1 a. m., AST, the following Sundays, in order to broadcast social activities at the Mayaguez Country Club: September 3, 10, 17 and 24, 1939, from 9 to 11 a. m., and 2 to 6 p. m., AST, in order to broadcast baseball games at the Municipal Stadium and College of Agriculture and Mechanical Arts and from 10 to 12 p. m. in order to broadcast music from Columbus Square; September 4, 1939, from 9 to 11 a. m., and 2 to 6 p. m., AST, in order to broadcast baseball games and activities pertaining to Labor Day and from 10 to 12 p. m., AST, in order to broadcast social activities relative to the day from Hotel La Palma Roof Garden.

WINS—Hearst Radio, Inc., New York, N. Y.—Granted special temporary authority to operate from 8:15 p. m. to midnight, EST, September 11, 1939, in order to carry the broadcast of the official opening of the New York Broadcasting System.

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Granted special temporary authority to operate from 9:00 to 10:00 p. m., EST, September 4, 1939, for a period of ten days only, in order to be able to carry broadcasts concerning the present European crisis.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with Station KTHS on **1060 kc.,** from 9:00 p. m. to 6:00 a. m., EST, for a period not to exceed ten days, in order to broadcast news bulletins on European situation.

WPIC—Sharon Herald Broadcasting Co., Sharon, Penn.—Granted special temporary authority to operate unlimited time with power of 250 watts in order to broadcast matters concerning present European crisis, for the period September 1 to September 10, 1939.

National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to rebroadcast a description of the Cleveland Air Races as seen from the air to be received from U. S. Army Station aboard U. S. Army Bomber B 17 A while flying over Cleveland Airfield, on September 3, 1939.

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Granted special temporary authority to operate from 9:00 p. m., EST, on September 3, 1939, to the close of the President's address.

WMFO—James R. Doss, Jr., Decatur, Alabama—Granted special temporary authority to operate unlimited time for a period not to exceed ten days, in order to broadcast news bulletins.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate unlimited time using 100 watts only for a period of ten days only, in order to broadcast Transradio News Reports of European crisis.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted special temporary authority to operate from 6:45 p. m. to 7:00 p. m., EST, for a period of ten days only, in order to broadcast Dr. Freeman's comments on the European situation.

WHKC—Associated Radiocasting Corp., Columbus, Ohio.—Granted special temporary authority to operate unlimited time for a period not to exceed ten days, in order to broadcast war news coverage.

WLAW—Hildreth and Rogers Co., Lawrence, Mass.—Granted special temporary authority to operate unlimited time for a period not to exceed ten days, in order to broadcast War News.

WGEA—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to remain silent on the frequency **21500 kc.**, for a period of ten days only and to waive the condition set forth in the existing license, which provides 'that three hours of each twenty-four hours shall be the minimum time for use of the frequency **21500 kc.**' in order that Station WGEA may have additional time for broadcasts on the frequency **15330 kc.**, relative to the present European crisis.

NEW—Onondaga Radio Broadcasting Corp. (Syracuse, N. Y.), Portable-Mobile.—Granted C. P. for new low frequency relay broadcast station to operate on frequencies **1646**, **2090**, **2190** and **2830 kc.**, 20 watts.

WSLA (formerly W1XAL)—World Wide Broadcasting Corp., Boston, Mass.—Granted C. P. to move transmitter from 70 Brookline Ave., Boston, to Hatherly Beach, near town of Scituate, Mass.

WSLR (formerly W1XAR)—World Wide Broadcasting Corp., Boston, Mass.—Granted C. P. to move transmitter from 70 Brookline Ave., Boston, to Hatherly Beach, near town of Scituate, Mass.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted petition to intervene in the hearing on the application of Clarence H. Frey and Robert O. Greever for a new station in Logan, W. Va., scheduled for hearing on September 8, but denied the petition in so far as it requests enlargement of the issues.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Granted petition to intervene and to enlarge the issues in re application of Clarence H. Frey and Robert O. Greever for a new station in Logan, W. Va.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Scheduled oral argument for October 5, 1939.

WGRC—Northside Broadcasting Corp., New Albany, Ind.; NEW—The Gateway Broadcasting Co., Louisville, Ky.—Scheduled oral argument for October 5, 1939.

NEW—WJMS, Inc., Ashland, Wis.—Scheduled oral argument for October 5, 1939.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Denied petition of WHDH for reconsideration of the Commission's action in granting the application of North Shore Broadcasting Company, without hearing, for a new station in Salem, Mass.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Retired to the closed files the application of WBBM for C. P. to make changes in transmitting equipment, as permittee has filed an application to install a new transmitter and requested cancellation of the C. P. to make changes in equipment.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Granted request for authority to remain silent pending Commission action upon application to move station to a new site, and should such application be granted, pending the actual move.

KMMJ—KMMJ, Inc., Grand Island, Nebr.—Denied petition for reconsideration of the Commission's action in granting the application of the Nebraska Broadcasting Co. for a new station in Hastings, Nebr., to operate on **1200 kc.**, with 100 watts night, 250 watts day, unlimited time.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Denied petition of WJBO for rehearing in the matter of the application of KSAL, R. J. Laubengayer, Salina, Kansas, for C. P. to change frequency from **1500 kc.** to **1120 kc.**, power from 100 watts night, 250 watts LS, to 500 watts night, 1 KW LS, using DA at night, which was granted by the Commission on June 27, 1939.

WCPO—Scripps-Howard Radio, Inc., Cincinnati, Ohio.—Denied petition to rehear or reconsider action of the Commission of June 21, 1939, by which the application of WBOW, Terre Haute, Ind., for a local move of transmitter and change in frequency from **1310 kc.** to **1200 kc.** was granted. The Commission revised its Statement of Facts with respect to the question of interference from the operation of WBOW as proposed.

APPLICATIONS FILED AT FCC

560 Kilocycles

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Construction permit to increase power from 1 KW, 5 KW LS, to 5 KW day and night, and make changes in directional antenna. Amended: Changes in directional antenna system.

610 Kilocycles

WCLE—Cleveland Radio Broadcasting Corp., Cleveland, Ohio.—Voluntary assignment of license from Cleveland Radio Broadcasting Corporation to United Broadcasting Co.

640 Kilocycles

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Modification of license to change hours of operation from limited to unlimited (DA).

WHKC—Associated Radiocasting Corp., Columbus, Ohio.—Voluntary assignment of license from Associated Radiocasting Corporation to United Broadcasting Co.

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Construction permit to install new transmitter and antenna to be determined; increase power from 500 watts to 1 KW, 5 KW LS; change hours of operation from limited to unlimited; move transmitter from 9631 Wilshire Blvd., Beverly Hills, Calif., to site to be determined, near Culver City, Calif. Amended: Re antenna specifications and give transmitter site as Moynier Lane, between Adams Blvd. and Higuerra St., near Culver City, Calif.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Construction permit to change frequency from **1290 kc.** to **710 kc.**; increase power from 1 KW, 5 KW LS, to 10 KW day and night, antenna to be determined; install new transmitter and move transmitter from Deepwater Station, Houston, Texas, to site to be determined near Houston, Texas.

810 Kilocycles

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Authority to determine operating power of auxiliary transmitter by direct measurement of antenna power.

850 Kilocycles

WWL—Loyola University, New Orleans, La.—Authority to determine operating power by direct measurement of antenna power.

890 Kilocycles

KTKC—Tulare-Kings Counties Radio Associates, Chas. A. Whitmore, Pres., Visalia, Calif.—License to cover construction permit (B5-P-2055) as modified for change in frequency, installation of new transmitter, installation of directional antenna for night, change hours of operation, and increase power.

920 Kilocycles

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—License to cover construction permit (B5-P-1572) for increase in power, change in hours of operation, equipment changes, and installation of new antenna.

930 Kilocycles

WELI—City Broadcasting Corp., New Haven, Conn.—Authority to determine operating power by direct measurement of antenna power.

WELI—City Broadcasting Corp., New Haven, Conn.—License to cover construction permit (B1-MP-760) for change in frequency, changes in hours of operation, change in power, move of transmitter, and installation of directional antenna for night use.

940 Kilocycles

WHA—University of Wisconsin, Madison, Wis.—Modification of license to change name from University of Wisconsin to State of Wisconsin, University of Wisconsin.

950 Kilocycles

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Construction permit to increase power from 1 KW, 5 KW LS to 5 KW day and night, and install directional antenna for night use.

1040 Kilocycles

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—Authority to determine operating power by direct measurement of antenna power.

1200 Kilocycles

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Modification of construction permit (B4-P-2143) for change in frequency and move, requesting increase in power from 100 watts, 250 watts LS to 250 watts day and night.

WCOL—WCOL, Inc., Columbus, Ohio.—Construction permit to change frequency from **1210 kc.** to **1200 kc.,** increase power from 100 watts to 250 watts day and night, and make changes in transmitting equipment.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Modification of construction permit (B4-P-2143) for change in frequency and move, requesting approval of antenna and transmitter site at First and Payton Sts., Terre Haute, Ind.

1210 Kilocycles

WEDC—Emil Denemark, Inc., Chicago, Ill.—License to cover construction permit (B4-P-2047) as modified, for increase in power changes in hours of operation, and changes in equipment.

WLOK—The Fort Industry Co., Lima, Ohio.—Construction permit to install new transmitter, increase power from 100 watts day to 250 watts day and night and hours of operation from day to unlimited.

NEW—J. D. Falvey, Ottumwa, Iowa.—Construction permit for a new broadcast station on **1210 kc.,** 100 watts, unlimited time.

WALR—WALR Broadcasting Corp., Zanesville, Ohio.—Modification of construction permit (B2-P-2420) for move of transmitter and changes in antenna requesting installation of new transmitter, increase in power from 100 watts to 250 watts day and night, change studio location from 17½ S. 4th St., to 48-52 North 5th St., Zanesville, Ohio, and extend commencement and completion dates to 60 days after grant and 90 days thereafter respectively.

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

1220 Kilocycles

WCAE—WCAE, Inc., Pittsburgh, Pa.—Construction permit to increase power from 1 KW, 5 KW LS to 5 KW day and night, using directional antenna at night.

1230 Kilocycles

KGBX—Springfield Broadcasting Co., Springfield, Mo.—Construction permit to install new transmitter, increase power from 500 watts to 5 KW, make changes in directional antenna (night use).

1270 Kilocycles

WJDX—Lamar Life Insurance Co., Jackson, Miss.—Authority to determine operating power by direct measurement of antenna power.

1310 Kilocycles

KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

NEW—George F. Meyer, Medford, Wis.—Construction permit for new broadcast station on **1310 kc.,** 250 watts, daytime.

KOME—Oil Capitol Sales Corp., Tulsa, Okla.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

KVOL—Evangeline Broadcasting Co., Inc., Lafayette, La.—Modification of license to increase power from 100 watts, 250 watts LS to 250 watts day and night.

1370 Kilocycles

KFRU—KFRU, Inc., Columbia, Mo.—Construction permit to install new transmitter and antenna, change frequency from **630 kc.** to **1370 kc.,** decrease power from 500 watts, 1 KW LS to 100 watts, 250 watts LS, change hours of operation from simultaneous day, share WGBF night to unlimited time, and move transmitter from 1200 Broadway, Columbia, Missouri, to site to be determined, Columbia, Missouri (contingent on KXOK and WGBF B4-P-2323 and B4-P-2321). Amended: To request 250 watts day and night.

NEW—Hobart Stephenson, Milton Edge & Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—Construction permit for a new broadcast station on **1370 kc.,** 250 watts, unlimited time.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Modification of construction permit (B3-P-1954) for new station requesting approval of antenna, approval of transmitter and studio sites at 35th Ave. and 4th St., N., St. Petersburg, Fla., and to install new transmitter.

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KGFL—KGFL, Inc., Roswell, N. Mex.—Modification of license to change hours of operation from 6 a. m. to 1 p. m. and 4 p. m. to 7:30 p. m., MST, to 6 a. m. to 7:30 p. m., MST.

1390 Kilocycles

WHK—Radio Air Service Corp., Cleveland, Ohio.—Extension of special experimental authorization to transmit facsimile signals from 1 a. m. to 6 a. m., EST, using 1 KW, for the period 11-1-39 to 8-1-40.

WHK—Radio Air Service Corp., Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to United Broadcasting Company.

1420 Kilocycles

WSPB—WSPB, Inc., Sarasota, Fla.—Modification of construction permit (B3-P-2416) for a new station, requesting approval of antenna, installation of new transmitter, approval of studio and transmitter site at Ringling Isle, Sarasota, Fla.

WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1440 Kilocycles

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Modification of construction permit (B3-P-2359) for new equipment, new antenna, increase in power and move of transmitter, further requesting increase in power from 1 KW, 5 KW LS, to 5 KW day and night; installation of directional antenna for night use; and extend commencement and completion dates 30 days after grant and 180 days thereafter, respectively.

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Construction permit to install new transmitter, vertical antenna; increase power from 100 watts to 500 watts night, 1 KW day; change frequency from **1210 kc.** to **1440 kc.;** and move transmitter from Municipal Wharf, Monterey, Calif., to site to be determined, near Monterey, Calif.

1500 Kilocycles

KFDA—Amarillo Broadcasting Corp., Amarillo, Tex.—Construction permit to install new transmitter and increase power from 100 watts to 250 watts.

KOVC—KOVC, Inc., Valley City, N. Dak.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

MISCELLANEOUS

W2XQR—John V. L. Hogan, New York, N. Y.—Modification of construction permit (B1-PHB-66) specifying transmitter location to be in Alpine, N. J., and change frequency from **111500 kc.** to **43200 kc.** Amended: Transmitter location to be 3104 Northern Blvd. (Long Island City), New York.

W2XWE—WOKO, Inc., Albany, N. Y.—Modification of construction permit (B1-PFB-14) to install new equipment.

NEW—WDRC, Inc., Meriden, Conn.—Construction permit for a new television broadcast station to be located summit of West Peak, Meriden, Conn., on **96000-102000 kc.,** 1000 watts aural and visual, emission A3 and A5.

WEHB—Cleveland Radio Broadcasting Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Cleveland Radio Broadcasting Corporation to the United Broadcasting Company.

WEHB—Cleveland Radio Broadcasting Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Cleveland Radio Broadcasting Corporation to the United Broadcasting Company.

WEHF—Cleveland Radio Broadcasting Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Cleveland Radio Broadcasting Corporation to the United Broadcasting Company.

WEHU—Radio Air Service Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to the United Broadcasting Company.

WEHV—Radio Air Service Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to the United Broadcasting Company.

NEW—Grant Union High School District, N. Sacramento, Calif.—Construction permit for a new television broadcast station to be located in North Sacramento, Calif., Grand Avenue at Elm St., on **50000-56000 kc.,** 1000 watts, emission A3, A5 and special (both aural and visual power 1000 watts. Amended to specify F. M. Link equipment.

WNEI—WFBM, Incorporated, area of Indianapolis, Ind.—Modification of construction permit (B4-PRY-157) for changes in equipment.

NEW—The Crosley Corporation, Cincinnati, Ohio.—Construction permit for a new television broadcast station on **50000-56000 kc.,** 1000 watts visual and aural, A3 and A5 emission. Amended to request **44000-50000 kc.**

NEW—Radio Air Service Corp., area of Cleveland, Ohio.—Construction permit for a new relay broadcast station on **37340 kc.,** 50 watts, emission A3 (this transmitter to be used as order circuit). Amended to request additional frequencies of **31620, 35260,** and **39620 kc.,** 25 watts, as program station.

NEW—WIBX, Inc., Marshall, N. Y.—Construction permit for new high frequency broadcast station on **43400 kc.,** 1 KW, unlimited time, special emission for frequency modulation.

NEW—Columbia Broadcasting System, Inc., area of New York, N. Y.—Construction permit for new television station on visual: **336000-346000 kc.,** 25 watts; aural: **180000-186000 kc.,** 25 watts, special and A-4 emission; unlimited time.

NEW—Mason City Globe Gazette Co., area of Mason City, Iowa.—Construction permit for a new low frequency relay broadcast station on **1622, 2058, 2150** and **2790 kc.,** 2 watts, A3 emission.

W9XYH—Head of the Lakes Broadcasting Company, Superior, Wis.—Modification of construction permit (B4-PHB-75) for new station, requesting change in frequency from **26300 kc.** to **43000 kc.,** and extend commencement and completion dates to 60 days after grant and 90 days thereafter, respectively.

WEGR—Donald A. Burton, area of Muncie, Ind.—Construction permit to install new transmitter and increase power from 5 watts to 15 watts.

WEGS—Donald A. Burton, area of Muncie, Ind.—Construction permit to make changes in equipment.

WEHX—Radio Air Service Corporation, area of Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to the United Broadcasting Company.

W8XE—Radio Air Service Corporation, Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to the United Broadcasting Company.

W8XNT—Radio Air Service Corporation, Cleveland, Ohio.—Voluntary assignment of license from Radio Air Service Corporation to the United Broadcasting Company.

WAFZ—Minnesota Broadcasting Corp., area of St. Paul and Minneapolis, Minn.—Modification of license to change power from 7.5 watts to 2.5 watts.

WEIN—The Journal Company (Milwaukee Journal), area of Milwaukee, Wisc.—License to cover construction permit (B4-PRE-273) for changes in equipment and decrease power from 50 watts to 25 watts.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Brunswick Worsted Mills, Inc., Moosup, Conn., manufacturer of worsteds and other woolen fabrics which are sold to manufacturers of men's suits, and other merchandise, and its exclusive sales agents, George O. Leckie and Henry C. Haskell, trading as Leckie & Haskell, 257 Fourth Ave., New York, were charged with failure to reveal the material content of a fabric composed in part of wool and rayon, by offering it for sale in the same manner as was customary in connection with the sale of Brunswick's exclusively woolen fabrics. The complaint points out that due to their long continued dealing in exclusively woolen fabrics the respondents' practice was to sell these products by number and sample without labeling or otherwise identifying the fiber content.

The complaint alleges that by reason of the respondents' reputation as dealers in woolen fabrics exclusively and by their failure to disclose that certain fabrics were a mixture of wool and rayon, purchasers relying on the respondents' reputation were misled into the erroneous belief that such mixed fabrics were composed wholly of wool, and suit and garment manufacturers purchasing such products were enabled to pass them off to the public as being genuine worsted or composed entirely of wool. (3880)

Cardinal Company—A complaint has been issued against Charles L. Klapp, trading as The Cardinal Co. and as The Cardinal Company of St. Louis, 406 Market St., St. Louis, charging the use of false and misleading representations in the sale of Femalade, an alleged treatment for delayed menstruation.

The complaint alleges that Femalade does not, as advertised by the respondent, constitute a competent, safe or effective treatment for delayed menstruation. It is also charged that the respondent's advertisements are false in that they fail to reveal that use of Femalade under the conditions prescribed in the advertisements or under customary or usual conditions may result in serious or irreparable injury to the health of users. (3879)

Diamond Knitting Mills, Inc., 7th and Green Sts., Philadelphia, was charged with representing by means of the words "Silk" and "All Silk" on tags, labels, and by other means, that certain of its knitted wearing apparel was composed entirely of unweighted silk, when in truth such products were composed entirely of weighted silk, which is silk that has been subjected to the process of a metallic bath and contains more than 15 per cent by weight of metallic salts or other weighting substance. (3877)

Kaufman Bros. & Bondy, Inc.—Complaints have been issued against two companies charging the use of lottery plans in the sale and distribution of their merchandise to ultimate consumers.

Kaufman Bros. & Bondy, Inc., 740 Broadway, West New York, N. J., was alleged to have promoted the sale of its pipes through distribution of push cards and punch boards. (3881)

Stone Bros., Inc., 1838 West 33rd St., Chicago, was charged with distributing push cards for use in the sale of its candy and its liquor chests. (3878)

Irving Napp, trading as Napp's Longlife Hosiery, 107 West 75th St., New York, was alleged to misrepresent hosiery which he sold as being run-proof and snag-proof, guaranteed for six months against runs or holes, and capable of outwearing all other hosiery on the market, and to represent that prompt adjustments would be made where the customer was not satisfied. The complaint charges that the respondent filled certain orders with hosiery of different size, color or quality than ordered and in certain instances failed and refused to furnish hosiery after receiving orders with deposits and did not return such deposits. Further allegations are that the respondent did not, in many instances, adjust or correct orders which were improperly filled by him, and failed and refused to refund money or furnish new hosiery in accordance with the terms of his purported guarantee and representations. (3875)

Petersime Incubator Company, Gettysburg, Ohio, was charged with representing that "Petersime Electro-Thermo Bath", a device for applying dry heat to the body, has therapeutic value in the treatment of rheumatism, arthritis, sciatica, gout, kidney trouble, nervousness, high blood pressure, colds, fatigue, poor elimination, neurosis, frayed nerves, insomnia, overweight, neuritis, underweight, lumbago and low metabolism, when such are not the facts. According to the complaint, the respondent's device serves to apply dry heat to the body, and is not a cure, remedy or competent treatment for any disease. It is further charged that the regular use of the respondent's device may be harmful, especially to debilitated individuals and persons with deficient circulation. (3883)

Standard Toykraft Products, Inc.—In a complaint, Standard Toykraft Products, Inc., 319-327 McKibbin St., Brooklyn, N. Y., was charged with having misleadingly represented by means of the statement "TOYKRAFT KNITTING SPOOL SET, Copyright 1936 and Made by Standard Toykraft Products, Inc., New York, U. S. A." on containers, that certain of its toy sets were wholly manufactured in the United States, when in truth a substantial portion of the units comprising such sets were made in Japan and assembled by the respondent company in the United States. (3876)

Stone Bros., Inc.—See Kaufman Bros. & Bondy, Inc.

Universal Industries, Inc.—A complaint has been issued against Universal Industries, Inc., and Abraham Leonard Koolish, Mrs. Ida B. Koolish and George William Ehrlich, officers and directors, 6227 Broadway, Chicago, charging misleading representations in the sale of a sales stimulator plan.

The complaint alleges the respondents misleadingly represented Universal Industries, Inc., as having been engaged in the sale of sales stimulator plans for 29 years, and as having strong financial ratings with assets amounting to $200,000, when in truth the respondent corporation was organized in 1939 and its assets are substantially less than the purported amount. It is further alleged that the respondents claimed their salesmen and distributors earn amounts which are far in excess of those normally earned by its representatives.

The complaint also charges the respondents with misrepresenting the cost to dealers of operating the sales plan, and with misrepresenting the retail value of premium merchandise and the circumstances concerning the award of alleged "free" gifts to sales representatives. (3882)

Vitaphore Appliances, Inc., South Bend, Ind., was alleged to represent that "Vibratherm" a heat and massage device, will cure prostate gland and women's disorders, and kindred disorders of the pelvic region, when such are not the facts. "Vibratherm", it was further charged, is not a cure for hemorrhoids, constipation and sexual decline, as advertised by the respondent. Nor, the complaint continues, can the device be used without risk. It is alleged that, contrary to the respondent's representations, its device does not combine heat, infra-red, vibration and massage, and has no therapeutic value other than possible temporary symptomatic relief of pain by locally applied heat. (3884)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

E. A. Hoffman Candy Company, 6600 Avalon Blvd., Los Angeles, was ordered to cease selling candy or any other merchandise by means of lottery devices, or supplying dealers with lottery devices to be used in the sale of candy or other merchandise to ultimate consumers.

Spencer Business College—Trading as Spencer Business College, Melvin B. Selcer, Mary F. Selcer, Clay Spencer and Charlotte Spencer, co-partners, and Ray Axton, manager of the "extension division", were ordered to cease representing that they offer correspondence courses at a discount price unless such price is substantially lower than that at which the courses ordinarily are sold. They were also required to desist from misrepresenting the actual cost of materials used in the courses or the sales terms and conditions or the extent to which sale of the courses is limited.

The order also prohibited use of the term "scholarship" to describe an offer of a correspondence course for which the recipient was required to pay substantially the customary price.

Representation that the respondents maintain a branch office in any locality wherein they do not have such an office was also forbidden. (3694)

STIPULATIONS

The Commission has entered into the following stipulations:

Becker & Company, Inc.—A Boston distributor of office supplies has entered into a stipulation to discontinue misleading representations in the sale of certain of its products.

Becker & Co., Inc., 168 Lincoln St., Boston, in connection with the sale of its typewriter ribbons and carbon paper, stipulated that it will cease representing that the so-called premiums offered by it are "free" or are given "without charge" or as a "reward" for the customer's business, when such is not a fact. The respondent also agreed to discontinue representing that the plans used by it in the merchandising of its products are "profit sharing," so as to imply that the customer, who purchases such products, shares in the profits made by the respondent in the sale of its products, or that the price of each so-called premium purportedly given to the customer represents a part of the profits realized by the respondent in the sale of its carbon papers and typewriter ribbons, when such are not the facts. (2521)

Columbia Baking Company, Atlanta, stipulated that it will cease representing, directly or by implication, that the bread sold by it contains whole milk, or pure rich milk or certified milk, when such are not the facts. The respondent will also cease using in any manner the word "certified" so as to imply that its product has been endorsed authoritatively or attested in writing by a qualified independent agency, board or commission as to quality, qualifications and fitness, unless that is a fact. (2519)

Cyclone Manufacturing Company, Urbana, Ind., agreed to cease using the word "Chromized", "Cromized", or any similar words, as descriptive of the deflector or shield or other part of its brooders, so as to imply that the part so described is composed of chromium, or is chromium plated, when such is not a fact. The respondent will further cease representing that heat rays are evenly diffused to the floor of the entire brooding area, and that the asbestos insulation of its brooder is the best asbestos on the market or has any beneficial insulating value. The respondent also agreed to discontinue misleading claims as to the economy and capacity of its brooders, and to cease representing that its brooder has been tested by the Government, when that is not a fact. (2525)

Hi-Flex Products Company—Charles R. Lumley and James A. Nelson, trading as Hi-Flex Products Company, Seattle, engaged in the compounding of "Hi-Flex", for use as a lubricant for internal combustion engines, agreed to cease using in advertisements, the word "Manufacturers" or similar words, so as to imply that they make the essential ingredients, including the graphite or so-called oildag of which their product is composed, or that they actually own, operate or absolutely control the plant in which such ingredients are made. The respondents further agreed to cease using the word "liquid" as descriptive of the graphite which forms an ingredient of the product sold by them, and to discontinue representing that the so-called "Derby" products have been set up as "Standard" by the United States Government. They also stipulated that they will cease representing that the use of their product will more than double the life of the moving parts of an automobile, and that they will cease exaggerating, by use of any other statements, the effectiveness of their product on the life of the moving parts of an automobile, over and above the effectiveness of plain oil. (2520)

Mme. Huntingford, Inc., Chicago cosmetics dealer, of 600 South Michigan Ave., entered into a stipulation to discontinue misleading representations in the sale of its hair treatments, creams and other preparations.

Under its stipulation, the respondent corporation agrees to cease advertising that any of its products is a scalp food or nourishing oil, or a corrective for dryness or excessive oiliness of the hair, or for baldness or loss of hair, and that its "Special Treatment Cream" reconditions the skin or that "Suave Cleanser" penetrates or flushes the pores.

The respondent agreed to use neither the word "bleach" as part of the trade name of "Bleach Emollient", nor the word "Indian" as part of the name "Indian Oil Astringent." (02421)

Ideal Manufacturing Company—A. G. Olscheske and R. B. McDowell, trading as Ideal Manufacturing Company, West Allis, Wis., stipulated that they will cease representing that savings of 80 per cent, or any other definite amount, can be made by using an Ideal Electric Fence Controller, irrespective of the amount of fencing required; that the use of their electric fence relieves anxiety concerning the escape of livestock or eliminates fencing problems, and that any fence equipped with an Ideal Electric Fence Controller is more effective to confine livestock than any ordinary fence not so equipped. (02422)

J. P. Redington & Company—G. V. Redington and F. E. Redington, trading as J. P. Redington & Co., Scranton, Pa., in connection with their sale and distribution of church furniture and fixtures, agreed to cease using in advertisements, or in any other way, the words "Manufacturers" and "Builders", or any similar words, or the phrase "Direct factory prices", so as to imply to purchasers that they make the products sold by them or that they own, operate, or absolutely control the plant in which their products are made. The respondents also agreed to cease using the word "factory" either alone or in connection with the word "direct" or with any other words as descriptive of the prices at which their products are sold, when such prices are other than factory prices. (2522)

Russia Cement Company, Gloucester, Mass., stipulated that it will cease describing in any manner by means of the word "waterproof" that liquid cement and casein glue, which it manufactures under the trade name "LePage's," are waterproof, when such is not a fact. (2518)

F. Schumacher & Co., 60 West 40th St., New York, entered into a stipulation to discontinue misleading representations in the sale of cotton drapery fabrics bearing the trade name "Waverly Fabrics."

Under the stipulation, the respondent is to cease using the term "Shrinkproof" or "Shrunk" so as to imply that the products to which such words refer are proof against shrinking or have been fully shrunk to the extent that no residual shrinkage remains, when this is not a fact. The stipulation provides that if the products have undergone the application of a shrinkage process and have been shrunk to a substantial extent that there remains a certain amount of residual shrinkage, and the term "Shrunk" or any similar term is used to describe such product, the descriptive term shall be immediately accompanied by some other words printed in equally conspicuous type so as to indicate clearly that there remains a stated amount or percentage of residual shrinkage in both the warp and the filling or in the warp or the filling, whichever has the greater residual shrinkage. (2524)

Silver Mills—Max Silver, trading as Silver Mills, 335 Market St., Philadelphia, agreed to cease using the word "Mills" as part of the trade name under which he wholesales dry goods, or the word "Mills" on his letterheads, invoice blanks, or any way, so as to imply to purchasers that he makes the products sold by him or that he actually owns, operates or absolutely controls the mill, plant or factory in which his products are manufactured, when such are not the facts. (2523)

Termiteol Company—Harve D. Hagerty, trading as Termiteol Company, Covington, La., manufacturer of a termite eradicator, agreed to cease the use in advertisements of representations directly asserting or implying that all new lumber is infested with termites; that 98 per cent of buildings have termites in them; that a survey allegedly made by Termiteol Company of HOLC properties was in fact a "cross-section" inspection of all such properties, or that the average cost of treating a building for termites is comparable to the amount named in the respondent's advertising relating to the so-called Federal Government projects. The respondent will also discontinue claims that only the Termiteol Company insures against termite deterioration or destruction and can supply effective termite treating work, or that the U. S. Bureau of Entomology is properly quoted as saying that New Orleans and its subtropical neighboring territory is dangerously infested with the most destructive type of termites. (2527)

Unit Structures, Inc., Peshtigo, Wis., manufacturer of glued laminated wood structures, including arches and roof supports, stipulated that it will discontinue representing that it introduced laminated wood construction into this country in 1934, or at any other time, or, impliedly or otherwise, that it designed or originated the laminated arches or other construction of a designated building where such arches or construction were in fact made according to specifications prescribed by the owner. (2528)

Ward-Stilson Company, Anderson, Ind., manufacturer of women's apparel and men's shirts, agreed to discontinue advertising, branding, or labeling any product composed in whole or in part of rayon unless full and non-deceptive disclosure of the fiber and other content of such product be made by clearly designating each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber which is present in less than a substantial amount, or in any case less than 5 per cent, as, for example, "rayon and wool" when the product is composed of rayon and wool throughout, the rayon content predominating, or "wool and rayon" when the amount of wool is at least equal to the amount of rayon present.

The respondent will also discontinue use of the words "Crepe", "Taffeta", "Satin", "Shantung", or any other words connoting silk, so as to imply that the fabric to which such words refer is composed of silk, when such is not a fact. If the words "Crepe", "Taffeta", "Satin" or "Shantung" are used to properly describe the type of weave or construction of a rayon fabric, then the designating word shall be immediately accompanied bv the word "rayon", printed in equally conspicuous type, so as to indicate clearly that such product is in fact rayon, as, for example, "Rayon Crepe", "Rayon Taffeta", "Rayon Satin", or "Rayon Shantung". (2526)

NAB Reports
NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 37, September 15, 1939

Code Effective October 1

The Board of Directors decided Wednesday that the Code would go into effect October 1.

At the same time, the Board directed Neville Miller to appoint a committee fully empowered to interpret and enforce the Code throughout the industry. Mr. Miller immediately announced that Edgar Bill, WMBD, would head this committee.

"The Code is more than an expression of radio policy", Mr. Miller declared. "It is an outstanding example of voluntary industrial self-regulation, conceived and executed in the public interest."

The Code, adopted at the Atlantic City convention, requires that radio stations shall provide free time for the discussion of controversial public issues in such a way that conflicting viewpoints in public matters have a fair and equal opportunity to be heard. In no event will time be sold for such purpose, except for political broadcasts.

"The political broadcasts excepted are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally-qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away," Mr. Miller said.

This policy governing the discussion of controversial public issues through radio was adopted, Mr. Miller said, "because of the natural limitation of radio facilities and of the number of hours available per day for broadcasting. Without such a policy, the radio forum could conceivably gravitate almost exclusively to those with the greater means to purchase time. The NAB policy insures that radio will remain a free and democratic form for the fair and many-sided discussion of all public matters."

The Code further requires that news broadcasts be factual and presented without bias or editorial opinion. It also provides that children's programs be based upon "sound social concepts" and that radio stations continue to cooperate with educators in the further development of radio as an educational adjunct. It also provides that no one shall be permitted to use radio to "convey attacks upon another's race or religion."

While the full Code becomes effective October 1, the Board ruled that existing commercial contracts shall be respected for their duration, provided they do not run for more than one year after October 1, 1939. "New business, competitive with existing accounts, may be accepted with the same length of commercial copy as is permitted existing ac-

CODE EFFECTIVE OCTOBER 1

(Continued from page 3711)

counts." The Board directed that the new Code Committee, to be appointed by Mr. Miller, "shall immediately make itself available to resolve doubts of broadcasters as to whether proposed new business conforms or can be made to conform to the Code.

The full resolution adopted by the Board, making the Code effective October 1, follows:

Resolved that the Code of the National Association of Broadcasters adopted by the Seventeenth Annual Convention of the Association become fully effective October 1, 1939, except as it may apply to existing commercial contracts which shall be respected for their duration but provided they do not run for more than one year from October 1, 1939.

The Code Compliance Committee shall immediately make itself available to resolve doubts of broadcasters as to whether proposed new business conforms or can be made to conform to the Code.

New business, competitive with existing accounts, may be accepted with the same length of commercial copy as is permitted to the existing accounts.

Penna. Supreme Court Reverses Libel Decision

The Supreme Court of Pennsylvania for the Western District has reversed the decision rendered by the lower court in the case of Summit Hotel Company v. National Broadcasting Company, in which $15,000 damages were awarded the hotel company for defamatory remarks uttered by Al Jolson. Jolson was appearing on a program sponsored by Shell Eastern Petroleum Products, Inc., and during the course of an interview by Jolson with the winner of an annual golf championship, Jolson said, in referring to the Summit Hotel, "That's a rotten hotel."

The decision by the Pennsylvania Supreme Court is important to the broadcasting industry as being the first case in which protection has been accorded against liability for defamatory remarks uttered by one not under the control of the station and interjected into the broadcast without warning. In reversing the lower court, Chief Justice Kephart, who delivered the opinion, stated that the defamatory words did not appear in the script, that they had not been made at rehearsal and that the broadcasting company did not know the words were to be used.

The decision discusses the so-called rule of absolute liability imposed in some jurisdictions on the publisher of a newspaper and distinguishes the situation faced by the National Broadcasting Company from that of a newspaper publisher on the grounds that a newspaper publisher has an opportunity to ascertain the truth of the published matter. It then points out that the newspaper analogy of absolute liability has been approved in four cases involving radio broadcasting, but says the facts involved in the case under consideration disclosed no negligence on the part of the broadcasting company, either direct or implied.

Because of the importance of the decision and the detailed discussion of the question of defamation by broadcasting, the full text of the opinion of the Pennsylvania Supreme Court is given below:

In the
Supreme Court of Pennsylvania
Western District
No. 124 March Term, 1939.
Appeal from the judgment of the Court of Common Pleas of Allegheny County.
Summit Hotel Company, a corporation of Pennsylvania,
v.
National Broadcasting Company, a Corporation, Appellant.

Opinion of the Court

Kephart, C. J.:

The National Broadcasting Corporation rented its facilities to the J. Walter Thompson Company, a commercial advertising corporation, for the transmission of a series of sponsored radio programs over one of its networks, comprising 26 stations. The series was sponsored by Shell Eastern Petroleum Products, Inc. The principal performer on the programs was Al Jolson, a comedian. All of the participants, including the announcer, were employed and paid directly by the advertising company. A script for each program was prepared in advance, submitted to the broadcaster, and followed exactly by the performers at rehearsals in the broadcasting studio, where it was approved. The script for June 15, 1935, called for an interview by Jolson with the winner of an annual golf championship. In broadcasting from defendant's studio in Radio City, New York, Jolson, when the program was one-half or two-thirds completed, suddenly interpolated an extemporaneous remark. In response to the golf champion's statement that he secured his first job at the Summit Hotel, Uniontown, Pennsylvania, Jolson said: "That's a rotten hotel."[1] The interjected remark was made without warning; it did not appear in the script, had not been made at rehearsal, and defendant did not know the words were to be used. Present in the studios were defendant's production director and the Thompson program director; neither had an opportunity to prevent the interjection.

An action in trespass for defamation was brought to recover damages for injury to the hotel's reputation and business. No substantial attempt was made to show special damages, and the trial judge instructed the jury that the remarks were "slanderous per se." The lessor broadcasting company was held liable for damages in the sum of $15,000, as awarded by the jury. Motions for new trial and judgment n. o. v. being refused, this appeal followed.

---

[1] The exact statement was as follows: "But tell me, Sam, what did you do after you got out of college?" Answer: "I turned golf professional and in 1932 I got a job at the Summit Golf Club in Uniontown, Pennsylvania." Jolson replied "That's a rotten hotel".

The important question raised is whether a radio broadcasting company which leases its facilities is liable for an impromptu defamatory statement, interjected "ad lib." into a radio broadcast by a person, hired by the lessees, and not in the employ of the broadcasting company, the words being carried to the radio listeners by its facilities.

Although foreshadowed in one or two decisions and articles, this problem is unique; it is the first time the precise question has come before an appellate court in the United States or England. The law of defamation by radio is very much in its infancy, though there have been a few cases involving the liability of a broadcasting station or company therefor. But the situations involved in those decisions differ vastly from that which is before us.

The court below held that defendant's liability was absolute though it was without any fault. The fact that it rented its facilities to another to publish and disseminate a non-defamatory program, and that the defamatory interjection was spoken by lessee's employe under circumstances which precluded anticipation or prevention by the broadcaster, was treated as immaterial.

Appellant urges that to impose such liability for acts of the lessee upon a lessor who is utterly without fault, in no sense guilty of any wrong or negligence, is not only contrary to the common law but sets up a rule of liability that has never before existed.

The feature which distinguishes this case from the many cases cited for so-called liability without fault, is that here the broadcasting company rented its facilities to the advertising agency to broadcast a legitimate program. For this purpose the facilities were under the control of the agency. Appellant's program director could not have prevented the utterance by lessee's performer because of its suddenness; the supervision he exercised was merely to see that the facilities carried the program contained in the script. The duty of the monitor in the control room was to modulate and correct vocal sounds, and secure the audible transmission of intelligible, harmonious speech; he was, to this extent, as much a part of the rented facilities as the broadcasting equipment itself. His duty being to see that the program was produced clearly to the public over the air, he would be unable to exclude or eliminate a brief defamatory interjection, not only because of its suddenness, but also because his time is fully occupied with the technical details of his work. Moreover, it would require an expert in law to detect in extended remarks what was, or was not, defamation. In view of the positive assertion that, notwithstanding these circumstances, the broadcasting company is absolutely liable without fault, it will be necessary to examine the theory of absolute liability and the subjects to which it has heretofore applied, so as to ascertain whether it is appropriate in this new form of defamation.

Some writers have traced the origin of liability without fault to an ancient principle that every wrong must have a remedy, and therefore it is urged that the doctrine is not new to the law of torts, in many phases of which it may be found today. Others, on the contrary, have stated that the judicial determination that there may be liability without fault cannot, in strict reasoning, be applied to tort law, which is grounded in negligence, but that it, rather, assumes an independent sphere of compensation for injurious acts. The confusion of concepts has come about through the extension of the principle of liability without fault, covering injuries to land or to rights in land, to tort liability to persons. Distinguished legal scholars, however, have pointed out that the rule of absolute liability persists in several actions, generally included in the field of tort law, such as trespass q. c. f., trespass for nuisance and trespass for injuries caused by wild or domestic animals known to be dangerous, as well as some others which will be touched on later.

In our State, the doctrine of absolute liability has been invoked, almost without exception, only in that small group of actions which redress injuries to land, and it is only as to these that it can be fairly said that the doctrine prevails. This liability is a survival of the medieval law dictated by the landlord, in which the protection of the uninterrupted enjoyment of real property was a primary consideration.

In the very earliest times, all rights, real and personal, were probably entitled to absolute protection, and every injury redressed regardless of fault,[2] but a sharp line of distinction has since been marked between liability for injuries to land and injuries to persons.[3] The case of injuries to land may now be said to be the general exception to the modern rule that liability will not be predicated on innocent and diligent conduct. A tort today implies fault or wrong. Tort liability must be founded upon some blameworthy conduct, or lack of due care resulting in the violation of a duty owing to others.

It was in the Nineteenth Century that the law of negligence in torts had its development. Personal injury cases then consumed the greater portion of the time of the courts. Cases concerning rights in land yielded their earlier prominence, and the rules of law applicable to them have consequently remained, in the most part, unchanged, even to the present day.

In Pennsylvania, the principle of liability without fault for injuries to the person has received scant consideration. The great body of our law of liability for personal injuries is that of liability through fault; liability based almost exclusively on wrongful conduct. There is, therefore, no proper analogy between the cases of liability without fault for injuries to land and those for personal injuries where fault must be present.

Illustrating the definite trend of judicial decisions in this State to restrict liability without fault to cases affecting land, and, even there, to narrow its application, we may cite the following cases: We have held that the duty of lateral or subjacent support is limited to land in its natural condition, and it is not extended, unless the actor is guilty of negligence or willful misconduct. In *Malone* v. *Pierce*, 231 Pa. 534, we held that one who, in the exercise of his property rights, injuries his neighbor, is liable in damages for willful, wanton, or negligent conduct, saying at page 536:

> ". . . The right to lateral support is limited to land in its natural condition . . ."

See also *Home Brewing Co.* v. *Thomas Colliery Co.*, 274 Pa. 56, at page 60. The right of lateral support is incident to land. *McGettigan* v. *Potts*, 149 Pa. 155.

We find the germ of antecedent wrong even in our cases where "liability without fault" is invoked for injury to land, or to rights growing out of land. Intrusions upon land by persons, animals, or substances cast thereon, usually involve intentional or negligent invasion of the close. The law, recognizing the natural tendency of cattle to stray, imposes a duty on the possessor to keep his flock from another's land or to answer in damages. See *Barber* v. *Mensch*, 157 Pa. 390; *Teller et ux.* v. *Hood*, 81 Pa. Superior Ct. 443, 445. Here it would seem that the rule is not "absolute liability," but that there is a duty to conform to a high standard of care. There is no case in this State where the owner of cattle has been held liable for damages caused by them where he built and maintained an adequate fence which was destroyed through no fault of his. And, in driving livestock along the highway, the owner or possessor is liable only in the absence of reasonable care. *Erdman* v. *Gottshall*, 9 Pa. Superior Ct. 295.

Our Court has refused to follow *Rylands* v. *Fletcher*, L. R. 1 Exch. 265, L. R. 3 H. L. 330, which imposed absolute liability on a landowner for the escape of non-dangerous substances from his land to the land of another. See *Pennsylvania Coal Co.* v. *Sanderson*, 113 Pa. 126. We there said, at page 150:

> "A rule which casts upon an innocent person the responsibility of an insurer is a hard one at best, and will not be generally applied unless required by some public policy, or the contract of the parties."

We have held that in blasting, a person conducting the operation is liable regardless of negligence, but this liability arises out of the inherently dangerous character of such explosions,[4] and requires one who intentionally causes the explosion to be affected with knowledge that injury may result beyond his power to prevent. He therefore must assume the risk. This is not strictly a case of absolute liability.

---

[2] The plaintiff under these cases was not required to prove any intent, moral culpability or carelessness and the injuror could not escape liability by showing he acted with the utmost care. The case frequently referred to is the decision in 1466 in Y. B. 6 Edw. IV. 7, 18. See *Holdsworth, A History of English Law* (4th Ed.) Vol. III, pp. 375-382.

[3] In *Weaver* v. *Ward* (1616), Hobart 189, the modern principle of liability for personal injuries was laid down. It was there stated the defendant may escape liability for causing personal injury where the harm "may be judged utterly without his fault." See *Bohlen, Studies in the Law of Torts*, 366; *Wigmore, Responsibility for Tortious Acts; Its History*, 7 Harv. L. Rev. 315.

[4] *Mulchanock* v. *Whitehall Cement Mfg. Co.*, 253 Pa. 262; *Baier et ux.* v. *Glen Alden Coal Co.*, 131 Pa. Superior Ct. 309; *Rafferty* v. *Davis*, 260 Pa. 563; *McGowan* v. *Steele & Sons Co.*, 112 Pa. Superior Ct. 552.

In cases of trespass for nuisance, the person responsible may be unable, no matter how careful, to avoid injury to the lands of another, but, again, he knows that injury may result from the nature of his activities regardless of care. Under such circumstances he also assumes the risk.[5] The responsibility for injury lies in creating or maintaining the harmful condition.

In all of these illustrations, the person responsible has, or should have, prior knowledge of the probable consequences, where the act done, or the instrumentality employed possesses potentialities of serious harm. From these cases it is apparent that our doctrine of liability without fault has very narrow restrictions even in its appropriate sphere of application.

When considering the field of personal injuries there appears no valid exception to the rule that liability can be based only upon intentional wrong-doing or lack of care. There are some cases which have been called, in other jurisdictions,[6] exceptions to this rule. In this State the possessor of wild or domestic animals of a known vicious or dangerous tendency is chargeable with knowledge of the vicious nature of the animal.[7] There is an element of wrongful conduct or a voluntary assumption of the known risk of injury to others in the mere fact of possession. As stated in *Andrews* v. *Smith et ux.*, 324 Pa. 455, at 457: " 'The negligence is in keeping such an animal after notice.' " As to animals normally not dangerous, there is no liability unless the owner is negligent in his care of them. One who drives cattle through the streets of a city is not liable for injuries to third persons unless he fails to exercise care. *Potter T. & T. Co.* v. *Oswald & Hess Co.*, 322 Pa. 81. A person permitting a horse to stand unattended and untethered in the street is presumptively negligent, and liability for personal injuries may be predicated thereupon. *Goodman* v. *Gay*, 15 Pa. 188; *Henry* v. *Klopfer*, 147 Pa. 178; *Jordan et ux.* v. *Eisele*, 273 Pa. 93.

It has been stated that those engaged in an ultra-hazardous activity are liable without fault for injuries caused by carrying on the activity. The rule has been applied in this State only to blasting, and the first cases involved injuries to land. Later it was extended inferentially to personal injuries.[8] In *Rafferty* v. *Davis*, 260 Pa. 563, at 568, it is stated:

> " 'in such a case the work itself is so inherently dangerous, that the doing of it, no matter how carefully, is of itself negligence, so that no amount of care in doing the negligent act will excuse the actor from the responsibility of the consequences which grow from it.' "

The storage of dangerous instrumentalities, such as dynamite, on the owner's land does not make him liable for injuries to persons or property if it explodes, unless it was negligently stored. The storage itself, even in the proximity of dwellings, has been held not to be a nuisance per se. *Sowers* v. *McManus*, 214 Pa. 244; *Derry Coal & Coke Co.* v. *Kerbaugh*, 222 Pa. 448. The handling of such substances merely imposes a high standard of care commensurate with the dangerous nature of the agency to personal safety. The general rule to be deduced from all of the cases involving the use of dangerous substances and instrumentalities[9] has been summarized in *Fredericks* v. *Atlantic Refining Co.*, 282 Pa. 8, at page 13:

> "A higher degree of care is required in dealing with a dangerous agency than in the ordinary affairs of life or business, which involve little or no risk."

Another asserted instance of liability without fault for personal injuries is Workmens' Compensation. This liability is really contractual; if the employer does not contract he assumes a common law liability stripped of certain defenses. We held in *Rich Hill Coal Co. et al.* v. *Bashore*, (not yet reported, opinion filed March 27, 1939), in passing on the constitutionality of the Workmens' Compensation Acts of 1937 and 1938:

> "But in common law actions of tort, it is the 'law of the land' that liability cannot be imposed upon one who is without fault. To *legislate* a person presumptively guilty of either a crime or a tort is an attempted erosion of 'the substance of original justice'."

In *Faiola* v. *Calderone*, 275 Pa. 303, we merely held that the employment of a child, in violation of a positive statutory duty, constituted negligence per se. In all such statutory regulations the legislature has adopted a public policy for the prevention of injury, and if the employer does not obey these preventive directions his act of disobedience is his negligence. We have not held liability without fault in automobile cases, and in the statutes covering the operation of airplanes the legislature has rejected the absolute liability theory.

To summarize, therefore, the cases mentioned, it may be stated that the doctrine of liability without fault has little or no place in torts involving injuries to the person, and its extension from the law of trespass to land has rarely been looked upon favorably in this State. In all of the exceptional cases there is a common ground of either antecedent negligence, or the assumption of a known risk of harm to others by intentional conduct. There is no element of injustice in imposing liability under such circumstances. Against the few exceptional situations in which absolute liability may have been applied, stands the great weight of modern authority that no man should be held liable for an unintentional injury resulting from the performance of a lawful act without negligence or wilful misconduct.[10] Pennsylvania has expressly approved this trend of the law as expressed by Justice Holmes. See *Ebbert et al.* v. *Phila. Electric Co.*, 330 Pa. 257, 269. It must be an unusual case, therefore, and one amenable to no other solution as a matter of public policy, that would require this Court to extend the exceptional doctrine of liability without fault into a new field of commercial enterprise involving no recognizable probability of danger.

Considering the rule of supposedly absolute liability imposed in some jurisdictions on the publisher of a newspaper for his defamatory publications,—and this is the rule here chiefly relied on,—a close examination of the Pennsylvania law will show that our rule is not one of absolute liability, but rather, of a very strict standard of care to ascertain the truth of the published matter. *Clark* v. *North American Co.*, 203 Pa. 346; *Shelly* v. *Dampman*, 1 Pa. Superior Ct. 115.[11] The fact of defamatory publication is evidentiary of such lack of due care. The rule that a newspaper publisher is absolutely liable for defamation originated in the English case of *Thorley* v. *Lord Kerry*, 4 Taunt. 355 (1812), and was apparently adopted by the United States Supreme Court in *Peck* v. *Tribune Co.*, 214 U. S. 185.[12] It may have been inspired by the frequency of defamatory newspaper publications or, as stated by one author, by their tendency to publish sensational and scandalous matter. It might be justified by the difficulty in proving negligence, since the facts of publication are exclusively known to the publisher and his agents.

The newspaper analogy of absolute liability has been approved in four cases as applied to radio broadcasting.[13] This analogy to newspaper liability, either under the Pennsylvania rule as stated, or under the broader rule existing in some other states, would support liability in the cases referred to, on their facts. Nevertheless, the analogy itself has been properly subjected to criticism by almost every legal commentator.[14] The American Law Institute in its *Restatement of the Law of Torts* refused to adopt it. In Section 577[15] the general rule is stated:

---

[5] See *Stokes* v. *Penna. R. R. Co.*, 214 Pa. 415, 419; *Gavigan* v. *Refining Co.*, 186 Pa. 604, 612; *Houck* v. *Pipe Line Co., Ltd.*, 153 Pa. 366, 374; *Ladner et al.* v. *Siegel et al.*, 296 Pa. 579, 585.

[6] See *Exner et ux.* v. *Sremon Power Const. Co.*, 54 Fed. (2d) 510, 514.

[7] *Andrews* v. *Smith et ux.*, 324 Pa. 455; *Sylvester* v. *Maag*, 155 Pa. 225; *Fink* v. *Miller*, 330 Pa. 195.

[8] See *McGowan* v. *Steele & Sons Co.*, 112 Pa. Superior Ct. 552. In *Boker* v. *Hogey et al.*, 177 Pa. 128, the court reversed the court below for charging the jury that recovery could be had regardless of negligence.

[9] See *Konchor* v. *Cebulor*, 333 Pa. 499; and *Fredericks* v. *Atlantic Refining Co.*, 282 Pa. 8 (as to gasoline); *MacDougoll* v. *Penna. Power & Light Co.*, 311 Pa. 387, and also *Fitzgerold* v. *Edison Elec. Co.*, 200 Pa. 540 (as to electricity): *Hortman* v. *Citizens Natural Gas Co.*, 210 Pa. 19 (as to natural gas); *Lindh* v. *Protective M. Service Co., Inc.*, 310 Pa. 1 (as to firearms).

[10] Justice Holmes has said (*The Common Law*, p. 108): "the law does in general, determine liability by blameworthiness." And, as stated by Professor Ames: (*Law & Morals*, 22 Harv. L. Rev. 97, 99): "The ethical standard of reasonable conduct has replaced the unmoral standard of acting at one's peril." (And see *Winfield, The Myth of Absolute Liability*, 42 L. Q. Rev. 37.

[11] In the *Clark* case it was said, at p. 351: "Even in reporting an occurrence proper for publication there may be such an absence of the required diligence and care to ascertain the truth as to make the report libelous. . . . The mode of presenting the case to the jury made it turn on the intent and ignored entirely the liability arising from negligent disregard of the injury that might be inflicted upon the plaintiff." At page 352, it was said: ". . . the jury should consider the whole article and determine from all the evidence, whether, not withstanding the difference of name, the description was such either intentionally or by want of due care and diligence in ascertaining the true facts, that there would be a natural and reasonable inference that the plaintiff was the person referred to." In the *Shelly* case, the court said at page 123: "Conceding the occasion to have supplied the basis of privilege, the measure of diligence and care here shown to ascertain the truth of the statement published, is, in our opinion, entirely insufficient. It is not suggested in the point that there was any necessity or reason for such haste in publishing the defamatory matter as precluded inquiry, in the usual way, which would have revealed the utter falsity of the charge."

[12] In these and the following cases it was held that a newspaper publisher is liable for an unintentional defamation and cannot plead that he could not reasonably have known its libelous nature. See *E. Hulton & Co.* v. *Jones*, L. R. (1910) 35 App. Cas. 20, (1909) 2 K. B. 444 (Engl.); *Morrison* v. *Ritchie & Co.*, (1902) 39 Scottish L. Rep. 432; *Oklahoma Pub. Co.* v. *Givens*, 67 Fed. (2d) 62; *Taylor* v. *Hearst*, 107 Calif. 262, 40 Pac. 392; *Wolker* v. *Bee-News Pub. Co.*, 122 Neb. 511, 240 N. W. 579.

[13] It will be noted the facts in all cases differ materially from those in the instant case. In *Sorenson* v. *Wood*, 123 Neb. 348, 243 N. W. 82, the defamatory remarks were made by a political speaker to whom it had extended its facilities. The speaker used a prepared script that had not been previously submitted to the broadcasting company, though it could have obtained the script had it so desired. No effort was made to stop the transmission although the length of the remarks would have enabled the company to have done so.

> "Publication of defamatory matter is its communication intentionally or by a negligent act to one other than the person defamed."

To this is appended, in Comment (g), the following caveat:

> "The Institute expresses no opinion as to whether the proprietors of a radio broadcasting station are relieved from liability for a defamatory broadcast by a person not in their employ if they could not have prevented the publication by the exercise of reasonable care, or whether, as an original publisher, they are liable irrespective of the precautions taken to prevent the defamatory publication."

This caveat was adopted after full discussion, on the ground that the decided radio cases were insufficient in number to require the acceptance of an analogy presenting such serious practical and legal difficulties.[16]

Moreover, the facts of this case must be kept in mind, as they differ greatly from the facts in the cases noted. The speaker here was an employe of a third party to whom the broadcasting company had leased its facilities. He was not under the broadcasting company's control, authority or command. The script used was examined and rehearsed exactly as written. It contained nothing offensive, and appellant, in renting its facilities, had no reason to believe anyone would utter a defamatory statement. There was no power or means possessed by the broadcasting company that enabled it to prevent the transmission of the defamatory remark. It was physically impossible for the monitor or program director to have intervened, as the performer, without notice, interjected his terse defamatory remark so quickly that no one in appellant's employ was able to prevent its transmission.

In these circumstances the analogy between the radio broadcaster and the newspaper publisher is demonstrably weak, considering not only the practical differences between the two media of communication but the different conditions under which the industries operate. Newspaper matter is prepared in advance, reviewed by members of the various staffs, set into type, printed, proof read and then "run off" by employees of the publisher; at all times opportunity is afforded the owner to prevent the publication of the defamatory statement up to the time of the delivery of the paper to the news-vendor. The defamation thus may be said to be an intentional publication, or at least one published without due care.

Similarly, the broadcaster may, as it did here, require the submission of the script in advance for editing; it may require rehearsals and its production director may prevent the transmission of doubtful matter. But where the circumstances, like those now presented are such that the defamation occurs beyond the control of the broadcaster, it is perfectly clear that the analogy between newspapers and broadcasting companies collapses completely. The superior control of the newspaper publisher is self-evident.

Other analogies have been suggested which, when first mentioned, may be thought of assistance, but when analyzed possess inherent weaknesses. In communications by telegraph the rule of due care has been invoked. We know of no case where a telephone company has been held for defamation for the use of its lines, but its duty should rise no higher than that of a telegraph company. Both activities are public utilities, and cannot select the users of their facilities.[17] Radio companies are not in that category. They may select their performers and choose between applicants for the use of their facilities,[18] which are designed, not for private communications from one individual to another, but for those to the public generally.

It has been suggested that the dissemination of matter by radio may be likened to dissemination by news-vendors and booksellers, who merely republish original utterances. The rule of absolute liability does not apply to such vendors.[19] While this is possibly a close analogy, and has the support of eminent legal writers, its weakness is in the fact that the sound which is transmitted to radio listeners is carred directly by the facilities of the broadcaster, though the activating impulse may have been the spoken word at the microphone. It is a trifle more than the mere delivery of a newspaper to the purchaser. It has been held that it is the reproduction of the spoken word from the broadcasting room. *Buck* v. *Jewell-LaSalle Realty Co.*, 283 U. S. 191, 199-201. The combination of the voice and the transmitting apparatus is necessary to effect the broadcast. The speaking and publication of a defamation are simultaneous.

The closest analogy suggested[20] is the loud-speaking device installed in public halls, owned, maintained and operated, very much like the radio, by the owner of the premises. The halls are rented for public addresses, and may be equipped with outside amplifiers or loud-speakers, increasing the size of the audience. The only practical difference here is in the number of persons who hear the remarks. If the newspaper analogy is to be carried to its logical conclusion, the owners of the loud-speaking devices should be liable for the defamatory utterances of those leasing or using these devices.

The real difficulty arises from attempting to adapt to the new tort of radio defamation, rules of liability applicable in other fields of kindred, but not identical, types of wrong. Defamation in the law, until the radio appeared, was either libel or slander. Now, it is urged by some that the law of libel should be extended to defamation by radio because of the number of persons that hear it,[21] others indicate that it should be treated as slander.[22]

That part of the Roman law of defamation taken into the English law of libel was applicable to more serious cases. The strict rules of libel were originally directed at the printing press, which provided a wider means of publication. The differences between libel and slander, and the comparative ease of recovery in libel as against the more restricted and less stringent liability in slander, are well known. Some authors dispute these formal distinctions, asserting there is no sound reason to support them.[23] Among the factors to be considered in reaching a rule of liability for defamation is the extent of the publication; but that is not the only, or the main reason for the distinction between libel and slander. The more serious consideration is the permanence of the printed libel, and its capacity for continuous future harm over a wide area. Slander, or the spoken word, is not bound to any set form; it is easily fabricated and made to appear much worse than actually spoken; it offers opportunity for fraudulent and fictitious

---

The principal defense was privilege under the Federal Statute which prohibits the censoring of political addresses. The case was submitted on the issue of negligence resulting in a verdict for the defendant. This was reversed, the court holding the defendant liable by analogy to a newspaper publication. This was not a case of "ad libbing" nor of "leasing". In *Miles* v. *Louis Wasmer, Inc.*, 172 Wash. 466, 20 P. (2d) 847, the speaker was an announcer employed by the radio station. The defamatory words derogatory to plaintiff were from a prepared script which the company could have edited itself. Under the authority of the *Sorenson* case, liability was upheld. In *Coffey* v. *Midland Broadcasting Co.*, 8 F. Supp. 889, the transmitting company was in New York and one of its chain members in Kansas City was sued for defamatory remarks made in New York and transmitted to its station by telephone. Time and facilities were leased to a commercial advertiser and the speaker was an employe of the advertiser. The defamatory remarks apparently were part of a prepared and rehearsed program appearing in the script submitted to and passed on by the broadcasting company in New York. The court in remanding the case recognized that the *Sorenson* and *Miles* cases could have been decided on the basis of negligence but held that in this particular case the facts were broader. Another case, *Irwin* v. *Ashurst*, 158 Ore. 61, 74 P. (2d) 1127, held that defamation in the broadcast of proceedings at a trial was privileged, but only if the report was true and accurate.

claims; it is usually uttered in the presence of a few. The law has, therefore, encased it in most rigid rules.

When the radio sound reaches the human ear it is the spoken word. It is urged that the radio gives to it a power for harm even greater than the printing press gives to the printed word, but this conclusion does not consider the factor of permanency just mentioned, or the traditional belief in the veracity of the printed word, particularly important in the community where the injured person resides. Newspaper defamations possess possibilities for real harm far greater than defamations by radio, as they constitute permanent, continuing records, which, through circulation, are constantly republished. The radio word is quickly spoken and, generally, as quickly forgotten. Because of the differences in power of the stations from which it is sent, it may receive widely varying circulation.

The radio is, admittedly, a powerful agency for advertising and the conveyance of important public matters, as well as the promotion of religion and politics. It also affords its listeners a measure of entertainment, and brings to them the reports of many occurrences more quickly than the newspaper could possibly do. It does, to a certain extent, compete with the newspaper. But these factors, standing alone, should not be sufficient to cast upon the radio the cloak of liability without fault for defamatory publications, as libels, by extension of the law applicable in some States to newspapers. The *Restatement* has taken the position that when the words broadcast are read from script it is libel, but has expressed no specific conclusion as to extemporaneous remarks.[24] As suggested in *Irwin* v. *Ashurst,* 158 Ore. 61, 65; 74 P. (2d) 1127, 1129, the distinctions of libel and slander seem inapplicable to the law of radio. We did not pass on the question in *Weglein* v. *Golder,* 317 Pa. 437.

Radio broadcasting presents a new problem, so new that it may be said to be still in a state of development and experimentation. It was not conceived nor dreamed of when the law of libel and slander was being formulated. Publication by radio has physical aspects entirely different from those attending the publication of a libel or a slander as the law understands them. The danger of attempting to apply the fixed principles of law governing either libel or slander to this new medium of communication is obvious. But the law is not so firmly and rigidly cast that it is incapable of meeting a new wrong as the demands of progress and change require. In this State our tort actions are in trespass; the pleader need not lay his cause either in slander or in libel, and, as defamation by radio possesses many attributes of both libel and slander, but differs from each, it might be regarded as a distinct form of action. Certainly, there is no necessity of extending to this situation a so-called rule of absolute liability without fault, particularly when our law of libel merely creates a high standard of care. A rule should be applied which will not impose too heavy a burden on the industry, and yet will secure a high measure of protection to the public or those who may be injured.

That a rule of this nature should be adopted becomes increasingly apparent when it is considered that in the field of its operation radio broadcasting is subjected to many restrictions which are not imposed upon newspapers. Any person, firm, or corporation may publish a newspaper without asking the government's consent. Newspapers are the freest medium of communication in this country today. They are protected by the Constitution, by statutes, and by the liberal decisions of many courts. They determine their own policies, print as they desire, unrestricted and unlimited, except by criminal statutes for libel and by the possibility of civil action. The rule of civil liability for libel applicable to them is just and fair, considering the opportunities of correction or control.

On the other hand, a broadcasting company cannot operate without a license from the Federal Government, which must be renewed from time to time. No license may be granted unless the licensee serves the public interest. Radio is a governmentally-regulated industry. The number of stations, their locations and wave-lengths, the hours in which they may broadcast, and their transmitting power, are all subject to regulation. In this manner their effective range of communication and the number of their listeners may be controlled. The power of Congress in this respect, has been upheld as essential. *Radio Comm'n* v. *Nelson Bros. Co.,* 289 U. S. 266. Under the Act of June 19, 1934, c. 652, Section 303, 48 Stat. at L. 1082, as amended May 20, 1937, c. 229, Sections 5, 6(a), 50 Stat. at L. 190, 191, 47 U. S. C. A. Section 303, the Federal Radio Communications Commission is given broad powers to formulate rules for the conduct of radio stations; severe penalities are imposed for violations. *A broadcasting company that oversteps these rules may have its license revoked and lose the value of its entire plant;* this, in the realm of radio, is capital punishment. And, the publication by a broadcasting station of defamatory matter, as also the transmission of certain forms of false and fraudulent advertising, may, if persisted in, result in the revocation of the license of the station or its deletion. But, even here:

> "It seems inherently unreasonable to suppose that a station should be deleted by the Commission for the dissemination of defamation without knowledge or fault of the licensee."[25]

Again, if the broadcaster is to be adjudged liable without fault for a defamatory remark and if the defamation is to be regarded as a libel, he might also become guilty of criminal libel, though, as in the circumstances before us, he is as innocent of wrong as one could possibly be.

All of these considerations cause the newspaper analogy to utterly fail, and no consideration of public policy could in any sense cause a broadcaster to be punished by a rule of absolute liability such as that invoked by the court below. If, as has been suggested, the imposition of such liability on newspapers was originally desirable as a matter of public policy because of the frequency of defamatory publications, and because no other means of discouraging the practice was available, these reasons do not exist in the case of radio broadcasting. Radio defamations have been infrequent, and governmental regulation affords a potent check.

It has been stated that the public "will be best served by a rule which will release a broadcasting station from liability for defamatory remarks made by others, wherever it appears that the management of the station exercised due and reasonable care to avoid the utterance of the defamation."[26] To inflict the rule of absolute liability would serve no useful purpose. It would not only place an unreasonably heavy burden upon the industry, but would open the door to frauds and perjuries as gross as could be practiced in actions of slander, and which could never be practiced successfully against a newspaper publication for libel. In situations like the present case, for instance, the broadcasting company might just as easily be the victim of a conspiracy to defame, participated in by the hotel and the speaker. Such conspiracies to defame might wreck the strongest broadcasting company and might become a widespread evil. Here lies the strength of the newspaper, for its printed word cannot be distorted or fabricated.

It is urged that appellant should have taken some steps to correct the remark before the program closed; that, not having done so it in effect adopted the remark. From the evidence the directors of both appellant and lessee endeavored to have the statement corrected and were partially successful. However, if appellant was liable when the remark was made, the explanation would have been merely in mitigation of damages. The converse is true. Not being liable nor responsible for the utterance when made, the lack of a full explanation or apology would not make appellant liable. Here again the facts must be considered. Any explanation or apology would not only tend to emphasize the defamation, but there would arise the question of its adequacy; the fact that it was omitted would not, of itself, impose liability, under the circumstances before us, against the lessor whose facilities were leased to a responsible agency for the broadcast of a nondefamatory commercial program, without the slightest intimation that they would be abused.

It is suggested that absolute liability should be imposed because appellant could protect itself therefrom by an indemnifying bond. This is the weakest of all arguments, and begs the question. It is indeed a new theory that a substantive rule of law should be based upon the possibilities of an indemnifying bond to save an innocent person from loss. If an indemnifying bond is to be the basis of judgment, then in all actions for personal injury it would be well to establish a general rule of absolute liability, requiring the party to be held liable without fault to take out a bond. It is inconceivable that any bonding company would place at a reasonable figure a bond to indemnify a broadcaster against absolute liability, and against the revocation of its license by the Federal authorities, as a result of an act which it did not perform, inspire, nor control.

In considering the basis of liability for defamation by radio and in balancing the conflicting interests, due regard must be had to the rights of all parties, and to the ultimate and collateral effects any pronouncement might have on public interests. A rule unalterably imposing liability without fault on the broadcasting company under any circumstances is manifestly unjust, unfair and contrary to every principle of morals. A fair aspect of the harm to the persons injured must be considered as well as the circumstances under which the incident occurred. An essential consideration in formulating a rule is the grave possibility of pyramiding damages as well as establishing criminal responsibility if defamatory broadcasting is treated as libel.

---

[24] *Restatement of Torts,* Vol. III, sec. 568, comments (d) and (f).

[25] *Haley, Law of Radio Programs,* 5 George Wash. L. Rev. 157, at pages 188-189.

[26] *Guider, Liability for Defamation in Political Broadcasts,* 2 Journal Radio Law, 708, at 712-713.

We therefore conclude that a broadcasting company that leases its time and facilities to another, whose agents carry on the program, is not liable for an interjected defamatory remark where it appears that it exercised due care in the selection of the lessee, and, having inspected and edited the script, had no reason to believe an extemporaneous defamatory remark would be made. Where the broadcasting station's employe or agent makes the defamatory remark, it is liable, unless the remarks are privileged and there is no malice.

We have assumed in our entire discussion that the remarks here made were actionable per se,[27] and that if the station were liable therefor it would not be necessary to prove malice or special damages. Regardless of these considerations, since it is conceded that there was no possible way in which appellant could have anticipated or prevented the remark, appellee has no cause of action against the broadcasting company.

Judgment reversed and here entered for appellant.

Networks Adopt Arrangement For War Broadcasts

Neville Miller made public on Monday an arrangement voluntarily reached by the Columbia Broadcasting System, Mutual Broadcasting System and National Broadcasting Company last Thursday in New York, for the conduct of their broadcasting during the present emergency. Chairman James Lawrence Fly of the FCC and his Committee, Commissioners Thad H. Brown and Commander T. A. M. Craven, were informed today of this voluntary arrangement at an informal meeting with Neville Miller, President of the National Association of Broadcasters, Niles Trammell, Executive Vice-President of the National Broadcasting Company, Alfred J. McCosker, Chairman of the Board of the Mutual Broadcasting System, and Edward Klauber, Executive Vice-President of the Columbia Broadcasting System.

Mr. Miller explained that the arrangement had not been made public hitherto because it was felt that as a matter of courtesy the new Chairman of the FCC and his Committee associates should be informally made aware of it first.

Mr. Miller expressed satisfaction that the major networks of the country had been able to find ways to apply the experience they have gained in broadcasting many critical events through the years to the war crisis without eliminating that competition which all concerned felt to be so essential to good public service.

The text of the arrangement:

MEMORANDUM OF EUROPEAN WAR COVERAGE

General

Every effort consistent with the news itself is to be made to avoid horror, suspense and undue excitement. Particular effort will be made to avoid suspense in cases where the information causing the suspense is of no particular use to the listener. For example, news of air raid alarms should not be broadcast until we actually learn whether or not there has been an air raid. Also, we will avoid descriptions of hypothetical horrors which have not actually occurred, such as discussing the things that might go on if another ship were to be torpedoed. In all broadcasts about the plight of refugees, the number of killed and wounded, and so on, we will use our best news judgment and try to avoid undue shock to the radio audience, without taking upon ourselves an unjustifiable responsibility for concealing how bad the war really is.

Broadcasters will make every effort to be temperate, responsible, and mature in selecting the manner in which they make the facts of war and its attendant circumstances known to the audience.

Broadcasters will, at all times, try to distinguish between fact, official statement, news obtained from responsible official or unofficial sources, rumor, and matter taken from or contained in the foreign press or other publications, so that, by reporting and identifying these sources, we can help the radio audience as much as possible to evaluate the news brought to it.

The radio audience should be clearly informed that the news from many sources, whether it be press bulletins or direct broadcasts, is censored and must be appraised in the light of this censorship.

Broadcasts from Europe

Broadcasters will designate, if they choose, broadcasts of news and news analysis, either or both, from Europe at such intervals as they individually deem to be desirable. It is advisable that these broadcasts be by Americans as far as possible, and that each individual broadcaster instruct the persons he employs, either permanently or temporarily, in the general principles set forth here. Insofar as European broadcasts contain news analysis, they are to conform to the definition of news analysis hereinafter set forth.

Speeches by foreigners from abroad, public proclamations and statements, and like matter are to be handled by each individual broadcaster in such manner as he deems best to serve his audience, but it is essential that fairness to all belligerents be maintained and that this phase of the operations be carried out in such a way that the American audience shall be as completely and fairly informed as possible.

Broadcasters recognize that, if they do not handle the war with complete responsibility toward the American people, and if they deviate from these principles, they run the risk of involving all other broadcasters in the consequences of their acts. The operation of these principles should include at all times a strong responsibility toward the industry as a whole.

Remotes

If broadcasts become available from scenes of battle, bombed areas, air-raid shelters, refugee camps and so on, broadcasters will not deprive the audience of the ability of radio to give them first-hand information, but will use taste and judgment to prevent such broadcasts from being unduly harrowing.

Propaganda from Europe

If broadcasters put on propaganda disseminated by radio stations or the press of European countries or distributed by these countries in any other manner, each will be guided by his own news judgment and endeavor to label precisely the source of the material, and to do this sufficiently often so that no reasonably careful listener is likely to be misled, and he will also be governed by the same rules of fairness in presenting all sides, though not necessarily in the same broadcast, nor need this judgment be a quantitative one. In this connection, it is recognized that there are certain hazards in bringing these broadcasts direct to this country and extreme care will be exercised in so doing.

Domestic News

All the foregoing general principles will of course apply to domestic broadcasts on any phase of the war. All news broadcasts, whether sponsored or unsponsored, are to remain in the strictest control of the broadcaster in order that the standards herein set forth may be maintained. News analysts are at all times to be confined strictly to explaining and evaluating such fact, rumor, propaganda, and so on, as are available. No news analyst or news broadcaster of any kind is to be allowed to express personal editorial judgment or to select or omit news with the purpose of creating any given effect, and no news analyst or other news broadcaster is to be allowed to say anything in an effort to influence action or opinion of others one way or the other. Nothing in this is intended to forbid any news broadcaster from attempting to evaluate the news as it develops, provided he substantiates his evaluation with facts and attendant circumstances. His basis for evaluation should, of course, be impersonal sincere and honest.

---

[27] Appellant disputes this strenuously, and with much merit.

In order not to keep the public unduly disturbed and alarmed, each broadcaster, exercising his own news judgment, will endeavor to interrupt programs for news bulletins as little as seems consistent with good operations.

Commercial Programs

No propaganda in connection with the war will be allowed in either the commercial announcements or the context of commercial programs. Nothing in this shall be interpreted as barring straight news or news analysis, as herein have been described, from commercial programs.

Speeches

The safeguards of fairness and program balance now applied in the handling of speeches on controversial issues will continue to be applied and, in order to make this effective, every effort will be made to obtain the text of speeches before they are scheduled.

After the meeting, the FCC issued a statement which said, in part:

"At this meeting the representatives of the industry submitted statements of policies and practices of their respective companies in regard to war coverage. They also submitted the "Memorandum of European War Coverage" adopted by a committee of the National Association of Broadcasters at a meeting in New York on September 7, 1939. Cooperative consideration was given to a number of problems which have arisen, but no final conclusions were arrived at.

"Chairman Fly expressed the thought that the radio industry, taken by and large, had rendered an important public service in broadcasting news and comment on war conditions. He said that all parties will continue to give consideration to the most effective means of assuring that broadcasting operaitons in this period of stress will promote the public interest."

FCC STARTS WAR BROADCAST PROCEEDINGS AGAINST WMCA

The FCC on Tuesday issued an order to WMCA, New York, to show cause why its license should not be revoked. The order said the Commission "has information in its possession tending to establish that" the station "caused the interception of secret radio communications sent by the governments of Germany and Gt. Britain" and "caused the said messages to be decoded and broadcast over the facilities of Station WMCA" in violation of the Federal Communications Act.

The text of the order:

Whereas, the Government of the United States has agreed with certain other governments, including Germany and Great Britain, to take all the measures possible, compatible with the system of telecommunications used, with a view to insuring the secrecy of international correspondence; and

Whereas, in order to insure the secrecy of international radio communications, the United States Government has agreed with other governments, including Germany and Great Britain, to take the necessary measures to prohibit and prevent (a) the unauthorized interception of radio communications not intended for the general use of the public; and (b) the divulging of the contents or of the mere existence, the publication or any use whatever, without authorization, of such radio communications; and

Whereas, Section 605 of the Communications Act of 1934 provides that no person not being authorized by the sender shall intercept any communication and divulge or publish the existence, contents, substance, purport, effect or meaning of such intercepted communication to any person, and further provides that no person having received such intercepted communication or having become acquainted with the contents, substance, purport, effect, or meaning of the same or any part thereof, knowing that such information was so obtained, shall divulge or publish the existence, contents, substance, purport, effect, or meaning of the same or any part thereof, or use the same or any information therein contained for his own benefit or for the benefit of another not entitled thereto; and

Whereas, the Federal Communications Commission has been directed by Congress to execute and enforce the provisions of the Communications Act of 1934, as amended; and

Whereas, the Federal Communications Commission has information in its possession tending to establish that the Knickerbocker Broadcasting Company, Inc., licensee of Station WMCA, New York, caused the interception of secret radio communications sent by the governments of Germany and Great Britain, respectively, containing orders to the naval or military forces of said governments to govern the movement of said forces in time of war, and thereafter caused the said messages to be decoded and broadcast over the facilities of Station WMCA, all without authority of the respective senders of said communications; and

Whereas, during the period of tense international relations the public interest, convenience and necessity required strict observance by licensees of radiobroadcast stations in this country of all provisions of international undertakings and federal legislation relating to the secrecy of international communications;

Now, Therefore, It Is Ordered That the Knickerbocker Broadcasting Company, Inc., at or before 11:00 a. m., September 15, 1939, file a written statement under oath in the office of the Secretary of the Commission, Washington, D. C., which shall set forth all facts and circumstances pertaining to said alleged interception and broadcasting and shall show cause why the Federal Communications Commission should not, pursuant to Section 312 (a) of the Communications Act of 1934, as amended, revoke the license for said Station WMCA for violation of and failure to observe the provisions of the Communications Act of 1934, as amended, constituting conduct by said licensee contrary to the public interest.

WMCA ANSWERS COMMISSION

WMCA, in an answer filed with the Commission on Thursday, stated that it had neither directly nor indirectly intercepted any secret radio communications sent by the governments of Germany and Great Britain. The answer was sworn to by William Weisman, vice president of the Knickerbocker Broadcasting Company, licensee of WMCA. The complete answer is as follows:

William Weisman, being duly sworn, deposes and says:

1. I am Vice-President of Knickerbocker Broadcasting Company, Inc. (WMCA), and make this affidavit in answer to the Order to Show Cause made in the above-entitled proceeding on September 12, 1939.

2. Knickerbocker Broadcasting Company, Inc. (WMCA) neither directly nor indirectly intercepted or caused the interception of secret radio communications sent by the governments of Germany and Great Britain, respectively, or any other government, containing orders to the naval or military forces of any said governments to govern the movement of said forces in time of war. Neither has Knickerbocker Broadcasting Company, Inc. (WMCA) at any time, under any circumstances, intercepted any code messages of any government in time of war or any other times.

3. In the course of its daily broadcasting schedule, Knickerbocker Broadcasting Company, Inc. (WMCA) has broadcast news dispatches, including those emanating from the governments of Germany and of Great Britain. However, Knickerbocker Broadcasting Company, Inc. (WMCA) has no news-gathering bureau of its own and relies entirely for its sources upon accredited news-gathering agencies.

A. In connection therewith, Knickerbocker Broadcasting Compan, Inc. (WMCA) has a written contract with King Features Syndicate, Inc. (International News Service Department). A photostatic copy of said contract is hereto annexed, marked "Exhibit A," and made a part hereof. By virtue of said agreement there is installed in the offices of Knickerbocker Broadcasting Company, Inc. (WMCA) a news ticker to which is transmitted the regular news service of King Features Syndicate, Inc. (International News Service Department). Knickerbocker Broadcasting Company, Inc (WMCA) edits the said news reports and prepares the same for broadcasting.

B. Because of the unusual situation in Europe during the past few weeks, and of the great interest of the American people in every phase of news emanating from Europe, Knickerbocker Broadcasting Company, Inc. (WMCA) entered into an agreement with the New York Herald Tribune, by the terms of which the New York Herald Tribune has furnished Knickerbocker Broadcasting Company, Inc. (WMCA), for broadcasting purposes, special news flashes which it has received from tis own direct sources and correspondents in Europe. Copies of the letters constituting such agreement are annexed hereto, marked "Exhibit B-1," "Exhibit B-2" and "Exhibit B-3," and made a part hereof. See also photostatic copy of bill rendered by New York Herald Tribune, annexed hereto, marked "Exhibit C," and made a part hereof.

C. By virtue of an oral arrangement with the New York Daily Mirror there is broadcast over the facilities of Station WMCA, once each day for 15 minutes, a news program emanating directly from the editorial rooms of the said New York Daily Mirror. These broadcasts have always consisted of news items which had already appeared in that publication.

4. I state upon my oath that Knickerbocker Bboadcasting Company, Inc. (WMCA) has not had, nor has it now, any knowledge of any secret or other code used by the governments of Germany or of Great Britain, or of any of the departments of either of said governments.

5. By this affidavit I swear that Knickerbocker Broadcasting Company, Inc. (WMCA) has not broadcast any news item or other information which it obtained illegally or which Knickerbocker Broadcasting Company, Inc (WMCA) had any reason to believe was obtained illegally by any other person, firm or corporation. In fact, all of the news items which were broadcast by Knickerbocker Broadcasting Company, Inc. (WMCA) have appeared in the daily newspapers in the regular course of publication.

6. I am aware of the advertisement which appeared in the Radio Daily of September 6, 1939, in which is reproduced excerpts from columns published in New York City newspapers, and in which it is stated that WMCA had decoded secret orders of the governments of Germany and Great Britain. Knickerbocker Broadcasting Company, Inc. (WMCA) does not control, directly or indirectly, in any manner, either the said publications or any of the writers of the said columns. Knickerbocker Broadcasting Company, Inc. (WMCA) used the said items in the advertisement only as an indication of the fact that WMCA did broadcast the news items in advance of other radio stations or in advance of their publication in the daily newspapers in New York City, but not for the purpose of advertising that WMCA had in fact intercepted or decoded any of the secret orders of Germany, Great Britain or any other government.

7. I wish to make entirely clear that neither Knickerbocker Broadcasting Company, Inc. nor any of its officers, directors or employees have, directly or indirectly, violated any of the provisions of the Communications Act of 1934 as amended, or any parts thereof, especially those specified in the said Order to Show Cause.

FCC REVISES LOG RULES

The Federal Communications Commission September 12 amended Section 3.90 (a) (2) of the Standard Broadcast Rules by deleting the words "together with the name or title of each" and adding the words "of the complete program" so that the rule will read:

"... (2) An entry briefly describing each program broadcast, such as 'music', 'drama', 'speech', etc., together with the name or title thereof, and the sponsor's name with the time of the beginning and ending of the complete program. If a mechanical record is used the entry shall show the exact nature thereof such as 'record', 'transcription', etc., and the time it is announced as a mechanical record. If a speech is made by a political candidate, the name and political affiliations of such speaker shall be entered."

The Commission's action was taken following complaint that the previous rule requiring a log entry of the names of the particular records used imposes a financial burden, particularly on local stations. The Commission also stated that a further study would be made of the rules governing log entries to insure that they impose no unnecessary burden on any particular group of stations.

798 STATIONS

During the month of August, the Federal Communications Commission dropped one station and issued operating licenses to two stations. The Commission granted five permits for the construction of new stations. A comparative table by months follows:

	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1
Oper't'g stations	722	727	729	732	734	735	735	738	739
C'struct'n permits	42	39	37	37	38	38	43	56	59
Total	764	766	766	769	772	773	778	794	798

DISTRICT 15

Copyright, record licenses and the A. F. of M. were the principal topics of discussion at a District 15 meeting on September 6 in San Francisco. President Howard Lane presided. The following members attended:

Will Thompson, Jr., KROY, Sacramento; William D. Pabst, KFRC, San Francisco; Chas. P. Scott, KTKC, Visalia; Ed Franklin, KJBS, San Francisco; Marion S. Walker, KHUB, Watsonville; Howard C. Walters, KDON, Monterey; Will Gunzendorfer, KSRO, Santa Rosa; Preston D. Allen, KLX, Oakland; Wm. C. Grove, KSAN, San Francisco; S. H. Patterson, KSAN, San Francisco; H. P. Drey (formerly KROW), Oakland; E. L. Finley, KSRO, Santa Rosa; Gurden Moosey, KYA, San Francisco; W. H. Bates, Jr., KTRB, Modesto; S. W. Warner, KLS, Oakland; Philip G. Lasky, KSFO-KROW, San Francisco; Ralph R. Brunton, KQW, San Jose; Art Westlund, KRE, Berkeley; Howard Lane, KFBK, Sacramento; Chas. Whitmore, KTKC, Visalia; Lloyd Yoder, KPO-KGO, San Francisco, and Lou Kiplinger, KARM, Fresno.

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED FINDINGS OF FACT

The Federal Communications Commission has announced its Proposed Finding of Fact proposing to grant the application of Station KOY, **Phoenix, Arizona,** to change its frequency from **1390** to **550 kilocycles.** The station operates with 1000 watts.

The Commission stated in its Proposed Finding that the granting of this application would improve the signal strength of the station in the areas now served and "extend its service to a substantially larger area and greater population than that now served by the station."

Application of the Bureau of Education (A. Corenson, owner and manager), **Montebello (Los Angeles), California,** for a construction permit for a new station to operate on **1420 kilocycles,** 100 watts, daytime hours of operation is proposed to be denied by the Commission in a Proposed Finding of Fact.

In the Proposed Finding, the Commission stated that the facts of record do not afford a sufficient basis for a finding "that the applicant is a proper person to be entrusted with the responsibility of operating a broadcast station in the interests of the public, or that the applicant possesses all the requisite qualifications of a licensee."

The Commission in another Proposed Finding of Fact proposes to deny the application of Lawrence J. Heller for a construction permit to establish a new station in **Washington, D. C.,** to operate on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time, and an application for a special experimental authorization to construct and operate a synchronous station in Washington, to be used in conjunction with the facilities requested for a broadcast station with 10 to 100 watts power, unlimited time.

The Commission in a Proposed Finding of Fact proposes to deny the application of the Chicago Federation of Labor of **Chicago, Illinois,** for renewal of license for international broadcast station W9XAA; and to dismiss without prejudice to the filing of a new application for a new international station, the application of Radio Service Corporation of Utah for consent to voluntarily assign the license of Station W9XAA from the Chicago Federation of Labor to the Radio Service Corporation of Utah, and move the station's location from **York Township, Illinois,** to **Saltair, Utah.**

In its Proposed Finding, the Commission stated that the licensee of W9XAA "failed to establish that it was engaged in a program of research and experimentation contemplated by the Commission's rules governing broadcast stations in the international service, in effect during the period in which the license for this station was outstanding."

DECISIONS OF COMMISSION

The Federal Communications Commission has denied the application of Station WLAW, **Lawrence, Massachusetts,** for a construction permit to increase its operating assignment from sunset at Lawrence to sunset at San Francisco and install a directional antenna for nighttime use. The station now operates on **680 kilocycles,** 1000 watts, daytime only.

The Commission found that the operation of the station as proposed would not provide primary service for the Lawrence metropolitan area during nighttime hours because of objectionable interference from Station WPTF. Chairman Fly did not participate in this decision.

The application of WNEL, **Juan Piza, San Juan, Puerto Rico,** for license renewal has been granted by the Commission.

The Commission in a Final Order has granted the application of the Catawba Valley Broadcasting Company for the erection of a new station at **Hickory, North Carolina,** to use **1370 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

The application of WCOV, **Montgomery, Alabama,** for modification of its license authorizing unlimited time on **1210 kilocycles,** instead of daytime hours only, using 100 watts power, was granted by the Commission.

In a Final Order, the Commission has granted the application of the Southern Oregon Broadcasting Company to erect a new station at **Grants Pass, Oregon,** to use **1310 kilocycles,** 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, September 19. They are subject to change.

Tuesday, September 19

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—C. P., **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

Thursday, September 21

Oral Argument Before the Commission

Report No. B-40:

KRRV—Red River Valley Broadcasting Corp., Sherman, Tex.—C. P., **880 kc.,** 1 KW, unlimited time (DA day and night). Present assignment: **1310 kc.,** 250 watts, daytime.

Report No. B-54:

NEW—Spartanburg Advertising Co., Spartanburg, S. C.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

Report No. B-66:

NEW—Wendell Mayes, Joe N. Weatherby and Wm. J. Lawson, d/b as "Brown County Broadcasting Co.," Brownwood, Tex.—C. P., **990 kc.,** 1 KW, daytime.

Friday, September 22

Further Hearing

NEW—Clarence H. Frey and Robert O. Greever, Logan, W. Va.—C. P., **1200 kc.,** 100 watts, daytime.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

October 9

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., **1410 kc.,** 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass. (main and auxiliary).—Renewal of license, **1410 kc.**, 1 KW, 1 KW LS (main), *500 watts, 1 KW LS (auxiliary), unlimited time. *Auxiliary purposes only.

NEW—Harold Thomas, Bridgeport, Conn.—C. P., **1310 kc.**, 100 watts, 250 watts LS, unlimited time.

October 17

NEW—Las Vegas Broadcasting Co., Inc., Las Vegas, Nev.—C. P., **1420 kc.**, 100 watts, 250 watts LS, unlimited time.

November 2

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—C. P., **620 kc.**, 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1310 kc.**, 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

WMFO—James R. Doss, Jr., Decatur, Ala.—Granted voluntary assignment of license of station WMFO from James R. Doss, Jr., to Tennessee Valley Broadcasting Co., Inc.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KHSL, Chico, Calif.; KROW, Oakland, Calif.; KRSC, Seattle, Wash.; KVOR, Colorado Springs, Colo.; WASH, Grand Rapids, Mich.; WDBJ and auxiliary, Roanoke, Va.; WDOD, Chattanooga, Tenn.; WEBC and auxiliary, Duluth, Minn.; WGNY, Newburg, N. Y.; WJBO, Baton Rouge, La.; WMRO, Aurora, Ill.; WNBZ, Saranac Lake, N. Y.; WREN, Lawrence, Kans.; WTAW, College Station, Texas.

MODIFICATION OF LICENSES TO INCREASE POWER AUTHORIZED

The following stations were granted modification of licenses to increase power to 250 watts:

WABI, Bangor, Maine; WJTN, Jamestown, N. Y.; WMAS, Springfield, Mass.; WGAL, Lancaster, Pa.; WMPC, Lapeer, Mich.; WJAC, Johnstown, Pa.; WWSW, Pittsburgh, Pa.; WRAK, Williamsport, Pa.; WCMI, Ashland, Ky.; WOMI, Owensboro, Ky.; WHLS, Port Huron, Mich.; WFTC, Kinston, N. C.; KALB, Alexandria, La.; WJBY, Gadsden, Ala.; WJHL, Johnson City, Tenn.; KRIC, Beaumont, Tex.; WOPI, Bristol, Tenn.; KFVS, Cape Girardeau, Mo.; WRJN, Racine, Wis.; WGL, Fort Wayne, Ind., and KAST, Astoria, Ore.

MISCELLANEOUS

KPDN—R. C. Hoiles, Pampa, Tex.—Granted special temporary authority to operate unlimited time for the period September 7 to September 14, for the purpose of broadcasting war news only.

W2XAB—Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to conduct equipment tests on television station for a period of 10 days from September 8.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate a temporary unmodulated 100-watt crystal controlled transmitter on **1090 kc.** in the Baltimore area one hour after sunrise to one hour before sunset, for the period September 12 to October 11, in order to conduct a site survey.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate from 6 to 10 p. m., CST, for the period September 10 to 16, in order to broadcast special night ceremonies and programs originating at Kentucky State Fair, using 100 watts after local sunset.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test high frequency broadcast equipment of station W1XOJ on frequency **43000 kc.**, with power not to exceed 2 KW, for the period September 17 to October 16, in order to make adjustment on equipment installed and for tuning and adjustments of antenna elements which are now assembled for erection atop 400-foot mast.

NEW—United Theatres, Inc., San Juan, P. R.—Granted request for further extension in which to file opposition for reopening case in re application for new station filed by Enrique Abarca Sanfeliz, San Juan, P. R., an additional 5 days from August 23 to August 28.

WLEU—WLEU Broadcasting Corp., Erie, Pa.—By motion of counsel, petition to intervene in the hearing on the application of Presque Isle Broadcasting Co., Erie, Pa., was withdrawn.

WTNJ—WOAX, Inc., Trenton, N. J.—Granted petition to accept amendment for change in hours of operation in re Docket No. 5667; continuance of hearing in Docket 5657 from November 6, and to hear both dockets together. Opposition and motion to strike filed by WCAM and WCAP overruled, counsel for WCAM and WCAP noting an exception.

NEW—Moody Bible Institute Radio Station, Chicago, Ill.—Referred to Commission en banc at oral argument on this case scheduled for September 14, 1939, the motion to amend application in re Docket No. 5321.

KFRO—Voice of Longview, Longview, Tex.—Modified construction permit (B3-P-2117) to change frequency, increase power, change hours of operation, move transmitter, install new transmitter and directional antenna for night use, further requesting change in type of equipment, changes in antenna, move transmitter and extend commencement and completion dates.

1420 Kilocycles

KDNT—Harwell V. Shepard, Denton, Tex.—Construction permit to make changes in equipment, increase power from 100 watts to 250 watts.

KLBM—Harold M. Finlay and Eloise Finlay, La Grande, Ore.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

KORE—Frank L. Hill and C. G. Phillips, d/b as Eugene Broadcast Station, Eugene, Ore.—Construction permit to make changes in equipment and increase power from 100 to 250 watts.

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

NEW—R. B. Terry, D. A. Rawley, Staley A. Cooke and Rudy Fonville, d/b as Burlington Broadcasting Co., Burlington, N. C.—Construction permit for a new broadcast station to be operated on **1420 kc.**, 100 watts, daytime.

WMSD—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Construction permit to make equipment changes and increase power from 100 watts to 250 watts.

KGFF—KGFF Broadcasting Co., Inc., Shawnee, Okla.—Modified license to increase power from 100 watts night, 250 watts, to 250 watts day and night.

1440 Kilocycles

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Modified license to increase power from 500 watts to 1 KW.

1500 Kilocycles

KYSM—F. B. Clements & Co., a co-partnership composed of F. Braden Clements, Clara D. Clements and C. C. Clements, d/b Southern Minnesota Supply Co., Mankato, Minn.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—Construction permit to make equipment changes.

KVWC—R. H. Nichols, W. H. Wright and Stewart Hatch, a partnership, d/b as The Northwestern Broadcasting Co., Vernon, Tex.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

KGKY—Hilliard Co., Inc., Scottsbluff, Nebr.—Modified license to increase power from 100 watts night, 250 watts day, to 250 watts day and night.

MISCELLANEOUS

NEW—Midland Broadcasting Co., Kansas City, Mo.—License to utilize the former equipment of high frequency broadcast station W9XER as an order relay broadcast station on **31220 kc.**, with power of 50 watts, A3 emission. Amended to request **35620, 37020** and **39260 kc.**, using 25 watts power in addition to above frequency **31220 kc.**, using 50 watts power.

WAIO—WDZ Broadcasting Co., Portable-Mobile.—License to cover construction permit (B4-PRY-188) for new relay broadcast station.

WFYB—Columbia Broadcasting System, Inc., Portable-Mobile.—Modified license to change area and broadcast station with which it is to be operated from area of Cincinnati, Ohio, Radio Station WKRC, to area of New York, N. Y., Radio Station WABC-WBOQ.

NEW—KRIC, Inc., Portable-Mobile.—Construction permit for new low frequency relay broadcast station to be operated on **1646, 2090, 2190, 2830 kc.**, 40 watts, A3 emission, area Beaumont, Tex.

KBRG—WDAY, Inc., Portable-Mobile.—License to cover construction permit (B4-PRY-175) for new low frequency relay station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

AC Spark Plug Company—See General Motors Corporation.

General Motors Corporation, Detroit, and its subsidiary, AC Spark Plug Company, Flint, Mich., are charged with violations of the Clayton, Robinson-Patman and Federal Trade Commission Acts in the sale of spark plugs, oil filters, and accessories.

The respondents allegedly entered into contracts with some 1,500 wholesalers concerning the sale of "AC" products. It was alleged that certain of the contracts provided that the distributors handle "AC" products on an exclusive basis, and that prices were fixed and charged on the basis of such agreements. With other wholesalers, the respondents allegedly fixed prices and sold "AC" products to such dealers on the agreement, condition and understanding that they would not use or deal in similar competing products. All of these contracts were alleged to be in violation of Section 3 of the Clayton Act prohibiting exclusive dealing arrangements.

The result and effect was to compel many dealers to cancel sales contracts with the respondents' competitors and to substantially lessen competition in the sale of spark plugs and oil filters, according to the complaint.

Price discrimination allegedly was practiced by the respondents in violation of Section 2(a) of the Robinson-Patman Act between classes of their direct accounts, classes of their indirect accounts; between direct and indirect accounts; between contract accounts and non-contract accounts; and between all replacement accounts and original equipment accounts, with the effect of substantially lessening competition, tending to create a monopoly, and preventing competition between the customers receiving benefit of the discrimination and those not receiving it, and between the respondents and their competitors. (3886)

K. K. Importing Corporation—In a complaint, the K. K. Importing Corporation, 45 John Street, New York, was charged with violating the provisions of Section 5 of the Federal Trade Commission Act. The respondent is engaged in importing products into the United States and reselling them in foreign commerce. In connection with such business the respondent is charged with inducing a Japanese manufacturer to misbrand Japanese-made optical lenses by falsely branding them or their containers with the words and letters "Made in U. S. A." The respondent is further charged with procuring foreign business by negotiating the export of such falsely branded products to Cuban importers.

The complaint alleges that purchasers in certain foreign countries, including Cuba, have a preference for products made in the United States as distinguished from like products made in Japan, and that certain foreign countries, including Cuba, grant reductions in import and custom duties on products made in and imported from the United States. (3885)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

Crystex of Florida, Inc., 414 18th St., Miami Beach, agreed to cease representing by word or picture that its waterproofing product, "Crystex", has been used in the construction of Boulder Dam or any other specified structure, or that the company has branch offices or establishments in Los Angeles, Houston, Tex., or any other place, when such are not the facts. The respondent will also cease representing that its product has had 10 years of proving or testing in excess of the actual time. (2529)

Signal Manufacturing Company, trading as Simaco Products Company, 587 Washington St., Lynn, Mass., agreed to cease using the word "rubber" or any other word connoting rubber, either alone or in connection with the word "flexible" or with any other words as descriptive of electric fan blades which are not composed of rubber, or using the word "rubber" so as to imply that the blades are made wholly of rubber, when such is not a fact. The stipulation provides that if the blades are composed in substantial part of rubber and in part of other materials and the word "rubber" is used, then it shall be accompanied by some other words printed in equally conspicuous type so as to indicate clearly that the blades are composed in part of material other than rubber. (2531)

Simaco Products Company—See Signal Manufacturing Company.

Trojan, Inc., 2210 Wabansia Ave., Chicago, stipulated that it will cease using the word "Prism" or any similar term such as "Prisma", in any way, to describe its field glasses and binoculars when such products are not of the prism type. The respondent will also discontinue advertisements implying that its products have prism erecting systems, when such is not a fact. (2530)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

American Chemical Company—See Averbach Company, Inc.

American Oil Company, Baltimore, and General Finance, Inc., Washington, operator of a gasoline station at Florida Ave. at 14th St., N. W., and engaged in selling and in financing sales of taxicabs, were ordered to discontinue price discriminations in the sale of gasoline in violation of the Robinson-Patman Act.

The Commission, in substance, ordered General Finance, Inc., to cease and desist from obtaining gasoline on a commercial consumer's contract for its own use, then reselling it to the public, to taxicabs, or others.

Findings of the Commission are that American Oil Company, by selling gasoline and petroleum products to General Finance, Inc., at prices substantially lower than those charged by it for such products to other retail dealers in the District of Columbia, discriminated in price between General Finance and its other dealers in the District, the effect having been to lessen competition between General Finance and the other dealers and to prevent and destroy competition with American Oil Company and with General Finance, which received the benefit of the discrimination. The order prohibited such discrimination.

It was also found that prices fixed and agreed upon in contracts between American Oil and the other parties were based on the representation that gasoline and petroleum products purchased thereunder were for the purchaser's own consumption only and not for resale and that General Finance, by reselling such products so purchased under the contracts, thus obtained from American Oil Company an unlawful price discrimination in its favor and to the injury of other retail gasoline dealers competing with it, who were required to pay American Oil Company and other suppliers the full posted retail dealer tank wagon prices. This discrimination was also prohibited by the order.

The findings continue that General Finance, Inc., has well known that the prices fixed in the contracts were lower than those paid by other retail dealers competing with General Finance and the order prohibited this company from inducing or receiving the various discriminations found to have been made. (3843)

Anco Company—See C. R. Anthony Company.

C. R. Anthony Company, Oklahoma City, Okla., operator of 57 retail department stores in Oklahoma, Kansas, Texas, and New Mexico, was ordered to discontinue accepting brokerage fees in violation of the Robinson-Patman Act.

Findings are that C. R. Anthony Company under the name of The Anco Company, 1450 Broadway, New York, had been receiving from the seller respondents, without performing any services for them, so-called brokerage fees and commissions which amounted to an agreed perecntage on quoted sales prices of women's apparel and other merchandise sold to The Anco Company for resale in the C. R. Anthony Company chain stores.

Under the order, the seller respondents were prohibited from paying any fee or commission as brokerage to C. R. Anthony Company, upon purchases made in its own or any other name. The C. R. Anthony Company, under its own or any other name, was ordered to cease accepting brokerage fees in connection with its purchase of merchandise. (3834)

Averbach Company, Inc.—An order to discontinue misleading representations in the sale of flavoring compounds, foodstuffs, toilet articles and novelties was entered against Averbach Company, Inc., Maid-O-Best, Inc., G. M. Moses, Esther Averbach, Morris Averbach, and Jerome Averbach, the latter three trading as The Muriel Company and as American Chemical Company, 1449 University Ave., St. Paul, Minn.

Under the order, the respondents are to discontinue representing that they manufacture the product they sell, unless they absolutely control a plant in which such products are made. The respondents were further ordered to cease representing that so-called "special offers" or "special deals" are limited to a given period of time or to a given number of persons, when the prices stated in such offers are the regular prices, or that any specified amount of money is on deposit in some financial institution, such sum to be used to cover refunds for returned Maid-O-Best Products, unless that is a fact.

The order further forbids the respondents from using the term "vanilla extract" to describe a flavoring product, unless prepared with a vehicle of ethyl alcohol and containing a flavoring content at least 50 per cent of which shall consist of true vanilla made from the vanilla bean.

Findings are that in July, 1936, the manufacturing businesses formerly conducted by G. M. Moses through Maid-O-Best, Inc., and by Morris Averbach, trading as The Muriel Company and as The American Chemical Company, were taken over by Averbach Company, Inc., organized and financed by Averbach and members of his family. (3342)

G. Bernardi, Cleveland, Ohio, was ordered to cease representing that "Benaris", or any similar preparation, is a cure or remedy for colds, catarrh, bronchitis, laryngitis and kindred ailments; causes greater diaphragmatic breathing, or results in finer head tones or increases the resonance, volume or quality of the voice. The respondent was also ordered to discontinue representing that "Benaris" will relieve headaches, unless such representation is limited to headaches which are due to congestion of the mucous membranes of the air passages. (3857)

Great Britain Spiritualist Church, Detroit, and Mrs. Charles P. Colbert, Virgil L. Eckridge, Mary Hopkins, and Delmar William White, individually and as officers, directors and agents of the corporation, have been ordered to cease and desist from advertising or representing, among other things, that magic qualities are attached to their products such as "Grendeline Holy Oil," "Fox Fire Powder," "Mintolean Mojou Lucky Oil," and "Jungles Floor Wash," or that the products or the substances from which they are made are imported from Africa or India, when such is not a fact.

Findings of the Commission are that the respondents are engaged in the sale and distribution of so-called "holy oils," books, tracts, talismans, charms, soaps, perfumes and similar products. (3474)

General Finance, Inc.—See American Oil Company.

Maid-O-Best, Inc.—See Averbach Company, Inc.

Muriel Company—See Averbach Company, Inc.

Peanut Novelty Company—William P. Bennett and Charles C. Bennett, trading as Peanut Novelty Company, Dallas, Texas, were ordered to cease selling packages of peanuts or any other merchandise containing coins, such packages being assembled with other packages of similar appearance not containing coins, for resale to the general public by means of a lottery plan. The respondents were also prohibited from furnishing dealers with display cards or other printed matter informing the purchasers that the merchandise was being sold by means of a lottery device. (2961)

United Distributors, Inc., Louisville, Ky., was ordered to cease representing that use of its preparation "Wittone" will lift mental depression regardless of its cause, and will assure, in all cases, good health and vitality, and that the product contains any specified number of carminatives other than the actual number, or is a remedy or an adequate treatment for all deranged stomachic conditions, inactive livers, weak kidneys or similar disorders. Further representations to be discontinued are that professional medical opinion is to the effect that 87 percent, or any other percentage of all ailments are traceable to constipation as the fundamental cause, unless such percentage is generally recognized by a consensus of the medical profession. (3708)

Walls Sales Company—See Wright Products Company.

Wright Products Company—Isaac S. Friedman, trading as Wright Products Company, 4303 North Keeler Ave., Chicago, and Jean Lawrence, trading as Wells Sales Company, 4903 North Monticello Ave., Chicago, were ordered to cease supplying others with lottery devices for use in the sale of merchandise, or selling any merchandise by the use of lottery devices. (3806 and 3767)

Zendejas Products Corporation, Los Angeles, Cal., and Jose Silva, trading as Zendejas Products Company, Los Angeles, Calif., were ordered to cease representing directly or by implication that "Zendejas Medicine" contains well-known curative properties of many plants, barks and roots; contributes to the purification of the blood; is an alternative for the general digestive system, or promotes a formation of new and healthy elements. The respondents were further ordered to discontinue claims that "Zendejas Medicine" is a cure for all ailments for which an iodized medicine could be prescribed, and that millions of rheumatics recommend its use. The order also prohibits advertisements which fail to reveal that "Zendejas Medicine" contains potassium iodide and may be injurious to persons afflicted with latent tuberculosis or toxic goiter and that its indiscriminate use by the lay public is dangerous. The respondents were also ordered to discontinue advertisements which represent "Zendejas Ointment" as being a competent and effective treatment for eczema, rash, ringworm, itching and other skin diseases, or which fail to reveal that this preparation contains betanaphthol, a dangerous drug, which should be used only under a physician's supervision. (3679)

FTC CLOSES CASES

The Federal Trade Commission closed without prejudice its case against the now-dissolved Pacific Amusement Manufacturing Company, which also traded as Pacific Manufacturing Corporation, 4223 Lake St., Chicago. The respondent was charged with having used lottery schemes in the sale of chewing gum and other merchandise. The respondent corporation having been dissolved, the case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.

The Commission has also closed wtihout prejudice its case in which the now-dissolved Brinker Candy Corporation, 3223 West Lake St., Chicago, was charged with having used lottery schemes in the sale of candy. The respondent corporation having been dissolved, the case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 38, September 22, 1939

Enthusiastic Convention Approves Music Plan

Creation of an independent source of music for the broadcasting industry, authorized at last week's special NAB convention, is proceeding rapidly. Legal details were being worked out this week, and SEC approval will be sought shortly.

An enthusiastic convention directed the NAB to proceed on four fronts to free the industry from the chains of a music monopoly:

1. To create an independent source of music by organizing an industry-owned corporation to obtain and supply popular numbers. The convention decided that each broadcaster should contribute an amount equal to one-half of his 1937 ASCAP payment for stock in this corporation and license fees. All elements in the industry—networks, affiliates and independents—are to be represented on the board of directors of this new corporation. Further details of this plan may be found in the convention resolution printed below.

2. To continue NAB assistance to broadcasters involved in copyright monopoly litigation.

3. To urge the prosecution of the pending Federal monopoly suit against ASCAP.

4. To seek amendment of the Copyright Act of 1909 "so as to bring it into conformity with the needs of the broadcasting industry".

Copyright Resolutions

The special NAB Convention in Chicago last week adopted the following four resolutions dealing with the music copyright problem:

I

Resolved, That this convention authorizes the Board of Directors to cause a corporation to be organized with an authorized capital stock of 100,000 shares of the par value of $1 a share, and with broad powers to carry out the building of an alternative source of music suitable for broadcasters and to make the same available to broadcasters and others.

Resolved, That this convention authorizes the Board of Directors to do all things necessary and proper to enable the creation of an additional source of music suitable for radio broadcasting purposes, and that the convention urge all broadcasters, whether or not members of the National Association of Broadcasters, to pay to said corporation for stock and license fees a total sum equal to one-half of the total license fees paid or payable by each such broadcaster to the American Society of Composers, Authors, and Publishers covering the calendar year 1937, and that the convention urge those broadcasters, who did not pay ASCAP license fees during all of said year, to pay the amounts allocated to them by the NAB or by the music corporation to be formed.

Further Resolved, That this convention authorizes Neville Miller to act as President of the corporation and Everett E. Revercomb to act as Secretary and Treasurer of the corporation until a paid Secretary-Treasurer is

employed, and authorizes the following to be the directors of the corporation, until the first meeting of stockholders of the corporation:

Neville Miller, representing National Association of Broadcasters;

Walter Damm, representing Newspaper-owned Stations;

John Elmer, representing Independent Stations;

Edward Klauber, representing Columbia Broadcasting System, Inc.;

Lenox R. Lohr, representing National Broadcasting Company, Inc.;

Samuel R. Rosenbaum, representing Independent Radio Network Affiliates;

John Shepard, III, representing Regional Broadcast Stations.

Further Be It Resolved, That this convention authorizes the National Association of Broadcasters to bear the expense of the corporate organization of the corporation and the registration of its security issue in accordance with applicable laws and the expense of the retention of counsel, accountants and such other persons as the National Association of Broadcasters shall deem necessary, on the understanding that the National Association of Broadcasters is to be reimbursed by the corporation for any and all of such expense when the corporation secures sufficient funds to enable the effective operation of the corporation in the judgment of the directors of the same for the purposes for which it is organized.

II

Resolved, That the assistance to broadcasters involved in copyright monopoly litigation be continued by the headquarters legal department, and that active cooperation with local attorneys be made available upon request of the District Director.

III

Resolved, That the National Association of Broadcasters regards the prosecution of the pending suit of the United States of America against the American Society of Composers, Authors and Publishers as vitally necessary in the interests not only of the broadcasting industry but of the American public, and respectfully urges the speedy and vigorous prosecution of such suit.

IV

Resolved, That the National Association of Broadcasters further, by all legitimate means, the amendment of the Copyright Act of 1909 so as to bring it into conformity with the needs of the broadcasting industry.

IRNA REORGANIZES

Permanent organization of the Independent Radio Network Affiliates was completed at the convention at the Palmer House in Chicago last week. The organization consists of 325 radio stations in the United States affiliated with the networks of the National Broadcasting Company, Columbia Broadcasting System and Mutual Broadcasting System, but independently owned and not managed or operated by the network companies.

Samuel R. Rosenbaum, WFIL, Philadelphia, was re-elected chairman for the ensuing year, and Paul Morency, WTIC, Hartford, was elected vice chairman, to fill the vacancy caused by the resignation of Mark Ethridge, of WHAS, Louisville.

The convention was attended by 125 delegates, representing 150 of the member stations. The convention elected the following board of directors under a plan of reorganization, under which the organization has obtained a corporate charter:

For three years: Mark Ethridge, WHAS, Louisville; L. B. Wilson, WCKY, Cincinnati; Samuel R. Rosenbaum, WFIL, Philadelphia; Edwin W. Craig, WSM, Nashville; H. K. Carpenter, WHK, Cleveland.

For two years: Charles W. Myers, KOIN, Portland; John A. Kennedy, WCHS, Charleston; W. J. Damm, WTMJ, Milwaukee; Paul Morency, WTIC, Hartford; John Shepard, 3rd, Colonial Network, Boston.

For one year: I. R. Lounsberry, WGR, Buffalo; Edgar Bill, Peoria; E. B. Craney, KGIR, Butte; George W. Norton, Jr., WAVE, Louisville; Gene O'Fallon, KFEL, Denver.

The Board designated the following to serve as its executive committee for the ensuing year: Samuel R. Rosenbaum, Chairman; Mark Ethridge, Walter J. Damm, L. B. Wilson, and John Shepard, 3rd.

The executive committee was authorized to set up and maintain a permanent office for the organization, which is devoted to protecting the interests of the stations in their relations with the national networks. The immediate subject which will receive attention is the negotiations and the campaign now being waged by the broadcasting industry in relation to the problems arising out of the use of copyrighted music. In addition, the organization has for one of its objectives the elimination of certain practices to which it objects in connection with commercial announcements and copy in network programs.

Two years ago, the organization was influential in settling the threatened nation-wide strike of musicians in radio stations. The contract which was then entered into will expire in January, 1940, and the subject of the future course of action of the stations in this regard is also receiving study.

INDEPENDENTS REORGANIZE

At a meeting in Chicago prior to the NAB Special Convention, the National Committee of Independent Broadcasters voted to reorganize as the National Independent Broadcasters, Inc., with Harold A. Lafount (WCOP) as president, Edward A. Allen (WLVA) as vice president, and Lloyd C. Thomas (KGFW) as secretary-treasurer.

Seventeen district directors were elected as follows:

District 1, Stanley Schultz (WLAW); District 2, Harold A. Lafount (WCOP); District 3, Frank Smith, Jr., (WWSW); District 4, Edward Allen (WLVA); District 5, Maurice Coleman (WATL); District 6, Jack Draughon (WSIX); District 7, Jack Howard (WCPO); District 8, James Hopkins (WJBK); District 9, Ralph Atlass, (WJJD); District 10, Edgar Shutz (WIL); District 11, Gregory Gentling (KROC); District 12, K. W. Pyle (KFBI); District 13, James Curtis (KFRO); District 14, Frank Hurt (KFXD); District 15, Arthur Westlund (KRE); District 16, Leo Tyson (KMPC); District 17, T. W. Symons (KXL).

Neutrality

Convention Resolution

The Special NAB Convention in Chicago last week adopted the following resolution dealing with neutrality:

WHEREAS, the declared public policy of the United States of America toward the current European war is one of strict neutrality; and

WHEREAS, in this emergency the members of the National Association of Broadcasters desire to contribute their full co-operation, through self-regulation, to the support of this declared public policy; therefore, be it

RESOLVED, That the members of the National Association of Broadcasters will exercise the greatest possible care in the use, preparation, and transmission of broadcasts dealing with the war, to the end that these broadcasts will conform with and support this declared public policy.

McNUTT ENDORSES NETWORKS WAR NEWS REGULATIONS

In a Mutual broadcast last week, Paul V. McNutt, social security administrator, highly praised the adoption of war broadcast regulations by the networks, as announced September 12 by Neville Miller, NAB president.

The fact that Mr. McNutt revamped his address on the eve of its delivery to include comment on the voluntary arrangements perfected by NAB and the networks, is held significant in some quarters.

Some observers believe that industry action has served to allay official fears that the broadcasters might prove unequal to neutral handling of war news. The existence of such doubt was reported to members in NAB REPORTS of September 8 after radio had been referred to as an untried rookie by Presidential Secretary Stephen T. Early. Mr. McNutt's appearance over MBS had been arranged by Fulton Lewis, Jr., regular network commentator, who had booked Mr. McNutt and other notables to substitute for him during a short vacation.

Following is a part of Mr. McNutt's talk:

"The action, announced in this morning's papers, of the National Association of Broadcasters, is an outstanding example of this American attitude—this respect for liberty of speech, this determination not to abuse it or to let others abuse it. In pledging themselves to be, I quote, 'temperate, responsible, and mature in . . . the manner in which they make the facts of war and its attendant circumstances known to the public', in taking this self-appointed pledge our radio networks have set an example which we should both applaud and follow.

"I hope and believe that their great audiences throughout the country will listen to the news with the same dispassionate and objective striving for truth and balance with which they strive to present it. In a democracy like ours, and particularly in times like these, it is essential that the people know the facts—all the facts on all sides. But knowing is not enough. Understanding, sifting and weighing in the light of reason, is the better part of wisdom. And sifting and weighing the day's grist of news at home and abroad is a responsibility that not one of us should dare to shirk.

"The President said, a week ago Sunday, that Americans are the best informed people in the world. Let us continue to be also the most clear headed. Only so can we preserve the freedom of the press, of the radio and of the individual citizen . . ."

FCC WARNS AMATEURS

In announcing the two amateur license suspensions, the FCC stated this week that the international situation made it doubly necessary that the amateurs of this country observe closely the Rules and Regulations laid down for them. The Commission warned that further unauthorized activities by amateur stations during the period of the European war may tend to bring about curtailment of the short wave operations of amateurs generally. The Commission urged the 60,000 amateurs, who as a body have frequently performed outstanding public service, to take all appropriate steps to protect their own standing and their beneficial operations.

SHIP INFORMATION

The French (steamship) Line has requested the NAB to urge all members to refrain from broadcasting information regarding movement of ships at sea and any other information which would "disclose facts of military nature". The steamship company said it made this appeal "in the interest of protecting lives at sea".

FCC ORDERS HEARING ON CHARGE AGAINST WMCA

The FCC on Wednesday ordered a public hearing on Wednesday, September 27, 1939, on the order issued September 12, 1939, to Station WMCA, New York City, owned by the Knickerbocker Broadcasting Company, Inc., to show cause why its license should not be revoked for its alleged interception and broadcasting of secret radio communications of the Governments of Germany and Great Britain in alleged violation of Section 605 of the Communications Act. Under the commission's order the station was required, on or before September 15, 1939, to file a sworn answer setting forth all facts and circumstances in this regard. On September 13, 1939, an affidavit was filed on behalf of the station by William Weisman, vice president of the company, purporting to be in compliance with that order. The FCC noted that this affidavit appeared on its face to be incomplete, and did not constitute "a forthright compliance with the Commission's original order for the disclosure of all the facts and circumstances in this matter." The commission stated it had made its own investigation as to the alleged interception, and broadcasting by the station.

The text of the order:

Docket No. 5771
In re
Knickerbocker Broadcasting Company, Inc. (WMCA)
Order to Show Cause
ORDER

At a special meeting of the Commission, held at its offices in Washington, D. C., on Tuesday, September 19, 1939, the Commission having under consideration its Order to Show Cause entered September 12, 1939, in the above-entitled matter and the affidavit of William Weisman dated September 13, 1939, filed on behalf of Broadcast Station WMCA purporting to be in compliance with the requirements of said Order to Show Cause; and

Whereas the Commission, by its Order to Show Cause in this proceeding required the Knickerbocker Broadcasting Company, Inc., at or before 11 a. m. September 15, 1939, to file a written statement under oath setting forth all facts and circumstances pertaining to the alleged interception and broadcasting of certain secret radio communications and to show cause why the Commission should not revoke the license of said Station WMCA for violation of and failure to observe the provisions of the Communications Act of 1934, as amended, constituting conduct by said licensee contrary to public interest; and

Whereas the said affidavit of William Weisman is not in forthright compliance with the Commission's Order to Show Cause in that, while apparently intended to categorically deny that the licensee of Station WMCA itself intercepted messages in violation of the Communications Act, the said affidavit does not disclose whether the station broadcast any such messages knowing the same to be so intercepted; and further, in that the said affidavit, in lieu of disclosing all facts and circumstances as required by the Commission's Order, contains in large part general averments amounting to merely conclusions of law; and further, in that there are attached to said affidavit photostatic copies of documents alleged to constitute an agreement between Knickerbocker Broadcasting Company, Inc., and the New York Herald Tribune, by which the newspaper agrees to furnish the station material for broadcast purposes, the terms of said agreement, upon the face of these documents being ambiguous and indefinite in character, and that said written documents were supplemented by oral understandings constituting the full arrangement between the parties, the nature of such oral understandings not having been disclosed in said affidavit; and the particulars with respect to performance of said contract not being disclosed by said affidavit; that said affidavit is in other respects incomplete, evasive, and not in compliance with the Commission's Order; and

Whereas the Commission has information in its possession, and knowledge of facts not set out in said affidavit tending to establish that Knickerbocker Broadcasting Company, Inc., licensee of Station WMCA, New York, N. Y., caused the interception of secret radio communications sent by the Governments of Germany and Great Britain, respectively, and thereafter caused the existence, contents substance, purport, effect, or meaning of the same, knowing that such interception was in violation of the Communications Act, to be broadcast over the facilities of Station WMCA, and used the same or information contained therein for its own benefit all without authority of the respective senders of said communications; and

Whereas the Commission, considering that said affidavit is not in compliance with the terms of its order, desires to accord an opportunity for public hearing for the purpose of ascertaining all facts and circumstances pertaining to said alleged interception and broadcasting and for the purpose of permitting said Station WMCA to show cause why the Commission should not, pursuant to Section 312(a) of the Communications Act of 1934, as amended, revoke the license of said station in accordance with the terms of the Commission's Order to Show Cause of September 13, 1939;

It is by the Commission this 19th day of September, 1939, *ordered* that a public hearing be held at the offices of the Commission in Washington, D. C., at 10 a. m. on Wednesday, September 27, 1939, upon the issues set forth in the Commission's Order to Show Cause of September 12, 1939, and that notice of said hearing be given to the licensee of Station WMCA by registered mail and that public notice of said hearing be given by publishing in the office of the Secretary of the Commission and in the Federal Register.

Federal Communications Commission,
T. J. Slowie,
Secretary.

BROADCASTING LEGISLATION POSSIBLE IN SPECIAL SESSION

While the special session of Congress which convened Thursday was called to consider the Neutrality Law, it is not limited to that subject. If it chose, it could take up broadcasting or any other legislation. How pending broadcasting legislation stood when Congress reconvened in the special session can be found in NAB Reports of August 11, page 3655.

"Curtain Raiser" Plans Moving Forward

Advance reports reaching Headquarters from all parts of the country indicate wide participation by member stations in Curtain Raiser, the industry's own promotion for the week of September 24.

Especially noteworthy is the use being made of a variety of media to tell the story of radio. But even more significant is the expressed determination of station managers to continue the campaign long after the new fall and winter season is under way.

The objectives remain the same: an increase in the hours of listening; an increase in the number of listeners, and, more fundamental, the securing of widest public recognition of the fact that the American system of broadcasting must be maintained in the U. S. A.

In addition to broadcasts, station executives have scheduled speaking engagements for themselves and staff members. They are promoting radio service over the air and have placed displays in store windows, lobbies and in vacant stores. Billboards are also being used.

Newspapers, too, are included in Curtain Raiser promotion. In addition to publicity, advertising space is being utilized in amounts varying from a part column to a series of full pages in the Baltimore News-Post, by WBAL, and an entire special section in The Norfolk Ledger Dispatch by WTAR.

In other cities the promotion is taking the form of radio shows with displays of receiving sets and arrangements for the public to witness local broadcasts. The first complete report of this character comes from Charie Balthrope, KTSA, San Antonio. This promotion has everything: jobber and dealer tie-up; lobby set-displays; window cards; public invitations; special shows; visual broadcasting; give-aways and ballyhoo.

Transcription companies are cooperating actively in Curtain Raiser. C. P. Mac Gregor and World Broadcasting are both supplying their stations with a series of 15-minute programs with the American system of Broadcasting as central theme.

National Broadcasting Company, Chicago, has taken over the huge Merchandise Mart with radio displays. They appear in the Mart's main floor lobby and in NBC's lobby. Curtain Raiser announcements are being aired and included in WENR's Home Forum program. News of the event is to appear in the NBC column in the Chicago Daily News.

In Omaha, John J. Gillin, Jr., manager of the Woodmen of the World station, WOW, is working with the radio retailers for the installation of windows.

Norman Corwin has a thirty-minute Curtain Raiser show over Columbia Broadcasting System, September 29, 8:30-9:00 p. m., EST.

FREE OFFERS

Although radio facilities and station time are limited, broadcasters continue to be swamped with "free" programs, transcribed or script. Reputable, well-financed companies whose promotion ideas, obvious publicity efforts, or straight commercial plugs are only thinly disguised as public interest material, continue to rain down their "free offer" requests on member stations.

The NAB Bureau of Radio Advertising has advised the following companies of radio's position on such "free offers":

Angelus—Campfire Company (marshmallow)
Mademoiselle Magazine
The Parents Magazine
White Cross Company

Steve Hanagan, well-known high-pressure "publicist" is another seeker of free time, apparently, in this case, for the greater good and better interests of:

1. Paint manufacturers
2. Rug manufacturers
3. Wool insulating material.

Scripts or ideas on domestic science and homemaking, etc., which station may use "free of charge," seem to be the favorite cloak under which the above firms camouflage their efforts to obtain free air advertising.

The White Cross Company (anti-tobacco) is interested in cost-per-inquiry advertising and the Bureau has advised this company that such procedure is a violation of the NAB Code of Ethics.

RKO in a radiogram to the NAB suggested that members attempt to obtain the sponsorship of local theaters for the transcription of "Swiss Family Robinson" which RKO offered recently to broadcasters. In reply the NAB suggested that RKO cooperate in attempting to obtain local sponsorship.

BUREAU OF RADIO ADVERTISING TRADE STUDY NO. 1

Vol. 1, No. 1 of "Results from Radio" has been mailed this week to all member stations. As originally agreed, this first in the series of trade studies to be released by the Bureau for local sales use is on the subject of department stores.

NAB is anxious to have all members partake of the benefits of the Bureau's efforts. Stations who have not replied to previous requests are urged to notify the Bureau as to the exact number of trade studies and other promotional material they will need. 100% response from the membership will enable us to gauge the exact printed requirements for future studies, and thus add to the efficient operation of the Bureau. If you have not already sent in your order, please let us hear from you at once. Use the business reply card mailed to you with the Department Store study.

BROADCAST MEASUREMENTS

Measurements were made by experts of the Federal Communications Commission during the month of August of 708 stations, with 81 stations not measured.

Of this number, 645 stations had a maximum deviation within 0-10 cycles; 57 stations a maximum deviation of 11-25 cycles; and 6 stations with a maximum deviation within 26-50 cycles. No stations measured had a maximum deviation of over 50 cycles.

INTERNATIONAL AGREEMENT

On September 18, the President issued his proclamation of the Regional Radio Convention for Central America, Panama and the Canal Zone which was signed at the City of Guatemala on December 8, 1938, by plenipotentiaries of the United States of America in behalf of the Canal Zone, and by plenipoteniaries of Costa Rica, El Salvador, Guatemala, Honduras, with a reservation, Nicaragua and Panama. The Senate gave its advice and consent to the ratification of the Regional Radio Convention on July 21, 1939 and the President ratified it on August 11, 1939. The ratification of Guatemala was deposited with the Ministry of Foreign Relations of the Government of Guatemala, which is the depositary of the Convention and the ratifications, on May 10, 1939 and the ratification of the United States in behalf of the Canal Zone was deposited on September 8, 1939. Pursuant to a provision in the Convention it will become effective, as between the ratifying Governments, thirty days after the deposit of ratifications by two Governments, that is on October 8, 1939.

The regional radio conference held at Guatemala City November 24, 1938-December 8, 1938 resulted from recommendations made at the International Radio Conference, Cairo, 1938, and the regional convention is designed to afford more effective broadcasting facilities for the countries of Central America, Panama and the Canal Zone.

On September 18, also, the President issued his proclamation of the Revision of the General Radio Regulations annexed to the International Telecommunications Convention signed at Madrid on December 9, 1932, and the Final Protocol to the Revision of the General Radio Regulations, embracing reservations made by several Governments, which were signed at the International Radio Conference held at Cairo, Egypt, February 1 to April 9, 1938. The Senate gave its advice and consent to the ratification of the Revision of the General Radio Regulations and the Protocol on July 21, 1939, and the President ratified the instruments on August 11, 1939. In accordance with Article 7 of the Madrid International Telecommunications Convention of December 9, 1932, the Secretary of State notified the Bureau of the International Telecommunication Union at Bern, Switzerland, of the ratification of the United States on August 24, 1939, which notice had the effect of bringing the revised regulations and the protocol into force with respect to the United States.

Prior to being brought into force with respect to the United States the revised regulations and, with certain exceptions as indicated below, the final protocol, were put into force with respect to the following countries by notices given by the Governments of those countries to the Bureau of the International Telecommunication Union at Bern: Argentina; Australia, Belgium, including Belgian Congo and Ruanda-Urundi (not including protocol); Bulgaria (not including protocol); Czechoslovakia (not including protocol); Danzig; Denmark (not including protocol); Estonia; Germany; Great Britain; Hungary, Italy, including Italian East Africa and Italian Islands in the Aegean; Japan, including Chosen, Taiwan, Karafuto, Kwantung, and South Sea Islands under mandate; Lebanon; Libya; Morocco; Netherlands, including Netherlands Indies, Surinam and Curacao; Newfoundland; New Zealand (not including protocol); Poland; Portugal; Rumania; Spain, including Spanish colonies and possessions and Spanish Zone of Morocco; Switzerland (not including protocol); Syria; and Yugoslavia.

FREE SPEECH

Little, Brown and Company has just published a book entitled *Free Speech and a Free Press,* by Giles J. Patterson, Jacksonville, Florida, Attorney. One chapter is devoted specifically to freedom of speech in radio although practically the entire book is pertinent.

CORRECTION

In the NAB Reports of July 15, 1939, page 3589, Resolution No. 10, concerning push button receiving sets, was erroneously reported as adopted by the NAB convention. The convention referred this resolution to the NAB Board of Directors.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, September 25. They are subject to change.

Monday, September 25

NEW—Union Broadcasting Co., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Lackawanna Broadcasting Co., Inc., Scranton, Pa.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

W9XTA—K. E. Schonert, d/b as Schonert Radio Service, Harrisburg, Ill.—Renewal of license, **26500 kc.,** 500 watts, emission A3, unlimited, according to Rule 983(a).

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

Tuesday, September 26

KNEL—G. L. Burns, Brady, Tex.—Modification of license, **1500 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1500 kc.,** 250 watts, daytime.

Wednesday, September 27

NEW—Dr. Willard Carver, Thomas B. Williams, Byrne Ross, Lawton, Okla.—C. P., **1420 kc.,** 100 watts, 100 watts LS, unlimited time.

Thursday, September 28

Oral Argument Before the Commission

Report No. B-52:

KRSC—Radio Sales Corp., Seattle, Wash.—C. P., **1120 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 250 watts, unlimited time.

Report No. B-65:

NEW—Vincennes Newspapers, Inc., Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

Report No. B-70:

NEW—Yuba-Sutter Broadcasters, Marysville, Calif.—C. P., **1320 kc.,** 250 watts, unlimited time (DA night).

Report No. B-71:

NEW—Thumb Broadcasting Co., Brown City, Mich.—C. P., **880 kc.,** 1 KW, daytime.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

October 2

NEW—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Howton Radio Alarm Co., Seattle, Wash.—Permit for new special experimental station, **2414 kc.,** 12.5 watts, unlimited time, Pts. of Comm.: Portable within city limits of Seattle, Wash.

November 15

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz.—C. P., **1420 kc.,** 100 watts, specified hours.

Hearing Before Commissioner Case

KUMA—Albert H. Schermann, Yuma, Ariz.—Hearing upon Order of Revocation of License of Station KUMA.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—WHEC, Inc., Rochester, N. Y.—Granted C. P. for new high frequency broadcast station to operate on frequency **42600 kc.,** experimentally, conditionally, 1 KW. Exact site to be determined at or near Rochester.

NEW—Bamberger Broadcasting Service, Inc., New York City.—Granted C. P. for new high frequency broadcast station to operate on frequency **43400 kc.,** experimentally, conditionally, 1 KW. Exact site to be determined in New York metropolitan area.

WMBC—Michigan Broadcasting Company, Detroit, Mich.—Granted modification of license to increase nighttime power from 100 to 250 watts, subject to compliance with Sec. 3.45; denied special authority to use present antenna.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

WHN and auxiliary, New York City; WIBA, Madison, Wis.; WICA, Ashtabula, Ohio; WISN and auxiliary, Milwaukee, Wis.; WJAS, Pittsburgh, Pa.; WJDX, Jackson, Miss.; WKST, New Castle, Pa.; WNAC, Boston, Mass.; WNBX, Springfield, Vt.; WNOX, Knoxville, Tenn.; WOL, Washington, D. C.; WOOD, Grand Rapids, Mich.; WORC, Worcester, Mass.; WRC, Washington, D. C.; WTCN, Minneapolis, Minn.; WTNJ, Trenton, N. J.; WTOC, Savannah, Ga.; WXYZ, Detroit; KTRH, Houston, Tex.; KDYL and auxiliary, Salt Lake City; KFOX, Long Beach, Calif.; KGBX, Springfield, Mo.; KRGV, Weslaco, Tex.; KYA and auxiliary, San Francisco; WAIR, Winston-Salem, N. C.; WDAY, Fargo, N. Dak.; WDEL, Wilmington, Del.; WFBR and auxiliary, Baltimore, Md.; WHIO, Dayton, Ohio.

KUSD—University of South Dakota, Vermillion, S. Dak.—Granted renewal of license for the period ending April 1, 1940.

WSPA—Voice of South Carolina, Spartanburg, S. C.—Granted renewal of license for the period ending April 1, 1940.

KGCA—Chas. W. Greenley, Decorah, Iowa.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken by the Commission upon pending applications for renewal of licenses of stations KGCA and KWLC and the pending application of Mason City Globe Gazette Co., KGLO.

KWLC—Luther College, Decorah, Iowa.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken by the Commission upon pending applications for renewal of licenses of stations KGCA and KWLC and the pending application of Mason City Globe Gazette Co., KGLO.

KLCN—Chas. Lee Lintzenich, Blytheville, Ark.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken by the Commission upon the pending application of licensee for renewal.

WCAM—City of Camden, Camden, N. J.—Granted renewal of license on a temporary basis only, subject to whatever action may be taken by the Commission upon the pending application of licensee for renewal.

INCREASE IN POWER GRANTED

The following stations were granted modification of licenses authorizing increase in night power to 250 watts:

WJIM, Lansing, Mich.; WSAY, Rochester, N. Y.; KTEM, Temple, Tex.; WDAN, Danville, Ill.; WKAT, Miami Beach, Fla.; KNOW, Austin, Tex.; KRMC, Jamestown, N. Dak.; WIBM, Jackson, Mich.

MISCELLANEOUS

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate simultaneously with KICA from 7:30 to 10 p. m., MST, on September 17, 24, October 1 and 8, in order to broadcast church services only.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate simultaneously with KICA from 7:30 to 11 p. m., MST, September 15, 22 and 29, October 6 and 13, in order to broadcast the Roswell High School football games.

KDNT—Harwell V. Shepard, Denton, Tex.—Granted special temporary authority to operate from local sunset (September, 6:30 p. m., CST) to conclusion of football broadcasts on September 15, 22, 27, 29.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Granted extension of special temporary authority to operate evenings (LS September, 6:30 p. m.; October, 5:30 p. m., CST), for the period September 15 to 20 only, in order to broadcast various civic, charitable, religious, etc., programs of local interest from Mutual Broadcasting System.

WTMJ—The Journal Company, Milwaukee, Wis.—Granted petition to intervene in re the application of WROL, Knoxville, Tenn. (Docket 5715).

WCNW—Arthur Faske, Brooklyn, N. Y.—Granted supplemental request for order to take depositions in re application in Docket 5323.

WEEU—Berks Broadcasting Co., Reading, Pa.—Granted petition to intervene in re the application of WHDH, Boston, Mass.

WCBS—WCBS, Inc., Springfield, Ill.—Granted petition to dismiss without prejudice application to change frequency and increase power.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted motion to take depositions in re application to increase power from 1 to 5 KW and time of operation from daytime to unlimited.

WLBZ—Maine Broadcasting Co., Bangor, Maine.—Granted petition to intervene only in re application of WABI, Bangor, Maine (Docket 5677). Counsel notes exception as to ruling on enlargement of issues.

The Moody Bible Institute Radio Station, Chicago, Ill.—Granted motion to amend application in Docket No. 5321, by substituting the name Moody Bible Institute of Chicago, for the present name of Moody Bible Institute Radio Station.

WBRC—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Granted motion to enlarge issues in re application of KMAC, San Antonio, Texas (Docket 5626) to (1) determine whether the operation of station KMAC as proposed will be in accordance with the Commission's plan of allocation and Standards of Good Engineering Practice, and (2) to determine how the granting of the above-entitled application will affect the pending application of WBRC (B3-ML-538).

WDBJ—Times-World Corp., Roanoke, Va.—Granted motion to enlarge issues in re application of KMAC, San Antonio, Tex. (Docket 5626) to (1) determine whether the operation of station KMAC as proposed will be in accordance with the Commission's plan of allocation and Standards of Good Engineering Practice, and (2) to determine how granting of the above-entitled application will affect the pending application of WDBJ (B2-ML-358).

WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Granted petition to intervene in the hearing on the application of WROL, Knoxville, Tenn., to change frequency and increase power.

NEW—William F. Huffman, Wisconsin Rapids, Wis.—Granted motion to allow amendment to application for new station so as to request **1310 kc.,** instead of **580 kc.,** and hearing scheduled for November 1, 1939, cancelled.

WMAL—National Broadcasting Co., Inc., Washington, D. C.—Granted authority to withdraw petition to intervene in re application of KSD, St. Louis, Mo.

WMAL—National Broadcasting Co., Inc., Washington, D. C.—Granted authority to withdraw petition to intervene in re application of KXOK, St. Louis, Mo.

WMAL—National Broadcasting Co., Inc., Washington, D. C.—Granted authority to withdraw petition to intervene in re application of KWK, St. Louis, Mo.

KMAC—W. W. McAllister and Howard W. Davis, San Antonio, Tex.—Denied without prejudice with leave to file amended petition to intervene in re application of WSBT, South Bend, Ind.

KMAC—W. W. McAllister and Howard W. Davis, San Antonio, Tex.—Denied petition to intervene in re application of KABC, San Antonio, Tex.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate unlimited time with 1 KW in order to broadcast for the period September 17 to October 16, civic, educational, commercial, etc., programs, and international events of extreme local interest, both of local origin and from CBS.

KFGQ—Boone Biblical College, Boone, Iowa.—Granted special temporary authority to operate from 4 to 5 p. m., CST, on September 20, 27 and October 4, in order to broadcast children's services.

KUMA—Albert H. Schermann, Flagstaff, Ariz., and E. B. Sturdivant, Yuma, Ariz.—Continued hearing now scheduled for September 25 until November 15, in re revocation of license of KUMA and application of Sturdivant for C. P. to establish a new station in Yuma.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Granted extension of special temporary authority to operate evenings (LS September, 6:30 p. m.; October, 5:30 p. m., CST), for the period September 15 to October 14, in order to broadcast civic, charitable, educational, etc., programs, and commercial programs of outstanding interest, and in order to carry programs of great local interest from MBS.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to rebroadcast Naval Observatory time signals received from radio station NAA/NSS over station WFMD for the period ending in no event later than 3 a. m. April 1, 1940.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Denied special temporary authority to operate unlimited time using 100 watts power only nighttime, for period September 17 to September 26, in order to broadcast war news bulletins of Transradio Press Service and overseas pickups and commentaries of MBS during evening hours.

W3XO—Jansky & Bailey, Washington, D. C.—Granted extension of special temporary authority to test high frequency broadcast equipment of station W3XO on frequency **43200 kc.,** with 1 KW, for the period September 21 to October 20, to conduct frequency modulated tests on this frequency.

W2XOY-W2XDA—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to test high frequency broadcast equipment on frequencies **39420, 39460, 39500** and **39540 kc.,** 50 watts, for period not to exceed 30 days, to conduct amplitude and frequency modulated experimental transmissions on these frequencies.

KRRV—Red River Valley Broadcasting Co., Inc., Sherman, Tex.—Ordered that petition of KRRV to reopen the record in re Docket 5386, application for C. P. to change frequency from **1310 kc.** to **880 kc.,** and power from 250 watts daytime to 1 KW unlimited time, and the motion of WKY Radiophone Co. and KGKO Broadcasting Co. to dismiss said petition, be set for oral argument on September 21, 1939, the date designated for oral argument on exceptions heretofore filed by KRRV to proposed decision of the Commission.

KGCA—Chas. Walter Greenley, Decorah, Iowa.—Retired to the closed files the application of KGCA requesting authority to use KELC's transmitter, which was granted subject to KWLC installing a new antenna.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate a 50-watt portable transmitter with 100-foot vertical antenna, on frequency **1360 kc.,** at the proposed location for station WSAI, for the period beginning September 17, 1939, to October 16, 1939, during the hours of 7 a. m. to 6 p. m., EST, in order to make a preliminary field survey of the proposed site.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Denied special temporary authority to operate unlimited time, using 100 watts power only nighttime, for the period September 17 to October 16, 1939, in order to broadcast evening Mutual Network programs and war news bulletins.

KFRO—Voice of Longview, Longview, Tex.—Denied special temporary authority to operate from local sunset (September, 6:30 p. m., CST) to midnight on September 18, 19, 20, 21, 23, 25, 26, 27, 28, and 30, 1939, in order to broadcast European war crisis news, using 100 watts only.

KBTM—Jay P. Beard, tr/as Regional Broadcasting Co., Jonesboro, Ark.—Granted special temporary authority to operate from 7:30 p. m. to completion of football game on September 15, 1939, and from 9 p. m., CST, to completion of football games on September 22 and 29, 1939, for football games only.

KAKH—The Oklahoma Network, Inc., Oklahoma City, Okla.—Granted special temporary authority to operate amateur radio station W5CLI as a relay broadcast station from 5:30 p. m. to 6:30 p. m., CST, instead of from 6:30 p. m. to 7:30 p. m., CST, on September 16, 1939, as authorized by the Commission's grant of September 11, 1939, in connection with the Cherokee Strip Celebration at Ponca City, Okla., transmitter to be operated with power less than 25 watts, frequencies to be selected from Section 4.23.

KPDN—R. C. Hoiles, Pampa, Tex.—Granted special temporary authority to operate unlimited time on September 15, 22, 29, October 6 and 13, 1939, in order to broadcast high school football games only.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m. and October, 5:30 p. m., CST) to 10:30 p. m., CST, on September 22 and October 13 and 30, 1939, in order to broadcast high school football games only.

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va. —Granted special temporary authority to operate from local sunset (October, 5:45 p. m. and November, 5 p. m., EST) to 6:30 p. m., EST, on October 7, 14, 21, 28, November 4, 1939, in order to broadcast football games only.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted license to cover C. P. for changes in equipment and increase in day power from 1 KW to 5 KW (operate 5 KW to local sunset at Eau Claire, 1 KW to local sunset at Abilene).

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted license to cover C. P. and modifications thereof for changes in frequency from **1190 kc.** to **890 kc.**; increase in power and time of operation from 250 watts, daytime, to 1 KW, unlimited time, employing DA system for nighttime operation.

W9XC—Central Broadcasting Co., Davenport, Iowa.—Granted modification of C. P. for extension of completion date for construction from September 18 to December 18, 1939.

WBAB—Press-Union Publishing Co., Atlantic City, N. J.—Granted modification of C. P. for approval of studio and transmitter sites, and installation of vertical radiator.

WOCB—Harriett M. Alleman and Helen W. MacLellan, d/b as Cape Cod Broadcasting Co., near Hyannis, Twp. of Yarmouth, Mass.—Granted modification of C. P. for extension of completion date from September 24, 1939, to January 1, 1940.

WICA—WICA, Inc., Ashtabula, Ohio.—Granted modification of C. P. to make changes in authorized equipment and extend commencement date from 7-16-39 to 60 days after grant and completion date 90 days thereafter.

KOVO—Clifton A. Tolboe, tr/as Citizens Voice & Air Show, Provo, Utah.—Granted modification of C. P. for approval of transmitter and studio sites, and installation of vertical radiator.

KWAL—Chester Howarth and Clarence Berger, Wallace, Idaho.—Granted modification of C. P. for approval of studio site, Samuels Hotel, and changes in authorized equipment.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted modification of C. P. to make changes in composite equipment.

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Granted modification of C. P. for extension of completion date from September 24, 1939, to November 24, 1939.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted C. P. to install a new transmitter.

KADB—Nichols and Warinner, Inc., Long Beach, Calif., Portable-Mobile.—Granted C. P. to install new equipment.

WEJP—National Broadcasting Co., Inc., Portable-Mobile, Cleveland, Ohio.—Granted license to cover C. P. to make changes in equipment and increase power to 50 watts, with frequencies as listed under Group E of Section 41.03(a) (relay broadcast station).

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Granted authority to determine operating power by direct measurement of antenna input; type of antenna—vertical radiator, height of vertical lead 185 feet, overall height 200 feet, ground consists of network on roof of building with edges of screen grounded to frame of building.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Granted authority to determine operating power by direct measurement of antenna input in compliance with the terms of Sec. 3.54; type of antenna—vertical, height of vertical lead 179 feet above base insulator, direct ground.

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Granted authority to determine operating power by direct measurement of antenna input; type of antenna—"T", height of vertical lead 178 feet, length of flat top 179 feet, overall height 200 feet, direct ground.

NEW—The Louisville Times Co., Louisville, Ky.—Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station to be used to relay programs, where wire facilities are not available, to be broadcast over WHAS operating on **820 kc.**, power 50 KW, unlimited time; frequencies **30820, 33740, 35820** and **37980 kc.**, power 0.5 watt.

NEW—The Louisville Times Co., Louisville, Ky., Portable-Mobile. —Granted license to cover above C. P.

NEW—The Louisville Times Co., Louisville, Ky., Portable-Mobile. —Granted C. P. for new station to operate on **30820, 33740, 35820** and **37980 kc.**, power of 0.5 watt.

NEW—The Louisville Times Co., Louisville, Ky., Portable-Mobile. —Granted license to cover above C. P.

WEOB—Ashland Broadcasting Co., Inc., Ashland, Ky., Portable-Mobile.—Granted license to cover C. P. for new high frequency relay broadcast station using the frequencies in Group D of Sec. 41.03(a), 10 watts, unlimited time in accordance with Sections 41.01, 41.02(c), 41.03(b) and 41.05(b), to be used to relay programs where wire facilities are not available to be broadcast over Station WCMI.

WAIE—Joe L. Smith, Jr., Beckley, W. Va.—Granted license to cover C. P. for new low frequency relay broadcast station using frequency listed in Group A of Sec. 41.03(a), power 75 watts, unlimited time in accordance with Sec. 41.04, to operate under the provisions of Sections 41.01 and 41.02(c) to relay programs where wire facilities are not available to be broadcast over Station WJLS.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted license to cover C. P. for move of transmitter site locally, install new equipment and vertical radiator.

KSAM—Sam Houston Broadcasting Assn., Huntsville, Texas.—Granted license to cover C. P. to make change in equipment and increase in day power from 100 watts to 250 watts.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

WWL—Loyola University, New Orleans, La.—Granted authority to determine operating power by direct measurement of antenna input in compliance with the terms of Sec. 3.54; type of antenna—2 element directional, height of vertical lead 395 feet, overall height 400 feet, each tower loaded with 60 foot capacity top and 30 microhenry inductance at a point 60 feet below the top, so adjusted as to simulate a 190° tower; line of towers North-South spaced 135°, towers insulated; ground system 120 copper straps approximately ½ wave length long supplemented by 50 foot ground screen under each tower.

WEDC—Emil Denemark, Inc., Chicago, Ill.—Granted license to cover C. P. for changes in composite equipment; increase in day power from 100 to 250 watts, and time of operation by adding hours from midnight to 6 a. m.

KBTC—State Capital Broadcasting Assn., Austin, Texas—Granted license to cover C. P. for new station to operate on **1120 kc.**, 1 KW, daytime (specified hours).

WHP—WHP, Inc., Harrisburg, Pa.—Granted license to cover C. P. for installation of new equipment and directional antenna system and increase in power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day, employing DA system for nighttime operation.

WHP—WHP, Inc., Harrisburg, Pa.—Granted authority to determine operating power by direct measurement of antenna input; antenna current at common point of input—5.95 amperes for 1 KW. Antenna resistance at common point of input is 27.9 ohms for 1 KW. Antenna current—6.35 amperes for 5 KW. Antenna resistance—124 ohms for 5 KW.

WEGS—Donald A. Burton, Muncie, Ind., Portable-Mobile.—Granted C. P. to make changes in equipment of high frequency relay broadcast station.

WSKB—McComb Broadcasting Corp., McComb, Miss.—Granted license to cover C. P. and modification thereof for new station to operate on **1200 kc.,** 100 watts daytime only.

KCKN—The KCKN Broadcasting Co., Kansas City, Kansas.—Granted license to cover C. P. for installation of new equipment.

APPLICATIONS FILED AT FCC

560 Kilocycles

KLZ—KLZ Broadcasting Co., Denver, Colo.—C. P. to install directional antenna for day and night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

650 Kilocycles

KIRO—Queen City Broadcasting Co., Seattle, Wash.—C. P. to install new transmitter; make changes in antenna system; change frequency from **650 kc.** to **710 kc.;** increase power from 250 watts to 5 KW, 10 KW LS; change time from limited to unlimited time; and move transmitter from 2nd and Union Sts., Seattle, Wash., to site to be determined, near Seattle, Wash. Amended to request 10 KW power day and night.

680 Kilocycles

WPTF—WPTF Radio Company, Raleigh, N. C.—Construction permit to install new transmitter; increase power from 5 KW to 10 KW; increase hours of operation from limited to unlimited (using directional night). Amended to request 50 KW power and equipment changes, changes in directional antenna, and move transmitter to site near Morrisville, N. C.

880 Kilocycles

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Authority to install automatic frequency control.

930 Kilocycles

WDBJ—Times-World Corporation, Roanoke, Va.—Construction permit to install directional antenna for night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

980 Kilocycles

KDKA—Westinghouse Electric & Manufacturing Co., Pittsburgh, Pa.—Modification of C. P. (B2-P-2308) for new transmitter and move of transmitter, requesting further authority to install new transmitting equipment.

1200 Kilocycles

NEW—Paducah Broadcasting Company, Inc., Hopkinsville, Ky.—Construction permit for a new station on **1200 kc.,** 250 watts, unlimited time.

WJNO—WJNO, Inc., West Palm Beach, Fla.—Authority to determine operating power by direct measurement of antenna power.

WDSM—WDSM, Inc., Superior, Wis.—Modification of C. P. (B4-P-770) as modified to extend completion date from 9-17-39 to 10-17-39.

KVNU—Cache Valley Broadcasting Co., Logan, Utah.—C. P. to make changes in equipment, increase power from 100 to 250 watts.

WJNO—WJNO, Inc., West Palm Beach, Fla.—License to cover C. P. (B3-P-2441) for new equipment.

KOOS—KOOS, Inc., Marshfield, Ore.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—License to cover C. P. (B2-P-241) as modified for new equipment, increase in power, changes in antenna and move of transmitter.

KHAS—The Nebraska Broadcasting Co., Hastings, Nebr.—Modification of C. P. (B4-P-2367) for a new station, requesting approval of antenna and approval of studio and transmitter sites at 2nd and Burlington Ave., Hastings, Nebr.

1210 Kilocycles

KWJB—Sims Broadcasting Co. (Bartley T. Sims, Manager), Globe, Ariz.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1240 Kilocycles

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—C. P. to install new equipment.

1260 Kilocycles

WFVA—Fredericksburg Broadcasting Corporation, Fredericksburg, Va.—Authority to determine operating power by direct measurement of antenna power.

1280 Kilocycles

WTNJ—WOAX, Inc., Trenton, N. J.—Modification of license to change hours of operation by adding hours from 8 to 10 p. m. each night. Amended to request unlimited time and request 1 KW power day, facilities of WCAM and WCAP.

1300 Kilocycles

KFH—Radio Station KFH Co., Wichita, Kans.—Construction permit for increases in power from 1 KW, 5 KW LS, to 5 KW day and night, and install directional antenna for night use.

1310 Kilocycles

WFIG—J. Samuel Brody, Sumter, S. C.—Modification of C. P. (B3-P-2171) for approval of antenna, installation of new transmitter, approval of studio site at 39½ North Main St., Sumter, S. C., and transmitter site at Liberty St. at city line, Sumter, S. C.

WJPR—John R. Pepper, Greenville, Miss.—Modification of C. P. (B3-P-2312) for a new station, requesting approval of antenna, and transmitter site at State Road No. 1, at Levee, Greenville, Miss., and move studio from 808 Harvey St., to 110 North Shelby St., Greenville, Miss. Amended to give studio site as 109 South Poplar St., Greenville, Miss.

WJPR—John R. Pepper, Greenville, Miss.—Modification of C. P. (B3-P-2312) for new station, requesting approval of antenna, and transmitter site at State Road No. 1, at Levee, Greenville, Miss.; make changes in equipment. Amended to give studio site as 107 South Poplar St., Greenville, Miss.

1310 Kilocycles

KVIC—Radio Enterprises, Inc., Victoria, Texas.—Modification of C. P. (B3-P-2118) for a new station, requesting approval of antenna, install new transmitter, and approval of studio and transmitter site at north of Victoria, on U. S. Highway #77, Victoria, Texas.

1330 Kilocycles

WSAI—The Crosley Corp., Cincinnati, Ohio.—Construction permit to change power from 1 KW, 5 KW-LS, to 5 KW day and night, install directional antenna for night use, move transmitter from S. E. corner Warner & Chickasaw Sts., Cincinnati, Ohio, to Cincinnati, Ohio. Amended: Re: transmitter site.

1370 Kilocycles

KVFD—Northwest Broadcasting Co., Fort Dodge, Iowa.—Modification of C. P. (B4-P-2042) for a new station, requesting authority to install new transmitter, and approval of studio at R. F. D., Ft. Dodge, Iowa, and transmitter site at Ft. Dodge, Iowa.

WFTL—Tom M. Bryan, Ft. Lauderdale, Fla.—Modification of C. P. (B3-P-2330) for a new station, requesting approval of antenna and approval of transmitter and studio site at 2700 S. Andrews Ave., Ft. Lauderdale, Fla.

1400 Kilocycles

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—Construction permit to move transmitter from 2568 Flatbush, Brooklyn, N. Y., to Provost and Huron Sts., Brooklyn, N. Y. Amended: Re: Antenna.

WVFW—Paramount Broadcasting Corporation, Brooklyn, N. Y.—License to cover C. P. (B1-P-918) for equipment changes.

1410 Kilocycles

WAAB—The Yankee Network, Inc., Boston, Mass.—Modification of license to increase night power of auxiliary transmitter from 500 watts to 1 KW.

1420 Kilocycles

KWBG—The Nation's Center Broadcasting Co., Hutchinson, Kans. —Construction permit for equipment changes; increase power from 100 watts to 250 watts; make changes in antenna system; and move transmitter from 101 East Avenue "A", Hutchinson, Kans., to outside city limits, near Hutchinson, Kans.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—C. P. to make changes in transmitting equipment and increase power from 100 to 250 watts.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—License to cover C. P. (B2-P-1727) for a new station.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Authority to determine operating power by direct measurement of antenna power.

WCBS—WCBS, Inc., Springfield, Ill.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1440 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Tex.—Construction permit to install new transmitter, directional antenna for night use, change frequency from **1440 kc.** to **710 kc.**, increase power from 1 KW to 10 KW, and move transmitter from Main and Rusk Sts., Houston, Tex., to near Highway No. 90, Dawes, Tex.

1460 Kilocycles

KSTP—National Battery Broadcasting Company, St. Paul, Minn.—Construction permit to install auxiliary transmitter at present site of main transmitter, using 1 KW power.

1490 Kilocycles

WCKY—L. B. Wilson, Inc., Covington, Ky.—Modification of license to move studio from Sixth and Madison Ave., Covington, Ky., to Gibson Hotel, Cincinnati, Ohio.

1500 Kilocycles

KPLT—North Texas Broadcasting Co., Paris, Tex.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KGKB—East Texas Broadcasting Company, Tyler, Tex.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WMOG—Coastal Broadcasting Co., Brunswick, Ga.—Modification of C. P. (B3-P-2306) for new station, requesting changes in equipment, approval of transmitter and studio site at Brunswick, St. Simons Highway, Brunswick, Ga., and approval of antenna.

MISCELLANEOUS

WABE—Central New York Broadcasting Corporation, Syracuse, N. Y., Portable-Mobile.—License to cover C. P. (B1-PRY-186) for a new relay broadcast station.

WEHA—City of New York, Municipal Broadcasting System, area of New York.—License to utilize the equipment of relay station WASJ in lieu of authorized equipment and increase power from 8.5 to 25 watts.

W1XKB—Westinghouse Electric & Mfg. Co., East Springfield, Mass.—License to cover C. P. (B1-PHB-70) for new equipment and increase in power.

W1XOJ—The Yankee Network, Inc., Paxton, Mass.—Modification of C. P. to extend date of completion from 10-29-39 to 4-29-40.

W1XSN—Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.—License to cover C. P. (B1-PHB-69) to move transmitter and install new equipment, increase power.

W1XG—General Television Corp., Boston, Mass.—Modification of license to change frequency from **42000-56000, 60000-86000 kc.** to **44000-50000 kc.**

NEW—Don Lee Broadcasting System, area of California.—C. P. for new relay broadcast station to employ frequency modulation to be operated in area of KHJ, California, on **133030, 134850, 136810** and **138630 kc.** (Group I), using 50 watts power, special emission.

WEJV—National Broadcasting Co., Inc., area of Chicago.—License to cover C. P. (B4-PRE-287) for installation of new equipment and decrease in power.

WEJX—National Broadcasting Co., Inc., area of Chicago.—License to cover C. P. (B4-PRE-288) for installation of new equipment and decrease in power.

NEW—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Construction permit for new relay broadcast station on **31220, 35620, 37020,** and **39260 kc.**, 10 watts power, A-3 emission.

KEIM—KTAR Broadcasting Co., Portable-Mobile.—Construction permit to make changes in equipment and increase power from 10 to 25 watts.

WENN—WPTF, Radio Co., Portable-Mobile.—Construction permit to make changes in equipment.

NEW—Farnsworth Television and Radio Corp., Fort Wayne, Ind. —C. P. for new television station located at 3700 E. Pontiac St., extended, Fort Wayne, Ind. (utilize aural equipment of W3XPF, Springfield, Pa.), on **66000-72000 kc.**, 1 KW power, A-3, A-5 and special emission.

NEW—Zenith Radio Corporation, Chicago, Ill.—Construction permit for new high frequency station located at 6001 Dickens Ave., Chicago, Ill., to be operated on **42800 kc.**, 5 KW power, A-3 and special emission, unlimited time.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Apex Oil Products Company—H. G. Hornibrook, trading as Apex Oil Products Company, 100-200 17th Ave., North, Minneapolis, was charged in a complaint with misleadingly representing a lubricating oil designated as "Film-X Motor Oil".

It is alleged that the respondent advertised that use of its oil will remove carbon from motors and will cause motors to wear less than one-tenth as much as motors lubricated with other oil, when such are not the facts. The complaint continues that there is no substantial difference in the wear of a motor in which the respondents' lubricating oil is used and the wear of a motor in which any high quality lubricating oil is used.

The complaint also charges that the use of assertions representing that the respondent's oil has several times the film strength of any other natural oil unduly exaggerates the importance of such property and conveys the erroneous meaning that other oils of less film strength are inferior to the respondent's oil. (3888)

Bauer & Black—See Kendall Company.

Electric Storage Battery Company, Philadelphia, and its subsidiary, Willard Storage Battery Company, Cleveland, were charged with unlawful acquisition of the capital stock of the Grant Storage Battery Company, Minneapolis, under a complaint. The complaint alleges violation of Section 7 of the Clayton Act which prohibits acquisition of the capital stock of another corporation where the effect may be to substantially lessen competition between the corporations, restrain trade or tend to create monopoly.

With the knowledge and at the instance of The Electric Storage Battery Company, the Willard Storage Battery Company, on or about December 31, 1938, allegedly acquired all of the outstanding capital stock of the Grant Storage Battery Company amounting to 900 shares of preferred stock at $100 a share, and 3,996 shares of common at about $263 a share, the par value having been $50 a share. The complaint alleged that since that time the Willard company continued to own the Grant Company's stock and the respondents controlled its corporate activities. The Willard Storage Battery Company, as of December 31, 1938, also owned all outstanding capital stock of the Willard Storage Battery Company of California, Los Angeles, according to the complaint.

One alleged effect of the acquisition was a substantial lessening of competition between the Grant company on the one hand, and the Electric and Willard companies and their California subsidiary, on the other. Further effects of the acquisition, according to the complaint, were restraint of interstate commerce and a tendency to create a monopoly in The Electric Storage Battery Company and its subsidiaries. (3892)

Fink & Co., Inc., 151 West 40th St., New York, was charged in a complaint with the dissemination of misleading representations in the sale of vitamin preparations designated as "Mi-Vit-Ine" and "Vi-Min-Ex," and of a facial cream designated as "Muriel Joan Beautifier."

According to the complaint, the respondent misleadingly represented Vi-Min-Ex and Mi-Vit-Ine as being competent treatments or effective remedies for constipation, low vitality, malnutrition, loss of appetite and weight, nervousness, anemia, colds, alcoholism, heart disease, paralysis, or other diseases, when such are not the facts. Representations that Mi-Vit-Ine will replace a vitamin deficiency were also alleged to be false, as were claims that Vi-Min-Ex and Mi-Vit-Ine supply all the essential vitamins and minerals required by the body. (3890)

Heifler & Jackson—In a complaint Rose Heifler and Fred Jackson, trading as Heifler and Jackson, 740 Bergen St., Brooklyn, N. Y., were charged with disseminating misleading representations in the sale of "Morgan's Pomade," a preparation for the treatment of the hair and scalp.

According to the complaint, the respondents misleadingly represented that their preparation is not a tint or dye; that its use causes gray hair to change its color without dyeing and will restore the original natural color to gray hair, and supplies to the hair shaft the materials in which gray hair is deficient, when such are not the facts. The respondents were further alleged to have falsely represented that the use of their preparation will prevent the hair from falling out; that "Morgan's Pomade" penetrates to the roots of the hair and nourishes the hair, and that it is a competent and effective cure, preventive, or remedy for dandruff. The complaint says that "Morgan's Pomade" is a lead and sulphur dye and only artificially dyes the exterior of the hair. (3893)

Johnson's Lixolene Company—In a complaint issued John C. Johnson, trading as Johnson's Lixolene Company, 4028 Hill Crest Drive, San Diego, was charged with the dissemination of misleading representations in the sale of a medicinal preparation designated as "Johnson's Lixolene".

It is alleged that the respondent represented his preparation as being a safe skin remedy, a reliable compound, an effective antiseptic, and a powerful germicide, and as an effective remedy or cure for eczema, acne, ringworm, psoriasis, dandruff, poison ivy, seborrhea or alopecia, when such were not the facts.

The respondent's claims that all eczemas and other diseases of the skin are caused by parasitic infection and should be treated by the local application of a mild germicide such as "Johnson's Lixolene," are alleged to be misleading. The complaint points out that not all skin ailments are caused by parasitic infection, many being the result of allergic conditions, and require treatment by a competent physician. (3887)

Kendall Company, trading as Bauer & Black, 2500 South Dearborn St., Chicago, was charged in a complaint with the dissemination of misleading representations in the sale of a cosmetic preparation now designated "Velure Vanishing Lotion" and formerly designated "Velure Lotion."

According to the complaint, the respondent misleadingly represented by means of periodical and radio advertisements that its preparation is a new and scientific discovery which, when applied to the hands, acts more quickly in softening and beautifying the skin than its competitors' products; that its preparation in all instances penetrates the skin and leaves no artificial coating or stickiness thereon; that it conserves and supplements the natural oils of the skin; that it has a bleaching or whitening effect and makes hands several shades lighter, and that it is more economical and effective in use than competitive hand lotions, when such were not the facts. The complaint points out that the respondent's preparation consists of ingredients lacking in substantial therapeutic value, and commonly found in competitive hand lotions. (3894)

National Numbering Machine Co., Inc.—A complaint has been issued against the National Numbering Machine Company, Inc., 1 Beekman St., New York, charging price discrimination in violation of the Robinson-Patman Act.

The complaint alleges that the respondent discriminated in price between different purchasers buying typographical numbering machines of like grade and quality by allowing to some of such purchasers lower prices than those granted to other of its purchasers competitively engaged one with the other in the resale of such machines to dealers and ultimate users. (3889)

Vendol Company—In a complaint David H. Fulton, trading as Vendol Company, 1 West Biddle St., Baltimore, was charged with disseminating misleading representations in periodical, circular and radio advertisements, concerning a medicinal preparation designated "Vendol."

According to the complaint, the respondent misleadingly advertised that his product is an effective treatment for constipation, stomach disorders, liver ailments, muscle, joint and body pains, rheumatism, dizziness, excess acidity, gas, cramps, skin disorders, stiffness, or declining health, when such are not the facts. The complaint further alleges that the respondent falsely advertises his product as being a tonic and an appetizer. In truth, the complaint continues, the therapeutic properties of Vendol are limited to that of a laxative with mild diuretic and anti-acid effects.

In certain of his advertising, it is charged, the respondent lists symptoms which are attributable to various diseases with the representation that his preparation will relieve or cure such symptoms if due to constipation. By this means the respondent allegedly represents that Vendol is an effective treatment for various disorders which are not in fact related to or connected with constipation and upon which Vendol will have no curative or therapeutic effect. (3895)

Willard Storage Battery Company—See Electric Storage Battery Company.

York Cone Company, 615-623 South Pine St., York, Pa., was charged in a complaint with the use of lottery schemes in the sale of its candy. According to the complaint, the respondent furnished dealers with push cards for use in the sale of its candy to ultimate consumers. (3891)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

America's Medicine and Nu-Mode Company—Harry S. Benham, trading as America's Medicine and Nu-Mode Company, 620 Orleans St., Chicago, has been ordered to discontinue the dissemination of misleading representations in the sale of medicinal preparations for the relief of delayed menstruation, such preparations being designated as "America's Medicine XX Compound," "Nu-Mode XX Compound" and "Kotess Periodic Relief Compound," and "America's Medicine XXX Compound," "Nu-Mode XXX Compound" and "Kotess Periodic Relief Compound."

Under the order, the respondent is to discontinue advertising that the use of the preparations constitutes a safe, competent and scientific treatment for delayed menstruation and will have no ill effects upon the user. The respondent is also prohibited from disseminating advertisements which fail to reveal that the use of the preparations may result in serious or irreparable injury to the health of the user. (3851)

Floracube Company, Inc.—Eugene H. Hunter and Rae LaMarr Hunter, trading as The Floracube Company, Inc., 2133 Sunset Boulevard, Los Angeles, has been ordered to discontinue misleading representations in the sale of a medicinal preparation designated as "Floracubes."

Finding that "Floracubes" is nothing more than a laxative or purgative depending upon the amount ingested, the Commission ordered the respondents to cease representing that their preparation has any therapeutic value other than as a palliative in the treatment of constipation, or that it is a cure or remedy for any disease, disorder or malady, or that it will rid the body of the causes of such ailments and conditions.

The order prohibited specific representation that the respondents' preparation is a cure or remedy for colitis, overacidity, food decay within the body, rheumatism, arthritis and other ailments. (3284)

Paul Hartmann Agency—See Sterling Products Corporation.

Sterling Products Corporation, trading under its own name and as Paul Hartmann Agency, 36 East 22nd St., New York, was ordered to discontinue misleading representations in the sale and distribution of drugs, pharmaceuticals, surgical instruments, dressings and surgical supplies.

Under the order, the respondent is prohibited from representing that its competitors' domestic made ethyl chloride tubes, ethyl chloride, or any other of their merchandise, were made in whole or in part in a foreign country. The respondent was further prohibited from representing that it was closing out its stock of foreign-made surgical instruments, when such was not a fact.

Further representations to be discontinued were that the respondent deals only in surgical instruments manufactured wholly in the United States, when it actually fills orders for surgical instruments manufactured in whole or in part in a foreign country. (2779)

Zelle Company—Leland F. Benham, trading as The Zelle Company, 620 Orleans St., Chicago, was ordered to discontinue disseminating misleading representations in the sale of "Zellets No. 1" and "Zellets No. 2," described as medicinal preparations for the relief of delayed menstruation.

The respondent was ordered to cease advertising that his preparations constitute safe, competent and scientific treatments for delayed menstruation, or that their use will have no ill effects upon the user. The respondent was also ordered to discontinue advertisements which fail to reveal that the use of his preparations may result in serious or irreparable injury to the health of the user. (3854)

STIPULATIONS

The Commission has entered into the following stipulations:

Cre-O-Tox Chemical Products Company—Verne D. Benedict and Maurice S. Kuhn, trading as Cre-O-Tox Chemical Products Company, 1579 Madison Ave., Memphis, Tenn., agreed to cease representing that by the use of "Cre-O-Tox A," a treatment for timbers in buildings which may be infested with subterranean termites, or by use of the "Tox-Eol" method, or any similar product or method, termites in the ground as well as those in the building are, without qualification exterminated. The respondents will also discontinue representing that their method is "not a temporary control method but complete extermination" or has "lasting results." They also agreed to cease making claims that the chemicals used in their product are given the highest rating in the International Termite Exposure Tests of many years duration, or that their product or method is the result of many years of patient and time-taking experience on the part of the Cre-O-Tox Chemical Products Company, when such are not the facts. It was also agreed that the respondents will discontinue representing that the property owner is completely protected by a "5 Year Warranty Bond" or by any "Bond" unless that is a fact, or that the oils used in the "Tox-Eol" systems are of great penetrating power which carry the chemicals deep into the wood. (2533)

Floredex Company—Harold T. Maloney, trading as Floradex Company, successor of Nu-Health Products Company, 178 East Long St., Columbus, Ohio, agreed to cease representing that his preparation, "Floradex" advertised as a treatment for constipation, is marvelous or new; will keep a person from being sick; will restore or build health; will enable one to gain vim and vigor, or that it is beneficial in removing the cause of most common ailments. The respondent further agreed to cease representing that constipation is the factor behind most human ills and ailments, and to discontinue using the word "Food," or any similar words, so as to imply that his preparation has any food value.

This stipulation is supplemental to, but does not affect, the stipulation (No. 01944) executed in November, 1937, by Harold T. Maloney and John C. O'Neil, trading as Nu-Health Products Company and selling the same product under the trade name of "Floradex." (01944)

Mead Glidders—T. E. Mead, trading as Mead Gliders, 15 South Market St., Chicago, stipulated that he will cease advertising that the paddle or the oars and rowlocks offered by him to the purchaser of a "Ki-Yak" or other boat is given free, or that their cost is not included, either in whole or in part, in the price of his product, when such are not the facts. The respondent will also discontinue claims that the paddle which accompanies the "Ki-Yak" is a $6 value, or that the offer of the paddle or of the oars and rowlocks is either "special" or "introductory," or limited in time, when such are not the facts. (2532)

Mid-West Map Co., Aurora, Mo., agreed to cease representing that its cigar lighter and advertisement display device, Lite-O-Phone, is absolutely trouble free, or is the first perfect cigar lighter. The respondent will further cease representing that agents are able to earn sums in excess of those consistently made by a substantial number of its representatives under normal conditions; that agents without previous selling experience cannot fail to sell its products, or that there is an unlimited field and great demand for its products. (02424)

Minnesota Horticultural Peat & Litter Company—Thomas W. Dunlop, trading as Minnesota Horticultural Peat & Litter Company, 650 Second Ave., North, Minneapolis, stipulated that he will discontinue claims that "Gro-Zum," a garden peat moss, is of the same texture or analysis as that of peat moss produced in and imported from Germany; that it has been officially approved or indorsed by the University of Minnesota or other State universities; that the moisture-holding or water-retaining properties of German peat moss are destroyed as a result of the drying and packing under pressure to which such peat moss is subjected, or that, because of its alleged higher content of nitrogenous material, "Gro-Zum" has any more appreciable availability for growing plants than has the competitive imported German product, when such are not the facts. (2534)

Fred W. Neely Company—Fred W. Neely, trading as Fred W. Neely Company, 508 South Dearborn St., Chicago, entered into a stipulation in which he agreed to cease certain misleading representations in violation of the Federal Trade Commission Act.

The respondent stipulated that in connection with his sale and distribution of typewriter ribbons and carbon paper, he will discontinue representing that he has branch offices or establishments in New York, Brooklyn or elsewhere unless that is a fact. The stipulation points out that the respondent shipped his products in interstate commerce in boxes on which were imprinted the words: "Branches New York City, Chicago, Brooklyn," when in fact he operated no branches in New York or Brooklyn but conducted his business solely from his office in Chicago. (2537)

W. C. Ohlendorf, trading as Dr. Ohlendorf, 1924 Blue Island Ave., Chicago, stipulated that he will cease representing that "Dr. Ohlendorf's Tonic" is a competent treatment for the relief of weak, nervous, run-down conditions, sluggish kidneys, irritated bladder, backache, rheumatism, neuritis, diabetes, catarrh of the bladder and bowels, or poor blood circulation. The respondent also agreed to discontinue claims that his tonic is a diuretic and will in all conditions enrich the blood and increase its circulation, or that the price charged for his product is a special price. (02428)

Pacific Bedding Company, 710 East 62nd St., Los Angeles, agreed to cease placing on its mattresses price marks which are higher than the prices at which they are intended to be sold to the purchasing public. The respondent also will discontinue using any fictitious price mark-ups or representations which may convey the belief to purchasers that such mattresses have a value or quality which they do not in fact possess. (2536)

Raymond Powell Company—C. Raymond Powell, trading as Raymond Powell Company, an advertising agency, Memphis, Tenn., has entered into a stipulation to cease and desist from disseminating false and misleading claims concerning "Blue Star Ointment," a medicinal preparation alleged to be effective for the relief of various skin affections.

This is the first stipulation entered into by an advertising agency pursuant to a recent order of the Commission that such agencies be included with vendor-advertisers where inquiries have developed the fact that false and misleading advertising has been placed through advertising agencies.

In the stipulation the respondent admits that in the course and conduct of his business he has disseminated, by United States mails and in commerce, certain advertisements for the purpose of inducing the purchase of the commodity. The respondent also admits, upon competent evidence and in accordance with written admissions of the distributor of the preparation, that "Blue Star Ointment" will not give permanent or prolonged relief from conditions described, and does not reach or relieve their causes. The ointment was advertised to "put a stop to itching torture of eczema, rash, tetter, ringworm, pimples, scabies, between the toes, etc."

The stipulation was entered into by the advertising agency under the Commission ruling that advertising agencies be offered the privilege of signing an independent stipulation and agreement to cease and desist from further dissemination of false advertising copy when it has not been intentionally done. (02429)

Proctor & Gamble Co., Cincinnati, Ohio, stipulated that it will cease representing that its product "Chipso" is safer for the hands than all other laundry soaps or, without justifiable qualification, that it is as safe for the hands as toilet soap; that the detergent action of "Chipso" is substantially different from that of all other soaps; that it is the only soap producing "shampoo" action or employing a "suction" principle, or that either of such actions is new. The respondent further agreed to cease representing that "Chipso" is unqualifiedly safe for all materials; that it will never weaken threads, or that "Chipso" in and of itself, protects the clothes from washtub wear and tear. Other representations to be discontinued are that laboratory tests establish "Chipso" as being superior to every other packaged soap for restoring whiteness to clothing, or that "Chipso" is made especially for any particular locality, when such is not a fact. (02423)

Seaboard Pencil Company—Herbert Hein, trading as Seaboard Pencil Company, 245 Seventh Ave., New York, agreed to cease representing that pencils sold by him are offered at regular factory prices, or that his customer buys direct from the factory, or saves the middleman's profit by dealing with Hein, when such are not the facts. The respondent will also cease representing that his pencils are made in the factory supplying the world's largest pencil users unless such statements shall have been established by adequate proof. Further representations to be discontinued are that Hein is associated with any pencil factory, when such is not a fact, or that he is other than a dealer in such products. (2535)

Herbert A. Strong Tailoring Company, 2226 West Wabansia Ave., Chicago, agreed to cease representing as "wool," " all wool," or "woolen," the principal fabrics used in the manufacture of its clothing when it is made partly of wool and partly of cotton, silk, rayon, linen, or any other fiber, unless the clothing is designated as "wool and cotton," "wool and silk," "wool and rayon," or "wool and linen,' etc., in the order of the predominating fiber content. The respondent also agreed to cease representing that any fibers contained in its product are silk, when they are in truth rayon or some fiber other than silk. (02427)

V. & R. Manufacturing Company—A. A. Haines and Amalia G. Haines, trading as V. & R. Manufacturing Co. and V. & R. Electro Mfg. Co., Detroit Lakes, Minn., stipulated that they will cease representing that the "V. & R. Aerial Eliminator" is a "new" device, or materially different from other similar devices now on the market; is equivalent to a 75-foot aerial in 4-inch attachment; is guaranteed to make outside aerials unnecessary, or will give international or all wave radio reception. The respondents also agreed to discontinue claims that their aerial eliminator is a "Hi-Capacity" device; produces better tone, improved volume or sharper selectivity, or helps reduce static. (02426)

Washington School of Art, Inc.—Wallace Luchs, Sr., Sylvan J. Luchs and Ernestine F. Luchs, trading as Washington School of Art, Inc., Washington, D. C., stipulated that they will cease representing that the person purchasing their correspondence course of instruction has hidden talent or has the ability to make a career in art; that one may begin a career as an artist by the payment of $3, or that ability is a matter of training. The respondents will further discontinue representations that persons taking their advertising sellers' course of instruction in commercial art can make profits in excess of those made consistently by their active graduates under normal business conditions. It was also agreed that where a qualifying word or phrase is used in connection with a specific claim of earnings, the respondents will make such phrases as clear as the claims which they purport to limit or qualify. (02425)

FTC CLOSES CASE

The Federal Trade Commission closed its case against the now-dissolved corporation, Heller & Newman, Inc., 250 West 39th St., New York. In July, 1939, the Commission issued a complaint against the respondent alleging misleading representation through the labeling of garments with the legend "Harris Tweed," when they were not made of genuine "Harris Tweed."

NAB Reports
THE NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 39, September 29, 1939

The Code in Effect October 1

(A Statement by Neville Miller)

I am gratified to report well nigh industry-wide support of the new NAB Code which becomes effective October 1.

In accordance with instructions of the Board, I have appointed a Code Compliance Committee—the Committee of Audience Relations. I am glad to report that Edgar Bill, WMBD, Peoria, Illinois, has agreed to serve as chairman. The Committee is representative of a cross-section of both the industry and of the country. We feel it is more than competent to represent every type of radio station and interest as well as the problems of the industry as a whole.

Mr. Bill has called the first meeting of the Committee for this coming Monday, October 2, at Headquarters in Washington.

This will be a highly important meeting, important to the future of your station and to the future of the entire American System of Broadcasting. We believe that each section of the Code is well understood by most members of the industry. Following its meeting, the Code Committee will issue a Code manual which will contain specific answers to specific problems which have already been presented for ruling. As more of these interpretations are made from time to time, they will be sent to you immediately. The Code manual itself will be in loose-leaf binder form so that you may arrange reports from the Committee under the particular section of the Code applicable.

We feel you will find the interpretations of the Committee to be fair decisions, honestly arrived at, and in conformity with the letter and spirit of the Code passed by the Convention in Atlantic City last July.

In its deliberations, I can assure this industry and the listening public that the Code Committee is concerned with fundamental principles only and not with personalities. The Code represents almost a year's constant deliberation of every conceivable problem affecting the operation of radio in both the social and economic life of our nation. Adherence to the Code means to the individual radio station operator a better long-pull investment and to the American home gives another reason for inviting the NAB station as a preferred guest in its living room. I am convinced that in the Code we find an admixture of the best interests of the radio industry and of the public interest of the American people. The two are inseparable. This is the essence of self-regulation as we know it

THE CODE IN EFFECT OCTOBER 1

(Continued from page 3741)

in our American democracy. And this is the purpose of the NAB Code.

The Committee of Audience Relations (Code Compliance Committee): Chairman—Edgar Bill, WMBD, Peoria, Illinois; Martin Campbell, WFAA, Dallas, Tex.; Walter J. Damm, WTMJ, Milwaukee, Wisc.; Edward Cargill, WMAZ, Macon, Georgia; Earl J. Glade, KSL, Salt Lake City, Utah; Edward Klauber, Columbia Broadcasting System; Don Searle, KOIL, Omaha, Nebraska; Calvin J. Smith, KFAC, Los Angeles, California; Theodore Streibert, Mutual Broadcasting System; Niles Trammell, National Broadcasting Company; E. M. Kirby, NAB, Washington, Secretary.

WMCA Hearing

The FCC held a hearing Wednesday on its charge that Station WMCA, New York City, had violated Section 605 of the Communications Act of 1934 by interception and broadcast of secret German and British naval orders.

In an affidavit answering the Commission's charge WMCA denied any illegality and pointed out that all war news broadcast over the station was obtained from the International News Service, the New York *Herald Tribune* and the New York *Daily Mirror.*

Stanley Wolf, chief radio operator for the New York *Herald Tribune,* was the Commission's first witness at Wednesday's hearing.

Wolf testified that he and the four operators under him picked up, for the *Tribune,* government news broadcasts from abroad.

WMCA had an arrangement with the *Tribune,* he testified, to obtain from the *Tribune's* radio department important news received and this arrangement was made during August of this year. A similar arrangement prevailed during the Munich crisis.

Wolf said that Station DLE, a German government station, interrupted an English news broadcast the evening of August 27 to send a message addressed to all German ships, in German. This was followed by three German words, "Nach Sonderanweisung Handeln." Wolf said he called WMCA and gave the station this message. He also sent it to the editorial rooms of the *Herald Tribune.* A later check with both the editorial rooms and WMCA, he said, showed that this was translated as "upon receipt of this transmission, act upon your special secret instructions."

Two days later, Wolf said, he was listening to an official news broadcast from Station GPR, British government station, when it interrupted the news broadcast by saying, "Here admiralty message." Instructions to all British ships then were broadcast. This, like the German message, was passed on to both the *Herald Tribune* editorial room and WMCA.

After Wolf's testimony, an FCC official said that DLE was registered at Berne as a fixed station and GBR as a land station. This official said he assumed both were in point-to-point service.

The Commission refused to allow Donald Flamm, WMCA president, to read a prepared statement about the case. Flamm explained that WMCA had added the *Herald Tribune* service to its normal news service to obtain official broadcasts, news prepared by *Herald Tribune* staff writers abroad and news bulletins from foreign stations. He then turned to the trade press advertisement which WMCA had prepared. These reprinted parts of two New York gossip columns which said that WMCA's important news scoops had resulted from decoding secret messages. Mr. Flamm denied that these columns were "inspired" and said WMCA at no time had in its employ a code expert. There was no interception at the station and no payment to anyone other than the *Herald Tribune,* he said. Asked if the information in the columns was true, as a whole, Mr. Flamm said it was not. There was a long debate between Mr. Flamm and Commissioners about the amount of the material in the columns that was true.

Leon Goldstein, special events director for WMCA, next on the stand, described in detail the arrangements for the *Herald Tribune* service. He then was questioned extensively about the trade press advertisement. He admitted, under close questioning, that he knew parts of the gossip columns were inaccurate when he used them in the ad and was lectured extensively about the "responsibility" that a broadcast licensee shoulders.

After the luncheon recess, the Commission again questioned Goldstein extensively. Whether the messages were news or plain intercepted messages and whether WMCA had obtained from the *Tribune* a "story" about the messages or just intercepted messages were among the points at issue.

William Weisman, vice president and general counsel of WMCA, was the final witness. He and William Dempsey, FCC general counsel, engaged in a long debate about whether WMCA's answer to the Commission's original charge was complete.

FCC SUSPENDS INDEFINITELY INTERNATIONAL RULE

The FCC this week suspended indefinitely the rule requiring international broadcast stations to send out only programs which would promote "international goodwill, understanding and cooperation."

Opposed by the NAB as a step toward censorship of domestic programs, the rule was suspended temporarily after a hearing. This week, the FCC adopted the following resolution:

> WHEREAS, on May 23, 1939, the Commission adopted Rule No. 42.03(a) having to do with the conduct of international broadcast stations, which rule was thereafter suspended pending further investigation, and
>
> WHEREAS, the outbreak of the European war has injected into the problem of international broadcast regulations various additional significant factors, and
>
> WHEREAS, on September 6, 1939, this Commission appointed a committee composed of Chairman Fly, Commissioner Brown and Commissioner Craven to study the various phases of the communications problem in relation to current war conditions, to maintain contact with the various Government agencies and the industry and to report to the Commission its recommendations, which committee has made studies and held various conferences on the problems in relation to international broadcasting,
>
> THEREFORE, BE IT RESOLVED, That said rule is hereby further suspended pending the conclusion of said studies and conferences and subject to the report of said committee recommending to the Commission such further action as it may deem appropriate.

"RADIO GUIDE" UNDERTAKES SONG CONTEST FOR BROADCASTING

In cooperation with Davis and Schwegler, Inc., tax-free music publishers, *Radio Guide* Magazine is undertaking a "National Song Search" to discover new authors and composers in three fields of music: popular, semi-classical and sacred music.

Attention of broadcasters has been drawn to the contest because of its immediate value in determining the extent and quality of undiscovered sources of useable new music, independent of ASCAP affiliation.

While the selection of winners in the sacred music and semi-classical sections will be announced on December 30 and January 6 respectively, the last dates for entries in the weekly contest for new popular music begin at once, the first one closing as of October 7. Two hundred dollars in cash is offered the winner of each weekly contest. Quoting from *Radio Guide,* the prizes are as follows:

PRIZES

The greatest first prize ever offered an unknown songwriter. The winner of each contest will receive:

1. $200 in cash.
2. The regular song-writer's contract with the great Los Angeles music-publishing firm, Davis-Schwegler, providing for royalties on all sheet music and other sales.
3. Immediate publication and distribution as sheet music.
4. Immediate recording and distribution as phonograph record.
5. Inclusion of the winning song in regular Davis-Schwegler Library Service to radio stations from Coast to Coast.

Consolation Prizes

The next five song-writers selected will receive $10 each in cash.

Honorable Mentions

The next six song-writers will be given Honorable Mention Certificates.

As the music is received, title, lyrics and score will be searched by the Davis and Schwegler staff. Following this, selections will be made to a professional judging committee, headed each week in the popular field by name-band orchestra leaders and prominent radio singers and musicians. This week's issue announces that the committee in the second week's contest will be headed by Kay Kyser and Ginny Simms. The sheet music will be made available to all radio stations and networks, for performance. Davis and Schwegler will include the winning selections in their transcription service and on their records. *Radio Guide* informs Headquarters that network performance opportunities have been arranged through connection with commercially sponsored leaders in the popular field. Other exploitation of the new music on individual stations has also been arranged, through station tie-ups with the magazine.

Headquarters feels that the contest and the subsequent radio performance of the new music will furnish helpful information about the music problem.

FREE OFFERS

The following companies were reported by member stations as seeking free time for commercial purposes, in violation of the NAB Code of Ethics:

American Road Builders Association
The Spool Cotton Company
B'rer Rabbit Molasses
The Woman Magazine

The Bureau of Radio Advertising has advised the above concerns that their proposals constitute "free offers," which the NAB Code of Ethics prohibits member stations from accepting. Stations are again urged to make every effort to convert these free offer requests into paid advertising, either through solicitation of local outlets or direct to the national organization. The Bureau of Advertising is making similar efforts wherever possible.

COST-PER-INQUIRY

The following concerns have recently sought to place business on member stations on a contingent basis:

Dorland International Agency (on behalf of Poya)
Popular Music Instruction Company (piano course)

The NAB Bureau of Radio Advertising has advised these concerns that the Code of Ethics prohibits stations from accepting business on a contingent or cost-per-inquiry basis and has suggested that they buy time at the stations' regular rates.

THE FOOD COUNCIL

The NAB suggests that member stations receiving proposals from the Food Council, 308 Fourth Avenue, New York City, to broadcast scripts or transcriptions free of charge communicate with NAB Headquarters before accepting same or committing themselves with advertisers who may wish to sponsor these programs.

CROWELL-COLLIER PUBLISHING COMPANY

NAB has discussed with the Crowell-Collier Publishing Company the "Voice of Industry" programs which the company proposes to have stations broadcast as part of a campaign to humanize industry and explain advertising to the public. Crowell-Collier has agreed to waive mention of the four magazines they publish in the closing announcement of these transcriptions, thus allowing stations who wish to run this series to fade out the closing credit and substitute their own with whatever wording is considered most fitting.

CLINE, WLS, HEADS NAB SALES MANAGERS COMMITTEE

Neville Miller this week appointed William R. Cline, Commercial Manager of WLS, Chicago, as chairman of the Sales Managers' Committee, succeeding Craig Lawrence, KSO, Des Moines. In confirming Mr. Cline's appointment, Neville Miller, NAB president, outlined the reorganization plans intended to further the efficient operation of the Sales Managers' division, under the direction of the NAB Board of Directors.

An Executive Committee will be appointed from the Sales Managers' Division to meet regularly and work in cooperation with the Bureau of Radio Advertising and Headquarters' staff in developing a sales and promotion program on behalf of all member stations. Under the reorganization plan, it is expected that district directors will appoint representatives to the Sales Managers' Committee and that all activity of the Committee in each district will be centered under the Director.

"CURTAIN RAISER" HISTORY

A pictorial history of Curtain Raiser as observed throughout the United States during the week of Sept. 24 and thereafter is to be published by NAB. It will be distributed to advertisers, agencies, members and others.

The receipt of photographs and copy will be appreciated at headquarters at the early convenience of members.

OCTOBER EVENTS

October 8-14	—Fire Prevention Week National Candy Week
October 9	—Canadian Thanksgiving Day
October 10-20	—Picture Week
October 12	—Columbus Day (celebrating discovery of America, 1492)
October 14	—Sweetest Day—Last day of Candy Week William Penn born 1644
October 15-21	—National Business Show in New York
October 22-28	—National Pharmacy Week
October 27	—Navy Day Theodore Roosevelt born 1858 First World War shot fired by American troops, 1917
October 28	—Anniversary of freedom of U. S. Press, 1753
Oct. 29-Nov. 6	—Girl Scout Week (birthday of Juliette Low, founder of Girl Scouts)
October 31	—Hallowe'en
Oct. 31-Nov. 5	—National Apple Week

Note: National Retail Grocers Week will be held some time this month. Check your local stores for dates.

NEBRASKA-ASCAP SUIT TRIED

The trial of Buck, et al., v. Swanson, et al., took place in Lincoln, Nebraska, on September 18 to 21, inclusive, before a specially constituted three judge Federal court presided over by Judge Gardner of the Circuit Court of Appeals for that district. ASCAP brought suit against the Nebraska state officials and county attorneys to enjoin prosecutions under the Nebraska Copyright Monopoly Statute, adopted by the Legislature in 1937, on the grounds that the statute is unconstitutional. Many provisions of the state law are believed by attorneys to be beyond the power of the state legislature but it is contended that the monopoly section prohibiting price fixing by combination of copyright owners is within the police power of the legislature.

Testimony was introduced by ASCAP who produced as witnesses, among others, Gene Buck, president of ASCAP; Claude Mills, Chairman of the Administrative Committee; and John Paine, general manager. They testified primarily to the history of ASCAP, to the efforts of users to hamper their operations, and to their alleged inability to operate under the Nebraska statute.

The defendant state officials introduced testimony tending to show ASCAP's method of operation in the State of Nebraska and to bring out the monopoly power concentrated in the Society through its publisher membership. Among the witnesses called by the state officials were John J. Gillin, Jr., manager of WOW, and Don Searle, manager of KFAB-KOIL-KFOR. Mr. Gillin testified in detail as to ASCAP's licensing method with respect to radio stations, the discriminatory character of the licenses issued to commercial stations and those issued to newspaper owned stations and the inability of his station to continue operation without acceding to ASCAP's demands. Mr. Gillin's testimony was corroborated by Mr. Searle.

A decision by the Court is not expected for some time. ASCAP was represented by L. J. TePoel, Louis D. Frohlich and Herman Finkelstein. The state officials were represented by John L. Riddell, Chief Assistant Attorney-General, William J. Hotz and Andrew W. Bennett.

LABOR NOTES

The actors' row which for a time threatened to make trouble for broadcasting has been settled by agreement with the following results:

The American Federation of Actors is out of business and Ralph Whitehead, its executive secretary, is out of a job.

The American Guild of Variety Artists has succeeded the American Federation of Actors as the A. F. of L. union for vaudeville and night club performers.

The American Federation of Radio Artists now has the same exchange arrangement with AGVA as it used to have with AFA.

The Screen Artists Guild made peace with the International Alliance of Theatrical Employees and Motion Picture Operators, withdrew its support of the United Studio Technicians—and the IA beat the UST in an election at the Hollywood studios.

Sophie Tucker is now in good standing with the AGVA.

It all amounts to *status quo ante bellum,* excepting for Ralph Whitehead's job.

The New York papers report a fight between the A. F. of M. and ASCAP over the latter's music festival plans. ASCAP, it is reported, hired the Boston Symphony for the festival, to start October 2. The Boston Symphony is the only major non-union symphony orchestra, and the A. F. of M. threatened to refuse to allow union musicians to take part in the festival if non-union musicians appeared. The papers say ASCAP substituted the New York Philharmonic for the Boston Symphony because of this threat.

After October 24, the Wage and Hour Act requires payment of time and one-half for overtime above 42 hours a week to all covered employees in the broadcasting industry. The NAB labor relations department will be glad to answer any questions about the change.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, October 2. They are subject to change.

Monday, October 2

NEW—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Howton Radio Alarm Co., Seattle, Wash.—Permit for new special experimental station, **2414 kc.,** 12.5 watts, unlimited time. Pts. of Comm.: Portable within city limits of Seattle, Wash.

Tuesday, October 3

WSVS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Renewal of license, **1370 kc.,** 50 watts, specified hours.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license, **1370 kc.,** 100 watts, 250 watts LS, unlimited time (requests facilities of WSVS). Present assignment: **1370 kc.,** 100 watts, 250 watts LS. Time: All hours except those WSVS operates.

Wednesday, October 4

NEW—Publix Bamford Theatres, Inc., Asheville, N. C.—C. P., **1430 kc.,** 1 KW, unlimited time (DA night).

Thursday, October 5

Oral Argument Before the Commission

Report No. B-62:

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—C. P., **1120 kc.,** 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

Report No. B-68:

WGRC—Northside Broadcasting Corp., New Albany, Ind.—C. P., **880 kc.,** 250 watts, unlimited time. Present assignment: **1370 kc.,** 250 watts, daytime.

NEW—The Gateway Broadcasting Co., Louisville, Ky.—C. P., **880 kc.,** 500 watts, unlimited time (DA day and night).

Report No. B-73:

NEW—WJMS, Inc., Ashland, Wis.—C. P., **1370 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

November 2

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—C. P., **620 kc.,** 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

King-Trendle Broadcasting Corp., Detroit, Mich.—Granted extension of authority to transmit programs from station WXYZ to the stations of the Canadian Broadcasting Corp., for the period ending October 16, 1940.

Mutual Broadcasting System, Inc., Chicago, Ill.—Granted extension of authority to transmit programs to station CKLW, stations owned and operated by the Canadian Broadcasting Corp., and stations licensed by the Canadian Minister of Transport, through the facilities of the American Telephone and Telegraph Co., for the period ending September 1, 1940.

DESIGNATED FOR HEARING

The following application has been designated for hearing by the Commission. Date for the hearing has not yet been set.

WCAP—Radio Industries Broadcast Company, Asbury Park, N. J.—Application for renewal of license; temporary license granted from October 1, 1939, pending hearing. This application was designated for hearing because of request of WTNJ, Trenton, N. J., for unlimited time and increase in nighttime power from 500 watts to 1 KW; this involves all facilities of WCAM and WCAP.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KFSG, Los Angeles; KRKD, Los Angeles; WCSH, Portland, Maine; WFBM, Indianapolis, Ind.; WHA, Madison, Wis.; WKAQ, San Juan, P. R.; WNAD, Norman, Okla.; KVOA, Tucson, Ariz.

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Calif.—Granted renewal of license for the period ending February 1, 1940.

KBNU—Cache Valley Broadcasting Co., Logan, Utah.—Granted renewal of license for the period ending December 1, 1939.

Licenses for the following stations were extended on a temporary basis for the period ending November 1, 1939, pending receipt of and determination upon application for renewal:

KGGM, Albuquerque, N. Mex.; WDSU, New Orleans; WHBF, Rock Island, Ill.; WHBI, Newark, N. J.; WNEL, San Juan, P. R.; and WNEW, New York City.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Present license further extended upon a temporary basis only for the period ending November 1, 1939, pending determination upon application for renewal.

KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only for the period ending November 1, 1939, pending determination upon application for renewal.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Present license further extended upon a temporary basis only for the period ending November 1, 1939, subject to whatever action may be taken upon pending application for renewal, and subject further to the express condition that said extension shall not be construed as a finding by the Commission that the operation of this station is or will be in the public interest beyond the express terms hereof.

W4XBW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Present license for high frequency broadcast station was further extended upon a temporary basis only for the period ending November 1, 1939, pending determination upon application for renewal.

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted renewal of high frequency broadcast station license for the period ending April 1, 1940.

WAXG—Florida Capitol Broadcasters, Inc., Portable-Mobile.—Present license of relay broadcast station was further extended upon a temporary basis until November 1, 1939, pending determination upon application for renewal.

The following portable-mobile relay broadcast stations were granted renewals for the regular period:

KBKC, WCBE, WCBF, WCBG, Columbia Broadcasting System, Inc.; WAAJ, The Fort Industry Co.; KALO, Intermountain Broadcasting Corp.; WIOE, Isle of Dreams Broadcasting Corp.; KBIB, The KANS Broadcasting Co.; KDJB, Mason City Globe-Gazette Co.; KABF, McClatchy Broadcasting Co.; WAFZ, Minnesota Broadcasting Corp.; WBPA, The National Life and Accident Ins. Co., Inc.; KBID, Radio Service Corp. of Utah; WATS, Allen T. Simmons; WGBD, WBNS, Inc.; WAXL, Jonas Weiland; WIPL, WIPM, WNEI, WFBM, Inc.; WGTO, WGTM, Inc.

Renewals for the following portable-mobile relay broadcast station licenses were extended upon a temporary basis only for the period ending November 1, 1939, pending receipt of and determination upon application for renewal:

KIJG, Eagle Broadcasting Co., Inc.; KAGB, Albert Lee Broadcasting Co.; WABG, Memphis Commercial Appeal Co.; KABE, National Battery Broadcasting Co.; KAIE, National Battery Broadcasting Co.; WABV, Juan Piza; KNEF, Radio Service Corp. of Utah; WAXH, Savannah Broadcasting Co., Inc.

250 WATTS POWER AUTHORIZED

The following stations were granted modification of licenses to increase nighttime power to 250 watts:

WMFF, Plattsburg, N. Y.; WJBK, Detroit, Mich.; WJW, Akron, Ohio; WPAD, Paducah, Ky.; KGFW, Kearney, Nebr.; KOME, Tulsa, Okla.; WHDF, Calumet, Mich.; WBOW, Terre Haute, Ind.; KVOL, Lafayette, La.; KGFF; Shawnee, Okla.; KVWC, Vernon, Tex.; KDLR, Devils Lake, N. Dak.; KGKY, Scottsbluff, Nebr.; KGLO, Mason City, Iowa.

MISCELLANEOUS

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of special temporary authority to operate unlimited time on **1180 kc.**, using 10 KW power, employing directional antenna system after sunset at Portland, Ore. (September 6:30 p. m. and October 5:30 p. m., PST), for the period September 30, 1939, to October 29, 1939.

KEX—Oregonian Publishing Co., Portland, Ore.—Granted extension of special temporary authority to operate unlimited time on **1180 kc.**, using 5 KW power, for the period September 30, 1939, to October 29, 1939.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Granted special temporary authority to operate on **2012 kc.**, for the period ending September 30, 1939, in order to avoid interruption of important experiments with improved independent synchronization system.

KYOS—Merced Broadcasting Company, Merced, Calif.—Granted special temporary authority to operate from 8 p. m. to 10 p. m., PST, on September 29, October 6, 13, 20, 27, 1939, in order to broadcast high school football games.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted special temporary authority to pick up and rebroadcast emergency Red Cross drill to be received from amateur stations W3NT, W3II, W3HMB, W3FQP, W3EMM, W3BEK, W3HJC, W3CHE, W3IEY, W3FGJ, W3PK, W3HFL, W3DGG, W3AJA, W3AKN, W3GON, operating on **1805 kc.**, over radio station WTAR from 8 p. m. to 9 p. m., EST, on September 28, 1939; WTAR to communicate with amateur stations through relay broadcast station WAHE operating on **2022 kc.**

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate from 5:30 p. m. to 6:30 p. m., EST, on October 7, 14, 21 and 28, 1939, in order to broadcast football games as described in letter dated September 14, 1939.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate on September 24 and 29, 1939, using 100 watts only, to carry dedication program Mutual and Southern Network services to WGRC, and football game.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Granted special temporary authority to operate unlimited time on September 29, October 6, 13 and 20, 1939, in order to broadcast high school football games, for time of game only.

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted special temporary authority to operate simultaneously with station WFAS from 4 p. m. to 5 p. m., EST, on September 23, 1939, in order to broadcast a football game.

NEW—Thomas J. Watson, Endicott, N. Y.—Denied motion to withhold further consideration in re Docket No. 5372, WMFF, Plattsburg Broadcasting Corp., Plattsburg, N. Y.

KRKO—Lee E. Mudgett, Everett, Wash., and NEW—Cascade Broadcasting Co., Inc., Everett, Wash.—Ordered that the final date for all parties in Dockets Nos. 5097, 5226, 5443, and 5114, to submit proposed findings of fact and conclusions, be extended from September 20 to October 11, 1939.

KVAK—Carl Latenser, Atchison, Kans.—Granted special temporary authority to operate on October 13, 1939, in order to broadcast high school football game only.

WBNY—Roy L. Albertson, Buffalo, New York.—Granted special temporary authority to operate from 2 p. m. to 3 p. m., EST, on September 30, October 7, 14, 21 and 28, 1939, in order to broadcast newscasts, musical programs and other features of public interest; to operate from 8:30 a. m. to 10 a. m., and from 2 to 3 p. m., EST, on October 1, 8, 15, 22, and 29, 1939, in order to broadcast religious services, newscasts, and musical programs; to operate unlimited time on

October 12 and 27, 1939, in order to broadcast musical programs and newscasts (provided WSVS remains silent).

WBRY—American-Republic, Inc., Waterbury, Conn.—Granted extension of special temporary authority to operate with the present two-unit directional antenna in accordance with the experimental authority granted under license, for the period September 30, 1939, to October 29, 1939, in order to determine necessary steps to change from a special broadcast to a standard broadcast station.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate with power of 250 watts on September 24, 1939, in order to broadcast an address by a Bishop of the Holy Name Society, for actual address only.

WLOK—The Fort Industry Co., Lima, Ohio.—Granted special temporary authority to operate night on September 23, 1939, in order to broadcast high school football game only.

WMFO—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Granted special temporary authority to operate on September 29, October 6, 13, 20, 27, 1939, using 50 watts only, in order to broadcast local high school football games only.

WCAT—South Daokta State School of Mines, Rapid City, S. Dak.—Granted special temporary authority to operate on September 29, October 20 and 27, 1939, in order to broadcast football games only.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from 7:00 p. m., PST, to the conclusion of high school football games on September 22, 29; October 1 and 6, 1939, and to broadcast United Press Service news for ten minutes after the close of the game on October 1, 1939.

United Air Lines Transport Corp., Washington, D. C.—Granted special temporary authority to operate already licensed aircraft radio transmitter, aboard the plane owned by United Air Lines Transport Corp., call letters KHAZT as a relay broadcast station on the frequency of **2790 kc.**, to relay broadcast program describing American Legion Parade to Radio Station WGN, from 1:00 p. m. to 3:00 p. m., CST, on September 26, 1939.

KFVS—Oscar C. Hirsch, tr. as Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Granted special temporary authority to operate simultaneously with Station WEBQ on nights of September 22, 29, October 13 and 20, 1939, in order to broadcast football games only as described in letter dated September 18, 1939.

WRCA-WNBI—National Broadcasting Co., New York, N. Y.—Granted extension of special temporary authority to transmit programs consisting of Spanish News to be rebroadcast by Cuban Stations CMX and COCX, for the period September 28 to October 27, 1939.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period September 21, 1939, to October 20, 1939.

WESG—Cornell University, Ithaca, N. Y.—Reconsidered action in designation for hearing the application for renewal of license of WESG, and granted same, dismissing same from the hearing docket. This application was originally designated for hearing by reason of the applications and petitions submitted in behalf of the licensees of Stations WTIC, WBAL, KTHS, and KRLD, for special experimental authority to operate on frequency of **1040 kc.**, assigned to Station WESG.

NEW—Suffolk Broadcasting Corp., Suffolk, Va.—Amended Order heretofore entered on August 19th, with reference to grant of new station to operate on **1420 kc.**, 100 watts, 250 watts LS, unlimited time, by inserting a fourth paragraph thereof, directing applicant to file application for modification of C. P. specifying exact transmitter location and antenna system within two months after effective date of amended Order—September 27, 1939.

In re: Change of Rules 177 and 177.1.—Denied motion to strike filed by counsel for City of New York on behalf of Mayor LaGuardia, in the matter of amendment of Rules 177 and 177.1, in so far as it requests the striking of Issue No. 4, which is as follows: "To determine to what extent, if at all, the amendment of the rules as set forth in paragraphs 1 and 2 hereof would affect the operation of commercial stations as to program service and listening audience". Granted motion in so far as it requests amendment of Issue No. 6, which is as follows: "To determine whether, in view of the long distance characteristics of international stations and the unreliability of the short or national services of such stations, international stations should be permitted to be used to assist in the building of programs for regular broadcast stations, "by adding thereto the following: "whose licensees are the same as those set forth in paragraph 1 hereof," and said Issue No. 6 was amended that said motion was denied in so far as it requests striking of Issue No. 9, which is as follows: "To determine whether the Commission should change its basic policy of not authorizing the use of radio facilities where other facilities are available to render the same service."

KFRO—Voice of Longview, Longview, Texas.—Granted request in part to operate as follows: Between sunset and midnight on October 1, 8, 15, 22 and 29, when actually transmitting church services; no other broadcast authorized on these nights; to operate on the nights of October 6, 13, 20 and 27, to broadcast football games while actually transmitting the football games only; no other broadcast authorized on these nights; to operate on nights of October 3, 10, 17 and 24, while actually transmitting programs directly pertaining to the Fair; no other programs not directly related to the Fair not authorized. Station KFRO must remain silent all hours at night except those specifically set out above for the programs as mentioned; request for carrying other programs denied, which includes operation on October 7, 14, 21 and 28, for college football roundup.

WGIL—Galesburg Broadcasting Co., Galesburg, Ill.—Granted special temporary authority to operate from local sunset (September, 6:15 p. m., CST), to 9:30 p. m., CST, on September 26, in order to broadcast special Dedicatory program of the Galesburg Public Schools and Board of Education.

WELI—City Broadcasting Corp., New Haven, Conn.—Granted authority to determine operating power by direct measurement of antenna input.

WELI—City Broadcasting Corp., New Haven, Conn.—Granted license to cover C. P. authorizing change in frequency from **900** to **930 kc.**, and time of operation from daytime to unlimited, with 250 watts night, 500 watts day, employing DA system for nighttime operation.

NEW—Radio Air Service Corp., Portable-Mobile, area of Cleveland, Ohio.—Granted C. P. for new high frequency relay broadcast station; frequencies **31620, 35260, 37340, 39620 kc.**, 25 watts.

WEGR—Donald A. Burton, Muncie, Ind., Portable-Mobile.—Granted C. P. to install new equipment and increase power in high frequency relay broadcast station from 5 to 15 watts.

NEW—Mason City Globe-Gazette Co., Mason City, Iowa, Portable-Mobile.—Granted C. P. for low frequency relay broadcast station to operate on frequencies **1622, 2058, 2150** and **2790 kc.**, 2 watts.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Granted license to cover C. P. authorizing changes in equipment, installation of directional antenna for day and nightime operation, and increase in power from 10 to 50 KW.

WEIN—The Journal Company (The Milwaukee Journal), Portable-Mobile, area of Milwaukee, Wis.—Granted license to cover C. P. for relay broadcast station; frequencies **33380, 35020, 37620** and **39820 kc.**, 25 watts.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Granted C. P. to make changes in authorized equipment.

KWBD—W. B. Dennis, Plainview, Tex.—Granted modification of C. P. for approval of transmitter and studio sites and installation of vertical radiator.

WMAN—Richland, Inc., Mansfield, Ohio—Granted modification of C. P. approving studio and transmitter sites, changes in authorized equipment and installation of vertical radiator.

WAFZ—Minn. Broadcasting Corp., Portable-Mobile, Minneapolis, Minn.—Granted modification of license to reduce power in low frequency relay station from 7.5 to 2.5 watts.

WNYC—City of New York, Municipal Broadcasting System, New York City.—Granted authority to determine operating power of auxiliary transmitter by direct measurement of antenna input.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

WTNJ—WOAX, Inc., Trenton, N. J.—Granted C. P. to install auxiliary transmitter for emergency use only.

WLTH—Voice of Brooklyn, Inc., New York City.—Granted C. P. to move transmitter site locally and install vertical radiator.

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Granted C. P. to make changes in equipment.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Granted C. P. to install new equipment.

KEGN—Don Lee Broadcasting System, San Francisco, Cal., Portable-Mobile.—Granted C. P. to install new equipment.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Granted license to cover C. P. authorizing changes in equipment.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Granted license to cover C. P. authorizing new station to operate on **1420 kc.,** 100 watts, daytime only.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—Granted license to cover C. P. authorizing new station to operate on **1200 kc.,** 100 watts night, 250 watts day, unlimited.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Granted license to cover C. P. authorizing new station to operate on **1370 kc.,** 100 watts, unlimited time.

KRBA—Red Lands Broadcasting Assn., Lufkin, Tex.—Granted license to cover C. P. authorizing changes in equipment and increase in day power from 100 to 250 watts.

WJNO—WJNO, Inc., West Palm Beach, Fla.—Granted license to cover C. P. authorizing installation of new equipment.

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted license to cover C. P. authorizing move of transmitter locally.

KFXJ—Western Slope Broadcasting Co., Grand Junction, Colo.—Granted license to cover C. P. authorizing installation of new equipment and vertical radiator.

W2XWE—WOKO, Inc., Albany, N. Y.—Granted modification of C. P. to make changes in equipment.

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Granted modification of C. P. approving transmitter and studio sites, changes in authorized equipment and installation of vertical radiator.

WNEI—WFBM, Inc., Indianapolis, Ind., Portable-Mobile—Granted modification of C. P. covering changes in equipment.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted authority to install automatic frequency control.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Granted authority to determine operating power by direct measurement of antenna input.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Granted authority to determine operating power by direct measurement of antenna input.

KFNF—KFNF, Inc., Shenandoah, Ia.—Granted authority to determine operating power by direct measurement of antenna input.

WJNO—WJNO, Inc., West Palm Beach, Fla.—Granted authority to determine operating power by direct measurement of antenna input.

WNAD—Univ. of Okla., Norman, Okla.—Granted special temporary authority to operate from 2:30 to 3 p. m. on Oct. 23 and 30, and from 10:30 a. m. to 11:30 a. m., CST, on Oct. 24, 25, 26 and 31, in order to broadcast special educational programs (provided KGGF remains silent).

KGGF—Hugh J. Powell, Coffeyville, Kans.—To remain silent on above periods in order to permit WNAD to broadcast special educational programs.

WOL—American Broadcasting Co., Washington, D. C.—Granted special temporary authority to operate with antenna currents in the ratio 1.50 to 1.00 and phase angle of 105° yielding field intensity of 53.5 mv/m in the direction of radio stations WNAC and WFBM during daytime for the period Oct. 4 and continuing for duration of the World's Series Baseball games, in order to maintain the field intensity of WOL for service in the Chevy Chase-Bethesda, Md., areas.

WKAQ—Radio Corp. of Puerto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from International Broadcast stations WCBX and WCAB over station WKAQ, on a non-commercial experimental basis only, for the period 3 a. m., October 1 and ending no later than October 30, 1939.

WNEL—Juan Piza, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from International Broadcast station WNBI and WRCA over station WNEL, for the period October 7 to November 5, 1939.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate additional time on October 1, 8, 15, 22 and 29, in order to broadcast baseball games only.

KDNT—Harwell V. Shepard, Denton, Texas.—Granted special temporary authority to operate additional time to broadcast Denton County Fair programs only, on October 3, 4, 5, 6 and 7, and to broadcast football games only on October 13, 20 and 27.

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Granted special temporary authority to operate additional time on September 29, October 6, 13, 20 and 27, in order to broadcast football games only.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate additional time on September 30, October 7, 13, 14, 21, in order to broadcast University football games only.

KPDN—R. C. Hoiles, Pampa, Texas.—Granted special temporary authority to operate additional time on October 20 and November 3, in order to broadcast high school football games only.

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted special temporary authority to operate between 6:15 and 7 p. m., EST, daily during month of October in order to broadcast weather reports only.

WTAW—Agricultural and Mech. College of Texas, College Station, Texas.—Granted special temporary authority to operate simultaneously with WJBO while broadcasting Texas A. & M. v. Santa Clara football game only.

APPLICATIONS FILED AT FCC

850 Kilocycles

WKAR—Michigan State College, East Lansing, Mich.—Modification of C. P. (B2-P-1767) to extend completion date from 9-30-39 to 11-30-39.

1140 Kilocycles

WSPR—WSPR, Inc., Springfield. Mass.—Modification of license to change frequency from **1140 kc.** to **1240 kc.,** and power from 500 watts to 250 watts, 500 watts day; time from limited to unlimited. Amended to change application to a construction permit; install directional antenna for day and night use, requesting **1240 kc.,** 500 watts power day and night, unlimited time; and change name to WSPR, Inc.

WAPI—Alabama Polytechnic Institute, University of Alabama, Alabama College (Board of Control of Radio Broadcasting Station WAPI), Birmingham, Ala.—C. P. to install new transmitter, directional antenna for day and night; change frequency from **1140 kc.** to **1070 kc.;** increase power from 5 to 50 KW, hours of operation from simultaneous day, shares KVOO night, to unlimited; move transmitter from on Sandusky Mt., near Pratt City, Birmingham, Ala., to 9 miles north of Birmingham, Ala. Amended to request **1050 kc.**

1200 Kilocycles

KHAS—The Nebraska Broadcasting Co., Hastings, Nebr.—Modification of C. P. (B4-P-2367) for a new station, requesting approval of antenna and approval of studio and transmitter site at 2nd and Burlington Ave., Hastings, Nebr. Amended to request 250 watts power day and night.

WENY—Elmira Star-Gazette, Inc., Elmira, N. Y.—Modification of C. P. (B1-P-1461) for a new station, requesting increase in power from 100 watts, 250 watts LS, to 250 watts day and night; extend commencement and completion dates 60 days after grant and 180 days thereafter, respectively.

1210 Kilocycles

NEW—M. W. Plowman and F. Koren, d/b as Midland Broadcasting Co., Watertown, S. Dak.—C. P. for new station on **1210 kc.,** 100 watts, 250 watts LS, unlimited time.

WEDC—Emil Denemark, Inc., Chicago, Ill.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KOCA—Oil Capitol Broadcasting Association, Kilgore, Tex.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1260 Kilocycles

WFVA—Fredericksburg Broadcasting Corporation, Fredericksburg, Va.—License to cover C. P. (B2-P-2105) for a new station.

1290 Kilocycles

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Authority to determine operating power by direct measurement of antenna power.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—License to cover C. P. (B3-P-2224) for new antenna and transmitter and move of transmitter.

1310 Kilocycles

NEW—Wm. F. Huffman, Wisconsin Rapids, Wis.—C. P. for a new station on **580 kc.**, 250 watts, unlimited time. Amended to request **1310 kc.**, 100 watts, 250 watts LS, unlimited, and omit request for directional antenna. Transmitter site to be determined, Wisconsin Rapids, Wis.

WTJS—The Sun Publishing Company, Inc., Jackson, Tennessee.—C. P. to install new transmitter, directional antenna for night use; change in frequency from **1310 kc.** to **1360 kc.**; increase power from 100 watts, 250 watts LS, to 1 KW day and night.

WLNH—Northern Broadcasting Co., Laconia, N. H.—Construction permit to make changes in equipment and increase power from 100 to 250 watts.

1370 Kilocycles

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kansas.—C. P. to make changes in equipment and increase power from 100 to 250 watts.

WISE—Harold H. Thoms, Asheville, N. C.—Modification of C. P. (B3-P-1066) for a new station, requesting authority to install new transmitter, change name from Asheville Daily News (Harold H. Thoms, owner), to Harold H. Thoms.

1420 Kilocycles

WMBC—Michigan Broadcasting Co., Detroit, Mich.—Authority to transfer control of corporation from E. J. Hunt, to John L. Booth, 1,643 shares common stock.

1500 Kilocycles

KPAB—Mervel M. Valentine, Laredo, Texas.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KDRO—Albert S. Drohlich, Robert A. Drohlich, Drohlich Brothers, Sedalia, Mo.—Authority to determine operating power by direct measurement of antenna power.

KDRO—Albert S. Drohlich, Robert A. Drohlich, d/b as Drohlich Brothers, Sedalia, Mo.—License to cover C. P. (B4-P-2165) for a new station.

MISCELLANEOUS

NEW—International Broadcasting Corp., area of WOV (N. Y.).—Construction permit for a new relay broadcast station to be operated on **31220, 35620, 37020, 39260 kc.**, 10 watts, A-3 emission, located in area of New York, N. Y.

NEW—International Broadcasting Corp.—License to cover above.

WTNK—WOAX, Incorporated, vicinity of Trenton, N. J.—Construction permit for reinstatement of station WTNK (C. P. expires 9-24-39).

NEW—WCAU Broadcasting Co., Philadelphia, Pa.—Construction permit for a new television station, site to be determined, Philadelphia, Pa., operated on **78000-84000 kc.**, 1 KW power, A-5 emission, unlimited time.

WHPT—Radio Station WMFR, Inc., vicinity of High Point, N. C.—License to cover C. P. (B3-PRY-168) for new relay broadcast station.

NEW—Moody Bible Institute of Chicago, Chicago, Ill.—C. P. for a new non-commercial educational broadcast station on **41,300 kc.**, unlimited time, A-3 emission, 100 watts power. Located at RFD #1, Addison, Ill. Amended: To change name from The Moody Bible Institute Radio Station, to Moody Bible Institute of Chicago.

NEW—R. B. Eaton, Des Moines, Iowa.—C. P. for new television broadcast station at Des Moines, Iowa, on **46500 kc.**, visual, and **49750 kc.** for aural transmission, 100 watts power, A-3 and A-5 emission. Amended: To request **44000-50000 kc.**, for both aural and visual.

W9XC—Central Broadcasting Co., near Mitchellville, Iowa.—Modification of C. P. to extend completion date from 9-18-39 to 12-18-39.

W9XC—Central Broadcasting Co., near Mitchellville, Iowa.—License to cover C. P. (B4-PEX-23) as modified for a new station.

NEW—Board of Education of the San Francisco Unified School District, San Francisco, Calif.—C. P. for a new non-commercial educational broadcast station to be located at 22nd and Bartlett Streets, San Francisco, Calif., to be operated on **41300 kc.**, 1 KW power, A-3 emission, unlimited time. Amended: Re: name.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bolivar Studios, Inc.—See National Press Photo Bureau, Inc.

Kay Hart Studios, Inc.—See National Press Photo Bureau, Inc.

National Press Photo Bureau, Inc., Kay Hart Studios, Inc., Bolivar Studios, Inc., and Samuel F. Reese and Clara L. Reese, both officers of National Press Photo Bureau, Inc., and Kay Hart Studios, Inc., all of 509 Fifth Ave., New York, were charged, in a complaint, with misleading representations in the sale of photographs.

The respondents allegedly represented that National Press Photo Bureau, Inc., is connected with leading newspapers of the United States; that it represents local newspapers and has a following throughout the country; that the respondents are obtaining photographs for their files, and furnish the photographs to the press. Acting under such representations, the complaint continues, the respondents or their agents procure permission to photograph members of the purchasing public and subsequently attempt to sell them the finished photographs. (3898)

Norwalk Lock Company—See Segal Lock & Hardware Co., Inc.

Segal Lock & Hardware Company, Inc.—Under a complaint, Segal Lock and Hardware Company, Inc., Norwalk Lock Company, and their president, Louis Segal, and Jack Klein, who trades as Tested Appliances Company, all of 261 Broadway, New York, were charged with dissemination of misleading representations in the sale of a lock or lock cylinder device designated "Segal Pick-Proof Lock," "Segal Pick-Proof Lock Cylinder," and "Segal Pick-Proof Cylinder."

The respondents were charged with making misleading claims concerning the mechanical perfection and "pick-proof" quality of the Segal lock cylinder and the absence of such qualities in competing locks or lock cylinders.

By the use of a "pick gun" or other lock-picking device, the respondents, their salesmen and representatives, in their demonstrations, picked and opened the locks or cylinders manufactured and installed by competitors and accompanied such demonstrations with assertions regarding the superiority and pick-proof quality of the Segal lock cylinder, according to the complaint.

The respondents allegedly represented that the Segal lock cylinder is absolutely "pick-proof" under all circumstances; that experts have tried and failed to pick it; that the inventor of the "lock-picking gun" failed in a public demonstration to pick it; that without the Segal device any lock can be picked or opened by skeleton keys or other lock-picking devices, and that the Segal lock cylinder is the first device which is an absolute guarantee of complete safety from the lock-picking menace and dangerous pick-gun.

On the contrary, the complaint alleges, all locks or lock cylinders can be opened or picked by some lock-picking device in the hands of an expert; the Segal lock cylinder is not safe from the "lock-pick" menace and the picking gun, and Bernard Zion, co-inventor of the pick-gun, did not, on the occasion of a public demonstration or contest, fail in an honest endeavor to open the Segal lock cylinder, but only pretended that he could not. Zion actually has opened or picked the Segal device, according to the complaint. (3896)

Tested Appliances Company—See Segal Lock & Hardware Company, Inc.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Consolidated Candy Company, Inc.—See Model Lingerie Company.

Excelsior Hat Works—See Morben Hat Works, Inc.

Kidder Oil Company, 818 South Third St., LaCrosse, Wis., was ordered to discontinue the dissemination of misleading representations in the sale of a lubricant designated as "Koatsal."

Findings of the Commission are that the graphite used in Koatsal is manufactured by a Michigan concern which sells to the respondent a product called concentrated "Oildag," composed of 10 per cent colloidal graphite and 90 per cent lubricating oil. The respondent, it was found, blends one part of concentrated "Oildag" with 50 parts of lubricating oil to make Koatsal. The Michigan concern formerly made a product called "Ready for Use Oildag" which was substantially the same as Koatsal, and was introduced several years before the respondent's product.

Further findings are that, contrary to the respondent's claims, no reduction of friction is accomplished by conditioning a motor with Koatsal, nor does this product have qualities and properties in excess of that of the oil contained in it.

Under the order, the respondent is to cease representing that Koatsal penetrates and adheres to all metal surfaces it reaches, permeates the pores of the metal, soaks into the metal, providing a plating on the metal for moving parts to ride on, or that the lubricating qualities of Koatsal are any greater than those of the oil which it contains. (3026)

Martin Custom Made Tires Corporation, 645 Eleventh Ave., New York, was ordered to discontinue misleading representations in the sale of certain of its automobile and truck tires. Under the order, the respondent is to cease representing, directly or by implication, that the construction of its tires or the materials or the number of plies contained in the tires are other than is actually the case. (3585)

W. E. & M. E. Medicine Company—William Everette, trading as W. E. & M. E. Medicine Company, 509 North 58th St., Philadelphia, was ordered to discontinue misleading representations in the sale of "W. E. & M. E. Herb Tonic."

Findings of the Commission are that the respondent's preparation is a simple laxative, sedative and tonic and as such may have incidental benefits for some of the ailments it is represented to relieve. Further findings are that the "Herb Tonic" contains drugs prescribed by physicians for some of the ills it is claimed to relieve, but that the dosage indicated by the respondent does not give users the amounts of these drugs, even as a laxative that are recommended by the medical profession in most cases.

Under the order, the respondent is prohibited from representing that use of his preparation purifies the blood, relieves all acute pains, stimulates the sexual organs or system, relieves backache or disorders of the liver or kidneys, or remedies disorders of the stomach, indigestion or cramps. Representations that the "Herb Tonic" is a cure for the menopause or a relief from suffering caused by it, or that the preparation contains no harmful ingredients, are also prohibited under the order. (3087)

Model Lingerie Company—A Chicago hosiery company and a Dallas, Texas, dealer in candy and nut confections were ordered to discontinue using lottery schemes in the sale and distribution of their merchandise to ultimate consumers.

Model Lingerie Company, and its officer, Gertrude Leith, 529 South Franklin St., Chicago, and Consolidated Candy Company, Inc., and its officer, Leslie Finucane, 826 Exposition Ave., Dallas, were ordered to cease selling any merchandise by the use of lottery devices such as push or pull cards or punchboards, or supplying dealers with lottery devices to be used in the sale of any merchandise. (3659-3657)

Morben Hat Works, Inc.—Prohibiting certain misleading representations in the sale of hats, cease and desist orders have been issued against two manufacturers in New York and New Jersey, who make hats from felts and other materials obtained from old and previously used hats.

The respondents are Morben Hat Works, Inc., and Morris S. Altman, officer and principal stockholder of the corporation, 162 Green St., New York, and Joseph A. Villone, trading as Excelsior Hat Works, 275 Fifteenth St., Jersey City. Under the orders they are directed to cease and desist from representing that hats made in whole or in part from old, used or second-hand materials are new or are composed of new materials.

The orders also prohibit the representation that hats composed in whole or in part of used or second-hand materials are new or are composed of new materials by failure to stamp on the sweatbands thereof, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweatbands, a statement that the products are composed of secondhand or used materials. The order provides that if sweatbands are not affixed to the hats then such stamping must appear on the bodies of the hats in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. (3838-2046)

Research Products Company—Robert C. Oberlin, trading as Research Products Company, 3170 Berkshire Road, Cleveland, has been served with an order prohibiting misleading representations in the sale of medicinal preparations.

The order prohibits advertisements that use of the respondent's preparations known as "Dupree Pills," "Dupree Double Strength Pills" and "Dr. Gordon's Special Formula Double Strength Pills" are competent, safe and scientific treatments for delayed menstruation and that their use will have no ill effects on the body.

Dissemination of advertisements which fail to reveal that the use of such preparations may result in serious and irreparable injury to the health of users, is also forbidden.

On petition of the Commission, the United States District Court in Cleveland on June 30 granted a preliminary injunction prohibiting advertisement of the respondent's treatments for delayed menstruation in substantially the same manner as alleged in the Commission's complaint, pending disposition of the case under the Federal Trade Commission Act.

Under the Commission's order, the respondent is also directed to cease representing that the use of "Van Dyke Dutch Brand Haarlem Oil Capsules" is a cure or remedy for, or has therapeutic value in the treatment of rheumatism, sleeplessness, nervousness or pains in the back, and that use of "Dr. Gordon's Vitam-Perles" or "Vitamin E Perles" is a competent or effective remedy or cure for, or has therapeutic value in the treatment of the conditions known as lack of ambition, loss of strength, loss of blood, or anemia, or rundown condition. (3863)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

Mme. Nell E. Anderson, 1415 Echo Park Ave., Los Angeles, stipulated that she will cease using the term "Bust Developing Cream" in designating her cosmetic preparation, and will cease representing, directly or by implication, that the use of her commodity, "Mme. Anderson's Bust Developing Cream," for massaging in conjunction with prescribed muscular exercise or in any other manner, will enlarge the bust. (02431)

Beverly Knitting Mills—Lester G. Griffith, trading as Beverly Knitting Mills, 1240 South Main St., Los Angeles, stipulated that he will cease using the word "silk" on labels, invoices, or any other printed or advertising matter to describe products which are not composed of silk. The stipulation provides that if the products are composed substantially of silk and in part of some other fabric material, and the word "silk" is used to refer to the silk content of such products, then the word "silk" shall be accompanied by some other word or words printed in equally conspicuous type so as to indicate clearly that they are not composed wholly of silk. If the fabric other than silk constitutes the major content of such products, the name of the predominant material shall precede the word "silk," as, for example, "Cotton and Silk." The respondent also agreed to discontinue use of the words "Knitting Mills" as part of his trade name and from use of the words "Manufacturers" or "Knitting Mills" so as to imply that the respondent makes his products or that he absolutely controls the factory in which such products are made. (2541)

Direct Company—H. F. Goring, trading as The Direct Company, and Directo, 221 Broad St., Savannah, agreed to discontinue use of the trade names "The Direct Company" and "Directo," and to cease using the words "Direct from mill" so as to represent that hosiery which he sells is shipped directly to customers from a factory, or that he controls the factory in which his merchandise is made. The respondent will also cease using phrases such as "Wholesale to you" and "Wholesale direct to you," so as to represent that his product is offered to the purchasing public at a wholesale price. (02433)

Faultless Appliance Sales Company—Lewis D. Coburn, trading as Faultless Appliance Sales Company, Whitman, Mass., agreed to discontinue representing or implying that use of the rupture support or truss which he sells will permanently cure difficulties associated with rupture or that his device will afford adequate support for all varieties and grades of hernia. The respondent further stipulated that he will cease representing that his device has neither a steel bar nor band or a pad, when it is actually equipped with such elements. (2539)

Juvenex, Inc., and its president, Charles H. Whitsey, Bond Building, Washington, D. C., engaged in the sale and distribution of "Juvenex," a laxative tablet, agreed to cease using on labels or any other printed material, any price which is in excess of that at which such products are sold or intended to be sold in the usual course of trade. The respondents will also cease using in advertisements the word "manufacturer," or similar designations implying that they make their products or own or control the factory in which such products are made. (2540)

Charles B. Knox Gelatine Co., Inc., Johnstown, N. Y., in connection with the sale of its "Knox Gelatine," agreed to discontinue advertising that the United States Government has created a standard of purity for gelatine. In its stipulation, the respondent company admitted that the Government has not created a standard of purity for gelatine. (02436)

Merit Food Company, Inc., Hackensack, N. J., entered into a stipulation to discontinue misleading representations in the sale of Cuban honey.

The respondent agreed to cease advertising that Cuban honey is a tonic or that it has, or is credited by the medical profession or leading physicians with having curative qualities in the treatment of stomach ailments, inflammation of the intestines, asthma, bronchitis, sinus infections, or irritations of the throat and bronchial tract, or that it will do more than to afford temporary relief from irritations, such as result from a cough or cold, or that it has value other than that of a bland food in the treatment of digestive disorders. (2542)

National Library Press—M. Fryefield, trading as The National Library Press, 110 West 42nd St., New York, agreed to cease advertising that the book, "How to Draw From the Nude," teaches art as it is taught in studios; enables a pupil to study as in classes with personal instruction, and is the most comprehensive book on art intruction published. The respondent further stipulated that he would not represent that the book, "Making Art Pay," was being given free or without charge to purchasers of "How to Draw From the Nude." (02430)

Neuhaus Pharmacal Company—F. G. Neuhaus, trading as Neuhaus Pharmacal Co., 824 South Kingsley Drive, Los Angeles, agreed to cease representing that his preparation, "Dr. Custodis' Oil of Garlic Capsules," or any similar preparation, will bring about a reduction in high blood pressure except when reference is made to a temporary reduction, not to exceed several hours, of hypertension due to muscular constriction of blood vessels; that the product will be of value in the relief or treatment of headaches, thoracic oppression, dizziness of anorexia in any case other than where a temporary reduction of high blood pressure due to muscular constriction might be of value in giving temporary relief from such symptoms; that it will correct gastro-intestinal disorders, or will remove the cause of any ailment. The respondent will also cease representing by use of the word "Pharmacal" in his trade name or otherwise, that he prepares his product, or maintains pharmacal facilities or a laboratory for testing the efficacy of his product. (02432)

J. Pressman & Co., Inc., 882 Third Ave., Brooklyn, N. Y., agreed to discontinue employing the slogan "Made in U. S. A.," or any similar phraseology, on containers of toy assortments so as to imply that every item of the assortments is an American-made product, when such is not a fact. The stipulation provides that if an assortment comprises in part an item or items actually made in the United States and an item or items made elsewhere, the slogan "Made in U. S. A.," if used to designate the American-made items shall be accompanied by other words in equally conspicuous type so as to indicate clearly that the assortment does not consist wholly of American-made items. (2538)

Proctor & Gamble Company, Cincinnati, Ohio, in the sale of "P and G The White Naphtha Soap," agreed to discontinue advertising that this product contains a unique ingredient which makes it the only soap which will remove stubborn "deep down" dirt from clothes; that it is kind to all sorts of fabrics and colors, or that it never fades colors, unless this last assertion is directly limited in context to reference to colors which are washable. The respondent company also stipulated that it will desist from advertising that the use of "P and G The White Naphtha Soap" enables one to cut washing time, or that it loosens dirt faster or washes clothes whiter. The respondent also agreed to discontinue employing any other statement purporting to express a comparison, unless the basis of the comparison is stated in direct connection therewith.

John Puhl Products Company, 3640 Pershing Road, Chicago, agreed to cease advertising that its chemical solution, "Fleecy White," is a competent remedy in the treatment of poison ivy, poison oak, sumac, insect bites, or minor burns, unless the representation is limited to cases in which secondary infection has supervened. Other representations to be discontinued are that "Fleecy White" is competent for treating athlete's foot or barber's itch, will destroy the fungus that causes athlete's foot, and is a competent remedy for all types of sores or for cuts or scratches, unless this last named representation is limited to such benefits as may result from use of the respondent's preparation as a germicide or antiseptic dressing. (02435)

FTC CLOSES CASE

The Federal Trade Commission closed its came against Try-Mo Radio Company, Inc., 85 Cortlandt St., New York, in which the respondent was charged with misleading advertising of radio receiving sets and radio equipment.

The respondent, on July 24, 1939, agreed to discontinue the unfair practices charged in the Commission's complaint and agreed to accept and abide by the rules of fair trade practice for the radio receiving set industry promulgated by the Commission July 22, 1939. The case was ordered closed without prejudice to the right of the Commission to reopen it and resume prosecution, should future facts so warrant. (2483)

The Commission has also closed its case against the now-dissolved Universal Detective System, Inc., 188 West Randolph St., Chicago, in which the respondent was charged with the dissemination of misleading representations in the sale of correspondence courses in detective work. Because of such dissolution, the case was ordered closed by the Commission without prejudice to its right to reopen it should future facts so warrant. (3829)

NAB Reports
NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 40, October 6, 1939

Code Compliance Under Way

Finding that discussions of American neutrality constituted discussions of a "public controversial issue," and therefore were barred from paid commercial time under the new NAB Code which became effective October 1, the Code Compliance Committee convened in Washington Monday and Tuesday of this week in its first historic session.

In its public statement, the Committee called attention to the religious section of the Code which declares that radio may not be used to convey attacks upon another's race or religion, and defined a "public proposal subject to ballot" as being one "where the proposal itself appears on the ballot to be cast by the individual citizen." Matters pending before a legislative body are not regarded as "public proposals subject to ballot," the Committee ruled.

The full text of the Committee's statement appears below.

Many member stations who have been accepting discussions in the public controversial field on a commercial basis have already declared that they are prepared to alter station policy, consistent with the terms of their contractual relations, as speedily as possible, so as to comply with the industry-wide code.

In its statement, the Committee recognized the difficulty sometimes of determining whether or not a matter falls within the public controversial section of the Code. "The Committee feels, therefore, that its duty and function is that of rendering advisory opinions, and of recommending procedures through which a sincere and uniform understanding of, and compliance with the Code, may be achieved.

"Toward such ends, the Committee holds as self-evident that no determination as to the character or classification of a proposed program or radio address can be

Distinguished Groups Praise Code
William Allen White Endorses

In praising the Code, William Allen White, editor of the Emporia, Kansas Gazette, said yesterday: "I can't see how any honest, tolerant American citizen who wishes both sides presented, can fail to support that Code. It is not perfect, of course, being human, but it is a long step forward."

National Council of Catholic Men
(by Edward J. Heffron, Executive Secretary)

The Code as it stands, without going into the vagaries of possible future interpretation, is in substance a splendid platform of democratic broadcasting. The fine conception of charity shown in ruling out "attacks upon another's race or religion," the fine conception of justice, indeed of social justice, shown in your effort to preclude the possibility of the interests with greater means monopolizing the time available for discussion of public controversial issues at the expense of interests just as important but poorer in this world's goods, deserve the highest commendation.

I congratulate you and your Association upon the adoption of the Code, and I pray God to give you the strength to see it to thorough and judicious execution.

CODE COMPLIANCE UNDER WAY

(Continued from page 3753)

established until an advance script has been examined by the station management.

"The Committee recommends, therefore, that

(a) Since discussions of controversial public issues have been eliminated from paid commercial broadcasts, adequate time for the presentation of controversial public issues shall continue to be provided free of charge by each station or network, in accordance with the public interest therein.

(b) All such scripts shall be required in advance, for examination in light of the Code.

(c) Under no circumstances will compensation be accepted by the station or network for time consumed by the spokesman of a controversial public issue, unless,

(d) The spokesmen appear on a public forum type of broadcast regularly presented, in conformity with the Code, as 'a series of fairsided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network."

"Without an advance script, no one can determine the complexion of any proposed broadcast."

Meanwhile, Headquarters released yesterday a series of public statements from outstanding national groups praising the action of the industry in inaugurating a program of self-regulation through the Code. The National Council of Catholic Men, through its Executive Secretary Edward J. Heffron, commended the Code as a "splendid platform of democratic broadcasting," and cited the provisions barring the sale of time for controversial matters as a "fine conception of justice, indeed of social justice." These statements appear elsewhere in the bulletin.

Those in attendance were: Edgar Bill, WMBD, Peoria, Illinois; Martin Campbell, WFAA, Dallas, Texas; Edward Cargill, WMAZ, Macon, Georgia; Earl J. Glade, KSL, Salt Lake City, Utah; Don Searle, KOIL, Omaha, Nebraska; Calvin J. Smith, KFAC, Los Angeles, California; Theodore C. Streibert, Mutual Broadcasting System; Harry Butcher, Columbia Broadcasting System; Frank M. Russell, National Broadcasting Company; William B. Dolph, WOL, Washington, D. C.; Neville Miller, President, NAB; E. M. Kirby, NAB Secretary of the Code Compliance Committee.

DISTINGUISHED GROUPS PRAISE CODE

(Continued from page 3753)

American Civil Liberties Union
(by Roger Baldwin, Director)

The American Civil Liberties Union and its affiliate, the National Council on Freedom from Censorship, has followed and approved the sincere, persistent endeavors of the National Association of Broadcasters to make radio broadcasting a more socially minded service. The Code adopted by the NAB in July is a great step forward in formulating a policy in the public interest. We especially commend the resolve not to sell time for the discussion of controversial issues and to give time for such programs more generously and to open all such discussions to at least two opposing points of view. The assertion this week of this purpose and the redefinition of its concrete approach is further evidence of the intent of the NAB to strengthen the spirit and method of these policies. We congratulate the NAB and its membership on this forward-looking program.

Federal Council of the Churches of Christ in America
(by John W. Langdale, General Chairman)

It is reassuring to observe that high degrees of public responsibility are recognized and accepted in the NAB Code. Good taste, religious freedom, the educational privilege of hearing both sides of questions, the presentation of news without propaganda; surely such standards must commend themselves to well wishers for humanity.

National Council of Women
(by Mrs. Ruth Haller Ottaway, President)

The Code adopted by the radio industry is splendid and is a long step forward toward the preservation of free speech.

You have in my opinion, taken the only step compatible with our democratic form of government in granting all equal opportunity to discuss controversial issues without restricting the privilege to those who can afford to pay for time.

Your careful earmarking of subjects, too, is praiseworthy. I am delighted that you have designated so clearly that religious broadcasts shall be religious in character and not political.

General Federation of Women's Clubs
(by Mrs. Harold V. Milligan, Chairman, Committee on Radio)

It is my definite conviction that the provision of the recently adopted NAB code which prohibits the sale of time for controversial subjects is one of the best safeguards of our democracy yet evolved by the radio industry. As I interpret its effect upon broadcasting, it insures an impartial and unbiased presentation of controversial issues since all individuals and groups have the same opportunity regardless of their financial status, to express their opinions.

The Constitution of the United States grants all of its citizens equal opportunity and in my opinion the NAB code is conforming to true democratic principles in throwing radio facilities open to all and not permitting a favored group to buy time to state its views. There is no discrimination involved in my estimation in according all who wish to discuss controversial subjects an equal opportunity to do so.

Boys' Clubs of America
(by Mr. Sanford Bates, Executive Director)

I have read the new Code for the broadcasting industry as adopted by the National Association of Broadcasters, and wish to commend you for it.

Association of National Advertisers
(by Paul B. West, President)

By putting into effect the self disciplining Code adopted last summer your association has completed significant and far reaching step. Through it the broadcasters have acknowledged and fairly defined their social responsibilities and in broadest sense planned a wise course of action to meet those responsibilities. For this the NAB should receive the gratitude not only of the public for recognizing their interests but of many older industries for showing the way. My heartiest personal congratulations to you on this splendid accomplishment.

American Association of Advertising Agencies
(by John Benson, President)

The manner in which the American radio industry has approached its vast social responsibilities is a fine evidence of good stewardship. I congratulate you.

National Education Association
(by Miss Rita Hochheimer, Chairman, Audio-Visual Committee)

Congratulations to American children on the action of National Association of Broadcasters regarding the new Code.

By W. Russell Bowie, Director of Grace Church, New York City

I have heard with much interest of the action of the National Association of Broadcasters in adopting a new Code preventing the sale of time for controversial subjects and granting free time when both sides of a question are presented. May I register my cordial approval of this decision and my hope that it will be maintained. The mere possession of money, sometimes secured through devious means, certainly ought not to give to dangerous influences in America the right to flood the public mind with propaganda which may be uncontradicted by other and truer ideas not backed by money. If the broadcasting companies, by their new Code, assure fair presentation of the different sides in controversial issues, they will accomplish a great service to our democracy.

By Henry S. Coffin, President Union Theological Seminary, New York

I have looked over the new Code adopted by the National Association of Broadcasters and it seems to me eminently fair. We do not wish to take controversial questions off the air. There is every reason why in a democracy there should be the freest opportunity for public discussion, but it is reasonable that where such discussion is held both sides should be presented and that the Code guarantees. Any attempt to attack the Code in the interests of obtaining freedom for one-sided propaganda seems to me hostile to true democracy.

By Lyman Bryson, Director, The People's Platform

I am very glad to know that the National Council on Freedom from Censorship has approved the new Code of the National Association of Broadcasters. Those of us who have had experience in the use of the radio for free talks know that the provisions of the Code against the sale of time for controversial talks are the best solution of a difficult problem. Indeed I would go further and say that no other solution of the problem of free speech can be acceptable to those who believe in liberty.

By George V. Denny, Jr., Director America's Town Meeting of the Air

I heartily concur with the new Code which is to be adopted by the National Association of Broadcasters. For nearly half a century Town Hall has pioneered in presenting all sides of controversial issues and for the past four years we have advocated this in principle and in practice, through America's Town Meeting of the Air and in all of our Town Hall programs. It is not a new idea, but has been the American way since the days of the early town meetings. Before us in all of our meetings this year will hang a banner on which these words are inscribed: Tolerance, Reason, Justice.

Statement of the Code Compliance Committee

At the conclusion of the first meeting of the Code Compliance Committee October 3, of the National Association of Broadcasters, Edgar Bill, Chairman, of Radio Station WMBD, Peoria, Illinois, this afternoon released the following statement from the Committee:

INDEX

	Page
Code Compliance Under Way	3753
Distinguished Groups Praise Code	3753
Statement of the Code Compliance Committee	3755
Decision on Intervening	3756
Newspapers Gained Because of Radio Says "Newsdom"	3757
Unlicensed Amateurs Convicted	3758

"While the Committee realizes that the American people through the delegation of the radio franchise, have placed upon the broadcaster final responsibility to accept or to reject program matter in 'the public interest, convenience and necessity,' it nevertheless recognizes that NAB member stations in the 17th Annual Convention, July last, shared their program and operating experiences in the adoption of a new Code so that a more uniform and higher level of public service might result throughout the length and breadth of American radio.

"The Committee has taken these into consideration in its deliberations, which have chiefly centered around problems involving the Religious and Public Controversial sections of the new Code.

"In approaching the Public Controversial section of the Code, which bars the sale of time for such discussions, but which provides that such discussions be placed on the air without cost, the Committee emphasizes the underlying principles involved.

"There is a limitation to the number of radio channels now available for broadcasting in this country.

"There is also a limit as to the number of hours available per day for broadcasting. Newspapers may add any number of extra pages to accommodate their overflow news and advertising columns. No comparable opportunity exists in the daily schedule of a radio station, which must adhere to the hands of the clock.

"In the absence of any self-imposed policy to the contrary, it is conceivable that some individuals or groups with financial means to do so could buy all the available time necessary to monopolize, dominate or control the discussion of public issues through the radio medium, precluding a fair opportunity for an opposition without financial resources to present its case to the radio audience.

"Such a situation would pervert the function of American radio as a forum of democracy, and would irreparably shatter the confidence of the public in the American system of broadcasting.

"In order to assure the American people for all time that such an intolerable misuse of radio facilities cannot happen, the Code states that 'Time for the presentation of controversial issues shall not be sold.'

"The Code does not bar anyone or any group from using radio. It simply denies the right to buy time, for the reasons stated.[1]

"Representative spokesmen of groups in the field of public controversial issues have a perfect right to request time on the air, from a network or station, in accord with the public interest therein as outlined in the Code. 'Broadcasters shall use their best efforts to allot such time free of charge, with fairness to all elements in a given controversy.'

"The handling of public controversial issues by radio stations is a matter of principle and not one of personalities."

Determination of a Public Controversial Issue

"The Code Compliance Committee realizes that whether a matter is a public controversial subject or not is one sometimes difficult to determine, particularly in national and statewide affairs.

"The Committee feels, therefore, that its duty and function is that of rendering advisory opinions, and of recommending procedures through which a sincere and uniform understanding of, and compliance with the Code, may be achieved.

"Toward such ends, the Committee holds as self-evident that no determination as to the character or classification of a proposed program or radio address can be established until an advance script has been examined by the station management.

"The Committee recommends, therefore, that

(a) Since discussions of controversial public issues have been eliminated from paid commercial broadcasts, adequate time for the presentation of controversial public issues shall continue to be provided free of charge by each station or network, in accordance with the public interest therein.

---

[1] Political broadcasts, as defined, are excepted because "at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away."

(b) All such scripts shall be required in advance, for examination in light of the Code.

(c) Under no circumstances will compensation be accepted by the station or network for time consumed by the spokesman of a controversial public issue, unless,

(d) The spokesmen appear on a public forum type of broadcast regularly presented, in conformity with the Code, as 'a series of fairsided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network.'

"Without an advance script, no one can determine the complexion of any proposed broadcast.

"This does not mean, of course, that those who wish to discuss matters of public controversy are barred from the air.

"Far from it!

"Through the new Code, representative spokesmen of groups will be given free time to present their viewpoints, in accord with the public interest, program balance and availability of time.

"The Committee recognizes that all such representative spokesmen of public opinion groupings, may broadcast their opinions during time provided free for this purpose, or may take a political position on paid radio time during a political campaign, or may espouse or oppose a 'public proposal subject to ballot.' The Code adequately covers these provisions."

Neutrality—Method of Maintaining of Which is a "Public Controversial Issue" Within the Meaning of the Code

* * * *

"The question of America's neutrality has raised an interesting point in which the Committee and the individual broadcaster are concerned in the application of the Code.

"Following careful survey of the members of the Committee drawn from different sections of the country, and of the issue itself as resolved yesterday in Congress, the Committee feels that while all Americans desire to stay out of war and to preserve neutrality, the methods of achieving and maintaining same are matters automatically falling within the sphere of 'public controversial issues,' and as such should be presented on free time and not sold."

Definition of a Public Proposal Subject to Ballot

"In response to inquiries from member stations, the Committee defines a 'public proposal subject to ballot' as one where the proposal itself appears on the ballot to be cast by the individual citizen.

"Matters pending before a legislative body are not regarded as 'public proposals subject to ballot.'"

The NAB Religious Code

"The Committee calls attention to the religious section of the Code which reads:

'Radio, which reaches men of all creeds and races simultaneously, may not be used to convey attacks upon another's race or religion. Rather it should be the purpose of the religious broadcast to promote the spiritual harmony and understanding of mankind and to administer broadly to the varied religious needs of the community.'

Decision on Intervening

Federal Communications Commissioner George Henry Payne handed down a decision of more than ordinary interest this week dealing with the question of petitions to intervene in cases before the Commission. The decision is considered a strict interpretation of one of the new Commission rules.

The decision was made public in connection with the application of Hazelwood, Inc., for a construction permit for a new station at Orlando, Florida, to operate on 1390 kilocycles, 1000 watts, unlimited time. The decision denies a petition of the Orlando Broadcasting Company of Orlando for leave to intervene in a case involving an application for a new station at Orlando.

Because of its importance the decision is given in full as follows:

DECISION ON PETITION TO INTERVENE AND REQUEST FOR ENLARGEMENT OF THE ISSUES

Payne, Commissioner (Presiding at Motions Docket)

This petition was filed by the Orlando Broadcasting Company, Inc., licensee of Radio Station WDBO, Orlando, Florida, and requests leave to intervene in the hearing designated by the Commission on the above-entitled application and further requests that the issues heretofore designated by the Commission to be heard at said hearing be enlarged to include the following: (a) to determine the extent of the broadcast service already rendered in the Orlando area; (b) to determine if the interests of Station WDBO will be adversely affected by a grant of the above-entitled application; and (c) to determine whether the operations of the station proposed by the applicant will be in accord with the Commission's plan of allocation and standards of good engineering practice.

Petitioner requests that it be made a party in the proceedings on the application of Hazelwood, Inc., and that it be allowed to present evidence on the issues listed in the Notice of Hearing heretofore published by the Commission as well as upon the additional issues requested to be added and any further issues which may be added hereafter.

When the application of Hazelwood, Inc., was received by the Commission it was examined as required by Section 309(a) of the Act, and because the Commission was unable upon such examination to reach the decision that the public interest, convenience and necessity would be served by a grant of the application it was designated for hearing in order to afford the applicant an opportunity to be heard on the question of whether or not the application should be granted. The only issue specified by the Commission in the Notice of Hearing was that relating to the possibility of adverse effect upon the service rendered by Stations KLRA, WHK and WMFJ by reason of electrical interference which might result from the operation of the proposed new station.

The instant petition to intervene and to enlarge the issues to include questions other than those specified in the Notice of Hearing requires an interpretation of the Commission's rule 1.102 which became effective on August 1, 1939. Because the questions raised by the instant petition are also involved in a number of other petitions now pending on the motions docket, I feel that it is appropriate to express in some detail my views concerning the sufficiency of the instant petition in the light of the Commission's present rule governing intervention and enlargement of issues.

The Commission's rule relating to intervention and enlargement of issues, reads as follows:

> "Sec. 1.102 Intervention. Petitions for intervention must set forth the grounds of the proposed intervention, the position and interest of the petitioner in the proceeding, the facts on which the petitioner bases his claim that his intervention will be in the public interest and must be subscribed or verified in accordance with Sec. 1.122. The granting of a petition to intervene shall have the effect of permitting intervention before the Commission but shall not be considered as any recognition of any legal or equitable right or interest in the proceeding. The granting of such petition shall not have the effect of changing or enlarging the issues which shall be those specified in the Commission's notice of hearing unless on motion the Commission shall amend the same."

In applying this rule to the instant petition I will deal with the request to intervene, and the request to enlarge issues separately.

Petitioner's Request to Intervene

The underlying purpose of the Commission in adopting its present rule on intervention was to correct a practice which had become prevalent under the prior rule of the Commission relating to intervention. Under its former rule, the Commission permitted any person to intervene in a hearing if his petition disclosed "a substantial interest in the subject matter." This standard was so broad and the Commission's practice under it was so loose that intervention in Commission hearings came to be almost a matter lying in the exclusive discretion of persons seeking to become parties to Commission proceedings. The experience of the Commission during the past few years clearly demonstrated that the participation of parties other than the applicant in broadcast proceedings in a great many cases resulted in unnecessarily long delays and expense to both the Commission and applicants without any compensating public benefit. In many cases the major function served by intervenors was to impede the progress of the hearing, increase the size of the record, confuse the issues and pile up costs to the applicant and to the Commission through the introduction of cumulative evidence, unnecessary cross-examination, dilatory motions, requests for oral argument and other devices designed to prevent expeditious disposal of Commission business.

The underlying purpose of the present rule is to limit participation in proceedings, particularly on broadcast applications, to those persons whose participation will be of assistance to the Commission in carrying out its statutory functions. The present rule requires a petitioner to set forth not only his interest in the proceeding but also "the facts on which the petitioner bases his claim that his intervention will be in the public interest." The fact that a proposed intervener may have the right to contest in a court the validity of an order granting or denying a particular application does not in and of itself mean that such person is entitled as a matter of right to be made a party to the proceedings before the Commission on such application. Intervention in proceedings before administrative agencies like the Federal Communications Commission is ordinarily covered by statutory provision. The Communications Act contains no provisions giving the right of intervention in proceedings before the Commission to any person or class of persons, but expressly provides that the Commission may conduct its proceedings in such manner as will best conduce to the proper dispatch of business and to the ends of justice. By the adoption of Rule 1.102 the Commission in effect has declared that it will conduce to the proper dispatch of business and to the ends of justice if it permits intervention in a proceeding before it only if the making of a record in which the facts are fully and completely developed, is facilitated by permitting the requested intervention. It is this theory—that where the public will benefit through aid or assistance given to the Commission or the applicant by a party-intervenor in a broadcast hearing, such participation should be permitted—which underlies Rule 1.102.

The petition of the Orlando Broadcasting Company, Inc., utterly fails to meet the requirement of the present rule on intervention. In so far as it requests permission to participate in the hearing already designated on the application of Hazelwood, Inc., it simply prays that the petitioner be made a party and be allowed to present "evidence." Not the slightest intimation is given as to the type of evidence which the petitioner desires to adduce or what petitioner intends to prove by the introduction of such evidence. The only issue mentioned in the Commission's Notice of Hearing is the issue of electrical interference to Stations KLRA, WHK and WMFJ, which are now operating either on 1390 kc (the frequency requested by Hazelwood, Inc.) or on adjacent frequency. The petitioner operates its station on 580 kc, so there could be no electrical interference to petitioner's station, and while it would not be impossible for the petitioner to obtain data on the issue specified in the Commission's Notice of Hearing, it is not likely that the petitioner is as well informed or is as well-equipped to adduce testimony concerning the issue of electrical interference as is the Commission itself. Without a proper showing of the type of evidence proposed to be adduced and the facts expected to be proved thereby, the Commission would not be justified in permitting the petitioner to intervene in the proceedings on the application of the Hazelwood, Incorporated.

On the basis of the allegations now set forth in the instant petition the request for intervention must be denied in so far as it requests permission to participate in the hearing on the issue already designated. In so far as the petition requests permission to adduce evidence pertaining to the issues which it requests the Commission to add to the Notice of Hearing, it is necessarily contingent upon the action which is taken on the request to enlarge issues. For reasons stated below, this request must also be denied. Hence, the request to intervene in order to adduce evidence relating to these issues must be denied not only for the reasons above stated but also because the request to enlarge issues is denied.

Petitioner's Request to Enlarge Issues

The determination of what issues an applicant for broadcast facilities should be required to meet in a hearing on his application is a matter committed by Congress to the discretion of the Commission. No hearing whatever is required if the Commission is able upon an examination of an application to determine that the public interest, convenience and necessity will be served by granting the application. If the Commission is not able to reach such a determination upon the examination of an application the statute requires that notice and an opportunity to be heard shall be given the applicant, but not otherwise.

Good administration, both from the theoretical and practical standpoint, requires that unduly long and expensive hearings should be avoided. Therefore, the Commission should not burden itself or the applicant by the injection in a hearing of issues concerning which the Commission has already satisfied itself. Furthermore, if in a particular case it appears that a hearing on a particular issue would be expensive and time-consuming, while a hearing on another issue, which might finally dispose of the application, would be relatively inexpensive and expeditious, the Commission as a matter of administrative convenience should set down the application for hearing only on the latter issue.

In the instant case the Commission was unable to find that the public interest, convenience and necessity would be served by granting the application of Hazelwood, Inc., because of the possibility of interference with the service now rendered by three other stations. If at the hearing on its application the applicant is unable to sustain the burden with respect to this issue, the Commission will enter an order denying the application, which will completely dispose of the proceedings. In such event, it would have been wholly unnecessary and wasteful of both time and money for the Commission to have ordered a hearing not only upon the issue of electrical interference but also upon other issues which might also have constituted a basis for denying the application.

It is incumbent upon any person requesting the injection of new issues in a hearing to show not only that the issues which he proposes to have the Commission add are proper matters for the Commission to consider, and that there is a basis for believing that the Commission will be required to deny the application on the new grounds alleged, but also that the proposed new issues should be heard at the hearing already set rather than at a later time. Certainly, if the issues specified by the Commission in a Notice of Hearing are in themselves a sufficient basis for denying an application if the applicant fails to sustain its burden of proof, no third person is harmed because the Commission does not also include in the hearing other and different issues, even though conceivably it may be necessary at some later time for the Commission to designate the application for further hearing if the applicant meets its burden on the issues already specified. The instant petition to enlarge issues merely states that the three issues requested for inclusion in the hearing are proper issues for the Commission to consider before acting upon the application of Hazelwood, Inc. Assuming for the purpose of this opinion but not conceding, that the three issues proposed to be included in the hearing are proper for the Commission to consider, petitioner has utterly failed to show that the insertion of these additional three issues in the hearing at this time on the application of Hazelwood, Incorporated, would expedite the disposition of this application and not merely result in a more costly, drawn out and complicated record, with no attendant advantages to the Commission or to the public.

NEWSPAPERS GAINED BECAUSE OF RADIO SAYS "NEWSDOM"

(From *Newsdom,* September 16)

"There are still diehards in the publishing business who look upon radio as a Frankenstein built by the press but ready to devour it at the first opportunity. These diehards are sincere and their opinion is to be respected. But it must be remembered that their conclusions are based on opinion, not facts. The facts show conclusively that the newspapers have not suffered, but have gained as a result of the introduction of radio. If the newspaper industry does fall upon evil days it will not be because of the bugaboo of radio but because the publishers and editors themselves have adopted a defeatist attitude and have resigned themselves to a self-imposed fate instead of devoting their talents to improving their own business.

"We can remember a few years ago when the feeling between radio and the press was bitter indeed. We did our bit to offset this and suggested that both groups bury the hatchet for it was evident that neither would gain anything in the scuffle. Happily such is the situation today. The hatchet is buried. So much so that the newspaper industry is now foremost in the defense of freedom of the air for radio. This is not all altruism on the part of the newspapers. The press realizes that once the censor gags the radio it would be only a matter of time before the press would be taken into the bureaucratic camp.

"Moreover, both press and radio overlap to the point where they are associates, not antagonists. Many newspapers may operate their own radio stations. Men and women who write for the daily press may make up a considerable portion of those who appear before the microphone. But this does not mean that the functions of the two media are the same. They are not. The function of the newspaper is first to publish the news. Entertainment is secondary. The reverse holds true of the radio where entertainment is the prime consideration and the dissemination of news of secondary importance.

"If either the press or radio departed from these main objectives both would find themselves in a pretty pickle. For the public has formed the habit of getting its news and its interpretation of the news from the newspapers. Likewise it has formed the habit of being entertained by the radio and relying on spot radio news as a supplement to the latest newspaper at hand.

"It would be futile for either the radio or the press to reverse these fundamental functions or to attempt to monopolize both. The public's habits are not necessarily fixed but it would entail the expenditure of a king's ransom to break them and the attempt would probably break those who attempted it."

UNLICENSED AMATEURS CONVICTED

The FCC announced this week that Lester B. Bentley, Max Pross and Louis D. Welsh, all of Kokomo, Indiana, have been convicted in the Federal District Court, at Indianapolis, Indiana, on charges of operating an unlicensed radio station in the amateur bands in violation of Section 318 of the Federal Communications Act. All three men were also convicted of operating the station without operator's licenses in violation of Section 301 of the Act.

Indictments were secured against each of the three defendants. They were arrested and upon arraignment in the District Court, they all entered pleas of guilty. The Court fined each defendant the sum of ten dollars.

The case was prosecuted by Val Nolan, United States Attorney for the Southern District of Indiana, on evidence supplied by Inspector H. T. Gallaher, of the field staff of the Federal Communications Commission.

The FCC also announced that Egen Stickles and Howard W. Crandall, both of Bradford, Pennsylvania, were convicted in the Federal District Court, of Erie, Pa., on charges of operating an unlicensed amateur radio station in violation of Section 318 of the Federal Communications Act. Egen Stickles was also convicted of operating the station without an operator's license in violation of Section 301 of the Act.

Both men plead guilty and were placed on probation for two years. They were also required to pay the costs of the trial. The case was prosecuted by the U. S. District Attorney in Erie on evidence supplied by Inspector Walter Davis, of the field staff of the Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

STATEMENT OF FACT

The Federal Communications Commission has announced its Proposed Finding of Fact proposing to grant the application of WSUI, **Iowa City, Iowa,** to increase its power from 1000 watts day and 500 watts night, to 1000 watts night and 5000 watts day, unlimited time on **880 kilocycles,** and to move its transmitter to a new site locally, to install new equipment, and employ a directive antenna day and night.

It its Proposed Statements of Fact, the Commission said that the operation of this station as proposed "will not involve a substantial increase in interference to any existing station as now operating or as proposed in any pending application."

The application of the Nebraska Broadcasting Corporation for the construction of a new station at **Fremont, Nebraska,** to use **1370 kilocycles,** 250 watts day, 100 watts night, unlimited hours of operation, is proposed to be granted by the Commission in a Proposed Finding of Fact.

The granting of this application, the Commission stated, will give Fremont a local station furnishing primary broadcast service to the city and its granting would be in the public interest.

DECISION OF COMMISSION

The Federal Communications Commission this week adopted the final order granting the application of the

Civic Broadcasting Corporation to construct a new station at **Syracuse, New York,** to operate on **1500 kilocycles,** 100 watts, unlimited time.

In its decision, the Commission stated that the service of no other station will be adversely affected by reason of interference caused by the operation of the proposed station. It is further stated by the Commission that the operation of the proposed station will not economically affect the operation of any station to the point where it would be unable to serve the public interest.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, October 9. They are subject to change.

Tuesday, October 10

WHDH—Matheson Radio Co., Inc., Boston, Mass.—C. P., **830 kc.,** 5 KW, 5 KW LS, unlimited time (DA night). Present assignment: **830 kc.,** 1 KW, daytime.

Wednesday, October 11

WNBX—Twin State Broadcasting Corp., Springfield, Vt. (proposed studio and transmitter location, Keene, N. H.).—C. P., **1260 kc.,** 1 KW, unlimited time (DA day and night). Present assignment: **1260 kc.,** 1 KW, unlimited time (DA night).

Further Hearing

NEW—Presque Isle Broadcasting Co., Erie, Pa.—C. P., **1500 kc.,** 100 watts, 250 watts LS, unlimited time.

Thursday, October 12

Oral Argument Before the Commission

Report No. B-28:

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—C. P., **1240 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

Examiner's Report No. I-660:

NEW—Seaboard Broadcasting Corp., Savannah, Ga.—C. P., **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Colonial Broadcasters, Inc., Savannah, Ga.—C. P., **1310 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

November 2

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—C. P., **620 kc.,** 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

NEW—Samuel M. Emison, Vincennes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

November 7

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 100 watts, daytime.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.,** 250 watts, daytime.

November 8

NEW—The Gazette Co., Cedar Rapids, Iowa.—C. P., **1420 kc.,** 100 watts, unlimited time.

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., **1410 kc.,** 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license (main and auxiliary), **1410 kc.,** 1 KW, 1 KW LS (main), *500 watts, 1 KW LS (auxiliary), unlimited time. *Auxiliary purposes only.

November 20

NEW—Sanfeliz Enrique Abarca, San Juan, P. R.—C. P., **580 kc.,** 1 KW, 5 KW LS, unlimited time.

NEW—United Theatres, Inc., San Juan, P. R.—C. P., **580 kc.,** 1 KW, 1 KW LS, unlimited time (DA day and night).

December 11

NEW—Hazlewood, Inc., Orlando, Fla.—C. P., **1390 kc.,** 1 KW, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—Cordele Dispatch Publishing Co., Inc., Cordele, Ga.—Granted C. P. for new broadcast station to operate on **1500 kc.,** 100 watts night, 250 watts day, unlimited time.

NEW—Fort Meyers Broadcasting Co., Fort Meyers, Fla.—Granted C. P. for new broadcast station to operate on **1210 kc.,** 100 watts night, 250 watts day, unlimited time.

KBTM—Jay P. Beard, d/b as Regional Broadcasting Co., Jonesboro, Ark.—Granted C. P. to install new equipment and increase power and time of operation from 100 watts, daytime only, to 100 watts night, 50 watts day, unlimited time.

W3XO—Jansky & Bailey, Washington, D. C.—Granted modification of C. P. for equipment changes in high frequency broadcast station, and extension of completion date to 120 days after grant.

W2XQR—John V. L. Hogan, New York City.—Granted modification of C. P. specifying exact transmitter site at 3104 Northern Blvd., Long Island City, N. Y., and change frequency of high frequency broadcast station from **41200 kc.** to **43200 kc.**

WGNY—Peter Goelet, Newburg, N. Y.—Granted voluntary assignment of license from Peter Goelet to the Courier Publishing Corporation (publishers of a weekly newspaper in Poughkeepsie). Station operates on **1220 kc.,** with 250 watts, daytime only.

KSAL—R. J. Laubengayer and KSAL, Inc., Salina, Kans.—Granted voluntary assignment of C. P. from R. J. Laybengayer to KSAL, Inc. (C. P. is for new station to operate on **1120 kc.,** 500 watts night, 1 KW, unlimited time).

KABR—Aberdeen Broadcast Co., Aberdeen, S. Dak.—Granted transfer of control of corporation from Aberdeen Broadcast Company to H. C. Jewett, Jr. (station operates on **1390 kc.,** 500 watts night, 1 KW day, unlimited, DA at night).

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted C. P. to make changes in equipment, increase power from 100 watts to 250 watts, and time of operation from daytime only to unlimited.

WTMC—John T. Alsop, Jr., Ocala, Fla.—Granted voluntary assignment of license from John T. Alsop, Jr., to Ocala Broadcasting Co., Inc. Station operates on **1500 kc.,** 100 watts, unlimited time.

WOLS—O. Lee Stone, Florence, S. C.—Granted C. P. to make changes in composite equipment and increase power from 100 watts to 250 watts, unlimited time.

KFDA—Amarillo Broadcasting Corp., Amarillo, Tex.—Granted C. P. to install new equipment and increase power from 100 to 250 watts, unlimited time.

WMSD—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Granted C. P. to make changes in equipment and increase power from 100 watts to 250 watts, unlimited time.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted C. P. to make changes in equipment and increase power from 100 watts to 250 watts, unlimited time.

KORE—Eugene Broadcast Station, Eugene, Ore.—Granted C. P. to install new equipment and increase power from 100 watts to 250 watts, unlimited time.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Granted C. P. to move transmitter site locally, install new equipment, and change frequency from **1210 kc.** to **1370 kc.**, and increase power from 100 watts to 250 watts, unlimited time, upon condition that permittee shall file an application for modification of C. P. specifying exact transmitter location and antenna system within 2 months after effective date.

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Granted C. P. to increase night power from 1 KW to 5 KW; move transmitter site locally to a site to be determined subject to Commission's approval.

WCHV—Community Broadcasting Corp., Charlottesville, Va.—Granted transfer of control of corporation from Mrs. Hugh M. (Nancy) Curtler to Mrs. Marcia Arrington, representing 2231 shares of stock.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted modification of license to increase nighttime power from 100 watts to 250 watts, and increase time of operation to unlimited.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted modification of license to increase night power from 1 KW to 5 KW.

INCREASE IN POWER TO 250 WATTS GRANTED

The following stations were granted modification of licenses to increase night power from 100 watts to 250 watts:

WBNY, Buffalo, N. Y.; WHBC, Canton, Ohio; WFOY, St. Augustine, Fla.; WROL, Knoxville, Tenn.; KONO, San Antonio, Tex.; KFJB, Marshalltown, Iowa; WOC, Davenport, Iowa: KOVC, Valley City, N. Dak.; KYSM, Mankato, Minn.; KLBM, La Grande, Ore.; KGKB, Tyler, Tex.; KPLT, Paris, Tex.; WCBS, Springfield, Ill.; KCRJ, Jerome, Ariz.

MISCELLANEOUS

KFVS—Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Granted special temporary authority to operate simultaneously with WEBQ from 8:30 to 9 p. m., CST, on October 11, in order to broadcast a speech by Loux Lozier, Missouri State Commander of the American Legion.

KFGQ—Boone Biblical College, Boone, Iowa.—Granted special temporary authority to operate from 4 to 5 p. m., CST, on October 11, 18, 25 and November 1, in order to broadcast children's services.

WBAA—Purdue Univ., W. Lafayette, Ind.—Granted special temporary authority to operate from 8 to 9 p. m., CST, on October 4, in order to broadcast programs relative to 50th Anniversary of Y. M. C. A.

WPTF—WPTG Radio Co., Raleigh, N. C.—Granted extension of special temporary authority to operate from 11 to 12 p. m., EST, for the period September 30 to October 29, in order to broadcast programs as described in letter of May 27.

KBTM—Regional Broadcasting Co., Jonesboro, Ark.—Granted special temporary authority to operate simultaneously with Station KGHI from local sunset (October, 5:30 p. m., CST), to conclusion of Univ. of Ark. football games only, on October 7, 14, 21 and 28, and to operate additional time on October 6, 13, 20 and 27, to broadcast Jonesboro High School football games only.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts nighttime, on October 6, 13, 20 and 27, in order to broadcast high school football games only.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted petition to amend application in Docket No. 5678.

KFNF—KFNF, Inc., Council Bluffs, Iowa.—Granted motion to dismiss without prejudice application for modification of C. P. to increase power.

WDAE—Tampa Times Co., Tampa, Fla.—Granted petition to withdraw without prejudice application in Docket 4936.

NEW—C. T. Sherer Co., Inc., Worcester, Mass.—Denied petition to reconsider and vacate order of Commissioner Walker entered September 11, 1939, granting petition of Worcester Broadcasting Corp. to intervene in the hearing in re Sherer Co. application, and that said petition be placed on motions calendar for argument; exceptions noted by counsel.

NEW—Radio Voice of Springfield, Inc., Springfield, Ohio.—Granted motion for order to take depositions in re application in Docket 5704.

WSAU—Northern Broadcasting Co., Inc., Wasau, Wis.—Denied petition to intervene in the hearing on the application of William F. Huffmann for a new station at Wisconsin Rapids, Wis.

WBBR—Watchtower Bible & Tract Society, Inc., Brooklyn, N. Y.—Petition to intervene in the hearing on the application of Harold Thomas, Bridgeport, Conn., for a new station, was withdrawn.

NEW—Harold Thomas, Bridgeport, Conn.—Granted motion for leave to amend application for C. P. so as to request **1420 kc.**, instead of **1310 kc.**, and hearing scheduled for October 9, cancelled.

NEW—Hazlewood, Inc., Orlando, Fla.—Granted motion for continuance of hearing now scheduled for October 13, for about 60 days, new date to be fixed by Secretary.

WBNY—Roy L. Albertson, Buffalo, N. Y.; WSVS—Seneca Vocational High School, Buffalo, N. Y.—Granted motion that application of WBNY for modification of license be dismissed without prejudice; and hearing on application of WSVS for renewal of license cancelled.

WBEO—The Lake Superior Broadcasting Co., Marquette, Mich.—Granted special temporary authority to operate additional time from October 4, to broadcast World Series games only, no other programs authorized.

KRBA—Red Lands Broadcasting Assn., Lufkin, Tex.—Granted special temporary authority to operate nights of October 7, 9, 13 and November 3, in order to broadcast football games only; no other programs authorized.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Granted special temporary authority to operate additional time on October 27, November 3, 11 and November 17, in order to broadcast high school games only.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate from 7 to 8 p. m., CST, on October 1, in order to broadcast the American Forum of the Air only, during which program there will be a discussion of the neutrality situation by Senator Van Nuys.

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted special temporary authority to operate simultaneously with WFAS from 4 to 5 p. m., EST, on September 30, October 7, 14, 21, and 28, in order to broadcast football games.

KMPC—The Station of the Stars, Inc., Beverly Hills, Cal.—The Commission, upon its own motion, modified its decision in the matter of KMPC, and dismissed the petition of Leland M. Woods in this matter. An Order modifying its decision of January 16, 1939, was adopted.

NEW—Enrique Abarca Sanfeliz, San Juan, P. R.—Granted petition to reopen hearing in re Docket 5298, application of Enrique Abarca Sanfeliz, and Docket 4610, the application of United Theatres, Inc., both for new stations in San Juan, P. R.

KTSA—Sunshine Broadcasting Co., San Antonio, Tex.—Denied petition to intervene and request for enlargement of issues, in re application of KMAC, San Antonio, for C. P. to change frequency, increase power and time of operation.

KTSA—Sunshine Broadcasting Co., San Antonio, Tex.—Dismissed motion to fix same hearing date and consolicate cases, in re applications of KMAC and KABC, San Antonio, Dockets 5626 and 5716.

WOAI—Southland Industries, Inc., San Antonio, Tex.—Denied motion to amend Commission's Notice of Hearing or to enlarge the issues contained therein, in re application of KMAC, Docket 5626.

WOAI—Southland Industries, Inc., San Antonio, Tex.—Denied petition to intervene in re the hearing on application of KMAC, Docket No. 5626, scheduled for November 14.

WOAI—Southland Industries, Inc., San Antonio, Tex.—Dismissed petition for intervention in re application of KABC, San Antonio, Texas, Docket 5716.

WOAI—Southland Industries, Inc., San Antonio, Tex.—Dismissed petition to amend Commission's Notice of Hearing or enlarge the issues contained therein, in re application of KABC, Docket 5716.

KTSA—Sunshine Broadcasting Co., San Antonio, Tex.—Dismissed petition to intervene and request for enlargement of issues, in re application of KABC.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Dismissed petition to intervene in re the hearing on application of KABC.

WGBF—Evansville On the Air, Inc., Evansville, Ind.—Dismissed petition for leave to intervene in re application of KABC.

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Denied petition to intervene and request for enlargement of issues in re application of Hazlewood, Inc., for new station.

WABC—Columbia Broadcasting System, Inc., New York City.—Denied petition to intervene in the hearing on the application of WHDH, Boston, Mass., for C. P. to increase power and time of operation, scheduled for hearing on October 10.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Granted petition to dismiss application without prejudice, in re Docket 5716.

KOA—National Broadcasting Co., Inc., Denver, Colo.—Denied petition to intervene in re the hearing on the application of WHDH, scheduled for hearing on October 10.

WNOX—Scripps-Howard Radio Inc., Knoxville, Tenn.—Denied petition for intervention and enlargement of issues in re application of WROL, Knoxville, Tenn., to change frequency and increase power, scheduled for hearing on November 2, 1939.

KWFT—Wichita Broadcasting Co., Wichita Falls, Tex.—Denied petition to intervene in the hearing on the application of WROL.

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.; NEW—Lillian Kiefer, Brooklyn, N. Y.; WWRL—Long Island Broadcasting Corp., Brooklyn, N. Y.; NEW—Paul J. Gollhofer, Brooklyn, N. Y.; WCNW—Arthur Faske, Brooklyn, N. Y.—The Commission on its own motion extended the effective date of provision (3) of its Order of December 5, 1938, 30 days from October 2, 1939. This provision in the Order cancelled the modification of license mailed on June 16, 1938, to WWRL authorizing it to include in the operating time of its station the time previously utilized by WMBQ, and its orders extending effective date of said provision until October 2, 1939.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Designated for further hearing the application of KFIO to operate with 1 KW on **950 kc.**, upon the following issues: (1) to determine the extent of interference which may be caused to station CJRM, Regina, Sask. (2) to determine the extent of interference which may be caused to the operation of Stations KFWB and KGVO operating with 5 KW, unlimited hours, as requested in pending applications, and (3) to determine whether by use of the facilities sought the applicant can provide service to this area in accordance with the Standards of Good Engineering Practice and the Commission's plan of allocation.

WFYB—Columbia Broadcasting System, Inc., Portable-Mobile (area of Cincinnati, O.).—Granted modification of license to change associated standard broadcast station from WKRC, Cincinnati, to WABC-WBOQ, New York.

NEW—KRIC, Inc., Portable-Mobile (area of Beaumont, Tex.).—Granted C. P. for new low frequency relay broadcast station to operate on frequencies **1646, 2090, 2190, 2830 kc.**; 40 watts.

WEJV—National Broadcasting Co., Inc., Portable-Mobile (area of Chicago).—Granted C. P. to make changes in equipment and reduce power in high frequency relay broadcast station from 0.5 to 0.25 watts. Also granted license for same.

NEW—Arizona Broadcasting Co., Inc., Portable-Mobile (area of KVOA, Tucson, Ariz.).—Granted C. P. for new high frequency relay broadcast station to operate on frequencies **31220, 35620, 37020** and **39260 kc.**, 10 watts.

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—Continued hearing now scheduled for October 9 to November 9 on the applications of The Mayflower Broadcasting Corp. for C. P. for a new station, and the application of WAAB, Boston, for renewal of license.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—Reopened for further hearing the matter of amended application of Lakeland Broadcasting Co. for a new station to operate on **680 kc.**, with 250 watts power, daytime only, upon the following issues: (1) To determine legal and financial qualifications of applicant to construct and operate the proposed station; (2) because of pendency of another application with which conflict may be had by reason of interference, i.e., KFEQ, Inc., St. Joseph, Mo.; and (3) to determine whether the granting of the assignment requested would be in accordance with the Commission's plan of allocation and standards of good engineering practice.

WJBW—Charles C. Carlson, New Orleans, La.—Upon petition of WJBW the Commission cancelled the hearing upon application for renewal of license and granted renewal of license for station WJBW.

WEJX—National Broadcasting Co., Inc., Portable-Mobile (area of Chicago).—Granted C. P. to install new equipment and reduce power in high frequency relay broadcast station from 0.5 to 0.25 watts. Also granted license to cover same.

WINN—Kentucky Broadcasting Corp., Louisville, Ky.—Granted modification of C. P. approving studio and transmitter sites and installation of vertical radiator.

WDSM—WDSM, Inc., Superior, Wis.—Granted modification of C. P. extending completion date from September 17 to October 17, 1939.

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Granted authority to install automatic frequency control.

KSTP—National Battery Broadcasting Co., St. Paul, Minn.—Granted C. P. to install auxiliary transmitter at present main transmitter site, using 1 KW power, for emergency use only.

KEIM—KTAR Broadcasting Co., Phoenix, Ariz.—Granted C. P. to make changes in equipment and increase power of high frequency broadcast station from 10 to 25 watts.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted modification of C. P. approving transmitter site, installation of vertical radiator and composite equipment for 250 watts.

WABE—Central New York Broadcasting Corp., Portable-Mobile (Syracuse, N. Y.).—Granted license to cover C. P. for low frequency relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.**, 12 watts.

WFVA—Fredericksburg Broadcasting Corp., Fredericksburg, Va.—Granted license to cover C. P. for new station to operate on **1260 kc.**, 250 watts, daytime only. Also granted authority to determine operating power by direct measurement of antenna input.

KBRG—WDAY, Inc., Fargo, N. Dak., Portable-Mobile.—Granted license to cover C. P. for new low frequency relay broadcast station, frequencies **1606, 2022, 2102** and **2758 kc.**, 100 watts.

WAIO—WDZ Broadcasting Co., Tuscola, Ill (Portable-Mobile).—Granted license to cover C. P. for new relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.**, 10 watts.

NEW—Midland Broadcasting Co., Kansas City, Mo.—Granted license for new high frequency relay broadcast station, frequencies **31220, 35620, 37020** and **39260 kc.**, power 25 watts, for relaying programs or orders concerning such programs, and power of 50 watts on **31220 kc.** for transmission of orders only.

WJPR—John R. Pepper, Greenville, Miss.—Granted modification of C. P. approving studio and transmitter sites, and installation of vertical radiator.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority as follows: to operate October 1, 6 to 6:30 p. m., CST, Salute to Americanism of Jewish War Veterans, Louisville Post, and 8 to 9 p. m., CST, evening services commemorating 20th anniversary of Pastorate Rev. Finley Gibson; October 5, 6 to 6:30 p. m., CST, high school football rally; October 6, 6:15 to 6:30 p. m., CST, National Fire Prevention Week speaker, Louisville Fire Dept., and University of Louisville v. Evansville football game, for duration of game only. The above authorizations are for specific programs listed—not from local sunset.

W2XAG—Carman R. Runyon, Jr., Yonkers, N. Y.—Granted special temporary authority to operate on frequency **110 mc.**, for a period not to exceed 30 days, pending alterations in equipment to permit operation on a higher frequency and pending action by Commission on pending application for change in classification of station.

NEW—Seaboard Broadcasting Corp., Savannah, Ga.—This case was set for oral argument on September 29th, at which time argument was called and continued indefinitely because of the pendency of an appeal in the case of Arthur Lucal for a new station at Savannah, Ga., which has been decided by the Court of Appeals. Oral argument is now scheduled for October 12 in re the Seaboard Broadcasting Corp. application.

NEW—Colonial Broadcasters, Inc., Savannah, Ga.—Same, except argument on Colonial Broadcasters, Inc., scheduled for October 12.

WIEH—Knickerbocker Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate a Learadio Transmitter No. T 30 AB, C.A.A., approval No. 334, on frequency **2790 kc.,** 20 watts power, aboard an Eastern Airlines plane flying over World's Fair from 10:45 to 11 p. m., EST, on October 3, test period to begin approximately 8 p. m.; program pick-up point to be at Administration Building, and to be broadcast over station WMCA.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate with 250 watts from 7:45 p. m., EST, to the conclusion of Sharon High School football games on October 6, 20 and 27.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted special temporary authority to operate from local sunset (October 5:30 p. m. and November 5 p. m., EST) to 6 p. m., EST, on October 7, 21, 28, November 4, in order to broadcast football games as described in telegram received September 26.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate additional time simultaneously with station WGBF with reduced power of 250 watts on October 5 in order to permit WGBF to broadcast football games between Catholic High School and Chattanooga High School only.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate additional time to the conclusion of high school football games on October 12, 13, 19, 20, 26 and 27, while actually broadcasting games only.

W2XBT—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate television broadcast experimental station W2XBT on the frequency band **156-162 mc.,** for the period October 12 to November 10, pending adjustment of the license to conform with provisions of Sec. 4.74.

KRKO—Lee E. Mudgett, Everett, Wash.—Granted special temporary authority to operate simultaneously with KEEN from 12 noon to 1:30 p. m., PST, for the period beginning October 5 and continuing for the duration of the World Series, while actually broadcasting World Series games only.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted special temporary authority to operate additional time simultaneously with KBST on October 20 and 27, and November 3, 10 and 17, in order to broadcast Hobbs High School football games only.

KPAC—Port Arthur College, Port Arthur, Tex.—Granted special temporary authority to operate additional time on November 3, 11, 18, 24 and 30, 1939, in order to broadcast Port Arthur High School football games only, using 100 watts only.

W3XDS—RCA Mfg. Co., Inc., New York City.—Granted special temporary authority to operate general experimental station W3XDS using the frequency **950 kc.,** with power of 1 KW, to conduct a comprehensive field survey to study the effects of fading on amplitude modulated facsimile emission during the hours 2 to 7 a. m., EST, on Sundays; midnight to 5 a. m., EST, Mondays; and 1 to 5 a. m., EST, from Tuesday through Saturday, for the period October 5 and ending no later than October 22, 1939.

APPLICATIONS FILED AT FCC

640 Kilocycles

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—License to cover C. P. (B4-P-2402) for changes in equipment and move of studio and transmitter site.

800 Kilocycles

WFAA—A. H. Belo Corp., Dallas, Tex.—Authority to determine operating power by direct measurement of antenna power.

880 Kilocycles

WRNL—Richmond Radio Corporation, Richmond, Va.—License to cover C. P. (B2-P-2378) to install auxiliary transmitter for emergency use.

920 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—License to cover C. P. (B5-P-1540) as modified to change frequency, increase power, change hours of operation, move transmitter, install directional antenna (for night use) and new transmitter.

KVOD—Colorado Radio Corp., Denver, Colo.—Authority to determine operating power by direct measurement of antenna power.

940 Kilocycles

WAVE—WAVE, Inc., Louisville, Ky.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and directional antenna for day and night use.

WDAY—WDAY, Inc., Fargo, N. Dak.—Construction permit to install directional antenna for day and night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

WCSH—Congress Square Hotel Co., Portland, Maine.—Construction permit to install directional antenna for day and night use, increase power from 1 KW, 2½ KW LS, to 5 KW day and night.

1130 Kilocycles

WJJD—WJJD, Inc., Chicago, Ill.—Construction permit to change frequency from **1130 kc.** to **1040 kc.;** change power and hours of operation from 20 KW, limited time, to 10 KW, 20 KW LS, unlimited time; and install directional antenna for night use.

1140 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Construction permit to install new transmitter and directional antenna for night use; increase power from 25 to 50 KW; change hours of operation from simultaneous day, shares WAPI night, to unlimited.

1160 Kilocycles

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Construction permit to install new transmitter, directional antenna for day and night use; change frequency from **1160 kc.** to **1140 kc.;** increase power from 5 to 50 KW; change hours of operation from simultaneous day, share nighttime with WOWO, to unlimited; move transmitter 14 miles, from Bells Lane, 8½ miles northeast of Wheeling, W. Va., to R.F.D., St. Clairsville, Ohio.

1200 Kilocycles

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Modification of C. P. (B3-P-2348) for changes in equipment, further requesting changes in transmitting equipment and increase in power from 100 watts to 250 watts; extend commencement and completion dates 10 and 15 days respectively.

KWNO—Maxwell H. White and Herman R. Wiecking, d/b as Winona Radio Service, Winona, Minn.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WJHL—W. Hanes Lancaster and J. W. Birdwell. d/b as Johnson City Broadcasting Co., Johnson City, Tenn.—Voluntary assignment of license from W. Hanes Lancaster and J. W. Birdwell, d/b as Johnson City Broadcasting Co., to WJHL, Incorporated.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Modification of license to change hours of operation from daytime to unlimited time, using 250 watts day and night.

WDSM—WDSM, Inc., Superior, Wis.—License to cover C. P. (B4-P-770) as modified for a new station.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Authority to determine operating power by direct measurement of antenna power.

KSUN—Copper Electric Co., Inc., Lowell, Ariz.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1210 Kilocycles

KFOR—Cornbelt Broadcasting Corporation, Lincoln, Nebr.—Construction permit to make changes in equipment.

1250 Kilocycles

WKST—Keystone Broadcasting Co., New Castle, Pa.—Modification of C. P. (B2-P-2428) for equipment changes. increase in power, further requesting changes in transmitting equipment, extend commencement date 10 days after grant and completion date 120 days thereafter.

1260 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Construction permit to install new transmitting equipment, and increase power from 250 watts to 500 watts, 1 KW LS.

1290 Kilocycles

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Voluntary assignment of license and permit from Charles Leo Lintzenich to Fred O. Grimwood.

1310 Kilocycles

NEW—Star Printing Co., Miles City, Mont.—Construction permit for new station to be operated on **1310 kc.,** 250 watts power, unlimited time.

KUIN—Southern Oregon Broadcasting Company, Grants Pass, Ore.—Modification of C. P. (B5-P-2245) for a new station. requesting approval of antenna and approval of studio and transmitter site at Redwood Highway, Grants Pass, Ore.

WSAV—WSAV, Inc., Savannah, Ga.—Modification of C. P. (B3-P-1714) for a new station, requesting approval of antenna and approval of studio site at 7th Floor, Liberty National Bank Bldg., Bull and Broughton Sts., Savannah, Ga., and transmitter site at President St., 1 mile east of Savannah, Ga. Amended: Re equipment.

WLBJ—Bowling Green Broadcasting Co., Bowling Green, Ky.—Modification of C. P. (B2-P-2194) for a new station, requesting approval of antenna and approval of studio and transmitter site at Cemetery Pike and Lehman Ave., Bowling Green, Ky. Also requesting an increase in power from 100 watts, 250 watts LS, to 250 watts day and night; installation of new transmitter.

WBRK—Harold Thomas, Pittsfield, Mass.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1370 Kilocycles

KFRO—Voice of Longview, Longview, Tex.—Modification of C. P. (B3-P-2117) to change frequency; increase power; change hours of operation; move transmitter; install new transmitter and directional antenna for night use, further requesting change in type of transmitting equipment; changes in antenna; and move of transmitter to Longview-Marshall Highway, Longview, Tex., and extend commencement and completion dates 60 and 180 days respectively. Amended: Re antenna.

WFOR—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Modification of C. P. (B3-P-2320) to make changes in equipment, increase power, further requesting extension of commencement date from 5-6-39 to 11-6-39 and completion date from 11-6-39 to 5-6-40.

WHUB—M. L. Medley, Cookeville, Tenn.—Modification of C. P. (B3-P-2298) for a new station, requesting new transmitter equipment, approval of antenna and approval of transmitter at 807 Hickory St., Cookeville, Tenn., and approval of studio site at 109 Broad St., Cookeville, Tenn. Amended: To request 250 watts power day and night, give transmitter site as Cookeville, Tenn., and studio as 807 Hickory St., Cookeville, Tennessee.

1390 Kilocycles

NEW—Mollin Investment Co., Riverside, Calif.—Construction permit for new station on **1390 kc.,** 500 watts, daytime operation. Amended: Re equipment.

1400 Kilocycles

KHBC—Honolulu Broadcasting Co., Ltd., Hilo, Hawaii.—Modification of license to change frequency from **1400** to **1200 kc.**

1420 Kilocycles

WJMS—WJMS, Inc., Ironwood, Mich.—License to cover C. P. (B2-P-2426) for increase in power, and change in equipment.

KATE—Albert Lea Broadcasting Co., Albert Lea, Minn.—Modification of license to increase power from 100 watts, 250 LS to 250 watts day and night.

KXL—KXL Broadcasters, Portland, Ore.—Modification of license to increase power from 100 watts, 250 LS to 250 watts day and night.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Modification of license to change hours of operation from daytime to unlimited, using 100 watts power.

1430 Kilocycles

WOKO—WOKO, Incorporated, Albany, N. Y.—Extension of special experimental authority to operate a facsimile station from 2 to 5 a. m., for regular license period.

NEW—Jack Hazard, San Diego, Calif.—Construction permit for a new station on **1430 kc.,** 500 watts, unlimited time. Amended: Re: equipment.

1450 Kilocycles

KCMO—Broadcasting Co., Kansas City, Mo.—Construction permit to install new transmitting equipment, increase power from 1 KW to 1 KW; 5 KW LS.

1500 Kilocycles

KNOW—Frontier Broadcasting Co., Inc., Austin, Texas.—Modification of C. P. (B3-P-2436) for new transmitter, antenna, move and increase in daytime power, requesting approval of transmitter site at Manor Road, Austin, Texas, antenna changes and new transmitter. Amended: To give transmitter site as East 5th & Tillery Sts., Austin, Tex.

NEW—P. K. Ewing, Kosciusko, Miss.—Construction permit for a new station on **1500 kc.,** 100 watts; 250 watts LS, unlimited time.

NEW—The Post Search Light Co., Bainbridge, Ga.—Construction permit for a new station on **1500 kc.,** 100 watts; 250 LS, unlimited time.

WDNC—Durham Radio Corp., Durham, N. C.—Authority to determine operating power by direct measurement of antenna power.

WKBB—Sanders Brothers Radio Station, Dubuque, Iowa—Modification of C. P. (B4-P-1147) as modified, for new antenna, move of studio and transmitter site, further requesting increase in power from 100 watts; 250 watts LS to 250 watts day and night.

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—License to cover C. P. (B2-P-1848) as modified for a new station.

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Va. —License to cover C. P. (B3-P-2413) to increase power, move transmitter, new equipment, and changes in antenna. Amended: Night power.

MISCELLANEOUS

NEW—International Broadcasting Corp., area WOV, New York, N. Y.—Construction permit for a new relay broadcast station to be operated on **30820, 33740, 35820, 37980 kc.,** 2 watts power, A-3 emission. Amended: To request frequency of **31220, 35620, 37020, 39260 kc.**

NEW—International Broadcasting Corp., area of WOV.—License to cover above. Amended: Re: frequencies.

WABD—Central New York Broadcasting Corp., area of Syracuse, N. Y.—License to cover C. P. (B1-PRE-278) for a new relay broadcast station.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—License to cover C. P. (B1-PIB-19) for a new transmitter location.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—License to cover C. P. (B1-PIB-19) for move of transmitter.

W2XAG—Carman R. Runyon, Jr., Yonkers, N. Y.—Modification of license to change from developmental to high frequency broadcast station to be operated on **117,190 kc.,** special emission.

WELK—WCBS, Inc., Springfield, Ill.—License to cover C. P. (B4-PRE-276) for equipment changes and increase in power.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Esquire Products—In a complaint Martin Benjamin Rothman, trading as Esquire Products, 216 North Clinton St., Chicago, was charged with using lottery devices in the sale and distribution of radios, waffle irons, silverware, coffee tray sets, pencils and griddles. According to the complaint, the respondent furnished various push cards accompanied by order blanks, instructions, and other printed matter for use in the sale and distribution of his merchandise by means of a lottery scheme. Alleging violation of the Federal Trade Commission Act, the complaint granted the respondent 20 days for filing answer to the charges. (3902)

Hershel California Fruit Products Company, Inc.—A complaint has been issued against Hershel California Fruit Products Company, Inc., San Jose, Calif., alleging violation of the Federal Trade Commission Act through misleading representations concerning its product, a tomato paste.

It was alleged that through use of phraseology in the Italian language, depictions of Italian type tomatoes, and other representations relative to Italy or Italian origin, the respondent led purchasers to believe that its tomato paste was made in Italy from Italian tomatoes, then imported into the United States, and that its "Contadina Brand" tomato paste was duly awarded the first grand prize at the Milan Exposition of 1922.

Pointing out that many purchasers prefer tomato paste made in Italy from Italian tomatoes, the complaint alleged that the respondent's representations were misleading in that its product was made in California from tomatoes grown in the United States, and that it was not awarded a prize at Milan. (3901)

Johns-Manville Corporation and Johns-Manville Sales Corporation, 22 East 40th St., New York, were charged in a complaint with the dissemination of misleading advertising in the sale of an insulating material designated as "Rock Cork." According to the complaint, the respondents had been advertising to the effect that Rock Cork was an entirely mineral product, when in truth it contained approximately 88 per cent mineral and 12 per cent vegetable matter. The respondents were granted 20 days for filing answer to the alleged violation of the Federal Trade Commission Act. (3899)

National Grain Yeast Corporation—A complaint has been issued against the National Grain Yeast Corporation, Belleville, N. J., charging it with price discrimination and payment of brokerage in violation of the Robinson-Patman Act, and with giving secret gratuities in violation of the Federal Trade Commission Act.

According to the complaint, the respondent has been discriminating in price by allowing to certain purchasers of its bakers' yeast used in the manufacture of bread and allied products, different prices than allowed other of its competing purchasers for products of like grade and quality. It is alleged that further discrimination in price between different competing purchasers of its products is brought about as a result of the respondent's delivering, without specific charge, large quantities of bakers' yeast to certain of its purchasers, in addition to yeast actually sold to these same purchasers, thus reducing the cost to favored purchasers of the yeast actually bought, while at the same time not furnishing such additional yeast to other competing purchasers who pay the same price per pound for the product. The respondent also has allegedly been granting cash discounts of 1 per cent to 2 per cent to certain of its purchasers and not to others who pay in the same manner and within the same time as those receiving such discounts. (3903)

Ranson Electric Company—False representations that Japanese manufactured incandescent lamp bulbs were made in the United States, is charged in a complaint against Ben Ransom, trading as Ranson Electric Company, 147 Second Ave., North, Nashville, Tenn.

According to the complaint, the respondent, in order to conceal from prospective purchasers the source of origin of its product, removed from imported Japanese electric lamp bulbs the label "Made in Japan," then inserted the bulbs into wrappers and packed them into cartons upon which were printed the words "Lednew Lamps," "Made in U. S. A.," "The Lednew Corporation," so as to signify that they were manufactured in the United States by the Lednew Corporation.

The respondent allegedly packed and sold American manufactured bulbs in packages or containers marked with the name of a manufacturing concern which was not the true manufacturer thereof, and misleadingly represented, directly and by implication, that the United States Bureau of Standards has adopted and promulgated specifications for incandescent electric lamp bulbs, when in truth the Bureau of Standards has made no such specifications with which the respondent's bulbs could conform. (3905)

Roxanna Canning Company—A complaint has been issued charging misleading representations in the interstate sale of certain products distributed by the Roxanna Canning Company, Lebanon, Ohio. This company, according to the complaint, distributes various brands of dog food under the trade names of Harty Dog Food Company and Dodds Packing Company.

It was alleged that the respondent company represented that its "Harty Brand" and "Blackspot Brand" dog foods contain beef by-products, ground beef bone and beef, and that its foods are scientifically balanced rations, and scientifically balanced beef rations, when such are not the facts. (3904)

C. F. Sauer Company—A complaint issued in November, 1938, in which the C. F. Sauer Company, 2000 West Broad St., Richmond, Va., was charged with price discrimination in the sale of extracts, spices, mayonnaise, salad dressing and drugs, in violation of the Robinson-Patman Act, has been amended.

The amended complaint alleged that payments by the respondent for transportation services and facilities in connection with the handling of its commodities, have been granted to some customers and denied to others.

It was alleged that deductions from invoice price of amounts equalling the cost of delivery by common carrier were granted certain customers, who utilized their own trucks and were not required to pay the common carrier charges, but that this facility was denied to competing customers having trucks available. (3646)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Etablissements Rigaud, Inc., 79 Bedford St., and E. Fougera & Co., Inc., 75 Varick St., New York, were ordered to discontinue misleading representations in tbe sale of perfumes.

Findings of the Commission are that the respondents had represented that Etablissments Rigaud, Inc., is a French firm with its headquarters in France, and that the respondents' perfumes are made in France and imported into this country, when in truth, Etablissements Rigaud, Inc., is not a French firm and has no foreign office, and its perfumes are domestic products made in the United States by blending domestic and imported ingredients.

Under the order, the respondents are to cease representing, through the use of the term "Paris," or "Paris, France," or any other terms indicative of foreign origin, that perfumes which are compounded in the United States are made in France or in any other foreign country, provided, however, that the country of origin of the various ingredients may be stated when immediately accompanied by an explanation that such products are made or compounded in the United States.

The order further forbids use of brand or trade names such as "Un Air Enbaumé," "Riguad," "Igora," or any other foreign terms, to refer to perfumes made in the United States, without clearly stating that such products are of domestic origin. The respondents also are to discontinue use of any French or other foreign terms to designate perfumes made or compounded in the United States, unless the English translation, or its equivalent, appears as conspicuously and in immediate conjunction therewith. (3337)

E. Fougera & Company, Inc.—See Etablissements Riguard, Inc.

International University of Commerce—Prohibiting misleading representations in the sale of correspondence courses in business subjects, a cease and desist order has been issued against a Chicago organization formerly known as International University of Commerce, and its president, Paul V. Manning. The respondent corporation is now known as International School of Commerce.

Among practices prohibited were representations that the respondents maintain a faculty or staff of instructors or a staff of certified public accountants; that the opportunities in the field of accountancy for students finishing the respondents' course are unlimited; that the respondents' course is superior to those of competitors and that their school is the largest of its kind in the United States.

The order also forbids the representation that the respondents' course is endorsed by Alfred P. Sloan, Jr., Walter P. Chrysler, or any other person, or that such employers have urged clerical employees to take advantage of the respondents' course, until such are the true facts.

Use of the word "university" to represent that the respondents conduct an institution of higher learning, is also prohibited under the order. Findings of the Commission are that the word "university" was dropped from the respondents' corporate name as of August 1, 1938. (3543)

National Institute for Physical Advancement—Karl W. Peters, trading as National Institute for Physical Advancement, 113 West 57th St., New York, has been ordered to discontinue misleading representations in the sale and distribution of a physical culture book designated "Bust Culture." Under the order, the respondent is to discontinue representing that any woman can obtain a beautiful bust by following the method outlined in the respondent's book; that the method has helped millions of women or any other exaggerated number in excess of the actual number of women who have tried and been helped by such method, or that the method has been found effective in all cases. (3460)

Peanut Specialty Company, 400 West Superior St., Chicago, has been ordered to discontinue selling or otherwise disposing of candy or other merchandise by use of push or pull cards, punchboards or other lottery devices. The order further directed the respondent company to cease packing or assembling in the same assortment for sale to ultimate consumers, candies of uniform size and shape having centers of a different color, together with larger pieces of candy, the larger pieces to be given as prizes to purchasers procuring a piece of candy having a center of a particular color. (2273)

STIPULATIONS

The Commission has entered into the following stipulations:

Certified Silk Hosiery Company—H. D. Heyman, trading as Certified Silk Hosiery Company, 221 West Washington St., Chicago, agreed to cease representing, in connection with his sale of "Certified Hosiery," "Certified Shirts," and "Certified Lingerie," that any of his selling plans is "Free" so long as any charge is made, deposit required, or service is to be rendered therefor; that agents can earn amounts in excess of the average amount consistently made by a substantial number of his representatives under normal business conditions; that the socks he distributes eliminate the need for darning or will give almost double ordinary wear, or that the thread composing such products is made by a revolutionary new process. The respondent further agreed to cease using the word "Certified" in his trade name, or otherwise, to represent that the quality, cut design, composition or any other feature of his product is "Certified," unless such are the facts. It was also stipulated that the respondent will cease using the word "Silk" as a part of his trade name, or otherwise, to designate any merchandise which is not composed wholly of silk, unless such trade name or phrase containing the word "Silk" shall be accompanied by a full disclosure of the fabric content of each garment. (02439)

Hercules Leather Goods Company—Jacob Hyman and Jacob Zichlinsky, trading as Hercules Leather Goods Company, 130 West 27th St., New York, agreed to cease using the term "Hercuhyde" as a trade name, stamp, brand or label for brief cases which are not made from leather or hide. The respondents will also discontinue using the word "Hyde" or any other simulation of the word "hide," either alone or in connection with the letters "Hercu," or any other words, so as to imply to purchasers that the product referred to is composed of leather or hide, when such is not a fact. (2543)

Ralph H. Jones Company, Cincinnati, an advertising agency, has entered into a stipulation to discontinue misleading representations in the advertisement of a fruit juice product distributed by The Kroger Grocery and Baking Company, Cincinnati.

Likewise, the Commission accepted from the Kroger company a stipulation to discontinue similar representations in the sale of its product.

This is the second case in which an advertising agency has entered into a stipulation with the Commission to discontinue misleading representations in connection with the advertising copy of one of its accounts.

The agency agreed to cease disseminating advertisements which represent, directly or by implication, that sugar syrup is usually used in flavoring grapefruit juice, or that "Kroger's Country Club Brand Grapefruit Juice" is the only grapefruit juice to which dry sugar is added. (02441)

The Kroger company stipulated that it will cease advertising, directly or by implication, that sugar syrup is usually used in flavoring grapefruit juice and will desist from the representation or implication that its product is the only grapefruit juice to which dry sugar is added. The respondent also agreed to discontinue representing or implying that competing products of equal quality contain a lesser quantity, unless such is an actual fact, and to cease otherwise making any misleading or disparaging statement regarding competing products or any false comparison therewith. (02442)

Kroger Grocery & Baking Company—See Ralph H. Jones Company.

LeJay Manufacturing Company—L. D. Leach, trading as LeJay Manufacturing Company, 1406 West Lake St., Minneapolis, in the sale of the "LeJay Electric Fence Controller," a device for electrifying stock fences, agreed to cease representing that one strand of wire, when used in conjunction with the controller, will confine animals of varying sizes, or will confine animals as efficiently as a fence of several strands, or that it will enable users to save 80 per cent of livestock fencing costs, unless the circumstances of such saving are clearly explained. The respondent will also cease representing that a single charged wire can be used successfully in restraining all animals, or, by any general terminology, that it will restrain animals possessing a coat of hair which in fact forms a natural insulation against the charge. (02440)

Luxor, Ltd., 1355 West 31st St., Chicago, agreed to cease representing that its cosmetic designated as "Luxor Special Formula Cream," or any other similar cosmetic, is a new type of cleansing cream; is the product of unlimited research; reaches into the pores of the skin, or will cleanse and beautify the skin better than any other cream. The respondent further agreed to cease advertising that for centuries cold creams and cleansing creams have been made with oils bodied up with waxes, unless qualified to indicate that not all of such creams contained waxes. Further representations to be discontinued are that a cosmetic designated "Luxor Complexion Powder," or any other similar cosmetic, possesses sensational resistance to moisture that is a real mystery, or affords real beauty protection. (02438)

Magnesia Products Company, 3519 N. Hubbard St., Milwaukee, stipulated that it will cease representing that articles supplied in its packages of bird food are "Free," when their cost is included in the price of the complete package; that the packages contain one pound net weight of bird seed, when the content is less than one pound; that the contents of a package are "Imported Bird Food," when any portion of it is domestic seed; that its grit cube contains all mineral and other elements necessary for bird health, or that such elements may be obtained only in the grit cube offered for sale by the respondent, when such are not the facts. (2544)

FTC CLOSES CASE

The Federal Trade Commission closed its case in which Robert E. Waterman, trading as National Pottery Distributors, Roseville, Ohio, was charged with using unfair trade practices in the sale of earthenware kitchen utensils.

Due to unsuccessful efforts to locate the respondent, who has no permanent residence or place of business, the Commission closed its case without prejudice to its right to reopen it, should future facts so warrant.

FCC Assignments For October

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF October
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	Commissioner Frederick I. Thompson
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	Commissioner Thad H. Brown
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	Commissioner Paul A. Walker
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	Commissioner Norman S. Case
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	Commissioner T. A. M. Craven
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	Commissioner George Henry Payne
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	Secretary T. J. Slowie
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location."	Chief Engineer Ewell K. Jett

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 41, October 13, 1939

Code Developments

Asserting that "the broadcasting industry is to be congratulated for this sane and orderly procedure" in the handling of public controversial issues, Matthew Woll, Vice President of the American Federation of Labor, last Friday praised the new NAB Code, speaking from Cincinnati where the A. F. of L. convention was in session.

The full text is carried elsewhere in the REPORTS.

On Tuesday, the Code Committee announced it had found that sponsored broadcasts on paid time in behalf of the Townsend Plan would constitute a discussion of a public controversial issue and therefore would be unacceptable under the terms of the new Code, except in those states where the Townsend Plan is "a public proposal subject to ballot" in the current elections.

This was the second major finding of the Committee, which had previously found that discussions of neutrality revision were discussions of a "controversial public issue" and would be unacceptable on paid time.

Meanwhile, the matter of Elliott Roosevelt's announced intention to violate the Code on his broadcast of October 7, in which he publicly announced that on this broadcast he would undertake to express a personal opinion about neutrality on a commercial news commentator's program, was referred to the Mutual Broadcasting System.

In making public its finding on the Townsend Plan, the Committee pointed out that during political campaigns, adherents of the Townsend Plan may buy time "in behalf of or in opposition to qualified candidates for public office," as provided by law, or may buy time "in behalf of or in opposition to a public proposal subject to ballot," as further provided by the Code. In the interim, it was pointed out that representative spokesmen would be given free time, in accord with individual station policy, and in accord with the public interest, program balance and availability of time.

It was emphasized again that the Code does not deny the right of free speech to anyone. It simply denies the opportunity to buy time and to monopolize radio for one-sided discussions of public issues.

Inquiry about the Townsend Plan was made by a member station who had been approached by an agent for the "Townsend Plan Broadcasts". The agent sought to purchase fifteen-minute units of time, not earlier than 6:30 p. m., stating that the new series of

programs, scheduled to start about October 15, would present various Senators, Congressmen, Dr. Francis E. Townsend and others, and that an endeavor would be made to establish new Townsend Clubs, to solicit new members and to sell literature.

A. F. of L. Vice President Praises NAB Code

From the speech of Matthew Woll, vice president of the American Federation of Labor, who spoke over the network of the Columbia Broadcasting System, Friday, October 6:

> "In our conventions for the past several years, radio has been a subject commanding deep interest. It is so this year. Labor's message has been taken to millions over the air. And Labor was pleased to learn this week that the broadcasting industry made an important move, while our convention has been in session, in defense of democracy by guaranteeing that Radio would continue to provide an open forum for discussion of public issues. As Labor understands the industry's new code of program standards, it guarantees that no one side shall monopolize the air waves when a great public issue arises, but that all sides—majorities and minorities, rich and poor alike—shall have free access to the microphone to state their case. This is in the best tradition of democracy and I think the broadcasting industry is to be congratulated for this sane and orderly procedure, which rules out domination either by force of numbers or by force of wealth. On that front, at least, power politics has been defeated."

NEW ACCOUNTING COMMITTEE APPOINTED

President Miller announced the appointment of the members of the Accounting Committee for the ensuing year as follows: C. T. Lucy, WRVA, Richmond, Virginia, Chairman; H. W. Batchelder, WFBR, Baltimore, Maryland; S. R. Dean, Columbia Broadcasting System, New York, N. Y.; E. J. Gluck, WSOC, Charlotte, North Carolina; N. L. Kidd, WSYR, Syracuse, New York; and Harry F. McKeon, National Broadcasting Company, Inc., New York, N. Y.

The Accounting Committee, during the past year, has been one of the most active of the NAB Committees. It held several meetings and had numerous conferences with Mr. William Norfleet and Mr. De Quincy Sutton of the Accounting Department of the FCC. As a result of Mr. Norfleet's and Mr. Sutton's cooperation with the Committee, the new financial questionnaire which soon will be sent to all stations, will be much shorter and easier to answer than previous questionnaires. It is also expected that stations doing a gross business under $25,000 a year will find that portion of the questionnaire which they will be required to answer greatly simplified. The Committee has reason to believe that it will be necessary to answer and file only one questionnaire a year.

The NAB Accounting Committee expects to hold a meeting shortly at which time a standardized station program log will be developed for the use of stations, as Headquarters Office has received many requests for assistance and help of this kind.

Miller to Address Civil Liberties Union

Neville Miller, NAB president, will address the meeting of the American Civil Liberties Union in New York, Saturday, October 14. His address will be carried over the network of the Mutual Broadcasting System at 1:30 P. M., EST.

Others on the Civil Liberties program include Attorney General Frank Murphy and Senator Elbert D. Thomas (D) of Utah.

Mr. Miller will discuss the underlying principles of the Code, which has been warmly endorsed by the American Civil Liberties Union.

FCC UPHOLDS PAYNE DECISION

Decision of Federal Communications Commissioner, John Henry Payne, in connection with an intervention rule was unanimously upheld by the Commission this week. The Payne decision was printed in full in last week's issue of NAB Reports. In connection with this the Commission made the following official statement:

> The Federal Communications Commission announced that the Commission had unanimously upheld the action taken by Commissioner Payne on October 2, 1939, in denying the petition of Orlando Broadcasting Company, Inc. (WDBO), Orlando, Florida, to intervene in the hearing on an application of Hazlewood, Inc., for a new station in Orlando, Florida, to operate on 1390 kc., with 1 KW, unlimited time.
>
> Commissioner Payne's decision was an interpretation of the Commission's rule relating to intervention and enlargement of issues. The rule reads as follows:
>
>> "Sec. 1.102 Intervention. Petitions for intervention must set forth the grounds of the proposed intervention, the position and interest of the petitioner in the proceeding, the facts on which the petitioner bases his claim that his intervention will be in the public interest and must be subscribed or verified in accordance with Sec. 1.122. The granting of a petition to intervene shall have the effect of permitting intervention before the Commission but shall not be considered as any

recognition of any legal or equitable right or interest in the proceeding. The granting of such petition shall not have the effect of changing or enlarging the issues which shall be those specified in the Commission's notice of hearing unless on motion the Commission shall amend the same."

In his decision Commissioner Payne states:

> "In many cases the major function served by intervenors was to impede the progress of the hearing, increase the size of the record, confuse the issues and pile up costs to the applicant and to the Commission through the introduction of cumulative evidence, unnecessary cross-examination, dilatory motions, requests for oral argument and other devices designed to prevent expeditious disposal of Commission business."

The decision further states:

> "It is incumbent upon any person requesting the injection of new issues in a hearing to show not only that the issues which he proposes to have the Commission add are proper matters for the Commission to consider and that there is a basis for believing that the Commission will be required to deny the application on the new grounds alleged, but also that the proposed new issues should be heard at the hearing already set rather than at a later time."

Other applications affected adversely by the denial of the Orlando Broadcasting Company's petition, are as follows:

Station KMAC, San Antonio, Texas; Station KTSA, San Antonio, Texas; Station WOAI, San Antonio, Texas; Station WROL, Knoxville, Tenn.; Station WNOX, Knoxville, Tenn.; Station WFLA, Tampa, Fla., and Station WHDH, Boston, Mass.

COURT BROADCAST CASES

Supreme Court of the United States this week granted a review of the case of the Pottsville Broadcasting Company and denied a review in the case of WOW.

In the Pottsville Broadcasting Company case, the Federal Communications Commission denied an application of the Company for a new station at Pottsville, Pa., to use 580 kilocycles, 250 watts, daytime operation. The Pottsville Company case was denied in the lower court and the Supreme Court has now granted an appeal.

Station WOW at Omaha, Nebraska, appealed from an order of the Commission granting an application of Station WKZO to change its assignment. WOW claimed interference. The Court of Appeals of the District of Columbia dismissed the appeal of WOW and the Supreme Court has denied a review of the case.

800 STATIONS

The Federal Communications Commission issued operating licenses to four stations during the month of September, 1939, and issued construction permits to two new stations. A comparative table by months follows:

	Jan. 1	Feb. 1	Mar. 1	April 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1
Operating	722	727	729	732	734	735	735	738	739	743
Construction	42	39	37	37	38	38	43	56	59	57
	764	766	766	769	772	773	778	794	798	800

Of the 264 local channel stations licensed to operate full time, 126 have been granted 250 watts power day and night. The FCC granted 13 of these power increases in August and 113 during September. There were also 5 stations granted construction permits to install new equipment in order to step up power to 250 watts.

FCC REVISED AND RENUMBERED RULES

The Federal Communications Commission this week announced revised and renumbered rules. In connection with the case of the amendment of rules 177 and 177.1 on the petition of Mayor LaGuardia of New York City, the Commission in its announcement said:

"To the licensees and permittees of all existing standard broadcast stations (all broadcast stations licensed to operate upon the channels 500 to 1600 kc, both inclusive) and to all applicants who have pending before the Commission applications for regular broadcast stations to operate upon such channels, to the licensees and permittees of all existing international broadcast stations (all international broadcast stations licensed to operate upon the channels 6,000 to 26,000 kc, inclusive) and to all applicants who have pending before the Commission applications for regular broadcast stations to operate upon such channels and to any other interested parties:

"You are hereby notified that as of August 1, 1939, the Commission revised and renumbered all of its rules and regulations. Rules numbered 177 and 177.1 have now been renumbered rules 3.94(a) and 4.10. Rules 1010, 1011, and 1012(c) referred to in Issue No. 5 in the Commission's Notice of May 5, 1939, have become Rules 4.41, 4.42, and 4.43.

"The revised and renumbered rules include some changes in phraseology but the substance of these rules is unchanged, and the amendments made will not in any way affect the issues to be determined upon the hearing in the above-entitled matter."

FREE OFFERS

Several new free offer requests were reported by member stations during the past week.

A script has been offered member stations commemorating the 50th Anniversary of motion pictures, which members "may broadcast free of charge," and in which are included several plugs for outstanding movie productions of the past, present and future. While the industry desires to render every cooperation to sister industries, NAB

Bureau of Radio Advertising has advised Mr. Kenneth Clark, of the Motion Picture Producers and Distributors of America, Inc., that the scripts are unacceptable except on a paid basis, and invited his cooperation in helping members sell the show to local exhibitors.

Other free-time seekers include the Missionary Servants of the Most Holy Trinity, who have since withdrawn their offer, after being informed by NAB that their plan to sell books at a dollar a copy (to defray the cost of the transcriptions) was a violation of the Code; and the National Dunking Association, seeking to popularize this quaint custom and thus sell more doughnuts and/or coffee. NDA, although claiming to be a "non-commercial and non-political" activity, has not answered NAB's request for further information on their organization, its purpose and financial backing.

"Cost-per-inquiry"

The Bureau of Radio Advertising has written the following firms, explaining that their requests for radio time on a percentage basis are in violation of the NAB Code of Ethics:

Dietetic Research Laboratories (MVM Reducing Perles)
Interstate Advertising Agency (on behalf of Sunlit Flower Fields)

Crowell-Collier

Members who wish to use the "Voice of Industry" programs may eliminate entirely any mention of Crowell-Collier Publishing Company, as well as its magazines, in the closing announcements of these programs. Although the Bureau of Radio Advertising's letter of October 2 and subsequent advices direct to the stations from Crowell-Collier may not have made this entirely clear, the NAB's agreement with the Company allows stations to delete or alter the credit in any way they see fit. Stations who would prefer to share in the credit for this series, the purpose of which is to offset attacks on advertising, may do so by substituting a suitable announcement.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning Monday, October 16. They are subject to change.

Monday, October 16

NEW—Lillian E. Kiefer, Brooklyn, N. Y.—C. P., **1500 kc.**, 100 watts, 100 watts LS, specified hours (requests facilities of WMBQ).

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—C. P., **1500 kc.**, 100 watts, 100 watts LS, specified hours.

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Renewal of license, **1500 kc.**, 100 watts, 100 watts LS, specified hours.

WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Modification of license, **1500 kc.**, 100 watts, 250 watts LS, specified hours (WCNW), (request facilities of WMBQ).

WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Modification of license, **1500 kc.**, 100 watts, 250 watts LS, specified hours (request facilities of WCNW).

WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Renewal of license, **1500 kc.**, 100 watts, 250 watts LS, specified hours.

NEW—Paul J. Gollhofer, Brooklyn, N. Y.—C. P., **1500 kc.**, 100 watts, 100 watts LS, specified hours (hours of WMBQ).

WCNW—Arthur Faske, Brooklyn, N. Y.—Modification of license, **1500 kc.**, 100 watts, 250 watts Ls, unlimited time. Present assignment: **1500 kc.**, 100 watts, 250 watts LS, specified hours (WWRL).

WCNW—Arthur Faske, Brooklyn, N. Y.—Modification of C. P., **1500 kc.**, 100 watts, 250 watts LS, specified hours (WWRL).

WCNW—Arthur Faske, Brooklyn, N. Y.—Renewal of license, **1500 kc.**, 100 watts, 250 watts LS, specified hours (WWRL).

WCNW—Arthur Faske, Brooklyn, N. Y.—(C. P. to make changes in transmitter equipment, install automatic frequency controll apparatus, vertical antenna and move transmitter locally), **1500 kc.**, 100 watts, 250 watts LS, specified hours (WWRL).

Monday, October 16

Hearing Before the Committee

In the Matter of Amendment of Rules 177 and 177.1 on Petition of Mayor LaGuardia of the City of New York.

Further Hearing

NEW—Publix Bamford Theatres, Inc., Asheville, N. C.—C. P., **1430 kc.**, 1 KW, unlimited time (DA-night).

Tuesday, October 17

NEW—Las Vegas Broadcasting Co., Inc., Las Vegas, Nevada.—C. P., **1420 kc.**, 100 watts, 250 watts LS, unlimited time.

Thursday, October 19

Reargument Before the Commission

Report No. I-40:

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—Renewal of license, **1400 kc.**, 500 watts, shares WARD, WBBC and WVFW.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Renewal of license, **1400 kc.**, 500 watts, shares WBBC, WLTH and WVFW.

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Modification of license, **1400 kc.**, 500 watts, shares WARD, WLTH and WVFW.

Friday, October 20

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Renewal of license, **1290 kc.**, 100 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WLNH—Northern Broadcasting Co., Laconia, N. H.—Granted C. P. to make changes in equipment and increase power to 250 watts, unlimited time.

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kans.—Granted C. P. to make changes in equipment and increase power to 250 watts, unlimited time.

KVNU—Cache Valley Broadcasting Co., Logan, Utah.—Granted C. P. to make changes in equipment and increase power to 250 watts, unlimited time.

WENY—Elmira Star-Gazette, Inc., Elmira, N. Y.—Granted modification of C. P. to increase night power from 100 to 250 watts, and extend commencement date to 60 days after grant and completion date to 180 days thereafter.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Granted modification of license to move studio location from 6th and Madison Ave., Covington, Ky., to the Gibson Hotel, Cincinnati, Ohio.

WCOL—WCOL, Inc., Columbus, Ohio.—Granted C. P. to make changes in equipment change frequency from **1210** to **1200 kc.**, increase power from 100 watts unlimited to 250 watts, unlimited time.

WALR—WALR Broadcasting Co., Zanesville, Ohio.—Granted modification of C. P. authorizing installation of new equipment, increase in power from 100 watts, unlimited time to 250 watts, unlimited time; also extension of commencement date to 60 days after grant and completion date to 90 days thereafter.

WOKO—WOKO, Inc., Albany, N. Y.—Granted extension of authority to operate the equipment of standard broadcast station WOKO as a facsimile broadcast station between the hours of 2 a. m. to 5 a. m.

WJHL—Johnson City Broadcasting Co., Johnson City, Tenn.—Granted voluntary assignment of license from W. Hanes Lancaster and J. W. Birdwell, d/b as Johnson City Broadcasting Co., to WJHL, Inc. Station operates on **1200 kc.**, 100 watts night, 250 watts day, unlimited time.

WGRC—Northside Broadcasting Corp., New Albany, Ind.—Granted modification of license to change hours of operation from daytime only to unlimited using 250 watts day and night.

W9XYH—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted modification of C. P. to extend construction and completion dates to 60 days after grant and 90 days thereafter respectively, and to change frequency from **26300 kc.** to **43000 kc.**

DESIGNATED FOR HEARING

The following application has been designated for hearing by the Commission. Date for the hearing has not yet been set.

NEW—Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge and Korsmeyer, Jacksonville, Ill.—Application for C. P. to erect a new station to operate on **1370 kc.**, 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval.

INCREASE IN POWER TO 250 WATTS

The following stations were granted increase in power to 250 watts, unlimited time:

KPAB, Laredo, Tex.; KOCA, Kilgore, Tex.; WEDC, Chicago, Ill.; KWJB, Globe, Ariz.; KOOS, Marshfield, Ore.; WKBB, Dubuque, Iowa; WBRK, Pittsfield, Mass.; KWNO, Winona, Minn.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KALE, Portland, Ore.: KCRC, Enid, Okla.; KFBK, Sacramento, Calif.; KFJM, Grand Forks, N. Dak.; KGA, Spokane, Wash.; KGHF, Pueblo, Calif.; KGB, San Diego, Calif.; KCMO, Kansas City, Mo.; KLRA, Little Rock, Ark.; KOH, Reno, Nev.; KQV, Pittsburgh, Pa.; KSCJ and auxiliary, Sioux City, Iowa.; KSTP, St. Paul, Minn.; KWK, St. Louis, Mo.; WALA, Mobile, Ala.; WADC, Village of Tallmadge, Ohio; WBBC, Brooklyn, N. Y.; WBNX, New York City; WBCM, Bay City, Mich.; WFBL, Syracuse, N. Y.; WFEA, Manchester, N. H.; WHDL, Olean, N. Y.; WLAC, Nashville, Tenn.; WAWZ, Zarephath, N. J.; WSFA, Montgomery, Ala.; WSPD, Toledo, Ohio.; WSAR, Fall River, Mass.

MISCELLANEOUS

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate additional time on October 9, 1939, in order to broadcast from the Mutual Network the annual appeal from the Community Mobilization for Human Needs only, including a talk by President Roosevelt.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted special temporary authority to operate additional time on October 7, 1939, in order to broadcast St. Xavier v. Hazard football game only.

WKEU—Radio Station WKEU, Griffin, Ga.—Granted special temporary authority to operate additional time on October 13, 1939, in order to broadcast Jaycette Auto Show only.

W1XOJ—The Yankee Network, Inc., Paxton, Mass.—Granted extension of special temporary authority to test the high frequency broadcast equipment of station W1XOJ authorized by modification of C. P. on frequency **43000 kc.**, with power not to exceed 2000 watts, for the period October 17 to November 15, 1939, in order to make adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400-foot mast.

WEJU-WEJJ—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to use two RCA-NBC transmitters, Type ND 20, Serial No. 5, and ND 31, Serial No. 3, for operation under New York area licenses for relay broadcast stations WEJU and WEJJ, respectively, on October 9, 1939, in connection with a special feature fire prevention safety program.

WHB Broadcasting Co., Kansas City, Mo.—Granted special temporary authority to use equipment described in application with 100 watts power, frequency **1622, 2058, 2150** and **2790 kc.**, for the period October 7 to November 5, 1939, in order to make tests for a receiving location and be ready to use the equipment for the American Royal Livestock Show during week ending October 14, 1939.

Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.—Granted special temporary authority to operate an RCA model RB-2-2 watt pack transmitter on relay frequencies in Group E, as a relay broadcast station, on October 11 and 14, 1939, in connection with the Charity Steeple Chase Races to be held at Rolling Rock, Ligonier, Pa.

J. L. McDowell—Docket 5700—Application of WNBX, Twin State Broadcasting Corp., Springfield, Vt., for C. P. to change location of station from Springfield, Vt., to Keene, N. H., using the present facilities with DA day and night.

NEW—Dr. Willard Carver, Thomas B. Williams, Byrne Ross, Lawton, Okla.—Granted motion to dismiss without prejudice the application for a new station to operate on **1420 kc.**, 100 watts, unlimited time, scheduled for further hearing on October 7.

NEW—Radio Voice of Springfield, Springfield, Ohio.—Granted motion to amend order to take depositions by adding the names of certain persons as deponents, in re application for a new station to use **1310 kc.**, 100 watts, unlimited time.

NEW—Richard T. Sampson, Riverside, Calif.—Granted motion for order to take depositions in re application for new station to operate on **1390 kc.**, 250 watts, daytime, scheduled for hearing November 13.

Clear Channel Group—Referred to the Commission en banc the petition to intervene and supplement thereto, in re application of WHDH, Matheson Radio Co., Inc., Boston, Mass., to increase power from 1 KW daytime to 5 KW, unlimited time.

Clear Channel Group—Referred to the Commission en banc the motion to dismiss application of WHDH, or in the alternative to eliminate or limit Issue No. 3, or further, that said issue be limited to **830 kc.**

KOA—National Broadcasting Co., Inc., Denver, Colo.—Referred to the Commission en banc the motion to dismiss application of WHDH.

WMEX—The Northern Corp., Boston, Mass.—Denied petition to intervene in the hearing on the application of WHDH to increase power to 5 KW, scheduled for October 10.

WFLA—Florida West Coast Broadcasting Co., Inc., Tampa, Fla., and WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Denied petition to intervene in the hearing on the application of WROL, Knoxville, Tenn., for C. P. to change frequency from **1310 kc.**, to **620 kc.**, and power from 100 watts night, 250 watts LS, to 500 watts night, 1 KW LS, scheduled for hearing on November 2.

KBRH—Troy L. Colboch, Santa Ana, Calif.—Granted special temporary authority to operate Taylor Airphone Type RT3 aircraft radio transmitter aboard plane NC-23633, bearing call letters KHCXU, as a relay broadcast station on the frequency **2830 kc.**, power 10 watts, for the period October 4, 1939, to November 2, 1939, to relay broadcast endurance contest program to Standard Broadcast Station KVOE and Mutual Don Lee Broadcasting System.

WEHA—City of New York, Municipal Broadcasting System, New York City, Portable-Mobile.—Granted license to utilize the equipment of low frequency relay broadcast station and increase power from 8.5 watts to 25 watts.

WRUL—World Wide Broadcasting Corp., Scituate, Mass.—Granted license to cover C. P. to move international broadcast station transmitter locally.

WABD—Central New York Broadcasting Corp., Syracuse, N. Y., Portable-Mobile.—Granted license to cover C. P. for new high frequency relay broadcast station, frequencies **31220, 35620, 37020** and **39260 kc.,** 12 watts.

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Granted license to cover C. P. authorizing new station to operate on **1500 kc.,** 100 watts, unlimited time.

WJMS—WJMS, Inc., Ironwild, Mich.—Granted license to cover C. P. authorizing changes in equipment and increase in power from 100 watts, unlimited, to 250 watts, unlimited time.

WELK—WCBS, Inc., Springfield, Ill.—Granted license to cover C. P. authorizing changes in equipment and increase in power of high frequency relay broadcast station to 10 watts.

W9XC—Central Broadcasting Co., Mitchellville, Iowa.—Granted license to cover C. P. for new developmental station, frequency **1000 kc.,** experimentally conditionally, 1 KW.

WDSM—WDSM, Inc., Superior, Wis.—Granted license to cover C. P. for new station to operate on **1200 kc.,** 100 watts, unlimited time.

W1XOJ—The Yankee Network, Inc., Paxton, Mass.—Granted modification of C. P. to extend completion date for a period of 6 months.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted modification of C. P. to make changes in equipment and extend commencement date to 10 days after grant and completion date to 120 days thereafter.

WSAV—WSAV, Inc., Savannah, Ga.—Granted modification of C. P. to make changes in equipment.

KVIC—Radio Enterprises, Inc., Victoria, Tex.—Granted modification of C. P. approving studio and transmitter site, installation of new equipment and vertical radiator.

WISE—Asheville Daily News, Asheville, N. C.—Granted modification of C. P. to install new equipment and change name from Asheville Daily News (Harold H. Thoms, owner) to Harold H. Thoms.

WAAB—The Yankee Network, Inc., Boston, Mass.—Granted modification of license to increase power of auxiliary transmitter from 500 watts night, 1 KW day, to 1 KW day and night, for emergency use only. This grant is made on condition it shall not be construed as a finding by the Commission upon the application of Mayflower Broadcasting Corp. nor upon application for renewal of license of WAAB.

WKAR—Michigan State College, E. Lansing, Mich.—Granted modification of C. P. extending completion date to 11-30-39.

KDKA—Westinghouse E. and M. Co., Pittsburgh, Pa.—Granted modification of C. P. to install new equipment.

WJDX—Lamar Life Ins. Co., Jackson, Miss.—Granted authority to determine operating power by direct measurement of antenna input.

KDRO—Drohlich Bros., Sedalia, Mo.—Granted authority to determine operating power by direct measurement of antenna input. Also granted license to cover C. P. authorizing new station to operate on **1500 kc.,** 100 watts night, 250 watts day, unlimited time.

WTNK—WOAX, Inc., Trenton, N. J., Portable-Mobile.—Granted reinstatement of C. P. of low frequency relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.,** 50 watts.

WENN—WPTF Radio Co., Raleigh, N. C., Portable-Mobile.—Granted C. P. to make changes in equipment.

WEKR—South Bend Tribune, Portable-Mobile (area of WSBT and WFAM), South Bend, Ind.—Granted C. P. to make changes in equipment and increase power in high frequency relay broadcast station to 15 watts.

NEW—Don Lee Broadcasting System, Los Angeles, Calif.—Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station to operate on special emission, frequencies **133030, 136810, 138630 kc.,** 50 watts.

KRBA—Red Lands Broadcasting Assn., Lufkin, Tex.—Granted special temporary authority to operate additional time on October 7, in order to broadcast community singing program only; on October 8, to broadcast Texas Forest Festival Pageant only, instead of football games on said dates as authorized by grant on September 29.

WHKC—Associated Radiocasting Corp., Columbus, Ohio.—Denied special temporary authority to operate from local sunset at Los Angeles, Cal. (November, 7:45 p. m., EST), to 8:00 p. m., EST, on November 1, 3, 6, 8, 10, 13, 15, 17, 20, 22, 24, 27 and 29, 1939, in order to broadcast the "Lone Ranger" program.

WMFO—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Denied special temporary authority to operate from local sunset (October, 5:15 p. m., CST), to 6:00 p. m., CST, in order to broadcast Alabama Network commercials, for a period not to exceed thirty days, pending action on application for unlimited time.

W1XOV—The Yankee Network, Inc., Quincy, Mass.—Granted special temporary authority to continue the operation of experimental radio station W1XOV on frequency **27100 kc.,** power 200 watts, pending frequency shift to **30660 kc.,** as authorized by renewal of license issued September 29, 1939 This authority continued from date of grant until further order of the Commission, but not to extend beyond one month, and is further subject to the condition that no interference is caused to the operation of Government radio stations.

W1XOY—The Yankee Network, Inc., Sargents Purchase, N. H.—Granted special temporary authority to continue the operation of experimental radio station W1XOY on frequency **41000 kc.,** with power of 500 watts, pending frequency shift to **39460 kc.,** as authorized by renewal of license issued September 29, 1939. This authority continued from date of grant until further order of the Commission, but not to extend beyond one month, and is further subject to the condition that no interference is caused to the operation of Government radio stations.

WLOK—The Fort Industry Co., Lima, Ohio.—Granted special temporary authority to operate unlimited time on November 7, in order to broadcast returns of a local election.

WILL—Univ. of Ill., Urbana, Ill.—Granted special temporary authority to operate simultaneously with Stations WIBW and WCHS, with power reduced to 250 watts, from 5:15 to 7:30 p. m., CST, on October 14, in order to broadcast Illinois v. Southern California football game only.

KGEK—Elmer G. Beehler, Sterling, Colo.—Granted special temporary authority to operate from 2:30 to 5 p. m., on October 6, and from 8:45 to 10:15 p. m., MST, on October 13, in order to broadcast football games.

WFOR—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Granted modification of C. P. extending commencement date to November 6, 1939, and completion date to May 6, 1940.

WHBY—WHBY, Inc., Appleton, Wis.—Granted modification of C. P. approving transmitter site at 103 College Ave., and installation of vertical radiator.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted modification of C. P. approving transmitter site and installation of vertical radiator.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna input.

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—Granted license to cover C. P. authorizing changes in equipment installation of vertical radiator, increase power and time of operation from 500 watts night and day, sharing KVOD to 1 KW, unlimited time.

KVOD—Colorado Radio Corp., Denver, Colo.—Granted license to cover C. P. authorizing change in transmitter site locally, installation of DA system for nighttime use, change frequency from **920** to **630 kc.,** and increase power from 500 watts night and day, sharing equally with KFEL to 1 KW, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input.

WDNC—Durham Radio Corp., Durham, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted extension of special temporary authority to operate with 5 KW night, using DA for the period October 12 and ending in no event later than November 10, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on **780 kc.,** reduces power so that additional interference is not involved, or until defective DA is corrected by installation of new tuning condensers.

WPAY—Vee Bee Corp., Portsmouth, Ohio.—Granted special temporary authority to operate a 100-watt crystal controlled test transmitter on **1370 kc.,** between 12 midnight and 6

a. m., EST, for a period of 5 days, beginning October 15, in order to conduct tests for a new transmitter site; however, such tests not permitted during hours prescribed for Commission's monitoring schedule.

WAIR—C. G. Hill, Geo. D. Walker and Susan H. Walker, Winston Salem, N. C.—Denied special temporary authority to operate from 5:15 to 5:30 p. m., EST, on November 5, 12, 19 and 26, in order to broadcast "The Musical Steel Makers" program.

WMEX—The Northern Corp., Boston, Mass.—The following minute entry in re application of WMEX for a construction permit was adopted: "The Secretary of the Commission is directed to reissue said C. P., the date for commencement of construction to be advanced 60 days from the date hereof and the completion date to 180 days thereafter."

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz. —Denied petition and amended petition to reconsider, filed on August 14 and 22, by E. B. Sturdivant, d/b as Silver Crest Theatres, and of the motion and amended motion to dismiss, filed by applicant, and all other pertinent facts, in re application of Yuma Broadcasting Co., Yuma, Ariz., for a new station to use **1200 kc.,** 100 watts night, 250 watts LS, unlimited time, which was granted by the Commission on August 8 without hearing.

WNBX—Tri-State Broadcasting Corp., Springfield, Vt.—Granted petition to reconsider and grant without a hearing the application of WNBX, authorizing move of station from Springfield, Vt., to Keene, N. H., installation of DA for both day and nighttime operation, and to operate on its present frequency of **1260 kc.,** with 1 KW night and day, unlimited time.

NEW—Summit Radio Corp., Akron, Ohio.—Set for reargument to be held October 26, the application of Summit Radio Corp., for C. P. to erect a new station using frequency **1530 kc.,** 1 KW, unlimited time.

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.; NEW—Orville W. Lyerla, Herrin, Ill.; KFVS—Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Set for oral argument to be held October 26, the matter of modification of license of WEBQ to change frequency and time of operation; the application of Orville W. Lyerla for a new station, and application of KFVS for modification of license to operate full time.

WAAB—The Yankee Network, Inc., Boston, Mass.; NEW—The Mayflower Broadcasting Corp., Boston, Mass.—Denied petitions of The Mayflower Broadcasting Corp., and WAAB, and ordered hearing to be held in Boston, Mass., on November 8, 1939, before an examiner.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Postponed indefinitely the hearing scheduled for October 10, 1939, on application of WHDH to operate unlimited hours on frequency **830 kc.,** with 5 KW power, instead of 1 KW hours of operation, limited to sunset at Denver.

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—The Commission unanimously upheld the action taken by Commissioner Payne on October 2, 1939, in denying petition of WDBO to intervene in the hearing on an application of Hazlewood, Inc., for a new station in Orlando, Fla., to operate on **1390 kc.,** with 1 KW, unlimited time.

APPLICATIONS RECEIVED AT FCC

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Construction permit to install directional antenna for night use; increase power from 500 watts, 1 KW LS, to 1 KW day and night; make changes in hours of operation to specified hours day, unlimited time night (simultaneous with WOSU after sunset).

KEJJ—National Broadcasting Co., Inc., Portable-Mobile (area of KOA, Denver, Colo.).—Construction permit to install new equipment and add A-1 and A-2 to type of emission

KEJL—National Broadcasting Co., Inc. (Portable-Mobile, area of San Francisco, Calif.).—C. P. to install new equipment.

KTBC—State Capitol Broadcasting Assn. (R. B. Anderson, President), Austin, Texas.—Voluntary assignment of license from State Capitol Broadcasting Association (R. B. Anderson, President), to State Capital Broadcasting Association, Inc.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Distributors, Inc., United Advertising Companies, Inc., and John H. Morgan, trading as Champion Products Company, Linton, Ind., were charged in a complaint with the dissemination of misleading representations in the sale of "Vita-Perles." a medicinal preparation claimed to contain Vitamins A, B-1, D, G and E.

According to the complaint, the respondents misleadingly advertised that one may test "Vita-Perles" without risking any money; that vitamin deficiency is, in both sexes, the cause of backache, headache, loss of appetite and pep, faulty vision, loss of weight, early tooth decay and skin irritations and that these conditions will be relieved or corrected by use of "Vita-Perles," when such are not the facts.

The respondents further allegedly represented that, in men, premature loss or impairment of sexual desire, vigor or potency is due to a vitamin deficiency, and, in women, inability to conceive or bear children is frequently due to a vitamin deficiency and that such conditions may be removed or improved by the use of "Vita-

Perles," when such are not the facts. In truth, the complaint points out, the respondents' preparation, except in cases of actual deficiency in one or more of the vitamins which they contain, are of no therapeutic, preventive or tonic value. (3918)

Brown & Williamson Tobacco Corporation—See P. Lorillard Company.

Champion Products, Inc.—See American Distributors, Inc.

Colonial Enterprise Company, Inc.—In a complaint, Colonial Enterprise Company, Inc., 10 W. 37th St., New York, was charged with the use of lottery schemes in the sale of its merchandise.

According to the complaint, the respondent contacts fraternal and other organizations and offers to promote a carnival or dance for them, the proceeds of which are to be divided upon some agreed basis. The respondent then allegedly disseminates books of tickets and advertising literature describing its merchandise and the method of awarding it as premiums or prizes. The price of the tickets, ranging from 1 cent to 35 cents, is determined by a number concealed on the ticket stub, and another concealed number determines which of the purchasers are entitled to certain specified articles of merchandise, it is further charged. The complaint continues that after a period of days, the tickets are collected and a drawing is held, the bearer of the lucky number being entitled to cash, or merchandise prizes or premiums. (3920)

Lady Esther, Ltd., 7171 West 65th St., Chicago, was charged in a complaint with the dissemination of misleading representations in the sale of "Lady Esther Face Cream."

The respondent allegedly represented that its face cream penetrates the skin to the bottom of the pores; dissolves dirt and waste matter in the pores; overcomes dry skin; prevents and removes wrinkles and lines in the face, and that its preparation, when used according to the respondent's method for cleaning the face, will clean more than the surface, while other skin cleansing preparations clean only the surface. The respondent further represented, according to the complaint, that its cream safeguards beauty glands and brings them back to activity; that dry skin is the cause of wrinkles, and that results from use of its preparation are guaranteed, when such are not the facts.

In truth, the complaint continues, the respondent's cream does not have any unique or active penetrative property in relation to the skin, nor does it dissolve various forms of dirt and waste matter that soil the skin. The complaint also points out that "Lady Esther Face Cream" serves principally to cleanse the outer surface of the skin and also in the capacity of a lubricant whose effect is of temporary duration, lasting only as long as the lubricating ingredients remain on the skin. (3917)

Charles V. Herron Company—Charging violation of the brokerage section of the Robinson-Patman Act, a complaint has been issued against Charles V. Herron, trading as Charles V. Herron Company, 101 North Governor St., Evansville, Ind., Ryon Grain Company, 428 Mutual Building, Lansing, Mich., and McLaughlin, Ward & Co., 200 East Pearl St., Jackson, Mich.

It is alleged that Herron, in connection with the purchase of beans from Ryon Grain Company and McLaughlin, Ward & Co., has accepted from them an allowance per bag of beans in lieu of brokerage. For this allowance, it is alleged, Herron has rendered these companies no services at any time. (3916)

Larus & Brother, Inc.—See P. Lorillard Company.

P. Lorillard Company—Complaints alleging violation of the Robinson-Patman Act in the sale of tobacco products have been issued against P. Lorillard Company, New York, Brown & Williamson Tobacco Corporation, Louisville, Ky., R. J. Reynolds Tobacco Company, Winston-Salem, N. C., and Larus & Brother, Inc., Richmond, Va.

The complaints allege that the respondent companies (1) discriminated in price between different purchasers of their products of like grade and quality; (2) paid to certain customers compensation for services and facilities when such compensation was not made available to all competing customers on proportionately equal terms, and (3) discriminated against some customers by supplying certain services to some but not to others.

Price discrimination is alleged to have taken place in connection with the respondents' practice of including in sales to certain customers and not to others, so-called free goods for which no specific charge was made. It is alleged that the amount which the favored retail distributors paid for the tobacco products included in such orders was, by reason of the so-called free goods, substantially less than the amount which competing retailers paid for an equal quantity of the respondents' products of like grade and quality.

The Lorillard and the Brown & Williamson companies allegedly made special allowances to vending machine operators on the purchase of cigarettes for sale in their machines, the result having been that these operators obtained the cigarettes at price substantially lower than those paid by competing retail distributors not operating vending machines.

The complaints allege that the respondents compensated certain distributors, such as chain stores and other retailers, for furnishing services and facilities such as counter and window displays of the respondents' products. Such payments, it is alleged, were not available to other competing distributors.

To some jobbers, the respondents are alleged to have allowed 60 days for payment at a 2 per cent cash discount, while generally to others 10 days was allowed for payment at the same discount. This allowance of time allegedly constituted a service to the respondents customers which became of greater value as the length was extended.

The complaints charge that all the respondents have established the relationship of seller and customer between them and retail tobacco distributors by means of their many dealings with them and particularly through the medium of their salesmen or "missionary men," and have in such manner control over the prices at which their products are sold by the retail distributors to consumers. (3912-3913-3914-3915)

McDonnell & Sons, Inc.—In a complaint, McDonnell and Sons, Inc., 858-860 Main Street, Buffalo, N. Y., was charged with the dissemination of misleading representations in the sale of grave markers, monuments, memorials and mausoleums.

The respondent allegedly represented that the material used in its grave markers, monuments, memorials and mausoleums is obtained from its own quarry; that all monuments or memorials are sold direct from the respondent's quarry to the ultimate consumer, and that the completing and finishing of all work is performed in its own plant at Barre, Vt., and shipped direct from that plant to the purchasers. In truth, the complaint continues, though the respondent does own a quarry and a finishing plant at Barre, Vt., the quarry has not been in operation since 1928 and the finishing plant since 1932.

It is further charged that the respondent misleadingly represented and implied that all of the several steps in the manufacture of monuments and memorials from the time the marble is quarried from the respondent's quarry until the delivery of the finished product to the ultimate purchaser, are taken exclusively in its own quarry and finishing plant, when actually all of the respondent's supply of marble is purchased from other quarries and all work is finished by other independent manufacturers and finishing plants. (3907)

McLaughlin, Ward & Company—See Charles V. Herron Company.

Mills Sales Company of New York, Inc.—In a complaint, Mills Sales Company of New York, Inc., and its officers, David Jacoby, Evelyn Jacoby, Joseph Jacoby, Estelle J. Kruger and Walter Jacoby, 901 Broadway, New York, were charged with the use of lottery schemes in the sale and distribution of cosmetics, shaving and dental creams, drug and household sundries, perfumes, notions, pen and pencil sets, comb and brush sets and billfolds, and with the sale and distribution of punchboards and push cards to dealers for use in the sale of such dealers' merchandise, such as candy, cigarettes, clocks, razors and clothing. (3910)

Milwaukee Jewish Kosher Delicatessen Association—A complaint has been issued against the Milwaukee Jewish Kosher

Delicatessen Association, 710 West Walnut St., Milwaukee, and Joseph Plotkin, Aaron Guten, Carl Guten, R. Cohen, and M. Guten, members of the association and proprietors of delicatessen stores in Milwaukee, charging them with unlawfully restricting competition in violation of the Federal Trade Commission Act.

According to the complaint, the respondents, acting through the association, entered into an agreement, combination and conspiracy by means of which they agreed upon the prices to be charged by them for kosher food products in Milwaukee; compelled, through threats of boycott, those who supplied such products to delicatessen stores in Milwaukee to refrain from selling their products to those of the respondents' competitors who did not sell such products at the prices fixed by the respondents, and interfered with and cut off the sources of supply of their competitors who were not members of the respondent association and who did not observe the prices fixed by them.

Such acts, the complaint continues, have the effect of unlawfully restraining interstate commerce in kosher food products purchased by Milwaukee delicatessen stores, restricting the retailing of delicatessen products in Milwaukee, enhancing prices to the consuming public, and interfering with normal competition in the sale of such commodities. (3908)

Philip Morris & Co., Ltd., Inc., New York, has been served with a complaint alleging violation of the Robinson-Patman Act in the sale of tobacco products. Substantially similar complaints have already been issued by the Commission against other tobacco companies.

The complaint charges (1) discrimination in price between different purchasers of products of like grade and quality; (2) compensation of certain customers for services and facilities when such compensation was not made available to all competing customers on proportionately equal terms, and (3) discrimination against some customers by supplying certain services to some but not to others.

Price discrimination is alleged to have resulted from the respondent's practice of granting special allowances to vending machine operators on the purchase of cigarettes for sale in their machines. The complaint alleges that these operators obtained the cigarettes at prices substantially lower than those paid by competing retail distributors not operating vending machines.

It is alleged that the respondents compensated certain distributors, such as chain stores and other retailers, for furnishing services and facilities such as counter and window displays of the respondent's products. Such payments allegedly were not available to other competing distributors. (3919)

Rathjen Brothers, Inc.—A complaint has been issued against Rathjen Bros., Inc., trading as United States Distilling Company, 135 Berry St., San Francisco, charging misleading representations in the sale of whisky, gin, rum, brandy and liquers.

Through use of the word "distilling" in its trade name, and in other ways, the respondent allegedly represented that it is a distiller and that its whiskies, gins and other alcoholic beverages are manufactured by the respondent through a process of distillation from mash, wort or wash. The complaint charges that the respondent is not a distiller and does not distill such alcoholic beverages. nor does it operate or control any places where alcoholic beverages are manufactured by a process of original and continuous distillation from mash, wort and wash. (3909)

Retail Coal Merchants Association—A complaint has been issued against 8 Virginia, West Virginia and Ohio wholesalers of coal and 8 Richmond, Va., retail dealers and their trade association, the Retail Coal Merchants Association, alleging a combination and conspiracy to restrain trade in the sale of coal in the Richmond area.

Coal wholesaling companies named as respondents are Bluefield Coal and Coke Company, Bluefield, W. Va.; Cabell Coal Company, Inc., Covington, Va.; Cabin Creek Consolidated Sales Company, Cincinnati; A. T. Massey Coal Company, Richmond; Red Jacket Coal Sales Company, Columbus, Ohio; George W. St. Clair, Robert Henry Moore, Mrs. Robert Henry Moore, Katherine St. Clair Santori, and Houston St. Clair, partners doing business under the name Virginia Smokeless Coal Company, Tazewell, Va.; White Oak Coal Company, Mount Hope, W. Va., and Wyatt Coal Sales Company, Charleston, W. Va.

Richmond coal dealer members of the association, named as respondents, are L. D. Wingfield and James L. Hatcher, co-owners of the business operated as Wingfield-Hatcher Coal Company; A. M. Hungerford, doing business as Hungerford Coal Company; Massey-Wood & West; Sydnor-Howey & Co., Inc.; D. W. Mallory & Co., Inc.; Ellison & Hawes, Inc.; W. E. Seaton & Sons, Inc., and Gill Fuel Company, Inc. These dealers are, according to the complaint, representative of the association's entire membership.

Respondent officers of the association are D. Walton Mallory, president; Edwin D. Newmann, vice president; A. Holland White, treasurer, and Charles H. Hall, Jr., secretary, all of Richmond.

It was alleged that pursuant to the respondents' combination and agreement, the wholesale dealer respondents, agreed with the association member respondents, acting through the association, not to ship, and refrained from shipping, coal from their mines to Richmond retail coal dealers who were not association members or whose retail prices did not conform to those agreed upon by the member respondents. (3911)

R. J. Reynolds Tobacco Company—See P. Lorillard Company.

Ryon Grain Company—See Charles V. Herron Company.

United Advertising Companies, Inc.—See American Distributors, Inc.

United States Distilling Company—See Rathjen Brothers, Inc.

Madame Vera—Veronica Ignatovitch, trading as Madame Vera, Madam Vera, and Mme. Vera, Meigs Building, Bridgeport, Conn., was charged in a complaint with making misleading representations in the sale of a hair and scalp preparation designated as "Madam Vera Hair Grower Salve."

According to the complaint, the respondent represented that her preparation is a competent and effective remedy for dandruff and falling hair; that it grows new hair; that it has been used successfully by thousands of persons, and that the price at which it is offered for sale is a "special" price, when such are not the true facts. (3906)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Chanel, Inc.—Three New York corporations in an order were prohibited from disseminating misleading representations in the sale of perfumes, toilet waters, and other cosmetic preparations. The respondents are: Chanel, Inc., 35 West 34th St.; Parfums Corday, Incorporated, 485 Fifth Ave., and Parfums Lengyel, Ltd., 680 Fifth Ave.

Under the orders, the respondents are to cease representing, through the use of any terms, symbols or picturizations indicative of French or other foreign origin, or in any other manner, that their products which are compounded in the United States are made in France or any other foreign country, provided that the country of origin of the various ingredients may be stated when immediately accompanied with an explanation that such products are made or compounded in the United States.

The order further forbids use of any French or other foreign words as brands or trade names for cosmetic preparations made in the United States without clearly disclosing in immediate connection therewith that such products are made in the United States. The respondents are also prohibited from using any French or other foreign terms to refer to cosmetics made in the United States, unless the English translation or its equivalent appears as conspicuously as, and in immediate connection with, such terms. (3096, 3639 and 3666)

Magnecoil Company, Inc.—Manufacturing blankets and other appliances woven with copper wire and which may be attached to electric light sockets, a Salt Lake City, Utah, company has been directed to cease representing that its devices have value in treating diseases other than that to be obtained by application of heat to the body.

The respondent is Magnecoil Company, Inc., which was found to have violated the Federal Trade Commission Act in making the foregoing and other representations regarding its product.

Among further representations found to have been made by the respondent company in its advertising matter were that use of its products produces radio-magnetic energy or thermo-electric magnetism which will be transmitted to, or have an effect upon, the body; that the products have been endorsed, tested, used, or recommended by hospitals or members of the medical profession; that the respondent company maintains a laboratory or has an advisory or consulting board of medical experts for analyses or advice, and that the respondent's offices occupy a much larger space than is actually the fact.

The order prohibits these representations, specifying in the instance of the assertions regarding a laboratory and medical advisory board, that the respondent shall not make these claims unless it actually owns or controls a scientific laboratory, employs trained scientists or technicians and has such an advisory board. (1846)

National Training Institute, Inc., and its officers, John C. Felber, Arthur W. Groth, and Louise D. Felber, 20 East Jackson Boulevard, Chicago, have been ordered to discontinue misleading representations in the sale of courses of home study instruction for persons intending to take United States Civil Service examinations.

Under the order, the respondents are to cease representing through the use of the word "National," or any similar words, in the corporate or trade name, or in any other manner, that they have any connection with the United States Government, or any of its agencies. The respondents are also to discontinue representing that they are able to secure any advance information with respect to appointments to Civil Service positions which is not available to the general public. The respondents are prohibited from representing that Civil Service positions are always available and that the appointment of the purchasers of the respondents' courses of instruction to such positions is assured or guaranteed by them.

The order also prohibits representations by the respondents that they recommend their students for Civil Service positions and that the recommendations are of value to students seeking such positions. (3304)

Parfums Corday, Inc.—See Chanel, Inc.

Parfums Lengyel, Ltd.—See Chanel, Inc.

Penn Products—See Dr. Ron-Al Medicine Company.

Dr. Penn's Products Company—See Dr. Ron-Al Medicine Company.

Dr. Ron-Al Medicine Company—Irving Sofronski, trading as Dr. Ron-Al Medicine Company, Dr. Penn's Products Company, and Penn Products, 7342 Ogontz Ave., Philadelphia, was ordered to discontinue disseminating misleading representations in the sale of "Dr. Ron-Al's Relief Compound," described as a medical preparation for the relief of delayed menstruation.

The respondent was ordered to cease representing that use of his preparation constitutes a safe, competent or scientific treatment for delayed menstruation, or that its use will have no ill effects upon the user. Sofronski was also ordered to discontinue advertisements which fail to reveal that the use of his preparation may result in serious or irreparable injury to the health of the user.

On petition of the Commission, the United States District Court in Philadelphia on June 30 granted a preliminary injunction prohibiting advertisement of the respondent's product in substantially the same manner as alleged in the Commission's complaint, pending disposition of the case under the Federal Trade Commission Act. (3848)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

Corn-Off Company—Whitney B. Corner, trading as Corn-Off Company, 3306 Club Drive, Los Angeles, agreed to cease representing that "Corn-Off" will "cure" corns or similar formations on the skin or cause them to disappear, or that his product will produce any results in any period of time. The respondent will also discontinue claims that "Corn-Off" will not cause harm or soreness because it contains no acid, ether, or collodion. (02443)

Gruen Instrument Company—T. V. McCormick, trading as Gruen Instrument Company, 7917 Exchange Ave., Chicago, stipulated that he will cease representing that his electric shaving instrument is a "sensational shaving innovation" or is worthy of the name "Gruen" or was "Crafted" by Gruen Instrument Company, or that it is "Guaranteed," when the owner is required to pay for repairs or replacements. The respondent will also cease representing the price of his shaver to be in excess of the usual price for which he has always sold it. McCormick also agreed to discontinue claims that his offer is "for a limited time only" or is a "one time super-value," or that all other forms of expensive advertising have been "eliminated," when such are not the facts. (2547)

Montee Publishing Company, Inc.—Misleading representations in the interstate sale of books and pamphlets of advice on how to play the horses, will be discontinued by Montee Publishing Company, Inc., 511 Oakland Ave., Baltimore, under a stipulation. This company also operates under the name "The Library of Systems." Among its pamphlets are "The World Famous Man O' War Method," "Pittsburgh Phil's Method," "The Pressure Play-Cinch System," and "The Guaranteed 50% System."

"THE WORLD FAMOUS Man O' War Method," according to the stipulation, was advertised as a "well known system, which formerly sold at $500 per copy," now "available to the public for only $2 complete. FULLY GUARANTEED.

This pamphlet, the stipulation continues, was described as being "truly, a wonderful opportunity to obtain a TESTED WINNING SYSTEM at a ridiculously low price. We make this claim and CHALLENGE anyone to disprove it—'That the Man O' War Method will win, on an average, more money per week than any System now in existence' . . . The Man O' War Method breaks down barriers that seem impassable; achieves results you have always wanted. Like the great horse, it overcomes all obstacles and WINS!"

Among other of the respondent's representations, as related in its stipulation, were "The Master Key System . . . it selects more horses that win, more horses that place, and more horses that show than any other method in the world, bar none." . . . "The Trainer's Long Shot System. A non-handicapping system based on pure logic that will produce astounding results. $100 is sufficient capital to start play with. As a matter of fact, $50 would carry you through your worst runs of losers, using the progression plan included, and with ordinary luck, $100 capital will win on an average of $25 or more a week." (02445)

National Casein Company, 601 West 80th St., Chicago, and the co-partners, Louis T. Cook, L. Charles Cook, Thomas H. Cook, and Richard S. Cook, agreed to discontinue using the word "Waterproof," or similar words, so as to imply that their casein glue is impervious to water or its effects, when such is not a fact. (2546)

Perfect Cleaning Fluid Company—Louis Ross, trading as Perfect Cleaning Fluid Company, Cliffside, N. J., agreed to cease representing that his "Perfect Cleaning Fluid" is "invaluable for the removal of stains" from fabrics, or "has no injurious effect on the most delicate material," or that colors of materials dyed with non-fast or fugitive dyes will not be impaired by application of his cleaner, when such are not the facts. The respondent further agreed to discontinue representations that his product will not leave a ring when applied to spots on certain fabrics or materials, when such is not a fact. It was also stipulated that Ross will cease claiming that "Roson," a grease and oil detergent, gets into the very heart of the concrete and "pulls" the precipitate to the surface, dries before you can say "Jack Robinson," leaves a stubborn protective film superior to that left by similar products, or removes all stubborn stains from table-cloths and dresses. (2545)

Rapid River Milling Company—See Tri-State Milling Company.

Sunnie May Quilt Company—Leo F. Sines and A. Mary Sines, trading as Sunnie May Quilt Company, Ridgway, Pa., in the sale of quilts, agreed to cease using any fictitious figures purporting to be the regular prices of their merchandise, or representing that a price offered is a special sales price, when such are not the facts. The respondents further agreed to discontinue claims that their regular prices are in any way special, limited or introductory; that the purchaser will save money by ordering within five days or any other specified time, or will save half the cost of his bedding, or that the respondents own, operate or control factories or make the products sold by them, when such are not the facts. (2549)

Southern California Fish Corporation, Terminal Island, Calif., agreed that it will cease using on its labels, or otherwise, the words, "Italia Tonno" or "Tonno" in connection with any other Italian words, pictorial representation, insignia, or otherwise, so as to imply to purchasers or ultimate consumers that its tuna fish are from the coasts of Italy or were packed in and imported from Italy, when such are not the facts. (2548)

Tri-State Milling Company, also trading as Rapid River Milling Company, Rapid City, S. D., agreed to cease representing in connection with its sale of wheat flour designated as "Trisco Flour" and "Swan's Down Flour," that spring wheat, or Black Hills, South Dakota, spring wheat, or the flour milled therefrom, have greater strength, a higher protein content, or a higher absorption factor, or that they make better looking or finer textured loaves of bread or more loaves of bread per bag than all winter wheats or all brands of winter wheat flour; or that they are superior in these respects to any other wheat or flour having as high a protein content. The respondent will also discontinue representing that "Swan's Down" flour makes more loaves of bread per bag, bakes bread of better texture or appearance than any other brand of flour, or that it contains all of the food elements necessary for health. (02444)

FTC CLOSES CASES

The Federal Trade Commission closed its case against Harry G. Cisin, trading as Allied Engineering Institute, 98 Park Place, New York, who was charged with misleading representations in the sale of radio receiving sets.

The Commission was advised that the respondent had suspended the manufacture and sale of radio receiving sets and discontinued the practices charged in the complaint. On September 19, 1939, he submitted a statement adopting and agreeing to abide by the fair trade practice rules for the radio receiving set manufacturing industry promulgated July 22, 1939, in the future conduct of his radio business.

The Commission also closed its case in which W. A., John, and Henry Nieuwenhuis, trading as W. A. Nieuwenhuis & Sons, Kalamazoo, Mich., were charged with misleading representations in the sale of tulip bulbs.

Both cases were closed without prejudice to the right of the Commission to reopen them and resume prosecution, should future facts so warrant.

NAB Reports
NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 42, October 20, 1939

Regarding Code Compliance

The National Association of Broadcasters on Thursday made public an exchange of letters between Neville Miller and Theodore Streibert, vice president of the Mutual Broadcasting System, concerning the sponsored broadcasts of Elliott Roosevelt on the Mutual network.

On October 7, Mr. Roosevelt publicly stated that he would violate the NAB Code and would express personal opinions on public controversial matters on his commercially sponsored news commentator's program.

After making inquiry, Mr. Miller on October 13 sent the following letter to Mr. Streibert:

"Dear Mr. Streibert: In his sponsored broadcast over the Mutual Broadcasting System on October 7th, Elliott Roosevelt publicly announced that on his broadcast of that evening he would express a personal and editorial opinion about a public controversial issue and that he realized such expression of personal opinion by a news commentator on commercial time was in violation of the NAB Code. I am of the opinion that Elliott Roosevelt in his broadcast did violate the Code, and I am therefore bringing the matter to your immediate attention. I shall appreciate a reply at your earliest convenience. With kindest regards, I am sincerely yours, Neville Miller."

Today, Mr. Miller received the following reply from Mr. Streibert:

"Dear Mr. Miller: With reference to your letter of October 13th, we held a discussion with Elliott Roosevelt yesterday and reached an agreement which was wholly satisfactory. He will eliminate from all his commercially sponsored broadcasts any expression of personal editorial opinion about public controversial issues. Sincerely yours, T. W. Streibert."

Press dispatches from Boston this afternoon, however, stated that Mr. Roosevelt had announced the resignation of the broadcasting stations he operates in Texas from the NAB, because of the "imposition of a ruling barring expressions of personal opinions on public controversial issues on commercially sponsored programs," declaring that this is "censorship in its worst form".

In commenting upon the situation, Mr. Miller said, "We regret that Mr. Roosevelt has seen fit to disregard the Code voluntarily set up by his fellow broadcasters and resign from the Association.

"His statement charging censorship indicates that perhaps he is not fully conversant with the Code and the vital problems of public policy underlying it. There can be no

REGARDING CODE COMPLIANCE

(Continued from page 3779)

charge of censorship or of the curtailment of free speech when all spokesmen are given an equal footing at the radio rostrum, free of charge.

"This provision of the Code not only insures the widest possible use of radio for public discussions, but it insures as well an impartial and fair opportunity to all spokesmen and groups to use its limited facilities and to be subject to debate and challenge should such develop. This is the Democratic way of doing things.

"It is significant to observe that those who are objecting to the Code and who want to continue to buy time for discussions of public controversies, have refused to accept free time offered on programs where another viewpoint may be fully presented.

"Rather than barring them from the air, as has been charged, the Code recognizes their right to speak, but provides that those holding other views shall not be deprived of the right to present those views under similar conditions.

"The point raised in Mr. Roosevelt's October 7 broadcast, however, involves the propriety of injecting personal opinions on a news commentator's broadcast.

"The press of this country has always recognized the necessity of preserving the integrity of its news columns. Personal opinions are reserved for the editorial page. The integrity of radio news is of parallel importance.

"If Mr. Roosevelt wishes to express personal opinions about public controversial matters on the air, there is nothing to prevent him from doing so on the time freely given for the purpose. But, under this Code, no personal opinions can be presented under the guise of news on any news broadcasts, whether sponsored or unsponsored.

"The NAB Code is based upon principles, not personalities. The provisions of the Code shall continue to be administered fairly and impersonally."

Neville Miller will discuss the Code in an address over the Columbia Broadcasting System, Sunday, October 22, 1:35 to 2:00 p. m. (eastern standard time). His remarks will largely center around the provision of the Code which bars the sale of time for the discussion of controversial public issues.

In discussing this section of the Code, Mr. Miller said this week: "I believe that as a result of this policy, we will have more discussions of public matters, more debates and public forums, than at any time since radio's inception. The direct result of this policy will be to insure an impartial and unbiased presentation of controversial issues since all representative spokesmen will be accorded the opportunity to express their opinions, regardless of their financial status. Each will be subject to debate and challenge should such develop. There can be no question of free speech, or of discrimination, when all spokesmen are given an equal footing at the radio's rostum."

Meetings Ahead

The **Board of Directors of Broadcast Music, Inc.,** will meet in New York on Tuesday, October 31, to approve the plan of organization for submission to the SEC.

The **IRNA Executive Committee** will meet in New York on Wednesday and Thursday, November 1-2.

The **NAB Board of Directors** will meet at the Drake Hotel, Chicago, at 10 a. m., November 2, for a two-day session. The date was changed from November 7 because of the conflict with Election Day.

CODE EDITORIALS

Included with this issue of the NAB Reports are a few of the newspaper editorials dealing with the Code. A more complete cross section of press opinion will be published in a future NAB News Review.

WAGE AND HOUR LAW

The Wage and Hour Administration has decided that employers need not cut their employees' regular work week from 44 to 42 hours until the first work week following Tuesday, October 24. In most instances, this will be the week starting Monday, October 30. After the cut, employees should be paid time and one half for all overtime over 42 hours a week. The new regular hourly rate should be determined by dividing the present weekly pay (for 44 hours) by 42. Where employees now work 42 hours or less, the present regular hourly rate will prevail. The new minimum hourly rate is 30 cents. Any questions regarding the change should be directed to the labor relations director at headquarters.

FREE OFFERS

Member stations report the following firms seeking free time for commercial purposes:

American Osteopathic Association
MacFadden Publications
"Your Life" Magazine
Ringling Brothers—Barnum & Bailey Circus.

NAB Bureau of Radio Advertising has advised the above concerns, some of whom are regular advertisers in newspapers, that station acceptance of their requests would constitute violation of the NAB Code of Ethics.

Cost-per-inquiry

The Sterling Insurance Company is seeking to place radio advertising on a contingent basis. NAB has advised this company that their percentage proposition is outlawed under the provisions of the NAB Code. The Bureau of Radio Advertising has invited them to use radio on a regular paid basis.

NEW FLORIDA COPYRIGHT LAW COVERED BY INJUNCTION

A special three-judge court today extended temporary injunction granted April, 1938, with respect to the Florida 1937 copyright monopoly law so as to include Florida's new 1939 law on the grounds that the 1937 and 1939 statutes are both aimed at same evil, that no harm would result from temporarily delaying the operation of 1939 statute and that the balance of convenience lay in deciding constitutionality of both statutes at the same time. The court stated positively that no ruling on the merits of the 1939 statute was to be inferred because of its action in extending the existing temporary injunction to cover the 1939 statute. The court refused to rule on ASCAP's motion to strike the Florida Attorney-General's counter-claim in the 1937 suit which counter-claim asked the court to grant an injunction against ASCAP's operations in Florida as it was a price fixing monopoly. The court reserved its decision until final trial on the merits although ASCAP strongly urged that the counter-claim be stricken immediately. The court indicated that the presentation of evidence and the final determination of the constitutionality of both statutes should be had as quickly as possible.

DISTRICT 17 MEETING

A District 17 meeting in Portland, October 6, endorsed both the NAB Code and the copyright program after considerable discussion of each. C. W. Myers, district president, presided. Joseph L. Miller, NAB labor relations director, was a guest and discussed current labor problems in the industry. Broadcasters present:

C. E. Arney, Jr., KOMO-KJR, Seattle; Robt. E. Priebe, KRSC, Seattle; Ted Kooreman, KALE, Portland; C. Roy Hunt, KOIN, Portland; Art Moore, KIT, Yakima; Larry Kirk, KXL, Portland; Little Harry Read, KSLM, Salem, Oregon; John C. Kendall, Kendall Network, Portland; Geo. Kincaid, KFJI, Klamath Falls, Oregon; Marshall H. Pengra, KRNR, Roseburg, Oregon; Tommy Thomas, KIRO, Seattle; H. J. Quilliam, KIRO, Seattle; Arthur L. Bright, KFPY, Spokane; Harry R. Spence, KXRO, Aberdeen, Wash.; Frank H. Loggan, KBND, Bend, Oregon; Henry N. Fowler, KBND, Bend, Oregon; M. R. Chessman, KAST, Astoria, Oregon; Paul H. Connet, KGW-KEX, Portland; Vernice Irwin, KVI, Tacoma; Earl Irwin, KVI, Tacoma; W. Carey Jennings, KGW-KEX, Portland; Sheldon Sackett, KOOS, Marshfield, Oregon; H. M. Feltis, KOMO, Seattle; Bob McCaw, KRSC, Seattle, Wash.

NOVEMBER EVENTS

Opera Season opens latter part of this month.
Automobile shows to be held first or second week of this month.
November 6-11—Father and Son Week
Education Week
November 7 —Election Day
November 11 —Armistice Day, Ending of World War, 1918
November 11-18—National Fur Week
Red Cross Week
November 12-19—Book Week
November 18 —Congress adopted Standard Time in 1883
November 19 —Lincoln's Gettysburg Address, 1863
November 20-25—Hobby Week
November 23 —Thanksgiving Day in some states
Nov. 27-Dec. 2 —National Prosperity Week
November 30 —Thanksgiving Day in some states.

NEW FCC PUBLICITY CHIEF

The Federal Communications Commission has announced that George O. Gillingham, senior information service representative and chief of the Washington information office of the Tennessee Valley Authority, has been secured on a loan basis from that agency for a period of three months to occupy the position of Chief of the Office of Information of the Communications Commission.

Mr. Gillingham was formerly associated with the Newark (N. J.) Star-Eagle, Newark Sunday Call and covered North Jersey for three Philadelphia dailies, i.e., North American, Press, and Evening Bulletin. He also did feature writing for the New York Sunday World and has had varied experience in magazine work, having contributed articles to Saturday Evening Post, Current History, Bookman, New Yorker, Esquire, etc. At one time Mr. Gillingham was managing editor of the Pathfinder magazine and at the same time edited a department in Golden Book.

Mr. Gillingham was in the military service from 1918 to 1920 and for a time commanded Company K of the 1st Gas Regiment. He is a member of the National Press Club and Past Commander of the National Press Club Post of the American Legion.

Mr. Gillingham will report for full time duty at the Commission on Monday, October 16th.

The Commission also announced that C. Alphonso Smith, who was borrowed from the Soil Conservation Service last December and who has been serving as Acting Director of Information since April 1, 1939, would remain to assist Mr. Gillingham until November 1, 1939, when his leave period expires.

DISTRICT COURT UPHOLDS FCC

United States Court of Appeals for the District of Columbia this week handed down a decision in the case of KWTN of Watertown, South Dakota, against the FCC, in which the Court upheld the Commission.

In this case the FCC charged that the station had operated in violation of the Commission's rules governing the technical operation of broadcast stations and the Commission refused to renew the station's license.

The Court of Appeals in its decision in upholding the Commission's action stated that "the report, findings, and grounds of decision are amply substantiated by the evidence contained in a voluminous record. Appellant does not deny their correctness but does deny that they provide a proper basis for the Commission's decision." The Court's decision says further that "appellant places considerable stress, also, upon the need for broadcasting services in the area served by Station KWTN, and upon the fact that 'No question was raised upon the record with respect to the efficiency of the station's present transmitting equipment and antenna system or the suitability of its site.' These are no doubt important considerations, to be weighed by the Commission in making its determination. But other considerations are important also, including the willingness and ability of the licensee to comply with the law and with the rules and regulations prescribed by the Commission; in order to guarantee so far as possible a wholesome policy in management and operation.

"We think the record in the present case fully justifies the Commission's action in refusing to renew the license."

BROADCAST MEASUREMENTS

During the month of September the Federal Communications Commission experts measured 704 stations with 88 not measured.

Of those measured 648 had a maximum deviation within 0-10 cycles; 48 had a maximum deviation within 11-25 cycles; and 7 a maximum deviation of 26-50 cycles; 1 station had a maximum deviation of over 50 cycles.

PROPOSED FINDING OF FACT

The Federal Communications Commission this week announced its Proposed Findings of Fact proposing to deny the applications of KOH, **Reno, Nevada,** for a construction permit to change present location of transmitter, install new equipment, and change the operating assignment from **1380** with 500 watts power, unlimited time, to **630 kilocycles** with 1 KW, unlimited time, using directional antenna at night. The application of KERN, **Bakersfield, Calif.,** for construction permit to change from **1370 kilocycles,** 100 watts, unlimited time, to **1380 kilocycles,** 1 KW, unlimited time, is contingent upon the grant of the application of KOH, as the frequency requested by KERN is that now used by KOH.

The Commission stated that it is unable to find that public interest, convenience or necessity would be served by the granting of these applications, and "they must therefore necessarily be denied."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases beginning the week of Monday, October 23. They are subject to change.

Monday, October 23

NEW—Yetta G. Samford, C. S. Shealy, Thomas D. Samford, Jr., J. H. Orr, d/b as Opelika-Auburn Broadcasting Co., Opelika, Ala.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

Hearing Before the Committee to Be Held in Room 1411

In the Matter of Amendment of Rules 3.94(a) and 4.10, formerly 177 and 177.1 respectively, on Petition of Mayor LaGuardia of the City of New York.

Tuesday, October 24

NEW—C. L. Weathersbee, W. H. Nichols, C. L. Pickler, E. M. Thompson, d/b as Albemarle Broadcasting Station, Albemarle, N. C.—C. P., **1370 kc.,** 100 watts, daytime.

Wednesday, October 25

WABI—Community Broadcasting Service, Inc., Bangor, Maine.—C. P., **560 kc.,** 1 KW, unlimited time (DA night). Present assignment: **1200 kc.,** 100 watts, 250 watts LS, unlimited time.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.,** 100 watts, unlimited time. Present assignment: **1200 kc.,** 100 watts, specified hours.

Thursday, October 26

Reargument Before the Commission

Report No. I-476:

NEW—Summit Radio Corp., Akron, Ohio.—C. P., **1530 kc.,** 1 KW, unlimited time (DA night).

Report No. I-755:

NEW—Orville W. Lyerla, Herrin, Ill.—C. P., **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Modification of license, **1310 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1210 kc.,** 100 watts, 250 watts LS, specified hours (KFVS).

KFVS—Oscar C. Hirsch, tr/as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Modification of license, **1210 kc.,** 100 watts, 250 watts LS, unlimited time. Present assignment: **1210 kc.,** 100 watts, 250 watts LS, specified hours (WEBQ).

Friday, October 27

NEW—Radio Voice of Springfield, Inc., Springfield, Ohio.—C. P., **1310 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

November 8

NEW—The Gazette Co., Cedar Rapids, Iowa.—C. P., **1420 kc.,** 100 watts, unlimited time.

Hearing to Be Held in Room No. 4, Twelfth Floor, Post Office Building, Boston, Massachusetts

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., **1410 kc.,** 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license (main and auxiliary), **1410 kc.,** 1 KW, 1 KW LS (main), *500 watts, 1 KW LS (auxiliary), unlimited time. *Auxiliary purposes only.

November 27

WINS—Hearst Radio, Inc. (Assignor), Metropolitan Broadcasting Corp. (Assignee), New York, N. Y.—Voluntary assignment of license, **1180 kc.,** 1 KW, limited time (KEX and KOB).

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Renewal of license, **1290 kc.,** 100 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted C. P. to install new equipment and increase power to 250 watts, unlimited time.

KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Granted C. P. to move transmitter site locally, make changes in equipment, install vertical radiator and increase power from 100 watts to 250 watts.

KHBC—Honolulu Broadcasting Co., Ltd., Hilo, Hawaii.—Granted modification of license to change frequency from **1400** to **1200 kc.**

KSUN—Copper Electric Co., Inc., Lowell, Ariz.—Granted modification of license to increase night power to 250 watts.

WCLE-WEHB-WEHB-WEHF—Cleveland Radio Broadcasting Corp., Cleveland, Ohio.—Granted assignment of licenses from Cleveland Radio Broadcasting Corp. to United Broadcasting Company (1 broadcast Station, WCLE, and three relay stations).

WHK-W8XNT-W8XE-WEHX-WEHV-WHU—Radio Air Service Corp., Cleveland, Ohio.—Granted assignment of broadcast station license WHK, high frequency station W8XNT, facsimile station W8XE, and relay stations WEHX, WEHV and WEHU, to the United Broadcasting Company.

WHKC—Associated Broadcasting Corp., Columbus, Ohio.—Granted assignment of broadcast station license for station WHKC to the United Broadcasting Company.

NEW—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Granted C. P. for new station to operate on **1420 kc.,** 250 watts, unlimited time, exact transmitter studio site and type of antenna to be determined with Commission's approval.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearing have not yet been set.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Designated for hearing, before Commissioner Case, the application of WHDH for modification of license and C. P. to operate unlimited time on the clear channel frequency **830 kc.,** with 5 KW.

NEW—Broadcasting Corp. of America, Riverside, Cal.—Application for C. P. for new station to operate on **1390 kc.,** 1 KW, unlimited time (request contingent on station KOY change in frequency).

NEW—R. B. Terry, D. A. Hawley, Stanley A. Cook and Rudy Fonville, d/b as Burlington Broadcasting Co., Burlington, N. C.—Application for C. P. for new station to operate on **1420 kc.,** 100 watts daytime, exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period: KRNT, Des Moines, Iowa; KSO, Des Moines, Iowa; WAGA, Atlanta, Ga.; WDRC, Hartford, Conn.; WHAZ, Troy, N. Y.; WKBW, Buffalo, N. Y.; WNBC, New Britain, Conn.; WJSV, Washington, D. C.; WOKO, Albany, N. Y., and auxiliary; WTAQ, Green Bay, Wis.; KABR, Aberdeen, S. D.; KGNC, Amarillo, Texas; KGMB, Honolulu, Hawaii; KHBC, Hilo, Hawaii; KIDO, Boise, Idaho; KFH, Wichita, Kans.; KTUL, Tulsa, Okla.; WFBC, Greenville, S. C.; WHOM, Jersey City, N. J.

The following stations were granted renewal of licenses for the period ending June 1, 1940: KGGM, Albuquerque, New Mexico; WDSU, New Orleans, La.; WHBF, Rock Island, Ill.; WHBI, Newark, N. J.; WNEW, New York, N. Y.

The following station was granted renewal of license for the period ending April 1, 1940: (High Frequency Broadcast Station) W4XBW, Chattanooga, Tenn.

The following stations were granted renewal of licenses for the period ending October 1, 1940: (Relay Broadcast Stations) KABE, National Battery Broadcasting Co.; KAIE, National Battery Broadcasting Co.; WABV, Juan Piza; KNEF, Radio Service Corp. of Utah; WAXH, Savannah Broadcasting Co., Inc.

MISCELLANEOUS

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from 8:00 p. m. to 9:30 p. m., EST, on October 11, 1939, using 100 watts power, in order to broadcast testimonial dinner speeches in honor of Charlie Keller.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted extension of special temporary authority to operate with 5 KW power night, using directional antenna, for the period beginning October 12, 1939, and ending in no event later than November 10, 1939, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.,** reduces power so that additional interference is not involved, or until defective directional system of CMQ is corrected by installing new tuning condensers.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9:00 a. m. to 10:00 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period beginning October 31, 1939, and ending in no event later than November 29, 1939, in order to broadcast educational programs.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent from 2 p. m. to 3 p. m. on November 1, 2, 7, 8, 9, 14, 15, 16, 21, 22, 23, 28 and from 3 p. m. to 3:30 p. m. on November 6, 13, 20, 27, and from 9:15 p. m. to 10 p. m. on November 14, 1939, in order to permit Station WNAD to broadcast special educational programs; to operate from 8:15 p. m. to 9:15 p. m., November 29 and 7:15 p. m. to 9:15 p. m., CST, on November 30, 1939, in order to permit WNAD to remain silent during Thanksgiving vacation; to operate from 7:15 p. m. to 9:15 p. m., CST, on November 2, 1939, in order to broadcast football game (provided WNAD remains silent).

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 p. m. to 3 p. m., on November 1, 2, 7, 8, 9, 14, 15, 16, 21, 22, 23, 28, 3 p. m., to 3:30 p. m., on November 6, 13, 20, 27 and 9:15 p. m. to 10 p. m. on November 14, in order to broadcast special educational programs (provided KGGF remains silent); to remain silent from 8:15 p. m. to 9:15 p. m., on November 29 and from 7:15 p. m. to 9:15 p. m., CST, on November 2, 1939, in order to allow KGGF to broadcast special football game.

National Broadcasting Co., Inc., New York, N.Y.—Granted special temporary authority to rebroadcast program material to be received from Forestry Service radio stations in the northwestern part of the U. S. over Radio Stations KGO and KPO and affiliated network stations of the NBC, for a period not to exceed 30 days, in order to educate the public on fire prevention and describe activities of the Forestry Service personnel in the control of fires when they develop.

The Commission has dismissed the application of WGRC, **New Albany, Indiana,** to change its frequency from **800** to **880 kilocycles** and from daytime to unlimited time operation "without prejudice", but has denied the motion "to continue date for oral argument."

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Granted petition to continue hearing on application for renewal of license from October 20 to November 27.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted motion for continuance of hearing on application for C. P. to change frequency and increase power, from November 2, for at least 30 days, new date to be fixed by Secretary's Office.

NEW—Hazlewood, Inc., Orlando, Fla.—Granted petition for leave to amend application to reduce night power from 1 KW to 500 watts, and hearing scheduled for December 11, cancelled.

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Granted special temporary authority to operate with power of 250 watts from local sunset (Oct. 5:15 p. m., CST), to 8 p. m. on October 14, in order to furnish maximum local coverage of the Calif.-Ill. football game.

WSAJ—Grove City College, Grove City, Pa.—Granted special temporary authority to operate between the hours of 2 and 5:30 p. m., EST, on Oct. 21, 28, Nov. 18, in order to broadcast football games only.

WSPD—The Fort Industry Co., Toledo, Ohio.—Granted special temporary authority to operate from 2 to 3 a. m., EST, on Oct. 15, with 5 KW, in order to broadcast a special "DX Program" conducted in connection with the Newark News Radio Club's special program entitled "Parade of Ohio."

WLOK—The Fort Industry Co., Toledo, Ohio.—Granted special temporary authority to operate from 8 to 10:30 p. m., EST, on Oct. 20, 26 and Nov. 10, in order to broadcast football games.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from local sunset (Oct. 5:45 p. m., EST) to midnight on Oct. 25, power 250 watts, in order to broadcast celebration of first anniversary of the opening of Radio Station WPIC.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Granted special temporary authority to use ultra high frequency transmitter authorized to be used by Television Broadcast experiment station W2XDR, by Facsimile Broadcast Station W2XR, for a period not to exceed 30 days, pending action on Modification of license for W2XR.

W1XKB—Westinghouse Elec. & Mfg. Co., East Springfield, Mass. —Granted license to cover C. P. for high frequency broadcast station; frequency **42380 kc.,** power 1000 watts; granted upon an experimental basis only, conditionally.

W1XSN—Westinghouse Elec. & Mfg. Co., East Springfield, Mass. —Granted license to cover C. P. for high frequency broadcast station; frequency **42600 kc.,** power 1000 watts; granted upon an experimental basis only, conditionally.

WMOG—Coastal Broadcasting Co., Brunswick, Ga.—Granted Modification of C. P. for approval of studio and transmitter site, installation of vertical radiator and changes in authorized equipment.

WFIG—J. Samuel Brody, Sumter, S. C.—Granted modification of C. P. for approval of studio and transmitter sites, changes in authorized equipment and installation of vertical radiator.

KGCX—E. E. Krebsbach, Wolf Point, Montana.—Granted authority to install automatic frequency control in station KGCX.

WFAA—A. H. Belo Corp., Dallas, Texas.—Granted authority to determine operating power by direct measurement of antenna input.

NEW—International Broadcasting Corp. (New York, N. Y.), Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station; frequency **31200, 35620, 37020, 39260 kc.,** power 10 watts.

NEW—International Broadcasting Corp. (New York, N. Y.), Portable-Mobile.—Granted C. P. for new high frequency relay broadcast station; frequency **31200, 35620, 37020, 39260 kc.,** power 2 watts.

NEW—International Broadcasting Corp. (New York, N. Y.), Portable-Mobile.—Granted license to cover above C. P.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted extension of special temporary authority to operate unlimited time with 1 KW for the period beginning October 17, 1939, and ending in no event later than November 15, 1939, in order to broadcast civic, charitable, religious, educational, fraternal, and commercial programs, and news of national and international events of extreme local interest, both of local origin and from the Columbia Broadcasting System.

WDGY—Dr. George W. Young, Minneapolis, Minn.—Granted extension of special temporary authority to operate evenings (LS Oct. 5:30 p. m. and Nov. 4:45 p. m., CST), for the period beginning October 15, 1939, and ending in no event later than November 13, 1939, in order to broadcast civic, charitable, religious, educational, fraternal, and commercial programs of outstanding interest, and in order to carry programs of great local interest from the Mutual Broadcasting System.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from (Oct. 6:15 p. m. and Nov. 5:45 p. m., EST) to 9 p. m., EST, for the period beginning October 15, 1939, and ending in no event later than November 13, 1939, in order to broadcast political, local, and network programs as described in letter dated October 2, 1939.

W9XTA—Schonert Radio Service, Harrisburg, Ill.—Denied motion to dismiss application for renewal of license of station W9XTA without prejudice, and denied application as in default.

NEW—Cascade Broadcasting Co., Inc., Everett, Wash.—Granted motion insofar as it requests leave to file an amended application seeking a different operating assignment (original application was for **1420 kc.,** 100 watts night, 250 watts LS, unlimited time), and removed the application in its original form from hearing docket.

NEW—G. E. Palmer, Hot Springs, Ark.—Denied petition for rehearing and for intervention therein in re application of Hot Springs Broadcasting Company, Hot Springs, Ark., for new station to operate on **1310 kc.,** 100 watts night, 250 watts LS, unlimited time, granted by the Commission, without hearing, on July 26, 1939.

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate additional time on November 5, 12, 19, and 26, in order to broadcast church services only, and on November 10, 17, 30, in order to broadcast football games only, using 100 watts only.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Denied special temporary authority to operate from local sunset (Oct. 5 p. m. and Nov. 4:30 p. m., EST) to 6 p. m., EST, for the period October 17 to November 15, in order to broadcast outstanding local, civic, educational, charitable, religious, and commercial programs.

KUMA—Albert H. Schermann, Yuma, Ariz.—Denied special temporary authority to operate from 10:25 to 11 a. m., MST, on Tuesdays and Thursdays, for a period not to exceed 30 days, in order to broadcast public school programs.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Scheduled oral argument to be held November 2, 1939.

KUMA—Albert H. Schermann, Yuma, Ariz.—Granted special temporary authority to operate additional time to broadcast football games only, on October 20 and November 3 and 16, 1939.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted special temporary authority to operate from local sunset (Nov. 4:30 p. m., EST) to midnight on November 7, in order to broadcast election returns; to completion of game on November 18, in order to broadcast Dartmouth-Cornell football game; to midnight on November 21, in order to broadcast primary election returns, using 1 KW power.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from local sunset (Nov. 5 p. m., EST) to midnight, with power of 250 watts, on November 7, in order to broadcast city, county, and state election returns, and to occupy lulls between election bulletins with recordings and transcriptions in order to hold audience.

NEW—Lawrence J. Heller, Washington, D. C.—Adopted proposed findings (No. B-67), entered on September 13, 1939, denying without prejudice the application for a new station in Washington to operate on **1310 kc.**, with 100 watts night, 250 watts LS, unlimited time, and for special experimental authorization to construct and operate a synchronous station to be used in conjunction with the facilities requested in C. P., using 10 to 100 watts power, unlimited time. The order in this case will become effective October 19, 1939.

WAGF—Dothan Broadcasting Co., Dothan, Ala.—Granted special temporary authority to operate additional time on October 27 in order to broadcast Dothan High School-Sidney Lanier High School football games only.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate additional time simultaneously with station KICA, on October 20, 27, November 3, 10 and 17, in order to broadcast the Roswell High School football games only.

KGKO—KGKO Broadcasting Co., Fort Worth, Tex.—Granted special temporary authority to rebroadcast program written by Army Air Corps Public Relations Office, Randolph Field, Texas, to be received from an Army airplane, call letters RW-9, operating on frequency **3415 kc.**, over station KGKO from 5 to 5:15 p. m., CST, on October 24.

W8XNU—The Crosley Corp., Cincinnati, Ohio.—Granted special temporary authority to operate the transmitting apparatus of high frequency broadcast (exp.) station W8XNU (located at the southeast corner Warner and Chickashaw Streets, Cincinnati), for the period October 18 to November 13, in order to make mechanical improvements in antenna and transmitting equipment.

APPLICATIONS FILED AT FCC

550 Kilocycles

WKRC—Columbia Broadcasting System, Inc., Cincinnati, Ohio.—Voluntary assignment of license from Columbia Broadcasting System, Inc., to The Cincinnati Times-Star Co.

570 Kilocycles

WMAM—M & M Broadcasting Co., Marinette, Wis.—License to cover C. P. (B4-P-2130) for new station.

KGKO—KGKO Broadcasting Co., Fort Worth, Tex.—Authority to determine operating power by direct measurement of antenna power.

WWNC—Asheville Citizen Times Co., Inc., Asheville, N. C.—Authority to determine operating power by direct measurement of antenna power.

610 Kilocycles

WIP—Pennsylvania Broadcasting Co., Inc., Philadelphia, Pa.—C. P. to install new transmitter; increase power from 1 KW to 5 KW; move transmitter from 21st and Hamilton Sts., Philadelphia, Pa., to east of Brooklawn, N. J., 0.5 mile southeast of intersection of Kings Highway and Route 45, 6.2 miles southeast of City Hall, Philadelphia, Pa. Install DA for day and night use. Amended re antenna changes.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—License to cover C. P. (B-P-2129 and B-MP-693) for new station.

640 Kilocycles

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—License to cover C. P. (B4-P-2402) for changes in equipment and move of studio and transmitter sites. Amended re frequency check.

680 Kilocycles

WPTF—WPTF Radio Co., Raleigh, N. C.—Modification of license to change hours of operation from limited to unlimited time, using directional antenna from sunset at San Francisco, Calif.

870 Kilocycles

WENR—National Broadcasting Co., Inc., Chicago, Ill.—Authority to determine operating power by direct measurement.

WEGI—The Baltimore Radio Show, Inc. (Portable-Mobile), (Baltimore, Md.).—License to cover C. P. (B1-PRE-282) to make changes in equipment and increase power from 1 watt to 2 watts.

WEGJ—The Baltimore Radio Show, Inc. (Portable-Mobile), (Baltimore, Md.).—License to cover C. P. (B1-PRE-283) to make changes in equipment and increase power from 1 watt to 2 watts.

NEW—The Yankee Network, Inc., north of Alpine, N. J.—Construction permit for a new high frequency broadcast station at north of Alpine, N. J., on **43000 kc.,** 50 KW power, special emission.

NEW—The Yankee Network, Inc., Mount Washington, N. H.—Construction permit for new high frequency broadcast station on summit of Mount Washington, N. H., on **42600 kc.,** 5 KW power, special emission.

WAIN—Peoria Broadcasting Co., area of Peoria, Ill.—License to cover C. P. (B4-PRY-189) for new relay station.

W9XAL—First National Television, Incorporated, Kansas City, Mo.—Modification of license for change in frequencies from **42000-56000, 60000-86000 kc.** to **44000-50000 kc.,** in accordance with new rules.

WHPT—Radio Station WMFR, Inc., High Point, N. C.—Modification of C. P. (B3-PRY-168) for replacement of transmitter.

NEW—WCAU Broadcasting Co., Philadelphia, Pa.—Construction permit for new television station located at site to be determined, Philadelphia, Pa., on **78000-84000 kc.,** 1 KW power, A-5 emission, unlimited time. Amended to add A-3 for aural broadcast and add aural transmitter.

W9XK—University of Iowa, Iowa City, Iowa.—Modification of license to request frequency band **210000-216000 kc.,** and make changes in equipment.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Tobacco Company, New York, has been served with a complaint alleging violation of the Robinson-Patman Act in the sale of tobacco products.

The complaint alleges that the respondent company discriminated in price between different purchasers of its products of like grade and quality by including in sales to certain customers and not to others, so-called free goods for which no specific charge was made. It is alleged that the amount which the favored retail distributors paid for the tobacco products included in such orders was, by reason of the so-called free goods, substantially less than the amount which competing retailers paid for an equal quantity of the respondent's products of like grade and quality.

It is alleged that The American Tobacco Company compensated certain distributors, such as chain stores and other retailers, for furnishing services and facilities such as counter and window displays of the respondent's products. Such payments, it is alleged, were not available to other competing distributors.

To some jobbers, the respondent is alleged to have allowed a longer period for payment at a 2 per cent cash discount than the 10 days usually allowed to others for payment at the same discount. This allowance of time allegedly constituted a service to American Tobacco Company's customers which became of greater value as the length was extended.

The complaint charges that the respondent has established the relationship of seller and customer between it and retail tobacco distributors by means of its many dealings with them and particularly through the medium of its salesmen or "missionary men." (3927)

Charles of the Ritz Distributors Corp.—In a complaint, Charles of the Ritz Distributors Corporation, 9 University Place, New York, was charged with the dissemination of misleading representations in the sales of "Charles of the Ritz Rejuvenescence Cream."

According to the complaint, the respondent untruly represented that its cosmetic preparation will rejuvenate the skin of the user and restore youth and the appearance of youth to skin to which it is applied, regardless of the condition of the skin or the age of the user, when such are not the facts. (3923)

Federal Yeast Corporation—A complaint has been issued against the Federal Yeast Corporation, Colgate-Highlandtown, Baltimore, charging it with price discrimination in violation of the Robinson-Patman Act.

According to the complaint, the respondent has been discriminating in price by allowing to certain purchasers of its bakers' yeast used in the manufacture of bread and allied products, different prices than allowed other of its competing purchasers for products of like grade and quality. It is alleged that further discrimination in price between different competing purchasers of its products is brought about as a result of the respondent's delivering, without specific charge, large quantities of bakers' yeast to certain of its purchasers, in addition to yeast actually sold to these same customers, thus reducing the cost to favored purchasers of the yeast actually bought, while at the same time not furnishing such additional yeast to other competing purchasers who pay the same price per pound for the product. The respondent also has allegedly been granting cash discounts of 1 per cent to 2 per cent to certain of its purchasers and not to others who pay in the same manner and within the same time as those receiving such discounts. (3926)

Fine-Crahan Candy Company—In a complaint issued against Fine-Crahan Candy Company, 222-224 West Fourth St., Oklahoma City, the company was charged with the use of lottery schemes in the sale of candy.

According to the complaint, the respondent supplied dealers with push cards for use in the sale and distribution of its candy by means of a lottery scheme. (3925)

Liggett & Myers Tobacco Company, Inc.—Two additional complaints against tobacco companies alleging violation of the Robinson-Patman Act have been issued. Respondents are Liggett & Myers Tobacco Company, Inc., New York, and Stephano Brothers, Philadelphia.

Price discrimination is alleged to have taken place in connection with the Liggett & Myers company's practice of including in sales to certain customers and not to others, so-called free goods for which no specific charge was made. It is alleged that the amount which the favored retail distributors paid for the tobacco products included in such orders was, by reason of the so-called free goods, substantially less than the amount which competing retailers paid for an equal quantity of the respondent's products of like grade and quality.

To some jobbers, the Liggett & Myers company is alleged to have allowed 60 days for payment at a 2 per cent cash discount, while generally to others 10 days was allowed for payment at the same discount. This allowance of time allegedly constituted a service to the respondent's customers which became of greater value as the length was extended.

It is alleged that both respondents compensated certain distributors, such as chain stores and other retailers, for furnishing services and facilities such as counter and window displays of the respondent's products. Such payments allegedly were not available to other competing distributors.

The complaints allege that the respondents have established the relationship of seller and customer between them and their "indirect buying customers" who are not on their "direct list" by means of their many dealings with them and particularly through the medium of their salesmen or "missionary men."

For illustration of a common practice in this connection, the complaint against Liggett & Myers recites that on January 12, 1939, one of this company's missionary men sold to Indianapolis retail distributors "not on direct list," "Velvet Tobacco" at $1.12 a dozen, with one package free with each dozen, or at approximately $1.03½ a dozen, when its standard price to jobbers in that city was about $1.12½ per dozen. It is alleged that Liggett & Myers thus sold to such retail disttributors at a lower price than it was selling the same tobacco in the same and larger quantities to Indianapolis jobbers. Such retailers, it is alleged, were thus enabled to sell at 10 cents each package of "Velvet Tobacco" advertised as the "regular 15 cent size." (3921-3922)

Stephano Brothers—See Liggett & Myers Tobacco Company, Inc.

Von Schrader Manufacturing Company—In a complaint, Von Schrader Manufacturing Company, Racine, Wis., was charged with the dissemination of misleading representations in the sale of an electric machine designed "Von Schrader Portable Carpet Washer."

According to the complaint, the respondent represented directly or by implication that its carpet washers remove germs and microbes from carpets and rugs, and restore and renew the colors and shades of carpets and rugs, when such are not the facts.

The respondent allegedly also advertised that purchasers of its carpet washers normally earn $200 a week, $400 a month and various similar sums, when in truth the earnings of such persons are substantially less than these amounts. (3924)

White King Soap Company—In a complaint, White King Soap Company, 617 East First St., Los Angeles, was charged with the dissemination of misleading representations in the sale of "White King Granulated Soap" and "White King Toilet Soap."

According to the complaint, the respondent misleadingly represented that White King Granulated Soap, a laundry soap, is the only soap with which articles can be satisfactorily washed in cool water and in water at 98 degrees temperature; that it is three times as efficient in the cleansing of articles as other soaps; that its use in washing textiles removes the necessity for use of bleaching and bluing, and that it will remove all spots and stains from articles, when such are not the facts. Further alleged misleading representations are that White King Granulated Soap prevents fine fabrics from fading or shrinking; that its ingredients are superior to that of all other soaps; that the washing of clothes in cool water causes them to be brighter and whiter than washings in hot water, and that the washing of fabrics in hot water injures the fabrics and causes them to shrink, when such are not the facts.

The complaint also charges the respondent with having untruly advertised that the use of White King Toilet Soap keeps the skin fresh and supple regardless of the age or condition of the skin of the user, and that it prevents and removes wrinkles, when such is not the case. (3928)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Coty, Inc., Wilmington, Del., and Coty Products Corp., 423 West 55th St., New York, were ordered to discontinue misleading representations in the sale and distribution of perfume.

Under the order, the respondents are to cease representing through the use of the term "Paris" or "Paris, France," or of any other terms, symbols, or picturizations indicative of French or other foreign origin of such product, or in any manner, that perfumes which are made in the United States are made in France, or in any other foreign country, provided that the country of origin of the various ingredients may be stated when immediately accompanied by an explanation that such product is made in the United States. The order further prohibits use of any French or other foreign terms to refer to perfumes made in the United States, unless the English translation or its equivalent appears as conspicuously and in immediate conjunction therewith.

The respondents are also ordered to cease using the terms "Coty, Parfums de Luxe" or any other French or other foreign words as brand or trade names for perfumes compounded in the United States, without clearly and conspicuously stating that such products are compounded in the United States.

Due to the dissolution of Coty Processing Co., Inc., Coty, Inc., of New York, Coty Company, Ltd., a Maryland corporation, Coty Company, Ltd., a Tennessee corporation, Coty California Corporation, Coty New Jersey Corporation and Coty Sales Corporation, the Commission closed its case against these concerns, without prejudice to its right to reopen it and resume prosecution, should future facts so warrant. (3325)

Coty Products Corp.—See Coty, Inc.

Cuban Health Products, Inc., 125 E. Kalamazoo St., Lansing, Mich., has been ordered to discontinue misleading representations in the sale of "El Aquinaldo Cuban Honey."

Under the order, the respondent is to cease advertising that its product is a cure for coughs, colds, asthma, bronchitis, or similar respiratory disorders, and is a treatment for such conditions other than as a palliative for coughs due to local throat irritations or for local irritations of the nose. The order further prohibits representations that the respondent's product is a cure or treatment for stomach ulcers, other than as a bland food where a bland diet would be prescribed. (3733)

Dewberry Engraving Company—Ralph Dewberry, trading as Dewberry Engraving Company, Birmingham, Ala., has been ordered to discontinue unfair disparagement of competitors' products in the sale of engraved stationery, business and social cards and allied products.

Findings of the Commission are that the respondent distributed to prospective customers letters containing, in part, the following:

> "You will be disappointed if you read this letter— . . . Disappointed in the price you have been 'soaked' for engraving in the past. Not that your engraver could really help charging you so much; with old-style, out-of-date equipment, he had to get a high price.
>
> "Our prices are the LOWEST in the United States because we have the most modern plant in the country and specialize on engraved stationery. . . ."

Further findings show that the pantograph method of engraving, used by approximately 90% of the engravers in this country, and which is particularly disparaged by the respondent, is not accomplished with "old-style," "out-of-date" or obsolete equipment.

Under the order, the respondent is prohibited from representing that engraving produced from plates incised by hand or by the pantograph method or by any method other than that used by the respondent is old-style, out-of-date, antiquated or inferior. (3135)

Ward Manufacturing Company—Ward M. Jones and John H. Jones, trading as Ward Manufacturing Company, 109 East Milwaukee Ave., Detroit, have been ordered to discontinue misleading representations in the sale of "Hydro-Flue," a flue attachment to be used instead of stove pipes in gas ranges.

Findings of the Commission are that the respondents misleadingly represented that their device is the only satisfactory flue attachment on the market, when, in truth, it is sold in competition with similar devices. Further findings are that the respondents claimed their device constitutes a safe substitute for stove pipes on gas ranges, when actually there is no device which will effectively remove carbon monoxide fumes from the products of combustion emitted by gas-burning appliances.

Under the order, the respondents are prohibited from representing that "Hydro-Flue," or any similar device, is the only attachment which is a satisfactory substitute for stove pipes on gas ranges; that its use is safe, or that it eliminates or removes the carbon monoxide gas emitted by gas ranges. (3509)

STIPULATIONS

The Commission has entered into the following stipulations:

Birnbaum Company—Maurice Birnbaum, trading as Birnbaum Company, 20 Bond St., New York, agreed to cease representing that his products, such as zipper key ring cases, are made of leather when such is not a fact. If the products are made in substantial part of leather and in part of some other material, and the word "leather" is used to describe such leather content, then the word "leather" shall be accompanied by some other words printed in equally conspicuous type so as to indicate clearly that such products are not composed wholly of leather or that they are composed in part of a material other than leather. (2551)

Chabbott's—Joseph Chabbott and Julius Chabbott, trading as Chabbott's 941 F Street, N. W., Washington, D. C., stipulated that they will cease representing that banquet cloths or other articles consisting of cotton filet laces made in China to imitate Tuscany Lace are in fact "Tuscany Lace." (02449)

Floradex Company—See Van De Mark Advertising, Inc.

International Importing Company, Inc., 322 Tremont St., Boston, agreed to cease representing that its "Agorole Olive Oil" is packed and certified by the Olive Oil Institute of America, or any other "institute," unless it is actually certified and packed by an "institute" properly so constituted; that its product is the only "certified" Greek virgin olive oil, or the only "certified" virgin olive oil in America, or that it contains vitamins B, D and E. The respondent also agreed to discontinue representations that refined olive oil contains no vitamins; that "Agorole Olive Oil" contains any specific medicinal ingredients; that its product is a treatment for ulcers of the stomach and gall bladder disorders, or that authorities do not recognize the difference between refined and virgin olive oil. (02448)

Joseph M. Julian Company, trading as Marney Food Company and Dr. Marney's Animal Food Company, Huntington Park, Calif., entered into a stipulation to discontinue misleading representations in the sale of "Marco," a dog food. (2446)

Marney Food Company—See Joseph M. Julian Company.

Dr. Marney's Animal Food Company—See Joseph M. Julian Company.

William C. Moore & Co., Inc., Newark, N. Y., stipulated that in connection with its sale of nursery stock through agents and salespersons, it will cease representing that all persons, regardless of age, sex, location, education, experience or business qualifications, can succeed as its salespersons. Further representations to be discontinued are that the free "Salesmanship and Landscape Lessons," given by the respondent to its salespersons, imparts a knowledge of landscape work that enables even the most inexperienced men to properly advise owners in regard to location, planting and ordering of correct trees, shrubs or vines. The respondent will also cease representing by the use of the phrase "must be satisfied with $35 weekly at the start" or in any other manner, that it has a vacant position consisting of landscape work and handling orders for old and new customers carrying a definite salary of $35 weekly to be paid from the start to the person selected to fill such vacancy. (02446)

Plymouth Electric Dry Shaver Company—Bernard Cohen, trading as Plymouth Electric Dry Shaver Company and Plymouth Electric Supply Company, 2013A Jerome Ave., New York, agreed to cease representing that his electric shaver is of any value in excess of the price for which the same or similar instruments may be available in the retail market in the usual course of business; that it is in any way comparable to the high grade electric shavers on the market; that the instrument is guaranteed unless clear disclosure is made of exactly what is offered by way of security; that exaggerated earnings may be expected by sales persons, or distributors of his merchandise, or that any article is given free when such offer is contingent upon any condition not clearly disclosed. It was also agreed that the respondent will discontinue supplying others with lottery devices to be used in the sale of any merchandise, or selling any merchandise by means of lottery devices. (2550)

Plymouth Electric Supply Company—See Plymouth Electric Dry Shaver Co.

Silver Knit Hosiery Mills, Inc., High Point, N. C., agreed to discontinue use of the word "silk," alone, or with any other words, in any way to represent hose which is not composed of silk. The respondent further agreed to cease using the words "Silk and Rayon" or "Rayon and Silk" to describe hose which is not composed of the two fibers. The stipulation provides that if the body or leg of the hose is composed of silk, or of silk and rayon, or rayon and silk, with the top, heel, toe and sole of the hose composed of fibers other than those named, and the words "Silk," "Silk and Rayon," or "Rayon and Silk" are used to properly describe such body or leg, then such terms shall be prominently accompanied by other words clearly indicating that the hose is not composed wholly of silk, silk and rayon, or rayon and silk. If the hose, or a portion of it, is composed of silk and rayon, and these fiber names are used to describe the hose or a portion of it, then the names of the fibers shall be arranged in the order of their predominance by weight, as for example, "Rayon and Silk" where the rayon predominates. The respondent also agreed to cease using the word "linen," either alone or in connection with the words "Pure Irish," or with any other words, as descriptive of hose, or any portion of it, which is not composed of linen. (2552)

Ta-Kay Laboratories—Charles A. Thayer, trading as Ta-Kay Laboratories, and T-K Laboratories, Topeka, Kans., agreed to cease advertising that "Ta-Kay" or any similar medicinal preparation, is an effective treatment for eczema, inflammation of the skin due to any but minor superficial causes, hickies, itching skin conditions, insect bites, sore hands, pimples, rash, scabies, athlete's foot, hives, or shingles, or that it will do more than temporarily relieve itching irritations and minor pains where due to or associated with superficial skin conditions, or caused by or associated with the above disorders. (02450)

T-K Laboratories—See Ta-Kay Laboratories.

Van De Mark Advertising, Inc., Times-Star Tower, Cincinnati, Ohio, has entered into a stipulation to discontinue misleading representations in the advertisement of "Floradex," a medicinal preparation distributed by Harold T. Maloney, trading as Floradex Company, Columbus, Ohio.

This is the third case in which an advertising agency has entered into a stipulation with the Commission to discontinue misleading representations in connection with the advertising copy of one of its accounts.

The agency agreed to cease disseminating advertisements which represent directly or by implication that "Floradex" is a treatment for constipation; is marvelous or new; will keep a person from being sick; will restore or build health; will enable one to gain vim and vigor, or that it is beneficial in removing the cause of most common ailments. The respondent further agreed to cease representing that constipation is the factor behind most human ills and ailments, and to discontinue using the word "Food," or any similar words, so as to imply that the preparation has any food value.

Harold T. Maloney had previously entered into a stipulation with the Commission in which he agreed to discontinue the practices in the same manner as set forth in this stipulation. (02447)

FCC Chairman Commends Code

James Lawrence Fly, chairman of the FCC, commended the NAB Code this week, saying that its adoption was "an example of democracy at work".

"Democracy can hardly mean either in a game or in a form of Government that those who have adopted the regulations will abide by them only so long as they serve their own particular interest," Mr. Fly said in a CBS broadcast Thursday night.

"Any set of regulations, even when self-imposed is apt at some point along the line to apply to every particular person who has adopted the regulation. No one particularly enjoys the regulation the moment it restricts his own activity; but still, he should be capable of reviewing the over-all benefits which may be derived from a comprehensive and effective set of rules applicable to all alike. But control of radio in the public interest is more serious than any game."

Mr. Fly had preceded these remarks by saying that "it may be obvious that even self-regulation, voluntarily imposed, may at times *actually regulate.*"

"We are reminded of the boy, who, understanding the problem, gets with a group and decided upon the rules of the game which shall be applicable to all concerned," he said. "Thereafter, when one of the particular rules has its impact upon his own conduct, and the boy breaks up the game, picks up his playthings and goes home, he is hardly displaying the highest type of sportsmanship".

Here is the full text of Mr. Fly's remarks which the NAB is certain will be of interest to all broadcasters:

As you all know, the art of radio broadcasting is still young. Virtually unknown during the World War, radio has developed tremendously in the past two decades. Its march has been strong and vibrant. The swift movement in the scientific phases of radio has been such that we have a tendency to overlook the tremendous impact of the radio as a social force.

It is therefore essential not only that we recognize radio as a great scientific achievement, but also be conscious of its great impact upon the lives and upon the pattern of thought of the people themselves. We all recognize the importance of having the radio serve a genuine public interest and of avoiding subservience to forces peculiarly selfish in nature.

The forward march in the art of the radio has presented to us concretely the problem of utilizing this public facility to accomplish the greatest good for the most people. Important issues have thus arisen.

It hardly behooves anyone to speak in a tone of finality, particularly where, as in my own case, the speaker does not have a thorough-going background in the field. It may be suggested that no one with due regard for the gravity of the problems, can set himself before the world as having power promptly and finally to adjudge all the serious problems of radio policy.

By the same token, many of the existing *rules* to govern practices in radio operations cannot be deemed the ultimate guide for the conduct of broadcasting activities. The industry is young; technicallly, it moves forward from day to day. We all have much to learn. It must be

FCC CHAIRMAN COMMENDS CODE

(Continued from page 3791)

true, therefore, that any rule or set of rules can hardly be deemed unchangeable. At the same time, it does not follow that rules of conduct should not be laid down and generally observed.

Such is the force of the radio that in the interest of all concerned, it must operate in the public interest. That the problems may change and that even our judgment upon particular rules may change in the light of experience is no reason why the industry should leave its important problems unattended. I, for one, strongly feel that the operations of the industry should be gradually and thoughtfully forged into a pattern of service in the public interest. All of us interested in the development of policies and rules of conduct should maintain an open and tolerant mind toward the views of others as experience accumulates and principles emerge.

The Federal Communications Commission was created by the Congress in an endeavor to effectuate the public interest in radio broadcasting and in related fields of communications. As a matter of necessity, the radio industry is subjected to strict regulation by the Government. Were this not true, radio could not exist. Millions of people may listen—only a few speak to them. Radio channels through the air are severely limited. There can be no private property interest in a radio channel. The concern of the Government and the concern of the Commission is primarily to see that the limited broadcast facilities which may be permitted on the air render a broad and effective public service.

To be perfectly frank with my audience tonight, in my judgment the solution to most of the problems which are constantly arising in connection with the regulation of radio is found in the answer to the question: "How would the interest of the listener of radio facilities be affected"? This simple question is bound up in the expression "public interest, convenience and necessity." Radio stations are licensed to serve that end. However general in character it may appear, the test in substance reduces itself to this question: "How will the listening audience be affected by any particular conduct of a radio licensee"?

Even a superficial review of the problem will indicate why, as a matter of fact and as a matter of law, the great interest involved is the public interest; more particularly, the interest of the listener. Contrary to the notion occasionally expressed that the air is free, only a limited number of channels are available in the entire radio spectrum. On the few stations which may be on the air there is a definite and inelastic limitation of time. There is no way to extend the total time available for all the purposes of that limited number of stations. Over those limited facilities must be crowded the complete performance of the operating stations in terms of education, information and entertainment.

This is the reason the radio is not a common carrier; in the nature of things broadcast facilities cannot be available to the public generally. Only a few can be accommodated.

In contrast to the limited number of individuals who may broadcast, there is the public as a whole who may listen. Obvious is the fact that the essential service being rendered is the service to the radio audience and not the service to those before the microphone. And again, may I suggest that the public interest to be served under the law is primarily the public interest of the millions of citizens. The citizen cannot be placed in the attitude of sitting at the loud speaker listening to his master's voice. In this case the plain fact is that it is the servant who speaks while the master listens.

I do not mean to suggest that there is no room for the private business concern. It can and does carry on the public service as a private business venture and with a view to success as a private enterprise. The whole American system of broadcasting by private concerns is based on the fortunate fact that in general the best public service is the best business. To succeed the listeners must be attracted and held. Thus, the private benefit emerges from an effective public service.

Neither the Congress nor the Commission undertakes to act as a general overlord to the industry. There particularly should not and cannot be a censorship of radio broadcasts. Certainly, the Commission neither asserts nor seeks the power to censor.

The Federal Communications Commission Act has been operative largely in terms of keeping people off the air. It was early recognized that with everybody on the air nobody could be heard. Since radio transmitting sets can be easily and cheaply constructed, literally thousands of sets could be readily placed in operation. Various trivial devices are capable of some transmission of radio waves. They would cause a bedlam of interference, and must be either prohibited or strictly regulated. The many citizens and the many devices as a matter of necessity are literally excluded from the air. This is done for the simple basic purpose of making effective the service which is being rendered over the limited number of available channels.

The reason for these restrictions upon the activities of the many citizens and the protection of these channels is not primarily to assure the success of the private operation of the broadcast station. But it is to assure that the citizen receiving the broadcast in his home receives an efficient and adequate service. The Federal Communications Act has operated over a broad field by this manner of exclusion and restriction.

The law further provides for the regulation of the industry upon a somewhat broader scale in order to insure that the operations are in the interest of the citizens as a whole.

It is, of course, important that where the Commission has explicitly exercised a power delegated to it by the Congress, there should be no encroachment in this field by other agencies. At the same time, there is beyond the field presently occupied by Commission regulation, a substantial area where industrial self-regulation should have a fair opportunity to work. There is no reason why self-regulation may not be in the public interest and may not to a certain extent supplement the work of the Government. I want to make clear my own thought that one should not assume in dogmatic fashion the finality of any rule created by the industry. At the same time certain of those rules which have been adopted by the great majority of the industry should be given a fair opportunity to function.

An example of industrial self-regulation in the radio field is the Code adopted by the National Association of Broadcasters last July. I shall not endeavor to discuss the Code in detail, but a few significant points may be noted. The Code adopted by a vote of the members of the Association covers six subjects: children's programs, controversial public issues, educational broadcasting, news, religious broadcasts and commercial programs. It is well to bear in mind the scope of the undertaking in order that the discussion of one particular phase may not tend to obscure the other phases. Public controversy, however, has not centered around the rules as a whole, but primarily around the provisions relating to controversial issues.

It may be obvious that even self-regulation, voluntarily imposed, may at times *actually regulate.* We are reminded of the boy, who, understanding the problem, meets with a group and decides upon the rules of the game which shall be applicable to all concerned. Thereafter, when one of the particular rules has its impact upon his own conduct, and the boy breaks up the game, picks up his playthings and goes home, he is hardly displaying the highest type of sportsmanship.

The adoption of the Code and its self-imposition by the broadcasters is an example of democracy at work. Democracy can hardly mean either in a game or in a form of Government that those who have adopted the regulations will abide by them only so long as they serve their own particular interest. Any set of regulations, even when self-imposed, is apt at some point along the line to apply to every particular person who has adopted the regulation. No one particularly enjoys the regulation the moment it restricts his own activity; but still, he should be capable of viewing the over-all benefits which may be derived from a comprehensive and effective set of rules applicable to all alike.

But control of radio in the public interest is more serious than any game.

A ready illustration of the character of the problems and the necessity of supplementing existing regulation was demonstrated by conditions at the outbreak of the current war. The crisis precipitated serious problems of completeness, fairness and accuracy of war news, and of the delineation and proper identification of war propaganda. Broadly, the integrity of the service was at stake. The problem of neutrality itself was involved. In that instance, representatives of the broadcasting industry drafted, and, to their credit, most of the broadcasters adopted, a code of practices concerning war news and comment, effectively meeting these problems.

It should be noted that neither this nor the general code already adopted was the work of the Communications Commission. They are none the less important as examples of self-regulation consistent with the public interest.

To return to the provision of the Code voluntarily adopted last July which has provoked considerable discussion, the one having to do with the handling of controversial issues. This article recognizes that a well-balanced program of a radio broadcasting station should include, as part of the station's public service, time for the presentation over the air of public questions, including questions of a controversial nature. However, it is provided that time for the presentation of controversial issues over the air shall not be sold except for political broadcasts. The Code does not prohibit selling time for the discussion of controversial public issues in the public forum type of program when such program is regularly presented as a series of two-sided discussions of public issues.

It seems to me that here again, the problem is one of giving the rule a fair opportunity to work. The job of the broadcaster is to see that the public has opportunity to hear free debate upon all controversial problems.

The one limitation in the Code is that time on the air may not be sold for the presentation of controversial issues. The Code places the duty on broadcasters to bring both sides of such issues to the public regardless of the ability of the speakers to pay for the time. It has been, and we may expect it to continue to be, the policy of the broadcasting companies to give free time to the responsible leaders who desire to speak on controversial issues. And at the same time to provide for the listeners an equal opportunity to hear the other side.

The really grave issue is whether or not the right to speak and to present one-sided arguments on public questions shall be limited to those who can buy the time. In other words, shall single individuals or groups of individuals through sheer economic power be permitted to buy the limited amount of time and space in these limited channels of expression in order to advocate in a one-sided manner the views which they themselves desire to promote. Shall this mode of expression be sold to the highest bidder? If carried to the logical extreme, how then can the millions of the public constituting the radio audience be assured of receiving the complete and balanced discussions of public issues which they are entitled to receive. The least freedom exists in those countries today where only limited groups of powerful individuals can utilize the radio waves with absolute freedom.

It is worthy of repetition that both sides in public controversies should be heard; that there should be as full and complete a discussion of public issues as the time and facilities will permit. In turn, it must follow that no single powerful person or group should be able through the exercise of economic or other power to present only their side of controversial issues, and through the exercise of the same power exclude the other side from the radio channels.

I have no particular brief for any detailed form of rule. It may well be that in the light of experience, the rule need be changed in some particulars, with a view to assuring the public that it does have full opportunity to hear full, free and two-sided discussions of all the great issues. Radio as a social force can only move along the line of giving to the public the fullest and freest expression of information, comment and opinion on all the great problems. Under the true system of democracy it can never be made available exclusively to the limited and powerful group who will present only their own side of any issue.

It should be borne in mind that the Government does not license the radio station itself because it thinks that the owner has any legal right to be heard. The real reason the station is permitted to operate is because of the service which that station undertakes to give to all of you—the radio audience. I repeat, *that* much is basic.

And I venture to repeat that all of us who are concerned with this problem should move into the field conscious of the needs for self-limitation. No one of us is qualified to claim the power finally to adjudge the issues and to lay down an arbitrary and unchanging rule of conduct. It is a field where tolerance is essential. It is a field that should be subject to continual review in the light of experience. And it is a field where proper rules of conduct, voluntarily and deliberately self-imposed, should be given a fair opportunity to demonstrate whether or not, in actual practice, they will promote the public interest.

SWEENEY SURVEY

Representative Martin L. Sweeney, Democrat, of Cleveland, Ohio, in a speech prepared for delivery in the House on Friday, October 27, said that the FCC's action denying 500 kw. power to clear channel stations was "arbitrary, unwarranted and capricious."

Mr. Sweeney said that the decision in the WLW case "meant that people living in rural areas in many states in the United States would be left with poor, and in a great percent of the instances, without any satisfactory radio reception."

To prove his point, Mr. Sweeney said he had sent cards to 25,000 rural box holders in Louisiana, Kentucky, Michigan, Florida, Virginia, Kansas, Missouri, West Virginia, Alabama, North Carolina, Mississippi, Ohio, Indiana, Arkansas, "asking them to select the first four stations of their choice." He received a 10 per cent return.

The tabulated results will be sent to any member upon request.

CODE SPEAKERS

David Lawrence, noted newspaper columnist, will discuss the NAB Code in a CBS broadcast, Sunday, October 29, at 1:35 p. m., Eastern Standard Time.

The following Sunday, Edgar Bill, WMBD, chairman of the code committee, is scheduled to speak.

Neville Miller, NAB president, talked last Sunday. Copies of his talk are being sent to all members. Additional copies are available at headquarters.

MILLER ADDRESSES ADVERTISERS

Neville Miller made the following remarks at the annual convention of the Association of National Advertisers in Hot Sulphur Springs, Va., on October 27. A complete account of the radio aspects of the convention will appear in next week's Reports.

I accept the invitation to speak here today with a great deal of interest. The subject of advertising research has been called especially to my attention during the last year and a half. The plan for reorganization of the National Association of Broadcasters, which created the position with the Association I fill, detailed a comprehensive research campaign to be undertaken. In the time since I accepted the presidency of the NAB, July 1st of last year, the problems of the broadcasting industry have been such that I have not been able to give the subject of industry research the attention which is its due. You can realize, I am sure, the personal problem I have had to acquaint myself with the radio industry which is but little more than fifteen years old but which has grown during that short period to a commanding position in the advertising fraternity. During the past year I have had to assume the role of student to acquaint myself with the nature of the broadcasting industry in order that I may understand its problems.

It has been a real pleasure for me to hear, this morning, the discussions of the research problems of other media. I feel that you have contributed materially to my educational needs for leadership in my industry. When you compare the time it took to develop radio into an advertising medium with the development of printing into an advertising medium, I think you will realize that there are many things in our industry which make it different from other media and yet there are certain factors which are the same.

From my observation the radio industry has been acutely conscious of research value. It is only natural that it should be, since radio, because of its physical characteristics, does not lend itself to caliper measurement such as the distribution of publications. A scientific approach to a like measurement for radio, however, is enshrouded in the mysticism of such variables as "wave propagation," "attenuation characteristics," "noise level" and "ionispheric reflection." Under such conditions, I am sure you can readily appreciate that some alternative measurement might logically be attempted. And so, to date broadcasting has not developed a standardized measurement of circulation, nevertheless, devices for more exacting measurement have been devloped. I would like to say, with due modesty, that I believe radio through its pioneering research, has to some extent been responsible for stimulating more concerted thought on the entire field of advertising research. Certainly your own endeavor, the Cooperative Analysis of Broadcasting, has set a pace in advertising research in its implication of social acceptance of the individual vehicles of advertising messages.

Before touching on the subject of research let me give a thumb nail picture of the major problems confronting radio in which you have an interest. At the first of this month there were 743 stations operating in the United States and its possessions and the Federal Communications Commission has granted permits for the construction of 57 more which will bring the count to 800 stations. The operation of radio broadcasting stations is limited to frequencies between 550 and 1600 kilocycles by international agreement and Federal decree. In the early days of broadcasting, pandemonium reigned because each station operator could select any frequency he desired and begin broadcasting. Radio itself appealed for assistance and the federal government answered the call, volunteering to act as the traffic officer to our industry. The radio law was written and the Federal Radio Commission created which has since become the Federal Communications Commission when the law was expanded to regulate all communication within one commission.

Government regulation and the radio law which creates this regulation have established a peculiar characteristic in our industry. There can be no argument that all advertising is contingent upon public acceptance in some degree. Radio as an advertising medium has always been fully conscious that its advertising worth is fully dependent upon its ability to reach people. Radio is unique among advertising media in that by law it is required to command public acceptance. The law reads that each broadcaster must serve in "public interest, convenience and necessity."

Surrounding the charge by national law that broadcasting be carried on in "public interest," the broadcasting industry has been conscious for some time of a need for self-regulation. The term, "Interest, convenience and necessity" has never been legally defined. There has existed a constant question as to what proper definition there could be since the radio law definitely denies the right of censorship in regulation.

In the late summer of last year the Association tackled the problem of self-regulation. Our approach to the problem has been with recognition of the social significance of radio broadcasting in the national life. We believe that broadcasters have sufficient experience in serving the public to share their program and operating experiences in the adoption of a new Code so that a more uniform and higher level of public service might result throughout the length and breadth of American radio. At our annual Convention last July the membership of our Association adopted a new Code which became effective on the first of this month. This Code, conceived in public interest is a step forward in improving radio's value to the public and, perforce, radio's value to you as an advertising medium. I realize as you do that any Code is only as good as the will and determination of the parties to it live up to its provisions, for after all, it is not good intentions but rather good actions that count.

Another problem of the broadcasting industry is that of music copyright, one which has been troublesome from practically the beginning of radio. You have read undoubtedly in trade publications and in the press, comments on the industry's action in its attempt to deal with the American Society of Composers, Authors and Publishers. We have stated frequently that we realize the value of music to broadcasting and that broadcasters are ready and willing to pay a fair and reasonable price for the use of music. The present contracts with the American Society of Composers, Authors and Publishers require stations to pay 5% of their receipts from the sale of station time, paying on revenues derived from the sponsorship of dramatic shows, news broadcasts, sports broadcasts and many other broadcasts where not one note of ASCAP music is played; and also on programs which contain music but which is not ASCAP music. We are now able to take a strong and fair stand on the ASCAP matter. This problem is of interest to you because music copyright is one of the major items of cost in broadcasting. Last year our bill to ASCAP alone was just short of $4,000,000 and this does not take into account the license fees paid to the Society of European Stage, Authors and Composers, Associated Music Publishers, Inc., Ricordi and Company, and other music licensing organizations. Experience in the past has been that upon the expiration of each contract the demand from broadcasters for music fees is raised higher and higher. We must put the brakes on our rising costs.

These are but the top rank of the many problems which have confronted the Association during the past year and which in turn have absorbed my attention. Coming back to the problem of industry research; I have experienced an increasing awareness of the industry's needs for basic information on radio as an advertising medium. I must hasten to point out, however, that our research needs are not confined to advertising values. The research which we undertake must be so conceived to develop broad information on the social significance of broadcasting, an industry having its economic base in advertising. The National Association of Broadcasters recognized sometime ago its advertising research needs and from this realization sprung the cooperative undertaking known as the Joint Committee on Radio Research in which your Association, the American Association of Advertising Agencies and NAB undertook to make some fundamental studies on radio research methods. The Joint Committee has had some real progress to report, however, it has not as yet reached definite conclusions. The work of the Joint Committee has naturally been affected by the trials of reorganization within my own Association.

I am in full accord with the original concept which brought the Joint Committee on Radio Research into existence. That concept in which the parties interested (in this case buyers, agents and sellers of broadcast advertising) join in seeking a solution to the problem of furnishing intelligent and accurate basic information, acceptable to all three parties.

I can report real progress on one store of basic information which was included in the scope of studies under Joint Committee consideration. I refer to the number and distribution of radio sets. The Assistant Director of the Census recently stated that, in connection with the Census of Housing, the question will be asked whether each household is equipped wtih a radio. The Housing Census is contingent upon Congressional appropriation in the first deficiency bill due for consideration early in January. However, there is every indication that the necessary funds will be appropriated. This basic information is of great significance to the broadcasting industry. It is included in the Census largely by request of the Federal Communications Commission. It is expected that in addition to reports by counties and cities the information will be presented by family income classes and perhaps by educational indices. I fully realize that the inclusion of this count in the Census will not eliminate the problem for future years of determining the change since Census date. I am informed that this second Census report will constitute a statistical refinement in the processes of estimating which should simplify the problem.

It is my sincere hope that the NAB can soon resume the approach to the broadcasting industry research problem. In this connection I feel that we can look to the Advertising Research Foundation for support since the basic objectives of the Joint Committee on Radio Research are essentially the same as those of your Foundation. The duplication of personnel on your Board of Directors and the Joint Committee should simplify the contact between these two worthy enterprises and there should be no problem in advancing this cooperative undertaking.

FREC "SERVICE BULLETIN"

The "Service Bulletin,'" new organ of the Federal Radio Education Committee, will make its appearance within the next week or ten days.

The "Bulletin" is the first of several activities of both immediate and long range purpose planned by the Committee to further the interest of education through the cooperation of educators and broadcasters. Its four primary functions will be to serve as a clearing house for ideas, suggestions, and comment in the field of radio education; to serve as an authoritative source for information about the Committee and its program; to present news of the results of research, experimentation and fact-finding surveys in the field of radio education; and to provide a means through which broadcasters may keep informed of the activities of educators, and educators may keep informed of the activities of broadcasters, in so far as their interests meet in the field of radio education.

Kenneth Jones, who edits the "Bulletin," has just been appointed Director of Information of the Federal Radio Education Committee. He comes by way of Station WHAS, Louisville, Kentucky, and previously was Publicity Director of the Louisville Community Chest, and Executive Secretary of the National Committee on Public Education for Crime Control, of New York City.

MR. R. J. WASMUND, "TELL"

Done Searle, general manager of KOIL, Omaha, reports that a Mr. R. J. Wasmund is carrying an unauthorized letter from him, endorsing a plan for publicizing radio programs in the magazine "Tell." Mr. Searle asks any member hearing anything about this to get in touch with him.

PAUL WHITEMAN APPEAL

All parties in the RCA-Paul Whiteman-WNEW case have appealed from the decision handed down July 15 by United States District Judge Vincent L. Leibell in the Southern District of New York (See NAB Reports, Vol. 7, No. 29, p. 3608-9, July 21).

On October 20, Whiteman appealed from the decree entered in the case, except that part that was favorable to him. On October 23, RCA appealed from that part of the decree that was favorable to Whiteman and from the failure of the decree to award RCA a common law property right in records by virtue of the technical skill in the manufacture of the records. On October 25, Stuart Sprague, in behalf of WNEW, appealed from so much of the decree as affected the station.

Decision in WMCA Case

The FCC, by unanimous decision of its seven members, this week entered an order in the case of Station WMCA, New York City, owned by the Knickerbocker Broadcasting Company, Inc., which was heard September 27, 1939, for alleged interception and broadcasting of secret radio communications of the Governments of Germany and Great Britain in violation of Section 605 of the Communications Act.

After reciting the facts in the case, as it found them, the FCC said:

> That the broadcasting of the substance of the messages described runs counter to the provisions of Sec. 605 of the Communications Act admits of little doubt. The evidence in this case shows conclusively that the messages in question were important orders of the governments of Germany and Great Britain, respectively; that they were to govern important ship movements in anticipation of, and perhaps during war; that they were addressed communications, albeit to multiple addresses; that they were intercepted without the authority of the senders; and that WMCA knowing that the messages had been obtained by means of interception, broadcast the substance thereof from its station. This conduct of the station must be viewed in the light of the great international stress then prevailing and of the special duty of American broadcasters, who are licensed for the purpose of serving the public interest, to conduct their operations with a corresponding degree of care.
>
> While, as has already been pointed out, the specific statutory prohibition now before us applies generally, a violation of it by a holder of a radio broadcast license must command our special attention. Especially is this true since there threads throughout the statute both generally and specifically the notion that broadcasters perforce of law undertake to serve the public interest. The legal concept of public interest is not different in time of crisis although its factual content may vary from time to time as the public necessarily and properly shifts the emphasis of its concern from one predominant fact to another
>
> Apart from the broadcasts of the station and the inadequate response to the Commission's order to show cause, the irresponsible actions of the licensee in connection with the full-page advertisement quoted above warrant comment. Regardless of the legality of such advertising as a trade practice it raises a question as to the character and responsibility of the management in the light of its obligation to operate the station in the public interest. More than honesty is at stake. The advertisement creates the possibility that competing broadcast stations will be drawn toward the same line of illegal broadcast activity boasted by this station. The President of the licensee corporation, Donald Flamm, admitted that the statements the station quoted from the George Ross column were false and that although he examined the "layout" of the advertisement, neither he nor anyone else in his organization made any investigation or gave consideration to the question as to truth of the representations. When asked what disciplinary action had been taken in this connection Flamm replied merely that he had given directions that all future advertisements were to be submitted to the attorney for the station.
>
> By their conduct throughout this chain of events—the broadcast, the advertisement to the industry, the evasive written response to the Commission's order, the uncandid character of their oral testimony—Flamm and his co-executives managed to create a question as to their possessing any substantial sense of responsibility to the public or the ability to recognize even roughly the public interest properly involved in the operation of a broadcast station. Just as it may be a powerful instrumentality for public good, so a broadcast station has potentialities of causing great public harm, and it is accordingly imperative that the limited broadcast channels belonging to the public should be entrusted to those who have a sense of public responsibility.
>
> On behalf of the licensee it is recognized that the broadcasts in question occurred during a period of unusual activity in the gathering and dissemination of news of special interest to the public. Speed in transmitting through the air news flashes bearing

on the European crisis was assumed to be of the essence of this and other stations' service. The same international stress which made the conduct grave created the urge to scoop the other stations. As was recognized broadly, new and important problems in connection with radio broadcasting arose from the war crisis. Under these circumstances the Commission will assume that these particular broadcasts were provoked by the occasion and are not necessarily indicate of more widespread infractions in the course of this station's broadcast activities.

After consideration of the record and all the attendant circumstances in this matter, the Commission is of the opinion that an order of revocation need not be entered at this time. On the whole, however, grave doubt has been cast upon the licensee's qualifications to operate its station in a manner consistent with the public interest. Accordingly the record made in the different phases of this proceeding must be of cumulative weight in determining the disposition to be made upon any future examination into the conduct of this station.

FCC APPOINTS BOSTON MAN AS ASSISTANT TO FLY

The Federal Communications Commission today announced the appointment of Nathan H. David of Newton Highlands, Mass., as Assistant to the Chairman, James Lawrence Fly.

Mr. David was born at Somerville, Mass., on August 1, 1913. He was graduated from Yale University in 1934 magna cum laude and stood fourth in his class when graduated from Harvard Law School three years later.

Since 1937 Mr. David has been associated with the Boston law firm of Burns and Brandon, (John J. Burns was formerly General Counsel of the Securities and Exchange Commission). He assisted in the preparation of evidence and law in support of New England's position in the Southern Governors' Rate Case. He has also specialized in work involving the Securities Act, the Exchange Act, the Public Utilities Holding Company Act, the Fair Labor Standards Act, the Labor Relations Act, and motor vehicles regulations.

FCC ORDERS LICENSE REVOKED

The FCC has announced issuance of an order for revocation of license of Station WSAL at Salisbury, Maryland, and ordered hearings on renewal of licenses for stations WBAX at Wilkes-Barre, Pennsylvania, and WQDM, at St. Albans, Vermont.

The WSAL license revocation is effective November 13, 1939, unless the licensee applies for a hearing, in which case it will stand suspended until decision of the Commission following such hearing.

Stations WBAX and WQDM have been granted temporary licenses pending hearing.

On January 13, 1938, Frank M. Stearns was licensed to operate station WSAL, daytime hours on 1200 kc, with 250 watts. He was held to have made false and fraudulent statements and failed to make full disclosure to the Commission concerning the financing of station construction, equipment used, and ownership, management, and control, facts which would have warranted refusal to grant construction permit and station license had they been known to the Commission. It further appears that the rights granted under the terms of the license have, without the Commission's written consent, been transferred, assigned or otherwise disposed of by the licensee, in violation of the Communications Act of 1934, as amended. There was evidence that Glenn D. Gillett, mortgagee, has been in actual control of the station, the FCC said.

Gillett is also in apparent control of stations WBAX and WQDM, in violation of Section 310 (b) of the Act, the FCC said. License for WBAX, (1210 kc, 100 watts, unlimited time) is in the name of John H. Stenger, Jr. That for WQDM (1390 kc, 1 KW, day) is held by E. J. Regan and F. Arthur Bostwick.

LA GUARDIA CASE HEARD

Mayor La Guardia and a number of other witnesses appeared this week before a special committee of three members of the Federal Communications Commission. The committee consisted of Commissioner Case, as chairman, and Commissioners Craven and Payne.

The hearing dealt with the matter of amendment to rules 177 and 177.1 to allow domestic municipally owned stations to rebroadcast the programs of international high frequency stations.

Among appearances were included: Mayor La Guardia and representatives of the National Committee on Education by Radio, Westinghouse Electric and Manufacturing Company, American Federation of Musicians, World-Wide Broadcasting Corporation, and National Broadcasting Company.

The first witness was Mayor La Guardia himself. He presented a statement explaining that Station WNYC owned and operated by the City of New York would like to pick up on a receiver the short wave of the international broadcast Station WRUL (until recently W1XAL) and retransmit them in the regular broadcast band from WNYC. He pointed out that, as a layman, he could not understand why he is permitted to rebroadcast international programs originating abroad but not those originating in this country, and went on to say that non-commercial stations should be given this privilege. He stated that there were not enough non-commercial stations in this country. There ought to be, he thought, at least one non-commercial to every commercial station in operation.

Mr. Novik, Director of WNYC expanded the statement of Mayor La Guardia and gave some information on the cost of operation of a non-commercial station. The annual cost of operating WNYC is $110,000. No money is spent on programs except to buy records and transcriptions. Live programs are apparently provided free of cost. Mr. Novik estimated that the WNYC programs would cost a commercial station about $500,000 annually.

Other witnesses were Mr. Schooley of the National Association of Educational Broadcasters, Mr. Walter

Lemon of WRUL, Professor Elliott of Harvard. All these expressed their belief that the rebroadcast of international programs without the cost of telephone lines or the delay of making and sending transcriptions would be of great benefit to the American listener. Mr. Lemon explained the feasibility of such a procedure, and expressed the desire to carry it out for a short period experimentally.

Mr. Ring of the FCC explained the difficulties of obtaining reliable reception in the United States and stated that the cost of a receiver and antenna for rebroadcast would amount to several thousand dollars. Mr. Novik had stated he expected to spend one thousand dollars on the receiving equipment for WRUL.

COURT DISMISSES WCOP APPEAL

Court of Appeals of the District of Columbia this week dismissed the appeal of WCOP, Boston, which was companion to the Yankee Network case (see NAB Reports, Aug. 25, p. 3676).

In this case, WCOP appealed from a decision of the Federal Communications Commission granting the application of WMEX for a construction permit to operate on 1470 kilocycles, 5000 watts, unlimited time, using a directional antenna. The appeal was made by WCOP because of the failure of the Commission to find and conclude that the financial and economic interests of that station would be adversely affected by the granting of the application of WMEX.

FEDERAL COMMUNICATIONS COMMISSION

FCC FINAL ORDERS

The Federal Communications Commission this week announced a final order granting the application of the Spartanburg Advertising Company for a new station in **Spartanburg, South Carolina,** to operate on **1370 kilocycles,** 100 watts night, 250 watts until local sunset, unlimited time. Commissioner Payne did not participate.

The Commission also entered final order granting the application of KRSC, **Seattle, Washington,** for a construction permit to make changes in transmitting equipment, move transmitter site, and increase power of station from 250 watts to 1,000 watts, operating on **1120 kilocycles,** unlimited time. Chairman Fly and Commissioner Payne did not participate.

The Commission denied the application of the Moody Bible Institute Radio Station, **Chicago, Illinois,** for a permit to construct a new non-commercial educational broadcast station to operate on **41,300 kilocycles,** 100 watts power, unlimited time. Commissioner Payne did not participate.

The Commission granted the application of the Saginaw Broadcasting Company for a new station at **Saginaw, Michigan,** to use **1200 kilocycles,** 100 watts night, 250 watts LS, with specified hours of operation; and the application of Gross and Shields for a new station at **Saginaw** to operate on **950 kilocycles,** 500 watts, daytime hours. Commissioner Payne did not participate.

The Commission also entered a final order granting the application of the Greater New York Broadcasting Corporation for a license to operate a broadcast station in **New York City** on **1100 kilocycles,** 5,000 watts, unlimited time. Station WPG, **Atlantic City, New Jersey,** which now operates on **1100 kilocycles,** 5,000 watts, sharing time with WBIL, **New York City,** will cease to operate in **Atlantic City** and WOV **New York City,** now operating on **1130 kilocycles,** 1,000 watts power, will also cease operation and instead a station will operate in **New York City** on **1100 kilocycles,** 5,000 watts, unlimited time. Commissioner Payne did not participate.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases for the week beginning Monday, October 30. They are subject to change.

Monday, October 30

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—C. P., **1360 kc.,** 1 KW, unlimited time. Present assignment: **1360 kc.,** 500 watts, 1 KW LS, unlimited time.

Thursday, November 2

Oral Argument Before the Commission

Report No. B-74:

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Modification of license, **550 kc.,** 1 KW, unlimited time. Present assignment: **1390 kc.,** 1 KW, unlimited time.

NEW—Samuel M. Emison, Vincinnes, Ind.—C. P., **1420 kc.,** 100 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

November 20

Further Hearing

NEW—Sanfeliz Enrique Abarca, San Juan, P. R.—C. P., **580 kc.**, 1 KW, 5 KW LS, unlimited time.

NEW—United Theatres, Inc., San Juan, P. R.—C. P., **580 kc.**, 1 KW, 1 KW LS, unlimited time (DA day and night).

November 27

WINS—Hearst Radio, Inc. (Assignor), Metropolitan Broadcasting Corp. (Assignee), New York, N. Y.—Voluntary assignment of license, **1180 kc.**, 1 KW, limited time (KEX and KOB).

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Renewal of license, **1290 kc.**, 100 watts, daytime.

WJBW—Charles C. Carlson, New Orleans, La.—Modification of license, **1200 kc.**, 100 watts, unlimited time. Present assignment: **1200 kc.**, 100 watts, specified hours.

December 11

Hearing Before Commissioner Case

WHDH—Matheson Radio Co., Inc., Boston, Mass.—C. P., **830 kc.**, 5 KW, unlimited time (DA night). Present assignment: **830 kc.**, 1 KW, daytime (KOA).

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted C. P. to make changes in equipment and increase power from 100 to 250 watts.

W2XAG—Carman R. Runyan, Jr., Yonkers, N. Y.—Granted modification of license of developmental broadcast station to change classification to high frequency broadcast and change frequency to **117190 kc.**; 5 KW power.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Granted modification of C. P. to make changes in equipment, increase power from 100 watts to 250 watts, unlimited time; also extension of commencement date to 10 days after grant and completion date to 15 days thereafter.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Granted C. P. to make changes in equipment and increase power from 100 to 250 watts, unlimited time.

NEW—McNary & Chambers, Bethesda, Md.—Granted C. P. (Craven, Commissioner, not participating) for new high frequency broadcast station to operate on frequency **42600 kc.**, with 100 watts, special emission, for frequency modulation.

WTMV—Miss. Valley Broadcasting Co., Inc., East St. Louis, Ill.—Granted authority to transfer control of corporation from Lester E. Cox to William H. West, Jr.

KFBK—McClatchy Broadcasting Co., Sacramento, Calif.—Granted extension of special experimental authority for a period of three months from November 1, 1939, for facsimile broadcasting from 12 o'clock midnight until 6 a. m., PST.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Granted modification of license to change hours of operation from daytime to unlimited, using 100 watts power.

WGRM—P. K. Ewing, Grenada, Miss.—Granted modification of license to increase nighttime power from 100 to 250 watts.

KATE—Albert Lea Broadcasting Co., Albert Lea, Minn.—Granted modification of license to increase nighttime power from 100 to 250 watts.

KXL—KXL Broadcasters, Portland, Ore.—Granted modification of license to increase nighttime power from 100 to 250 watts.

WGAU—J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland and A. Lynne Brannen, d/b as J. K. Patrick & Co., Athens, Ga.—Granted modification of license to increase nighttime power from 100 to 250 watts.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—The Commission set aside its action in designating for hearing the application of KLCN for renewal of license, scheduled to be heard on November 3, and granted same. Also granted license to cover C. P. authorizing move of transmitter locally, installation of vertical radiator and new equipment.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Granted authority to determine operating power by direct measurement of antenna input.

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Present license extended on a regular basis.

WHP—WHP, Inc., Harrisburg, Pa.—Present license extended on a regular basis.

KINY—Edwin A. Kraft, Juneau, Alaska.—Present license extended on a regular basis.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Present license extended on a regular basis.

KLPM—John B. Cooley, Minot, N. Dak.—Present license extended on a regular basis.

KRLC—H. E. Studebaker, Lewiston, Idaho.—Present license extended on a regular basis.

KXYZ—Harris County Broadcast Co., Houston, Tex.—Present license extended on a regular basis.

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Present license extended on a regular basis.

WING—WSMK, Inc., Dayton, Ohio.—Present license extended on a regular basis.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for the hearings have not yet been set.

NEW—William F. Huffman, Wisconsin Rapids, Wis.—Application for new station to operate on **1310 kc.**, 100 watts night, 250 watts day, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval.

NEW—Joe W. Engel, Chattanooga, Tenn.—Application for new station to operate on **1370 kc.**, with 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined with Commission's approval.

NEW—Lookout Mountain Company of Georgia, Lookout Mountain, Ga.—Application for new station to operate on **1370 kc.**, 100 watts night, 250 watts day, unlimited time. Exact transmitter site to be determined (Rossville, Ga.) and type of antenna with Commission's approval.

NEW—Valley Broadcasting Co., West Point, Ga.—Application for new station to operate on frequency **1310 kc.**, 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

KIEV—Cannon System, Ltd., Glendale, Calif.—Designated for hearing the application for renewal of license for station KIEV, upon the following issues: (1) to determine the nature and character of program service rendered; (2) to determine whether the station's program service has been and is now in conformity with the representations made to the Commission in support of the original application for C. P. or license, and all subsequent applications, by licensee; (3) to determine whether statements made to the Commission in financial reports submitted by licensee for the calendar years 1937 and 1938 and various applications for renewal of license, with particular reference to expenditures for program service and talent, are true and correct; (4) to determine whether or not the Cannon System, Ltd., has been at all times and is now exercising actual control of the operations of KIEV; and (5) to determine whether the granting of this application and continued operation of the station will serve public interest, convenience and necessity. A temporary license was granted for the period November 1, 1939, to February 1, 1940, pending hearing, and subject to whatever action may be taken upon the renewal application.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period: WBNS, Columbus, Ohio; WCBA, Allentown, Pa.; WBBR, Brooklyn, N. Y.; WEVD and auxiliary, New York, N. Y.; WGAR, Cleveland, Ohio; WGES, Chicago, Ill.; WHBL, Sheboygan, Wis.; WHIP, Hammond, Ind.; WHIS, Bluefield, W. Va.; KID, Idaho Falls, Idaho; WKBH, La Crosse, Wis.; WMBD, Peoria, Ill.; WMBG and auxiliary, Richmond, Va.; WMPS, Memphis, Tenn.; WORK, York, Pa.; WROK, Rockford, Ill.;

WSAI, Cincinnati, Ohio; WSAN, Allentown, Pa.; WSBT, South Bend, Ind.; WVFW, Brooklyn, N. Y.; KELA, Chehalis, Wash.; KGIR, Butte, Mont.; KGNF, North Platte, Nebr.; KIEM, Eureka, Calif.; KOMA, Oklahoma City, Okla.; KMO, Tacoma, Wash.; KOY, Phoenix, Ariz.; KTBS and auxiliary, Shreveport, La.; WBIG, Greensboro, N. C.; WIRE and auxiliary, Indianapolis, Ind.

The present licenses of the following stations were extended on a temporary basis only pending determination upon the application for renewal of license, for the period ending December 1, 1939: WHK, Cleveland, Ohio; WCKY, Covington, Ky.; WCSC, Charleston, S. C.; WHEC, Rochester, N. Y.; WSMB, New Orleans, La.; KFAC, Los Angeles, Calif.; KRIS, Corpus Christi, Tex.; WBNS, Columbus, Ohio (auxiliary); WGAR, Cleveland, Ohio (auxiliary).

The present license of the following station was extended on a temporary basis only pending receipt of and determination upon the application for renewal of license, for the period ending December 1, 1939: KGCX, Wolf Point, Mont.

The present license of the following station was further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1939: KFQD, Anchorage, Alaska.

The present license of the following station was further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1939: WNEL, San Juan, P. R.

The present license of the following station was further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1939: WBHP, Huntsville, Ala.

The present license of the following station was further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1939: KGBU, Ketchikan, Alaska.

The following stations were granted renewal of international broadcast station licenses for the regular period: WCBX and auxiliary, New York, N. Y.; WLWO, Cincinnati, Ohio; KGEI, San Francisco, Calif.; WGEA, Schenectady, N. Y.; WGEO, Schenectady, N. Y.; WNBI, New York, N. Y.; WRCA, New York, N. Y.; WBOS, Boston, Mass.; WPIT, Pittsburgh, Pa.; WRUL, Boston, Mass.; WRUW, Boston, Mass.

The present licenses of the following international broadcast stations were extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1939: WDJM, Miami, Fla.; WCAB, Philadelphia, Pa.

WAXG—Florida Capitol Broadcasters, Inc., Portable-Mobile.—Present license for relay broadcast station was further extended upon a temporary basis only, until December 1, 1939, pending determination upon application for renewal.

WABG—Memphis Commercial Appeal Co., Portable-Mobile.—Present license for relay broadcast station was further extended upon a temporary basis only, until December 1, 1939, pending determination upon application for renewal.

MISCELLANEOUS

WRUF—University of Florida, Gainesville, Fla.—Granted special temporary authority to operate simultaneously with Station KOA from 6:45 p. m. to the conclusion of the University of Florida v. University of Miami football game on November 18, 1939.

KVAK Carl Latenser, Atchison, Kans.—Granted special temporary authority to operate additional time on October 21 and 27, 1939, in order to broadcast football games only.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to operate additional time on November 4, 1939, in order to broadcast Alfred University v. St. Lawrence University football game only.

KNET—John Calvin Welch, William M. Keller and Bonner Frizzell, d/b as Palestine Broadcasting Association, Palestine, Tex.—Granted special temporary authority to operate additional time on October 20, 27, November 3 and 11, 1939, in order to broadcast Palestine High School football games only.

W2XBT—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate television broadcast station (experimental) W2XBT on the frequency band **156-162 mc.**, for the period beginning November 11, 1939, to December 10, 1939, pending adjustment of the license to conform with the provisions of Section 4.74.

WRCA-WNBI—National Broadcasting Co., New York, N. Y.—Granted extension of special temporary authority to transmit programs consisting of Spanish news to be rebroadcast by Cuban Stations CMX and COCX, for the period October 28, 1939, to November 26, 1939.

WSBT—The South Bend Tribune, South Bend, Ind.—Granted motion for continuance of hearing from November 14, indefinitely, in re application for C. P. to change frequency and time of operation.

KXOK—Star-Times Publishing Co., St. Louis, Mo.—Granted petition to accept amendment to application so as to request a change in frequency to **630 kc.**, with 5 KW power both day and night.

NEW—Broadcasting Corp. of America, Riverside, Calif.—Granted authority to take depositions in re application for new station.

WABI—Community Broadcasting Service, Inc., Bangor, Maine.—Granted without prejudice to the filing of petitions to intervene by WFIL and WIS, motion to strike appearances of stations WFIL and WIS, in re application of WABI for C. P. to change frequency and power.

WABI—Community Broadcasting Service, Inc., Bangor, Maine.—Denied motion to vacate order and dismiss station WLBZ, Maine Broadcasting Co., Intervener, in re above application for C. P.; exception noted by counsel for WABI.

KNOW—Frontier Broadcasting Co., Inc., Austin, Tex.—Granted modification of C. P. to make changes in equipment, approval of transmitter site and installation of vertical radiator.

WSPB—WSPB, Inc., Sarasota, Fla.—Granted modification of C. P. approving studio and transmitter site, installation of new equipment and vertical radiator.

KUIN—Southern Ore. Broadcasting Co., Grants Pass, Ore.—Granted modification of C. P. approving studio and transmitter sites and installation of vertical radiator.

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted authority to determine operating power by direct measurement of antenna input.

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Granted license to cover C. P. authorizing new equipment, move of transmitter locally, installation of vertical radiator and increase in power to 250 watts, unlimited time.

WEHL—Community Broadcasting Service, Inc., Bangor, Me.—Granted modification of high frequency relay broadcast station license to change frequencies to **1622, 2058, 2150** and **2790 kc.**

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted modification of C. P. for approval of transmitter and studio sites, and installation of vertical radiator.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted modification of C. P. extending completion date to January 1, 1940. Also granted modification of license to increase night power of auxiliary transmitter from 100 to 250 watts.

WBRK—Harold Thomas, Pittsfield, Mass.—Granted authority to determine operating power by direct measurement of antenna input.

KVEC—The Valley Electric Co., San Luis Obispo, Cal.—Granted authority to determine operating power by direct measurement of antenna input.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted authority to determine operating power by direct measurement of antenna input.

WHB—WHB Broadcasting Co., Kansas City, Mo., Portable-Mobile.—Granted C. P. for new low frequency relay broadcast station; frequencies **1622, 2058, 2150, 2790 kc.**, unlimited, 100 watts.

KFRO—Voice of Longview, Longview, Tex.—Granted modification of C. P. to move transmitter site, install new equipment and make changes in antenna system; extend commencement date to 60 days after grant and completion date to 180 days thereafter.

W3XDS—RCA Manufacturing Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate General Experimental Station W3XDS using frequency of **950 kc.**, with a power of 1 KW to conduct a comprehensive field survey to study the effects of fading on amplitude modulated facsimile emission during the hours 2:00 to 7:00 a. m., EST, on Sundays, midnight to 5:00 a. m., EST, Mondays, and 1:00 to 5:00 a. m., EST, from Tuesday through Saturday, for the period October 23, 1939, to not later than November 21, 1939.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period beginning October 21, 1939, and ending in no event later than November 19, 1939, pending settlement with Station KWLC and filing of application for installation of new equipment.

WBRY—American-Republic, Inc., Waterbury, Conn.—Granted extension of special temporary authority to operate with the present two unit directional antenna in accordance with the experimental authority granted under license, for the period October 30, 1939, to not later than November 28, 1939, in order to determine necessary steps to change from a Special Broadcast to a Standard Broadcast Station.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate additional time to broadcast high school football games only on November 2, 3, 10, and 11, 1939.

WGNY—Courier Publishing Corp., Newburgh, N. Y.—Granted special temporary authority to operate additional time on November 7, 1939, in order to broadcast election returns only.

WSAL—Frank M. Stearns, Salisbury, Md.—Granted special temporary authority to operate additional time on November 4, 11, 18, 25, and 30, 1939, in order to broadcast football games only, as described in letter dated October 14, 1939.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate additional time on November 4, 11, 18, 25, 1939, in order to broadcast football games only.

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Granted special temporary authority to operate additional time on night of November 7, and morning of November 8, 1939, in order to broadcast election returns only.

KFGQ—Boone Biblical College, Boone, Iowa.—Granted special temporary authority to operate from 4:00 p. m. to 5:00 p. m., CST, on November 8, 15, 22, and 29, 1939, in order to broadcast children's services.

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Granted special temporary authority to operate additional time on November 11, 1939, in order to broadcast Michigan State v. Santa Clara University football game only.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Denied special temporary authority to operate with power of 250 watts night on **1310 kc.**, for a period not to exceed 30 days, pending change to frequency **1200 kc.** power, 250 watts as authorized by grant of C. P. as modified.

KEX—Oregonian Publishing Co., Portland, Ore.—Granted special temporary authority to operate a portable MOPA 100 watts transmitter on frequency **1140 kc.** in the vicinity of Portland, Oregon, for the making of transmitter site tests, during the daytime, for a period not to exceed ten days, from one hour after local sunrise to one hour prior to local sunset, provided no interference is caused to any other station.

NEW—Bureau of Education, A. Corenson Owner and Manager, Montebello, Los Angeles, Calif.—Adopted proposed findings (B-76), entered on September 13, 1939, denying the application for a new station at Montebello, California, to operate on the frequency **1420 kc.** with power of 100 watts, hours of operation limited to daytime only. The order in this case is effective October 21, 1939.

W9XAA—Chicago Federation of Labor, York Township, Illinois; KLS—Radio Service Corp. of Utah, Saltair, Utah.—Adopted proposed findings (B-53), entered on September 13, 1939, denying the application of the Chicago Federation of Labor for renewal of license and for consent to voluntary assignment of license to Radio Service Corporation of Utah; and dismissing the application of Radio Service Corporation of Utah for construction permit to change the station's equipment and location and increase power output to 10 KW. The order in this case shall become effective on October 24, 1939.

WEJI—National Broadcasting Co., Inc., New York City (Portable-Mobile).—Granted C. P. to make changes in equipment of high frequency broadcast station, and reduce power to 0.25 watts. Also granted license to cover same.

WEJL—National Broadcasting Co., Inc., New York City (Portable-Mobile).—Granted C. P. to make changes in equipment of high frequency broadcast station, and reduce power to 0.25 watts. Also granted license to cover same.

KEJJ—National Broadcasting Co., Inc., Denver, Colo. (Portable-Mobile).—Granted C. P. to make changes in equipment of high frequency relay broadcast station, and add A1 and A2 type of emission.

KEJK—National Broadcasting Co., Inc., San Francisco (Portable-Mobile).—Granted C. P. to install new equipment in high frequency relay broadcast station.

KEJL—National Broadcasting Co., Inc., San Francisco (Portable-Mobile).—Granted C. P. to install new equipment in high frequency relay broadcast station.

KEJA—National Broadcasting Co., Inc., New York City (Portable-Mobile).—Granted C. P. to install new equipment in high frequency relay broadcast station.

WEJN—National Broadcasting Co., Inc., New York City (Portable-Mobile).—Granted C. P. to install new equipment and add A1 and A2 emission in high frequency relay broadcast station.

WEJQ—National Broadcasting Co., Inc., Cleveland, Ohio (Portable-Mobile).—Granted C. P. to install new equipment in high frequency relay broadcast station.

WEJW—National Broadcasting Co., Inc., New York City (Portable-Mobile).—Granted C. P. to install new equipment in high frequency relay broadcast station.

KFOR—Cornbelt Broadcasting Corp., Lincoln, Neb.—Granted C. P. to make changes in composite equipment.

WRUW—World Wide Broadcasting Corp., Hatherly Beach, Scituate, Mass.—Granted license to cover C. P. for local move of transmitter of International Broadcast station.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C. —Granted license to cover C. P. authorizing move of transmitter site, installation of new equipment and vertical radiator and increase in day power from 1 KW to 5 KW.

KOVO—Citizens Voice & Air Show, Provo, Utah.—Granted license to cover C. P. authorizing new station to operate on **1210 kc.**, 100 watts night, 250 watts day, unlimited time.

KMJ—McClatchy Broadcasting Co., Fresno, Cal.—Granted modification of C. P. approving transmitter site and installation of vertical radiator.

WHA—Univ. of Wisconsin, Madison, Wis.—Granted modification of license to change name of licensee from University of Wisconsin to State of Wisconsin, University of Wisconsin.

WJSV—Columbia Broadcasting System, Inc., Washington, D. C.—Granted modification of C. P. extending completion date to May 20, 1940.

NEW—King-Trendle Broadcasting Co., Pontiac, Mich.—Denied petition for immediate consideration of its application for C. P. without further hearing. (The Commission on July 27, designated for further hearing the application for a new station to operate on **1440 kc.**, 250 watts, unlimited time.)

WCAM—City of Camden, Camden, N. J.; WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Denied petition for review and request for reconsideration of the action taken in the motions hearing on September 8, 1939, in denying petitioners' opposition to petition of WOAX, Inc., licensee of WTNJ, Trenton, N .J., to accept an amendment to its application for modification of license, and motion to strike filed by licensees of WCAM and WCAP; and the Commission, on its own motion ordered the consolidation of Docket No. 5667 and amendment thereto, with Docket 5657 and amendments thereto, requesting the facilities of WCAP and WCAM.

WALR—WALR Broadcasting Corp., Zanesville, Ohio.—The minute entry of the Commission's action of October 10, in granting increase in power for station WALR, was corrected to read as follows: "Increase power to 250 watts, unlimited time, *contingent upon the change of frequency of Station WCOL to* **1200 kc.**"

WCOP—Scripps-Howard Radio, Inc., Cincinnati, Ohio.—Granted motion for stay of the effectiveness of the Commission's action of October 10 in granting the application of WCOL for C. P. to change frequency from **1210** to **1200 kc.** and use 250 watts full time, and suspended the same pending the filing by Scripps-Howard Radio, Inc., of a petition for hearing on or before the twentieth day from Oct. 10, and action upon such petition.

KWLK—Twin City Brdcstg. Corp., Longview, Wash.—Granted special temporary authority to operate additional time on Nov. 3, 11 and 17, in order to broadcast football games only.

KOB—Albuquerque Broadcasting Co., Albuquerque, New Mexico. —Granted extension of special temporary authority to operate unlimited time on **1180 kc.**, using 10 KW, employing DA system after sunset at Portland, Ore. (Oct. 5:30 p. m. and Nov. 4:45 p. m., PST), for the period Oct. 30 to Nov. 28.

KEX—Oregonian Publishing Co., Portland, Ore.—To operate unlimited time on **1180 kc**, using 5 KW, for the period Oct. 30 to Nov. 28.

WLEZ—The Norfolk Daily News, Norfolk, Neb.—Granted special temporary authority to operate equipment formerly licensed as relay broadcast station WLEZ on frequency **1622, 2058, 2150** and **2790 kc.**, 5 watts, without monitor, from 10 a. m. to noon CST on October 26, in order to relay broadcast Madison County Cornhusking Contest to radio station WJAG.

NEW—F. W. Meyer, Denver, Colo.—The Commission reconsidered its former action taken May 16, 1939, denying application for a new station in Denver to operate on **1310 kc.**, 250 watts day, 100 watts night, and designated the matter for Oral Argument to be held November 9, 1939.

KUMA—Albert H. Schermann, Yuma, Ariz.—Granted special temporary authority to operate additional time on November 24, to broadcast football game only.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from International Broadcast Stations WCBX and WCAB over Station WKAQ, on a non-commercial experimental basis only, for the period October 31 to November 29, 1939.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn. —Granted special temporary authority to operate on new directional antenna system as described in application for C. P. granted April 17, day and night for a period not to exceed 10 days, in order to make field intensity measurements, provided such operation shall cease immediately measurements are completed and shall not be resumed until proof of performance submitted and approved.

Columbia Broadcasting System, Inc., New York City.—Granted authority to transmit from Detroit and Dearborn, Mich., through KTSA, San Antonio, Texas, to the following Mexican radio stations the Ford Sunday Evening Hour program for the period ending January 7, 1940: XEQ and XEQQ, Mexico City; XET and XETT, Monterrey; XECZ, San Luis Potasi; XES, Tampico; XED and XEDD, Guadalajara; XEU, Veracruz, and XEME, Yucatan, via facilities of the American Tel. and Telg. Co. and La Compania Telefonica y Telegrafica Mexicana, S.A. and by rebroadcast.

APPLICATIONS FILED AT FCC

570 Kilocycles

KGKO—KGKO Broadcasting Co., Fort Worth, Tex.—C. P. to make changes in directional antenna, for night use only, and increase power from 1 KW; 5 KW LS, to 5 KW.

580 Kilocycles

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—License to cover C. P. (B2-P-2334) as modified for changes in equipment and increase in day power.

680 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—C. P. to install new transmitter, directional antenna for day and night use; increase power from 500 watts, 2½ KW LS, to 5 KW; hours of operation from daytime (LS at San Francisco, Calif.) to unlimited time; and move transmitter from Pickett Road, 5⅜ miles southeast of St. Joseph, Mo., to 5¼ miles north-northeast of St. Joseph, Mo. Amended to request DA for day and night use.

1120 Kilocycles

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Modification of license to change specified hours of operation on Sundays only from 8:30 to 9:30 a. m. *to* 9 to 10 a. m., CST.

1210 Kilocycles

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1240 Kilocycles

WXYZ—King-Trendle Broadcasting Corporation, Detroit, Mich.—C. P. to install directional antenna for night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—C. P. to install new transmitter, increase power from 1 to 5 KW, using directional antenna at night.

1260 Kilocycles

WHLD—The Niagara Falls Gazette Publishing Co., Niagara, N. Y. —Modification of C. P. (B1-P-2210) for a new station, requesting approval of antenna and install new transmitter and for approval of transmitter site at Niagara, N. Y.

1310 Kilocycles

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Authority to transfer control of corporation from S. E. Adcock, and S. E. Adcock, Administrator of Estate of Ruth Adcock, deceased, to S. E. Adcock, 124 shares common stock.

WGTM—WGTM, Inc., Wilson, N. C.—C. P. to make changes in equipment and increase power from 100 watts to 250 watts.

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—C. P. to make changes in equipment, increase power from 100 to 250 watts.

1320 Kilocycles

WSMB—WSMB, Inc., New Orleans, La.—Modification of C. P. (B3-P-2398) for changes in antenna, further requesting changes in directional antenna and increase power from 1 KW, 5 KW LS, to 5 KW day and night; extend commencement and completion dates 30 and 90 days, respectively.

1370 Kilocycles

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Modification of C. P. (B3-P-2390) as modified to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Company, San Antonio, Tex.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WCOS—Carolina Advertising Corp., Columbia, S. C.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—License to cover C. P. (B2-P-2405) for equipment changes.

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyo.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1420 Kilocycles

WAPO—W. A. Patterson, Chattanooga, Tenn.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

NEW—Worcester Broadcasting Corporation, San Diego, Calif.—C. P. for a new station on **1430 kc.**, 1 KW, 5 KW LS, unlimited time, facilities of KECA. Amended to request **1420 kc.**, 250 watts, and omit request for facilities of KECA.

KGLU—Gila Broadcasting Co., Safford, Ariz.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

1430 Kilocycles

NEW—Cascade Broadcasting Co., Inc., Everett, Wash.—C. P. for a new station on **1420 kc.**, 100 watts, 250 watts LS, unlimited time. Amended to request **1430 kc.**, 500 watts power, install vertical antenna, make changes in equipment, and specify transmitter site as Pacific Highway, outside city limits, North Everett, Wash.

1440 Kilocycles

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C. —Authority to determine operating power by direct method.

1500 Kilocycles

KDRO—Albert S. and Robert A. Drohlich, d/b as Drohlich Brothers, Sedalia, Mo.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

MISCELLANEOUS

NEW—National Broadcasting Co., Inc., area of Washington, D. C. —C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.**, 25 watts, A1, A2, A3.

NEW—National Broadcasting Co., Inc., area of Cleveland, Ohio.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A-3.

NEW—National Broadcasting Co., Inc., Cleveland, Ohio.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 25 watts, A-3.

NEW—National Broadcasting Co., Inc., area of Chicago, Ill.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 25 watts, A1, A2, A3.

NEW—National Broadcasting Co., Inc., area of Chicago, Ill.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A-3.

NEW—National Broadcasting Co., Inc., area of Chicago, Ill.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 2 watts, A-3.

NEW—National Broadcasting Co., Inc., area of San Francisco, Calif.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 25 watts, A1, A3, and A2.

NEW—National Broadcasting Co., Inc., area of Denver, Colo.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.,** 25 watts, A-3.

NEW—Edwin A. Kraft, area of Juneau, Alaska.—Construction permit for new relay broadcast station on **1622, 2058, 2150** and **2790 kc.,** 50 watts power, A-3.

XXXX—Columbia Broadcasting System, Inc., Authority to transmit programs (Ford Sunday Evening Hour program) from stations at Detroit and Dearborn, Michigan, through station KTSA, San Antonio, Texas, to foreign stations in Mexico: XEQ, XEQQ, XET, XETT, XECZ, XES, XED, XEDD, XEU and XEME, for 13 weeks, 10-15-39 to 1-7-40.

NEW—Columbia Broadcasting System, Inc., area of New York, N. Y.—C. P. for new relay broadcast station on **33380, 35020, 37620, 39820 kc.,** 2 watts power. A-3.

NEW—Columbia Broadcasting System, Inc., area of New York, N. Y.—C. P. for relay broadcast station on **33380, 35020, 37620, 39820 kc.,** 2 watts power. A-3.

W8XVC—The Cincinnati Times-Star Co., Cincinnati, Ohio.—modification of C. P. (B2-PFB-15) to extend commencement and completion dates from 11-6-39 and 5-6-40 to 5-6-40 and 11-6-40.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American LaFrance & Foamite Industries, Inc.—See Walter Kidde & Co., Inc.

C-O-Two Fire Equipment Co.—See Walter Kidde & Co., Inc.

Fyrout Company, Inc.—See Walter Kidde & Company, Inc.

Harmony Centre—In a complaint Jessie F. Springer, trading as Harmony Centre, 604 West 112th St., New York, was charged with disseminating misleading representations in the sale of a book "The Grape Cure," formerly distributed under the title "The Grape Cure (How I Cured Myself of Cancer)". The book allegedly tells how its author, Johanna Brandt, cured herself of cancer through the use of a method based on the use of grapes.

The method described in the book, it is allegedly claimed by the respondent, will cure or rid one of cancer and practically all other diseases, ailments and conditions which may afflict the human body. Further representations made by the respondent are that salt, inorganic drugs, and patent medicines cause cancer; that poisons result from using aluminum vessels, and that most diseases originate in the intestines and are caused by poisons due to uneliminated waste.

According to the complaint all such representations are false, for in truth, the system outlined in the book, "The Grape Cure," is not an effective treatment for the diseases named by the respondent; salt, inorganic drugs, and patent medicines do not cause cancer; poisons do not result from the use of aluminum vessels, nor do most diseases originate in the intestines nor are they due to uneliminated waste. (3933)

Hollywood Racket Manufacturing Co., Inc.—A complaint has been issued against Hollywood Racket Manufacturing Company, Inc., 7462 Melrose Ave., Hollywood, Calif., alleging misleading representations in the sale and distribution of tennis, badminton and squash rackets.

According to the complaint, imported Japanese racket frames bearing the mark "Made in Japan" are lacquered, supplied with a leather grip and strung by the respondent, in which processes the mark "Made in Japan" is obliterated and concealed, and in this condition the rackets are sold to the public. It is further alleged that the respondent stamps on such rackets the legend "Hollywood Racket Mfg. Co.," and disseminates advertisements which represent these rackets as being manufactured in Hollywood and of wholly domestic origin, when in truth the frames are made in Japan. (3931)

Walter Kidde & Company, Inc.—Unlawful trade practices involving use of unfair methods of competition and exclusive dealing contracts are alleged in a complaint against five companies engaged in the manufacture, assembly and sale of fire fighting equipment including carbon dioxide fire extinguishing systems and carbon dioxide portable fire extinguishers.

The complaint is directed against the following respondents: Walter Kidde & Co., Inc., 140 Cedar Street, New York; American LaFrance and Foamite Industries, Inc., Elmira, N. Y.; C-O-Two Fire Equipment Company, 560 Belmont Ave., Newark, N. J.; National Foam System, Inc., 1632 Sansom Street, Philadelphia, and Fyrout Company, Inc., 90 West Street, New York.

According to the complaint, the respondents fixed and maintained a uniform price in the sale of unpatented parts, accessories, apparatus and equipment used in the manufacture, assembly or operation of fire extinguishers. It is further alleged that the respondents fixed and maintained uniform prices in the sale of certain couplings used as accessories on hose assemblies of carbon dioxide fire extinguishers, without the requirement of a license or other authority from the owner of a lawfully issued patent on such couplings. The respondents are also charged with having agreed to submit, and with having submitted, identical bids on parts, accessories, apparatus and equipment, where competitive bids were called for by Governmental agencies. (3929)

National Foam System, Inc.—See Walter Kidde & Company, Inc.

W. T. Wagner's Sons Company—Misleading representations in the sale of soda water and other soft drinks are alleged in a complaint against W. T. Wagner's Sons Company, 1920-26 Race St., Cincinnati.

It is alleged that the respondent represents directly or by implication that its "Wagner English Club Soda" is imported from England; that it is made of ingredients imported from England, and that only soda waters made in England have the properties possessed by "Wagner English Club Soda." In truth, the complaint continues, the respondent's product is made in the United States from domestic ingredients. Nor, it is charged, does the respondent's product have any properties possessed by soda waters made in England which are not possessed by other soda waters made in the United States from domestic ingredients. (3932)

Washington Laundry—In a complaint Joseph T. Gibbons, trading as Washington Laundry, 2627 K St., N. W., Washington, D. C., was charged with the dissemination of misleading representations in connection with the interstate activity of his laundry, dry cleaning and dyeing business. (3930)

Withol Beauty Laboratories, Inc.—See Withol, Inc.

Withol, Inc.—Alleging dissemination of misleading representations in the sale of cosmetics, a complaint has been issued against Witol, Inc., Witol Beauty Laboratories, Inc., and their officers, William Witol, Ann Felix and Hattie Blankfeld, 1700 Broadway, New York.

According to the complaint, the respondents misleadingly represented that "Take-Off" is an effective preparation for the treatment of pimples, blackheads, whiteheads, freckles, and superficial blemishes of the skin, and that it removes the outer layer of the skin to give a new, fresh surface skin, when such are not the facts. The respondents, it is alleged, further misleadingly represented that "Witol's New Liquid Skin Peel" is an effective preparation for the removal of the outer layer of the skin, and that it effectively removes within a few days, blackheads, whiteheads, coarse pores, outer freckles, superficial pimples and annoying superficial blemishes, when such are not the true facts. (3934)

STIPULATIONS

The Commission has entered into the following stipulations during the week:

W. K. Buckley, Inc., 26 Forbes St., Rochester, N. Y., in a stipulation supplemental to one entered into in October, 1934, agreed to cease representing that "Buckley's Mixture" will cure colds; is an effective treatment for coughs not due to colds or bronchial irritations, or will act quickly on a cold. (0779)

Harper Method, Inc., 1233 East Main St., Rochester, N. Y., entered into a stipulation in which it agreed to discontinue misleading representations in the sale of a hair tonic and eyelash grower.

According to the stipulation, the respondent will cease representing that the use of the "Harper Method Tonique," or any of the several "Harper Method Ointments" or the Harper methods of application, or any similar preparation or treatment, can prevent baldness, end dandruff, restore scalp health, stimulate growth of new hair, bring renewed vitality and health to the hair, allay "scalp fever," or affect the functioning of oil glands of the hair. The respondent will further discontinue claims that colds make one's hair a social outcast; that dried oils, dust or grime are often the causes of falling hair or baldness, or that removal of such foreign matter by the use of the Harper Method or similar preparations will effectively prevent or remedy falling hair or baldness.

Harper Method, Inc., will also cease representing by statements such as "Eyelash and Eyebrow Grower," or in any similar manner, that the pomade offered by it will grow lashes or brows, or promote their growth or make them longer or silky. (2553)

Hoburt Hosiery Mills—Henry J. Berusch, trading as Hoburt Hosiery Mills, 320 Fifth Ave., New York, agreed to cease using "Mills" as part of his trade name or in any other way so as to imply that he manufactures the products sold by him or that he actually owns, operates or controls the mill or factory in which his products are made, when such is not a fact. (2554)

McKesson and Robbins, Incorporated, trading as Golden Brown Chemical Company, Bridgeport, Conn., agreed to cease advertising that any of its cosmetic preparations penetrates or invigorates the hair roots, or causes blemishes or blotches to disappear; that either the respondent's beauty culture course or diploma, included in its so-called special offers to prospective agents, is of any value, and that any of its so-called special offers is limited to one agent, unless this is a fact. The respondent also stipulated that it will cease misleading uses of the word "free" to describe merchandise offered as compensation to agents for distributing the respondent's merchandise and will discontinue employing the words "Rose" or "Almond" as a part of a trade name of any of its products unless such product is composed principally of rose and almond ingredients. (02452)

Templetons, Inc., 1517 Broadway, Buffalo, N. Y., agreed to discontinue representations that its preparation, "Raz-Mah" will quickly relieve hay fever sufferers from sneezing, itching and excessive watery secretions in the nose and eyes; will quickly relieve coughs due to bronchial irritation; will prevent bronchial irritations from developing into asthma, or will relieve sufferers from smokers' coughs. (02453)

Vita Products, Inc., Zeeland, Mich., stipulated that it will cease representing that "Nutrimere," a food supplement, supplies any mineral or other substance with the exception of iodine, in therapeutic quantities, or that "Nepter Kelp and Cod Liver Oil Tablets" supply any mineral or other substances except iodine and Vitamin D in therapeutic quantities. The respondent will also discontinue claims that "Nutrimere" is of any value in the treatment of any conditions unless specifically limited to those cases which are due to iodine deficiency, and then only to the extent of supplementing the iodine consumed, or that "Nepter Kelp and Cod Liver Oil Tablets" will be of any greater value unless specifically limited to such results as may be expected by reason of the Vitamin D content, or that either product constitutes a competent or effective remedy for arthritis, anemia, goiter, rickets, asthma, constipation, colds, catarrh, hay fever, or high or low blood pressure.

Vita Products, Inc., also stipulated that in future advertising of "Nutrimere" and "Nepter Kelp and Cod Liver Oil Tablets," it will publish a conspicuous warning to the effect that these products may be harmful to some individuals and in such cases should be taken only under proper medical supervision. (02451)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Avery Salt Company—See Jefferson Island Salt Co.

Carey Salt Company—See Jefferson Island Salt Co.

H. P. Clearwater, Hallowell, Maine, has been ordered to discontinue misleading representations in the sale of medicinal preparations designated as "Rheumatic Arthritis Treatment."

Under the order, the respondent is to cease representing that his training, education and experience have been such as to enable him to determine the causes, correct treatment and cure of arthritis or rheumatism, or that any of his theories as to the causes, method of treatment or cure of rheumatism or arthritis are based upon known and true scientific facts or reflect a consensus or majority of medical opinion, unless that is a fact.

The respondent was further ordered to discontinue representing that his preparations, singly or in combination, constitute a cure, remedy or adequate treatment for arthritis, rheumatism, sciatica or lumbago, or have any therapeutic value in the treatment of such conditions in excess of providing a laxative, tonic-reconstructive and mildly carminative action and providing relief, in some cases, from the pain incident to these conditions. (3777)

Inland Sales Corporation—A. Laskey, J. Samuels and J. P. Sheehan, trading as Inland Sales Corporation, 1719 W. Division St., Chicago, were ordered to discontinue the use of lottery schemes in the sale and distribution of sports jackets, pens, pencils, or any other articles of merchandise.

Under the order, the respondents are prohibited from supplying others with lottery devices for use in the sale of any merchandise, and from selling any merchandise by the use of lottery devices. (3846)

Jefferson Island Salt Company—Orders have been issued against four salt companies prohibiting them from disseminating misleading claims in the sale of their products.

The respondents named in the orders are Jefferson Island Salt Company, Louisville, Ky.; Morton Salt Company, 208 West Washington St., Chicago; Carey Salt Company, Hutchinson, Kans., and Avery Salt Company, Scranton, Pa.

Under the orders, the four respondents are to cease using any words signifying smoke or implying use of smoke to describe salt offered for sale, or sold, for curing, preserving, smoking, or flavoring meats, unless the salt so described has been directly subjected to the action and effect of the smoke from burning wood during the course of its combustion sufficiently to acquire from such source alone all of its smoke or smoke effects for use in curing, preserving, smoking or flavoring meats.

The Carey Salt Company and the Avery Salt Company were further directed to cease representing that meat, by treatment with their products, acquires the same taste or flavor or other properties or effects, as meat acquires from treatment with salt and subsequent exposure to the smoke from burning wood during the course of its combustion.

In addition, the Carey Salt Company was ordered to discontinue claims that its so-called smoke salt cures and smoke-flavors meat in one operation or that it cures and smokes meat at all or that treatment of meat with its product is as good as, or a thousand times better than, the old smokehouse.

The Avery Salt Company was also ordered to discontinue representing that "Avery Sugar Curing Smoke Salt" does the complete job of curing and smoking meat. (2150-2151-2248-2516)

Morton Salt Company—See Jefferson Island Salt Co.

Pennsylvania Salt Manufacturing Company, Widner Building, Philadelphia, and Smoked Products Company and The Smoked Salt Company, Fifth and Butler Sts., Cincinnati, were ordered to discontinue misleading representations in the sale of salt.

Under the orders, the respondents are prohibited from representing that meat cured or treated with "smoked salt" will be subjected to smoke, or that "smoked salt" can do everything that an old smokehouse does in the curing or smoking of meat. (2783-2784)

Smoked Products Company—See Pennsylvania Salt Manufacturing Co.

Smoked Salt Company—See Pennsylvania Salt Manufacturing Co.

FTC CLOSES CASE

The Federal Trade Commission closed its case against Robert Theodore Plate, trading as Plate Manufacturing Company, 11302 Chalmers St., Detroit.

The case charging the respondent with unfair methods of competition in connection with the sale of Kant-Run and HoSaver, chemical preparations designed for laundering silk and rayon stockings and lingerie, was ordered closed without prejudice to the right of the Commission to reopen it should conditions so warrant.

NAB Reports
The National Association of Broadcasters
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 44, November 3, 1939

A. F. of M. Asks IRNA Increase

The Executive Committee of IRNA met Thursday with the International Executive Board of the AFM in order to exchange views regarding procedure in connection with the approaching expiration of the national plan of settlement between the AFM and network affiliates made in 1937 which expires on January 17, 1940. There were present, representing the IRNA, Walter J. Damm, John Shepard, III, and Samuel R. Rosenbaum, chairman. Also present by invitation were representatives of the three national networks, as follows: Mark Woods of NBC, Lawrence W. Lowman, CBS and Julius F. Seebach of MBS; also, Harold Lafount, president of the National Independent Broadcasters, as representative of independent non-affiliated stations; also, Joseph L. Miller, Director of Labor Relations of NAB.

During the course of the conference Mr. Joseph N. Weber, president of the AFM and chairman of its International Executive Board notified the broadcasters that the position of the Federation is as follows:

(a) In 1937, the Federation required the network affiliates (including network owned and operated stations but not including network key stations) to increase their annual expenditure for staff musicians by an additional sum of $1,500,000, thereby bringing the gross annual expenditure up to not less than three million dollars. This has been carried out under the plan of settlement during the two years beginning January 17, 1938.

Upon the expiration of the present arrangement, January 17, 1940, the Federation will require that this annual expenditure be increased by a further sum of $1,500,000 per annum, bringing the gross expenditure of the affiliates as a group for staff musicians up to the sum of not less than $4,500,000 per annum.

(b) In 1937, the Federation required that the annual expenditure of the three national networks in all their key stations in New York, Chicago and Los Angeles be increased by $60,000 per annum each for staff musicians and this arrangement has been carried out in the two years since the effective date of the national plan of settlement, January 17, 1938. The Federation will require that this increased expenditure be doubled after the expiration of the present arrangement on January 17, 1940, that is, that all of the key stations of the three national networks, in New York, Chicago and Los Angeles, be equivalent to $120,000 per annum for each station in excess of the amount that was being spent prior to 1938.

(c) The Federation will deal separately with the independent non-affiliated stations

and its demands from such stations were not communicated to those participating in today's conference.

The representatives of IRNA and the networks were not empowered to give the Federation any reply to these demands.

The Executive Committee of IRNA will promptly communicate with all affiliates in order to obtain facts and figures with which to go back to the Federation for further conference and negotiation.

The Federation notified the IRNA Committee that it should obtain the necessary responses from the affiliates with sufficient promptness to enable the Committee to meet again with the Federation Executive Board on November 20, 1939, the date fixed for the next conference. Statement by Samuel R. Rosenbaum, Chairman of IRNA.

ANA CONVENTION

The 30th annual meeting of the Association of National Advertisers held in Hot Springs, Virginia, October 25, 26, 27, and 28, discussed two subjects of particular interest to broadcasters.

The Consumer Movement

The entire day of October 26th was devoted to reports and discussion of the "Consumer Movement." There has been much discussion of this challenging question to present-day business and the ANA undertook to present a complete factual and unbiased picture of the movement to those most concerned—advertisers, advertising agencies, and advertising media. Reports and discussions were carried on under four topics. Part 1 was devoted to "What the Consumer Movement Is"; Part 2, "The Importance of the Movement in Educational Channels"; Part 3, "The Importance of the Movement in Government"; and, Part 4, "The Scope and Penetration Nationally Among the Consuming Public." Such books as "100,000,000 Guinea Pigs", "Your Money's Worth", and such services as "Consumers Guide" and "Consumers Union" have been instrumental in getting the "Consumer Movement" under way.

Dr. Kenneth Dameron, Professor of Marketing at Ohio State University, at presesnt on leave and engaged in special research on advertising and consumer relations for the AAAA reported on the importance of the movement in educational channels. He stated that he felt business was neglecting a much needed honest public relations contact with educators. He indicated that the business conception of educators as having radical views on business is basically caused by the failure of business to equip schools with factural material. In the absence of proper information, school teachers, instructors, and professors have accepted the store of information furnished them through such sources as represented by "100,000,000 Guinea Pigs."

After a report on "The Importance of the Movement in Government" outlining the impetus given the movement by various government agencies, Dr. George Gallup, Vice President of Young & Rubicam, Inc., and President of the Institute of Public Opinion, reported the results of a survey on the "Consumer Movement" conducted by the Advertising Research Foundation. The survey was divided into two parts, one directed to consumers and the other directed to educators. Dr. Gallup's report disclosed that 24 per cent of the consumers interviewed knew of the "Consumer Movement" and about half of these had reasonably intelligent ideas about it. The alarming feature was that most of the educators knew and understood the "Consumer Movement." The implication of this finding is that the future consumers represented by those attending school now are being taught the doctrines of the "Consumer Movement" which envisions radical changes in business structure and would eliminate all advertising.

NAB is requesting that a summary of the survey findings reported by George Gallup be furnished for distribution to NAB member stations because of its fundamental significance and the direct bearing on advertising. Information was gathered on consumer opinion of business, distribution and advertising.

The Advertising Research Foundation

On October 27th the entire day was devoted to a discussion under the topic "Precision Tools for Advertising" put on by the Advertising Research Foundation. This Foundation was formed by the ANA in 1935 to fulfill the function of promoting scientific measurement of advertising values. At this meeting a history of the Foundation was presented, detailing the objectives of the organization and its accomplishments to date.

Neville Miller, President of the National Association of Broadcasters, made an address (appearing in last week's REPORTS, volume 7, number 43) on the subject of "The Viewpoint of Radio." Kerwin Fulton, President of Outdoor Advertising, Inc., presented "The Viewpoint of the Outdoor Industry" in which he lauded the Advertising Research Foundation for the work it had done in establishing a method and assisting in the formation of the Traffic

Audit Bureau which is currently releasing standard information on the value of outdoor advertising.

A report was then given on a new project undertaken by the Advertising Research Foundation on the topic of "Measuring Magazine Readership." This undertaking of the Foundation marks the beginning of refined measurement of the value of magazine advertising. There was next reported "The Continuing Study of Newspaper Reading." A history of the undertaking was given and the first produced study of newspaper reading was presented. A standard survey of an Akron, Ohio, newspaper reports the percentage of subscribers reading individual pages of the newspaper and the percentage reading individual articles and advertisements appearing on each page. Separate percentages are presented for men and women and summarized by the various departments of the newspaper. It was announced that this was the first "reading survey" released and that like reports for other newspapers will be released at about two-week intervals. Both the magazine and newspaper studies are being financed by the publishers and produced by the Advertising Research Foundation. In both cases, the studies undertaken will in no way affect the "circulation figures" developed by the Audit Bureau of Circulation. The new studies will supplement and refine the basic circulation data.

This development is important to the broadcasting industry because of the refinements in information being developed by these two media and the work done for the outdoor advertising industry. It indicates the need for radio industry action in the establishment of standard measurements of the advertising value of radio broadcasting. Mr. Miller, in his speech to the ANA, mentioned the joint undertaking of the NAB with the ANA and the AAAA, known as the Joint Committee on Radio Research. The creation of this committee was a step in the right direction, however its progress has lagged and in the best interests of the radio industry its objectives should be reviewed and understood by each NAB member and concerted action taken to attain a progressive position for broadcast advertising in the matter of honest, standard, lucid information on its advertising value.

Wage and Hour Act

The Wage and Hour Administration now says it is all right to reduce *weekly* wages when reducing working hours from 44 to 42, if the *hourly* rate is above the minimum of 30 cents. The *hourly* rate must not be cut.

For instance, if an announcer was paid $44 for a 44-hour week, he can be paid only $42 for a 42 hour week. If he is kept on a 44-hour schedule, however, he must be paid for two hours overtime at $1.50 an hour, or $45 a week. Or he can be paid $44 for a 43 1/3 hour week.

The Administration held that Section 18 of the Act ("No provision of this Act shall justify any employer in reducing a wage paid by him which is in excess of the applicable minimum wage") referred to the *hourly* wage, not to the *weekly* wage.

CODE EDITORIALS

Included with this issue of the NAB REPORTS are additional newspaper editorials dealing with the Code. A more complete cross section of press opinion will be published in a future NAB NEWS REVIEW.

FDR PRAISES RADIO

President Roosevelt tossed a bouquet to the broadcasting industry last week.

In a speech addressed to the New York Herald-Tribune forum, he said, in part:

> I am glad to say a word in this forum because I heartily approve the forum idea. After all, two eighteenth-century forums in Philadelphia gave us the Declaration of Independence and the Constitution of the United States.
>
> It is the magic of radio that has so greatly increased the usefulness of the forum. Radio listeners have learned to discriminate over the air between the honest advocate who relies on truth and logic and the more dramatic speaker who is clever in appealing to the passions and prejudices of his listeners.
>
> We have had an example of objective reporting during recent weeks in the presentation of international subjects, both in the press and the radio. Right here I should like to throw bouquets to the majority of the press and the radio. Through a period of grave anxiety both have tried to discriminate between fact and propaganda and unfounded rumor and to give their readers and listeners an unbiased and factual chronicle of developments. This has worked so well in international reporting that one may be pardoned for wishing for more of it in the field of domestic news. If it is a good rule in one, why is it not a good rule in the other?
>
> * * *
>
> It is a fact increasingly manifest that presentation of real news has sharpened the minds and the judgment of men and women everywhere in these days of real public discussion—and we Americans begin to know the difference between the truth on the one side and the falsehood on the other, no matter how often the falsehood is iterated and reiterated. Repetition does not transform a lie into a truth.

FREE OFFER

Comparative quiet reigned on the "free offer" front last week with only three attempts to obtain radio time "gratis" reported by member stations.

However, one of these involved motion pictures, with the Artists Bureau, Hollywood, Cal., sending out transcribed news programs about forthcoming movie productions and movie personalities for stations to broadcast "free of charge." NAB has advised the above organization of radio's stand on such attempts. It has also tried to impress upon them the advantages of a regular campaign. In this connection, it is interesting to note that the latest public opinion survey of Fortune Magazine reported in the November issue asked this question, "If you had to give up either going to the movies or listening to the radio, which one would you give up?" 79.3% of those interviewed said they would give up the movies; 13.9% said they would be willing to give up radio; 6.8% were undecided. Headquarters has also again advised Radio Program Associates (Doc Sellers True Stories) and Ringling Brothers-Barnum and Bailey Circus that their recent attempts to garner free air time are contrary to the NAB Code of Ethics.

The American Osteopathic Association has objected to being listed in a recent issue of the REPORTS under the heading of free offers. NAB has explained that this information is given for the benefit of members and does not necessarily pronounce judgment on the merits of each individual free offer listed. In this case, apparently, no special commercial objective is sought in offering scripts on good health, etc., to stations. The A.O.A.'s own Code of Ethics prohibits individuals from advertising their services, in accordance with accepted medical practice.

DAVID LAWRENCE DISAGREES WITH BROADCASTERS

David Lawrence, editor of the United States News, spoke over Columbia Broadcasting System, Sunday, Oct. 29, on "Freedom for the Thought We Hate." The talk was in answer to the broadcast by Neville Miller, NAB president, on the previous Sunday, when news and controversial public issues sections of the code were supported over the same network.

Mr. Lawrence asserted his agreement with Voltaire, who is credited with saying "I wholly disagree with what you say, but I will defend unto death your right to say it."

It was his opinion that radio is a form of publishing. Because of this premise he took issue with the broadcasters in many of their conclusions.

"Now my principal contention," said Mr. Lawrence in part, "is that radio broadcasting owners have surrendered their individual freedom by setting up a Code of compliance or enforcement. . . . Some of the radio owners believe that the present statute—which says their licenses shall be granted by the government only when the stations conduct themselves in accordance with 'the public interest, convenience and necessity'—means that radio itself is somehow affected with a 'public interest' like a public utility and hence is in a different category from the press. I think this is a dangerous interpretation. I regret to say it has already been proclaimed in speeches by various chairmen of the Federal Communications Commission possibly because some day they wish to justify the exercise of wider powers. But in a court test I hope this interpretation will some day be held to be unconstitutional.

"The air itself does not belong to the Government but to the people whose rights are reserved under our written constitution. The air does not belong to the government any more than does the air in an auditorium where people assemble. What is spoken over the long distance telephone wires which makes this very network of nation-wide transmission possible, is no more subject to governmental regulation than would be my voice if carried from a private telephone in my home to an auditorium three thousand miles away where several hundred persons could assemble and listen through what is known as a 'public address' system of amplifying devices such as anybody can lease nowadays from a local telephone company at established rates.

"Yes, of course, there is a limited number of wave lengths. Hence the government has the function of seeing to it that frequencies do not overlap and that mechanical disturbances or collisions are reduced to minimum in order that the 'public interest, convenience and necessity' may be served. But to infer from this that programs may be regulated is to turn back the pages of history to the dark days when well-meaning bureaucrats in our own land sought to regulate, if not censor, the contents of newspapers or periodicals just because of the existence of the second-class mail privilege granted by the government itself. That battle has been fought and won, and so must the battle be won against those bureaucrats in government who have been trying by insidious means to give radio a special status just because it also benefits incidentally from a government-granted privilege.

"Nor has the President of the United States, as some have been led to believe, any lawful power over the radio at any time except while we are at war. During the existence of a foreign war in which we are neutral the Constitution with its guarantees of free speech and a free press is by no means suspended. No governmental commission, therefore, and no executive agency of the government has any constitutional power over radio programs at this time notwithstanding the existence of such a provision approximating that power in one of the provisions of our neutrality laws. Such clauses should be repealed or promptly tested in the courts.

"The National Association of Broadcasters chooses, I regret to say, the path of submission when they concede that the phrase 'public interest, convenience and necessity' bestows on the federal government any implied power over content of radio programs."

NAB CODE IS NOT CENSORSHIP

"Insofar as the Code bears upon the issues of free speech and censorship, it is one of the most welcome developments we have seen in the United States in a long time."

That was the conclusion reached by Quincy Howe, an executive editor of Simon and Schuster, publishers, New York City, and chairman of the National Council for Freedom from Censorship, in a broadcast over NBC-Red, at 6:45 p. m. November 2.

His ideas were diametrically opposed to those expressed by Newspaperman David Lawrence, over CBS, which appears elsewhere in this issue of NAB Reports.

"Censorship (the denial of the right of free speech," said Mr. Howe, "can be exercised only by some public official, some member of the Federal, State, municipal, or community government . . ."

Referring to the Code adopted by NAB, Mr. Howe said that "it is a course which can not fail to meet the full approval of all Americans who dislike censorship . . ."

"Theoretically, any private self-regulation is to be preferred to government regulation since government regulation is censorship. . . . As long as the radio industry remains as honest and competent as it is today, there can be no doubt that the present system of self-regulation, especially if the principles of the present Code are maintained, will be infinitely preferable to a radio industry censored and perhaps finally controlled by the government.

". . . Any discussion of free speech and censorship today must include some reference to the times in which we live. Because we still enjoy free speech in the United States; because we have no censorship over here, we sometimes take these things for granted. We do not realize always that free speech is not an end in itself. Free speech is one of the benefits we have gained under our democratic system, and, like any other benefit, it must be used to be enjoyed."

TO DISCUSS CODE OVER CBS AND NBC

Two radio talks on the NAB Code are scheduled for the week of November 4. On that date Edgar Bill, president of WMBD and chairman of the Committee of Audience Relations, will speak over the Columbia Broadcasting System, 1:45-2 p. m., EST.

On Friday, November 10, 9:30-9:45 p. m., EST, Samuel McCrea Cavert, general secretary of the Federal Council of the Churches of Christ in America, will give his interpretations of the NAB Code over the National Broadcasting Company's Blue Network.

TRANSCONTINENTAL BROADCASTING SYSTEM

According to press reports today, November 2nd, the Transcontinental Broadcasting System, incorporated in Wilmington, Delaware, with seven stockholder directors, is holding its first directors' meeting today. Stockholders are reported to be: H. J. Brennan of Pittsburgh; John Roberts and Clarence Crosby, both of St. Louis; Jack Stewart and Thomas Evans, both of Kansas City; Lester E. Cox of Springfield, Missouri; and Elliott Roosevelt, President of the Texas State Network. John T. Adams of Fort Worth, Vice President of the Texas State Network was elected to head the new chain, with William A. Porter of Washington, D. C., elected a director and vice president.

Mr. Roosevelt is quoted as explaining that all of the stockholders except himself were directors of the new corporation and that he was represented on the Board by John T. Adams. He stated, "The Texas Network is a part of the new chain but I do not want to give the impression that I am the organizer of the chain. I am, as an operator of radio stations, only a one-hundredth part of it."

MONTANA CASE

The following exchange of letters between the County Attorney of Missoula County, Montana, and the FCC was made public Friday, October 27:

"COUNTY OF MISSOULA
State of Montana
Missoula, Montana

October 7, 1939.

Mr. T. J. Slowie, *Secretary*,
Federal Communications Commission,
Washington, D. C.

Dear Sir:

As the duly elected prosecuting attorney for the County of Missoula, State of Montana, on June 22, 1939, I filed criminal charges against Gene Buck, Claude Mills, John Paine, Lewis Frohlich, Lenox Lohr, Niles Trammel, A. L. Ashby, John Royal, William Paley, Edward Klauber and Isaac Levy. The Complaints were based on the alleged crimes of Attempted Extortion, Attempt to Obtain Money by False Pretense, both felonies, and Conspiracy to Extort, a misdemeanor.

The defendants, some of whom are officers of the National Broadcasting Company and the Columbia Broadcasting System which own and operate stations under licenses from your body, so long as the public interest is concerned, are resisting extradition. Why?

The proof we have against these individuals is overwhelming. They are participants in one of the most gigantic frauds ever perpetrated on the American people. You perhaps do not realize this, and I am not going to "tip my hand," so to speak, to convince you. However, I do wonder whether it is to the public interest of our citizens to have common fugitives from Justice, and that is what they are, operate valuable public franchises.

They have the money to stand trial. If they are innocent they will be released by a jury of our citizens. Therefore I am asking your Honorable Body not to renew any licenses of any station owned and operated by the National Broadcasting Company and the Columbia Broadcasting System without full hearing as to the reasons why they do not clear themselves of felony and misdemeanor charges in the State of Montana. If they are guilty of these practices in this State, they are guilty elsewhere.

I am sending copies of this letter to the National Broadcasting Company, the Columbia Broadcasting System and to Senator Burton K. Wheeler, Chairman of the Interstate Commerce Committee of the United States Senate, asking him to hold a hearing on this matter at an early date.

Very truly yours,
EDWARD T. DUSSAULT,
County Attorney.

ETD/jn cc-NBC, CBS
Hon. Burton K. Wheeler."

* * *

"FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

October 19, 1939.

Mr. Edward T. Dussault,
County Attorney,
County of Missoula,
Missoula, Mont.

Dear Sir:

The receipt is acknowledged of your letter dated October 7, 1939, concerning criminal charges against certain individuals, some of whom are officers of either the National Broadcasting Company or the Columbia Broadcasting System.

You request the Commission not to renew any license of any station owned and operated by the National Broadcasting Company and the Columbia Broadcasting System without full hearing as to the reasons why they do not clear themselves of felony and misdemeanor charges in the State of Montana. You will understand, of course, that the Commission cannot set for hearing the renewal application of a licensee corporation because an officer of such corporation is resisting extradition unless the basis of the criminal charge against such officer is such as to indicate that the licensee corporation is not operating its station in the public interest. Without any information concerning the basis of the charges against the officers of the National Broadcasting Company and the Columbia Broadcasting System referred to in your letter, the Commission would not be warranted in ordering a hearing on the renewal applications of these licensees because such officers of the company are resisting extradition.

If you should furnish the Commission with additional facts concerning the basis for the criminal charges referred to in your letter, you may be sure that the matter will be given further consideration by the Commission.

Very truly yours,
T. J. SLOWIE,
Secretary."

MEE/RLW/WCK:1m

FLY SEES PRESIDENT

James Lawrence Fly, Chairman, and Frank R. McNinch, former Chairman of the Federal Communications Commission, conferred with President Roosevelt at the White House early this week. They told newsmen at the end of the conference that they had been discussing a number of radio problems with the President. It was reported at the Commission that the conference dealt with the Telegraph Company merger, data for which is being gathered for the Senate Committee on Interstate Commerce by the Communications Commission together with other Departments.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDER

The Federal Communications Commission has ordered that its grounds for decision of November 1, 1938, denying the application of the Travelers Broadcasting Service Corporation, **Hartford, Connecticut,** for voluntary assignment of licenses to the Travelers Broadcasting Company, "be set aside, and upon consideration of complete information concerning the proposed transfer, further ordered the application be denied."

This matter involves the joint application of The Travelers Broadcasting Service Corporation and the Travelers Broadcasting Company, requesting the Commission's consent to assignment of license of radio-broadcast Station WTIC, and short-wave Stations W1XEH, W1XLU, W1XO, W1XT, from The Travelers Broadcasting Service Corporation to the Travelers Broadcasting Company.

The Commission adopted a final order denying without prejudice to the filing of a new application for appropriate facilities the application of the Brown County Broadcasting Company for authority to construct a new station in **Brownwood, Texas,** to use **990 kilocycles,** 1000 watts power, daytime operation.

"The Commission's allocation plan," it explained, "is not an attempt arbitrarily to limit the broadcasting facilities of any community. It is a carefully devised plan, based on experience, to attain the best and most comprehensive service possible for the greatest number of listeners."

PROPOSED FINDING

The Federal Communications Commission has announced the adoption of proposed findings of fact proposing to grant the applications of WNBC, **New Britain, Conn.,** and KQV, **Pittsburgh,** both for modification of licenses to increase operating power on **1380 kilocycles;** WNBC from 250 watts night, 1000 watts LS, to 1000 watts unlimited time using a directional antenna; and KQV from 1000 watts day, 500 watts night, to 1000 watts unlimited time using a directional antenna at night and to change the phasing of the directional antenna.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings and oral arguments are scheduled before the Commission in broadcast cases for the week beginning Monday, November 6. They are subject to change.

Tuesday, November 7

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 100 watts, daytime.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.,** 250 watts, daytime.

Wednesday, November 8

Hearing To Be Held in Room No. 4, Twelfth Floor,
Post Office Building, Boston, Massachusetts

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., **1410 kc.,** 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license (main and auxiliary), **1410 kc.,** 1 KW, 1 KW LS (main), *500 watts, 1 KW LS (auxiliary), unlimited time. *Auxiliary purposes only.

Thursday, November 9

Reargument Before a Quorum of the Commission

Report No. I-711:

F. W. Meyer, Denver, Colo.—C. P., **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

NEW—Paducah Broadcasting Co., Inc., Hopkinsville, Ky.—Granted C. P. for a new station to operate on **1200 kc.,** 250 watts, unlimited time.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Granted C. P. to make changes in equipment and increase power from 100 watts, unlimited, to 250 watts, unlimited time.

WLBJ—Bowling Green Broadcasting Co., Bowling Green, Ky.—Granted modification of C. P. approving studio and transmitter site at Cemetery Pike and Lehman Avenue; installation of new equipment and vertical radiator, and increase in night power from 100 to 250 watts.

KMO—KMO, Inc., Tacoma, Wash.—Granted voluntary assignment of license from KMO, Inc., to Carl E. Haymond.

NEW—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Granted amended application for C. P. for a new station to operate on **1370 kc.,** 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

WQXR—Interstate Broadcasting Co., Inc., New York City.—Granted amended application for C. P. authorizing move of transmitter site locally, installation of new equipment, and increase in power from 1 KW to 5 KW. Exact transmitter site and type of antenna to be determined with Commission's approval.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Granted modification of license to increase night power from 100 watts to 250 watts.

WSKB—McComb Broadcasting Corp., McComb, Miss.—Granted modification of license to change hours of operation from daytime to unlimited, using night power of 100 watts.

WOCB—Cape Cod Broadcasting Co., near Hyannis, Mass.—Granted modification of C. P. to increase night power from 100 to 250 watts.

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Granted modification of license to increase night power from 100 to 250 watts.

WHBY—WHBY, Inc., Appleton, Wis.—Granted modification of license to increase night power from 100 to 250 watts.

KFXJ—Western Slope Broadcasting Co., Grand Junction, Colo.—Granted modification of license to increase night power from 100 to 250 watts.

KROC—Southern Minnesota Broadcasting Co., Rochester, Minn.—Granted modification of license to increase night power from 100 to 250 watts.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Granted modification of license to increase night power from 100 to 250 watts.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Granted modification of license to increase night power from 100 to 250 watts.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Granted modification of license to increase night power from 100 to 250 watts.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted modification of license to increase night power from 100 to 250 watts.

WSVS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Granted renewal of license to January 1, 1940, and application removed from hearing docket, since application of WBNY for the facilities of WSVS has been dismissed.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for hearings have not yet been set.

NEW—J. D. Falvey, Ottumwa, Iowa.—Application for C. P. for new station to operate on **1210 kc.,** 100 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

NEW—Chilton Radio Corp., Dallas, Tex.—Application for C. P. for new station to operate on **1370 kc.,** 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval. (Applicant requests facilities of station KFJZ, Fort Worth, Tex.)

NEW—V. O. Stamps, Dallas, Tex.—Application for C. P. for new station to operate on **1370 kc.,** 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval. (Applicant requests facilities of station KFJZ, Fort Worth.)

NEW—Harold Thomas, Bridgeport, Conn.—Application for C. P., already in hearing docket, amended so as to request frequency **1420 kc.,** with 250 watts power, unlimited time. Exact studio and transmitter site and type of antenna to be determined with Commission's approval.

NEW—Ralph M. Lambeth, Greensboro, N. C.—Application for C. P. for new station to operate on **1370 kc.,** 250 watts, unlimited time. Exact transmitter and studio sites and type of antenna to be determined with Commission's approval.

NEW—E. E. Krebsbach, Miles City, Mont.—Application for C. P. for new station to operate on **1310 kc.,** 100 watts night, 250 watts day, unlimited time.

NEW—Star Printing Company, Miles City, Mont.—Application for C. P. for new station to operate on **1310 kc.,** 250 watts, unlimited time. Exact studio and transmitter site and type of antenna to be determined with Commission's approval.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KDFN, Casper, Wyo.; KGER, Long Beach ,Calif.; KSLM, Salem, Ore.; WBBC (auxiliary), Brooklyn, N. Y.; WQBC, Vicksburg, Miss.

KIJG—Eagle Broadcasting Co., Inc., Portable-Mobile.—Present relay broadcast station license was further extended upon a temporary basis only pending determination upon application for renewal, for the period ending December 1, 1939.

WHK—United Broadcasting Co., Cleveland, Ohio.—Granted extension for period of one month, from November 1 to December 1, pending receipt and determination upon application for extension, of special experimental authorization to transmit facsimile signals from 1 to 6 a. m., EST, using 1 KW power.

MISCELLANEOUS

WSVA—Shenandoah Valley Broadcasting Corp., Harrisburg, Va.—Granted special temporary authority to operate additional time on November 10, 18, 30 and December 2, in order to broadcast football games only.

KBTM—Jay P. Beard, d/b as Regional Broadcasting Co., Jonesboro, Ark.—Granted special temporary authority to operate simultaneously with station KGHI from 7:30 p. m., CST, to the conclusion of Jonesboro High School football games on November 2, 10 and 24, and University of Arkansas football games on November 4, 11, 17 and 30, from local sunset (November, 5 p. m., CST) to conclusion of game only.

WBAA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate additional time on October 28 in order to broadcast football game originating at Santa Clara.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 2 to 3 p. m., EST, on November 4, 11, 18, 25, December 2, in order to broadcast newscasts, musical programs and other features of public interest; to operate from 8:30 a. m. to 10 a. m. and from 2 to 3 p. m., on November 5, 12, 19, 26 and December 3, in order to broadcast religious services, newscasts and musical programs; to operate unlimited time on November 7, 11, 30, December 1 and 2, in order to broadcast musical programs and newscasts.

NEW—Springfield Radio Service, Inc., Springfield, Ohio.—Denied without prejudice motion for leave to intervene in the hearing on the application of Radio Voice of Springfield, Inc., for C. P., exceptions noted by counsel for petitioner.

WHA—State of Wisconsin, University of Wisconsin, Madison, Wis.—Granted petition requesting withdrawal of pending application for C. P. to change frequency and increase power, requesting facilities of WMAQ.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate additional time on November 5, 12, 19 and 26, in order to broadcast games of semi-pro series only.

NEW—Radio Voice of Springfield, Inc., Springfield, Ohio.—Adopted an order deleting from the Commission's hearing notice in re application for a new station in Springfield, paragraph 2, which reads as follows: "To determine whether the granting of this application or the application of Springfield Radio Service, Inc., B2-P-2382, or both, will serve public interest, convenience and necessity."

KFVS—Oscar C. Hirsch, tr/as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted special temporary authority to operate simultaneously with station WEBQ from 8:30 p. m. to 10:30 p. m., CST, on October 27 and November 3 and 17, 1939, and from 7:30 p. m. to 9 p. m., CST, on October 28 and November 9, 1939, in order to broadcast football games only as described in letter dated October 18, 1939.

WPTF—WPTF Radio Company, Raleigh, N. C.—Denied extension of special temporary authority to operate from 11 p. m. to 12 p. m., EST, for the period beginning October 30, 1939, and ending in no event later than November 28, 1939, in order to broadcast programs as described in letter dated May 27, 1939, pending action on application.

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted special temporary authority to operate additional time simultaneously with station WFAS on November 23 and 30, 1939, in order to broadcast football games only.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate additional time simultaneously with station WGBF with reduced power of 250 watts, on November 1, 1939, in order to permit WGBF to broadcast a Soil Conservation Debate.

WGBF—Evansville on the Air, Evansville, Ind.—Granted special temporary authority to operate simultaneously with station KFRU as above in order to broadcast a Soil Conservation Debate only.

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted special temporary authority to operate additional time after local sunset for the period beginning November 1, 1939, and ending November 30, 1939, in order to broadcast late weather forecasts only.

WHPT—Radio Station WMFR, Inc. (High Point, N. C.), Portable-Mobile.—Granted license to cover C. P. for low frequency relay broadcast station WHPT, frequencies **1622, 2058, 2150** and **2790 kc.,** power 50 watts, to communicate as a relay broadcast station in accordance with Sections 4.21 and 4.22(c); to be used with applicant's standard broadcast station WMFR.

WAIN—Peoria Broadcasting Co., Peoria, Ill., Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station, frequencies **1622, 2058, 2150** and **2790 kc.,** power 25 watts, to communicate as a relay broadcast station in accordance with Sections 4.21 and 4.22(c); to be used with applicant's standard broadcast station WMBD.

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—Granted license to cover C. P. for move of studio and transmitter sites and installation of new equipment.

WMAM—M & M Broadcasting Co., Marinette, Wis.—Granted license to cover C. P. for new station to operate on **570 kc.,** 250 watts, daytime only.

WEGV—The Champaign News-Gazette, Inc. (Champaign, Ill.), Portable-Mobile.—Granted license to cover C. P. to make changes in equipment.

WLPM—Suffolk Broadcasting Corp., Suffolk, Va.—Granted modification of C. P. for approval of studio and transmitter site and installation of vertical radiator.

WHPT—Radio Station WMFR, Inc. (High Point, N. C.), Portable-Mobile.—Granted modification of C. P. to make changes in equipment.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

WLLH—Merrimac Broadcasting Co., Inc., Lawrence, Mass.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

WWNC—Asheville Citizen-Times Co., Inc., Asheville, N. C.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

WENR—National Broadcasting Co., Inc., Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

WLS—Agricultural Broadcasting Co., Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

KIT—Carl E. Haymond, Yakima, Wash.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

WAIJ—WIBX, Inc. (Utica, New York), Portable-Mobile.—Granted license to cover C. P. for new relay broadcast station; frequencies **1622, 2058, 2150, 2790 kc.;** power 50 watts; to communicate as a relay broadcast station in accordance with Sections 4.21 and 4.22(c); to be used with applicant's Standard Broadcast Station WIBX.

WEGI—The Baltimore Radio Show, Inc., Baltimore, Md., Portable-Mobile.—Granted license to cover C. P. to make changes in equipment and increase power to 2 watts.

WEGJ—The Baltimore Radio Show, Inc., Baltimore, Md., Portable-Mobile.—Granted license to cover C. P. to make changes in equipment and increase power to 2 watts.

KROW—Educational Broadcasting Corp., Oakland, Calif.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

WDGY—Dr. George W. Young, Minneapolis, Minn.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

W1XPW—WDRC, Inc., Meriden, Conn.—Granted special temporary authority to rebroadcast over high frequency broadcast station W1XPW the transmissions from high frequency broadcast station W2XMN, for a period not to exceed 30 days, in order to experiment as to the feasibility of such a system.

WQDM—Regan & Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from local sunset (November, 4:30 p. m., EST), to 5:15 p. m., EST, on November 4, 11, 18 and 25, in order to broadcast high school football games only.

WHKC—United Broadcasting Co., Columbus, Ohio.—Denied special temporary authority to operate from local sunset at Los Angeles (November, 7:45 p. m., EST), to 8 p. m., EST, on November 1, 3, 6, 8, 10, 13, 15, 17, 20, 22, 24, 27 and 29, in order to broadcast the "Lone Ranger".

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Denied special temporary authority to operate from 5 to 5:15 p. m., EST, for the period November 1 to November 30, in order to broadcast news programs.

KFJZ—Tarrant Broadcasting Co., Fort Worth, Texas.—Granted C. P. to install new equipment.

KRBM—KRBM Broadcasters, Bozeman, Mont.—Granted license to cover C. P. for new station to operate on **1420 kc.,** 100 watts night, 250 watts day, unlimited time.

KRE—Central California Broadcasters, Inc., Berkeley, Calif.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

KJBS—Julius Brunton & Sons Co., San Francisco, Calif.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

KGKO—KGKO Broadcasting Co., Fort Worth, Texas.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted modification of C. P. for approval of studio and transmitter site, changes in equipment and installation of vertical radiator.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Granted license to cover C. P. for new station to operate on **610 kc.,** 1 KW, unlimited time.

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz.—Denied petition for reconsideration and oral argument, in re application of Yuma Broadcasting Company, Yuma, Arizona, for a new station to operate on **1210 kc.,** 100 watts night, 250 watts LS, unlimited time, which was granted by the Commission on August 8, 1939, without hearing.

NEW—United Theatres, Inc., San Juan, P. R.—Denied petition for review of ruling by Commissioner presiding at motions docket, in which a petition of Enrique Abarca Sanfeliz, San Juan, was granted to reopen hearing in re application of United Theatres, Inc., and Enrique Abarca Sanfeliz, both for new stations in San Juan.

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—The Commission, on its own motion extended the effective date of provision (3) of its order of December 6, 1938, 30 days from November 1, 1939. This order authorized WWRL to include in the operating time of its station the time previously utilized by station WMBQ, on which a further hearing has recently been held.

WRTD—The Times-Dispatch Radio Corp., Richmond, Va.; WRNL—Richmond Radio Corp., Richmond, Va.—Denied petitions of WRTD and WRNL to rehear or reconsider the application of WMBG, Havens & Martin, Inc., Richmond, Va., for C. P. to increase power on frequency **1350 kc.,** from 500 watts, unlimited time to 1 KW night, 5 KW day, unlimited time, which application was granted by the Commission on June 21, 1939.

WTMJ—The Journal Company, Milwaukee, Wis.; NEW—Sentinel Broadcasting Corp., Salina, N. Y.—Denied petitions of WTNJ and the Sentinel Broadcasting Corp. in so far as they request final action by the Commission on application of the Sentinel Broadcasting Corp. for a new station to operate on **620 kc.,** 1 KW, unlimited time, prior to the time pending applications for 5 KW power which are related thereto, become available for decision.

WFLA—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—Denied petition for review of Commissioner Payne's action in denying leave of petitioner to intervene in the hearing on the application of Stuart Broadcasting Corp. (WROL), Knoxville, Tenn.; affirmed the action of Commissioner Payne, noting petitioner's exception to the order denying intervention.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.; WTMJ—The Journal Company, Milwaukee, Wis.; WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Denied petitions in so far as they request final action on the application of WHJB for C. P. to move transmitter, install directional antenna for nighttime use, and increase power to 1 KW on **620 kc.**. prior to the time pending applications for 5 KW power, which are related thereto, become available for decision.

KUTA—Jack Powers, et al., d/b as Utah Broadcasting Co., Salt Lake City, Utah.—Denied petition of KUTA appealing from the action taken by Commissioner Case presiding in motions hearing on June 30, 1939. granting motion of KDYL, Intermountain Broadcasting Corp., Salt Lake City, to amend the notice of hearing in re application of KUTA to change frequency and power, by adding issues relating to economic interests.

Y.—Granted special temporary authority to use RCA Victor Transmitters for operation under New York area licenses relay broadcast stations WEJI and WEJL respectively, as Public Address relay stations in feeding the public address system in the auditorium from points in the area not accessible to wireline service in connection with the National Horse Show to be held in Madison Square Garden for the period November 4 to 11.

WCAT—So. Dak. State School of Mines, Rapid City, S. Dak.—Granted special temporary authority to operate additional time on November 3 and 11, in order to broadcast football games only.

WAIR—C. G. Hill, Geo. D. Walker and Susan H. Walker, Winston Salem, N. C.—Denied special temporary authority to operate from 5:15 to 5:30 p. m., EST, on November 5, 12, 19 and 26, in order to broadcast The Musical Steel Makers program.

KGU—Marion A. Mulrony & Advertiser Publishing Co., Ltd., Honolulu, T. H.—Denied special temporary authority to operate from 10:45 to 11:15 p. m., LST, during the month of November, 1939, in order to serve the public interest, convenience and necessity.

C. T. Sherer Company, Inc., Worcester, Mass.—Granted petition of C. T. Sherer Co., Inc., for review of orders of September 11 and September 29, 1939, and the action of the Commissioner presiding at the Motions Docket on September 11, granting petition of Worcester County Broadcasting Corp. to intervene was vacated; the order of the Commissioner presiding in Motions Docket on September 29, denying the petition of the above-entitled applicant to reconsider and vacate the order granting such intervention, was vacated; the petition of intervention filed by Worcester County Broadcasting Corp. on August 17, was denied; and the following named pleadings and documents filed in the above-entitled proceeding by Worcester County Broadcasting Corp. was stricken from the record: (1) proposed findings of fact filed October 12, 1939; (2) motion to strike part of applicant's proposed findings filed October 17, 1939, and (3) motion to dismiss with prejudice filed October 19, 1939.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Granted special temporary authority to operate additional time on November 2 in order to broadcast the Northport, McGill School game only.

WNEL—Juan Piza, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining program to be received from International Broadcast stations WNBI and WRCA over station WNEL, for the period November 6 to December 5, 1939.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted special temporary authority to operate additional time simultaneously with station KICA on November 29, in order to broadcast Roswell High School football game only.

APPLICATIONS FILED AT FCC

550 Kilocycles

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—C. P. to install new transmitter, new antenna, and increase power from 500 watts to 1 KW; move transmitter from 5 miles south of corporate limits, east of Valley Pike, Harrisonburg, Va., to site to be determined, Harrisonburg, Va.

KFYR—Meyer Broadcasting Co., Bismarck, N. Dak.—C. P. to install directional antenna for night use, and increase power from 1 KW, 5 KW LS, to 5 KW day and night.

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—C. P. to install directional antenna for night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

580 Kilocycles

WILL—University of Illinois, Urbana, Ill.—Authority to determine operating power by direct method.

890 Kilocycles

KARK—Arkansas Radio & Equipment Co., Inc., Little Rock, Ark.—C. P. to install new transmitter, increase power from 1 to 5 KW.

920 Kilocycles

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—C. P. to install new transmitter, increase power from 1 to 5 KW.

1010 Kilocycles

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—License to cover C. P. (B5-P-1712) as modified for new transmitting equipment, directional antenna day and night use, increase power, and move of transmitter.

1120 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—License to cover C. P. (B1-MP-649) for new transmitter and increase in power.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Authority to determine operating power by direct measurement of antenna power.

1200 Kilocycles

KFXD—Frank E. Hurt, Nampa, Idaho.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WDLP—Panama City Broadcasting Company, Panama City, Fla.—Modification of C. P. (B3-P-2213) for a new station, requesting approval of antenna and approval of studio and transmitter site at near Cove Hotel, Panama City, Fla.

WSAL—Frank M. Stearns, Salisbury, Md.—Voluntary assignment of license from Frank M. Stearns to Eastern Shore Broadcasting Co., Inc.

NEW—Grand Rapids Broadcasting Corp., Grand Rapids, Mich.—C. P. for a new broadcast station to be operated on **1200 kc.,** 250 watts, unlimited time.

KHBC—Honolulu Broadcasting Company, Ltd., Hilo, T. H.—Modification of license to change name of licensee to Hawaiian Broadcasting System, Ltd.

1210 Kilocycles

KANS—The KANS Broadcasting Co., Wichita, Kans.—Modification of C. P. (B4-P-2479) for changes in equipment and increase in power, requesting authority to make changes in type of transmitter, extend commencement and completion dates 90 days after grant and 90 days thereafter, respectively.

NEW—Louis R. Spiwak and Maurice R. Spiwak, d/b as L & M Broadcasting Co., Ottumwa, Iowa.—C. P. for new station on **1210 kc.,** 250 watts, unlimited time. Amended: To 100 watts night, 250 watts day.

WKOK—Sunbury Broadcasting Corporation, Sunbury, Pa.—C. P. to make changes in equipment, increase power from 100 watts to 250 watts day and night.

WGRM—P. K. Ewing, Greenwood, Miss.—License to cover C. P. (B3-P-2341) for move of studio and transmitter.

NEW—Dixie Broadcasting Corp., Gainesville, Ga.—C. P. for new station on **1210 kc.,** 250 watts power, unlimited time.

1250 Kilocycles

KXOK—Star-Times Publishing Co., St. Louis, Mo.—C. P. to install new transmitter; make changes in DA (use day and night); change frequency from **1250 kc.** to **630 kc.,** power from 1 KW to 1 KW, 5 KW LS; move transmitter to site near National City, Ill. Contingent on WGBF and KFRU. Amended to make changes in DA, request 5 KW power day and night, and give transmitter site as near Granite City, Ill.

WKST—Keystone Broadcasting Co., New Castle, Pa.—License to cover C. P. (B2-P-2428) as modified for equipmnet changes and increase in power.

1290 Kilocycles

WATR—The WATR Co., Inc., Waterbury, Conn.—Authority to determine operating power by direct measurement.

1310 Kilocycles

WJPR—John R. Pepper, Greenville, Miss.—License to cover C. P. (B3-P-2312 and B3-MP-823) for new station.

WJPR—John R. Pepper, Greenville, Miss.—Authority to determine operating power by direct method.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—C. P. to change frequency, power, and hours of operation from **1500 kc.,** 100 watts power, daytime, to **1310 kc.,** 250 watts power, unlimited time, and make changes in equipment. Contingent on KFYO, B3-P-2455.

KHUB—John P. Scripps, Watsonville, Calif.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

WLNH—Northern Broadcasting Company, Laconia, N. H.—License to cover C. P. (B1-P-2527) for changes in equipment and increase in power.

NEW—Leonard A. Versluis, Grand Rapids, Mich.—C. P. to erect new station to be operated on **1310 kc.,** 250 watts, unlimited time.

1320 Kilocycles

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, Hawaii.—Modification of license to change name of licensee to Hawaiian Broadcasting System, Ltd.

1330 Kilocycles

KRIS—Gulf Coast Broadcasting Company, Corpus Christi, Tex.—C. P. to install new transmitter and directional antenna; increase power from 500 watts to 5 KW. Amended to request changes in equipment, omit request for changes in antenna, and request 1 KW power.

1370 Kilocycles

KGFL—KGFL, Inc., Roswell, N. Mex.—Modification of license to change hours of operation from 6 a. m. to 1 p. m. and 4 p. m. to 7:30 p. m., MST, to 6 a. m. to 7:30 p. m., MST. Amended to change requested time from specified hours to unlimited time.

WLLH—Merrimac Broadcasting Company, Inc., Lawrence, Mass.—Extension of special experimental authority to operate a "satellite" station on **1370 kc.,** 10 to 100 watts power, unlimited time, to be operated in addition to WLLH in Lowell, Mass., for period ending 12-1-40, located at Gregg Bldg., Lawrence, Mass.

WCOS—Carolina Advertising Corp., Columbia, S. C.—License to cover C. P. (B3-P-1233) as modified for new broadcast station.

WISE—Harold H. Thoms, Asheville, N. C.—License to cover C. P. (B3-P-1066) as modified for a new station.

KVGB—Helen Townsley, Great Bend, Kans.—C. P. to make changes in equipment and increase power from 100 watts to 250 watts.

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kans.—License to cover C. P. (B4-P-2528) for changes in equipment and increase in power from 100 to 250 watts.

NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P. to erect a new station to be operated on **1370 kc.,** 250 watts, unlimited time.

1390 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—C. P. to install directional antenna for night use, increase power from 1 KW, 5 KW LS, to 5 KW day and night.

1410 Kilocycles

KMED—Mrs. W. J. Virgin, Medford, Ore.—License to cover C. P. (B5-P-1892) as modified for equipment changes, and increase in power.

1420 Kilocycles

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—License to cover C. P. (B5-P-2492) for equipment changes and increase in power from 100 to 250 watts.

KWAL—Chester Howarth & Clarence Berger, Wallace, Idaho.—Modification of C. P. (B5-P-1967) as modified for a new station requesting extension of completion date from 11-20-39 to 12-20-39.

NEW—E. D. Rivers, Valdosta, Ga.—C. P. for a new station on **1420 kc.,** 100 watts, 250 watts LS, unlimited time.

WHMA—Harry M. Ayers, Anniston, Ala.—C. P. to make changes in equipment, and increase power from 100 to 250 watts day and night.

1430 Kilocycles

NEW—John P. Scripps, Ventura, Calif.—C. P. for a new broadcast station to be operated on **1430 kc.,** 1 KW, unlimited time.

1500 Kilocycles

WGIL—Galesburg Broadcasting Co., Galesburg, Ill.—Modification of license to change hours of operation from day to unlimited time, using 250 watts power day and night.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Penna.—License to cover C. P. (B2-P-2391) for new transmitting equipment ,and antenna and move of transmitter.

WMEX—The Northern Corp., Boston, Mass.—Modification of license to increase power from 100 watts, 250 watts LS, to 250 watts day and night.

KOTN—Universal Broadcasting Corp., Pine Bluff, Ark.—Authority to determine operating power by direct measurement of antenna power.

1550 Kilocycles

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—C. P. to install new transmitter, change frequency from **1500** to **1550 kc.**, increase power from 250 watts to 500 watts, 1 KW LS.

MISCELLANEOUS

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—C. P. for new high frequency broadcast station located at Chrysler Bldg., 405 Lexington Ave., New York, N. Y., to be operated on **43000 kc.**, 50,000 watts, unlimited time, special emission.

W2XVP—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of C. P. (B1-PHB-53) as modified for changes in transmitting equipment and extension of completion date from 12-15-39 to 90 days after date of grant.

W8XAD—WHEC, Inc., Rochester, N. Y.—Modification of C. P. (B1-PHB-81) for approval of transmitter site at 979 Mt. Read Blvd., Rochester, N. Y.

W3XO—C. M. Jansky, Jr., and Stuart L. Bailey, d/b as Jansky & Bailey, Georgetown, D. C.—License to cover C. P. (B1-PHB-45) as modified for new high frequency relay broadcast station.

WLWH—The Crosley Corp., Portable.—C. P. to install new transmitter.

WLWI—The Crosley Corp., Portable-Mobile.—C. P. to install new transmitter and increase in power from 5 to 15 watts.

WEHG—Columbia Broadcasting System, Inc., Portable-Mobile.—Modification of license to change authorized power from 1.5 watts to 2 watts, and make changes in equipment.

WEHK—Columbia Broadcasting System, Inc., Portable-Mobile.—Modification of license to change power from 1.5 to 2 watts, and make changes in equipment.

NEW—Bamberger Broadcasting Service, Inc., Newark, N. J.—C. P. for new relay broadcast station in area of WOR, Newark, N. J., on **31620, 35260, 37340, 39620 kc.**, 0.2 watt, A-3.

NEW—Bamberger Broadcasting Service, Inc., Newark, N. J.—C. P. for new relay broadcast station in area of WOR, Newark, N. J., on **31620, 35260, 37340, 39620 kc.**, 0.2 watt, A-3.

NEW—Westinghouse Electric & Manufacturing Co., area of KDKA, Pittsburgh, Pa.—C. P. for new relay broadcast station on **31220, 35620, 37020, 39260 kc.**, 2 watts, A-3.

NEW—Westinghouse Electric & Manufacturing Co., area of KDKA, Pittsburgh, Pa.—License to cover above.

NEW—J. T. Ward, tr/as WLAC Broadcasting Service, Nashville, Tenn.—C. P. for new relay broadcast station in area of WLAC, Nashville, Tenn., on **30820, 33740, 35820, 37980 kc.**, 2 watts, A-3 emission.

KAOV—KRIC, Inc., Beaumont, Tex.—License to cover C. P. (B3-PRY-192) for new low frequency relay station.

NEW—W. J. Holey, Atlanta, Ga.—C. P. for new high frequency relay station located at 1368 Northview Ave., N. E., Atlanta, Ga., on **43200 kc.**, 100 watts power, unlimited time, special emission.

W9XAZ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Modification of C. P. (B4-PHB-67) as modified requesting extension of completion date from 11-28-39 to 2-28-40.

NEW—R. B. Eaton, Des Moines, Iowa.—C. P. for new television station in Des Moines, Iowa, 100 watts power, A-3 and A-5 emission, **44000-50000 kc.** frequency. Amended re antenna, Section 29 and Costs.

WEGS—Donald A. Burton, Portable-Mobile.—License to cover C. P. (B4-PRE-291) for equipment changes.

WLWG—The Crosley Corporation, Portable.—C. P. to install new transmitter and increase power from 1 to 2 watts.

NEW—WBNS, Inc., Columbus, Ohio.—C. P. for new high frequency broadcast station to be located at 50 W. Broad St., Columbus, Ohio, to be operated on **43000 kc.**, using 250 watts power, unlimited time, and special emission.

NEW—Pennsylvania Broadcasting Co., Philadelphia, Pa.—C. P. for new high frequency broadcast station to be located at 35 S. Ninth St., Philadelphia, Pa., to be operated on **43400 kc.**, 1 KW power, unlimited time, special emission.

W9XUI—University of Iowa, Iowa City, Iowa.—Modification of license to request change in frequencies to **50000-56000 kc.**, and increase power from 100 to 250 watts. Amended to omit request for increase in power.

KBQA—Winona Radio Service (M. H. White and R. H. Wiecking, d/b as), area Winona, Minn.—License to cover C. P. (B4-PRY-183) for new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Embalmers' Supply Company—A complaint has been issued charging the Embalmers' Supply Company, Westport, Conn., with misleading representations in the sale of embalming fluids and chemicals.

This company manufactures "San-Veino Spray." In connection with the sale of the preparation it allegedly advertised directly and by inference that the U. S. War Department or Army or their chemists originated, developed and perfected the formula used for exhumation purposes on the battlefields of France in 1917 and 1918; that the formula from which the respondent now produces its "San-Veino Spray" made possible the work of exhuming bodies of American soldiers buried in France without spread of infection and diseases, and that the Government gave the respondent the official and exclusive right to use that formula, when such are not the facts.

The true facts are, according to the complaint, that the War Department used the fluid made from the formula now held by the respondent only for experimental purposes in connection with the work of exhuming bodies of American soldiers buried in France and that the formula was neither originated nor developed by the War Department, the Army or their chemists. (3936)

Frontier Asthma Company, Inc.—A complaint has been issued alleging misleading advertisement of a medicinal preparation for treating asthma and hay fever sold by Frontier Asthma Company, Inc., 462 Niagara St., Buffalo, N. Y.

In addition to the Frontier Asthma Company, Inc., the complaint also names as respondents, G. E. Calkins and Guy White, officers, and George H. Calkins and his associates, Ernest N. Post, Harry I. Partridge, William Stanton, B. F. Van Duzee and C. P. Bonham.

Advertisements allegedly asserted that the respondents' product is a cure or remedy for asthma and hay fever and that its use will prevent attacks of those diseases, relieve the suffering incident thereto, build up the system and prevent recurrence of attacks. The complaint charges that these representations are untrue and that the respondents' preparation has no therapeutic value other than providing temporary relief from the paroxysms of asthma and bronchial irritations.

The respondents' advertisements allegedly were false in that they failed to reveal to purchasers that use of the preparations under prescribed or customary conditions may be injurious to health in some cases.

According to the complaint, the individual respondents and the Frontier Asthma Company, Inc., cooperatively advertised the respondents' preparations in various publications, offering free samples. The respondent company allegedly did not send free samples but forwarded the replies to the advertisements to George

H. Calkins and his associates, who then got in touch with the senders of the replies. It is alleged that after purported diagnoses had been made from answers submitted by such prospective customers to a questionnaire furnished by the respondents, Calkins and his associates forwarded the free samples to the customers and recommended use of the Frontier Asthma Company's preparation. (3955)

Michigan Bean Shippers Association—Restraint of trade in the purchase and sale of beans and other farm commodities by members of the Michigan Bean Shippers Association, Saginaw, Mich., is alleged in a complaint against that association, its officers, directors and members.

Through their association, the members are alleged to have combined and conspired to restrain competition through practices such as control of the prices at which they buy and sell, coercing Michigan buyers and sellers of farm commodities to adhere to their program, and preventing the growth of certain new methods of marketing.

Among their customers are large canners, processors, chain store systems and foreign importers. The members allegedly constitute a majority of the elevator men and jobbers buying and selling beans, barley, wheat and other farm commodities in Michigan, which produces 80 per cent of the national navy bean output.

The respondents are alleged to have fixed and maintained by agreement the differentials or "margins" to be received by elevator men for their function of buying farm commodities from producers and reselling them to jobbers and the differentials to be received by jobbers between the price paid by them to elevator men and the price at which the jobbers sold to the trade. This procedure, in connection with the maintenance of "association closes", allegedly foreclosed all opportunity for price competition by elevator men.

It is alleged that the respondents adopted a rule under which they agreed not to deal in "scoop-shoveled" products, that is, commodities handled by a dealer not equipped with the proper buildings and machinery for cleaning beans and grain as they come from farmers' vehicles prior to weighing. This rule allegedly was designed to discourage the use of a portable picker and grader introduced on the market in 1931, a consequence of which was a tendency to injure the elevator operators' business. Theretofore, it is alleged, farmers customarily had brought their commodities to the local elevators for sale, partly because the elevators maintained the only equipment available for the grading and picking process required for the sale of beans.

Among other alleged cooperative activities of the association and its members were the fixing and maintaining of schedules of charges for removing foreign and defective materials from farm commodities at the elevators; refusal to transport farm commodities free of charge from the producers to elevators or shipping points; fixing and maintaining uniform charges for elevator and warehouse storage; maintaining uniform schedules of charges for drying farm commodities in accordance with an established moisture and test weight table; establishing uniform contracts, terms and sale conditions and attempting to coerce others to use such, and maintenance of uniform price quotations for beans with Alma, Mich., as a basing point. (3937)

STIPULATIONS

The Commission has entered into the following stipulations:

Midland Chemical Laboratories, Inc., Dubuque, Iowa, stipulated that it would cease representing that its insecticide "Mill-O-Cide" is effective in destroying all insects, eggs and larvae of insects, or that it is of double strength, and will prevent or eliminate infestation in foodstuffs and keep bugs and insects away from foodstuffs and places where they are stored. (02455)

Quaker Oats Company, Chicago, Ill., in its stipulation, agreed to cease representing that its "Ful-O-Pep" feeding plan for poultry assures more and better chicks, and that the "Ful-O-Pep" mashes or chick starter constitutes the best way of combating and preventing gizzard lesions. The respondent company also stipulated that it would discontinue advertising that "Ful-O-Pep" feeds are the most profitable to use or to sell, or that they will enable prospective purchasers to obtain more eggs, more or better chicks, or more big, sound-shelled premium eggs, unless the comparatives are clearly and specifically stated in direct connection with such claims. (02454)

Wallerstein Company, Inc.—A stipulation approved in February, in which the Wallerstein Company, Inc., 180 Madison Ave., New York, agreed to discontinue certain misleading representations concerning its product "Bosco", a syrup for use as a milk supplement and as a flavor, has been vacated.

The original stipulation related that the Wallerstein company had agreed to discontinue, among others, the representation that its product "has been approved by the American Medical Association or that its use will make milk a perfect food," when, according to information later received by the Commission, such a representation was not published by the Wallerstein company at any time.

In place of the vacated stipulation the Commission has accepted and approved a substitute stipulation which does not contain the above quoted statement but which, in all other respects, is the same as the original stipulation. (02329)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Diesel Power-United Engineering Schools—Prohibiting misleading representations in the sale of correspondence courses in Diesel engines, air conditioning and refrigeration, an order has been issued to cease and desist against Roy Hemphill, trading as Diesel Power-United Engineering Schools, San Francisco, and two corporations of which he was president, namely, Diesel Power-United Engineering Schools, Inc., Minneapolis, and Diesel Power-United Engineering Schools, Kansas City, Mo.

The order forbids representations that the respondents' schools occupy a dominant position in their fields; that their courses qualify a student for any position requiring a degree of skill or technical knowledge greater than that required of a mechanic; that there is a great demand for graduates of the respondents' schools, and that the respondents procure employment for students and graduates, unless such is a fact.

Under the order, the respondents were also barred from representing, through use of the word "engineering" or words of similar meaning, that their courses qualified students as engineers. Findings of the Commission are that the respondents, subsequent to issuance of complaint against them, eliminated the word "engineering" from their trade and corporate names. (3318)

Arthur Longfield, 419 East 22nd St., New York, has been ordered to cease and desist from representing, through the use of containers, labels or wrappers, that a Worcestershire sauce manufactured and distributed by him, is the same as the century-old Lea & Perrins Worcestershire Sauce.

The Commission, in its findings, relates the history of the condiment originally prepared "From the recipe of a nobleman in the country", who was said to be Sir Marcus Sandys, who brought the recipe home from India to his native Worcestershire County. It was acquired by John Wheeley Lea and William Perrins, chemists, who began the manufacture of the sauce in 1835. Lea & Perrins, Ltd., an English corporation, now control its manufacture. It also is manufactured in the United States. (3823)

Petersime Incubator Company, Gettysburg, Ohio, has been ordered to discontinue misleading representations in the sale of "Petersime Electro-Thermo Bath", a device for applying dry heat to the body.

Under the order, the respondent is to cease disseminating advertisements which represent, directly or through implication, that use of its device provides a way to better health and a cure or remedy for rheumatism, arthritis, sciatica, gout, kidney trouble, nervousness, high blood pressure, colds and other ailments.

Other representations to be discontinued are that use of the respondent's cabinet will have any direct influence on basal metabolism or will dispose of poisons that cannot be eliminated by normal body processes, or will lessen or increase body weight, unless such representation is limited to a statement that its employment may effect a temporary loss of weight. (3883)

J. Rose & Company—Jack Rosenfeld, trading as J. Rose & Co., 2316 Locust St., St. Louis, was ordered to discontinue the use of lottery schemes in the sale and distribution of candy to ultimate consumers. Under the order, the respondent was prohibited from supplying others with lottery devices for use in the sale of candy or other merchandise, and from selling any merchandise by the use of such devices. (3212)

FCC Assignments For November

Duties of Commissioners, Secretary, and Chief Engineer of the FCC as allocated by Order No. 28, dated November 29, 1937, which provides "That a Commissioner, to be selected and appointed by subsequent order or orders of the Commission, is hereby authorized to hear and determine, order, certify, report or otherwise act upon:	ASSIGNMENT FOR MONTH OF November
"All applications for aeronautical, aircraft, geophysical, motion picture, airport, aeronautical point to point, municipal and state police, marine relay, marine fire, and emergency and special emergency radio facilities.	Commissioner George Henry Payne
"All applications for licenses following construction which comply with the construction permit; applications for extensions of time within which to commence and complete construction; applications for construction permit and modification of construction permit involving only a change in equipment; applications to install frequency control; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for special temporary authorization; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site; and applications for relay broadcast stations.	Commissioner Frederick I. Thompson
"All radio matters of every character (except broadcast, operator licenses and amateur and ship stations) within the territory of Alaska.	Commissioner Thad H. Brown
"All uncontested proceedings involved in the issuance of certificates of convenience and necessity; and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act.	Commissioner Paul A. Walker
"All matters arising in connection with the administration of tariff circulars of the Commission adopted pursuant to Section 203 of the Act, including the waiver of notice for the filing of tariffs.	Commissioner Norman A. Case
"All matters arising under the Rules of Practice and Procedure of the Commission relating to withdrawals, dismissals, or defaults of applications or other proceedings, subject to the statutory right of appeal to the Commission; and to hear and determine all interlocutory motions, pleadings and related matters of procedure before the Commission.	Commissioner T. A. M. Craven
"That the Secretary of the Federal Communications Commission is hereby authorized to determine, order, certify, report or otherwise act, with the advice of the General Counsel and the Chief Engineer, upon: (*a*) all applications for operator licenses, and (*b*) all applications for amateur and ship stations.	**Secretary** **T. J. Slowie**
"That the Chief Engineer of the Federal Communications Commission is hereby authorized to determine upon all applications and requests, and to make appropriate order in letter form for the signature of the Secretary in the following matters: (*a*) operation without an approved frequency monitor; (*b*) operation without an approved modulation monitor; (*c*) operation without thermometer in automatic temperature control chamber; (*d*) operation without antenna ammeter, plate voltmeter or plate ammeter; (*e*) operation with substitute ammeter, plate voltmeter or plate ammeter; (*f*) operation with temporary antenna system; (*g*) operation with auxiliary transmitter as main transmitter; (*h*) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application; (*i*) where formal application is not required, application for new or modified equipment or antenna system; (*j*) where formal application is not required, change of specifications for painting and lighting of antenna towers; (*k*) operation to determine power by direct method during program test periods; (*l*) relocation of transmitter in the same building; (*m*) operation with reduced power or time under Rules 142 and 151; (*n*) approval of types of equipment; (*o*) where it appears that terms of construction permit have been complied with, authorization for equipment and program tests or extensions thereof; (*p*) denial of requests for equipment and program tests where specifications of construction permit have not been met; (*q*) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorization it appears that the terms of the construction permit have not been met; (*r*) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission; (*s*) changes in equipment necessary to comply with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*t*) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications); (*u*) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location."	Chief Engineer Ewell K. Jett

NAB Reports
The National Association of Broadcasters
1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 45, November 10, 1939

Code Developments

The NAB Board joined Neville Miller last week in expressing appreciation of John Shepard III's action with regard to Father Coughlin programs on The Colonial Network.

Making a considerable financial sacrifice, Mr. Shepard notified the Board in Chicago that stations owned by The Yankee Network would offer to carry the Coughlin programs on a sustaining basis and that other stations in the network could follow the same course.

In the event that Father Coughlin refused to accept free time, Mr. Shepard said, he would turn over to charity the difference between the payments to stations owned by The Yankee Network and necessary expenses.

"I want to express to you my appreciation for your kindness in coming to Chicago, and also my most sincere appreciation for the splendid way in which you cooperated with us in straightening out what I believe was a very serious problem in connection with the Code," Mr. Miller said to Mr. Shepard.

"I know what it meant to you, and all on the Board admire your action greatly, and we all owe you a real debt of gratitude."

Mr. Miller emphasized that both the Board and he were equally appreciative of the financial sacrifices other stations had made in complying with the Code.

Mr. Shepard issued the following statement:

> "The Colonial Network agrees that based on the decision of the Board of Directors of the National Association of Broadcasters, on all programs carried by it for Social Justice Magazine or for The Reverend Charles E. Coughlin, it, as a network, will make no profit, unless such programs have to do with a political campaign, and are thus in full compliance with the NAB Code. The three stations of The Colonial Network, which are owned by The Yankee Network, namely: WAAB, WEAN and WICC will not make any charge to The Colonial Network for carrying these programs.
>
> "The Colonial Network wants to make it clear, however, that they may either refuse to charge the client for these programs, or in case the client insists on making payment for them, The Colonial Network will carry out this obligation by giving to charity the difference between its actual expenses, as specified further on, and thus complies with the NAB Code.
>
> "The expenses above referred to would be the wire line from New York City to Boston, any Government or State taxes, which had to be paid on the revenue, which The Colonial Network accepted, provided the amount paid to charity was not entirely

(Continued on page 3822)

CODE DEVELOPMENTS

(Continued from page 3821)

deductible, also any payment which might be paid to affiliated stations, who did not agree to carry the programs free of charge.

"The affiliated stations of the network have the option since we have offered this program on a commercial basis, to refuse to carry it sustaining, in which case we would feel privileged to pay them on the regular network Commercial basis, which would be deducted from the amount which we would give to charity, or charge the client these amounts after he accepted our proposition to carry the program on a sustaining basis.

"It might also be necessary that we recognize the fifteen per cent payment to the agency. Or in other words, if the program is not carried on a strictly sustaining basis at the request of the client, everything, less the actual expenses outlined above will then be given to charity."

Catholic Praises Code

Monsignor John A. Ryan, director, department of social action, National Catholic Welfare Conference, Washington, D. C., has expressed unqualified approval of the code.

Support from this quarter will be registered in every section of the country, however remote, for the National Catholic Welfare Conference has a definite interest in such matters as the code. It is a common agency, acting under the bishops, to promote the welfare of the Catholics of the United States. Monsignor Ryan's department is specifically concerned with the field of industrial relations, international affairs, civic education, social welfare, family life and rural life. His statement of approval follows:

"In my opinion, the general objectives of the Code adopted by the National Association of Broadcasters are very useful and entirely fair. This is true even of the provisions which bar controversial addresses on commercial time. After all, radio facilities differ from newspaper facilities; the former are necessarily limited, while the latter are practically unlimited. Therefore, the amount of facilities accorded to those individuals or groups that have the money to pay for them, raises the question of substantial monopoly. One man or one group might get control of so much radio time as to deprive many of their fellow citizens of opportunities for addresses that are not controversial. Hence the situation has to be regulated in some way. The regulations issued by the National Association of Broadcasters seem to be as beneficial and just to all groups as are practically obtainable."

Protestant Church Tribute

High praise for the Code was included in an address by Dr. Samuel M. Cavert, general secretary of the Federal Council of Churches of Christ in America, prepared for delivery on the NBC Blue Network on November 10.

Dr. Cavert referred in his opening remarks to the study of radio furnished by the Federal Council of Churches last year under the title "Broadcast and the Public." He said that this report especially stressed the need for standards of social responsibility on the part of radio and that the Code recently adopted by the National Association of Broadcasters "had gone a long way" in establishing for itself those standards.

"Freedom," said Dr. Cavert, "and its preservation is one of the greatest problems of our civilization. The first thing a dictator tries to do is to seize the control of radio for his own propaganda. If radio can be kept responsible to democratic processes we have a powerful bulwark against undemocratic tendencies."

Dr. Cavert said it was his conviction that the new broadcast code had found the right answer to the problem. Access to the air, Dr. Cavert went on to say, is one thing. In this Code it is assured to both sides of every important question regardless of their "relative monetary backing."

However, continued Dr. Cavert, the listeners have rights as well as the speakers.

"Indeed," he said, "the rights of the listener are paramount for without the goodwill of the listening public the radio industry cannot be successful."

Dr. Cavert explained that somebody must take the responsibility of securing a just and equitable distribution of the time as between the advocates of divergent positions.

"What the radio industry has done," said Dr. Cavert, "is to chart a wise course of self-regulation in the handling of not only controversial questions but also of news childrens' programs, educational broadcasts, and advertising."

In conclusion Dr. Cavert paid a high tribute to radio in its handling of religious broadcasts.

"It is a distinctive achievement of radio," Said Dr. Cavert, "that it has been able to provide for a religious interpretation of life to a way that is spiritually unifying rather than divisive. The new Code effectively safeguards this achievement and therefore deserves the gratitude of all who are conceived for the highest welfare of America."

CIO Trouble in Akron

An inevitable clash between the industry and the CIO on the controversial issues section of the Code broke out in Akron, Ohio, when station WJW cancelled its contract with the United Rubber Workers of America, CIO, for a 15 minute weekly program called "The Voice of Labor."

S. H. Dalrymple, president of the Rubber Workers union, protested to the FCC, claiming the station was destroying freedom of speech.

With Joseph L. Miller, NAB Labor Relations Director, assisting, Mrs. Edythe Fern Melrose, WJW Manager, attempted to arrange a regular labor forum program as a substitute for "The Voice of Labor." One such program was put on the air, with the Code itself up for discussion. Both Mrs. Melrose and Mr. Miller, speaking for the industry, pointed out the merits of the forum type of program and how the Code would work for the benefit of such groups as labor unions in the long run. But the union officials maintained it was a "gigantic conspiracy" between "big business" and the broadcasting industry to throttle freedom of speech and insisted they had the right to buy time to sell unionism just as an automobile manufacturer bought time to sell cars.

Mrs. Melrose then decided to continue "The Voice of Labor" until the present contract expired.

On November 7, T. J. Slowie, Secretary of the FCC, sent the following highly significant letter to Mr. Dalrymple:

November 7, 1939.

United Rubber Workers of America
503 United Building
Akron, Ohio

Attention: S. H. Dalrymple, President

Gentlemen:

This will reply to your letter dated October 28, 1939, in which you protest against the action of Station WJW in cancelling a contract for broadcast time with your Council and stating that it would not permit further broadcasts of the "Voice of Labor."

The adoption of the Code of Ethics by the National Association of Broadcasters does not in any way alter the duties and responsibilities of licensees of radio broadcast stations under existing law and rules and regulations of the Commission. However, Section 3(h) of the Communications Act of 1934 as amended, provides that persons engaged in radio broadcasting shall not be deemed common carriers, and licensees of broadcast stations may, therefore, legally refuse to sell time to any particular individual or organization. In view of this fact, the Commission is without power under existing legislation to take any action against Station WJW on the basis of the facts alleged in your letter.

Very truly yours,

(S) T. J. Slowie,
Secretary.

Edgar Bill Broadcast

As Edgar Bill, chairman of the NAB audience relations committee, and President of WMBD, sees it, every listener has the right to hear both sides of any controversial question raised in a broadcast.

And the only way a broadcaster can make sure his listeners get this right is to assume such responsibility by giving time and inviting speakers to his studio who will present opposing points of view.

These were among the ideas contained in Mr. Bill's talk before a nation-wide audience over CBS, Sunday afternoon, November 5, from Peoria.

He explained that he did not come to the microphone to defend the code, only to discuss it, for once its provisions are fully understood, opposition vanishes.

An exception, he noted, was among individuals and groups that, unlike ordinary listeners, are motivated by their understanding of "how tremendously the power of radio to influence public opinion has grown."

For the most part these people have ideas to sell, many of which he suggested have selfish motives behind them.

"We must remember," he said, "that radio is just as powerful in selling hatred as it is in selling good-will. With this in mind, think how important it is that both sides of a controversy, not just the side with money, but both sides, be given equal time to present their ideas to you listeners.

"Radio is the forum platform of America. It is far ahead of any other medium in providing a great audience to hear discussions of important questions. This is a fine thing when both sides are equally represented. It is a mighty dangerous thing when the radio audience gets the chance to hear only one side."

After quoting the exact wording of the controversial public issues section, he restated it for the benefit of his listeners as follows: "The sentences of the code mean that every broadcaster who belongs to the National Association of Broadcasters is to give time free for the discussion of important public questions. He is pledged to allot time fairly to both sides, or possibly to all sides, of a controversy. And he is pledged not to sell time for such discussions, because the minute he does, he can no longer allot time fairly to all."

That the code method of alloting time for the discussion of controversial issues had already proven itself, is in accord with the record, Mr. Bill said.

When the Supreme Court battle was rocking the country, his count showed that 42 speakers received free time over CBS to present opinions, pro and con. The division was 21 and 21.

More recently, when the question of embargo repeal dominated the news and private conversations, CBS, alone, provided free time for eighteen talks for repeal and twenty against repeal. Three were non-partisan.

At his own station, Mr. Bill has pursued the policy of giving free time for controversial discussions for the past two years. In actual practice he said:

"Far from curbing freedom of speech, we have learned that this policy promotes freedom of speech. It also brings more persons to the microphone, whatever their views may be. It gives the listener a chance to hear both sides of every question and then puts upon him the responsibility of making up his own mind."

At this point he effectively disposed of the allegation that stations cannot afford to give away time for controversial discussion, and that, as a consequence, freedom of speech would be curbed.

"Of course, that is not true," he stated. "For years radio stations have been giving free time for public service. During the European crisis of last September, stations all over the country cleared their commercial programs schedules day after day to broadcast special European news.

"Does the American public need to be reminded of the service performed by radio stations during disasters such as the Ohio Valley and New England floods? Networks and stations have given time freely for the discussions of such questions as the arms embargo repeal. This network alone as I told you, gave almost ten hours on that subject. I have mentioned only a few instances in which broadcasters found public service more important than making money. There are many more, certainly enough to prove that the radio industry can, as a public service, afford to give rather than sell time for the discussion of public controversial issues."

Board Action

The NAB Board of Directors meeting in Chicago last week, sustained the interpretations of its Code Compliance Committee in a resolution which expressed "its gratitude and its full approval of the findings of the Committee, which the Board believes will be of lasting benefit to the industry and to the American listening public."

The Code Compliance Committee is responsible for the administration of the new NAB Code which became effective October 1, last.

At the same time, the Board stated that contracts for the sale of time for the discussion of public controversial issues executied prior to October 1, 1939, although in temporary conflict with the code, may be continued to expiration date, or at the discretion of the station manager, may be terminated at an earlier date in conformity with the terms of the contract.

WEST, NEW DIRECTOR

The resignation of Gene Dyer as Director from the Ninth District was presented to the Board of Directors at the meeting held in Chicago last week. Mr. Dyer resigned on account of ill health.

The Board elected William H. West, WTMV, East St. Louis, Illinois, to fill the unexpired term of Mr. Dyer. Mr. West is a veteran in radio activities. He is an engineer and has had considerable experience in station management. At one time he was manager of KMOX, St. Louis, and is now the owner and station manager of WTMV, which is an independent station having no network affiliation.

FREE OFFERS

Member stations last week reported the following free offers received:

Carl Byoir & Associates, Inc.
Child Play Association

Byoir is offering a series of scripts entitled "Keeping Ahead Of The Joneses" which promotes American industry, the American way, etc. The Child Play Association offers a series of scripts describing new toys for Christmas.

Following its usual procedure, the NAB Bureau of Radio Advertising has advised the Child Play Association that station acceptance of its free offer constitutes violation of the NAB Code of Ethics. Acceptance of the Carl Byoir programs merely means that stations leave themselves open to a barrage of requests from opposing philosophies for an equal amount of time in which to answer the views of business.

COST-PER-INQUIRY

The Bureau of Radio Advertising has investigated the recent request of the Sterling Insurance Company, Chicago, for radio advertising on an apparent cost-per-inquiry basis. In replying, this company disclaims any such purpose or intention. The Bureau in its reply has suggested to the Sterling Insurance Company that they revise their form letter to stations to avoid the current widespread misunderstanding resulting from their original request, making it clear that they do not seek to place business on a percentage basis.

R. J. WASMUND

E. C. Reineke, WDAY, Fargo, N. D., joins Don Searle, KOIL, Omaha, in wanting to know the whereabouts of one R. J. Wasmund.

MILLER AT CONFERENCE

Neville Miller represented the broadcasting industry at the Conference on Inter-American Relations in the Field of Education, held here November 9-10 under the direction of the State Department.

WLW APPEAL DENIED

United States Supreme Court this week refused to review the "super-power" case of Station WLW, Cincinnati.

The Federal Communications Commission rendered an opinion on February 6 of this year denying the station's application for an extension of a special temporary experimental authorization to operate on 700 kilocycles with 500,000 watts, unlimited hours.

The station filed a petition for rehearing by the Commission. The Commission denied the rehearing and the station filed an appeal in the Court of Appeals of the District of Columbia. That court upheld the Commission's decision in returning the station to its regular power of 50,000 watts. An appeal was then filed in the United States Supreme Court.

FCC WORLD SERIES INQUIRY

T. J. Slowie, secretary of the FCC has sent questionnaires to all broadcasters on behalf of the Monopoly Committee of the Commission requesting information to be answered by November 15 regarding World Series baseball broadcasts. The information requested included:

(1) Were the World Series baseball games of October, 1939, broadcast over your station?

(2) If such broadcasts were presented over your station, state (a) the substance of any arrangement or agreement by which such programs were made available to you, and (b) whether any attempt was made by any person or organization to influence or persuade you against broadcasting the programs.

(3) If broadcasts of the World Series were not presented over your station, state (a) whether the programs were offered to you but refused by you because of an agreement with a network or other organization; (b) whether you were influenced by other persons or organizations to refuse the programs, or were prevented from accepting them; and (c) whether an attempt was made by you to obtain the programs, and if so, why you were unable to make arrangements to obtain the same.

This information should be reported briefly but in sufficient detail to present the actual facts in the matter to the Committee.

It is requested that replies be made in time for receipt in the Commission not later than November 15, 1939.

MORE POWER FOR RELAYS

The FCC this week issued the following statement regarding the revision of Section 4.25(b) of rules other than broadcast dealing with increased power for relay broadcast stations so that the section will read as follows:

"A relay broadcast station assigned frequencies in Groups D, E, F and G will not be authorized to install equipment or licensed for an output power in excess of 100 watts; provided that before using any frequency in these groups with a power in excess of 25 watts, tests shall be made by the licensee to insure that no objectionable interference will result to the service of any government station, and provided, further, that if the use of any frequency may cause interference then the power shall be reduced to 25 watts or another frequency in the licensed group selected which will not cause objectionable interference."

This increase in allowable power is desirable in order that a more dependable service may be obtained from relay broadcast stations operating on these frequencies.

FCC ALTERS ADMINISTRATION

The Federal Communications Commission has just issued its Administrative Order No. 2 effective December 1, changing the routine duties of members of the Commission.

The Order creates a Board to be known as "The Administrative Board" to handle the routine functions formerly in the hands of individual commissioners. The Board is composed of the General Counsel of the Commission, Chief Engineer, Chief Accountant and the Secretary.

The new Order is as follows:

Under the authority of the Communications Act of 1934, as amended, It is Ordered, That Administrative Order No. 2, adopted July 12, 1939, as amended, be and the same is hereby further amended to provide as follows:

It Is Ordered: That there be and there is hereby assigned and referred to the respective boards and individual Commissioners hereinafter designated, for action thereon, that portion of the work, business or functions of the Federal Communications Commission hereinafter specified:

(1) (a) The Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act, upon:

- (a) all applications for operator licenses or renewals thereof; and
- (b) all applications for amateur and ship stations or renewals thereof; and
- (c) all applications for aircraft station licenses or renewals thereof where the applicant is or has been the holder of a station license within the preceding year;

(b) The Secretary of the Commission is hereby designated to enter the appropriate final order of the Commission in all cases involving applications for radio station authorizations in which proposed findings and conclusions of the Commission have been issued pursuant to the provisions of Section 1.231 of the Commission's Rules of Practice and Procedure and in which no exceptions have been filed within the time prescribed in said section.

(2) The Chief Engineer of the Commission is hereby designated to determine and act upon all applications and requests and to make appropriate order in letter form for the signature of the Secretary of the Commission in the following matters:

- (a) temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment;
  - (1) operation without an approved frequency monitor;
  - (2) operation without an approved modulation monitor;
  - (3) operation without thermometer in automatic temperature control chamber;
  - (4) operation without antenna ammeter, plate voltmeter or plate ammeter;
  - (5) operation with substitute ammeter, plate voltmeter or plate ammeter;
  - (6) operation with temporary antenna system;

(7) operation with auxiliary transmitter as main transmitter;

(b) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application;

(c) where formal application is not required, application for new or modified equipment or antenna system;

(d) change of specifications for painting and lighting antenna towers where formal application is not required;

(e) operation to determine power by direct method during program test period;

(f) relocation of transmitter in same building;

(g) operation with reduced power or time under Sections 3.57 and 3.71;

(h) approval of types of equipment as to compliance with outstanding rules and standards;

(i) all authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit;

(j) denial of requests for equipment and program tests where specifications of construction permit have not been met;

(k) withdrawal of authorizations for equipment and program tests where subsequent to the issuance of the original authorizations it appears that the terms of the construction permit have not been met;

(l) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission;

(m) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications);

(n) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating at the licensed location;

(3) The Chief Accountant of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:

(a) administration, interpretation and application of regulations promulgated by the Commission pursuant to Section 220 of the Act, relating to accounts, records, and memoranda to be kept by carriers subject to the jurisdiction of the Commission;

(b) application for extensions of time in which to file annual, monthly, and special reports required by the Commission pursuant to Section 219 of the Act;

(c) administration, interpretation and application of orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of standard broadcast stations and broadcast networks or chains, including applications for extensions of time in which to file financial and statistical statements and reports.

(d) all matters arising in connection with the administration of tariff regulations promulgated by the Commission pursuant to Section 203 of the Act, and in connection with the administration of this section in so far as it relates to the modification of requirements thereof or made pursuant thereto, as authorized in particular instances by subsection (b) thereof, and to the rejection of tariffs as authorized by subsection (d) thereof;

and, where appropriate in carrying out the foregoing, to make orders in letter form for the signature of the Secretary of the Commission.

(4) A Board, to be called "The Administrative Board," consisting of the General Counsel, Chief Engineer, Chief Accountant, and Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act upon the following matters; *provided,* however, that said Board may act in such matters only in accordance with established policies of the Commission; *provided further* that three members of said Board shall constitute a quorum:

(a) all applications for the Coastal, Coastal Harbor, Coastal Telephone, Marine Relay, Aviation, Emergency, and Miscellaneous services, except those falling under paragraphs (1), (2), and (3) of this Order;

(b) upon all radio matters of every character (except broadcast, and cases falling under paragraphs (1), (2) and (3) of this Order) within the Territory of Alaska;

(c) upon all applications for experimental authorizations except: Class II experimental stations to authorize experimentation directed toward the establishment of new services;

(d) upon all broadcast service applications as follows: for licenses following construction which comply with the construction permit; applications for construction permit and modification of construction permit involving only a change in equipment; applications for extensions of time within which to commence and complete construction; applications to install frequency control equipment; applications relating to auxiliary equipment; applications for authority to determine operating power of broadcast stations by direct measurement of antenna power; applications for modification of licenses involving only change of the name of the licensee, where the ownership or control is not affected; applications for construction permit or modification of license involving relocation locally of a studio, control point or transmitter site not involving any substantial change in service area; and applications for relay broadcast stations;

(e) upon all applications or requests for special temporary authorization other than those falling under paragraphs (1), (2), (3) or (5) of this Order;

(f) all applications or requests for emergency and renewal exemptions from the provisions of Section 352(b) of the Act;

(g) upon all uncontested proceedings involved in:

  (1) the issuance of certificates of convenience and necessity and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act;

  (2) applications from existing licensees for instruments of authorization for the Fixed Public or Fixed Public Press radio services, except applications involving (1) new points of communication, (2) changes in transmitter location other than local in character, (3) assignment of additional frequencies, or (4) involving change of policy by the Commission, or the establishment of a new type of service;

(h) upon requests for inspection of records under the provisions of Section 1.5(c) of the Commission's Rules of Practice and Procedure;

Actions taken by the Board shall be reported in writing each week to the Commission at its regular meeting.

(5) All applications or requests for special temporary standard broadcast authorizations shall be referred to the Administrative Board which shall make appropriate recommendation thereon and refer the same to a Commissioner to be named by subsequent supplements to this Order, who is hereby designated to determine, order, report or otherwise act upon all such applications or requests in accordance with established policies of the Commission.

(6) A Commissioner, to be named by subsequent supplements to this Order, is hereby designated to hear and determine, order, certify, report or otherwise act upon:

(a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; *provided,* however, that such matters shall be handled in accordance with the provisions of Sections 1.251 to 1.256, inclusive, of the Commission's Rules of Practice and Procedure;

(b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

(7) Any party affected by any order, decision, or report of any individual, board, or individual Commissioner, to whom authority is delegated under the provisions hereof, may file a petition for rehearing, as provided by Section 1.271 of the Commission's Rules of Practice and Procedure, before the Commission, and every such petition shall be passed upon by the Commission.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission has granted in a final order the application of the Nebraska Broadcasting Corporation for the construction of a new station at **Fremont, Nebraska,** to operate on **1370 kilocycles,** 250 watts day, 100 watts night, unlimited hours of operation. The final order follows a proposed finding of fact issued by the Commission on October 3.

The Commission has adopted its finding of fact and issued an order granting the application of KRRV, **Sherman, Texas,** authorizing it to move its transmitter site, install new equipment, including a directional antenna for operation of the station on **880 kilocycles,** unlimited time, 1000 watts. The station now operates on **1310 kilocycles,** 250 watts, daytime only.

A final order has been issued by the Commission granting the application of Orville W. Lyerla for a new broadcast station to be erected at **Herrin, Illinois,** to operate on **1310 kilocycles,** 100 watts night, 250 watts LS, unlimited time. In this same case also the Commission "denied without prejudice to their right to make further application to use frequency **1370 kilocycles,** or other appropriate wavelength, the applications of the Harrisburg Broadcasting Company (WEBQ), **Harrisburg, Illinois,** and of Oscar C. Hirsch, tr/as Hirsch Battery and Radio Company (KFVS), **Cape Girardeau, Missouri,** for modification of licenses. (WEBQ requested change in frequency from **1210** to **1310 kilocycles,** and KFVS requested authority to operate unlimited time on **1210 kilocycles** instead of sharing with Station WEBQ.)"

The Commission has adopted a final order denying the application of WMFF, **Plattsburg, New York,** to install new transmitter, make changes in its antenna system, change its transmitter site, and operate on **1240 kilocycles,** 1000 watts, employing a directional antenna at night. The station now operates on **1310 kilocycles,** 100 watts night, 250 watts day, unlimited time.

The Commission also has issued a final order granting the application of WSUI, **Iowa City, Iowa,** to increase its power to 1000 watts night, 5000 watts day, unlimited time, to install new equipment and to move the transmitter to a new site locally, employing a directional antenna both day and night.

A final order has been adopted by the Commission denying the application of the Thumb Broadcasting Company for permission to construct a new station at **Brown City, Michigan,** to use **880 kilocycles,** with 1000 watts power, daytime only.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No hearings or oral arguments are scheduled before the Commission in broadcast cases for the week beginning Monday, November 13.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for future broadcast hearings. They are subject to change.

December 1

Hearing Before Paul A. Walker, Commissioner,

To Be Held in Grand Jury Room No. 212, U. S. Court House, Phoenix, Arizona

KUMA—Albert H. Schermann, Yuma, Ariz.—Hearing upon Order of Revocation of License of Station KUMA.

NEW—E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz. —C. P., **1420 kc.,** 100 watts, specified hours.

December 4

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—C. P., **620 kc.,** 500 watts, 1 KW LS, unlimited time (DA night). Present assignment: **1310 kc.,** 100 watts, 250 watts LS, unlimited time.

January 8

Further Hearing

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—C. P., **950 kc.,** 1 KW, unlimited time. Present assignment: **1120 kc.,** 100 watts, daytime.

NEW—Lakeland Broadcasting Co., Willmar, Minn.—C. P., **680 kc.,** 250 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WNBH—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted C. P. to move transmitter site locally, install new equipment and vertical radiator, increase night power from 100 to 250 watts. Exact transmitter site and type of antenna to be determined subject to Commission's approval.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Granted C. P. to make changes in equipment and increase power from 100 to 250 watts.

WGTM—WGTM, Inc., Wilson, N. C.—Granted C. P. to make changes in equipment and increase power from 100 to 250 watts.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted C. P. to install new equipment and increase day power from 1 KW to 5 KW.

WCNC—Albemarle Broadcasting Co., Hickory, N. C.—Granted license to cover C. P. authorizing new station to operate on **1370 kc.**, 100 watts night, 250 watts day, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input.

WCNC—Albemarle Broadcasting Co., Hickory, N. C.—Granted modification of license to increase night power from 100 to 250 watts.

WFLA—Florida West Coast Broadcasting Company, Inc., Tampa, Fla.—Granted authority to transfer control of corporation from the Florida West Coast Broadcasting Company, Inc., to The Tribune Company. (This involves the transfer from Fred J. Lee to the Tribune Company of 10 shares, or 10 per cent, of the 100 shares of outstanding no-par value common stock of the Florida West Coast Broadcasting Co., Inc., for the consideration of $6800.00.)

WHBU—Leo M. Kennett, Anderson, Ind.—Granted transfer of control of Anderson Broadcasting Corp., licensee of WHBU, to Roy E. Blossom and Leo M. Kennett.

KTBC—State Capitol Broadcasting Assn., Austin, Tex.—Granted voluntary assignment of license from State Capitol Broadcasting Association (R. B. Anderson, President), to State Capitol Broadcasting Association, Inc.

WIS—Station WIS, Inc. (Assignor), Columbia, S. C.—Granted voluntary assignment of license from Station WIS, Inc., to The Liberty Life Insurance Company.

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Granted modification of license to increase night power from 100 to 250 watts.

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Granted modification of license to increase night power from 100 to 250 watts.

KGLU—Gila Broadcasting Co., Safford, Ariz.—Granted modification of license to increase night power from 100 to 250 watts.

KHUB—John P. Scripps, Watsonville, Calif.—Granted modification of license to increase night power from 100 to 250 watts.

WPID—Petersburg Newspaper Corp., Petersburg, Va.—Granted modification of C. P. to increase night power from 100 to 250 watts, and extend commencement date to 60 days after grant, completion date to 180 days thereafter.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KBND, Bend, Ore.; KELO, Sioux Falls, S. Dak.; KFVS, Cape Girardeau, Mo.; KPPC, Pasadena, Calif.; KRMD, Shreveport, La.; KROY, Sacramento, Calif.; KSRO, Santa Rosa, Calif.; KVEC, San Luis Obispo, Calif.; KXRO, Aberdeen, Wash.; WALR, Zanesville, Ohio; WBOW, Terre Haute, Ind.; WCOL, Columbus, Ohio; WCPO, Cincinnati, Ohio; WEBQ, Harrisburg, Ill.; WFAM, South Bend, Ind.; WGH, Newport News, Va.; WIBX, Utica, N. Y.; WJBC, Bloomington, Ill.; WKOK, Sunbury, Pa.; WLAK, Lakeland, Fla.; WLVA, Lynchburg, Va.; WMFG, Hibbing, Minn.; WPAX, Thomasville, Ga.; WTEL, Philadelphia, Pa.

KRIS—Gulf Coast Broadcasting Co., Corpus Christi, Tex.—Granted renewal of license for the period ending August 1, 1940.

The following relay stations were granted renewal of licenses for the regular period: WEGA, WEGB, WEGC, area of Chicago; WEGE, area of Lexington, Ky.; WEGK, area of Newark; KEGG, area of Portland, Ore.; WEGP, area of Reading, Pa.; WEGR, WEGS, area of Muncie, Ind.; KEGH, KEGI, area of Fort Worth, Texas; WEGT, area of Syracuse, N. Y.; WEGU, WEGV, area of Champaign, Ill.; KEGJ, KEGK, area of Los Angeles; WEHH, area of New York City; WEHI, area of Charlotte, N. C.; WEHJ, area of Chicago; WEHO, WEHN, area of Detroit; WEHQ, area of Toledo; WEID, area of Harrisburg, Ill.; WEIE, area of Richmond, Va.; WFIF, area of Lawrence, Mass.; WEIH, WEII, area of Indianapolis, Ind.; KEIE, area of Kansas City, Mo.; KEIG, area of Fort Worth, Tex.; KEII, area of Denver, Colo.; WEIR, area of Pittsburgh; KEIN, area of Walla Walla, Wash.; WEIV, area of Lynchburg, Va.; WEIY, area of Miami, Fla.; WEKB, area of East St. Louis, Ill.; KEJA, KEJB, KEJK, area of San Francisco; WEJF, WEJG, area of Cleveland, Ohio; WEJM, area of Chicago; WEOM, area of Aurora, Ill.; WEKD, area of Syracuse, N. Y.; WEKE, area of Syracuse; KEIY, area of Portland, Ore.; WEKH, WEKI, area of Peoria, Ill.; KEJN, area of Tacoma, Wash.; KEGV, area of Wichita, Kans.; WEHZ, WEKL, WEKM, area of Reading, Pa.; WEKN, area of Rockford, Ill.; KEHF, area of El Paso, Texas; WELB, WELC, area of Louisville, Ky.; WELF, WELG, area of Philadelphia; KEHJ, KEHK, area of Fargo, N. Dak.; WELQ, WELU, area of Tuscola, Ill.; WELV, area of Wheeling, W. Va.; WEMA, WEMB, area of Boston; WEMN, area of Philadelphia; WEMO, area of Pittsburgh; WEMQ, area of Boston; WEMS, area of Pittsburgh, Pa.; WEMT, area of Fort Wayne; WEIJ, area of Indianapolis; WEMU, WEMV, WEMW, area of Cleveland, Ohio; WENL, area of Columbia, S. C.; WENE, area of Lansing, Mich.; WENI, WENJ, area of Akron, WENN, WENO, area of Raleigh, N. C.; WENP, WENQ, WENS, area of Charlotte, N. C.

MISCELLANEOUS

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 9 a. m. to 11 a. m. and from 1 p. m. to 3 p. m., EST, on November 23, 1939, in order to broadcast a football game and also other programs of appropriate holiday character (provided WOSU remains silent).

KYOS—Merced Broadcasting Co., Merced, Calif.—Granted special temporary authority to operate from 5 p. m., November 7, to 3 a. m., PST, November 8, 1939, in order to broadcast election returns to the Merced area.

WAHA—Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.—Granted special temporary authority to operate a relay broadcast station in connection with station KDKA, consisting of an R.C.A. Model RB-2 2-watt pack transmitter on relay frequencies in Group E, on November 25, 1939, in connection with the Carnegie Tech football game; program to be carried over network of NBC.

WJBY—Gadsden Broadcasting Co., Inc., Gadsden, Ala.—Granted extension of special temporary authority to rebroadcast Naval Observatory time signals from NAA at Washington, D. C., over station WJBY, for the period beginning 3 a. m., EST, December 1, 1939, and ending not later than 3 a. m., EST, on October 1, 1940.

KEX—Oregonian Publishing Co., Portland, Ore.—Granted extension of special temporary authority to operate a portable MOPA 100-watt transmitter from one hour after local sunrise to one hour prior to local sunset, provided no interference is caused to any other station, on the frequency **1140 kc.**, in the vicinity of Portland, Oregon, for the making of transmitter site tests, during daytime, for the period October 31, 1939, to November 9, 1939.

Robert L. Cotton, representing 40 employees of WINS.—Denied petition for leave to intervene and of intervention in the hearing scheduled for November 27, in re application of Hearst Radio, Inc., to assign license of WINS to Metropolitan Broadcasting Corp.

Broadcast Technicians and Engineers Local No. 913 of the International Brotherhood of Electrical Workers.—Denied petition for leave to intervene and of intervention in the hearing scheduled for November 27, in re application of Hearst Radio, Inc., to assign license of WINS to Metropolitan Broadcasting Corp.

Richard T. Sampson, Riverside, Calif.—Denied petition and request to amend application for new station to change frequency from **1390 kc.** to **1420 kc.**, 250 watts, daytime only, to 250 watts, unlimited, with leave to withdraw application without prejudice.

Roy James Murray, La Crosse, Wis.—Granted motion to accept appearance filed late in re application for new station.

Colonial Broadcasters, Inc., Savannah, Ga.—Granted petition to dismiss application, *with* prejudice. Exceptions noted by counsel for petitioner.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted petition for postponement of further hearing approximately thirty days from November 7, new date to be fixed by office of the Secretary. KFIO requests C. P. to change frequency from **1120 kc.** to **950 kc.**, power from 100 watts to 1 KW, and time of operation from daytime to unlimited.

Lakeland Broadcasting Co., Willmar, Minn.—Granted motion for continuance of hearing on application for new station to operate on **680 kc.**, 250 watts, daytime, from November 7, for approximately 60 days, new date to be fixed by office of Secretary.

KMAC—W. W. McAllister and Howard W. Davis, d/b as Walmac Company, San Antonio, Tex.—Granted motion for indefinite continuance of hearing on application for C. P. to change frequency, power, and time of operation from November 14, new date to be fixed by the office of the Secretary.

KYOS—Merced Broadcasting Co., Merced, Calif.—Granted petition to intervene in the application of the Broadcasting Corp. of America, for a new station in Riverside, Calif.

KPRC—Houston Printing Co., Houston, Tex.—Granted petition to intervene in the hearing on the application of KMAC, referred to above.

KGEK—Elmer G. Beehler, Sterling, Colo.—Granted special temporary authority to operate additional time on November 11 and 17, 1939, in order to broadcast football games only.

KFGQ—Boone Biblical College, Boone, Iowa.—Granted special temporary authority to operate from 4 p. m. to 5 p. m., CST, on December 6, 13, 20, 27, 1939, in order to broadcast children's services; to operate from 7:30 p. m. to 8:30 p. m. and from 11 p. m. to 12 midnight on December 3, 10, 17, 24 and 31, 1939, in order to broadcast gospel services.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted special temporary authority to operate additional time on November 3, 1939, in order to broadcast football game only.

KUMA—Albert H. Schermann, Yuma, Ariz.—Denied special temporary authority to operate from 10:25 a. m. to 11 a. m., MST, on Tuesdays and Thursdays for a period not to exceed 30 days, in order to broadcast public school programs of an educational, musical, and dramatic class.

WAHA—Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.—Granted special temporary authority to operate a relay broadcast station in connection with Station KDKA, consisting of an R.C.A. Model RB-2 2-watt pack transmitter on relay frequencies in Group E on November 3, 1939, in connection with a historical celebration known as "Allegheny Up-Rising"; program to be carried over network of NBC. Equipment to be tested on November 2, in order to line up necessary circuits for proposed broadcast.

WAHA—Westinghouse Electric & Mfg. Co., Pittsburgh, Pa.—Granted special temporary authority to operate a relay broadcast station in connection with Station KDKA, consisting of an R.C.A. Model RB-2 2-watt pack transmitter on relay frequencies in Group E on November 4 and 5, 1939, in connection with the dedication of the new KDKA transmitter site at Allison Park in Pittsburgh; program to be carried over network of NBC.

KDNT—Harwell V. Shepart, Denton, Texas.—Granted special temporary authority to operate additional time on November 3, 10, 17, 18, 24, and 30, 1939, in order to broadcast football games only.

WSAL—Frank M. Stearns, Salisbury, Md.—Denied special temporary authority to operate from local sunset (November 4:45 p. m., EST) to 6:30 p. m. on November 23, 1939, instead of November 30, 1939, as authorized by grant on October 21, 1939, in order to broadcast a football game only.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted special temporary authority to operate unlimited time on November 13, 1939, in order to broadcast Red Cross Program as described in letter dated October 24, 1939.

Samuel M. Emison, Vincennes, Ind.—Granted motion for continuance of hearing scheduled for November 2, to a date after February 1, 1940, on application for a new station to operate on **1420 kc.**, 100 watts, unlimited time.

W1XOY—The Yankee Network, Inc., Sargents Purchase, N. H.—Granted extension of special temporary authority to continue the operation of experimental radio station W1XOY on the frequency **41000 kc.**, with 500 watts power, pending frequency shift to **39460 kc.** as authorized by renewal of license issued September 29, 1939, this authority to continue from November 6, 1939, until further order of the Commission but not beyond December 6, 1939, and is subject to the condition that no interference is caused to Government radio stations.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted special temporary authority to operate from local sunset (November, 4:30 p. m., CST) to the conclusion of Purdue University football games on November 4 and 25, 1939, in order to broadcast football games only.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts only from local sunset (November, 4:30 p. m., CST) to 10 p. m., CST, on November 3 and 10, 1939, in order to broadcast football games; to operate from 7 p. m. to 9 p. m., CST, on November 6, 1939, in order to broadcast Community Chest program.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from local sunset (November, 4:15 p. m., PST) to the conclusion of the Gonzaga University v. Portland University football game on November 26, 1939, in order to broadcast football game only and to operate an additional ten minutes after the close of the game in order to broadcast United Press Service News.

KFUO—Evangelical Lutheran Synod of Missouri, Ohio and other States, Clayton, Mo.—Granted special temporary authority to operate from 1 a. m. to 3 a. m., CST, with power of 1000 watts on December 9, 1939, in connection with a DX program.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted special temporary authority to operate additional time on November 11, 18, and 23, 1939, in order to broadcast football games only.

KVAK—Carl Latenser, Atchison, Kans.—Granted special temporary authority to operate additional time on November 10, 1939, in order to broadcast football game only; to operate from 5 p. m. to 12 midnight CST, on November 11, 1939, in order to broadcast dedication ceremonies of the new Atchison City Hall.

W1XOV—The Yankee Network, Inc., Quincy, Mass.—Granted extension of special temporary authority to continue operation of experimental station W1XOV on frequency **27100 kc.**, with 200 watts power, pending frequency shift to **30660 kc.** as authorized by renewal of license issued September 29, 1939; authority to continue from November 6, 1939, until further order of the Commission, but not beyond December 6, 1939, and is subject to condition that no interference is caused to Government radio stations.

KUMA—Albert H. Schermann, Yuma, Ariz.—Denied special temporary authority to operate from 10 p. m., MST, to the conclusion of football games on November 4 and 18,, 1939, in order to broadcast football games only.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Granted license to cover C. P. authorizing changes in equipment.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Granted license to cover C. P. authorizing changes in equipment and increase in day power from 1 KW to 5 KW.

KVFD—Northwest Broadcasting Co., Fort Dodge, Ia.—Granted modification of C. P. approving studio and transmitter sites, installation of vertical radiator and new equipment.

Columbia Broadcasting System, Inc., Portable-Mobile (area of New York City).—Granted C. P. for new high frequency relay broadcast station: frequencies **33380, 35020, 37620** and **39820 kc.**, 2 watts. To be used with applicant's broadcast station WABC-WBOQ.

Columbia Broadcasting System, Inc., Portable-Mobile (area of New York City).—Granted C. P. for new high frequency relay broadcast station; frequencies **33380, 35020, 37620** and **39820 kc.**, 2 watts. To be used with applicant's broadcast station WABC-WBOQ.

WSAV—WSAV, Inc., Savannah, Ga.—Granted modification of C. P. approving studio and transmitter site, installation of new equipment and vertical radiator.

WDEL—WDEL, Inc., Wilmington, Del.—Granted license to cover C. P. authorizing new equipment and increase in daytime power from 500 watts to 1 KW.

WWSW—Walker & Downing Radio, Corp., Pittsburgh, Pa.—Granted license to cover C. P. authorizing move of transmitter site, installation of new equipment and vertical radiator.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted license to cover C. P. authorizing installation of new equipment and increase in day power from 250 watts to 1 KW.

KAAD—Tarrant Broadcasting Co., Portable-Mobile, Fort Worth, Texas.—Granted license to operate equipment of low frequency relay broadcast station KAAD, formerly licensed to Fort Worth Broadcasters, Inc., which corporation's standard broadcast station has been deleted; frequencies **1622, 2058, 2150** and **2790 kc.**, 40 watts.

WGNY—Courier Publishing Corp., Newburg, N. Y.—Granted special temporary authority to broadcast electrical transcriptions and live talent to fill intermissions on sustaining basis only, between election return broadcasts on November 7 as authorized by grant of October 21.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Denied special temporary authority to operate from local sunset (November, 4:30 p. m. and December, 4:15 p. m., EST) to 5:30 p. m., EST, with power of 250 watts, for the period November 7 to December 6, in order to broadcast outstanding local, civic, educational, etc., programs.

Richard T. Sampson, Riverside, Cal.—Continued without date, the hearing on application for new station scheduled for November 13.

KEGT—Tarrant Broadcasting Co., Portable-Mobile (area of Fort Worth, Texas).—Granted license to operate equipment of high frequency relay broadcast station KEGT, formerly licensed to Forth Worth Broadcasters, Inc., which corporation's standard broadcast station has been deleted. Frequencies **30820, 33740, 35820** and **37980 kc.**, 2 watts.

WBIG—North Carolina Broadcasting Co. Inc., Greensboro, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

KTSW—Emporia Broadcasting Co. Inc., Emporia, Kans.—Granted license to cover C. P. authorizing changes in equipment and increase in power from 100 watts to 250 watts.

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Cal.—Granted license to cover C. P. authorizing change in transmitter site, installation of new equipment and vertical radiator, and increase in day power from 1 KW to 5 KW, employing directional antenna system for day and nighttime operation.

Edwin A. Kraft, Portable-Mobile, Juneau, Alaska.—Granted C. P. for new low frequency relay broadcast station, to be used to relay programs where wire facilities are not available to be broadcast over applicant's standard broadcast station KINY. Frequencies **1622, 2058, 2150** and **2790 kc.**, 50 watts.

WSMB—WSMB, Inc., New Orleans, La.—Granted special authority to operate during daytime hours with directive array to facilitate and expedite final adjustment and securing measured radials for proof of performance report, for a period not to exceed 30 days, in accordance with C. P. granted June 20.

L. & M. Broadcasting Co., Ottumwa, Ia.—Denied petition for rehearing and intervention in the matter of the application of KGLO, Mason City Globe Gazette Co., Mason City, Iowa, for C. P. to increase night power from 100 to 250 watts, which was granted by the Commission without a hearing on September 26, 1939.

KGB—Don Lee Broadcasting System, Los Angeles, Cal.; KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Cal.; KFSD—Airfan Radio Corp., Ltd., San Diego, Cal.—Dismissed petitions of KGB and KDB to reconsider Commission action of July 20, 1939, wherein it granted Worcester Broadcasting Corporation permission to file its application for C. P. and incorporate the record in Dockets 5381 and 5378, and to strike said application; or in the alternative that incorporated record in said dockets be striken; and two petitions of KFSD requesting Commission to reconsider said action, and to designate the material, pertinent and relevant portions of said record which should be considered in connection wtih said application and include in such designation certain specified portions of said record.

E. B. Sturdivant, d/b as Silver Crest Theatres, Yuma, Ariz.; KUMA—Albert H. Schermann, Yuma, Arizona.—The Commission postponed the hearing now scheduled for November 15, until December 1, said hearing to be held before Commissioner Walker in the city of Phoenix, Arizona. This matter involves the revocation of license of KUMA, and an application for C. P. by the Silver Crest Theatres applying for the facilities of KUMA.

WOL—American Broadcasting Co.. Washington, D. C.—Denied petition of WOL to modify final order and amend findings and conclusions in re application of Lawrence Heller for a new station in Washington, so as to delete the words "without prejudice", appearing in paragraph 5 of said proposed findings, and at the end of paragraph 4 of the Commission's order of October 18, 1939.

WJBW—Charles C. Carlson, New Orleans, La.—Granted petition requesting reconsideration of action of October 25, 1939, in designating for hearing the application of WJBW for modification of license to change operating time from specified hours to unlimited on frequency **1200 kc.**, and granted application without a hearing.

KFDY—South Dakota State College, Brookings, S. Dak.—Granted special temporary authority to operate from 3:45 to 5 p. m., CST, on November 8, in order to broadcast an address by R. C. Pollock, National Livestock and Meat Board; from 2 to 3:15 p. m., CST, on Nov. 9, in order to broadcast talk by Dr. E. C. Stakman, Plant Pathologist, and from 7:30 to 9:30 p. m., CST; November 9, in order to broadcast program in connection with banquet honoring Eminent Farmers and Homemakers; from 2 to 4:45 p. m., CST, on November 11, in order to broadcast S. D. S. C. v. Morningside football game.

WMAN—M & M Broadcasting Co., Marinette, Wis.—Granted special temporary authority to operate additional time on November 11, in order to broadcast football games only.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test the high frequency broadcast equipment of station W1XOJ authorized by modification of construction permit, on the frequency **43000 kc.**, with power not to exceed 2 KW, for the period November 16 to December 15, in order to make adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400 foot mast.

Canadian Broadcasting Corp., Ottawa, Canada.—Granted special temporary authority to operate microphones and pick-up equipment at Blaine, Washington, for picking up programs concerning American-Canadian ceremonies at International Peace Arch for transmission by Pacific Tel. and Telg. Co. lines from Blaine, Wash., to Bellingham, Wash., and to Vancouver, B. C. on November 11, 1939.

WNYC—City of New York Municipal Broadcasting System, New York City.—Granted special temporary authority to broadcast comments on election returns, live or recorded fill-in music, and other sustaining programs during the time authorized for election returns broadcasts on November 7.

National Broadcasting Co., Inc., New York City.—Granted special temporary authority to rebroadcast program material to be received from U. S. Army radio station, operating on Army frequencies aboard a bomber while on a Good-Will Flight to South America and return for the period November 9 to November 26; program material to be fed to the National Broadcasting Company network via affiliated station WIOD.

WSUI—The State University of Iowa, Iowa City, Iowa.—Entered final order (No. B-79) effective November 9, 1939, granting application for construction permit to increase power from 500 watts night, 1 KW, local sunset, to 1 KW night, 5 KW day, unlimited time; to install new equipment and move transmitter to a new site locally, employing a directional antenna both day and night, subject to proof of performance in accordance with Sec. 3.33(b) of the rules governing standard broadcast stations.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted special temporary authority to operate with directional antenna during daylight hours for the period beginning November 8, 1939, and ending in no event later than November 14, 1939, in order to facilitate establishing proof of performance.

APPLICATIONS FILED AT FCC

560 Kilocycles

WQAM—Miami Broadcasting Co., Miami, Fla.—Construction permit to install new transmitter and increase power from 1 to 5 KW.

710 Kilocycles

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Construction permit to make changes in directional antenna. Amended re antenna.

770 Kilocycles

WJAG—Norfolk Daily News, Norfolk, Nebr.—Modification of license to change frequency from **1060 kc.** to **770 kc.**, change hours of operation from limited to WBAL and WTIC to limited to WBBM.

880 Kilocycles

KVAN—Vancouver Radio Corp., Vancouver, Wash.—License to cover construction permit B5-P-1536 as modified for a new station.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Authority to determine operating power by direct method.

940 Kilocycles

WICA—WICA. Inc., Ashtabula, Ohio.—License to cover C. P. (B2-P-2316) as modified for new equipment and increase in power.

1060 Kilocycles

WJAG—The Norfolk Daily News, Norfolk, Nebr.—Construction permit to change frequency from **1060 kc.** to **770 kc.**, time from limited to WBAL and WTIC to limited to WBBM, and make changes in antenna system, requesting facilities of KFAB.

1120 Kilocycles

KTBC—State Capitol Broadcasting Association, R. B. Anderson, President, Austin, Tex.—Modification of license to change specified hours of operation on Sundays only from 6 a. m. to 8:30 a. m. and 9:30 a. m. to local sunset, *to* 6 a. m. to 9 a. m. and 10 a. m. to local sunset (facilities of WTAW).

WCOP—Massachusetts Broadcasting Corporation, Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

1200 Kilocycles

NEW—West Virginia Newspaper Publishing Co., Morgantown, W. Va.—Construction permit for a new broadcast station to be operated on **1200 kc.,** 250 watts power, unlimited time.

WOLS—O. Lee Stone, Florence, S. C.—License to cover C. P. (B3-P-2474) for equipment changes and increase in power.

WTOL—The Community Broadcasting Co., Toledo, Ohio.—Construction permit for equipment changes and increase in power from 100 to 250 watts.

WJBL—Commodore Broadcasting, Inc., Decatur, Ill.—Authority to install automatic frequency control apparatus.

1230 Kilocycles

NEW—The May Department Stores Co., Los Angeles, Calif.—Construction permit for new high frequency broadcast station at Wilshire Blvd., at Fairfax Ave., Los Angeles, Calif., on **43000 kc.,** 1 KW power, unlimited time, and special emission for frequency modulation.

WBAN—Bamberger Broadcasting Service, Inc., Newark, N. J.—Modification of license to correct description of transmitting equipment and add A-1 emission.

WBAM—Bamberger Broadcasting Service, Inc., Newark, N. J.—Modification of license to correct description of transmitting equipment and add A-1.

WBAQ—Bamberger Broadcasting Service, Inc., Newark, N. J.—Modification of license to correct description of transmitting equipment.

WBAO—Bamberger Broadcasting Service, Inc., area of New Jersey.—Modification of license to correct description of transmitting equipment.

WEGN—Bamberger Broadcasting Service, Inc., Portable-Mobile.—Modification of license to correct description of transmitting equipment.

WEGK—Bamberger Broadcasting Service, Inc., Portable-Mobile.—Modification of license to correct description of transmitting equipment.

WJHL—WJHL, Inc., Johnson City, Tenn.—C. P. for new relay broadcast station on **1622, 2058, 2150, 2790 kc.**, located in area of WJHL, Johnson City, Tenn., 40 watts, A-3. (Sections 4, 5, 6, 12c, 16, 25 and Jurat.)

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Modification of license to increase power from 1 KW, 5 KW LS, to 5 KW day and night. (Request of attorney, superseded by C. P. application.)

WEJC—National Broadcasting Co., Inc., Washington, D. C.—Modification of license to increase power to 100 watts.

WEJA—National Broadcasting Co., Inc., New York, N. Y.—Modification of license to increase power to 100 watts.

WMVB—Miami Valley Broadcasting Corp., area Dayton, Ohio.—License to cover construction permit (B2-PRY-173) for new relay broadcast station on **1622, 2058, 2150** and **2790 kc.**, 18 watts, A-3 emission.

NEW—University of Kentucky, Beattyville, Ky.—Construction permit for new non-commercial educational broadcast station to be located in high school building, Beattyville, Ky., on **41900 kc.**, 100 watts, A-3 emission.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Modification of license to utilize equipment of W2XDR (licensed to Radio Pictures, Inc.). Amended: To request reduction in power from 1 KW to 500 watts.

W2XBT—National Broadcasting Co., Inc., area of New York City.—Modification of license to change frequency from **92000** and **175000-180000 kc.** to **156000-162000 kc.**

WEJC—National Broadcasting Co., Inc., Washington, D. C.—Modification of license to increase power to 100 watts.

NEW—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Construction permit for a new high frequency broadcast station to be operated on **43,000 kc.**, 1 KW power, unlimited time, special emission. Amended: To give transmitter site as site to be determined, Syracuse, New York.

WENK—WLEU Broadcasting Corp., vicinity of Erie City, Pa.—Construction permit to install new transmitter.

WENK—WLEU Broadcasting Corp., vicinity of Erie City, Pa.—License to cover above.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—License to cover C. P. (B1-P-2481) for move of transmitter. (Wrong form.)

WAXD—The Birmingham News Co., Birmingham, Ala.—License to reinstate station.

KEIT—Midland Broadcasting Co., Portable-Mobile.—Construction permit to make changes in transmitting equipment.

W2XR—Radio Pictures, Inc., Long Island City. N. Y.—Modification of license to utilize equipment of W2XDR (licensed to Radio Pictures, Inc.). (Section 5.)

W9XAP—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license to increase power to 100 watts.

KIIQ—KMTR Radio Corp., area Los Angeles, Calif.—Construction permit for reinstatement of station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Adwell Sales Company—See Lee-Moore & Company.

Ajax Tire & Rubber Corporation, 601 West 26th St., New York, engaged in the sale and distribution of automobile tires and tubes, is charged in a complaint with misrepresentation of the number of plies in automobile tires distributed by it, and also, by means of fictitious price lists and other advertising material of the values and retail prices of its tires and tubes.

It is an established custom of automobile tire manufacturers, the complaint points out, to place on the side walls of tires and on the tire wrappings, marks indicating the number of plies contained in the tires. The purchasing public is familiar with this practice, the complaint continues, and relies upon the figures and marks in purchasing tires, having no other way of knowing the actual number of plies.

In the course and conduct of its business the respondent corporation is charged with making false and misleading representations such as "Ajax—The World's Premier Tire—Since 1904," and "Cleated 6 Six—Cleated 8 Eight." The respondent allegedly has also caused to be placed on the wrappings enclosing its tires and on the side walls of the tires certain marks, brands, numbers and insignia which purport to represent and indicate that six and eight plies respectively are used in the construction of such tires.

The complaint alleges that these representations are untrue, that the tires do not contain 6 and 8 plies respectively, but contain a substantially smaller number of plies, and that the respondent's tires and tubes have been on the market only since 1934. It is also alleged that fictitious price lists and other advertising material representing that the values and retail prices of tires and tubes are much greater than actually is the fact, are distributed to retail dealers, placing in the hands of unscrupulous dealers a means to mislead the purchasing public as to the regular values and retail prices of the tires and tubes. (3942)

Eastern Herb Company—"Chinese Herbs" will not purify the blood and rid the system of impurities is charged in a complaint issued against T. F. Hee, trading as The Eastern Herb Company, 1156 Seventh St., San Diego, Calif.

In advertisements in newspapers and periodicals, the complaint charges, the respondent claimed that "Chinese herbs—tested by centuries of actual use in China" were a competent and effective treatment for rheumatism, stomach and heart trouble, high blood pressure, weak lungs, kidney trouble, constipation, and blood disorders.

The complaint avers that the herbs are not a cure or remedy for, or a competent or effective treatment for, the ailments mentioned, and that they do not possess any substantial therapeutic properties of any nature. (3942)

Empire Monument Company—Misleading representation in the sale of imitation marble and granite tombstones and monuments is alleged in a complaint against Charles J. McClennon and Lillie M. McClennon, trading as Empire Monument Company, 108 East Rock Springs Road, N. E., Atlanta.

Advertising their products as "Marble Durastone" and "Granite Durastone," the respondents are alleged to have misleadingly represented them as being genuine natural marble or granite, when, according to the complaint, they are made from cement and other ingredients and are known as cast stone or artificial stone.

The respondents allegedly advertised that their monuments and tombstones would not fade, crumble or deteriorate, and are impervious to extreme heat or cold and to dampness or dryness, and have withstood engineering tests; that the prices at which their stones are advertised are much less than the usual prices, and that a footstone is given free with each order for a tombstone or monument, when such are not the facts. (3939)

Indian River Medicine Company, La Follette, Tenn., is charged in a complaint with making grossly exaggerated, misleading and untrue representations of the efficacy of "Scalf's Indian River Tonic," which it manufactures and distributes as a "natural vegetable compound" and "Nature's Own Health Builder."

By means of radio broadcasts and through advertisements in newspapers and periodicals, the complaint charges, the respondent has represented that its product will prevent and cure colds, build up resistance to other minor ailments, is a cure for rheumatism, a competent and effective treatment for removing the causes of sleeplessness, nervousness, indigestion, gas pressure, and aches and pains in the head and joints, is a cure for ailments of the liver, kidneys and stomach, will improve the appetite, increase weight, restore strength and build up the general health of users, has a substantial value in the treatment of asthma, affords a positive relief from chronic ailments, and is composed of natural vegetable ingredients. (3940)

Lee-Moore & Company—Alleging the sale of push cards and punch board lottery devices to dealers for their use in selling their merchandise to ultimate consumers, a complaint has been issued against Morton Cohen, trading as Lee-Moore & Co., and Adwell Sales Co., 180 West Adams St., Chicago. The complaint also charges the respondent with selling novelty articles by means of lottery devices. Among such articles are radios, knives, cigar lighters, fountain pens, cameras, rings and fishing tackle. (3938)

Maple Lawn Hatchery—See Maple Lawn Poultry Farm.

Maple Lawn Poultry Farm—Roy T. Ehrenzeller, trading as Maple Lawn Poultry Farm and as Maple Lawn Hatchery, McAlisterville, Pa., is charged in a complaint issued by the Federal Trade Commission with misrepresentations in the sale of baby chicks.

Among representations which the complaint charges were disseminated in advertisements in newspapers, trade magazines and other publications, the respondent alleged "Bloodtesting means the testing of a sample of blood from an individual bird to find out whether or not the bird is a carrier of pullorum disease (B.W.D.). This is one of the most dreaded and destructive of baby chick diseases. It is transmitted to the chick through the egg. The only sure way to prevent it is to eliminate from the flock every breeder which shows through bloodtesting that it is a reactor to pullorum disease" . . . "Every breeder, male and female, used for Maple Lawn Hatchery, is bloodtested annually and any reactors are immediately removed." (3941)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Brunswick Worsted Mills, Inc.—A Connecticut manufacturer of worsteds and other woolen fabrics and its sales agent, a New York firm, have been served with an order requiring them to cease and desist from misleading representations in the sale of their products to manufacturers of men's suits and other merchandise.

Respondents are Brunswick Worsted Mills, Inc., of Moosup, Conn., and George O. Leckie and Henry C. Haskell, trading as Leckie & Haskell, 257 Fourth Ave., New York. The Commission found that prior to June, 1938, they sold certain worsted and other products or fabrics manufactured by Brunswick from a mixture of fibers consisting of 80 per cent wool and 20 per cent rayon, without disclosing by tags, labels, advertising, or in sales promotional descriptions, that those products contained rayon in substantial amount.

The findings point out that rayon, when so mixed with wool, is indistinguishable by manufacturers and the public for a wholly wool product or fabric.

Sale of fabrics composed partly of wool and rayon without full and non-deceptive disclosure of the fiber content, is prohibited, under the order, which requires that there be stated the true names of the fibers in the order of predominance by weight and the percentages of the fibers present. The order provides, however, that it shall not be necessary to state the percentage of rayon or fiber other than wool, if such other fiber is used exclusively for decorative purposes and is plainly visible as a decoration, and is not more than 5 per cent of the whole fabric or product by weight. (3880)

Kirk Medicine Company—Prohibiting misleading representations in the sale of medicinal products, a cease and desist order has been issued against Lou Sterling and Walter Fehr Gardner, trading as Kirk Medicine Company, Hollywood, Calif., distributors of a preparation designated as "Kirk's Tablets," "Kirk's Pancreatin Compound Tablets" and "Kirk's Tablets Pancreatin Compound." (3770)

Laing, Harrar & Chamberlin, Inc.—A cease and desist order has been issued requiring Laing, Harrar & Chamberlin, Inc., Philadelphia, and A. J. Sanborn Sons, Inc., and Harry Fain and Alfred Picerno, all of Providence, R. I., to discontinue restraint of trade practices in the purchase and sale of shoe findings and leather and supplies for shoe manufacturers, shoe stores, and shoe repair shops.

Laing, Harrar & Chamberlin, Inc., according to findings of the Commission, during 1937, entered into an agreement with its customers, A. J. Sanborn Sons, Inc., Harry Fain, trading as Fain Leather Company, and Alfred Picerno, trading as Cipolla and Picerno, whereby it would not sell its products to Irving Schretter, trading as Sadler Leather Company, providence, a wholesale dealer and competitor of the 3 Providence customers, unless those customers consented that such sales could be made.

The respondents also were found to have entered into an agreement during 1937 that the 3 Providence customers would not purchase any articles sold by Laing, Harrar & Chamberlin if that corporation violated its agreement and sold to Schretter contrary to the 3 customers' desires.

As a result of the understanding, it was found, Laing, Harrar & Chamberlin, between December, 1937, and May, 1938, discontinued selling its articles to Schretter, who had been a substantial customer of the Philadelphia house.

The Commission's order prohibits the 3 respondent Providence dealers from carrying out agreements for boycotting or threatening boycott or other coercive methods to induce manufacturers or distributors to refrain from selling to any wholesale dealer, and from interfering, in any manner, with a competitive wholesale dealer's source of supply.

Under the order, Laing, Harrar & Chamberlin, Inc., is directed to cease entering into any agreement or conspiracy for the purpose or with the effect of restraining or monopolizing competition, and to discontinue aiding or abetting the execution of such agreement or combination by refusing to sell its products to wholesale dealers because of inducements offered, or coercive methods used, by competitors of such wholesalers. (3725)

Leckie & Haskell—See Brunswick Worsted Mills, Inc.

E. A. Morgan and Company, and E. A. Morgan, president and owner of that corporation, 412 Building Industries Building, Cincinnati, packagers and distributors of a powdered preparation designated as "Run-Safe," "Run-Free" and "Runless," have been ordered to cease and desist from representing that the product, when applied to silk hosiery or lingerie, will insure it against runs, snags or breaks.

The Commission finds that by statements on labels affixed to its containers and by other means, the respondents have represented to prospective purchasers: "Run-Safe: Cuts Hosiery Expense in Half. Insures your hosiery and lingerie against runs, snags and breaks" . . . "Sets the color, no more rotting or fading." . . . "Rain-Spot Proof."

The Commission finds that the product will not stop or prevent runs, snags and breaks in silk hosiery or lingerie; will not prevent rotting or fading; will not set or hold the color of silk hosiery or lingerie; will not render it rain-spot proof or save for its users approximately 50 per cent of hosiery or lingerie costs, but may increase the resistance to runs in certain types of hosiery.

The respondents are ordered to cease and desist from representing, through use of the terms "Run-Safe," "Run-Free" and "Runless" or other similar terms, or in any other manner, that the product will stop or prevent or insure against runs, snags or breaks, will set or hold the color of hosiery or lingerie, will save approximately 50 per cent of costs or render the hosiery or lingerie rain-spot proof. (3771)

Wahl Company, 1800 Roscoe St., Chicago, manufacturer and distributor of "Eversharp" fountain pens, has been ordered to cease and desist from representing, through use of the term "Leak-Proof," that its pens will not leak, and from misrepresenting the ink capacity of its fountain pens.

Findings of the Commission are that in advertisements in magazines, periodicals and other publications, the respondent, in depictions and statements, has represented that ink cannot leak from its Eversharp fountain pens equipped with the so-called "Safety Ink Shut-Off" device, when the pen is uncapped and the pen point exposed; that ink cannot leak from the pen into the cap when the cap is screwed tightly over the pen point, and that Eversharp pens possess more than twice as much ink capacity as the fountain pens offered for sale and sold by competitors of the respondent.

The Commission finds that under certain conditions ink can and does leak from pens equipped with the shut-off device, but in no greater amount than it does in the case of other high quality fountain pens not equipped with the device, and only under substantially the same conditions. It also finds that Eversharp fountain pens do not hold more than twice as much ink as fountain pens sold by competitors, and in fact such pens have an ink capacity of substantially less than the amount claimed.

The respondent company is ordered to cease and desist from representing through use of the term "Leak-Proof," or any similar terms, that its fountain pens will not leak, until they are so designed and constructed that they will not leak. The respondent is also ordered to cease representing that its fountain pens are equipped with any special device which will prevent leaking, until they are so equipped, and from misrepresenting the ink capacity of its fountain pens. (3836)

STIPULATIONS

The Commission entered into the following stipulations during the week:

American Inventions Company—Joseph Zweigenthal and William A. Safrin, trading as American Inventions Company, 130 West 17th St., New York, sold a type of lantern advertised as being capable of electrocuting mosquitoes and other insects, under the names "Elec-Ray Insect Killer," "Elec-Ray Insect Destroyer" and "Mosquito Elec-Ray Lantern." The respondents stipulated that they would desist from using in their advertisements or their trade names representations tending to convey the impression that insects coming in contact with the device would be instantly killed or destroyed, or that light furnished by the device would attract flying insects in sufficient numbers to make the lantern of distinct value in the control of such insects. The respondents also agreed to cease making representations which directly assert or imply that their apparatus has been patented or has been certified by the National Board of Fire Underwriters or Underwriters Laboratories; that sellers would have no competition, or that salesmen would earn $1,000 during a summer, when such are not the facts. (2560)

AP Parts Corporation, 1801 Spielbusch Ave., Toledo, distributor of automotive mufflers and exhaust and tail pipes, will discontinue printing the word "Manufacturers" on its stationery or in advertising matter as descriptive of its business, and will cease using that word or other words of similar import or pictorial or other representations the effect of which is a tendency to convey the impression that the corporation makes the products it sells or owns or controls the factory in which they are manufactured, when these are not the facts. (2559)

Claremont Cravat Company, Inc.—See Haband Company.

Gropper Manufacturing Company, Inc., 95 Lorimer St., Brooklyn, manufacturer and assembler of toys, agreed to cease employing the slogan "Made in U. S. A." on the containers of toy assortments or in any other way so as to imply that they are composed of American-made products each item of which has been made in this country, when such are not the facts. The stipulation provides that if an assortment consists in part of both American-made and foreign-made items, and the slogan is used to designate those made in the United States, it shall be accompanied by suitable phraseology to indicate clearly that some parts of the assortment are made elsewhere than in the United States. (2558)

Haband Company—A seller and a manufacturer of men's neckties have entered into stipulations to discontinue misleading representations in the sale of their products. The respondents are Max Habernickel, Jr., and John A. Anderson, trading as Haband Company, 680 Madison Ave., Paterson, N. J., and Clermont Cravat Company, Inc., 39 West 29th St., New York.

Both respondents agreed to cease employing on labels or in any other manner statements directly asserting or implying that the interlinings of neckties they sell are composed of 100 per cent wool, and to discontinue using the term "100 per cent wool" or the word "wool," alone or with other words, the implication being that such interlinings are wholly wool, when such is not a fact.

The stipulations provide that if the interlining is composed substantially of wool and partly of other materials, the word "wool," if employed to refer to the wool content, shall be clearly accompanied by other words to show that material other than wool is present.

Each respondent agreed to cease making representations to the effect that its necktie underlinings are composed of wool in such substantial quantity as to insure longer wear and better tying qualities, when such are not the facts.

Both respondents also agreed to desist from use of the words "All Silk" as descriptive of neckties not made wholly of silk. The stipulations provide for certain qualifying language to be printed if the ties are composed in substantial part of silk and the word "silk" is used to describe the silk content.

If the products are composed wholly or partly of rayon, such fact is to be made clear in the labeling, invoicing, advertising matter and sales promotional literature, according to both stipulations. (2556-2557)

Leacock & Co., Inc., 230 Fifth Ave., New York, engaged in manufacturing and importing quality and decorative linens, agreed to cease using the word "Linex," independently or in connection with other words, in advertising matter or otherwise, to designate products not made of the fiber of flax, but of a mixture of a natural fiber called ramie, and viscose rayon. The respondent also stipulated that it would discontinue misleading advertising, branding or labeling of any article composed wholly or partly of rayon, agreeing to make full and non-deceptive disclosure of the fiber and other content by clearly designating each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent. In this connection the respondent also agreed to state the percentage of any fiber present in less than a substantial amount, or in any case less than 5 per cent; as, for example, "Ramie and Rayon," when the article is composed of ramie and rayon throughout, with the amount of ramie at least equal to or greater than the rayon proportion. (2562)

Renu-Ink Manufacturing Company—Roger Williams, trading as Renu-Ink Manufacturing Company, 140 West 42nd St., New York, in the sale of "Renu-Ink," a treatment for typewriter ribbons, stipulated that he would cease representing that the product makes typewriter ribbons like new or practically as good as new. instantly or in less than one minute, or at all, or that renewed typewriter ribbons will last as long as new ones. Williams also stipulated that he will discontinue advertising that "Renu-Ink" is "unconditionally guaranted," when such is not a fact. The stipulation provides that if the respondent uses the words "guarantee" or "guaranteed" or language of similar meaning in advertising, he will make clear disclosure in direct connection therewith of exactly what is offered by way of security, as, for example, refund of purchase price. (2563)

Sierra Press—William Lerner, trading as Sierra Press, 629 Gough St., San Francisco, a printer specializing in wedding invitations and similar material, agreed to cease employing the words "Process Engraved" or "Engraved" or words of similar meaning in his advertising matter, alone or in connection with other words, the effect of which may tend to create the impression that the products so designated are made from inked engraved plates by the engraving process, when such is not a fact. The stipulation points out that the respondent's process consists of the use of a powdered chemical, applied to typewriting while the ink is wet and subjected to a baking process to present a raised letter effect. (2561)

Thomson-Heywood Company—Engaged in the interstate sale of literature dealing with character analyses, personal readings and personal development, Mrs. L. Thomson, trading as Thomson-Heywood Company, 821 Market St., San Francisco, has entered into a stipulation to discontinue misleading sales representations.

In the sale of her "Strictly Personal and Confidential Astro-Psychological Reading" and other pamphlets, the respondent agreed to cease representing, among other things, that the reading of one's "earth sign" is the only way to obtain authentic or convincing information regarding one's future outlook, and that any person, regardless of environment, age or circumstance, can, by following the respondent's instructions, rapidly develop executive capacity and inventiveness, bring business right out of the air, command all the talent in the world necessary to achieve his purpose, acquire omniscience, cure physical disorders by merely refusing to think of them and by imagining a healthy condition, and attain success with as absolute certainty as the laws of electricity and mechanics. (2555)

Tylac Company, Monticello, Ill., manufacturer of a composition material known as "Tylac," intended for use as a wall covering, agreed to cease employing in its advertising matter or on stationery, the term "tile," alone or in connection with the trade name "Tylac" or with other words, so as to imply that the products it sells are tile, unless in immediate connection with the word "tile" there appear other words designating the material of which the products are made or which indicate clearly that they are other than ceramics. The stipulation points out that the respondent's products are not ceramics or hard clay products baked in kilns, such as the term "tile", unqualified, is generally understood to mean in the building trade and by the public. (2564)

Pope Pius XII Discusses Radio

Pope Pius XII's remarks about the use of radio by the Catholic Church topped this week's Code developments.

In an encyclical addressed to all Catholics in America, Pope Pius said:

"We have learned with no little joy that the Marconi radio—marvelous invention and excellent image of the apostolic faith that embraces all mankind—is frequently and advantageously put to use in order to insure the widest possible promulgation of all that concerns the church. We commend the good accomplished. But let those who fulfill this ministry be careful to adhere to the directives of the teaching church, even when they explain and promote what pertains to the social problem; forgetful of personal gain, despising personal popularity, impartial, let them speak 'as from God, before God, in Christ.'"

Joseph Alsop and Robert Kintner, outstanding Washington columnists, interpreted the paragraph as "a direct rebuke to Father Charles E. Coughlin."

The NAB Code committee, headed by Edgar L. Bill, WMBD, will meet in Washington on November 28 for consideration of current problems. The following day the committee will have lunch with representatives of some of the leading women's groups in the country.

The Code will be the topic of discussion for Mutual's "American Forum of the Air" on Sunday, November 19, at 8 p. m., eastern standard time. The speakers: Gen. Hugh S. Johnson, Ed Kirby, Morris Ernst, general counsel of the American Civil Liberties Union, and Martin Codel, publisher of *Broadcasting* magazine.

That afternoon, from 1.45 to 2 o'clock, the Rev. Edward Lodge Curran, president of

(Continued on page 3838)

NAB STUDIES UTILITIES

The NAB is engaged in a study of the radio-utility situation throughout the United States.

Replies to the first letter seeking information indicate that there are scores of stations which have yet to receive their first dollar of utility revenue. On the other hand, some stations number utilities among their best customers.

A letter asking stations reporting utility business for additional information is soon to be mailed. On receipt of the data, the first part of the utility study will be distributed to members.

CHRISTMAS PROMOTION

The conviction that the closer 100 per cent availability of radio receivers is approached, the more secure will be the industry's position is the basis of the NAB-RMA December promotion.

Details of "Radio Christmas" reached all NAB members this week and a large number of stations have already reported that the plan will get under way within the next two weeks.

A number of utilities are also cooperating with the broadcasters in circulation promotion by inserting stuffers

the International Catholic Truth Society, will make a speech on the CBS network about the Code.

This week, Paul W. Morency, WTIC, District 1 director, and Mr. Kirby discussed the Code at a meeting of the Radio Council of Western Massachusetts in Springfield. Mr. Kirby also addressed the Indianapolis Advertising Club.

On the CBS network last Sunday, Samuel B. Pettengill, former congressman from Indiana, assailed the Code as "a threat against the free speech of a free people." His speech was distributed in printed form by the National Committee to Uphold Constitutional Government (New York) which recently asked broadcasters to contribute to a fund to fight for "the freedom and security of radio."

CHRISTMAS PROMOTION

(Continued from page 3837)

in their December bills. These direct their customers' attention to specific programs and suggest the purchase of new and additional radios for Christmas.

Utilities, more than any other group, share the broadcasters' desire for increased listening and increased listeners. The response is reflected on the listener' monthly bill for electricity.

FREE OFFERS

The Bureau of Radio Advertising received notice from member stations of the following free offers during the past week:

Look Magazine
Dodd, Mead & Company (Book Publisher)
Aetna Casualty & Surety Co. (Safety Campaign).

These companies have been advised that acceptance of their requests for free time would constitute violation of the NAB Code. They have been invited to pay for time.

Cost-Per-Inquiry

The Best Company, Anderson, Indiana, has withdrawn its request for radio advertising on a percentage basis, following notification by NAB that such dealings are considered bad business practice by member stations. The company is arranging to buy time at the regular rates.

The Northwest Radio-Television Institute, through the Bromley Advertising Agency, Minneapolis, is seeking to place radio advertising on a cost-per-inquiry basis. Member stations and the Bureau of Radio Advertising have advised both concerns that their offer is in violation of the NAB Code.

Bureau of Radio Advertising

The Bureau of Radio Advertising has started an informal bulletin service to all members, covering activities of the Bureau and other information of related interest. Two releases have gone out to stations, and the Bureau will welcome further suggestions or contributions from the membership. It is planned to have these bulletins supplement the printed trade studies and special releases already supplied to stations through the Bureau of Radio Advertising.

THE POPE'S ENCYCLICAL

Enclosed with this issue of the REPORTS are five copies of a column by Joseph Alsop and Robert Kintner, outstanding Washington commentators, about the relationship between the NAB Code and Pope Pius XII's latest encyclical. Members should place these where they will do the most good. Additional copies are available at headquarters.

FREC FORUM REPORT

In its first issue, the "Service Bulletin of the FREC" announces that a report on forum programs made by Paul M. Sheats of the University of Wisconsin is being prepared for submission to broadcasters and educators. Broadcasters will be especially interested in this report because of its connection with the "controversial public issues" section of the NAB Code.

GOVERNMENT SEEKS PROGRAM CONTROL IN SOUTH AMERICA

Moves toward complete governmental control of radio programs are reported from Uruguay and Argentina. The Uruguayan President has sent to Congress a bill to that effect, while a governmental commission recommended similar legislation in Argentina after a year's study.

FCC COMMITTEE RECOMMENDS "CONDITIONAL" SPONSORSHIP FOR TELEVISION

Warning against pitfalls in giving television a "green light" prematurely, the FCC Television Committee this week nevertheless acknowledged recent progress in that field to the extent of recommending liberalization of exist-

ing regulations to help popularize this method of visual broadcast.

While the Committee does not favor regular commercialization of television at the present time, it does feel that clarification and simplification of rules would encourage the prospective new industry to advance beyond the "technical" and "experimental" stages.

These opinions are contained in the Second Report of the Television Committee, filed with the Commission today. The report is signed by Commissioner T. A. M. Craven, committee chairman; Norman S. Case, and Thad H. Brown. This is the same committee which, in its First Report, dated May 22, 1939, declared television "barely emerging from the first or technical research stage" and warned against setting up standards that might "freeze" orderly development. The Second Report was prompted by consideration of applications for increased television facilities.

The Committee notes certain television progress since last May, but feels that a "crucial" stage has been reached. Less than a thousand television receivers have been sold since that time, and nearly all of these are in New York City. To date only seven of the 19 channels available for television have been developed to the point of initial readiness for technical service of any character.

Yet the Committee is of the firm conviction that, while not eager to purchase receivers at this time, "the public does not desire to be deprived of the opportunity to enjoy the benefits of television when it is ready for public service." It is the Committee's further opinion that progress henceforth "is directly dependent upon the development of public interest in television as a broadcast service, and that such interest can only be developed through the broadcast of programs that have a high public appeal."

Accordingly, the Committee makes specific recommendations which embrace:

1. Greater public participation in experimental operation.
2. Construction of more stations by properly qualified applicants.
3. Elimination of any regulation which interferes with proper business economic processes.
4. Adoption of a license policy for television broadcasters.
5. Allocation of the seven lower frequency channels as follows: 3 channels to metropolitan districts in excess of 1,000,000 population; 2 channels to areas of between 50,000 and 1,000,000, and 1 channel for districts of less than 50,000.
6. Stimulation of technical development on additional channels now reserved for television.
7. Development of program service in conjunction with research and experimentation.
8. Establishment of minimum requirements for television transmitters.
9. Protection of the public, as far as possible, against loss through obsolescence in receivers.
10. Modification of prohibition against commercialism to permit sponsorship on experimental programs, under certain conditions.

"While the Commission should take no action which discourages pioneering in sound business enterprises, it also has its duty to the public," declares the Committee. "No interests should be permitted to raise public hopes falsely, nor to encourage public investments where the state of scientific or economic development leaves any doubt that such hopes and expenditures are justified for the use of the public property in the radio spectrum. . . . Television should not be expected to reach over night the objectives which are necessary ultimately. It seems logical to conclude that a normal healthy growth is the most certain road to a sustained life of public service."

Regarding commercialization, the report said, in part:

"One company suggested to the Committee that there is a real need for relaxing the Commission's existing rules restricting commercial sponsorship for broadcasting television programs. It was asserted that such removal would stimulate the development of television as a service to the public without in any way retarding logical progress. It was also stated that lifting the existing restrictions would assist in ameliorating the heavy financial burden being shouldered by those pioneers who are endeavoring to develop television program technique, and improved program service to the public would follow. It was claimed that such an improvement would result in better public appreciation and, consequently, more rapid progress in the evolution of television. The organization which made this proposal has pioneered extensively in the development of television and its contributions of capital as well as practical achievements have influenced favorably the advancement of television.

"The Committee has given careful and sympathetic consideration to this proposal, particularly from the standpoint of estimating the extent to which the present restrictions against commercialization constitute a barrier to orderly progress. The Committee is of the opinion that at present the claimed advantages of removing the restrictions against commercialization of television do not outweigh the potential disadvantages.

"Today there is no circulation to attract any sponsor to television as a logical media for securing public response. It appears obvious that before commercialization of television can become feasible, the service should be ready to sell on some reasonable basis of circulation value to the sponsor. Since only a few experimental stations in operation today are rendering broadcast service to not more than 1000 receivers, there is no convincing argument that the removal at this time of the ban on commercialization will affect the development of television in any positive manner.

"On the other hand, there is grave possibility that premature commercialization could retard logical development. There is particular danger that advertising rather than entertainment or education might easily become a paramount factor in programs. In addition, premature commercialization may easily lead to a scramble for television channels by unfitted applicants who have no real public service concept. It may precipitate many stations in local markets before any source of good programs is available. Consequently, it is certain that public reaction to television service would be adverse.

"The Committee does not believe that immediate commercialization of television program service would increase the sale of receivers. On the contrary, it might easily result as a retardation of the ultimate sale of such receivers on a large volume basis.

"Furthermore, immediate commercialization threatens to open the door wide to financial exploitation of the public without any sound basis therefor. And, finally, premature commercialization might crystallize employment and wage levels before a new-born art and industry has any opportunity to gain sufficient experience to obtain the stability in this phase of the service which is so essential to employer and employee alike.

"It may be that the time is fast approaching when pioneers must receive a return not only on their huge investment but also must secure remuneration for operating expenses. Consequently, the Committee feels that program sponsorship by advertisers is one of the logical means of support for the new television service to the public when such service is ready. The Committee recognizes a particular need for keeping the Commission's regulations abreast of progress. Therefore, applicants should be given the opportunity, at any time, of securing changes in the rules if, as a result of a public hearing, they can demonstrate that public interest will be served by such changes.

"While the Committee does not recommend any radical change in principle in existing rules relating to commercialization, it does suggest a clarification and simplification of existing rules in this respect.

"It should be made clear that the rules do not constitute an artificial barrier to the logical development of program technique, including the development of methods for making television useful as an advertising media conforming to favorable public reaction. Also it should be apparent that sponsorship is not prohibited, provided such sponsorship and the program facilities or funds contributed by sponsors are primarily for the purpose of experimental program development. The intent of the rules should be to prevent commercial exploitation of television as a service to the public prior to demonstrated proof of its readiness for regular operation in accord with public interest, convenience or necessity. Other than such alterations, the Committee is of the opinion that the Commission should not permit regular commercialization of television at present, but that instead the Commission should hold itself ready to consider the problem anew when general development progresses further into practicalities."

BROADCASTING ECONOMICS AGAIN DISCUSSED BY THE COURT

The Court of Appeals of the District of Columbia has dismissed three broadcasting cases including the appeals of WLAC, Tri-State Broadcasting Company, and Tri-City Broadcasting Company.

In the Tri-State case, licensees of station KTSM, the Court dismissed the case. This was an appeal from a decision of the Federal Communications Commission of June, 1938, in which the Commission granted Dorrance D. Roderick a construction permit for a new station to use 1500 kilocycles, 100 watts, unlimited time.

In January, 1937, the Commission granted Roderick's application and Tri-State Company appealed from that decision to the Court of Appeals. The Court reversed the decision of the Commission and remanded the case for further judgment. The Commission vacated its decision of January, 1937, and reopened the case. In June, 1938, the Commission again granted the Roderick application. Tri-State again appealed to the Court on the economic grounds and that it had not had an opportunity to present an oral argument to the Commission.

In its decision in this case the Court said in part:

"Thus, we are called upon to review the finding of the Commission in respect of economic injury resulting from the granting of the license for the new station, to determine whether or not the competition expected to result therefrom will be destructive and ruinous as urged by the appellant.

"The owner of an existing station may well contend in any case that a new station may reduce the present income of his station, but it requires more to justify the Commission refusing to grant the new license. A mere showing that the income of an existing station may be reduced if another station enters its field is not sufficient. The appellant recognizes that such can not be the criterion of economic injury herein, as it charges that the competition complained of will be destructive and ruinous."

Discussing the question of allowing oral argument the Court says:

"We may not consider the additional grounds advanced by appellant for reversal, except that one which urges the invalidity of the Commission's order because it failed to afford appellant an opportunity to present oral argument before the full membership of the Commission, which had not at any time heard oral argument. Obviously oral argument under the statute is an important right to a party claiming it will suffer economic injury from an additional facility allowed by the Commission. It might very well induce the Commission to make one finding, when, without such argument, it may have made a contrary finding. Right of argument is an indispensable step to a fair hearing."

The Court held, however, that the appellant did not make any request of the Commission for oral argument. The Court on this question says:

"It (Tri-State) failed to give the administrative body an opportunity to grant oral argument, and can not be heard to complain thereof for the first time before this court. It is very clear in the present case that no error occurred in this respect."

The Court also dismissed the WLAC case. This was an appeal from a decision of the Federal Communications Commission of May, 1938. The Commission denied rehearing to WLAC on its granting of an application of WMEX for a construction permit to operate on 1470 kilocycles, 5000 watts, unlimited time using a directional antenna. WLAC appealed because of the alleged failure of the Commission to make findings with respect to interference WMEX would cause to WLAC. WLAC operates on 1470 kilocycles, 5000 watts, day and night.

This is a companion case to the Yankee Network case rendered by the Court, and arose out of the same proceeding. (See NAB Reports, Aug. 25, 1939, p. 3676.) In its conclusions in this case the Court says:

"We have said that if the Commission's prior consideration of a previously filed and copending application—where request has been made for joint consideration—has 'seriously prejudiced' an application we would have a case in which we might say that the latter applicant has an appealable interest as a person aggrieved. However, we cannot say, under the circumstances of the present appeal, that appellant has been prejudiced as a matter of law. The Commission's rule, permitting a joint hearing of pending applications, is certainly a reasonable one. As appellant, full-handed with knowledge of the situation, failed to request such a joint hearing, he is in no position to demand—and we have no power to require—that the Commission suspend its normal functions and reopen its proceedings in order to determine the large questions which he seeks now to have determined. For, indeed, large and important questions will be involved in determining whether the Commission's Rule 119 should be amended and kilocycles frequency 1470 reallocated for clear channel purposes; whether the classification of Station WLAC should be changed from a regional to a clear channel station; whether Station WLAC should be required to install directional antenna; whether Station KGA should be permitted to change its frequency from 1470 to 950 kilocycles; whether or not—and if so to what extent—the Commission should integrate into its rules the 'Standards of Good Engineering practice' or provisions of the Havana Treaty.

"So long as the Commission complies with the mandate of the statute it has, and should have, wide discretion in determining questions both of public policy and of procedural policy, and in making and applying appropriate rules therefor. It is not the function of this Court to direct the Commission as to the routine of its administrative procedure, so long as it conforms to the law. No violation of law is revealed by the record or shown by appellant.

> "In view of our determination of the foregoing questions it is unnecessary to consider other assignments and contentions presented by appellant."

No written decision was rendered by the Court in the Tri-City Broadcasting Company case. The Court stated:

> "Upon consideration of the motion to dismiss this appeal, and since it appears from the statement of reasons for appeal that appellant has stated no grievance which if true would justify this Court in reversing the decision of the Federal Communications Commission appealed from, it is
>
> "Ordered that the appeal of the Tri-City Broadcasting Co., Inc., from the decision of the Federal Communications Commissions denying appellant's application for a construction permit, effective March 27, 1939, be and hereby is dismissed."

CIVIC INTEREST CONSIDERATION IN BROADCAST GRANTS

The words "public necessity" in the Communications Act "are not to be construed narrowly, but rather as calling for the most widespread and effective broadcast service," declared the FCC in granting application of F. W. Meyer for construction permit for a new broadcast station in Denver, Colorado.

The Commission explains:

> "Nothing in the Communications Act, our Rules and Regulations or our policy requires a finding of a definite need to support the grant of an application. Cases where such a finding of need is not made are, however, to be distinguished from situations in which a real lack of broadcast service is made clear. . . . In the latter class of cases the Commission will give due consideration to this fact. The 'public interest, convenience or necessity' which the statute provides as the basis for a grant, cannot be construed as a mandate that actual necessity for the particular facilities must be shown. Neither the disjunctive form nor the public convenience as an independent factor is to be entirely ignored. Indeed the words 'public necessity' in the Act are not to be construed narrowly, but rather as calling for the most widespread and effective broadcast service possible."

Opposition to granting the application argued that no public need is shown for additional broadcast facilities in Denver. All of the stations operating full time in that city are affiliated with the national chains. Thus the hours during which these stations may reach the greatest number of listeners are not available for local broadcasting. Local governmental, educational, civic, charitable, and community organizations thus lack an effective means of reaching the radio public in the vicinity.

The Meyer station proposes to operate on 1310 kilocycles with power of 100 watts at night and 250 watts until local sunset, unlimited time.

The application was denied originally on May 18, 1939. Subsequently, the applicant filed a petition for rehearing, which was granted and the case was reargued November 9th last. Under all the circumstances and evidence presented, the Commission concludes that "public interest, convenience and necessity" will be served by granting the application.

STATIONS COOPERATE TO BETTER SERVICE

An example of public benefit resultant from broadcast stations working out mutual problems of power allocation was revealed when the FCC granted applications of stations KTUL, WIRE and KLO for increased power facilities.

The Tulsa Broadcasting Company, Inc., operating KTUL at Tulsa, Oklahoma; Indianapolis Broadcasting, Inc., operating WIRE at Indianapolis, Indiana, and the Interstate Broadcasting Corporation, operating KLO at Ogden, Utah, are the stations who cooperated to improve service in those areas.

The three stations were each operating with 5 kilowatts day and one kilowatt at night. Each wanted to increase its night power to five kilowatts. But they couldn't do that independently without interfering with one another. So they got together and worked out technical details whereby, through the use of directional antenna, they will minimize the interference problem and, at the same time, be able to extend their respective services.

When the joint arrangement was presented to the Commission it was approved without delay. The case is typical of mutual effort of other broadcasters who, by using modern engineering methods, are able to improve broadcast quality and coverage, the FCC said.

809 STATIONS

During the month of October, 1939, the Federal Communications Commission issued operating licenses to eight stations. The Commission granted eleven permits for the construction of new stations and cancelled two construction permits which it had previously granted. A comparative table by months follows:

	Jan. 1	*Feb. 1*	*Mar. 1*	*Apr. 1*	*May 1*	*June 1*	*July 1*	*Aug. 1*	*Sep. 1*	*Oct. 1*	*Nov. 1*
Operating	722	727	729	732	734	735	735	738	739	743	751
Construction	42	39	37	37	38	38	43	56	59	57	58
	764	766	766	769	772	773	778	794	798	800	809

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission this week adopted a final order "dismissing as in default" the application of the Seaboard Broadcasting Corporation for a construction permit for the erection of a new station at **Savannah, Ga.,** to use **1310 kilocycles,** 100 watts night, and 250 watts day, until LS, unlimited time. The case was designated for oral argument before the Commission on October 13 and "applicants failed to appear and present oral argument."

Final order was also entered by the Commission denying the application of WMBR, **Jacksonville, Florida,** to change its frequency from **1370** to **1120 kilocycles,** to increase its power from 100 watts night and 250 watts day to 500 watts night and 1,000 watts day, on an unlimited time basis, to move its transmitter locally and use a directional antenna at night.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearing are scheduled before the Commission in broadcast cases for the week beginning Monday, November 20. They are subject to change.

Monday, November 20

NEW—Sanfeliz Enrique Abarca, San Juan, P. R.—C. P., **580 kc.,** 1 KW, 5 KW LS, unlimited time.

NEW—United Theatres, Inc., San Juan, P. R.—C. P., **580 kc.,** 1 KW, 1 KW LS, unlimited time (DA day and night).

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WLBL—Board of Regents, University of Wisconsin, Stevens Point, Wis.—Granted voluntary assignment of license from Board of Regents, University of Wisconsin, to State of Wisconsin, Department of Agriculture.

KARM—George Harm, Fresno, Calif.—Granted construction permit to make changes in equipment and increase power from 100 to 250 watts.

KVOS—KVOS, Inc., Bellingham, Wash.—Granted construction permit to make changes in composite equipment and increase power from 100 to 250 watts, upon condition that the grant is not to be construed as a finding for renewal of license of KVOS nor upon application of Bellingham Broadcasting Company, nor upon any of the issues involved in these cases.

KHAS—The Nebraska Broadcasting Co., Hastings, Nebr.—Granted modification of construction permit approving transmitter and studio sites, installation of vertical radiator, and increase in night power from 100 to 250 watts.

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyo.—Granted modification of license to increase night power from 100 watts to 250 watts.

KTUL—Tulsa Broadcasting Co., Inc., Tulsa, Okla.—Granted modification of license to increase night power from 1 KW to 5 KW, employing directional antenna for nighttime operation, and make changes in DA system.

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Granted modification of license to increase night power from 1 KW to 5 KW and make changes in directional antenna system.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Granted modification of license to increase night power from 1 KW to 5 KW and to change phasing in directional antenna system.

KMAC—W. W. McAllister and Howard W. Davis, d/b as The Walmac Company, San Antonio, Tex.—Granted modification of license to increase night power from 100 to 250 watts.

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted amended application for construction permit to move station locally; install new equipment; increase power from 500 watts to 1 KW night, 5 KW day, and hours of operation from limited time to unlimited.

KIRO—Queen City Broadcasting Co., Inc., Seattle, Wash.—Granted modification of license to change assignment from **650 kc.,** 250 watts, limited time, to **710 kc.,** 1 KW, unlimited time.

DESIGNATED FOR HEARING

The following application has been designated for hearing by the Commission. Date for the hearing has not yet been set.

WSAL—Frank M. Stearns, Salisbury, Md.—Designated for hearing before Commissioner Brown, the matter of the Order of Revocation of License.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KANS, Wichita, Kans.; KASA, Elk City, Okla.; KCKN, Kansas City, Kans.; KFJI, Klamath Falls, Ore.; KFYO, Lubbock, Tex.; KGFJ, Los Angeles; KGHI, Little Rock, Ark.; KIUL, Garden City, Kans.; KROC, Rochester, Minn.; KRRV, Sherman, Tex.; KTSM, El Paso, Tex.; KVAK, Atchison, Kans.; KVCV, South of Redding, Calif.; KWNO, Winona, Minn.; KWOS, Jefferson City, Mo.; WJLS, Beckley, W. Va.; WKBO, Harrisburg, Pa.; WMBO, Auburn, N. Y.; WMPC, Lapeer, Mich.; WOLS, Florence, S. C.; WSBC, Chicago; WSJS, Winston-Salem, N. C.; WTJS, Jackson, Tenn.; WTRC, Elkhart, Ind.; WAYX, Waycross, Ga.; WBEO, Marquette, Mich.; WBRE, Wilkes-Barre, Pa.; WBRK, Pittsfield, Mass.; WCAT, Rapid City, S. Dak.; WCAX, Burlington, Vt.; WCRW, Chicago; WDAH, El Paso, Tex.; WEBR, Buffalo, N. Y.; WEBR, Auxiliary; WFTC, Kinston, N. C.; WGAU, Athens, Ga.; WGTM, Wilson, N. C.; WHAI, Greenfield, Mass.; WIL, St. Louis, Mo.

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—Granted renewal of license for the period ending August 1, 1940.

WGAR—WGAR Broadcasting Co., Cleveland, Ohio.—Granted renewal of license for auxiliary for the period ending August 1, 1940.

WSMB—WSMB, Inc., New Orleans, La.—Granted renewal of license for the period ending August 1, 1940.

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Granted renewal of license for the period ending February 1, 1940.

WNEL—Juan Piza, San Juan, P. R.—Granted renewal of license for the period ending June 1, 1940.

The following relay broadcast stations were granted renewal of licenses for the regular period:

KEHP, area of San Diego, Calif.; KEGA, area of Los Angeles; WEGM, New York City; WEGO, Terre Haute, Ind.; WENW, area of Champaign, Ill.; KEGL, area of Los Angeles, Calif.; KEGN, area of San Francisco; KEGO, area of Los Angeles; KEGQ, area of Los Angeles; WEHP, area of Toledo, Ohio; WEIL, area of Miami, Fla.; WEIM, area of Miami, Fla.; KEID, area of Kansas City, Mo.; KEGD, area of Beaumont, Tex.; WAUJ, area of Louisville, Ky.; WEIZ, area of Dayton, Ohio; WEJY, area of Dayton, Ohio; WEJZ, area of Dayton, Ohio; WENU, area of Baltimore; KEIU, area of Missoula, Mont.; KEJC, area of Denver; KEJL, area of San Francisco; WEJD, WEJE, area of Washington, D. C.; WEJI, WEJJ, area of New York City; WEJK, area of Chicago; WEJL, WEJN, area of New York City; WEJO, WEJP, WEJQ, area of Cleveland, Ohio; WEJR, area of New York City; WEJS, WEJT, area of Washington, D. C.; WEJU, WEJW, area of New York City; WEJV, WEJX, area of Chicago; KEJD, KEJE, KEJG, area of Denver; KEJJ, area of Denver; WEOF, area of Nashville, Tenn.; KEIV, area of Long Beach, Calif.; KEIZ, area of Portland, Ore.; WEKG, area of Philadelphia; KEJM, area of Sioux City, Iowa; KEJO, area of St. Louis, Mo.; WEHT, area of Racine, Wis.; WEHY, area of Bristol, Tenn.; KEGU, area of Salt Lake City; WEKT, area of St. Petersburg, Fla.; KEGW, area of Phoenix, Ariz.; KEGX, area of Phoenix, Ariz.; WEKO, WEKP, area of Scranton, Pa.; WEKQ, area of Tallmadge, Ohio; WEKR, area of South Bend, Ind.; KEGY, area of Tulsa, Okla.; KEHB, KEHC, KEHD, area of Topeka, Kans.; WEKV, WEKW, area of Hartford, Conn.; WELD, WELE, area of Columbus, Ohio; WEOE, area of Fargo, N. Dak.; WELN, area of Hartford, Conn.; WELP, area of New Orleans; WELW, WELX, area of Philadelphia; WELY, area of Lancaster, Pa.; WAIF, WAIG, WELZ, area of Chicago; WENF, WENG, area of Detroit; KEHL, area of Oklahoma City; WEOD, WEKX, WEKY, WEKZ, area of Boston, Mass.; WEGN, area of Newark, N. J.; KEGE, area of Dallas, Tex.; WEGW, WEGX, area of Charleston, W. Va.; WEHG, WEHK, area of New York City; WLWD, WLWE, WLWF, WLWG, WLWH, WLWX, area of Cincinnati, Ohio.; WEIC, area of Schenectady; KEIA, area of Honolulu; WEIT, area of New Orleans; WEIX, area of Memphis, Tenn.; KEIT, area of Kansas City, Mo.; WENV, area of Baltimore.

WABG—Memphis Commercial Appeal Co., area of Memphis, Tenn.—Granted renewal of relay broadcast station for the period ending October 1, 1940.

WDJM—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted renewal of international broadcast station license for the period ending November 1, 1940.

WCAB—WCAU Broadcasting Co., Philadelphia, Pa.—Granted renewal of international broadcast station license for the period ending November 1, 1940.

MISCELLANEOUS

KEX—Oregonian Publishing Co., Portland, Ore.—Granted extension of special temporary authority to operate a portable MOPA 100 watt transmitter from one hour after local sunrise to one hour prior to local sunset, provided no interference is caused to any other station, on the frequency **1140 kc.,** in the vicinity of Portland, Oregon, for the making of transmitter site tests, during daytime, for the period November 10 to November 19, 1939.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted extension of special temporary authority to operate with 5 KW power night, using directional antenna, for the period November 11 to not later than December 10, 1939, in order to overcome interference from Cuban Station CMQ, provided such operation with additional power terminates immediately when CMQ ceases operation on frequency **780 kc.,** reduces power so that additional interference is not involved, or until defective directional system of CMQ is corrected by installing new tuning condensers.

WDGY—Dr. George W. Young, Minneapolis, Minn.—Granted extension of special temporary authority to operate evenings (LS, November, 4:45 p. m. and December, 4:30 p. m., CST), for the period November 14 to not later than December 13, 1939, in order to broadcast civic, charitable, religious, educational, fraternal, and commercial programs of outstanding interest, and in order to carry programs of great local interest from the Mutual Broadcasting System.

WMC—Memphis Commercial Appeal Co., Memphis, Tenn.—Granted extension of special temporary authority to operate with 5 KW power night, using directional antenna, from November 11 to December 10, 1939, in order to overcome interference from Cuban Station CMQ provided such operation with additional power terminates immediately when CMQ ceases operation on **780 kc.,** reduces power so that additional interference is not involved, or until defective directional system is corrected by installation of new tuning condensers.

Inter-Island Airways, Ltd., Honolulu, Hawaii.—Granted special temporary authority to operate Aircraft Station KHCMB as a relay broadcast station on the frequency **5375 kc.,** November 11, 1939, to transmit to Standard Broadcast Station KGU program material in connection with the Tenth Anniversary of Air Transportation in Hawaii under the express condition that no interference is caused to other stations operating on this frequency.

KUMA—Albert H. Schermann, Yuma, Arizona.—Denied special temporary authority to operate from 10:00 p. m., MST, to the conclusion of a football game on December 9, 1939, in order to broadcast football game only.

WOC—Tri-City Broadcasting Co., Davenport, Iowa.—Granted petition to intervene in the hearing of Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Illinois, for a new station to operate on **1370 kc.,** 250 watts, unlimited time.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted special temporary authority to operate on the frequency **1200 kc.,** at present transmitter site until construction is completed at approval site in accordance with permit, for the period November 12, 1939, until not later than December 11, 1939.

KFRO—Voice of Longview, Longview, Texas.—Granted special temporary authority to operate additional time for the period December 1, 1939, and ending not later than December 25, 1939, in order to broadcast programs as described in letter dated October 31, 1939, and on December 31, 1939, in order to broadcast church program and to remain on until midnight, in order to welcome in the year 1940.

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Granted special temporary authority to operate additional time simultaneously with station KFVS on November 17, 1939, in order to broadcast dedicatory address for the dedication of the new Elks Home, only.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 7:30 p. m. to 8:30 p. m., power of 250 watts, on November 13, 1939, in order to broadcast proceedings of the banquet incident to the opening of the Community Chest campaign in Sharon.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate from local sunset at Abilene, Kansas (November and December, 5:15 p. m., CST), to local sunset at Los Angeles, Calif. (November and December, 6:45 p. m., CST), with 1 KW power, for the period November 15, 1939, to not later than December 1, 1939, in order to broadcast political, civic, charitable, religious, educational, fraternal, and commercial programs of outstanding local interest.

KHBC—Honolulu Broadcasting Co., Ltd., Hilo, Territory of Hawaii.—Granted modification of license to change corporate name of licensee from Honolulu Broadcasting Company, Ltd., to Hawaiian Broadcasting System. Limited.

WLNH—Northern Broadcasting Co., Laconia, N. H.—Granted license to cover construction permit for new equipment and increase in power from 100 watts to 250 watts.

WCOS—Carolina Advertising Corp., Columbia, S. C.—Granted license to cover construction permit for new station to operate on **1370 kc.,** with 100 watts night. 250 watts day, unlimited time.

WISE—Harold H. Thoms, Asheville, N. C.—Granted license to cover construction permit for new station to operate on **1370 kc.** with 100 watts power.

WJPR—John R. Pepper, Greenville, Miss.—Granted license to cover construction permit for new station to operate on **1310 kc.,** with 100 watts night, 250 watts day, unlimited.

WJPR—John R. Pepper, Greenville, Miss.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted license to cover construction permit for changes in equipment and increase in power to 250 watts.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, Hawaii.—Granted modification of license to change corporate name of licensee from Honolulu Broadcasting Company, Ltd., to Hawaiian Broadcasting System, Ltd.

W8XVC—The Cincinnati Times Star Co., Cincinnati, Ohio.—Granted modification of construction permit for additional time to construct Facsimile Broadcast Station W8XVC, commencement date May 6, 1940, and completion date November 6, 1940; granted upon an experimental basis only, conditionally.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Granted extension of special temporary authority to use ultra high frequency transmitter Type A, Serial No. 315 and authorized to be used by Television Broadcast (experimental) Station W2XDR, by Facsimile Broadcast Station W2XR, for the period November 12, 1939, to not later than December 11, 1939, pending action on modification of license for W2XR.

WAIR—C. G. Hill, George D. Walker & Susan H. Walker, Winston-Salem, N. C.—Granted special temporary authority to rebroadcast the NAA time signals for the period ending in no event later than 3:00 a. m., EST, June 1, 1940.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted motion to dismiss without prejudice the application for construction to increase operating assignment of WLAW from sunset at Lawrence, Mass., to sunset at San Francisco, and install directional antenna for nighttime use. Dismissed petition for rehearing filed by WLAW in re this matter.

William F. Huffman, Wisconsin Rapids, Wis.—Adopted new bill of particulars in accordance with action taken on October 24, in designating for hearing the application of William F. Huffman for a new station; new bill to contain issues regarding technical and program service to be rendered and financial qualifications of applicant; also whether the application of George F. Meyer, Medford, Wisconsin, and Huffman's application are mutually exclusive, and if so, whether public interest, convenience and necessity would be served by granting this application.

Airfan Radio Corp., Ltd., San Diego, Calif.—Dismissed petition requesting the Commission to reconsider its action of July 26, granting the motion of Worcester Broadcasting Corporation to file application for construction permit and to incorporate the record in Dockets 5378 and 5381 as part of said application, in so far as said action incorporated such record.

KWAL—Chester Howarth & Clarence Berger, Wallace, Idaho.—Granted modification of construction permit for extension of completion date from November 20, 1939, to December 20, 1939.

WATR—The WATR Company, Inc., Waterbury, Conn.—Granted authority to determine operating power by direct measurement of antenna input, in compliance with Sec. 3.54.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted authority to determine operating power by direct measurement of antenna input, in compliance with Sec. 3.54.

KOTN—Universal Broadcasting Corp., Pine Bluff, Arkansas.—Granted authority to determine operating power by direct measurement of antenna input, in compliance with Sec. 3.54.

WILL—University of Illinois, Urbana, Illinois.—Granted authority to determine operating power by direct measurement of antenna input, in compliance with Sec. 3.54.

WFBM—WFBM, Inc., Indianapolis, Ind.—Granted authority to determine operating power by direct measurement of antenna input, in compliance with Sec. 3.54.

APPLICATIONS FILED AT FCC

570 Kilocycles

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Construction permit to install new transmitter; make changes in directional antenna; increase power from 1 to 5 KW; move transmitter from College Point Causeway, Flushing, N. Y., to Belleville Turnpike, Kearny, N. J.

610 Kilocycles

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—License to cover construction permit B3-P-2449 for equipment changes.

620 Kilocycles

WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Modification of license to increase power from 1 KW, 5 KW day, to 5 KW day and night.

740 Kilocycles

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Calif.;—Modification of license to change hours of operation from daytime to limited to WSB, Atlanta, Ga., using 250 watts power day and night.

930 Kilocycles

KMA—May Seed & Nursery Co., Shenandoah, Iowa.—Construction permit to install directional antenna for night use; increase power from 1 KW, 5 KW day, to 5 KW day and night.

980 Kilocycles

KDKA—Westinghouse Electric & Manufacturing Co., Pittsburgh, Pa.—License to cover construction permit B2-P-2308 as modified for a new transmitter and move of transmitter.

1200 Kilocycles

WCPO—Scripps-Howard Radio, Inc., Cincinnati, Ohio.—Authority to determine operating power by direct measurement.

KBTM—Jay P. Beard, tr/as Regional Broadcasting Co., Jonesboro, Ark.—Authority to determine operating power by direct measurement of antenna power.

KFJB—Marshall Electric Co., Marshalltown, Iowa.—Authority to determine operating power by direct measurement of antenna power.

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—Authority to determine operating power by direct measurement of antenna power.

WJBC—Arthur Malcolm McGregor and Dorothy Charlotte McGregor, Bloomington, Ill.—Authority to determine operating power by direct measurement of antenna power.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—License to cover construction permit B3-P-2348 as modified for equipment changes and increase in power.

1210 Kilocycles

WSOC—WSOC, Inc., Charlotte, N. C.—Construction permit to install new transmitter, directional antenna, for night use; change frequency from **1210 kc.** to **610 kc.;** increase power from 100 watts, 250 watts day, to 1 KW day and night; move transmitter from 516 West Trade St., Charlotte, N. C., to near Charlotte, N. C.

1310 Kilocycles

KGFW—Central Nebraska Broadcasting Corp., Kearny, Nebr.—Authority to determine operating power by direct measurement.

KFYO—Plains Radio Broadcasting Company, Lubbock, Tex.—Construction permit to install new transmitter and vertical antenna; change frequency from **1310 kc.** to **1380 kc.;** increase power from 100 watts, 250 watts day, to 500 watts, 1 KW day; move transmitter from 2312 Fifth St., Lubbock, Tex., to site to be determined at or near Lubbock, Tex. Amended to request 1 KW power day and night.

KWOC—A. L. McCarthy, O. A. Tedrick, and J. H. Wolpers, d/b as Radio Station KWOC, Poplar Bluff, Mo.—Authority to determine operating power by direct measurement of antenna power.

1370 Kilocycles

KLUF—The KLUF Broadcasting Company, Inc., Galveston, Tex.—Construction permit to install new transmitter; change frequency from **1370 kc.** to **1360 kc.;** increase power from 250 watts to 500 watts; 1 KW day.

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Modification of construction permit B3-P-2346 for a new station, requesting approval of antenna and of transmitter site at 13th St. and 11th Ave., Hickory, N. C.; increase power from 100 watts, 250 watts day, to 250 watts power; change type of transmitter.

1420 Kilocycles

WELL—Enquirer-News Co., Battle Creek, Mich.—Voluntary assignment of license from Enquirer-News Co. to Federated Publications, Inc.

WJMS—WJMS, Inc., Ironwood, Mich.—Authority to determine operating power by direct measurement of antenna power.

WNOE—WBNO, Inc., New Orleans, La.—Modification of license to change name from WBNO, Inc., to WNOE, Inc.

1470 Kilocycles

KGA—Louis Wasmer, Spokane, Wash.—Construction permit to install new transmitter; make changes in antenna; increase power from 5 to 10 KW; move studio from Standard Stock Exchange Bldg., Spokane, Wash., to Radio Central Bldg., Spokane, Wash., and move transmitter from 325 East Towan Ave., Spokane, Wash., to 4102 South Regal St., Spokane, Wash.

1500 Kilocycles

KFDA—Amarillo Broadcasting Corporation, Amarillo, Tex.—Authority to transfer control of corporation from C. S. Gooch to J. L. Nunn, 10,200 shares common stock.

KFDA—Amarillo Broadcasting Corporation, Amarillo, Tex.—License to cover construction permit (B3-P-2485) for new equipment, increase in power.

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Tex.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

MISCELLANEOUS

W2XAB—Columbia Broadcasting System, Inc., New York, N. Y.—License to cover construction permit B1-PVB-6 as modified for new equipment, increase in power, and addition of A-3 emission. License application specifies **50000-56000 kc.**

Westinghouse Electric & Manufacturing Co., Philadelphia, Pa.—Construction permit for new high frequency station to be located at Architects Bldg., 17th and Sansom Sts., Philadelphia, Pa., on **12600 kc.**, 1 KW, unlimited time, special emission.

Guy S. Cornish, area Cincinnati, Ohio.—Construction permit for low power portable transmitter for public address service on **305000, 310000, 315000, 325000 kc.**, 5 watts power, A-3 emission. Amended to request **310000 kc.** only and 1 watt power.

WEJA—National Broadcasting Co., Inc., New York, N. Y.—Modification of C. P. (B1-PRE-305) for changes in equipment and increase power to 100 watts.

W8XE—United Broadcasting Co., Cleveland, Ohio.—License to utilize equipment of relay station WRPM in lieu of equipment of high frequency broadcast station W8XNT and power output to be 100 watts. Amended: To change name of applicant.

KAOU—Arizona Broadcasting Co., Inc., Tucson, Arizona.—License to cover construction permit B5-PRE-292, for new relay broadcast station.

KEIM—KTAR Broadcasting Co., area of Phoenix, Arizona.—License to cover construction permit B5-PRE-293, for equipment changes and increase in power.

NEW—Monocacy Broadcasting Co., Frederick, Md.—Construction permit for new relay broadcast station to be operated in area of WFMD, Frederick, Md., on **1622, 2058, 2150, 2790 kc.**, 40 watts, A-3 emission.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Products Company, a corporation manufacturing food and toilet products, and The Zanol Products Company, its selling agent and subsidiary, both having offices at 3265 Coleraine Ave., Cincinnati, have been ordered to cease and desist from misrepresentations affecting prospective sellers of its products.

Findings of the Commission are that the respondents advertised in daily newspapers, trade magazines and other periodicals, seeking sales representatives for the products, and making offers to prospective salesmen that were exaggerated and untrue. Among them, it was found, were: "I will pay you up to $42.50 a week and I will furnish a car to producers." . . . "Best of all I am going to start you in this wonderful business at my expense. I am going to put complete faith and confidence in you. I am going to assume all the expense and take all the risk." . . . "Wonderful chance to make $6 a day taking orders for No-Frost." . . . "MAN —I want a man for local tea and coffee route paying up to $27.50 first week. Opportunity for steady cash increases. Approximately 200 customers." . . . "Free Auto If You Qualify." . . . "Automobile Given to Producers." . . . "Automobile Given to Man Who Qualifies." . . . "*FIVE MILLION A YEAR.* These ideas are the rock on which I built my business and on which it has grown and prospered and brought money to hundreds and hundreds of men and women. When I tell you that I started with practically nothing and that now housewives buy five million dollars worth of Zanol products annually you know how successful my ideas have been."

Findings of the Commission are that average earnings of salesmen under normal conditions are but a small percentage of the amounts named in the advertisements, that no automobiles are given salesmen unless they have purchased at wholesale prices not less than $2500 worth of goods in a year from the respondents, and that deposits are required from salesmen on all goods or samples supplied.

The respondents are ordered to cease and desist from misrepresenting in any manner the volume of their business; representing that salesmen or distributors of their merchandise incur no risk or expense, when in fact the respondents require a deposit from such persons; using the word "free" or any other term of similar import, unless all the terms and conditions of such offer are clearly and unequivocally stated in equal conspicuousness and in immediate connection or conjunction with the term "free"; representing any specified sum of money as earnings or profits of any specified dealer or sales person for any stated period of time, unless such sum of money has been, in fact, averaged over a period of at least two months in the ordinary course of business and under normal conditions. (2836)

Hamilton Manufacturing Company, 413 South Fifth St., Minneapolis, manufacturer and distributor of push cards and punch boards involving games of chance and lottery schemes when used in the distribution of merchandise to the consuming public, is charged in a complaint with engaging in unfair acts and practices in commerce in violation of the Federal Trade Commission Act. (3944)

Harlich Manufacturing Company—A complaint has been issued against Leo, Libbie and Byron J. Lichtenstein, individually and as co-partners trading under the name of Harlich Manufacturing Company, 1401-1417 West Jackson Blvd., Chicago, charging the manufacture and distribution of push cards and punch boards to be used as lottery devices in connection with the sale and distribution of merchandise to ultimate consumers. (3947)

Pasadena Products, Inc., 300 North Lake Ave., Pasadena, Calif., distributor of a medicinal preparation designated "Sal-Ro-Cin," is respondent in a complaint alleging misrepresentation.

Through radio broadcasts and advertisements in newspapers and periodicals, the complaint alleges, the respondent represented that "Sal-Ro-Cin" is a competent and effective treatment for rheumatism, neuritis, lumbago and other ailments, and that the company will mail a liberal free sample of the preparation to any one requesting it.

The complaint charges that the preparation is not a competent or effective treatment for any of the ailments named, that at best it will bring only palliative relief from pains accompanying the ailments, and that the respondent does not mail free any samples, but makes a charge for all samples sent. (3945)

STIPULATIONS

The Commission has entered into the following stipulations:

F. R. Glover, Cortland, N. Y., engaged in selling medicinal preparations for poultry designated "Glover's Poultry Tonic," "Glover's Conditioning Powder," "Glover's Roup Cure (Liquid)." "Glover's Powdered Roup Cure," "Glover's Cholera Cure." "Glover's Pox Cure," "Glover's Poultry Wormer," "Glover's Louse Exterminator," "Ratin," and a book called "Poultry Diseases," has entered into a stipulation in which he agrees to cease certain misrepresentations in the sale of his products.

The respondent will discontinue representing that "Glover's Poultry Tonic" builds up resistance of a flock so that it will not be liable to disease, increases the egg yield of a flock three-fold or in any material amount, or enables one to raise chicks without losing any by disease; that "Glover's Conditioning Powder" is the world's greatest conditioner, will put every class of stock in the "pink of condition," will keep down fever in poultry and will condition cocks to win; that "Glover's Roup Cure" and "Glover's Powdered Roup Cure" will cure roup, colds, rattles, canker and all kindred diseases of poultry, are tonics or will serve as preventives of disease; that "Glover's Roup Cure (Liquid)" keeps the passages of the head and throat of poultry open and heals the delicate membranes; that "Glover's Powdered Roup Cure" drives the poison from the blood of poultry and brings about a sure, speedy and complete cure of roup; that "Glover's Cholera Cure" is an effective remedy or competent treatment for cholera or bowel troubles of poultry, or will check the worst attack of cholera at once and soon cure it; that "Glover's Pox Cure" is an effective remedy or competent treatment for Favus, scurvy and all like diseases of poultry, and that the powder included in "Glover's Pox Cure" eliminates the poison from the blood of poultry affected with pox, and the ointment heals the sores; that "Glover's Poultry

Wormer" is a sure cure for "all" worm troubles in poultry; that "Glover's Gapes Cure" is an absolute cure for gapes; that "Glover's Louse Exterminator" will keep fowls free from head and body lice and mites of all kinds or will rid one's flock of lice; that "Ratin" is effective for eliminating mice and rats of all sizes, and that the respondent's book entitled "Poultry Diseases" explains fully the cause of each disease, gives the symptoms of poultry diseases in such a manner as to enable the layman to readily distinguish one disease from another, or offers the best possible treatment for various poultry diseases and that range paralysis, brooder paralysis and leg weakness in poultry come from intestinal poisoning and in many cases from worms. (02457)

Morton Distributing Co.—A. C. Morton, doing business under the trade name of Morton Distributing Company, Sedalia, Mo., engaged in selling a medicinal preparation designated "Russell's Black Gold Ointment," has entered into a stipulation in which he agrees to cease representing that "Russell's Black Gold Ointment," or any medicinal preparation containing substantially the same ingredients, is a competent remedy in the treatment of eczema, psoriasis, acne or any other affections of the skin which are due to or based upon a systemic or constitutional background; is a competent remedy in the treatment of athlete's foot or any other affections of the skin resulting from a deep-seated invasion of the skin by a group of fungi, "will take care of practically any of the common run of skin troubles," or "draws out impure, poisonous waste matter". (02456)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Antisepto Products Company—In connection with a cease and desist order issued against Edward L. Jenkins and Mildred Jenkins, trading as Antisepto Products Company, Antisepto Products, Educational Products Company, Sanitol Products Company, XL Products Company and XL Products, 3335 Belle Plaine Ave., Chicago, the Commission finds that irreparable injury to health may be caused by use of the alleged remedies for delayed menstruation and prostate gland weaknesses distributed by the respondents.

The Federal Trade Commission, on July 11, 1939, obtained from the United States District Court in Chicago a preliminary injunction prohibiting the respondents from falsely advertising their alleged remedies for delayed menstruation.

The preparations were advertised in newspapers and periodicals as being competent and effective remedies, and were sold largely through the mails at prices ranging from $1 to $3.50.

The drugs used in compounding the preparations for women, the Commission finds, if used under the conditions prescribed in the advertisements, could cause uterine infection, blood poisoning, or result in a gangrenous condition of the lower limbs, while those used as ingredients of the prostate gland remedy, under certain conditions prescribed in the advertising, might cause brain disorders, injury to the urinary tract or serious nephritis to users. None of the preparations, the findings state, is a cure or remedy for the diseases for which it is prescribed, nor is it a competent or effective treatment.

The respondents are ordered to cease and desist from representing that use of the preparation known as "Guaranteed Antisepto Anti-Delay Compound," regular or super strength, or any other preparation composed of substantially similar ingredients or possessing substantially similar therapeutic properties, sold under any name, is a competent, safe or scientific treatment for delayed menstruation or that their use will have no ill effects upon the human body, or that use of the preparation known as "Guaranteed Prosaid Gland Medicine" or any similar preparation sold under any name, is a cure for or has any therapeutic value in the treatment of prostrate gland weakness or inactivity.

The order also prohibits dissemination of advertisements which fail to reveal that the use of such preparations may result in serious and irreparable injury to the health of users. (3867)

Carlysle Service—See Supreme Manufacturing Company.

Christopher Candy Company, manufacturer of candy at 4020 Avalon Boulevard, Los Angeles, has been ordered to cease and desist from selling or supplying to dealers or others candy or other merchandise so packed and assembled that sales to the general public are to be made by means of a game of chance, gift enterprise or lottery scheme; supplying or placing in the hands of others assortments of candy together with lottery devices to be used in selling or distributing the candy to ultimate purchasers; supplying push cards, punch boards or other lottery devices either in assortments of candy or separately, when such devices are to be used in selling or distributing the candy, and selling or otherwise disposing of candy by means of a game of chance, gift enterprise or lottery scheme. (3394)

Educational Products Company—See Antisepto Products Company.

E. Fougera & Company—See Perasthman Company, Inc.

Marvo Manufacturing Company—See Supreme Manufacturing Company.

Old Mission Tablet Company—E. W. Knowlton, trading as Old Mission Tablet Company, Pasadena, Calif., has been ordered to cease and desist from misrepresentations made in radio broadcasts and in advertisements in newspapers, magazines and other publications, that "Old Mission Tablets" or "O-M Tablets" are identical with the preparation which helped build up the reputation of one of the greatest stomach and kidney specialists in the United States, or are one of the greatest tablets offered for general run-down stomach condition.

The respondent also is ordered to cease representing that the preparation is one of the largest selling or most favored tablets for such condition, is an effective treatment for stomach or digestive troubles caused by costive weakened digestive system, or is an effective treatment for congestive stomach soreness, sick headaches, backaches, dizzy spells or gastric stomach attacks, unless such representations disclose that such effectiveness is limited to cases where such conditions are caused primarily by constipation. (3664)

Peerless Manufacturing Company—See Supreme Manufacturing Company.

Perasthman Company, Inc., 276 Fifth Ave., New York, manufacturer of a proprietary medicine designated "Perasthman" or "Perasthman Tablets," advertised as an alleged remedy for asthma, and E. Fougera & Co., Inc., 75 Varick St., New York, its exclusive distributing agent, are ordered to cease and desist from misrepresentations of the product's efficacy as an asthma treatment.

The Commission finds that the principal ingredient of the preparation is ephedrine, which is not safe for use by persons with heart or kidney ailments except in limited quantities and under competent medical supervision. The respondents are ordered to cease and desist from representing that the preparation is an effective treatment or a cure for asthma, or that it has any therapeutic value in the treatment of asthma other than affording, in some cases, temporary relief from some of the symptoms of asthma; that the preparation is harmless or will assure sufferers from asthma nights of restful sleep or days of greater comfort, or will stop wheezing or other symptoms of asthma.

The respondents also are ordered to desist from use of advertising which fails to reveal that the preparation is not safe if used in self-medication by members of the lay public suffering from heart and kidney ailments. (3719)

Sanitol Products Company—See Antisepto Products Company.

Supreme Manufacturing Company—C. C. Johnson, 1014 City National Bank Building, Omaha, Nebr., trading under the names Supreme Manufacturing Company, Carlyle Service, Marvo Manufacturing Company, and Peerless Manufacturing Company, has been ordered to cease and desist from representing that the use of a preservative or mending powder distributed by him will strengthen silk hosiery or lingeries, or save 50 per cent of its cost.

Among representations made to prospective customers, and on labels attached to the product, the Commission finds, were the following: "Prevents the runs and snags in your silk hosiery and lingerie . . . strengthens the heel and toe of your hosiery, thereby making them last four or five times longer . . . this treatment is permanent . . . now this product will cut your hosiery and lingerie expense in half . . . also prevents the silk from rotting, and one treatment is sufficient for the life of the hose."

Findings of the Commission are that the product will not accomplish any of the results claimed, and that respondent is not its manufacturer. The Commission's order is that C. C. Johnson, trading under any name or names, cease representing that use of the product will prevent runs and snags in or the rotting and fading of hosiery and lingerie; that its use can save the purchaser approximately 50 per cent of the cost of silk lingerie and hosiery; that hosiery treated with the product will last four or five times longer than it would without being so treated; that its use will result in any substantial increase in the wearing qualities of silk hosiery, or that the respondent is the manufacturer of the product, unless or until such is the fact. (3712)

XL Products Company—See Antisepto Products Company.

Zanol Products Company—See American Products Company.

Reports

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 47, November 24, 1939

Broadcasting of Phonograph Records

The members have been advised of the decision of the Trial Court in RCA v. Whiteman last July, RCA's subsequent demand for payment by stations, the meetings of the Special NAB Committee with representatives of the phonograph-record manufacturers, the postponement by RCA of the effective date of license agreements to December 1st, and the appeals taken by Whiteman, RCA and WNEW from the decision of the trial court to the United States Circuit Court of Appeals (NAB Reports, July 21, August 11, 18, 25, September 1, October 27, 1939).

Because these appeals clearly indicated that none of the parties was fully satisfied with the decision of Judge Leibell in the District Court, Neville Miller last week discussed a further postponement with RCA representatives. He was told, however, that RCA would proceed on December 1st with its broadcast-station licensing campaign. Accordingly, the members should be informed of a number of additional facts bearing on the situation.

At the last annual convention of the American Federation of Musicians held in June, several resolutions dealing with the broadcasting of phonograph records were introduced and referred to the International Executive Board with power to act. The effect of these resolutions was to direct the Board to investigate the feasibility of having all union musicians who make records assign to AFM all of their property rights in perpetuity and to forbid all union members engaged in such recording work from making records unless a waiver or release had first been secured from AFM.

In September as a direct result of RCA's favorable Court decision followed by its campaign to license broadcasting stations, AFM addressed to all locals and members of AFM the following communication:

> "The attention of the Federation has again been called to the fact that various recording companies, as a result of recent court decisions, are using every effort, through contractual provisions, to have members who make records assign their property rights therein to the recording companies.
>
> "As a result, the International Executive Board has adopted the following rule: 'Any member who assigns any property right in any recording to any recording company, or to any other party without the consent of the American Federation of Musicians, by such action gives notice to the Federation and makes effective immediately his resignation from the A. F. of M.'
>
> "This rule is effective immediately and will be strictly enforced."

The above letter was described at AFM headquarters as purely a precautionary measure to protect the rights of their members engaged in making records. Up to the present date

BROADCASTING OF PHONOGRAPH RECORDS

(Continued from page 3849)

the International Executive Board of AFM has not adopted any other rule and so far as is known the rule above quoted has as yet not resulted in any resignations of AFM members.

The National Association of Performing Artists has informed broadcasters that RCA is not authorized to exact royalties on behalf of members of that organization. NAPA is the association which instigated and financed the Waring suit in Pennsylvania, the Whiteman and Crumit suits in New York and several other suits in other states. Recently Jimmie Walker, former New York City mayor, was elected president of NAPA in place of Fred Waring who becomes chairman of its Board.

The Music Publishers Protective Association, comprising practically all of the leading music publishers, notified all broadcasters that the licensing campaign of the phonograph record manufacturers was not authorized or sanctioned by its members. MPPA further stated:

> "The recording licenses granted to the record manufacturers by the copyright owners do not give them the right to demand from you license fees for the broadcasting of phonograph records."

NAPA has approached MPPA looking towards an alliance for the collection of royalties from cafes, dance halls and other establishments using coin-operated phonographs, with a split of the royalties between NAPA and MPPA. It is understood MPPA has not entered into any such arrangement and will not do so unless its members approve of the idea. Anyway, the scheme is said not to embrace broadcasting; therefore, at the moment broadcasters are not affected by the potentialities of such an arrangement.

It is expected that either the MPPA or one of its publisher members will attempt to intervene in the appeal in RCA v. Whiteman on the ground that the decision below was erroneous in that the engrafting of a common-law right on the copyrights of the publishers was improper and interfered with the publishers' copyrights and its business of licensing the use of its compositions.

RCA will on December 4th argue a motion made by it to dismiss the appeal of WNEW on the ground that the appeal is moot, the station having taken out a license with RCA for the broadcasting of RCA and Bluebird records. This motion will be vigorously opposed.

Station owners should also consider the effect of the contracts they hold with AFM based upon the settlement by IRNA and NCIB of the musicians' union controversy involving, among other things, the use of phonograph records. The current negotiations between IRNA and AFM should also be borne in mind as the use of records is involved in the discussions. Consideration should also be given to the fact that in order to make phonograph records the manufacturers must each hold licenses from AFM and that AFM, at the termination of its present licenses with the recording companies, may be in a position to exact certain terms regarding the ownership of the property rights, if any, that exist in the records.

It is apparent that the rights claimed by RCA are challenged at every turn. It is understood that NAPA and the music publishers each wish half of any royalties collected from broadcasters by the record manufacturers so that no revenue would remain for the record manufacturer. NAPA wants to own whatever property rights there are for the benefit of their band-leader members. AFM does not sanction NAPA's ownership because it does not take into account the work of the individual members of the orchestras and vests all rights in band leaders through NAPA. AFM therefore wants to control these rights. The music publishers contend that RCA does not have the right to license phonograph records for broadcasting. NAPA through Whiteman's appeal contests the injunction obtained by RCA against Whiteman and the station. The station contests the injunctions obtained by both RCA and Whiteman. RCA contests the injunction obtained by Whiteman against the station and objects to the Court failing to find a property right in RCA by virtue of its manufacturing skill. In other words, no one is satisfied.

The NAB believes it is of the utmost importance that the rights of broadcasters be fully protected and has retained legal counsel to represent broadcasters' interests in the RCA vs. Whiteman case. Until the whole issue is settled, the NAB will continue its efforts to protect the interests of broadcasters.

CODE COMMITTEE TO MEET WOMEN'S GROUPS

Distinguished national and state leaders of women's clubs will have a luncheon-conference meeting with members of the Code Compliance Committee next Wednesday, following the Committee's two meetings at Headquarters, November 28-29. Neville Miller, president of the NAB, will preside at the luncheon.

The meeting of the Code Compliance Committee has been called by its chairman, Edgar Bill. A full attendance is expected.

Details of the Code, with especial reference to its social aspects in the children's section will be stressed. It is anticipated that further cooperative effort between state and local women's groups and member stations will follow.

HUGH JOHNSON JOINS THOSE APPROVING CODE

General Hugh S. Johnson this week added his strong voice to those who have approved the new NAB Code. Appearing on the American Forum of the Air, over the Mutual Broadcasting System, last Sunday night, General Johnson expressed further approval of the controversial issue section: "If I understand the Code, it is the best that could have been written. There remains only the question of method—how best to provide the public with adequate and efficient radio debate—whether on sponsored or sustaining programs. That presents a real problem, but it is certainly not beyond the ingenuity of this up and coming industry. Let's speed it up."

Appearing on the same round-table discussion were Morris Ernst, prominent attorney and counsel for the American Civil Liberties Union; Martin Codel, publisher of *Broadcasting Magazine,* and Ed Kirby, NAB Director of Public Relations and secretary of the Code Compliance Committee.

Admitting that his organization, the American Civil Liberties Union had endorsed the Code, Mr. Ernst, in expressing disapproval of the Code, said that "even the Civil Liberties Union believes in individual free speech of its members." He declared that he believed the United States has the freest and best radio programs in the world, but that he was "worried about the Code no matter how idealistic it is in principle because of the threat implicit in the increasing concentration of broadcasting power in the hands of a few companies. It will be wholesome for the broadcasters if the public keeps an eye on the operations of this Code, particularly if the Code should ever have incorporated in it a referee, arbiter or enforcer."

Mr. Codel, in opening the discussion, pointed out that the Code had been the result of nearly a year's work by experienced broadcasters representing every section of the industry, that it had been submitted last spring to both the industry and the public, and that it had been considered and passed at the last convention of the NAB. "The language is clear and simple. Yet there has been more bunk spread around about what the Code means and what it doesn't mean than anything in recent days in radio." Mr. Codel reviewed the names of some of those individuals and organizations who were objecting to the Code, as well as those who had expressed approval.

In his remarks, Mr. Kirby stated: "The listener expects more from his radio set than a continuous flow of political harangue." He declared that each radio manager endeavors to program his station with sufficient variety so as to cater to the interests of the greatest number of listeners, serving the social, educational, religious and cultural needs of all. He stated that though we have 130,000,000 citizens each with the right of free speech, we have just some 800 radio stations. "Suppose everybody wanted to exercise his right of free speech at the same time on each of the stations? Actually this is impossible. Practically it is absurd. Yet there are those newly-become students of broadcasting who would have it this way." He pointed out that we manage our affairs through a system of "representative spokesmen in a representative government. The NAB Code extends the same American precept to radio."

Labor

THURMAN ARNOLD DISCUSSES ILLEGAL LABOR PRACTICES

Thurman Arnold, Assistant Attorney General in charge of the Justice Department's anti-trust division, made an interesting statement this week regarding certain union labor practices which he felt were illegal.

Although the statement dealt primarily with the building trades, it might be construed to apply to certain practices in the broadcasting industry.

The statement, printed in full below, was in the form of a letter to the secretary of the Central Labor Union (A. F. of L.) in Indianapolis, who had inquired about the recent indictment of a number of building union leaders, under the Sherman Act, in federal courts.

"Dear Sir:

"I reply to your letter inquiring about the application of the anti-trust laws to labor unions. I make this reply public because numerous other inquiries similar to yours indicate widespread public interest in the question.

"The anti-trust laws should not be used as an instrument to police strikes or to adjudicate labor controversies. The right of collective bargaining by labor unions is recognized by the anti-trust laws to be a reasonable exercise of collective power. Therefore, we wish to make it clear that it is only such boycotts, strikes or coercion by labor unions as having no reasonable connection with wages, hours, health, safety, the speed-up system or the establishment and maintenance of the right of collective bargaining which will be prosecuted.

"The kind of activity which will be prosecuted may be illustrated by a practice frequently found in the building industry. Suppose a labor union, acting in combination with other unions who dominate building construction in a city, succeeds by threats or boycotts in preventing the use of economical and standardized building material in order to compel persons in need of low-cost housing to hire unnecessary labor.

Not Private Police Force

"Here is a situation with no reasonable connection with wages, hours, health, safety, or the right of collective bargaining. The union may not act as a private police force to perpetuate unnecessarily costly and uneconomic practices in the housing industry. Progressive unions have frequently denounced this 'make work' system as not to the long-run advantage of labor. Such unions have found it possible to protect the interests of labor in the maintenance of wages and employment during periods of technological progress without attempting to stop that progress.

"Preventing improved methods of production—as distinguished from protecting labor from abuses connected with their introduction—is, of course, not the only labor activity which goes beyond any legitimate labor purpose. We cite the example to emphasize the fact that union practices may become illegal where they have no reasonable connection with such legitimate objectives as wages, hours, safety, health, undue speeding up or the right of collective bargaining.

"We have no choice in this matter. Such practices go beyond even the dissenting opinions of the Supreme Court of the United States. which recognize a broader scope for the legitimate activities of labor unions than the majority opinions. In our anxiety to be fair to labor we are not subjecting to criminal prosecution practices which can be justified even under the dissenting opinions of the United States Supreme Court.

"In the present building investigation, a large number of legitimate activities of labor unions have been brought to our attention by complaint. We have been asked to proceed against unions because they maintain high rates of wages, because they strike to increase wages, and because they attempt to establish the closed shop. We have consistently disregarded all such requests.

Conflict of Opinions

"Refusals by unions to work upon goods made in non-union shops have also been brought repeatedly to our attention. In the past, courts have held that such secondary boycotts are violations of the anti-trust laws. In the Duplex and Bedford cut stone cases a minority of the Supreme Court presented the argument against this view. In view of this unsettled conflict of opinion among judges of the highest court as to the reasonableness of such activities we have instructed the attorneys in the building investigation not to institute criminal prosecutions in such cases.

"The types of unreasonable restraint against which we have recently proceeded or are now proceeding illustrate concretely the practices which in our opinion are unquestionable violations of the Sherman Act, supported by no responsible judicial authority whatever.

"1. Unreasonable restraints designed to prevent the use of cheaper material, improved equipment, or more efficient methods. An example is the effort to prevent the installation of factory-glazed windows or factory-painted kitchen cabinets.

"2. Unreasonable restraints designed to compel the hiring of useless and unnecessary labor. An example is the requirement that on each truck entering a city there be a member of the local teamsters' union in addition to the driver who is already on the truck. Such unreasonable restraints must be distinguished from reasonable requirements that a minimum amount of labor be hired in the interests of safety and health or of avoidance of undue speeding of the work.

"3. Unreasonable restraints designed to enforce systems of graft and extortion. When a racketeer, masquerading as a labor leader, interferes with the commerce of those who will not pay him to leave them alone, the practice is obviously unlawful.

"4. Unreasonable restraints designed to enforce illegally fixed prices. An example of this activity is found in the Chicago milk case, where a labor union is charged with combining with distributors and producers to prevent milk being brought into Chicago by persons who refuse to maintain illegal and fixed prices.

"5. Unreasonable restraints, designed to destroy an established and legitimate system of collective bargaining. Jurisdictional strikes have been condemned by the A. F. of L. itself. Their purpose is to make war on another union by attacking employers who deal with that union. There is no way the victim of such an attack may avoid it except by exposing himself to the same attack by the other union. Restraints of trade for such a purpose are unreasonable whether undertaken by a union or by an employer restraining trade or by a combination of an employer and a union, because they represent an effort to destroy the collective bargaining relationships of a union with an employer.

Equal Responsibility

"The principle applicable to unions is the same as that applicable to other groups specially protected by law. Investors may combine into a corporation, farmers into a co-operative, and labor into a union. The anti-trust division has the duty to prevent the use of such legal rights of association in an illegal way for purposes far different from those contemplated in the statutes.

"Unions stand to gain by the vigorous performance of this duty. In the past most labor cases under the Sherman Act have arisen through private suits instituted without public responsibility and often conducted as a part of a struggle to destroy a union or to avoid dealing with it. Organized labor suffers when the selection of labor cases under the Sherman Act and the presentation of argument in such cases is left in the hands of those who may be hostile to organized labor itself. By contrast, enforcement of the law by officials with a public duty to be fair, consistent, and constructive involves an equal care to protect legitimate union activities and to prevent unlawful ones. In such enforcement, labor and the public will necessarily be informed as to the boundary between lawful and unlawful union action; and by virtue of such information the harassment of unions by unjust private suits will become more difficult. Sincerely,

"THURMAN ARNOLD,
"Assistant Attorney General."

Editorial reaction was extremely favorable. The *Washington Post* called the statement "forthright and constructive" and said "progressive labor groups are not likely to challenge this policy." The *Philadelphia Record,* a pro-labor paper, called it "clear thinking on labor's malpractices," adding that the majority of labor unions were not guilty of such "but because these abuses are so flagrant, so indefensible, all organized labor suffers." The Baltimore *Sun* remarked that "tolerant Mr. Arnold finds some union policy intolerable" while the New York *Herald-Tribune,* probing deeper, wondered whether "the President's desire for labor peace has something to do with this sudden threat of prosecution?" William Green, A. F. of L. president, addressed a letter to Attorney General Murphy, however, protesting the Arnold statement and concluding "it seems inconceivable to me that an Administration notable for its friendliness to labor should adopt a retrogressive policy advocated hitherto only by the most extreme reactionary enemies of labor." Mr. Green maintained that labor organizations were wholly exempt from the anti-trust laws.

A. F. OF M. NEGOTIATIONS

November 1—The IRNA executive committee met with representatives of the networks to canvass the situation and to discuss policy with regard to the expiration of A. F. of M. agreements expiring January 17, 1940.

Present: Messrs. Rosenbaum, Ethridge, Damm and Shepard for IRNA; Messrs. Klauber, Wood and Lowman for the networks; Mr. Lafount of the Independents, and J. L. Miller of the NAB.

November 2—The IRNA executive committee met the executive board of the A. F. of M. The working of the present agreements was discussed. The A. F. of M. board announced it wanted an additional $1,500,000 annual expenditure for staff musicians by network affiliates and an increase of $60,000 at each key station by the three major networks.

Present: Messrs. Rosenbaum, Damm and Shepard for IRNA; Messrs. Wood, Lowman and Seebach for the networks; Mr. Lafount of the Independents and J. L. Miller of the NAB. It was explained that Messrs. Lafount and Miller were present as observers.

November 17—The IRNA board of directors met alone and with representatives of the networks, to discuss what answer should be given to the A. F. of M.

Present: Messrs. Rosenbaum, Carpenter, Craney, Damm, Ethridge, Lounsberry, Morency, O'Fallon, and Shepard for IRNA; Messrs. Lohr, Klauber, Streibert, Wood, Lowman and Ream for the networks; J. L. Miller of NAB.

November 20—An IRNA committee met with the A. F. of M. executive board, and proposed that the matter of new agreements be left to individual stations and local unions. This the A. F. of M. board rejected. The IRNA committee then proposed an attempt to make a new national settlement if the A. F. of M. would discuss changes in Schedule A of the present national settlement and would agree to substantially the same total expenditure now required. The A. F. of M. board said it would reply to this second proposal after executive consideration. A copy of the IRNA statement, read by Mr. Rosenbaum, was mailed to all broadcasters.

Present: Messrs. Rosenbaum, Ethridge, Shepard, and Norton for IRNA; Messrs. Wood, Lowman, Streibert and Seebach for the networks; J. L. Miller of NAB.

FREE OFFERS

Flower Industries Council, who want stations to use publicity intended to promote the sale of flowers for Christmas, is the only free offer reported to NAB this week. The Bureau of Radio Advertising has invited them to use radio on a regular basis, in which case they will be assured of 100% station cooperation and results that will more than justify the expenditure.

COST-PER-INQUIRY

Ken Hoffman (Christmas Cards) is an enterprising citizen of New York City, who would like stations to sell his Christmas cards on a percentage basis, at the same time serving as a clearing house for orders. NAB has advised him that member stations consider this bad business practice, and has expressed the hope that he can see fit to buy time at stations' quoted card rates, with correspondingly improved results.

DECEMBER COMING EVENTS

December 3-10	—International Golden Rule Week
December 16	—Boston Tea Party, 1773 —Beethoven, composer, born 1770
December 17	—John Greenleaf Whittier, born 1807 —Wilbur Wright's first flight, 1903
December 21	—Forefather's Day—Landing of Pilgrims in 1620 (celebrated mostly in New England)
December 22	—Winter Begins Today
December 25	—Christmas Day
December 31	—New Year's Eve.

KENTUCKY BROADCASTING CORPORATION ORDERED TO SHOW CAUSE

The Federal Communications Commission on its own motion, ordered the Kentucky Broadcasting Corporation to show cause, on or before December 5th, why a construction permit issued to that corporation for a new station at Louisville should not be recalled on the ground that the concern is not financially qualified to construct and operate the proposed station in the public interest.

On February 8, 1939, the Commission granted the construction permit for the proposed Louisville station, to use 1210 kilocycles, 100 watts night and 250 watts day, unlimited time. On October 10, 1939, the Commission, without hearing, authorized the Northside Broadcasting Corporation to increase hours of operation of its station (WGRC), at New Albany, Indiana, from daytime only with 250 watts power to unlimited time with the same power.

On October 30th the Kentucky Broadcasting Corporation petitioned for rehearing of the Northside Broadcasting Corporation grant. It claimed that the authorization "would result in such severe loss of operating revenue to petitioner's proposed station as to impair the service which it could render" and, further, that "it would destroy the ability of the Kentucky Broadcasting Corporation to render proper service in the public interest." No facts were stated in the petition in the support of these conclusions.

In formally denying the Kentucky Broadcasting Corporation's request for rehearing, the Commission said:

> "Since the petitioner's station is not yet constructed, much less operating, and petitioner is not a licensee under the Act, and is not engaged in the operation of a broadcast station, it is difficult to see how proof of the allegations * * * would constitute proper grounds for a denial of Northside's application. At the most, such allegations cast serious doubts upon the petitioner's financial qualifications to construct and operate its proposed station."

In view of such "voluntary admissions as to its inability to operate its proposed station if the Northside Broadcasting Corporation is authorized to operate full time," the Commission issued its supplemental show cause order in the case of the Kentucky Broadcasting Corporation.

FCC CALLS ATTENTION TO TEMPORARY PERMIT RULES

Attention of broadcasters has been called by the Federal Communications Commission to its rules dealing with special temporary authorizations. In an official announcement on this subject this week the Commission said:

> The attention of all licensees of standard broadcast stations is called to the provisions of Section 1.365 of the Rules of Practice and Procedure. This section governs the filing and action on requests for special temporary authorizations. Two provisions are particularly called to the attention of these licensees. These provisions are briefly summarized as follows:
>
> 1. Requests must be made 10 days prior to the time of desired operation. In special cases where the request could not be made on time, a full explanation must be made in the request as a basis for acceptance.
> 2. The requests must be limited to temporary periods for the transmission of programs or events which are not recurrent.
>
> All requests for special temporary authorizations will be considered strictly under all other provisions of Section 1.365, as well as the two provisions outlined above. Requests for operation not in accordance with this section will not be granted.
>
> The provision requiring that the request be made 10 days prior to the desired time of operation means that events which are known 10 days in advance, such as the broadcast of election returns, addresses by prominent citizens, sports events, etc., must be filed 10 days before the event. In such cases a request for acceptance upon the basis that arrangements for the broadcast were not made 10 days prior to the event cannot be accepted. However, requests for operation in connection with an emergency or play-off of a sports event tie or championship which could not have been foreseen, would constitute a basis for requesting an exception to the requirement for filing 10 days in advance.
>
> Requests must be limited to temporary periods for transmission of programs which are not recurrent. This means, for example, that a program concerning a community chest drive, the dedication of a public building, an address by a prominent citizen, a sports event, etc., may be considered, provided that only the actual time required for such operation is involved. Additional time for holding the audience or for the convenience of the licensee is not in order. Requests to carry programs which are recurrent and extend over considerable time, particularly beyond a definite 30-day interval, cannot be considered as proper basis for a request for temporary operation. Requests for such operation should be made by formal application in accordance with the rules governing the same.
>
> Any licensee making a request for a temporary authorization should read carefully and must comply fully with all provisions of Section 1.365. Such procedure is essential to avoid unnecessary expense and delay in the handling of the request.
>
> Section 1.365 referred to is as follows:
>
> *Sec. 1.365 of the Rules of Practice and Procedure of the Federal Communications Commission*
>
> Sec. 1.365. *Special temporary authorizations.* (a) Special temporary authority may be granted for the operation of a station for a limited time, or in a manner and to an extent or for service other or beyond that authorized in an existing license upon proper application therefor;[1] *Provided, however,* That no such request will be considered unless:
>
> (1) It is received by the Commission at least ten days previous to the date of proposed operation: *Provided, however,* That any such request received within less than ten days may be accepted upon due showing of sufficient reasons for the delay in submitting such request;
>
> (2) Full particulars as to the purpose for which the request is made are stated.
>
> (b) If the request is for operation of a standard broadcast station, the following additional requirements shall apply:
>
> (1) No such authority may be granted to a person other than the licensee of an existing standard broadcast station.
>
> (2) The request shall be limited to a definite or temporary period or periods for the transmission of programs or events which are not recurrent, and approval thereof will not be granted for a period in excess of thirty days.
>
> (3) The request shall show that it has been seasonably submitted to other stations whose operations may be affected (to be determined as indicated below), and the date on which such request was so submitted, which such stations shall submit direct to the Commission waiver of objection to the granting thereof or a statement of the nature of any objections that such stations may desire to interpose.
>
> (4) If the request is for operation upon a clear channel, showing required above shall be made with respect to the Class I station or stations on the channel.
>
> (5) If the request is made by time sharing station, the showing required above shall be made with respect to the station or stations with which time is shared.
>
> (6) In any case, the showing required above must be made with respect to any station on the same or adjacent channels when any such station is located within the interference range of the station making the request to be determined by the "Standards of Good Engineering Practice Concerning Standard Broadcast Stations."
>
> (7) Waiver of objections, or statement of objections, when furnished under this rule, shall be forwarded direct to the Commission by the responding station, and in the case of waiver shall show whether the waiver covers simultaneous operation or whether the station is giving up the time sought by the applicant. Where it appears that the proposed operation has been seasonably submitted to the station or stations referred to in subparagraphs (4), (5), and (6), above, and no reply has been received, it will be considered that such stations have waived any objections to the granting of the request.

FCC RULES AMENDED

Section 1.142 of the FCC Rules of Practice and Procedure was amended, effective immediately, to read as follows:

> "Unless otherwise specifically provided, an original and fourteen copies of all petitions, motions, pleadings, and other documents required or permitted to be filed under these rules shall be furnished the Commission."

BROADCAST MEASUREMENTS

During October the Federal Communications Commission measured 714 broadcast stations, leaving 82 not measured.

Six hundred and thirty-six stations showed a maximum deviation within 0-10 cycles; 68 stations within 11-25 cycles; 8 stations within 26-50 cycles; and 2 stations over 50 cycles.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission has adopted a final order granting the applications of KQV, **Pittsburgh, Pa.,** and WNBC, **New Britain, Conn.,** for modification of licenses: KQV for authority to operate on frequency **1380 kilocycles** with 1000 watts, unlimited time, using directional antenna at night, and to change the phasing of directional antenna, instead of 500 watts night, 1000 watts LS, using directional antenna at night; and WNBC to operate on the same frequency with 1000 watts, unlimited time, using directional antenna, instead of 250 watts night, 1000 watts LS.

---

[1] Informal Applications.

An amendment to a final order of the Commission has been adopted in connection with the granting of the application of the Saginaw Broadcasting Company for the erection of a new station at **Saginaw, Michigan,** to operate **1200 kilocycles,** 100 watts night, 250 watts LS, with specified hours of operation, and the application of Gross and Shields for a new station also at Saginaw to operate on **950 kilocycles,** 500 watts, daytime hours, calling for the approval by the Commission of the transmitter site.

Final order was adopted by the Commission granting the application of Vincennes Newspapers, Inc., for construction permit to erect a new station at **Vincennes, Indiana,** to operate on **1420 kilocycles,** 100 watts, unlimited time.

The Commission denied in an order the request of Yuba-Sutter Broadcasters, **Marysville, Calif.,** to reopen the proceedings for the purpose of adducing additional evidence, and for authority to amend its application. The Commission adopted its proposed findings of fact and entered its decision denying the application of the company to operate a new station at Marysville on **1320 kilocycles,** 250 watts, unlimited time, using a directional antenna after local sunset.

Final order was also adopted by the Commission granting the application of WJMS, Inc., for a construction permit to erect a new station at **Ashland, Wisconsin,** to operate on **1370 kilocycles,** 100 watts, unlimited time, subject to certain conditions.

FINDING OF FACT

The Federal Communications Commission has announced its proposed finding of fact proposing to grant the application of WJBO, **Baton Rouge, La.,** and WAPO, **Chattanooga, Tenn.,** WJBO for a construction permit to operate with 1000 watts on **1120 kilocycles,** instead of 500 watts, unlimited time, and WAPO for authority to change its frequency from **1420 kilocycles,** 100 watts night, 250 watts day LS, unlimited time to **1120 kilocycles,** 500 watts night, 1000 watts day on an unlimited time basis, employing a directional antenna at night.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearing is scheduled before the Commission in a broadcast case for the week beginning Monday, November 27. It is subject to change.

Friday, December 1

Hearing Before Paul A. Walker, Commissioner,

To Be Held in Grand Jury Room No. 212, U. S. Court House, Phoenix, Arizona

KUMA—Albert H. Schermann, Yuma, Ariz.—Hearing upon Order of Revocation of License of Station KUMA.

FUTURE HEARING

During the week the Commission has announced the following tentative date for a broadcast hearing. It is subject to change.

January 29

WINS—Hearst Radio, Inc. (Assignor), Metropolitan Broadcasting Corp. (Assignee), New York, N. Y.—Voluntary assignment of license, **1180 kc.,** 1 KW, limited time (KEX and KOB).

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPDN—R. C. Hoiles, Pampa, Tex.—Granted modification of license to increase hours of operation from daytime to unlimited, using present frequency **1310 kc.** and power of 100 watts.

KGFL—KGFL, Inc., Roswell, N. Mex.—Granted modification of license to change time of operation from specified hours to unlimited.

WHMA—Harry M. Ayers, Anniston, Ala.—Granted construction permit to make changes in equipment and increase power from 100 to 250 watts.

WKZO—WKZO, Inc., Kalamazoo, Mich.—Granted modification of construction permit to make changes in directional antenna system and increase night power from 250 watts to 1 KW, employing directional antenna system for nighttime operation; also extension of commencement date to 30 days after grant and completion date to 180 days thereafter.

WOW—Woodmen of the World Life Ins. Society, Omaha, Nebr.—Granted construction permit to move transmitter site locally, install new equipment, and increase night power from 1 KW to 5 KW. Exact transmitter site and type of antenna to be determined with Commission's approval.

WROL—S. E. Adcock and S. E. Adcock, Administrator of Estate of Ruth Adcock, deceased, Knoxville, Tenn.—Granted authority to transfer control of Stuart Broadcast Corporation (licensee of Station WROL) to S. E. Adcock.

WBNS, Inc., Columbus, Ohio.—Granted construction permit for new high frequency broadcast station to operate on **43000 kc.,** with 250 watts, special emission for frequency modulation, unlimited time.

KFXD—Frank E. Hurt, Nampa, Idaho.—Granted modification of license to increase night power from 100 to 250 watts.

WGIL—Galesburg Broadcasting Co., Galesburg, Ill.—Granted modification of license to increase time of operation from daytime only to unlimited, using 250 watts day and night.

WMEX—The Northern Corp., Chelsea, Mass.—Granted modification of license to increase night power from 100 to 250 watts.

KTRI—Sioux City Broadcasting Co., Sioux City, Iowa.—Granted modification of license to increase night power from 100 to 250 watts.

KDRO—Albert S. and Robert A. Drohlich, d/b as Drohlich Bros., Sedalia, Mo.—Granted modification of license to increase night power from 100 to 250 watts.

WCOS—Carolina Advertising Corp., Columbia, S. C.—Granted modification of license to increase night power from 100 to 250 watts.

KTSM—Tri State Broadcasting Co., Inc., El Paso, Tex.—Granted modification of license to increase night power from 100 to 250 watts.

WDAH—Tri State Broadcasting Co., Inc., El Paso, Tex.—Granted modification of license to increase night power from 100 to 250 watts.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KADA, Ada, Okla.; KALB, Alexandria, La.; KAND, Corsicana, Tex.; KARM, Fresno, Calif.; KAST, Astoria, Ore.; KDLR, Devils Lake, N. Dak.; KDON, Monterey, Calif.; KFDA, Amarillo, Tex.; KFJB, Marshalltown, Iowa; KFOR, Lincoln, Nebr.; KFPL, Dublin, Tex.; KFXJ, Grand Junction, Colo.; KFXM, San Bernardino, Calif.; KGDE, Fergus Falls, Minn.; KGEK, Sterling, Colo.; KGEZ, Kalispell, Mont.; KGLO, Mason City, Iowa; KGY, Olympia, Wash.; KHUB, Watsonville, Calif.; KITE, Kansas City, Mo.; KLAH, Carlsbad, N. Mex.; KMLB, Monroe, La.; KOCY, Oklahoma City, Okla.; KOOS, Marshfield, Ore.; KPDN, Pampa, Tex.; KPFA, Helena, Mont.; KPMC, Bakersfield, Calif.; KRBA, Lufkin, Tex.; KVNU, Logan, Utah; KVOL, Lafayette, Ind.; KVSF, Santa Fe, N. Mex.; KVSO, Ardmore, Okla.; KWG, Stockton, Calif.; KWOC, Poplar Bluff, Mo.; WABI, Bangor, Maine; WAML, Laurel, Miss.; WBBL, Richmond, Va.; WBRB, Red Bank, N. J.; WCLO, Janesville, Wis.; WCLS, Joliet, Ill.; WCMI, Ashland. Ky.; WCOU. Lewiston, Maine; WCOV, Montgomery, Ala.; WEMP, Milwaukee, Wis.; WEST, Easton, Pa.; WEXL, Royal Oak, Mich.; WFBG, Altoona, Pa.; WFDF, Flint, Mich.; WFOY, St. Augustine, Fla.; WGBB, Freeport, N. Y.; WGRM, Grenada, Miss.; WHAT, Philadelphia, Pa.; WHBU, Anderson, Ind.; WHBU, Green Bay, Wis.; WIBU, Poynette, Wis.; WJBY, Gadsden. Ala.; WJEJ, Hagerstown, Md.; WJIM, Lansing, Mich.; WJMC, Rice Lake, Wis.; WJNO, West Palm Beach, Fla.; WJTN, Jamestown, N. Y.; WJW, Akron, Ohio; WLBC, Muncie, Ind.; WLOK, Lima, Ohio; WNBH, New Bedford, Mass.; WOMT, Manitowoc, Wis.; WQXR, New York City; WRAL, Raleigh, N. C.; WRAW, Reading, Pa.; WRBL, Columbus, Ga.; WROL, Knoxville, Tenn.; WSAJ, Grove City, Pa.; WSAY, Rochester, N. Y.; WSGN, Birmingham, Ala.; WSNJ, Near Bridgeton, N. J.; WTAX, Springfield, Ill.; WTHT, Hartford, Conn.; WTMA, Charleston, S. C.; WSOY, Decatur, Ill.; WWAE, Hammond, Ind.; KBTM, Jonesboro, Ark.; KHBG, Okmulgee, Okla.; KSUN, Lowell, Ariz.; KVOX, Moorhead, Minn.

WBNS—WBNS, Inc., Columbus, Ohio.—Granted renewal of license for auxiliary transmitter for the period ending August 1, 1940.

WHEC—WHEC, Inc., Rochester, N. Y.—Granted renewal of license for the period ending August 1, 1940.

WRR—City of Dallas, Texas, Dallas, Tex.—Granted renewal of license for the period ending June 1, 1940.

WRR—City of Dallas, Texas, Dallas, Tex.—Granted renewal of license for auxiliary transmitter for the period ending June 1, 1940.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Present license extended on a temporary basis for the period ending January 1, 1940, pending receipt of and determination upon application for renewal.

KFXD—Frank E. Hurt, Nampa, Idaho.—Present license extended on a temporary basis for the period ending January 1, 1940, pending receipt of and determination upon application for renewal.

KWJB—Sims Broadcasting Co., South of Globe, Ariz.—Present license extended on a temporary basis for the period ending January 1, 1940, pending receipt of and determination upon application for renewal.

KOME—Oil Capital Sales Corp., Tulsa, Okla.—Present license extended on a temporary basis for the period ending January 1, 1940, pending receipt of and determination upon application for renewal.

WBRY—American Republican, Inc., Waterbury, Conn.—Present license extended upon a temporary basis only, pending receipt of and determination upon application for renewal, but in no event longer than January 1, 1940.

KGBU—Alaska Radio & Service Company, Inc., Ketchikan, Alaska. —Present license further extended upon a temporary basis only, for the period ending January 1, 1940, pending determination upon application for renewal.

KVOS—KVOS, Inc., Bellingham, Wash.—Present license extended on a temporary basis only for the period ending October 1, 1940, upon the express condition that the grant shall not be construed as a finding by the Commission upon the application of Bellingham Broadcasting Co. for construction permit, nor upon the application for renewal of license of KVOS, nor upon any of the issues involved therein, nor that the Commission has found that the operation of this station is or will be in the public interest beyond the express terms of the temporary license.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted renewal of license on a temporary basis only for the period ending October 1, 1940, subject to whatever action may be taken by the Commission upon pending application for renewal.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Granted renewal of license on a temporary basis only for the period ending October 1, 1940, subject to whatever action may be taken upon pending application for renewal of license.

The following relay broadcast stations were granted renewals for the regular period:

WLWC, area of Cincinnati; KEGR, area of Seattle; WEIA and WEIB, area of Schenectady; WEIO, WEIN, WEIP, area of Milwaukee; KEIF, area of Fort Worth, Tex.; KEIH, area of Denver; WEIQ, area of New York City; KEIQ, KEIR, area of Los Angeles; KEIS, area of Kansas City, Mo.; WEJA, area of New York City; WEJC, area of Washington, D. C.; WEJH, area of Chicago; KEJH, KEJI, area of San Francisco; KEIX, KEIW, area of Denver; WEKJ, area of Pittsburgh, Pa.; WEOH, area of Richmond, Va.; KEGZ, area of Spokane, Wash.; WEKU, area of Hartford, Conn.; WELK, area of Springfield, Ill.; WEIK, area of Indianapolis.

KIJG—Eagle Broadcasting Co., Inc., area of Brownsville, Tex.—Granted renewal of relay broadcast station license for the period ending October 1, 1940.

MISCELLANEOUS

WSVS—Seneca Vocational High School, Buffalo, N. Y.—Granted special temporary authority to remain silent on November 23, 24 and 25, instead of November 30, December 1 and 2, as authorized by grant of June 8, in order to observe Thanksgiving holidays.

KVAK—Carl Latenser, Atchison, Kan.—Granted special temporary authority to operate from 7 to 11 p. m., CST, on November 17, in order to broadcast Atchison High School v. Hiawatha Kansas High School football game only.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts nighttime on November 17, in order to broadcast football game only.

WNBH—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted special temporary authority to operate a crystal controlled portable transmitter in the vicinity of New Bedford, Mass., using power of 50 watts, frequency **1360 kc.**, between the hours beginning one hour after sunrise and ending one hour prior to local sunset, for a period not to exceed 10 days, in order to conduct site survey.

KRKO—Lee E. Mudgett, Everett, Wash.—Granted special temporary authority to operate simultaneously with station KEEN from 7 p. m. to 12 p. m., Midnight, on November 18 and December 2, in order to broadcast Everett City election returns.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted special temporary authority to operate from local sunset (December 4:15 p. m., EST) to midnight on December 12, using 1 KW power, in order to broadcast final election results of the city of Lawrence.

KWHB—WHB Broadcasting Co., Kansas City, Mo.—Granted special temporary authority to use equipment described in construction permit granted October 23, with 100 watts power, frequencies **1622, 2058, 2150** and **2790 kc.**, for a period not to exceed 30 days, pending filing and action on application for license to cover said construction permit.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from local sunset (November 5:00 p. m., EST) to midnight on November 21, 1939, in order to broadcast the proceedings attendant upon the Democratic Victory Banquet.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate from 8:30 p. m., EST, to the conclusion of the Mercer College v. Howard College football game on November 16, 1939, in order to broadcast football game only.

KUMA—Albert H. Schermann, Yuma, Ariz.—Adopted an order authorizing the Commissioner designated to preside at the hearing, to fix the time and place such hearing shall be held, to hear, consider, determine and act upon any and all petitions, motions, and other preliminary matters in connection with, or pertaining to, said proceedings which may arise prior to the date of said hearing.

E. B. Sturdivant, d/b as Silver Crest Theaters, Yuma, Ariz.—Adopted an order authorizing the Commissioner designated to preside at the hearing, to fix the time and place such hearing shall be held, to hear, consider, determine and act upon any and all petitions, motions, and other preliminary matters in connection with, or pertaining to, said proceedings which may arise prior to the date of said hearing.

WJSV—Columbia Broadcasting System, Inc., Washington, D. C.—Granted special temporary authority to use a 100-watt crystal-controlled Collins transmitter, operating on **1510 kc.,** during daylight hours, for the period November 15 to November 24, in order to make field intensity measurements.

WJRD—James R. Doss, Jr., Tuscaloose, Ala.—Granted special temporary authority to operate additional time from 7:00 p. m. to conclusion of game on November 16, 1939, in order to broadcast high school football game only.

WFTL—Tom M. Bryan, Ft. Lauderdale, Fla.—Granted modification of construction permit for approval of transmitter and studio sites at 403 Tarpon Drive, Ft. Lauderdale, Fla., and installation of vertical radiator.

KADA—C. C. Morris, Ada, Okla.—Granted special temporary authority to maintain studios at the transmitter site (Highway No. 48, 1 mile north of Ada, Okla.), for a period not to exceed 30 days, pending determination of studio site due to fire.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Texas.—Granted special temporary authority to rebroadcast transmissions between the ground and plane of Army Stations at Randolph Field over Radio Station KABC on November 16, 23, 30, December 7 and 14, 1939.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Denied extension of special temporary authority to operate unlimited time with 1 KW, for the period November 16, 1939, to not later than December 15, 1939, in order to broadcast civic, charitable, religious, educational, fraternal, and commercial programs, and news of national and international events of extreme local interest, both of local origin and from the Columbia Broadcasting System.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted special temporary authority to operate simultaneously with Station KBST from 4:45 p. m. to 6:00 p. m., EST, on November 24 and 30, 1939, in order to broadcast football games only.

WCLS—WCLS, Incorporated, Joliet, Ill.—Granted special temporary authority to operate additional time on December 5, 12, and 19, 1939, in order to broadcast high school football games only.

KVAK—Carl Latenser, Atchison, Kans.—Granted special temporary authority to operate additional time from local sunset on November 19, 1939, in order to broadcast football game only.

KFDY—South Dakota State College, Brookings, S. D.—Granted special temporary authority to remain silent on November 30, 1939, in order to observe Thanksgiving holiday.

WSVS—Elmer G. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Granted special temporary authority to remain silent on January 1, 1940, February 12 and 22, 1940, March 30, 1940 (noon) to March 31, 1940, May 30, 1940 and June 17, to September 8, 1940, in order to observe holidays and vacations as described in letter dated November 9, 1939.

KGER—Consolidated Broadcasting Corp, Ltd., Long Beach, Calif.—Dismissed without prejudice to the filing of another petition which complies with the Rules and Regulations of the Commission, the petition for leave to intervene in the hearing on the application of Broadcasting Corporation of America, for a new station in Riverside, Calif.

KFRU—KFRU, Inc., Columbia, Mo.—Granted peition to intervene in the hearing on the application of Stephenson, Edge and Korsmeyer, for a new station in Jacksonville, Ill., but denied request for enlargement of issues.

Radio Voice of Springfield, Inc., Springfield, Ohio.—Granted petition for leave to amend application for new station.

Metropolitan Broadcasting Corp., Assignee, New York City.—Granted motion for continuance of hearing 60 days from November 27, on the application to assign license of Station WINS from Hearst Radio, Inc., to Metropolitan Broadcasting Corp.

W1XPW—WDRC, Inc., Meriden, Conn.—Granted extension of special temporary authority to rebroadcast over high frequency broadcast station W1XPW the transmissions from high frequency broadcast station W2XMN, for the period November 29 to December 28, in order to experiment as to the feasibility of such a system.

WHA—State of Wisconsin University of Wisconsin, Madison, Wis.—Granted special temporary authority to operate from local sunset (November 4:30 p. m., CST) to 5 p. m., CST, on November 18, in order to broadcast University of Wisconsin Homecoming football game only.

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Granted special temporary authority to operate from local sunset (November and December 5:15 p. m., CST) to 9 p. m., CST, on November 19, 26, and December 3, in order to broadcast church services only.

E. B. Sturdivant, d/b as Silver Crest Theaters, Yuma, Ariz.—Granted motion to dismiss without prejudice the application for a new station in Yuma.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Designated for hearing the application of WBHP for renewal of license on the issues relating to technical violations of the Commission's Rules and Regulations, and to determine whether applicant is capable or willing to operate the station in accordance with the Rules of the Commission.

KRSC—Radio Sales Corp., Seattle, Wash.—Adopted amended order in the matter of the application of KRSC for construction permit to make changes in transmitting equipment, move transmitter site and increase power, by adding a paragraph that permittee shall file with the Commission within two months after effective date of order, an application for modification of construction permit, specifying exact transmitter site.

Gateway Broadcasting Co., Louisville, Ky.—Denied petition for hearing or rehearing in the application of WGRC, Northside Broadcasting Corp., New Albany, Ind., for modification of license to increase hours of operation from daytime to unlimited, on frequency **1370 kc.,** with 250 watts power, which was granted by the Commission without a hearing on October 10, 1939.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Adopted an order authorizing the Commissioner designated to preside at the hearing in re the application of WHDH to change operating time from daytime (KOA) to unlimited, and increase power from 1 KW to 5 KW, to fix the time and place such hearing shall be held, to hear, consider, determine and act upon any and all petitions, motions, and other preliminary matters in connection with and pertaining to said proceedings.

KIEV—Cannon System, Ltd., Glendale, Calif.—Assigned Ralph L. Walker to preside at the hearing on the application for renewal of license for station KIEV, hearing to be held in the office of the Inspector in Charge, in Los Angeles, on December 7, 1939.

WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—Denied petition for extension of effective date of final order in re Docket No. 5451.

WTHT—The Hartford Times, Inc., Hartford, Conn.—Granted special temporary authority to perform site surveys in or near Hartford during the experimental period on frequency **1200 kc.,** with a portable modified radio telephone transmitter, 50 watts power, with unmodulated carrier, for a period not to exceed 10 days.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period November 20 to December 19, 1939.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent from 2 to 3 p. m. on December 5, 6, 7, 12, 13, 14, 19 and 20, and from 3 to 3:30 p. m., CST, on December 4, 11 and 18, in order to permit WNAD to broadcast special educational programs; to operate from 7:15 p. m. to 9:15 p. m., December 21, 26, and 28, and from 8:15 to 9:15 p. m., CST, on December 27, in order to permit WNAD to remain silent during Christmas vacation (provided WNAD remain silent).

WNAD—University of Oklahoma, Norman, Okla.—To operate from 2 to 3 p. m. on December 5, 6, 7, 12, 13, 14, 19 and 20, and from 3 to 3:30 p. m., CST, on December 4, 11 and 18, in order to broadcast special educational programs (provided KGGF remains silent); to remain silent from 7:15 to 9:15 p. m. on December 21, 26 and 28, and from 8:15

to 9:15 p. m., CST, on December 27, in order to observe Christmas vacation.

The Louisville Times Co., Louisville, Ky.—Granted construction permit for new low frequency relay broadcast station to operate on frequencies **1646, 2090, 2190** and **2830 kc.,** 50 watts.

J. T. Ward, d/b as WLAC Broadcasting Service (Nashville, Tenn.), Portable-Mobile.—Granted construction permit for new high frequency relay broadcast station to operate on frequencies **30820, 33740, 35820** and **37980 kc.,** 2 watts.

KIIQ—K. M. T. R. Radio Corp. (Los Angeles, Cal.), Portable-Mobile.—Granted construction permit for reinstatement of low frequency relay broadcast station to operate on frequencies **1622, 2058, 2150** and **2790 kc.,** 200 watts.

KBQA—Maxwell H. White & Herman R. Wiecking, d/b as Winona Radio Service, Portable-Mobile (area of KWNO, Winona, Minn.).—Granted license to cover construction permit for new low frequency broadcast station to operate on frequencies **1646, 2090, 2190, 2830 kc.,** 20 watts.

KMED—Mrs. W. J. Virgin, Medford, Ore.—Granted license to cover construction permit authorizing installation of new equipment and increase in day power from 250 watts to 1 KW.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted license to cover construction permit authorizing new station to operate on **880 kc.,** 250 watts, daytime only. Also granted authority to determine operating power by direct measurement of antenna input.

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.—Granted special temporary authority to operate a 50-watt site test transmitter, on the frequency **740 kc.,** in the vicinity of Portsmouth, during the experimental period when station WSB is not in operation, for a period not to exceed 10 days, in order to make a survey of a proposed new transmitter site for station WHEB.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted special temporary authority to operate unlimited time on November 23, in order to broadcast programs as described in letters received November 13.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate additional time on November 23, in order to broadcast a football game only.

WSUI—State University of Iowa, Iowa City, Iowa.—Granted special temporary authority to reduce hours of operation from unlimited to a minimum of 8 hours daily, for the period December 17, 1939, to January 3, 1940, in order to observe Christmas vacation.

WLWG—The Crosley Corp. (Cincinnati, Ohio—area of WLW and WSAI), Portable-Mobile.—Granted construction permit to make changes in equipment and increase power from 1 to 2 watts in High Frequency Relay Broadcast Station.

WLWH—The Crosley Corp. (Cincinnati, Ohio—area of WLW and WSAI), Portable-Mobile.—Granted construction permit to make changes in equipment of High Frequency Broadcast Station.

WLWI—The Crosley Corp. (Cincinnati, Ohio—area of WLW and WSAI), Portable-Mobile.—Granted construction permit to make changes in equipment of High Frequency Broadcast Station and increase power from 5 to 15 watts.

WOLS—O. Lee Stone, Florence, S. C.—Granted license to cover C. P. authorizing changes in composite equipment and increase power from 100 to 250 watts.

WEGS—Donald A. Burton, Muncie, Ind.—Granted license to cover C. P. for changes in equipment of High Frequency Relay Broadcast Station.

KORE—Eugene Broadcast Station, Eugene, Ore.—Granted license to cover C. P. authorizing changes in equipment and increase in power from 100 to 250 watts.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Granted modification of construction permit authorizing changes in equipment and extension of commencement date to 90 days after grant and completion date to 90 days thereafter.

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Granted authority to determine operating power by direct measurement of antenna input.

WRAK—WRAK, Inc., Williamsport, Pa.—Granted authority to determine operating power by direct measurement or antenna input.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Granted license to cover C. P. authorizing move of transmitter site, changes in equipment and installation of vertical radiator.

Westinghouse Electric and Mfg Co. (Pittsburgh, Pa.), Portable-Mobile.—Granted construction permit for new high frequency relay broadcast station to operate on frequencies **31220, 35620, 37020** and **39260 kc.,** 2 watts. Also granted license to cover same.

Bamberger Broadcasting Service, Inc., New York City.—Granted special temporary authority to use a Beer-Mug type transmitter manufactured by Fred M. Link, Model No. 388, power 0.2 watt, under area license of station WEGK, instead of regularly licensed equipment, for a special pickup at Seven-Day Bicycle Races, Madison Square Garden, New York City, on November 20, on frequencies **31620, 35260, 37340, 39620 kc.**

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Granted special temporary authority to rebroadcast two-wav communication between plane and ground on the frequencies **7385** and **6290 kc.,** at Chanute Field, Ill., on November 20, in connection with serial program concerning Army expansion.

KUMA—Albert H. Schermann, Yuma, Ariz.—Denied petition for indefinite postponement of hearing in re revocation of license of KUMA.

APPLICATIONS FILED AT FCC

580 Kilocycles

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—Modification of license to increase power from 1 KW; 5 KW day to 5 KW day and night.

590 Kilocycles

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, Hawaii.—Modification of construction permit B-P-2220, for change in frequency, increase in power, move of transmitter, install new transmitter and antenna, further requesting authority to increase power from 1 KW; 5 KW day to 5 KW day and night, and change name to Hawaiian Broadcasting System, Ltd.

630 Kilocycles

WPRO—Cherry & Webb Broadcasting Company, Providence, R. I.—Construction permit to use old W. E. 353 E-1, transmitter as an auxiliary move transmitter from 680 Barrington Parkway, E. Providence, R. I., to Wampanoag Trail, E. Providence, R. I. (site of new main transmitter), increase power from 500 watts; 1 KW day to 1 KW day and night, and use antenna described in construction permit B1-P-2369 as modified.

660 Kilocycles

NEW—Balaban & Katz Corp., Chicago, Ill.—Construction permit for new television station located at northeast corner Washington Blvd. and Crawford Ave., Chicago, Ill., to be operated on **66000-72000 kc.,** 1 KW power, A-3 and A-5 emission, unlimited time.

KEIL—KMTR Radio Corporation, area of California.—Construction permit for reinstatement of station on **30820, 33740, 35820, 37980 kc.,** using 50 watts power for orders on **33740 kc.** and 25 watts for programs.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Charles A. Brewer & Sons—Kenneth E., Everett R. and Nelson C. Brewer, individually and as copartners trading under the name of Chas. A. Brewer & Sons, 6320-32 Harvard Ave., Chicago, manufacturers and distributors of push cards and punch boards used in the sale and distribution of merchandise by lottery methods, are respondents in a complaint.

The complaint charges that the sale and distribution of the push card and punch board devices by respondents supplies to, and places in the hands of others the means of conducting lotteries, games of chance or gift enterprises in the sale and distribution of their merchandise to ultimate consumers. The respondents thus supply to and place in the hands of persons, firms and corporations the means of and instrumentalities for engaging in unfair methods of competition in commerce and unfair acts and practices in commerce within the intent and meaning of the Federal Trade Commission Act. (3952)

Jean Ferrell, Inc., 112 East Walton St., Chicago, engaged in the sale and distribution of a preparation known as "Concentra", represented as a concentrated food product for use in treating obesity and as a tonic, is charged in a complaint with dissemination of misleading advertisements concerning its preparation.

Among the respondent corporation's representations are that "Concentra" is a highly concentrated food, safe for use, and one which, with the addition of liquids, will constitute a balanced diet and replace the ordinary diet. It is alleged to be a highly concentrated, dehydrated food in capsule form, containing rhubarb, soya bean meal, Irish sea moss, gravel root and dehydrated cranberries.

The complaint charges that by reason of the high content of rhubarb present in this preparation it is, in fact, a drug, and is not safe for use by either adults or children, and that serious injury to health may result from its continued use as recommended by the respondent. The preparation, the complaint continues, will not constitute a balanced diet and does not have sufficient nutritive value to replace the ordinary diet. It will not, as advertised, supply deficiencies to the human body or aid in furnishing the corrective organic elements; nor will it correct either overweight or underweight or restore a healthy, normal figure. (3950)

Hudson Fur Dyeing Company—Misrepresentation of rabbit peltries as seal, is charged in a complaint against Louis, Charles, Sidney, Esther and Belle Estrin, trading as Hudson Fur Dyeing Company, 29 Congress St., Newark, N. J. The respondents are engaged in the processing and dyeing of rabbit peltries and also in the distribution of these furs.

The complaint alleges that the respondents attached labels and tags to the peltries and furnished the purchasers tags for use on finished garments made therefrom, reading: "HUDSEAL (Seal Dyed Coney) Trade Mark Reg. * * * Super Quality", and "SATINSEAL REGISTERED Seal Dyed Coney * * * Hudseal Process", the words "Seal Dyed Coney" being printed in much smaller type than the words "Hudseal" and "Satinseal".

By furnishing false and misleading labels and tags to customers, the complaint charges, and causing them to be placed upon the peltries, respondents place in the hands of uninformed or unscrupulous dealers a means whereby members of the purchasing public may be misled into the erroneous belief that fur garments made from rabbit peltries are in fact composed of seal peltries.

The complaint points out that there is a preference on the part of the purchasing public for fur products made from peltries of seal because of their superior qualities such as pliability, durability and luster, and that the false and misleading statements on respondents' labels and tags have the capacity and tendency to mislead and deceive a substantial portion of the purchasing public into the erroneous belief that the garments so labeled are made of seal peltries. (3951)

Retonga Medicine Company, 161 Spring St., N. W., Atlanta, is charged in a complaint with misrepresenting in newspaper advertisements that a medicinal preparation containing drugs, known as "Retonga", is a competent treatment for nervousness, biliousness, undernourishment and other disorders.

The complaint alleges that the representations are grossly exaggerated and misleading, and that "Retonga" is not an alterative medicine or powerful stomachic, and its therapeutic properties the limited to little more than those of a laxative. (3949)

Sure Laboratories—"Sure", a breath purifier manufactured and distributed by Fannie P. Fox, trading as Sure Laboratories, 841 North Wabash Ave., Chicago, will not accomplish the claims made for it in radio broadcasts and newspaper advertising according to a complaint nor can ordinary salesmen, under normal conditions, earn "$300 profit weekly," as suggested in advertisements alleged to have been disseminated by the respondent.

"Just put a drop of 'Sure' on your tongue, swirl it around in your mouth . . . and every trace of offensive breath is gone instantly!" * * * Anyone can make money with 'Sure' ", and "One man has averaged $300 profit weekly for the last 60 days," are among such advertisements in newspapers and broadcasts.

The complaint alleges that the preparation will not neutralize breath odors, and that its effect is limited to masking such odors to a greater or less degree, and that salesmen, under ordinary conditions, cannot earn $300 per week or sums which could be characterized as representing large earnings. (3948)

STIPULATIONS

The Commission entered into the following stipulations during the week:

Apex News and Hair Company, Inc., Indiana and Arctic Avenues, Atlantic City, N. J., operates schools for beauty culture in different cities and manufactures and sells beauty preparations for members of the colored race. The respondent agreed to discontinue advertising that its "Apex Skin Bleach" instantly lightens the complexion or brings to the skin new life and color or youthful vitality, and to cease representing that any of its products will correct dandruff, nourish the scalp, or promote a growth of hair. The respondent agreed to cease designating any of its preparations as a hair grower. (2573)

M. H. Arndt Manufacturing Company—Milton H. Arndt, trading as M. H. Arndt Manufacturing Company, Trenton, N. J., and Webster, Mass., engaged in breeding and developing chickens and in making, selling and distributing poultry raising equipment, agreed to discontinue representing that the use of contact heat results in production of hump-backed broilers or chicks, if used continuously, or that chicks brooded by contact heat are inferior to those brooded by means of radiant heat. The respondent also stipulated that he would cease publishing or exhibiting drawings or other pictorial representations of competitive products, the effect of which may be to misrepresent the desirability or other qualities of the competitive products. (2570)

Bar-Je, Inc., 540 North Michigan Ave., Chicago, agrees to cease and desist from representing that "Bar-Je Dry Skin Cleanser", "Bar-Je Night Cream", or any cosmetics containing substantially the same ingredients or properties, will supply nourishment, food values or building materials to the skin or underlying tissues, or will duplicate, restore, maintain, replace or replenish the natural oils; will overcome dry skin or impart, or maintain a protective film on the skin; will keep the skin young, youthful, or looking young and youthful, or will prevent or remove lines or wrinkles of the skin; and that the preparations contain "Lipiderm" or that there is any product or element recognized, designated or known as "Lipiderm." The respondent corporation will also discontinue representing that the preparations are new, secret, newly discovered, or scientific in principle, method of application or use, or that such methods are adhered to only in "Bar-Je" products, or that any price is special or introductory, unless it is a price substantially lower than the price at which such preparation is customarily sold and is specifically limited to a reasonable time and discontinued at the end of such time limit. (02460)

Casnati Derm-Esthetic Institute, Inc., 75 East 55th St., agrees to cease representing that "Fermo-Derm", a skin lotion distributed by it, will draw all clogging substances from the pores, or that it shows the same chemical analysis as the life-giving essentials of healthy glands; that it will accelerate circulation or feed the skin or revitalize the supporting tissues until they become charged with youthful virility and reproduce themselves. The respondent corporation also agrees to cease use of the word "Institute" as part of its corporate or trade name or to imply that the business conducted by it is that of an institute for the promotion of dermatological study or of learning. (2571)

Central States Amateur Independent Basket Ball Assn.—See Central States Basket Ball Association.

Central States Basket Ball Association—Wayne G. Emmelmann, sole trader as Central States Basket Ball Association and also as Central States Amateur Independent Basket Ball Association, 4260 Roland Rd., Indianapolis, engaged in the sale and distribution of sporting goods and athletic and school trophies, has entered into a stipulation to discontinue certain misleading representations.

The respondent agrees to cease and desist from use in his trade name of the word "Association" or similar designation to imply that such personal business enterprise is an association of individuals, or use of the title "Secretary" in the conduct of his business or promotional undertakings, or in any way to hold himself out as an official or representative of a group or body which does not exist; from representing that the so-called Central States Basket Ball Association is an organization, or the outstanding organization of America, or that such a purported organization publishes an "Association Co-Operative Catalog", or that the business conducted by him individually is the "sales division" of such an alleged association.

Emmelmann further agrees not to represent that his business is a "Co-Operative Service", or was started or is maintained by some association "not to commercialize basket-ball", but only to "make it possible for all schools and organizations to purchase their athletic supplies at sane prices". The respondent will also desist from use of the terms "Sunburst Gold" or the words "Gold" or "Silver" to apply to products not composed in whole or in part of gold or silver. (2574)

Certified Products Company—W. Raymond Roose, trading as Certified Products Company, 223 South Western Parkway, Louisville, Ky., dealer in razor blades, combs, and novelty articles, agreed to cease using the word "Manufacturers" on letterheads or in advertising matter so as to imply that he manufactures the things he sells or operates or controls a factory in which they are made, and to discontinue representing that products sold by him have an alleged valuation which is fictitious or in excess of the price for which they customarily can be purchased. (2575)

Champion Distributing Company—See Model Lingerie Company.

Duratex Plush Company—Gerson Greenberg, trading as Duratex Plush Company, Oak Lane, Philadelphia, in the sale of "Dorise" mohair upholstery fabrics, will desist from employing the word "Weavers" as part of a trade name under which he sells his products which are not woven by him, or in a manner implying that he weaves the products he sells or controls the plant in which they are woven. According to the stipulation, Greenberg originally used the trade name "Duratex Plush Weavers," but has dropped the word "Weavers," substituting therefor the word "Company." Greenberg also stipulated that he would cease representing that his products are "A Government Standard" or are "Made to Comply with Government Specifications," when in fact there is no proper basis for these claims. (2569)

Early & Daniel Company, Inc., 1117 West Sixth St., Cincinnati, agrees to cease representing that the feeding of "Tuxedo Turkey Growing & Developing Mash" to turkeys will enable one to have an increase in profits over profits that might be obtained by the feeding of any other similar product; that the feeding of the mash will cause an increase in the development or growth of poults and turkeys over such development or growth as may be obtained through use of similar products; that correct feeding will assure one of an increase in profits, or that feed alone is responsible for the quality or size of poultry or stock; that "Tuxedo Growing & Developing Mash" will insure large bodied breeders or that by feeding this product one is assured of strong, healthy or vigorous poults, or that the vitamin guarantee offered with the product will assure such result. The respondent corporation will also discontinue representations that Tuxedo hog feeds are complete feeds of highest quality, or that by use of "Tuxedo Porkmaker" a person may expect hogs to attain any definite weight within any specific time greater than the average weight obtained by other persons feeding other similar products under normal conditions; or that any unusual weight has been obtained by persons feeding the product, unless in direct connection therewith full disclosure is made of the conditions under which such feeding was carried on. (02461)

Eastern Hosiery Mills, Inc., 330 Fifth Ave., New York, wholesaler of hosiery, agrees to cease use of the word "Mills" as part of its corporate name or in any way to imply that it manufactures the products it sells or actually owns and operates or directly controls the factory in which they are made, when such are not the facts. (2580)

J. Harris & Company—Jacob Harris and Emanuel Harris, trading as J. Harris & Co. and as Majestic Pen Co., 115 East 23rd St., New York, agreed to discontinue representing or placing in the hands of others the means of representing, that any fountain pen made, assembled or sold by them holds 109 per cent more ink than other pens, or holds any proportion exceeding the actual quantity as compared to other fountain pens on the market. (2568)

L. Hemmerdinger & Co., Inc., 424 East 123rd St., New York, distributor of bronze powders, paints and varnishes, will discontinue employing the word "Manufacturers" on letterheads in connection with the sale of its powder product, so as to imply that it manufactures such product, or owns or controls the plant in which it is made, when such are not the facts. The respondent also agrees to desist from using the word "Importers" misleadingly, when it is not an importer of the powdered material. (2567)

Levy Bros. & Adler Rochester, Inc., Rochester, N. Y., manufacturer of men's and boys' suits, in its stipulation, agreed to discontinue using, or furnishing others for their use, labels or advertising matter bearing the words "Olde English," to be employed in connection with the sale of this firm's domestically made products. (2565)

Majestic Pen Company—See J. Harris & Company.

Mother Goose Bedding Company—J. L. Bashor, trading as Mother Goose Bedding Company, 565 Whitehorn Ave., Columbus, Ohio, a dealer in goose feather quilts, agreed to cease using in advertising matter the words "Special Introductory," or either word in connection with the phrase "One Week Only," or otherwise as descriptive of a sales offer so as to imply that it is special, introductory, or other than the respondent's regular offer, when such are not the facts. Bashor also stipulated that he would not represent (1) that modern bedding is made of fabrics that absorb moisture and conduct heat away from the body while drawing cold from the outside; (2) that ordinary quilts and blankets absorb body heat, speeding up heart action; (3) that use of down or feather quilts will cause a person to wake up more refreshed than if he had used ordinary quilts, and (4) that use of down and feather quilts is an effective treatment or preventive for sinus, arthritis, rheumatism and catarrhal conditions. (2566)

Model Lingerie Company, also trading as Champion Distributing Company, 209 West Jackson Boulevard, Chicago, sells lingerie, hosiery, men's shirts, cameras, clocks, silverware and other merchandise. Under its stipulation, it agrees to discontinue supplying to, or placing in the hands of others, punch boards, push or pull cards, or other lottery devices for the purpose of enabling such persons to dispose of or sell any merchandise by the use thereof. It also agrees to cease representing that the sale of premium merchandise by means of push cards or similar devices is a "unique plan of advertising," or, by the use of any other words of similar implication, that any merchandising plan involving a lottery scheme is intended for mere advertising purposes or is other than a method of disposing of merchandise. The respondent also agrees to discontinue certain misleading uses of the words "free" and "guarantee" and of fictitious figures purporting to be "values" of articles sold. (2576)

R. A. Nichols, 113 York St., Rumford, Me., agrees to cease and desist from representations in connection with the sale of instructions and formula for the compounding of "Mexican Cough Remedy"; that the remedy will stop, check or have any effect on the cause, course or degree of night sweats, will purify the blood or relieve coughs not due to or associated with colds, or supply energy for the human body. The respondent further agrees to cease designating or describing the formula he offers for sale, or the syrup composed according to such formula, as "Mexican," by using the term "Mexican" or any other word or term that simulates "Mexican" by spelling or sound. (02459)

Pioneer Publications, Inc., 1270 Sixth Ave., New York, agrees to cease representing in connection with the sale of a book of instructions on dancing, sold and distributed by it, that "ease or assurance" on the dancing floor can be acquired by merely reading the book and practicing a few hours. The respondent corporation agrees to cease representing "That anyone, by reading the information and following the instructions in said book, will be enabled to dance with ease or assurance or will be enabled to become a wonderful dancer, or that thereby anyone can, with but a few hours practice, learn to dance." (02458)

Vapoo Products Company, Inc., 1775 Broadway, New York, in the sale of "Arctic Syntex M," sold also under the name "Vapoo," and used in the cleaning of carpets, rugs and upholstery, agreed to discontinue employing as descriptive of its product the word "sanitizes" or any other word of similar implication, the effect of which may tend to convey the belief that the preparation is effective as a germicide or an antiseptic; and to cease using any representation importing that the product will remove all stains regardless of cause. (2572)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Alle-Rhume Remedy Company, Inc.—The Commission has reconsidered and modified its cease and desist order issued last August against Alle-Rhume Remedy Company, Inc., and Block Drug Company, Inc., Jersey City, N. J., directing the respondents to discontinue certain misleading representations in the sale of "Allenru," or any similar preparation.

The modified order is similar to the original order except that it eliminates that provision thereof which prohibited the respondents from disseminating any advertisements which failed to reveal that their preparation is not a wholly safe drug to be used by the lay public in self-medication. (3678)

Block Drug Company, Inc.—See Alle-Rhume Remedy Company, Inc.

James Heddon's Sons—The Commission, upon notice and opportunity for hearing, has issued an order altering the terms of a cease and desist order issued last August against James Heddon't Sons, Dowagiac, Mich, which firm had been directed to discontinue misleading representations in the sale and distribution of its "Improved Heddon Pal" hollow steel fishing rod, or other fishing rods.

Under the original order, the respondent was directed to cease representing, among other things, that all hollow steel fishing rods, other than its own, have walls which are thicker at the butt than at the tip.

The order has now been corrected to prohibit the representation that all hollow steel fishing rods, other than the respondent's own, have walls which are thicker at the tip than at the butt. (3792)

Marlin Firearms Company, New Haven, Conn., has been ordered to cease and desist from representing that it manufactures the razor blades it sells and distributes.

In advertisements in newspapers and periodicals, the Commission finds, the respondent alleged "It is not hard to understand why Marlin is one of the finest blades in the world. They are made with the *same care* that has made Marlin guns tops in quality for 67 years," and "Marlin, world-famous firearms manufacturer, has found a way to produce a truly fine razor blade * * *."

In truth, the findings continue, the respondent corporation does not make or manufacture the blades sold by it under its trade name and represented as "Marlin" blades, but they are manufactured by another company not owned or controlled by the respondent.

A substantial part of the purchasing and consuming public and dealers, the findings continue, prefer to deal direct with the manufacturer in the belief that lower prices, elimination of middlemen's profits, superior products, and other advantages, can be obtained. Furthermore, the name "Marlin" has long been associated with the manufacture of high-grade firearms, and there would be a preference on the part of a substantial portion of the purchasing public for razor blades manufactured by the Marlin Firearms Company in the belief that the company, by reason of its reputation, is better equipped to manufacture a high-grade product.

The Commission orders that the respondent corporation forthwith cease and desist from representing that it is the manufacturer of the razor blades which it sells, unless and until it owns and operates, or directly and absolutely controls, the factory in which the blades are manufactured. (3871)

Pillsbury Flour Mills Company—On petition of the Pillsbury Flour Mills Company, Minneapolis, the Commission has reconsidered certain parts of its findings and order to cease and desist issued last April against Quality Bakers of America, Inc., and other respondents, who were directed to discontinue violations of the brokerage section of the Robinson-Patman Act.

Among the respondents named in that order were Pillsbury Flour Mills Company, and the Consolidated Flour Mills Company and Kansas Milling Company, both of Wichita, Kans.

Upon reconsideration, the Commission has modified its findings and order as to these three companies and has dismissed the complaint insofar as it relates to them for the reason that prior to its issuance they ceased paying brokerage fees as alleged to the respondent Quality Bakers of America, Inc., an intermediary, the stock of which was owned by various baking companies, members of Quality Bakers of America, a trade association.

The provisions of the findings and order relating to Quality Bakers of America, Inc., and other respondents, were not amended. These respondents have petitioned the United States Circuit Court of Appeals, First Circuit, Boston, for review of the Commission's order to cease and desist. The record in the proceeding will shortly be certified to the court, as provided by law, and the case will be proceeded with there in the regular course. (3218)

Purity Products Company—Willard C. McAhren and Maude B. McAhren, trading as Purity Products Company, 801 Bluff Road, Sioux City, Iowa, have been ordered to cease and desist from misrepresentations made in the sale and distribution of a medicinal preparation designated "Wheatol."

In advertisements circulated through United States mails and in circulars and other printed matter, the Commission finds, the respondents represented that Wheatol, "one of the most potent sources known for VITAMIN E," is effective in the treatment of certain ailments and conditions, and that the loss of vigor, vitality and general well-being of males up to and considerably over 50 years of age, and inability of women to bear children successfully after conception, among other things, are due to a deficiency of Vitamin E, and will be remedied by the use of Wheatol. These representations, the findings continue, are misleading and untrue.

Respondents Willard C. and Maude B. McAhren are ordered to desist from further representations that impairment of youthful vigor and vitality, and general conditions which accompany advancing years in a male, are due to a deficiency in Vitamin E, or that such impairment can be averted or delayed by use of their preparation, or that the preparation will affect womens' ability to successfully conceive or bear children, except in rare cases involving habitual involuntary abortion, which may be due to a Vitamin E deficiency of a degree susceptible of replacement by the Vitamin E content of "Wheatol."

It was further ordered that the case against Landon & Warner, 360 North Michigan Ave., Chicago, named in the complaint as advertising agents for the respondents, be closed without prejudice to the right of the Commission to reopen it in the event that facts so warrant. In answering the complaint, Landon & Warner denied participation in the preparation or dissemination of the advertising to which the complaint refers. (3847)

Quality Bakers of America, Inc.—See Pillsbury Flour Mills Company.

Standard Toykraft Products, Inc., 319 McKibbin St., Brooklyn, N. Y., a distributor, has been ordered to discontinue misleading representations in the sale of toys.

Findings are that the respondent company caused to be inserted on containers of certain toy sets the language: "Toykraft Knitting Spool Set, Copyright 1936, and Made by Standard Toykraft Products, Inc., New York, U. S. A." In this manner the respondent United States, when in fact a substantial portion of the units comprising the sets were manufactured in Japan, purchased by the respondent from importers, and assembled by the respondent, according to findings. (3876)
represented that its toy sets were wholly manufactured in the

Superior Textile Mills—Abraham Starr, trading as Superior Textile Mills, 16-20 East 12th St., New York, has been ordered to cease and desist from misrepresentations in the sale and distribution of haberdashery.

Findings are that the respondent employs about 75 salesmen, who take orders from consumers in house-to-house canvasses. Through the media of price lists, advertisements and other printed matter, the respondent is alleged to have made misleading statements with reference to commodities offered for sale by him. Among these are: "Established 1905. . . . SUPERIOR TEXTILE MILLS, 16-20 East 12th Street, New York, N. Y. Postage paid to all parts of U. S. A. . . . SUPERIOR TEXTILE MILLS, Makers of Superior Quality Shirts and Wearing Apparel for Men, 16-20 East 12th Street, New York." and "Direct from Mills to Wearer," and offers of 4 shirts or other garments for the price of 3, for a certain limited period.

Findings also are that respondent was not established in business until after 1925, does not own or control any textile mill and does not sell direct from mill to wearer.

Starr is ordered to cease and desist from use of the word "Mills" in his trade name or from representing that he is the manufacturer of the products sold by him, unless and until he actually owns or operates the manufacturing plant wherein such products are made; from representing that any article regularly included in a combination offer with other articles, is "free," or that the sale thereof constitutes a "free merchandising sale"; from representing any articles delivered to purchasers of other articles as "free," until and unless the conditions under which such articles are delivered to purchasers are stated in immediate connection or conjunction with the term "free," in words, letters and figures of equal conspicuousness, and there is no deception as to the price, quality, character or any other feature of any of the items in the offer.

The respondent also will discontinue representing that his business was established at any time other than the time of its actual establishment, or that any offer of merchandise is limited as to time, unless such offer is in fact so limited. (3190)

The National Association of Broadcasters

NORMANDY BUILDING * * * * * * * WASHINGTON, D. C.

SPECIAL BULLETIN

To All Broadcasters:

The most vitally important series of district meetings in broadcasting history is underway.

With the expiration date of current ASCAP contracts only a little more than a year away, every broadcaster in the country should make arrangements immediately to attend his district meeting. Non-members as well as members of NAB should let nothing stand in the way of attending these meetings, where the industry's copyright program will be the first order of business.

Neville Miller, NAB president, will attend these meetings to explain this program in detail.

Adopted unanimously by a special industry convention last September, this program is generally considered by far the best solution ever advanced for the copyright problem.

Don't fail to attend your district meeting! The dates and places are listed below.

District 1	Boston	Kenmore Hotel	December 6
District 2	New York City	Ritz Tower	November 28
District 3			First Week in January(*)
District 4	Richmond	John Marshall	December 16
District 5	Jacksonville		January(*)
District 6	Nashville	(*)	January 2 or 3(*)
District 7	Cincinnati	Netherland-Plaza	December 5
District 8 District 9	South Bend, Ind.	LaSalle	December 6
District 10	Omaha	Fontenelle	December 8
District 11	Minneapolis	Radisson	December 13
District 12	Tulsa	(*)	December 11
District 13	Dallas	Baker	January 5
District 14	Denver	Albany	December 9
District 15	San Francisco	Palace	January 10
District 16	Los Angeles	(*)	January 9
District 17	Portland	New Heathman	January 12

(* Additional details will be sent to you as soon as possible.)

Reports

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 48, December 1, 1939

Code Committee Meets; Women's Luncheon

Asking that broadcasting stations in the different states meet to examine state laws and practices relating to the qualifications for candidates for public office, and to determine dates which mark the beginning of political campaigns in the respective states or political subdivisions, the NAB Code Compliance Committee met in Washington last Tuesday and Wednesday at the call of its chairman, Edgar Bill, of WMBD, Peoria, Illinois. The Committee reviewed the progress of the Code and self-regulation to date and considered details whereby Headquarters could render member stations greater informational service in interchanging experiences and ideas with the membership.

The resolution follows:

> "In view of the fact that different laws or practices govern the conduct of elections in the different states and local communities, it is the recommendation of the Code Compliance Committee that the broadcasting stations in the different states should be called into meeting by state chairmen or through the efforts of District Directors, where no state organization exists, and request them, after a study of their respective state and local laws, to determine:
>
> "(a) When does an individual become a legally qualified candidate for public office and qualify for the sale of time under the Code, or,
>
> "(b) Determine the date for the opening of a campaign for election of public officials, or for the discussion of public proposals which are subject to ballot."

The Committee requests that as soon as possible this information be sent into Headquarters so that it will be in a position to answer inquiries received from the outside in connection with the approaching political campaigns.

On Wednesday, members of the Committee and Headquarters department heads attended a luncheon conference at the Willard Hotel with national and state women's club leaders to discuss the social aspects of the Code.

The meeting was one of the largest gatherings of influential club women in recent years, many of the leaders coming from distant points to enter into the discussions. Among the national presidents of organizations were Mrs. William Corwith, American Legion Auxiliary; Mrs. Saidie Orr Dunbar, General Federation of Women's Clubs; Mrs. Charles E. Bolling, United Daughters of the Confederacy; Mrs. W. Chapin Huntington, Society of Women Geographers; Mrs. Joseph E. Goodbar, National Federation of Press Women; Miss Frances Grant, Pan American Women's Association; Dr. O. Latham Hatcher, Alliance

CODE COMMITTEE MEETS; WOMEN'S LUNCHEON

(Continued from page 3865)

for Guidance of Rural Youth; Mrs. J. K. Pettengill, National Congress of Parents and Teachers; Mrs. Henry M. Robert, Jr., Daughters of the American Revolution.

In the key-note speech of the day, Mrs. Saidie Orr Dunbar, president of the General Federation of Women's Clubs, showered praise upon the Code and pledged the sympathetic support of women's clubs nationally and locally. She declared there were some programs to which some of the women objected, especially in the children's field, but, she said that "with so many varied tastes to cater to, there will of course always be room for some complaint." Other leaders who took part in the discussion and commended the Code included Mrs. Henry M. Robert, Jr., president of the Daughters of the American Revolution; Mrs. Charles E. Bolling, president of the United Daughters of the Confederacy; Mrs. Edwin C. Lewis, national radio chairman of the National Society of New England Women; Mrs. Nathaniel Singer, radio chairman of the United Parents Associations; Dr. Alice Keliher, of the Progressive Education Association, and Mrs. Benjamin F. Kraus, radio chairman of the Massachusetts State Federation of Women's Clubs.

Following the opening remarks by President Miller, Edgar Bill and Ed Kirby, Committee Secretary, and the address by Mrs. Saidie Orr Dunbar, the meeting was thrown open to a question and answer period.

Mrs. Harold V. Milligan, radio chairman of the General Federation of Women's Clubs, requested that NAB send out to all women's organizations "radio kits" which would contain copies of the Code and all pertinent literature, as well as the NAB booklet *How To Use Radio.* The delegates were informed that this would be done immediately.

The Code Committee pledged its cooperation with the women's viewpoint in connection with cultural, educational, religious and social aspects of broadcasting, particularly in regard to improving the standards of children's programs. Organizations were requested to conduct serious studies and surveys to determine what they considered should be on the air, but which is not now on the air. The delegates were invited to submit this data at the next meeting of the Code Compliance Committee in early 1940, where it may be digested and correlated. Representative sponsors and advertising agencies will then be called into conference to consider the new information received.

The Code Committee members regarded the meeting, which continued over four hours, as a highly successful one, and of incalculable benefit to the entire industry.

A roster of those present follows:

Miss Helen W. Atwater
American Home Economics Assn.

Mrs. Henry Baker
Service Star Legion

Miss Mariam Birdseye
Association of Women in Public Health

Mrs. Charles E. Bolling, Pres.-General
United Daughters of the Confederacy

Mrs. Frederick H. Brooke
Girl Scouts

Mrs. Leonard J. Calhoun
Mississippi Federation of Women's Clubs

Mrs. Robert W. Cornelison
Radio Chairman, New Jersey State Federation of Women's Clubs

Mrs. William H. Corwith
President, American Legion Auxiliary

Miss Margaret Cuthbert
National Broadcasting Company

Mrs. Saidie Orr Dunbar
President, General Federation of Women's Clubs

Miss Elizabeth Eastman
Young Women's Christian Assn.

Miss Ethel Evans
Young Women's Mutual Improvement Association

Miss Jane Evans

FIRST PLEDGES TO BROADCAST MUSIC, INC., RECEIVED

In the first of a series of District meetings to be held throughout the country, the first subscriptions to Broadcast Music, Inc., streamed in as broadcasters in the Second District signed the pledges in a more than encouraging degree and number.

The meeting, in the Ritz Tower, New York City, and presided over by Harry Wilder, WSYR, and District Director, was well attended and endorsed the Broadcast Music, Inc., plan enthusiastically. Neville Miller, Sydney Kaye and Stuart Sprague reviewed the copyright matter fully. Other matters discussed were the A. F. of M. contract, the phonograph record problem and the Code.

Those in attendance were: William Fay, WHAM, Rochester, New York; Robert Soule, WFBL, Syracuse, New York; Carl Colman, WINS, New York City; Clarence Wheeler, WHEC, Rochester, New York; John T. Calkins, WENY-WESG, Elmira, New York; E. H. Twamley, WBEN, Buffalo, New York; Cliff Taylor, WBEN, Buffalo, New York; G. N. Woodman, WJZ-WEAF, New York City; Cecil Masten, WNBF, Binghamton, New York; Julius F. Seebach, WOR, New York City; John V. L. Hogan, WQXR, New York City; Elliott M. Sanger, WQXR, New York City; Kolin Hager, WGY, Schenectady, New York; Richard E. O'Dea, WNEW, New York City; W. C. Alcorn, WBNX, New York City; Donald Flamm, WMCA, New York City; Stuart Sprague, Sydney Kaye, Neville Miller, president, National Association of Broadcasters; E. K. Johnson, WIBX, Utica, New York; Irving Collins, WWRL, Woodside New York; H. C. Wilder, WSYR, Syracuse, New York; Samuel J. Gellard, WLTH, Brooklyn, New York; S. W. Caulfield, WBNX, New York City; I. R. Lounsberry, WGR, Buffalo, New York; E. N. Stoer, WINS, New York City; William S. Hedges, WEAF, New York City; W. S. Reuman, WWRL, Woodside, New York; John A. Kennedy, NAB Legislative Committee; Edwin W. Schenning, WMCA, New York City; Joe Hartz, WMCA, New York City; Harold E. Smith, WOKO, Albany, New York.

NAB Attorney, Engineer Appointed; New Services

With the appointment of Russell P. Place as counsel, and Lynne C. Smeby as full time director of engineering, announced this week, the National Association of Broadcasters has about completed its program of expansion as outlined in the reorganization plan for the benefit of member stations.

Recently the Bureau of Radio Advertising was established to promote the use of radio advertising. It is headed by Sam Henry, Jr., former sales promotion manager of World Broadcasting Company.

To carry on a year 'round institutional type of promotion Arthur Stringer, former promotional consultant, was added to the staff after the Atlantic City convention.

Headquarters is also formulating plans for increased activity of the research department during the coming year. As being drawn the work will include some fundamental studies designed to fix the advantages of research as a tool in station management. A committee is to be appointed to work with Paul Peter, director of research.

The projected year's work include plans for meeting media competition in the development of facts through research. Ways and means for the development of needed information for the bureau of radio advertising, public relations, labor relations and the executive office of the association are to be established.

In addition to a consulting research committee, it is planned to appoint a research representative in each district to assist the director of research and the research committee.

Russell P. Place

Russell P. Place, of Boston, is a graduate of Harvard College and of Harvard Law School. He took time out to serve over-seas during the World War as pilot with the rank of Ensign in the U. S. Naval Reserves. Following admission to the Massachusetts Bar in 1922 he practiced law in Boston with the firms of Elder, Whitman, Weyburn and Crocker; and Shattuck and Gray.

While with the latter firm he served for a portion of the time as legislative counsel to Henry Shattuck, then chairman of the ways and means committee of the Massachusetts House of Representatives.

Mr. Place also served as assistant trust officer of Lee, Higginson Trust Company and as general agent of the Aetna Life Insurance Company for Eastern Massachusetts.

In 1923 he married Miss Marian Lothrop Worcester, of Cambridge, and they have three children.

Andrew W. Bennett is retained as special counsel to deal with copyright problems.

Lynne C. Smeby

Lynne C. Smeby, director of engineering, is a member of the Institute of Radio Engineers. He comes to NAB directly from the conduct of a special assignment in Porto Rica, for the International Telephone and Telegraph Company. There he rebuilt the company's broadcast station WKAQ in San Juan, installed a coastal-harbor radiotelephone system, and did work for the police radio system for Porto Rica. Mr. Smeby is a graduate of the University of Minnesota with a degree in electrical engineering.

His interest in radio began in 1918, as soon as the wartime ban on amateur radio was removed. The year following his graduation, in 1928, he was appointed Chief Engineer of WRHM, now WTCN, Minneapolis.

The next year he became technical supervisor of KSTP, St. Paul. In 1935 he moved to Detroit to become technical supervisor of WXYZ; WOOD, Grand Rapids; and the Michigan Radio Network.

For a number of years he had maintained close contact with the commission, his last appearance being in February when he gave testimony on the Michigan Radio Network during the chain-monopoly hearing. Continued study has kept him conversant with the developments in radio, television, facsimile, ultra-hi frequency broadcasting, frequency modulation, and industrial appliances of electronic devises.

FLY DISCUSSES COMMISSION ACTIVITIES

James Lawrence Fly, Chairman of the Federal Communications Commission, at a press conference on Wednesday stated that in his opinion the Commission in the future should give more thought to broadcasting station ownership and financial responsibility.

Discussing the Television situation, Chairman Fly said that the Commission will grant hearings on the new Television Rules. He said that undoubtedly the Commission would adopt tentative Television Rules and would then grant hearings if anyone requested them.

The Commission, stated the Chairman, wants to act as expeditiously as possible on the Television situation. However, the Commission wants to see the whole Television situation from both the standpoint of the industry and the public, and it wishes to protect its development.

There are no sharp issues on the Commission regarding the Television report of the committee, he stated. Mr. Fly pointed out that there are a good many difficult factors in Television and called particular attention to

DISTRICT 7 MEETING CHANGE

THE DISTRICT SEVEN MEETING PLACE HAS BEEN CHANGED FROM CINCINNATI TO THE DAYTON-BILTMORE HOTEL, DAYTON, OHIO, DECEMBER 5.

This is the same date as previously scheduled. Reason for the change to Dayton is due to crowded hotel conditions in Cincinnati because of the major league baseball meeting.

the fact that the receiver has to be synchronized to the transmitter and something must be done in this connection for the public who may purchase expensive Television sets and find later that they are obsolete because of progress in the art.

Mr. Fly said that he thought the monopoly report being compiled by the staff would go to the Monopoly Committee within the next week or ten days.

WOV TO NEW YORK STATION

On request of the New York Broadcasting Corporation, the Federal Communications Commission has assigned call letters WOV to the new broadcast station to be constructed by that corporation in New York City, to operate on the frequency of 1100 kilocycles, with power of 5 kilowatts, unlimited time.

The new station will supplant three existing broadcast stations, namely, WOV and WBIL, New York City, and WPG, Atlantic City.

It has been the practice of the Commission not to assign three-letter calls to broadcast stations except in cases where "good will" has attached to the use of such existing call letters, as in the case of WOV. This is because conservation of three-letter calls for land stations, such as communicate with ships and planes, is implied in International Telecommunications Convention of Madrid, 1932. This convention makes no provision for assignments of call letters to broadcast stations. As a result, some foreign stations do not use call letters. There is no provision in the Communications Act relating to assignment of call letters in this country apart from blanket authority to the Commission to do so.

While the Commission issues four-letter calls to new broadcast stations as a general rule, it has not yet been necessary to replace three-letter calls previously assigned broadcast stations in order to make these calls available to land stations. Consequently, the good-will value of existing three-letter broadcast calls is considered as cases present.

Eighty-four broadcast stations still retain three-letter identification calls.

NAB DECEMBER PROMOTION

Keeping radio ahead with another vigorous push toward maximum availability of radio receivers is the aim of NAB's December promotion.

Suggested material consisting of three original scripts and thirty-two announcements was mailed members on November 27.

Because of the anticipated increase in holiday spending, an exceptional opportunity is presented, during December, for attracting listeners' Christmas cash into a station's own circulation system.

BUREAU OF RADIO ADVERTISING RELEASES SUCCESS STORY NO. 2

The NAB Bureau of Radio Advertising has released the second in the series of trade studies entitled "Results from Radio." Vol. 1, No. 2 is on the subject of laundry advertising, and outlines the successful use of radio by the Buffalo General Laundries under the direction of Mr. Gordon Whitbeck, advertising manager. Members who have not ordered their supply of the Bureau studies are urged to do so at once. Order forms have been sent to all non-replying stations for this purpose.

COURT DISMISSES MOTION

Court of Appeals of the District of Columbia on Tuesday denied the motion of the Federal Communications Commission to dismiss the appeal of KSFO, San Francisco.

This is an appeal from a decision of the Commission on October 20, 1938, denying an application for the assignment of the license of the station to the Columbia Broadcasting System of California, Inc.

Headquarters office is seeking information concerning Tom Tannehill. We would appreciate information concerning his present whereabouts.

FCC COMMISSIONERS' FUNCTIONS FOR DECEMBER

The Federal Communications Commission announces that the work, business and functions of the Commission for the month of December have been assigned as follows:

Commissioner Payne—Designated to determine, order, report or otherwise act upon all applications or rqeuests for special temporary standard broadcast authorizations.

Commissioner Case—Designated to hear and determine, order, certify, report or otherwise act upon; (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; *provided,* however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission has announced a final order granting Station KNEL, **Brady, Texas,** its application to increase hours of operation from daytime to unlimited on **1500 kilocycles,** 250 watts day, 100 watts night.

In another order the Commission denied the application of the Gateway Broadcasting Company for a construction permit to erect a new station at **Louisville, Kentucky,** to operate on **880 kilocycles,** 500 watts, unlimited time, using a directional antenna.

An amendment to a final order has been adopted by the Commission in the application of F. W. Meyer to erect a new station at **Denver, Colorado,** to operate on **1310 kilocycles,** 100 watts, 250 watts LS, unlimited time, "by adding a paragraph directing the permittee, within two months after the effective date of the order, to file with the Commission an application for modification of construction permit, specifying the exact time transmitter site and antenna system.

FINDING OF FACT

The Commission has announced its proposed finding of fact proposing to grant the application of M. C. Reece for a construction permit for a new station to be erected at **Phoenix, Arizona,** to operate on **1200 kilocycles,** 100 watts night, 250 watts LS, unlimited time.

In its proposed finding of fact, the Commission states that sufficient potential sources of advertising have been shown to exist in Phoenix "from which the applicant may reasonably be expected to derive adequate commercial support to insure the operation of the proposed station in the public interest." The Commission found that the proposed station will not cause objectionable interference from the operation of any station.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearing is scheduled before the Commission in a broadcast case for the week beginning Monday, December 4. It is subject to change.

Thursday, December 7

Hearing to Be Held in the Offices of the Federal Communications Commission, 1105 Rives-Strong Bldg., Los Angeles, Calif.

KIEV—Cannon System, Ltd., Glendale, Calif.—Renewal of license, **850 kc.,** 250 watts, daytime.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings and oral arguments. They are subject to change.

December 14

Oral Argument Before the Commission

Report No. B-80:

KERN—McClatchy Broadcasting Co., Bakersfield, Calif.—C. P., **1380 kc.,** 1 KW, unlimited time. Present assignment: **1370 kc.,** 100 watts, unlimited time.

KOH—The Bee, Inc., Reno, Nev.—C. P., **630 kc.,** 1 KW, unlimited time. Present assignment: **1380 kc.,** 500 watts, unlimited time.

January 9

NEW—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—C. P., **1310 kc.,** 250 watts, unlimited time.

January 10

NEW—Chilton Radio Corp., Dallas, Tex.—C. P., **1370 kc.,** 250 watts, unlimited time.

NEW—V. O. Stamps, Dallas, Tex.—C. P., **1370 kc.,** 250 watts, unlimited time.

January 15

NEW—Joe W. Engel, Chattanooga, Tenn.—C. P., **1370 kc.,** 250 watts, unlimited time.

NEW—Lookout Mountain Company of Georgia, Lookout Mountain, Ga.—C. P., **1370 kc.,** 100 watts, 250 watts LS, unlimited time.

January 16

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, **1210 kc.,** 100 watts, unlimited time.

January 17

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Renewal of license, **1390 kc.,** 1 KW, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WMAL—National Broadcasting Co., Inc., Washington, D. C.—Granted construction permit to move transmitter site from 712 Eleventh St., N. W., to District 7, Bethesda, Md.; install new equipment and directional antenna system; and increase power from 250 watts night, 500 watts day, to 5 KW, employing directional antenna system both day and night.

WTAQ—WHBY, Inc., Green Bay, Wis.—Granted construction permit to increase night power from 1 KW to 5 KW, employing directional antenna system.

WSPD—The Firt Industry Company, Toledo, Ohio.—Granted construction permit to install directional antenna system for night operation and increase power from 1 KW to 5 KW.

KLZ—KLZ Broadcasting Company, Denver, Colo.—Granted construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna for day and night use.

KHSL—Golden Empire Broadcasting Company, Chico, Calif.—Granted construction permit to install new equipment and increase power from 250 watts, unlimited time, to 500 watts night, 1 KW day.

KLCN—Charles Leo Lintzenich, Blytheville, Ark.—Granted voluntary assignment of license from Charles Leo Lintzenich to Fred O. Grimwood. (Station operates on **1290 kc.,** 100 watts power, daytime only.)

WIP—Pennsylvania Broadcasting Co., Inc., Philadelphia, Pa.—Granted amended construction permit to move transmitter site locally, install directional antenna system, new equipment, and increase in power from 1 KW to 5 KW, employing directional antenna both day and night.

KGIR—KGIR, Inc., Butte, Mont.—Granted modification of license to increase night power from 1 KW to 5 KW.

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Granted modification of license to increase night power from 500 watts to 1 KW.

KRKD—Radio Broadcasters, Inc., Los Angeles, Calif.—Granted modification of license to increase night power from 500 watts to 1 KW.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted modification of license to increase night power from 1 KW to 5 KW.

KSCJ—Perkins Brothers Company (The Sioux City Journal), Sioux City, Ia.—Granted amended construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna system for nighttime operation.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Granted amended construction permit to move transmitter site locally, install new equipment and vertical radiator, and increase power from 1 KW to 5 KW. Exact transmitter site and type of antenna to be determined with Commission's approval.

WDRC—WDRC, Inc., Hartford, Conn.—Granted amended construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna for both day and night use.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted amended construction permit to move transmitter site locally, install directional antenna system, and increase night power from 1 KW to 5 KW, employing directional antenna for nighttime operation only.

KVGB—Helen Townsley, Great Bend, Kans.—Granted construction permit to make changes in equipment and increase power from 100 watts to 250 watts, unlimited time.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Granted modification of construction permit to make changes in equipment and changes in directional antenna system; increase power from 1 KW night to 5 KW night, using directional antenna both day and night; also extension of commencement date to 30 days after grant and completion date to 180 days thereafter.

WHUB—M. L. Medley, Cookeville, Tenn.—Granted modification of construction permit approving studio and transmitter sites, installation of vertical radiator and new equipment, and increase in night power from 100 watts to 250 watts.

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted modification of construction permit approving transmitter site and installation of vertical radiator, changes in equipment and increase in night power from 100 watts to 250 watts.

WKRC—Columbia Broadcasting System, Inc., Cincinnati, Ohio.—Granted voluntary assignment of license of station WKRC from the Columbia Broadcasting System, Inc., to The Cincinnati Times-Star Company. (Station operates on **550 kc.**, 1 KW night, 5 KW day, unlimited time, using directional antenna both day and night).

KEX—Oregonian Publishing Co., Portland, Ore.—Granted modification of license to change frequency from **1180 to 1160 kc.**, and change hours of operation from simultaneous day, shares KOB night, to unlimited time.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted modification of license to change hours of operation from simultaneous day, sharing KEX night, to unlimited time.

DESIGNATED FOR HEARING

The following applications have been designated for hearing by the Commission. Dates for the hearings have not yet been set.

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Application for renewal of license for the period from December 1, 1939, to October 1, 1940, designated for hearing, to (1) determine the qualifications of licensee to operate the station; (2) to determine whether Form No. 728, executed by the licensee on August 1, 1938, pursuant to Rule 340.01, and the information submitted by the licensee in response to Sec. 7(d) of the application (executed Nov. 1, 1939) for renewal of station's license for the period beginning Dec. 1, 1939, or either of them truly and accurately reflect the distribution and ownership of the voting stock of the licensee corporation; (3) to determine whether the station's license, the frequency authorized to be used by the licensee, and the rights therein granted were transferred, assigned, or in any manner disposed of by transfer of the control of licensee corporation in violation of Sec. 310 (b) of the Comm. Act; (4) because of licensee's failure to comply with the provisions of Rule 340.01, Sec. 43.1 of the Comm. Rules and Comm. Order No. 37. A 90 day temporary extension was granted pending hearing.

KTRB—Thomas R. McTammany & William H. Bates, Jr., Modesto, Calif.—Application for construction permit to move transmitter site and install vertical radiator, make changes in equipment and increase power from 250 watts to 1 KW, and time of operation from daytime only, to limited to WSB. Exact transmitter site and type of antenna to be determined with Commission's approval. Application designated for hearing to determine the nature, extent and effect of interference which may be caused to KTRB operating as proposed in this application by KXL operating as is proposed in its pending application; and to determine the nature, extent and effect of interference which may be caused to KXL operating as proposed in its pending application by the operation of KTRB as proposed in this application.

WSAL—Frank M. Stearns, Salisbury, Md.—Designated for hearing the application for renewal of license, and granted a 60-day temporary extension of present license in conformity with, and subject to all the terms and conditions of the separate order of revocation entered October 24, 1939, and, further subject to the final determination of the Commission on said order.

KXL—KXL Broadcasters, Portland, Ore.—Application for construction permit to move transmitter and studio sites locally, from 4th and Pine, and Multnomah Hotel, to 7 miles Southeast of Portland, and 1101 SW Washington, Portland, respectively; install new equipment and directional antenna system; change frequency from **1420 kc.** to **740 kc.**, power from 100 watts night, 250 watts day, to 10 KW, and time of operation from sharing with KBPS to limited, employing directional antenna system for both day and nighttime operation.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KGFW, Kearney, Neb.; WAIM, Anderson, S. C.; WBBZ, Ponca City, Okla; WEDC, Chicago; WFAS, White Plains, N. Y.; WGCM, Gulfport, Miss.; WHBC, Canton, Ohio; WJBW, New Orleans; WLNH, Laconia, N. H.; KOCA, Kilgore, Texas; WMFF, Plattsburg, N. Y.; WSIX, Nashville, Tenn.

The following stations were granted renewal of licenses for the period ending August 1, 1940:

KFAC, Los Angeles; KGCX, Wolf Point, Mont.; WHK, Cleveland, Ohio.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—present license further extended upon a temporary basis only, for the period ending January 1, 1940, pending determination upon application for renewal.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Present license extended upon a temporary basis only, for the period ending January 1, 1940, pending determination upon application for renewal.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Present license extended upon a temporary basis only, for the period ending January 1, 1940, pending determination upon application for renewal.

WHK—United Broadcasting Co., Cleveland, Ohio.—Present special experimentatal authorization to transmit facsimile signals from 1 a. m. to 6 a. m., EST, using 1 KW power, was further extended for a period of 1 month, for the period ending January 1, 1940, pending receipt of and determination upon application for extension.

KSUB—Leland M. Perry, Cedar City, Utah.—Extended special temporary authorization to Leland M. Perry, surviving partner of Johnson and Perry, a partnership composed of Harold Johnson and Leland M. Perry, to operate station KSUB for a period of one month from December 1, 1939, to January 1, 1940, upon a temporary basis only, subject to whatever action may be taken upon any formal application for regular authorization that may be submitted with respect to KSUB.

The following Relay Broadcast Stations wree granted renewal of licenses for the regular period:

KEHA, area of San Francisco; WEGG, area of Atlanta; WEGI, area of Baltimore; WEGJ, area of Baltimore; WEGZ, area of

New Haven; KEHO, area of Salt Lake City; KEIK, area of Los Angeles; KEIP, area of Siloam Springs, Ark.; WEIU, area of New Orleans; KEHI, area of Fargo, N. Dak.; WELS, area of Tuscola, Ill.; WEND, area of Harrisburg, Pa.

Licenses for the following Relay Broadcast Stations expiring December 1, 1939, were extended upon a temporary basis only, for the period ending January 1, 1940, pending determination upon application for renewal of license:

KEIM, area of Phoenix, Ariz; KEIO, area of Siloam Springs, Ark.; WEKA, area of E. Lansing, Mich.; WEHB, WEHD, WEHF, WEHU, WEHV, WEHX, area of Cleveland, Ohio; WENK, area of Erie City, Pa.; WEKF, area of Paducah, Ky.; WEGQ, area of Boston; WEHA, area of New York City.

WAXG—Florida Capitol Broadcasters, Inc., Area of Tallahassee, Fla.—Present Relay Broadcast Station license further extended on a temporary basis only from December 1, 1939 to January 1, 1940, pending determination upon application for renewal of license.

MISCELLANEOUS

KNET—Palestine Broadcasting Assn., Palestine, Texas.—Granted special temporary authority to operate additional time on November 24, in order to broadcast Palestine High School football game only.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted special temporary authority to operate simultaneously with station WBRB additional time on November 23, in order to broadcast the Thanksgiving Day football game between White Plains High School and Washington High School only.

WABL—Oregonian Publishing Co., Portland, Ore.—Granted special temporary authority to operate a portable MOPA 100-watt transmitter from one hour after local sunrise to one hour prior to local sunset, provided no interference is caused to any other station, on the frequency of **1140 kc.**, in the vicinity of Portland, for the making of transmitter site tests, during daytime, for period of 10 days beginning November 22.

WABL—American Airlines, Inc., Washington, D. C.—Granted special temporary authority to operate aircraft radio station KHAXF on the frequency **2790 kc.**, from 12 to 12:30 p. m., CST, on November 24, in order to relay broadcast Santa Claus program to Radio Station WGN.

WJG—Warner & Tamble Radio Service, Memphis, Tenn.—Dismissed petition to intervene in the hearing on the application of WPI.

Richard T. Sampson, Riverside, Cal.—Granted motion for leave to withdraw pending application for new station without prejudice.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted motion for continuance of hearing now scheduled for December 4, to a date convenient to the Commission.

WSUN—St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Granted petition to intervene in the hearing on the application of WROL for C. P. to change frequency and increase power.

Joseph W. Engel, Chattanooga, Tenn.—Granted petition to intervene in the hearing on the application of Lookout Mountain Company of Georgia, for a new station in Lookout Mountain, Ga.

Dixie Broadcasting Corp., Lagrange, Ga.—Granted petition to intervene in the hearing on the application of Valley Broadcasting Co., for a new station at West Point, Ga.

Helen L. Walton & Walter Bellatti, Jacksonville, Ill.—Granted petition to intervene in the hearing on the application of Stephenson, Edge and Korsmeyer, for a new station in Jacksonville, Ill.

Sentinel Broadcasting Corp., Syracuse, N. Y.—Denied petition for rehearing in re applications of Civic Broadcasting Corp., for a new station in Syracuse to operate on **1500 kc.**, 100 watts, unlimited time, which was granted by the Commission on October 5.

Palm Radio Company, Fort Meyers, Fla.—Denied petition and supplemental petittion requesting reconsideration of action taken by the Commission on October 3, in granting without a hearing the application of Fort Meyers Broadcasting Co. for a new station in Fort Meyers, Fla., to operate on frequency **1210 kc.**, 100 watts night, 250 watts local sunset, unlimited time.

KIEV—Cannon System, Ltd., Glendale, Calif.—Denied petition to reconsider action in designating for hearing the application for renewal of license for KIEV.

WSOC—WSOC, Inc., Charlotte, N. C.—Ordered the Secretary to wire broadcast station WSOC that license will expire December 1st, and no application for renewal or extension has been received.

KERN—McClatchy Broadcasting Co., Bakersfield, Calif.; KOH—The Bee, Inc., Reno, Nevada.—Scheduled for Oral Argument on December 14, 1939, the Commission's Proposed Findings of Fact and Conclusions (B-80) in Docket No. 5435, McClatchy Broadcasting Co., and Docket No. 5490, The Bee, Inc.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted special temporary authority to operate from 7:45 p. m. to 9:45 p. m., CST, on November 28, December 22, 1939, in order to broadcast high school basketball games only.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted special temporary authority to rebroadcast program material to be received from U. S. Army Plane Serial #AC38-520 from 1:45 p. m. to 2:15 p. m., PST, on November 26, 1939, for the purpose of promoting flying cadet enlistments.

W2XVT—Allen B. DuMont Laboratories, Inc., Passaic, N. J.—Granted special temporary authority to operate experimental television broadcast Station W2XVT from 9:00 a. m. to 6:00 p. m., EST, (provided W2XBS remains silent) for the period beginning November 27, 1939, and ending in no event later than December 9, 1939, in order to permit necessary adjustments for experimentation.

WSLB—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Granted special temporary authority to perform site survey tests in or near Ogdensburg, N. Y., on the frequency **1370 kc.**, with a portable modified radiotelephone transmitter, having power output not in excess of 50 watts, with unmodulated carrier, for a period not to exceed ten days.

WENK—WLEU Broadcasting Corp., Portable-Mobile (Area of WLEU, Erie, Pa.).—Granted construction permit to install new equipment in high frequency relay broadcast station. Also granted license to cover same.

W3XO—Jansky & Bailey, Washington, D. C.—Granted license to cover construction permit for high frequency broadcast station to use frequency **43200 kc.**, and an experimental basis conditionally; 1 KW power, unlimited time; station to be located at 1219 Wisconsin Ave., Georgetown.

WMVB—Miami Valley Broadcasting Corp., Portable-Mobile (Area of WHIO, Dayton, Ohio).—Granted license to cover construction permit for new low frequency relay broadcast station; frequencies, **1622, 2058, 2150** and **2790 kc.**, 18 watts.

W9XAZ—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of construction permit for additional time to Feb. 28, 1940, to complete construction of high frequency broadcast station.

W2XVP—City of New York, Municipal Broadcasting System, New York City.—Granted modification of construction permit of high frequency broadcast station for changes in equipment and extension of completion date to 90 days after date of grant.

WBAN—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile)—Granted modification of license for low frequency relay broadcast station to correct description of equipment and add A-1 emission.

WBAM—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile)—Granted modification of license for low frequency relay broadcast station to correct description of equipment and add A-1 emission.

WBAQ—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile).—Granted modification of license of low frequency relay broadcast station to correct description of equipment.

WBAO—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile).—Granted modification of license of low frequency relay broadcast station to correct description of equipment.

WEGN—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile).—Granted modification of license of high frequency broadcast station to correct description of equipment.

WEGK—Bamberger Broadcasting Service, Inc., Newark, N. J. (Portable-Mobile).—Granted modification of license of high frequency broadcast station to correct description of equipment.

WSOC—WSOC, Incorporated, Charlotte, N. C.—Extended upon a temporary basis only, pending receipt of and determination upon application for renewal of license, the license of Station

WSOC expiring 3 a. m., EST, December 1, 1939, until no later than 3 a. m., EST, February 1, 1940.

Brown Radio Service and Laboratory, Rochester, N. Y. (area of WSAY), Portable-Mobile.—Granted construction permit for low frequency relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.**, 50 watts.

KEIT—Midland Broadcasting Co. (area of KMBC, Kansas City, Mo.), Portable-Mobile.—Granted construction permit to make changes in equipment of high frequency broadcast station.

KAOV—KRIC, Inc. (area of KRIC, Beaumont, Tex.), Portable-Mobile.—Granted license to cover construction permit for new low frequency relay broadcast station; frequencies **1646, 2090, 2190** and **2830 kc.**, 40 watts.

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Granted license to cover construction permit authorizing changes in equipment and increase in power and time of operation from 100 watts daytime to 250 watts, unlimited time.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Granted license to cover construction permit authorizing changes in equipment and increase in power from 100 to 250 watts.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted license to cover construction permit authorizing changes in equipment.

KAOU—Arizona Broadcasting Co., Inc. (area of KVOA, Tucson, Ariz.), Portable-Mobile.—Granted license to cover construction permit for new high frequency relay broadcast station, frequencies **31220, 35620, 27020** and **39260 kc.**, 10 watts.

WEJA—National Broadcasting Co., Inc. (area of WJZ and WEAF, N. Y.), Portable-Mobile.—Granted modification of construction permit to make changes in equipment and increase power to 100 watts in high frequency relay broadcast station.

W8XAD—WHEC, Inc., Rochester, N. Y.—Granted modification of construction permit for specific transmitter site.

WLWA—The Crosley Corp. (Cincinnati, Ohio, area of WLW, WSAI), Portable-Mobile.—Granted modification of license to change frequencies of relay broadcast station to **1622, 2058, 2150, 2790 kc.**

WLWB—The Crosley Corp. (Cincinnati, Ohio, area of WLW, WSAI), Portable-Mobile.—Granted modification of license to change frequencies of relay broadcast station to **1606, 2022, 2102,** and **2758 kc.**

WNOE—WBNO, Inc., New Orleans, La.—Granted modification of license to change name from WBNO, Inc., to WNOE, Inc.

KFJB—Marshall Electric Co., Marshalltown, Ia.—Granted authority to determine operating power by direct measurement of antenna input.

KEIA—Honolulu Broadcasting Co., Ltd. (Honolulu, T. H., area of KGMB), Portable-Mobile.—Granted modification of high frequency relay broadcast station license to change corporate name to Hawaiian Broadcasting System, Ltd.

WJMS—WJMS, Inc., Ironwood, Mich.—Granted authority to determine operating power by direct measurement of antenna input.

KGFW—Central Nebraska Broadcasting Corp., Kearney, Neb.—Granted authority to determine operating power by direct measurement of antenna input.

KWOC—Radio Station KWOC, Poplar Bluff, Mo.—Granted authority to determine operating power by direct measurement of antenna input.

WCCO—Columbia Broadcasting System, Inc., Minneapolis, Minn.—Granted authority to determine operating power by direct measurement of antenna input.

KSTP—National Battery Broadcasting Co., St. Paul, Minn.—Granted special temporary authority to operate daytime hours, with 50 KW while taking field intensity date, for a period not to exceed 30 days, during such days as data are actually being taken and balance of operation to be conducted with 1 KW auxiliary transmitter.

APPLICATIONS FILED AT FCC

620 Kilocycles

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 1 to 5 kilowatts, move transmitter from 116 N. Central Ave., Phoenix, Ariz., to 36th St. & Thomas Road, Phoenix, Arizona.

740 Kilocycles

KTRB—Thomas R. McTammany & William H. Bates, Jr., Modesto, Calif.—Modification of license to change time from day to limited to WSB, Atlantic, Ga., 250 watts day and night. Amended: to change to construction permit, move transmitter to site to be determined, Modesto, Cal., antenna to be determined, new transmitter and increase power to 1 kilowatt.

780 Kilocycles

WTAR—WTAR Radio Corp., Norfolk, Va.—Authority to determine operating power by direct measurement of antenna power.

850 Kilocycles

WKAR—Michigan State College, East Lansing, Mich.—Modification of construction permit B2-P-1767, as modified, for increase in power, new transmitter and antenna, move of transmitter, requesting extension of completion date from 11-30-39 to 1-30-40.

860 Kilocycles

WHB—WHB Broadcasting Co., Kansas City, Mo.—Construction permit to install new transmitter and antenna, increase power from 1 to 50 kilowatts, move transmitter from North Kansas City, Mo., to site to be determined, Kansas City, Mo.

900 Kilocycles

NEW—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Construction permit for a new broadcast station to be operated on **900 kc.**, 1 KW, daytime operation.

940 Kilocycles

WDAY—WDAY, Inc., Fargo, N. Dak.—Construction permit to install directional antenna for day and night use and increase power from 1 KW, 5 KW day, to 5 KW day and night. Amended to request use of directional antenna nighttime only.

990 Kilocycles

WBZ—Westinghouse Electric & Manufacturing Co., Boston, Mass.—Modification of construction permit B1-P-2161 for move of transmitter, and new transmitter and directional antenna for day and night use, further requesting changes in equipment.

1050 Kilocycles

KFBI—Farmers & Bankers Broadcast Corp., Wichita, Kans.—Modification of construction permit B4-P-1865 for new transmitting equipment, requesting approval of antenna and transmitter site at W½ of S½ of NW¼ of Sec. 28, Twp. 26, S. Range 1 East, R.F.D. near Wichita, Kans., and studio at 1st and Market Sts., Wichita, Kans.

1100 Kilocycles

KWKH—International Broadcasting Corporation, Shreveport, La.—Authority to determine operating power by direct measurement of antenna power, for **1100 kc.**, 50 KW power, unlimited time, as authorized by B3-MSA-50.

KWKH—International Broadcasting Corporation, Shreveport, La.—License to cover modification of special experimental authority, B3-MSA-50, for changes in equipment, increase in power, and move of transmitter.

1170 Kilocycles

NEW—Chester N. Williams, Orinda, Calif.—Construction permit for a new station to be operated on **1170 kc.**, 1 KW power, limited time.

1180 Kilocycles

KEX—Oregonian Publishing Co., Portland, Oregon.—Modification of license to change frequency from **1180** to **1160 kc.**, and hours of operation from simultaneous day, shares KOB night, to unlimited.

KEX—Oregonian Publishing Co., Portland, Oregon.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from **1180** to **1160 kc.**, increase power from 5 to 50 KW, change hours of operation from simultaneous KOB day and shares KOB night, to unlimited, move transmitter from Denver Ave., near Swift Road, North Portland, Oregon, to River Road, near Carver, Oregon.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of license, change time to unlimited, contingent on KEX's application for **1160 kc.,** B5-ML-910.

1200 Kilocycles

KAST—Astoria Broadcasting Co., Astoria, Oregon.—Authority to determine operating power by direct measurement of antenna power.

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WFTC—Jonas Weiland, Kinston, N. C.—Authority to determine operating power by direct measurement.

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—License to cover construction permit B1-P-1461, as modified for a new broadcast station.

1210 Kilocycles

KFVS—Oscar C. Hirsch, trading as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Modification of license to change frequency from **1210** to **1370 kc.,** and hours of operation from specified hours to unlimited time.

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Modification of license to change hours of operation from specified hours to unlimited, requesting facilities of KFVS if KFVS is granted unlimited time on **1370 kc.**

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Authority to determine operating power by direct measurement of antenna power.

KXOX—Sweetwater Radio, Inc., Sweetwater, Texas.—License to cover construction permit B3-P-2106, as modified for a new station.

KXOX—Sweetwater Radio, Inc., Sweetwater, Texas.—Authority to determine operating power by direct measurement.

NEW—Henry Estes, Austin Dean, & L. H. Christian, d/b as Gainesville Broadcasters, Gainesville, Ga.—Construction permit for a new station to be operated on **1210 kc.,** 250 watts power, unlimited time.

NEW—T. Frank Smith, Houston, Texas.—Construction permit to erect a new station to be operated on **1210 kc.,** 250 watts, unlimited time. Amended: To change equipment, and give studio and transmitter sites as site to be determined, Houston, Texas.

KFXM—J. C. Lee & E. W. Lee, Lee Brothers Broadcasting Co., San Bernardino, Calif.—Construction permit to install new transmitter, new antenna and increase power from 100 to 250 watts, move transmitter from 512 Fifth St., San Bernardino, to Colton Ave., San Bernardino, Calif.

1260 Kilocycles

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Construction permit to make changes in antenna and transmitter, increase in power from 1 KW; 5 KW day to 5 KW day and night, move transmitter from Virginia Drive, approximately 3½ miles N. E. of business district of Dayton, Ohio, to rural S. E. of city, near Dayton, Ohio.

1300 Kilocycles

KALE—KALE, Inc., Portland, Ore.—Modification of construction permit B5-P-2344 to increase power, move transmitter, new transmitter, and antenna changes, further requesting changes in equipment and extend completion date 90 days; make changes in antenna.

1310 Kilocycles

NEW—Radio Voice of Springfield, Inc., Springfield, Ohio.—Construction permit for a new station to be operated on **1310 kc.,** 100 watts power, unlimited time. Amended re corporate structure.

1360 Kilocycles

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—Authority to determine operating power by direct measurement.

1370 Kilocycles

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kans.—Authority to determine operating power by direct measurement.

KFRO—Voice of Longview, Longview, Tex.—Modification of construction permit B3-P-2117, as modified, for changes in frequency, increase in power, change in hours of operation, install new transmitter and directional antenna, further requesting installation of new transmitter and increase power from 1 to 5 KW. Extend commencement and completion dates 60 and 180 days.

NEW—Helen L. Walton and Walter Bellatti, Jacksonville, Ill.—Construction permit for a new broadcast station on **1370 kc.,** 250 watts power, unlimited time.

WCNC—Aubrey G. McCabe and Trim W. Aydlett, d/b as Albemarle Broadcasting Co., Elizabeth City, N. C.—Voluntary assignment of license from Aubrey G. McCabe and Trim W. Aydlett, d/b as Albemarle Broadcasting Co., to Albemarle Broadcasting Co.

KVGB—Helen Townsley, Great Bend, Kans.—Authority to determine operating power by direct measurement.

WISE—Harold H. Thoms, Asheville, N. C.—Modification of license to increase power from 100 to 250 watts.

1390 Kilocycles

KABR—Aberdeen Broadcast Co., Aberdeen, S. Dak.—Construction permit to install new transmitter, make changes in directional antenna, for night use, and increase power from 500 watts, 1 kilowatt day to 5 kilowatts day and night.

1400 Kilocycles

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—License to cover Construction permit B1-P-2481, for move of transmitter.

1420 Kilocycles

WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Construction permit for new transmitter.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Penna.—Modification of construction permit B2-P-2544, for equipment changes, increase in power, further requesting authority to install new transmitter.

KFAM—The Times Publishing Co., St. Cloud, Minn.—Authority to determine operating power by direct measurement.

1500 Kilocycles

NEW—P. K. Ewing, Kosciusko, Miss.—Construction permit for a new station to be operated on **1500 kc.,** 100 watts night and 250 watts day power, unlimited time. Amended: Antenna changes and give transmitter site as site to be determined, Kosciusko, Miss.

KUTA—Frank C. Carman, Jack Powers, David G. Smith, and Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah—Modification of construction permit B5-P-2513, for new equipment requesting increase in power from 100 to 250 watts, extend commencement date 30 days after grant and completion date 60 days thereafter.

NEW—South Jersey Broadcasting Corp., Vineland, N. J.—Construction permit for a new broadcast station to be operated on **1500 kc.,** 250 watts, unlimited time.

NEW—The Delmarva Broadcast Co., Salisbury, Md.—Construction permit for a new broadcast station to be operated on **1500 kc.,** 250 watts, unlimited time.

MISCELLANEOUS

NEW—WDRC, Incorporated, Meriden, Conn.—Construction permit for a new television broadcast station to be located on Summit of West Peak, Meriden, Connecticut, on **96000-102000 kc.,** 1 KW power, A-3 and A-5 emission. Amended: To request frequency of **66000-72000 kc.**

W8XVB—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—License to cover construction permit B1-PHB-71, for new high frequency broadcast station.

WEHG—Columbia Broadcasting System, Inc., Portable Mobile.—Modification of license to change authorized power from 1.5 watts to 2 watts and make changes in equipment.

NEW—The Crosley Corp., Cincinnati, Ohio—Construction permit for a new television broadcast station on **44000-50000 kc.,** 1 KW power, A-3 and A-5 emission, to be located at corner

Wine and Fifth Sts., 48th floor Carew Tower. Amended: To request **50000-56000 kc.**

NEW—Miami Valley Broadcasting Corp., Dayton, Ohio.—Construction permit for a new high frequency station on **42600 kc.**, 1 KW power, unlimited time, special emission. Located near Dayton, Ohio.

KFDA—Amarillo Broadcasting Corporation, Amarillo, Texas.—Authority to determine operating power by direct method.

KEJJ—National Broadcasting Co., Inc., Denver, Colo.—License to cover construction permit B5-PRE-302, for new equipment.

KEJK—National Broadcasting Co., Inc., San Francisco, Calif.—License to cover construction permit B5-PRE-303, for new equipment.

KEJL—National Broadcasting Co., Inc., San Francisco, Calif.—License to cover construction permit B5-PRE-304, for new equipment.

NEW—Henry Joseph Walczak, Springfield, Mass.—Construction permit for new television broadcast station located at 360 Worthing St., Springfield, Mass., to be operated on **1550 kc.**, 250 watts, unlimited time, special emission. Amended: To request frequency of **1650 kc.**

NEW—Boston Edison Co., Boston, Mass.—Construction permit for a new high frequency broadcast station located at 1165 Massachusetts Ave., Boston, Mass., frequency **42800 kc.**, special emission, 250 watts power. Amended: To request frequency of **43,200 kc.**

NEW—Howitt-Wood Radio Co., Inc., Binghamton, N. Y.—Construction permit for a new high frequency broadcast station, on **42600 kc.**, 1 KW power, special emission, located at Cleveland & Stokes St., Binghamton, N. Y.

WEMA—Westinghouse Electric & Mfg. Co., Portable-Mobile.—Modification of license to increase power to 50 watts.

WEMB—Westinghouse Electric & Manufacturing Co., Mobile.—Modification of license to increase power to 50 watts.

WEMN—Westinghouse Electric & Manufacturing Co., Mobile.—Modification of license to increase power to 50 watts.

WEMO—Westinghouse Electric & Manufacturing Co., Portable-Mobile.—Modification of license to increase power to 50 watts.

WLWO—The Crosley Corp., Mason, Ohio.—Modification of license to operate unlimited time on **17800 kc.** in addition to present licensed frequencies.

WEJN—National Broadcasting Co., Inc., New York, N. Y.—License to cover C. P. B1-PRE-306 for new equipment.

WEJW—National Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit B1-PRE-308, for new equipment.

WEJQ—National Broadcasting Co., Inc., Cleveland, Ohio.—License to cover construction permit B2-PRE-307, equipment changes.

NEW—Zenith Radio Corp., Chicago, Ill.—Construction permit for a new high frequency station located at 6001 Dickens Ave., Chicago, Ill., to be operated on **42800 kc.**, 5 KW power, special emission. Amended: To request 1 KW power and equipment changes.

WEOC—South Carolina Broadcasting Co., Inc., area of Charleston, S. C.—License to cover construction permit B3-PRE-249, as modified, for a new high frequency relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Celotex Corporation—A complaint has been issued charging The Celotex Corporation, Chicago, with violation of Section 7 of the Clayton Act through its acquisition of the capital stock of Certain-teed Products Corporation, New York, a competitor.

The complaint alleges that about January 1, 1938, The Celotex Corporation acquired from the Phoenix Securities Corporation 9,946 shares of the outstanding preferred stock and 109,360 shares of the outstanding common stock of the Certain-teed Products Corporation, and as consideration therefor. issued 43,744 shares of its own common stock and paid approximately $569,760 in cash. About March 1, 1939, the complaint alleges, The Celotex Corporation acquired from the General Investment Corporation and others approximately 40,000 additional shares of Certain-teed common stock for approximately $550,000 in cash and securities.

Acquisition by Celotex of Certain-teed's capital stock allegedly had the effect of substantially lessening competition in interstate commerce between the two companies; of restraining interstate commerce in the sale of structural insulation and acoustical material, including fiber and gypsum products, in certain parts of the country, and of tending to create a monopoly in The Celotex Corporation in the sale of such products. (3957)

Certain-Teed Products Corporation—See Celotex Corporation.

Jasper W. Efird—Charging violation of the brokerage section of the Robinson-Patman Act, a complaint has been issued against Jasper W. Efird, 200 West 34th St., New York, and 38 southern retail store companies of which he is a stockholder and director and by each of which he is employed as vice president to act as purchasing agent. Twenty-eight of the companies have stores in North Carolina, nine in South Carolina, and one in Virginia.

Operating from his New York office, which is listed as J. W. Efird, Efird Department Stores, Efird takes care of the purchasing requirements of the 38 store companies. It is alleged that sellers of such merchandise pay to Efird brokerage fees amounting to a percentage of the sales prices agreed upon between themselves on the one hand and the 38 buyers, through their agent, Efird, on the other, and that no services are rendered the sellers by Efird.

The brokerage fees received by Efird allegedly are used by him as an officer and employee of the various store companies in the payment of rent, salaries, wages, traveling expenses and other maintenance costs of their New York office and for other purposes solely for the benefit of these buyers.

The respondent Efird store companies are located in Charlotte (two companies), Wilmington, Raleigh, Winston-Salem, Salisbury, Durham, High Point, Gastonia, Lumberton, Rocky Mount, Goldsboro, Monroe, Lexington, Burlington, Wilson, Shelby, Statesville, Forest City, Albemarle, Lenoir, Laurinburg, Lincolnton, Greensboro, Kannapolis, Hickory, Kinston, and Greenville, N. C., and Columbia, Anderson, Greenville, Spartanburg, Greenwood, Rock Hill, Sumter, Greer, and Chester, S. C., and Danville, Va. (3955)

Levin Bros.—Complaints have been issued against Levin Bros., Terre Haute, Ind., and H & D Sales Company, Knoxville, Tenn., charging the use of lottery practices in connection with the sale of merchandise to ultimate consumers.

The complaint against Max, Morris L. and Isaac P. Levin, trading as Levin Bros., is in two counts, the first charging the respondents with the distribution and sale of assortments of knives, watches, candy and other merchandise along with punch boards involving a lot or chance feature to consumers. The second count charges the sale and distribution by respondents of push cards and punch boards involving lottery features in the sale of merchandise.

Respondents thus supply to persons, firms and corporations, the complaint alleges, instrumentalities for engaging in unfair methods of competition and unfair acts and practices in commerce in violation of the Federal Trade Commission Act.

H & D Sales Company, 320 North Gay St., Knoxville, Tenn., and Nathan J. Hubbard and Arthur Easton Davis, individually and as officers of the corporation, are charged with the sale and distribution of merchandise so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when sold and distributed to ultimate consumers. (3954-3956)

W. H. Maze Company, Peru, Illinois, manufacturer and distributor of roofing nails, is charged in a complaint with misrepresentation in the sale of its products.

In advertisements in periodicals and other publications, the respondent represented that "Maze Anchor Lead Heads hold two to four times better—conclusive tests prove it."

The complaint alleges that the respondent's "Lead Head Anchor Shank Nails" do not have two nor four times the holding power, under normal conditions, of other nails ordinarily used for roofing. (3953)

Charles H. Phillips Chemical Company, New York, has been served with a complaint alleging misleading representations in the sale of "Phillips' Milk of Magnesia Cleansing Cream" and "Phillips' Milk of Magnesia Texture Cream."

The respondent corporation allegedly advertised that "if your skin seems 'acid.' if it has lost its fresh tone, smooth firm texture . . . then try the beauty-giving action of these milk of magnesia creams on your skin!" . . . "Help overcome 'acid' skin. You know how milk of magnesia taken internally relieves excess acidity of the stomach. In just the same way these new type milk of magnesia creams act externally on the excess fatty acid accumulations on the skin, and help to overcome unsightly faults and aid in beautifying."

It is alleged that the respondent's use of the phrase "Milk of Magnesia" in the name of its products has a tendency to mislead buyers because milk of magnesia has no therapeutic value in treating the conditions for which the respondent recommends it such as "acid skin," skin blemishes, enlarged pores or excess fatty acid accumulations, and will neither penetrate nor cleanse the pores nor improve the texture of the skin.

Skin blemishes are not caused by "acid skin"; in fact, there is no disease or abnormal pathological condition known as "acid skin," according to the complaint. The quantity of fatty acid on the normal skin is very small, the complaint continues, and neither the use of one nor of both the respondent's preparations will neutralize it in the same way that milk of magnesia neutralizes excess acid in the stomach, or so as to accomplish the results represented. (3959)

H & D Sales Company—See Levin Bros.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

American Clinical Laboratories, Inc., Official Research Bureau of New York, Inc., Federal Research Corporation, and Shelley Braverman, an individual, all of 149-50 Roosevelt Ave., New York, have been ordered to cease and desist from misrepresentations in the sale and distribution of "Retardo," a medicinal preparation advertised as a safe remedy for the treatment of excess weight.

The Commission finds that Shelley Braverman owns the majority of the stock in American Clinical Laboratories, Inc., and Federal Research Corporation, and owns all the stock of Official Research Bureau of New York, Inc., and directs and controls their sales activities and policies.

American Clinical Laboratories, Inc., is found to have represented in newspapers and periodicals and in radio continuities, among other things, that "Retardo" is "absolutely free of all harmful ingredients," and is "the newest discovery for the reduction of excess weight," and Federal Research Corporation to have represented that it "contains no dangerous drugs," when according to the findings, the product is not an effective or reliable treatment for losing weight, and contains a substantial amount of boric acid, which is harmful when taken in the amounts and over the period of time directed by the respondents.

American Clinical Laboratories, Inc., Federal Research Corporation, and Shelley Braverman, are ordered to cease and desist from representing that the use of "Retardo" is a safe, competent, effective or reliable method for losing weight, and that use of the preparation will reduce weight without dieting or exercise. These respondents are also directed to cease representing, through their failure to reveal that the preparation is not wholly safe for use in self medication, that it contains no harmful or dangerous drugs, and that its use will have no ill effects upon the body.

The order further requires the American Clinical Laboratories, Inc., Official Research Bureau of New York, Inc., and Braverman to cease representing, through use of the terms "Approved by the Official Research Bureau of New York" or "Seal of Approval, Official Research Bureau of New York," or through use of the corporate name "Official Research Bureau of New York, Inc.," to designate or refer to the preparation, that it has been approved by any research bureau having an official connection with the city or State of New York, or has been approved by any municipal, State or governmental agency or bureau whatsoever. (3415)

Benson Speciality Company—Robert H. Benson and Emma Benson, trading as Benson Specialty Company, 251 Plymouth Building, Minneapolis, and engaged in the sale and distribution of specialty merchandise, have been ordered to cease and desist from misrepresentation of the value of coupons and certificates used in the sale and distribution of their merchandise, and of prices at which their products are offered for sale.

Among such typical representations in newspapers and periodicals, the findings state, are: "SPECIAL. This certificate and 59¢ entitles the bearer to one of our genuine indestructible $3.00 vacuum filler sackless fountain pens. Introductory offer. This pen will be $3.00 after sale. Limit 3 pens to each customer." . . . "This coupon is worth $3.02. This coupon and $1.98 entitles the bearer to one of our regular $5.00 Electro Heat Kwick hot water disc as above described. LIMITED SUPPLY AT INTRODUCTORY PRICE. Through special arrangement with the manufacturer we are able to offer for 2 days only a special advertising discount of $3.02 on each Electro Heat Kwick nationally advertised at $5.00. Note—due to limited supply only one to each coupon."

In truth and in fact, the findings continue, the prices represented by the respondents as the customary retail prices of the products are fictitious and greatly in excess of the prices at which the articles customarily are offered for sale and sold, and the respondents are not conducting an introductory or special offer, and the certificates or coupons referred to in advertisements do not have the values therein specified or any value whatever, as the prices charged by the respondents in addition to the certificates or coupons are the regular prices at which the products are sold in the usual course of business.

The respondents are ordered to cease and desist from representing as the customary or regular prices of their products, prices and values which are in fact fictitious and in excess of prices at which such products are customarily offered for sale, and from representing that any articles of merchandise regularly sold in connection with the use of any purported certificate or similar device, have any value in excess of the actual money price required to be paid, or that any coupon or similar device has any monetary value in the purchase of an article which is regularly sold by the respondents with or without such coupon or similar device at the price required to be paid. (3795)

Federal Research Corp.—American Clinical Laboratories, Inc.

Grey Advertising Agency, Inc.—Waldes Koh-I-Noor, Inc.

Official Research Bureau of New York, Inc.—American Clinical Laboratories, Inc.

Perma-Maid Company, Inc., Cincinnati, selling agent and distributor of stainless steel cooking utensils, has been ordered to cease and desist from unfair disparagement of the products of competitors.

The Perma-Maid Company and its officers, representatives, agents and employees, are ordered to cease representing that food prepared or kept in aluminum utensils is detrimental to the health of the user thereof; that the preparation of food in aluminum utensils causes the formation of poisons, and that the consumption of food prepared or kept in aluminum utensils will cause ulcers, cancers, cancerous growths and various other ailments, afflictions and diseases. (3268)

Waldes Koh-I-Noor, Inc., 47-52 Twenty-seventh St., Long Island City, New York, manufacturer and distributor of fastening devices for men's and women's apparel, and The Grey Advertising Agency, Inc., 128 West 31st St., New York, have been ordered to cease and desist from misrepresentations in the distribution and sale of ladies' handbags.

The Commission finds that the Waldes Koh-I-Noor company manufactures devices such as snap fasteners, snap buckles, hook and eye and slide fasteners. One of its manufactured devices is a slide fastener or zipper designated "Kover-Zip." As a means of promoting sales of its products, the findings continue, the Koh-I-Noor company causes ladies' handbags, including certain of its fastener products to be manufactured.

During the spring and fall of 1936, respondents engaged in an advertisement and sales promotional program of ladies' handbags and purses equipped with "Kover-Zips." Plans for the campaign, the findings continue, were laid out and executed by The Grey Advertising Agency, for Waldes Koh-I-Noor company, and were financed by the latter company. In connection therewith respondents purchased, in France, a number of ladies' handbags designed and manufactured by various couturiers. Only one bag of each particular design was purchased. Prices paid in France for the articles ranged from $11.38 to $22.75, at the rate of exchange when purchased. Customs duties, consular fees, packing, delivery and other charges increased the cost of the delivered articles in this country to sums ranging from $15.86 to $31.21 per handbag. The handbags were then distributed among certain handbag manufacturers in the United States for copying as to design and style, for production in commercial quantities to sell at prices ranging from $2.95 to $3.50.

Pursuant to the sales promotional program, the Commission finds, respondents caused 24 of the imported French-made bags to be illustrated in page advertisements appearing in issues of a magazine having a wide circulation throughout. The advertisements represented the retail prices of the imported handbags to be from $35 to $95.

The purpose of the magazine advertisements, the findings continue, was to create a price basis and promotional background for subsequent advertising and sale of the Waldes Koh-I-Noor company's American-made copies of the French-made handbags, and not to induce the purchase of the original handbags. The originals illustrated were not, in fact, offered for sale to retailers or in regular selling channels at prices ranging from $35 to $95. Imported handbags of the same quality, style, design and material as the handbags purchased in France by respondents and illustrated in the advertisements, when offered for sale in the United States, the findings continue, do not command prices of more than about half the value represented in the advertisements.

Findings of the Commission are that the ladies' handbags offered for sale and sold by respondents were copies of French-made handbags in style and design only. In matters of ornament, materials and workmanship, respondent's handbags were substantially lower in quality and value than the French-made handbags. The offering for sale of such handbags represented to be "authentic copies," "identical copies," "identical facsimiles" or "exact reproductions," the findings point out, has the tendency to mislead and deceive members of the buying public, and the acts and practices of the respondents are to the injury of the public and respondent Waldes Koh-I-Noor company's competitors, and constitute unfair methods of competition.

Respondents are ordered to cease and desist from representing or inducing others to represent that any imported French-made ladies' handbags have been regularly offered for sale at a retail price at which the same have not been or are not regularly offered for sale; from representing that any imported handbag has a value which such handbag does not have; from representing that any domestic-made handbags are "copies," "reproductions" or "facsimiles" of imported handbags, unless such domestic-made handbags are true copies in all particulars, inclusive of design, style, material, ornament and workmanship, comparable and equal in quality to the imported handbags of which the domestic-made handbags are copies. It is further ordered that respondents cease and desist from distributing any advertising material which contains any of the aforesaid representations for use in connection with the promotion of the sale of any such article. (3269)

STIPULATIONS

The Commission has entered into the following stipulations:

Alliance Ribbon & Carbon Mfg. Company—Earl Herstam, trading as Alliance Ribbon and Carbon Manufacturing Company, 970 North 8th St., Philadelphia, in the sale of typewriter ribbons and carbon paper, will cease employing the word "Manufacturing" as part of his trade name or the words "Factory, New York", on letterheads or trade literature, when in fact he does not own or control a factory in which the articles he sells are made. Herstam also agreed to discontinue use of any feigned or fictitious designation like "Distributor" as descriptive of his business status, with a tendency to mislead buyers into believing that he is a duly appointed agent of some concern other than himself for the marketing of its merchandise, when such is not a fact. (2586)

Morris N. Beitman, 3727 West Thirteenth St., Chicago, according to his stipulation, compiles pamphlets containing technical reading matter prepared from material which he in part furnishes and which in part is taken from catalogs of manufacturers of various devices used in the air conditioning field. In the sale of his pamphlets, Beitman agrees to cease using the words "complete course" in a manner tending to convey the impression that they constitute a complete course in the technical science of air conditioning, heating or ventilating. Among other representations to be discontinued are: that the pamphlets were prepared by Beitman for the Chicago Technical Society and that "It's no trick to obtain work in air conditioning, the field with more jobs than available trained men." (2578)

Blue Ribbon Hatchery, Inc., New Knoxville, Ohio, is in the chick hatchery business, selling hatching eggs and also chicks incubated at its place of business from eggs purchased from poultry farmers. Under its stipulation, the respondent company agrees to desist from advertising or representing that its hatching eggs are from flocks that have been either culled or blood tested or otherwise treated for any disease, when such is not a fact, or when only a portion of the flocks supplying the eggs have been so treated or tested during the current season. The respondent also agrees to discontinue employing any disease control term such as "blood tested" in advertising in such a manner as to have the effect of misleading buyers into believing that officially approved methods have been used in making these tests, when such is not a fact. (2577)

Boyer Chemical Laboratory Company, 2700 Wabash Ave., Chicago, agrees to cease advertising generally or without proper qualification, that "Boyer's Zinc Soot Destroyer" burns up the soot in chimneys or that by use of this substance the chimney soot turns into a light, white, powdery ash, or that a chimney is made clean or given a perfect draft, or that the product may be relied upon to prevent chimney fires. The respondent also agrees to discontinue representing itself as "Exclusive Licensed Manufacturers". The stipulation points out that while a soot remover like the respondent's may reduce soot in a furnace and flue pipe, its efficacy does not usually extend to the chimney, and there is always a danger of the burning soot emitted from a chimney falling on inflammable materials. The respondent's product, according to the stipulation, is composed of zinc filings, a standard commodity on which there is no patent or exclusive right to manufacture. (2592)

Curtis A. Davis, 123 West Avenue 30, Los Angeles, Cal., agrees to cease advertising that "Jane Cook's Wonder Tissue Creme" will furnish nourishment to the tissues or cells or increase the size of the bust, or that a flat chest is due to a lack of nourishment in the tissue cells of the chest, or to the fact that in a case of flat chest the cells are shrunken or collapsed. The respondent agreed to cease representing that the product heretofore designated "Jane Cook's Wonder Tissue Creme" is in fact a "tissue" cream, either by inclusion of that word in the name for the product, or otherwise. (02462)

Dawe's Products Company, Inc., Chicago, Ill., manufactures products for use as ingredients in compounding poultry and other live stock feed and sells such preparations under the names "Vitamelk", "Dawe's Vitamelk", "D. V. Base", "Vitamelk Base", and "Vitamelk Concentrate". The respondent corporation agrees to cease representing that "Vitamelk" is nutritionally correct or that its use will achieve higher egg production, faster growth, earlier maturity, higher hatchability and reproduction, strong and bigger chicks, longer life of layers and breeders, improvement in quality of milk and flavor of meat, lower mortality, and other accomplishments, unless, in direct connection with each and every such representation, it is clearly stated that the benefits claimed will obtain only when there is a deficiency or sub-optimal supply of vitamins or other constituents of the product in the feed or ration ordinarily provided such poultry or animals. Among other representations to be discontinued are that the respondent's product is scientifically balanced and united, and not merely mixed, or that it is a compound, and that "Vitamelk" is the one or only source offering vitamins in liberal amounts or rare minerals in necessary amounts. The respondent company also stipulates that it will not use the words "Guarantee" or "Guaranteed" in connection with the advertisement or sale of its products, unless clear and unequivocal disclosure is made of exactly what is offered by way of security, for example, refund of purchase price. (2581)

Great Lakes Optical Company—Harry Greenberg, sole trader as Great Lakes Optical Company, 160 North LaSalle St., Chicago, stipulates that he will cease representing that any optical goods bought and sold by him at a profit are available to the purchaser at "factory-to-you prices", or that such goods are delivered directly from "factory Great Lakes Optical Company", when there is no such factory. The respondent will also desist from misleading uses of the words "guaranteed" or "certified", and will cease misrepresenting the gold content of merchandise. (2591)

Hudson Bay Down Quilt Company, Inc., 330 South Wells St., Chicago, a corporation controlled by Isadore Buchman, agrees, in the sale and distribution of quilts or comforts and pillows, to desist from the use in its advertising, or from permitting the use by its salesmen or agents, of any fictitious figure purporting to be the regular sales price of its product, and to discontinue any representation that an offered price is an "Off-Season", "Special", "Introductory", or "Half" price, when such are not the facts. The corporation also agrees to cease employing the words "Satin" or "Taffeta", so as to imply that fabrics are composed of silk, when such is not a fact, and, if such words are used properly to describe the type of weave or construction of a rayon fabric, to immediately accompany them by the word "Rayon" in equally conspicuous type, indicating clearly that the product is rayon, as for example, "Rayon Satin" or "Rayon Taffeta". The corporation will also cease use of the words "Clairanese" or "Celanese", either alone or in connection with the words "Satin" or "Taffeta" as descriptive of rayon products, unless the term "Rayon" is set forth as part of and in immediate connection with such words and with equal conspicuousness. The corporation will also desist from representing quilt sizes which are not the true sizes of the finished product, and from use of the words "Hudson Bay", to imply that it has any connection with Hudson's Bay Company of Canada, or that it is selling the products of Hudson's Bay Company. (2583)

Kenton Pharmacal Company, 423-425 Greenup St., Covington, Ky., will discontinue advertising that the preparation now designated "A. M. Solution" is competent in treating ring worm, impetigo, eczema, insect bites or other skin irritations, unless the claim is limited to relief of itching and discomfort; that it is adequate for treating any condition of athlete's foot or similar ring worm condition, when such condition is refractory, that is, after the fungus has burrowed into the skin; and that years of research have been devoted to experiments with combinations of drugs to arrive at the formula of "A. M. Solution." (02463)

Lectrolite Corporation, Defiance, Ohio, manufacturer of wrenches and others tools, agrees to desist from advertising, branding or stamping tools, wrenches or other steel products as "chrome vanadium steel" or "chrome vanadium," when they do not actually meet the standard specifications entitling them to be properly so designated. (2584)

Piepgras Light Company—S. Piepgras, sole trader as Piepgras Light Company, Tinley Park, Ill., distributor of lamps, lanterns and heaters, agrees to cease describing his "No. 18 Giant" gasoline lantern as a 300-candlepower light, when such is not a fact, or representing that such a lantern makes a chicken coop or other enclosure "light as daylight," or that such lamp is equal to 20 ordinary lamps, unless competent scientific tests support the latter claim. The respondent also agrees to discontinue misleading uses of the word "guaranteed." (2589)

Repeat Sales Company—Martin L. Bechtold and David Ginsberg, trading as Repeat Sales Company, 722 Fifteenth St., Denver, Colo., have agreed to cease the sale and distribution of sales promotion cards so designed that their use by retail merchants constitutes the operation of a lottery, game of chance or gift enterprise. (2585)

Samarkand Rugs, Inc., 300 Fifth Ave., New York, importer of cotton rugs, agrees to abandon the unqualified designations "Oriental Replica," "Oriental Reproduction," "Chinese Replica," or "Chinese Reproduction" for rugs which are not actually Oriental or Chinese replicas or reproductions. The words "Oriental" or "Chinese" are not to be used in connection with rugs which do not contain all the inherent qualities of Oriental or Chinese rugs, unless, where properly used to describe the design or pattern, they are accompanied in conspicuous type by other words indicating that only the form delineated on the surface of the rugs is a likeness of an Oriental or Chinese type, as, for example, "Oriental Design" or "Oriental Pattern." (2593)

Samuel Schlossman & Sons, Inc., 41st St. & 6th Ave., New York, in the sale and distribution of furniture from its New York retail stores, stipulates that it will discontinue representing such products as being "Custom Made" or "Custom Grade," unless they are made on specific order of customers, and will cease advertising furniture as being made of "Mellow Maple," "Modern Walnut," "Inlaid Walnut," "Burl Walnut," "Rosewood" or other wood of recognized quality, when such is not a fact. The respondent agrees to cease representing gumwood as being a high quality wood or advertising or selling imitations of high quality woods without full disclosure of the simulation. (2588)

Standard Brief Case Company, 41 West 25th St., New York, agrees to discontinue use of the expression "Nu Leather" as a trade name, stamp or label for such of its products as are not composed of leather or hide, and to cease employing the statement "Will not crack—will not scuff—will not peel—is waterproof," in connection with products which are not proof against cracking, scuffing, peeling or water. The respondent also agrees to desist from use of the words "Genuine Cowhide" to imply that certain of its products are composed of leather made from the top or grain cut or layer of the cowhide. If they are composed of leather made from an inner or fresh cut of the hide, the word "Cowhide," if used as descriptive thereof, is to be immediately accompanied by language in conspicuous type indicating clearly that the products are not made of the top or grain cut or layer of the hide, according to the stipulation. (2582)

Sterling Cake Company, Inc., 62 Schenectady Ave., Brooklyn, agrees to desist from the use of the Seal of Holland in connection with the sale of its cookies and cakes, in any manner to imply to purchasers that the products are imported from Holland, and from use of the word "Holland" in connection with the word "Damstagg," to imply to purchasers that a product is imported from Holland, when such is not the fact. The corporation agrees that if its products are the same type as a commodity produced in Holland and the words "Holland Style" are used as descriptive thereof, then the words "Holland Style" shall be accompanied by other words in type equally conspicuous to indicate clearly that the products are of domestic origin. The respondent also stipulates that it will desist from representing on cartons or in any other manner whatsoever that the products are home-made, when such is not the fact. (2579)

Oscar E. Swenson Company—Oscar E. Swenson and Harry R. Leahy, formerly trading as Oscar E. Swenson Company, 279 Washington Ave., Brooklyn, in the manufacture of a preparation for treating silk stockings, agree to desist from use of the term "Pre-Vent-A-Run" as a trade name or designation for the product, the effect of which usage may tend to convey the impression that employment of the treatment will do away with runs in silk hosiery, when in fact it would not achieve this result. (2590)

Whiting-Mead Company, 2260 East Vernon Ave., Los Angeles, owner of the registered trade name "Wonder Tile Company," and manufacturer of "Wonder-Tile" and other building materials, will discontinue representing by use of the words "Wonder-Tile" or "tile" that its products are "tile" as that word is understood in the building trade and by the public, unless, in immediate conjunction with the words "Wonder-Tile" or "tile," there appear in equally conspicuous type other words designating the material or substance of which the products are made, such as "wood tile," "glass tile," "rubber tile," "asbestos tile," "copper tile," "cork tile," or "metal tile." (2587)

W. W. Von Todenwarth Company—W. W. Von Todenwarth, trading as W. W. Von Todenwarth Company, Tampa, Fla., in the sale of the medicine "Recto-Nol," agrees that he will discontinue representing it as a cure for piles; as eliminating all the suffering caused by piles, or the necessity of an operation; or as a new scientific or complete treatment the results of which are guaranteed. (02464)

FTC DISMISSES CASES

The Federal Trade Commission has closed its case in which International Radio Corporation, 559 Williams St., Ann Arbor, Mich.; Wieboldt Stores, Inc., 106 South Ashland Blvd., Chicago, and Davega-City Radio, Inc., 76 Ninth Ave., New York, were charged with misrepresentation in the sale of radio sets.

The three respondent companies have agreed to discontinue the unfair practices charged in the complaint and to accept and abide by the rules of fair trade practice for the radio receiving set manufacturing industry as promulgated by the Commission July 22, 1939.

The case was closed without prejudice to the Commission's right to reopen it, should future acts so warrant.

The Commission has also dismissed a complaint charging James S. Sutton, Inc., 717 Fifth Ave., New York, and James S. Sutton, individually, operators of linen shops, with violation of the Federal Trade Commission Act in the sale of their products.

A complaint has also been dismissed charging Schenley Distillers Corporation, New York, a holding company controlling subsidiary liquor companies in various parts of the country, with violation of Section 7 of the Clayton Act through purchase of the capital stock of the Bernheim Distilling Company, Louisville, Ky., a competitor.

The dismissal order recites that subsequent to the issuance of the complaint but prior to taking testimony, Bernheim Distilling Company, a Delaware corporation, transferred all of its assets to Schenley Distillers Corporation, which in turn transferred them to another subsidiary, the George T. Stagg Company, Frankfort, Ky., and Bernheim Distilling Company, the Delaware corporation, was dissolved.

The Commission has also dismissed a complaint charging James T. Jarrell, trading as Standard Business Training Institute, Genesee Building, Buffalo, with use of unfair methods of competition in the interstate sale of a correspondence course of instruction intended to prepare students for positions as traffic inspectors or checkers for transportation companies.

Reports

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 49, December 8, 1939

DISTRICT MEETINGS

Below is a revised list of coming district meetings. Be sure to attend. They are highly important. The fate of the copyright program is at stake. Be sure to notify non-members in your area that they should be there, too.

District No.	*City*	*Hotel*	*Date of meeting*
District 3			First week in January (*)
District 4	Washington	Mayflower	December 16
District 5	Jacksonville		January (*)
District 6			January 2 or 3 (*)
District 11	Minneapolis	Radisson	December 13
District 12	Tulsa	Hotel Tulsa	December 11
District 13	Dallas	Baker	January 5
District 14	Denver	Albany	December 9
District 15	San Francisco	Palace	January 10
District 16	Los Angeles	Ambassador	January 9
District 17	Portland	New Heathman	January 12

(*) Additional details will be sent to you as soon as possible.

New England Goes 100 Per cent for Broadcast Music

One hundred per cent support of Broadcast Music, Inc., was voiced by New England broadcasters at a District One meeting Wednesday in Boston.

Managers of 16 of the 29 stations represented pulled out their fountain pens and signed stock subscriptions after Paul W. Morency, WTIC, district director, and Sydney Kaye explained how Broadcast Music, Inc., should go a long way toward solving the industry's vital copyright problem.

With equal enthusiasm, the other 13 managers either pledged subscriptions within a few days or said they would recommend subscriptions to their station owners.

Those stations which subscribed:

WICC, WTIC, WATR, WAAB, WBZ-WBZA, WEEI, WMEX, WNAC, WSAR, WLLH, WBRK, WMAS, WTAG, WEAN, WJAR and WBNX.

Practically 100 per cent of the broadcasters at the combined meetings of Districts Eight and Nine at South Bend, Ind., on Wednesday also pledged their support of Broad-

NEW ENGLAND GOES 100 PER CENT FOR BROADCAST MUSIC

(Continued from page 3881)

cast Music, Inc. Neville Miller joined the district directors, John Fetzer and William H. West, in explaining the plan.

Although stock subscriptions were not discussed at the District Seven meeting in Dayton, O., on Tuesday, Kentucky and Ohio broadcasters indicated that they would give undivided support to the NAB's copyright program. After Mr. Miller and J. H. Ryan, district director, had described the program in detail, it was endorsed by unanimous vote.

Present at the District One meeting:

P. W. Morency, WTIC; John Shepard, 3rd, WNAC-WAAB-WEAN-WICC; Joseph L. Miller, NAB; Sheldon B. Hickox, Jr., NBC; Earle B. Clement, WLNH; Mildred P. Stanton, WORC; Robert W. Booth, WTAG; John W. Haigis, Jr., and James L. Spates, WHAI; W. C. Gartland and Frank E. Chizzini, NBC; David M. Kimel and M. William Noble, WLAW; George Lasker and Ashley L. Robinson, WORL; Alfred J. Pote and William S. Pote, WMEX; E. E. Hill, WTAG; Quincy A. Brackett, WSPR; C. Glover DeLancy and Cedric W. Foster, WTHT; Walter Haase, WDRC; Edwin J. Morey, WNLC; S. P. Willis, WPRO; John J. Boyle, WJAR; Harold Thomas, WBRK-WATR; William T. Welch, WSAR; L. Thomas, WBRK; L. Travers, Yankee Network; George F. Kelley, Jr., WFEA-WRDO-WCSH; A. S. Moffat, WMAS-WLLH; K. F. Horton and L. G. del Costilla, WEEI; John Holman, WBZ; G. Harrison, Colonial Network; S. M. Kaye, NAB; and J. Arnold Farrer, W1XOJ.

Those attending the District Seven meeting:

Robert Mackenzie, WCMI; Gilmore N. Nunn, WLAP; James Cox and Nathan Lord, WAVE; W. Lee Coulson and Robert L. Kennett, WHAS; Mrs. Edythe F. Melrose, Harold Sutherland and Ted Winter, WJW; C. A. Rowley and R. B. Rowley, WICA; Felix Hinkle, WHBC; James Krautters, WCKY; N. A. Latham, WKRC; Jerry Branch, WLW; E. K. Bauer, WSAI; Carl Everson, WCLE-WHK-WHKC; Gene Carr, WGAR; Vernon Pribble, WTAM; Richard A. Borel and William Orr, WBNS; Kenneth Johnston and Neal Smith, WCOL; J. Leonard Reinsch and Dave Brown, WHIO; Ronald B. Woodyard, WING; Don Ioset, WLOK; Ralph Patt, WPAY; J. H. Ryan, E. Y. Flanigan and George L. Young, WSPD; Stanton P. Kettler, WALR; Neville Miller, NAB; M. M. Blink, Standard Radio; Maurice Wetzel, NBC Thesauris; and Manuel Rosenberg, The Advertiser.

At the District 8-9 meeting were:

J. H. Keene, and R. R. Baker, WTRC; Martin Leich, WGBF; W. C. Swartley, and Ford Billings, WOWO; C. F. McLaughlin, WIBC; R. E. Bausman, WIRE; W. W. Behrman, WBOW; J. F. Hopkins, WJBK; O. F. Uridge, WJR; Howard Loeb, WFDF; John E. Fetzer, WKZO; Grant Ashbacker, WKBZ; and Angus D. Pfaff, WHLS.

Ken Rice, WDWS; W. E. Hutchinson, WAAF; Marie Clifford, WHFC; William H. West, WTMV; Edgar L. Bill, WMBD; Walter Koessler, WROK; Charles C. Caley, WDZ; T. F. Kyler, WCLO; H. R. LePoidevin, WRJN; H. Born, WHBL; Joseph A. McDonald, Donald Marcotte and Maurice Wetzel, NBC; and Milton Blink, Standard Radio.

CIRCUIT COURT REFUSES TO DISMISS WNEW APPEAL

The first step towards a reversal of the decision in *RCA* v. *Whiteman* was won by WBO Broadcasting Corporation, when the Circuit Court of Appeals on Wednesday, December 6, denied the motion made by RCA to dismiss the WNEW appeal. The motion was argued Monday, December 4, by Colonel Joseph M. Hartfield, of White & Case, co-counsel with Stuart Sprague, both retained by NAB for the broadcasters; and by David MacKay, for RCA. This clears the way for the printing of the record and briefs, and argument on the merits.

The lower court, among other things, had enjoined WNEW from broadcasting Victor records, principally on the ground that it constituted unfair competition with RCA. It is hoped that on appeal this decision may be reversed. The Circuit Court has now held that WNEW may appeal.

The members have been advised recently of the issues in the case and its ramifications through NAPA and the A. F. of M., in an exhaustive summary printed in NAB Reports, November 24, 1939. Their attention is drawn at this time to that summary as the most complete and illuminating statement of the controversy it is possible to provide.

Denial of RCA's motion to dismiss WNEW's appeal is a forward step in the broadcasters' campaign. The interests of the industry will continue to be protected in the fullest measure by the counsel retained. The NAB will promptly advise the members, either in NAB Reports or by special bulletin, of any significant developments in the situation.

Tax Bureau Revises Its Radio Depreciation Figures

A recent inquiry to Mr. Timothy C. Mooney, Deputy Commissioner of the Bureau of Internal Revenue, resulted in the following letter:

TREASURY DEPARTMENT
WASHINGTON

December 1, 1939

National Association of Broadcasters,
1626 K Street, N.W.,
Washington, D. C.

Attention: Mr. Spence

Sirs:

Reference is made to office letter of January 5, 1937, with respect to the average useful lives of depreciable property owned by radio broadcasting companies and to your verbal request that you be advised in connection with changes which may have been made in such lives since that letter was written. The information now available to this office indicates that the lives shown therein should be adjusted to those indicated below:

Group Lives:

Transmitter equipment	10 years
Studio control equipment	10 years
Speech input equipment	10 years
Antenna equipment	12 years
Towers	15 years
Buildings	20 years
Studio furniture and fixtures	7 years
Office furniture and fixtures	15 years
Pipe organs, pianos, etc.	10 years
Television equipment	4 years
Facsimile equipment	5 years

In this connection it should be kept in mind that the lives stated above are averages built up on the experience available for the equipment of all companies for which data could be obtained and may not be applicable to the assets of a particular company whose experience may indicate shorter or longer lives.

Respectfully,
Timothy C. Mooney,
Deputy Commissioner

By E. L. Lindsey,
Assistant Head of Division.

It will be noted that allowance for deprecation cannot be predicted upon a general average. Each broadcaster should produce all the facts pertinent to his own case and press for a decision thereon without reliance upon general practices.

"Radio's Riches" In Mail

Sample copies of "Radio's Riches—How You May Bring Them to Your Home," a sixteen page booklet in rotogravure, will be mailed all stations on Monday, December 11.

Their low price of eleven dollars per thousand is possible because of paper contracts made prior to price increases and to the large printing which is expected to run into several million.

The booklet contains the dynamic story of American radio and is especially designed for mass circulation.

In a letter on December 7, captioned, "The Radio Industry's Next Selling Job," which announced the completion of "Radio's Riches," Ed Kirby, director of public relations, said: "The radio industry has sold millions of people millions of things. And, despite rumors to the contrary, it has sold itself to millions of listeners, even though the majority of listeners perhaps don't know it.

"After all, people are people, and think mostly in terms of favorite radio personalities and favorite programs when they think of radio. They do not think in terms of the American System of Broadcasting which makes it possible for them to hear these programs on schedule, around the clock, day after day.

"What radio needs to do is to re-awaken this sleeping loyalty of listeners for American radio is going through one of its most trying periods.

"There is, at the moment, no need for undue alarm. But for a variety of reasons, there does exist an urgent need for the widest possible understanding of radio by the greatest number of listeners. While ignorance continues, those who wish to attack the industry for selfish reasons, find a juicy opportunity to do so, because of the condition of an uninformed public."

Labor Notes

Attorney General Frank Murphy has backed up the contention of his assistant, Thurman Arnold, that labor unions can be prosecuted under the anti-trust laws for illegal practices. In a letter to William Green, president of the American Federation of Labor, Mr. Murphy said the Justice Department was following court decisions in this matter.

Samuel R. Rosenbaum, WFIL, IRNA chairman, conferred with members of Mr. Arnold's staff last week about the current A. F. of M. situation. After the conference, Mr. Rosenbaum issued the following statement:

"By reason of the many inquiries received from affiliates regarding the effect of the Arnold letter on the current AFM-IRNA situation, a conference took place on Wednesday, November 29, between Samuel R. Rosenbaum, Chairman of IRNA, and members of Thurman Arnold's staff in the Department of Justice. No effort was made to bring the Department into the situation, but merely to learn what its attitude might be in the event the industry and AFM do not arrive at a satisfactory understanding. As expected, the Department declined at this time to express any views in advance of a specific case being brought before it."

The A. F. of L. is howling to high heaven that Mr. Arnold's policy is not only illegal but also a slap at labor from an administration that was supposed to be labor's friend. It is understood that William Green's talk with President Roosevelt on Wednesday dealt with this matter, although publicly Mr. Green said he had talked about "labor peace." The C. I. O. has kept quiet, but its leaders are as worried as are the A. F. of L. bigwigs.

Labor won an outstanding victory in the federal courts last week. A circuit court of appeals reversed a district court decision that the American Federation of Hosiery Workers (C. I. O.) had violated the anti-trust laws by a sit-down strike at the Apex hosiery mills in Philadelphia. The district court had awarded the company $711,000 triple damages. But the circuit court held that the primary intention of the union, in the strike, had been to organize the workers. Restraint of trade was incidental and indirect. At any rate, it was not "unreasonable." Therefore, the place to sue for damages was a state court. This decision will be appealed to the Supreme Court.

Current labor negotiations:

WCAU and WDAS, Philadelphia, with the American Communications Association (C. I. O.). Contract renewal for technicians.

WCBM, Baltimore, with the American Communications Association. New contract for technicians.

Seattle stations, with the International Brotherhood of Electrical Workers (A. F. of L.). New contract for technicians.

WLLH, Lowell, Mass., with the I. B. E. W. New contract for technicians.

The Labor Department reports that the cost of living for wage earners and low salaried workers *increased* 1.2 per cent during the three months ended September 15. Detroit and Minneapolis were the only cities to report a *decrease*.

Between September 19 and October 17, retail food prices *dropped* 1.3 per cent.

A federal district judge in Chicago upheld the constitutionality of the Wage and Hour act last week, overruling motions to quash an indictment naming the Chicago Macaroni Company and three of its officers.

Colonel Philip Fleming, Wage and Hour Administration chief, advised the NAB this week that advertising on the air, in itself, did not subject the employees of the advertiser to the Wage and Hour act. The question was raised by a prospective advertiser.

"The Voice of Labor," controversial C. I. O. program in Akron, Ohio, is back on the air at Station WADC, a non-member. The program formerly was on Station WJW, a member.

FREQUENCY MONITORS

Federal Communications Commission is sending notice regarding the requirement of frequency monitors to all licensees of relay, international, high frequency, noncommercial educational, facsimile, television and developmental broadcast stations. The announcement is as follows:

> The attention of all licensees of relay, international, high frequency, noncommercial educational, facsimile, television and developmental broadcast stations is specifically called to the provisions of Section 4.2 (formerly Section 40.02) of the Rules Governing Broadcast Services Other Than Standard Broadcast. This section requires that each station, except relay broadcast, shall have installed at the transmitter and operate continuously a frequency monitor having an accuracy sufficient to determine that the operating frequency is within one-half of the allowed tolerance. This section became effective September 15, 1939, and any station not now having the required monitor shall not operate until such monitor is obtained and placed in operation.
>
> A frequency monitor is defined as a device which will indicate automatically whether or not the operating frequency is within the allowed tolerance, as contrasted with "frequency meters" which require a certain amount of manipulation by a skilled person. A frequency monitor is required and a frequency meter is not acceptable.
>
> Frequency monitors designed for amplitude modulation may be used in conjunction with stations employing frequency modulation, it being understood that these monitors will only give an indication of the center frequency on no modulation.
>
> The frequency monitors used in compliance with this rule by all broadcast stations other than standard broadcast are ordinarily calibrated at the laboratory of the manufacturer. However, the maintenance of the constancy of calibration is the responsibility of the licensee. The licensees of all stations shall be prepared to demonstrate to a representative of the Commission that the frequency monitor has the required accuracy.
>
> Licensees operating two or more stations at the same location coming within the purview of Section 4.1 (formerly 40.01) may operate one frequency monitor if arrangements are made to switch the monitor from one transmitter to another by a simple operation and no adjustments are required on each frequency.
>
> Relay broadcast stations shall provide the necessary means for determining that the frequency of the station is within the allowed tolerance. The frequency measuring equipment used in compliance with this rule may be located at the relay station, at a central location or the receiving location. If the monitor is located at a distance from the station, provision shall be made to check the frequency in accordance with Section 4.2 (d). The equipment used to determine that the frequency at a station is within the allowed tolerance may be either a frequency monitor or a frequency meter (heterodyne frequency meter or equivalent). If commercial types of frequency monitors are used it may be necessary to use a radio frequency amplifier in order to provide sufficient signal to operate the device. Frequency meters, if used, shall be capable of required accuracy and shall be capable of being maintained in calibration by comparison with the signals of WWV or standard broadcast stations.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following arguments are scheduled before the Commission for Thursday, December 14. They are subject to change.

Thursday, December 14

Oral Argument Before the Commission

Report No. B-80:

KERN—McClatchy Broadcasting Co., Bakersfield, Calif.—C. P., **1380 kc.**, 1 KW, unlimited time. Present assignment: **1370 kc.**, 100 watts, unlimited time.

KOH—The Bee, Inc., Reno, Nev.—C. P., **630 kc.**, 1 KW, unlimited time. Present assignment: **1380 kc.**, 500 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

January 15

NEW—Joe W. Engel, Chattanooga, Tenn.—C. P., **1370 kc.**, 250 watts, unlimited time.

NEW—Lookout Mountain Company of Georgia, Lookout Mountain, Ga.—C. P., **1370 kc.**, 100 watts, 250 watts LS, unlimited time.

Hearing Before Commissioner Case

WHDH—Matheson Radio Co., Inc., Boston, Mass.—C. P., **830 kc.**, 5 KW, unlimited time (DA night). Present assignment: **830 kc.**, 1 KW, daytime (KOA).

January 16

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, **1210 kc.**, 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KFSG—Echo Park Evangelistic Assn., Los Angeles, Calif.—Granted modification of license to increase night power from 500 watts to 1 KW.

KGKY—Hilliard Company, Inc., Scottsbluff, Nebr.—Granted voluntary assignment of license from Hilliard Company, Inc. (a corporation), to a partnership consisting of L. L. Hilliard, Ruth K. Hilliard, and R. M. Stewart, doing business as Hilliard Company.

WSMB—WSMB, Inc., New Orleans, La.—Granted modification of construction permit to make changes in directional antenna system, increase night power from 1 KW to 5 KW, and extend commencement date to 30 days after grant and completion date to 90 days thereafter.

WTOL—The Community Broadcasting Co., Toledo, Ohio.—Granted construction permit to make changes in equipment and increase power from 100 watts to 250 watts, unlimited time.

KWOC—Radio Station KWOC, Poplar Bluff, Mo.—Granted construction permit to make changes in equipment; increase power and time of operation from 100 watts, daytime, to 250 watts, unlimited; and move studio from 214 Poplar Street to North Main Street at city limits, Poplar Bluff, Mo.

WJPR—John R. Pepper, Greenville, Miss.—Granted modification of license to increase night power from 100 to 250 watts.

W2XR—Radio Pictures, Inc., Long Island City, N. Y.—Granted modification of license for facsimile broadcast station W2XR to authorize use of aural transmitter of television broadcast station W2XDR and to reduce operating power to 500 watts. The license is granted upon an experimental basis only, conditionally.

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Granted construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna system for nighttime operation only.

WRC—National Broadcasting Co., Inc., Washington, D. C.—Granted amended application for construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna for nighttime operation.

KFWB—Warner Bros. Broadcasting Corp., Los Angeles, Calif.—Granted modification of license to increase night power from 1 KW to 5 KW.

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Granted construction permit to move studio and transmitter site locally; install vertical radiator; make changes in equipment; and increase power and time of operation from 100 watts, daytime only, to 250 watts, unlimited time.

KDNT—Harwell V. Shepard, Denton, Tex.—Granted modification of license to change power and time of operation from 100 watts, daytime only, to 100 watts, unlimited time.

KVAK—Carl Latenser, Atchison, Kans.—Granted modification of license to change power and time of operation from 100 watts, daytime only, to 100 watts, unlimited time.

KRBM—KRBM Broadcasters, Bozeman, Mont.—Granted modification of license to increase night power from 100 watts to 250 watts.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Granted construction permit to make changes in equipment and increase power from 100 watts to 250 watts.

KOVO—Clifton A. Tolboe, d/b as Citizens Voice and Air Show, Provo, Utah.—Granted modification of license to increase night power from 100 watts to 250 watts.

WCAE—WCAE, Inc., Pittsburgh, Pa.—Granted construction permit to install directional antenna system for night use, and increase power from 1 KW to 5 KW.

WDAE—Tampa Times Company, Tampa, Fla.—Granted construction permit to make changes in equipment, install directional antenna system, and increase night power from 1 KW to 5 KW, employing directional antenna system both day and night.

KWSC—State College of Washington, Pullman, Wash.—Granted modification of license to increase night power from 1 KW to 5 KW.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Granted amended application for construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna system for night operation.

WDWS—The Champaign News-Gazette, Inc., Champaign, Ill.—Granted modification of license to increase night power from 100 watts to 250 watts.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KYSM, Mankato, Minn.; WABY, Albany, N. Y.; WAGM, Presque Isle, Maine; WATL, Atlanta, Ga.; WAZL, Hazleton, Pa.; WBTM, Danville, Va.; WDAN, Danville, Ill.; WDAS, Philadelphia; WDAS auxiliary; WDWS, Champaign, Ill.; WEED, near Rocky Mount, N. C.; WEOA, Evansville, Ind.; WGAL, Lancaster, Pa.; KBPS, Portland, Ore.; KBST, Big Spring, Tex.; KDB, Santa Barbara, Calif.: KGFF, Shawnee, Okla.; KICA, Clovis, N. Mex.; KLBM, La Grande, Ore.; KONO, San Antonio, Tex.; KORE, Eugene, Ore.; KOTN, Pine Bluff, Ark.; KPLC, Lake Charles, La.; KRMC, Jamestown, N. Dak.; KSAM, Huntsville, Tex.; KTOK, Oklahoma City, Okla.; KTRI, Sioux City, Iowa; KVOE, Santa Ana, Calif.; WGL, Fort Wayne, Ind.; WHFC, Cicero, Ill.; WIBM, Jackson, Mich.; WMBR, Jacksonville, Fla.; KABC, San Antonio, Tex.; KEUB, Price, Utah; KGKL, San Angelo, Tex.; KPQ, Wenatchee, Wash.

MISCELLANEOUS

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted special temporary authority to remain silent from 9 to 11 a. m. and from 7 to 9 p. m., EST, on December 25, in order that WBRB's employees may observe the holiday.

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Granted special temporary authority to operate with increased power of 250 watts from 7:30 to 9:30 p. m., CST, on December 1, in order to adequately service Mansfield and surrounding territory in connection with the broadcast of the dedication of the Mansfield gymnasium.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted special temporary authority to remain silent from 11:30 a. m. to 2 p. m., EST, on December 25, in order that WCAP's employees may observe the holiday.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with station KTHS on **1060 kc.**, on the night of December 24, to 2 a. m., EST, December 25, in order to broadcast a special midnight mass from St. Ignatius Church in Baltimore.

KVAK—Carl Latenser, Atchison, Kans.—Granted special temporary authority to operate from 7:45 to 9 p. m., CST, on December 13, 14, 15 and 22, in order to broadcast football games only.

WLAW—Hildreth and Rogers Co., Lawrence, Mass.—Granted special temporary authority to broadcast electrical transcriptions and live talent to fill intermissions between election return broadcasts on December 12, as authorized by grant of November 15.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted special temporary authority to operate from 9 to 11 a. m. and from 2 to 6 p. m., AST, on December 3, 10, 17, 24 and 31, in order to broadcast games of the Semi-pro series only; to operate from 10 p. m., December 24 to 1 a. m., December 25, and from 9 a. m. to 11 a. m., and from 2 to 6 p. m., on December 25 and 31, and from 10 p. m. to 1 a. m., on December 26 in order to broadcast festivities pertaining to Christmas.

W2XQR—John V. L. Hogan, New York City.—Granted special temporary authority to conduct tests transmitting facsimile signals in connection with investigation of the characteristics of frequency modulated signals for the period ending no later than December 20, 1939.

W2XVT—Allen B. DuMont Laboratories, Inc., Passaic, N. J.—Granted special temporary authority to operate experimental television broadcast station from 9:30 p. m. to 12 midnight, EST, on December 8, in order to conduct demonstration for the R. M. A. Committee on Television (provided W2XBS remains silent).

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Granted special temporary authority to operate new transmitter in accordance with modification of construction permit during daytime, using 1 KW directional, for the period ending no later than December 12, in order to complete proof of performance measurements.

WKAQ—Radio Corporation of Puerto Rico, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from International Broadcast Stations WCBX and WCAB over station WKAQ, on a non-commercial experimental basis only, for the period beginning November 30, and ending in no event later than December 29, 1939.

W3XAD—RCA Manufacturing Co., Inc., New York City.—Granted special temporary authority to operate transmitter of television broadcast experimental station W3XAD on television bands 18 and 19, frequencies **282** and **294 mc.,** for the period ending no later than December 1, 1939.

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted extension of special temporary authority to operate from 9 to 10 a. m., EST, Monday, Tuesday, Wednesday, Thursday, Friday and Sunday mornings, for the period November 30 until said time is specifically authorized to be used by the Saginaw Broadcasting Co., but ending no later than December 29, 1939, in order to broadcast educational programs.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted motion to accept amendment to application to change request for increase in power from 1 KW to 5 KW night, using directional antenna.

Watertown Broadcasting Corp., Watertown, N. Y.—Granted petition for leave to amend application to change frequency from **1420 kc.** to **1210 kc.**

WEJA—National Broadcasting Co., Inc., New York City.—Granted modification of relay station license to increase power to 100 watts.

WEJC—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of relay station license to increase power to 100 watts.

WEJH—National Broadcasting Co., Inc., Chicago, Ill.—Granted modification of relay station license to increase power to 100 watts.

WAXD—The Birmingham News Company, Portable-Mobile (area of Birmingham, Ala.).—Granted license for reinstatement of low frequency relay broadcast station, frequencies **1646, 2090, 2190** and **2830 kc.,** 20 watts.

KEIM—KTAR Broadcasting Co., Portable-Mobile (area of KTAR, Phoenix, Ariz.).—Granted license to cover construction permit to make changes in equipment and increase power to 25 watts in relay broadcast station.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted authority to determine operating power by direct measurement of antenna input.

WJBC—Arthur Malcolm McGregor & Dorothy Charlotte McGregor, Bloomington, Ill.—Granted authority to determine operating power by direct measurement of antenna input.

WOMI—Owensboro Broadcasting Co., Owensboro, Ky.—Granted authority to determine operating power by direct measurement of antenna input.

WRVA—Larus & Bros. Co., Inc., Richmond, Va.—Granted authority to determine operating power by direct measurement of antenna input.

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kans.—Granted authority to determine operating power by direct measurement of antenna input.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted authority to determine operating power by direct measurement of antenna input.

WFTC—Jonas Weiland, Kinston, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

KAST—Astoria Broadcasting Co., Astoria, Ore.—Granted authority to determine operating power by direct measurement of antenna input.

WHLB—Head of the Lakes Broadcasting Co., Virginia, Minn.—Granted authority to determine operating power by direct measurement of antenna input.

KEHI—WDAY, Inc., Fargo, N. Dak.—Granted construction permit to change location of high frequency relay broadcast station from portable-mobile to fixed at 118 Broadway, Fargo, N. Dak.

WKBB—Sanders Bros. Radio Station, Dubuque, Ia.—Granted license to cover construction permit to increase night power to 250 watts, move transmitter and studio sites and install vertical radiator.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted modification of construction permit to install new equipment.

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—Granted authority to determine operating power by direct measurement of antenna input.

WBAP—Carter Publications, Inc., Fort Worth, Texas.—Granted authority to determine operating power by direct measurement of antenna input.

WPRO—Cherry & Webb Broadcasting, Co., Providence, R. I.—Granted construction permit to move auxiliary transmitter to Wampanoag Trail, E. Providence, employing directional antenna system for night operation and increase power of auxiliary transmitter to 1 KW.

W3XAD—RCA Mfg. Co., Inc., New York City.—Granted special temporary authority to operate television broadcast experimental station W3XAD on **336-342 mc.** and **342-348 mc.** channels, for the period December 1 to December 30, 1939.

KSTP—National Battery Broadcasting Co., St. Paul, Minn.—Granted license to cover construction permit authorizing installation of auxiliary transmitter at present main transmitter site, using 1 KW power for auxiliary purposes only.

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted modification of construction permit approving transmitter site at Castle Hayne Road, New Hanover County, and installation of vertical radiator.

KFJZ—Tarrant Broadcasting Co., Fort Worth, Texas.—Granted license to cover construction permit authorizing installation of new equipment.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted license to cover construction permit authorizing installation of directional antenna for nighttime operation.

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted license to cover construction permit authorizing changes in equipment, increase in height of vertical radiator, change of frequency from **1200 kc.** to **1310 kc.,** and increase day power from 100 watts to 250 watts, and change time of operation from sharing WJBC to unlimited time.

KSAL—KSAL, Inc., Salina, Kans.—Granted modification of construction permit to make changes in directional antenna system, install new equipment, and extend commencement date to 60 days after grant and completion date to 180 days thereafter.

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Granted modification of license authorizing move of studio location to 4th floor, Kentucky Home Life Bldg., 5th and Jefferson Street, Louisville, Ky.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted authority to determine operating power by direct measurement of antenna input.

WMFG—Head of the Lakes Broadcasting Co., Hibbing, Minn.—Granted authority to determine operating power by direct measurement of antenna input.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted authority to determine operating power by direct measurement of antenna input.

WGTM—WGTM, Inc., Wilson, N. C.—Granted authority to determine operating power by direct measurement of antenna input.

WWRL—Long Island Broadcasting Corp., New York City.—Extended effective date of Provision (3) of the Commission's Order of December 5, 1938, in re WWRL and four other Brooklyn cases, for a period of 30 days from December 1, 1939.

Worcester County Broadcasting Corporation, Worcester, Mass.—Denied petition requesting that the Commission reconsider its action of October 21, 1939, which had the effect of denying to the petitioner intervention in re the application of C. T. Sherer Company, Inc., for a new station in Worcester, Mass., which had previously been permitted under orders of Commissioners Walker and Payne.

W8XK—Westinghouse Electric and Mfg. Co., Saxonburg, Pa.—Dismissed the protest of Westinghouse Electric and Manufacturing Company against the action of the Commission of May 11, 1938, in granting, without a hearing, the application of The Crosley Radio Corp. (W8XAL) for authority to use frequency **11870 kc.** on a time-sharing basis, under Rule 983, with international broadcast station W8XK.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 2 to 3 p. m., EST on December 9, 16, 23, 30 and January 6, 1940, in order to broadcast newscasts, musical programs and other features of public interest; to operate from 8:30 to 10 a. m. and from 2 to 3 p. m., on December 10, 17, 24, 31, 1939 and January 7, 1940, in order to broadcast religious services, newscasts and musical programs; to use all time not used by station WSVS between December 22 and January 1, in order to broadcast musical programs and newscasts.

WINS—Hearst Radio, Inc., New York City.—Granted special temporary authority to operate from 7 p. m. to midnight, EST, on December 11, in order to broadcast the Hearst Diamond Belt Boxing Finals only.

WJMC—Walter M. McGenty, Rice Lake, Wis.—Granted special temporary authority to operate from 7:45 to 9:45 p. m., CST, on December 21 (instead of December 22, as authorized by grant of November 25), in order to broadcast high school basketball games only.

WBAA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate from 7:15 to 10 p. m., CST, on December 7, 11, 13, 20, 21, 23, 27 and 28, in order to broadcast Purdue University basketball games only.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 7 to 9 p. m., EST, on December 8, 14, 29, 1939, and January 1, 1940, in order to broadcast basketball games only.

WILL—University of Illinois, Urbana, Ill.—Granted special temporary authority to operate simultaneously with WIBW and WCHS with power of 1 KW, from 7:25 to 9:25 p. m., CST, on December 6, 15, 18, 27, and from 8:45 to 10:45 p. m., CST, on December 29, in order to broadcast University of Illinois basketball games only.

KEX—Oregonian Publishing Co., Portland, Ore.—Granted special temporary authority to operate a portable 100-watt transmitter on the frequency of **1190 kc.**, in the vicinity of Portland, for a period not to exceed 30 days, for the purpose of making tests for a suitable transmitter location.

WBCW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted extension of special temporary authority to operate on the frequency **1200 kc.**, at present transmitter site, on December 12, in order to complete construction at approved site in accordance with permit.

WNEL—Juan Piza, San Juan, P. R.—Granted extension of special temporary authority to rebroadcast sustaining programs to be received from International Broadcast Stations WNBI and WRCA over station WNBI for the period December 6, 1939, to January 4, 1940.

WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted special temporary authority to operate with power increased to 2500 watts from midnight EST to the conclusion of Station WHBI's 15th Annual Christmas Campaign only, on December 10, 1939.

WMRC—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts from 7 p. m. to 10:30 p. m., CST, on December 9, 20, 29 and 30, in order to broadcast high school basketball games only.

APPLICATIONS FILED AT FCC

550 Kilocycles

KSD—The Pulitzer Publishing Company, St. Louis, Mo.—Construction permit for changes in directional antenna (day and night use), and change frequency from **550 kc.** to **630 kc.**, time from shares KFUO to unlimited; move transmitter from northeast corner 12th and Olive Sts., St. Louis, Mo., to St. Clair and Warren Aves., Nameoki, Ill., contingent on KFRU and WGBF. Requesting the facilities of KXOK. Amended to make changes in antenna, increase night power from 1 KW to 5 KW, and give transmitter site as Chouteau Twp., 4 miles west of Mitchell, Ill.

570 Kilocycles

WWNC—Asheville Citizens-Times Co., Inc., Asheville, N. C.—Construction permit to install new transmitter, directional antenna for night use; increase power from 1 to 5 KW; and move transmitter from 20 Battery Park Place, Asheville, N. C., to Emma and Maple Crest Road, near Emma, N. C.

580 Kilocycles

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Construction permit to make changes in auxiliary transmitter.

680 Kilocycles

WPTF—WPTF Radio Co., Raleigh, N. C.—Extension of special experimental authority to operate from local sunset at KPO to 11 p. m., EST, using directional antenna, for period 2-1-40 to 2-1-41.

710 Kilocycles

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Extension of special experimental authority for transmission of facsimile signals from 1 a. m. to 6 a. m., EST, using 50 KW power, for period 2-1-40 to 2-1-41.

770 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension of special experimental authority to operate synchronously with KFAB from local sunset (KFAB's LS at Lincoln, Nebr.) to midnight, CST, period 2-1-40 to 2-1-41.

810 Kilocycles

NEW—The Fort Industry Co., Toledo, Ohio.—Construction permit to erect a new broadcast station on **810 kc.**, 1 KW power, daytime operation.

850 Kilocycles

WKAR—Michigan State College, East Lansing, Mich.—Modification of construction permit (B2-P-1767) as modified for increase in power, new equipment, new antenna, and move of transmitter, further requesting authority to install new transmitter. Amended to request extension of completion date to 1-31-40.

980 Kilocycles

KDKA—Westinghouse Electric & Manufacturing Co., Pittsburgh, Pa.—License for auxiliary transmitter.

1000 Kilocycles

WHO—Central Broadcasting Co., Des Moines, Iowa.—Extension of special experimental authority for transmission of facsimile signals from midnight to 6 a. m., CST, using 50 KW power, for period from 2-1-40 to 2-1-41.

1010 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1040 Kilocycles

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—Construction permit to install new transmitter, directional antenna for night use; change frequency from **1040 kc.** to **1060 kc.**; increase power from 10 to 50 KW, hours of operation from shares KRLD to unlimited time; and move transmitter from Hot Springs National Park, Ark., to Highway 67, Reyburn, Ark.

1060 Kilocycles

KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Extension of special experimental authority to operate on **1060 kc.**, simultaneously with WBAL, from 6 a. m. to local sunset daily, suspend until 8 p. m., and unlimited then to midnight, period beginning 2-1-40.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Extension of special experimental authority to operate simultaneously with KTHS on **1060 kc.** from 6 a. m. to local sunset at Hot Springs, and operate from local sunset at Hot Springs to 9 p. m., EST, on **1060 kc.** and operate synchronously with WJZ on **760 kc.**, with power of 2½ KW, using directional antenna, from 9 p. m., EST, period 2-1-40 to 2-1-41.

1080 Kilocycles

WCBD—WCBD, Inc., Chicago, Ill.—Modification of license to change frequency from **1080 kc.** to **830 kc.**, and hours of operation from unlimited, share WMBI, to daytime only, using 5 KW.

1160 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Construction permit to make changes in equipment, install directional antenna for day and night use, increase power from 10 to 50 KW, and change hours of operation from simultaneous day and shares night with WWVA to unlimited time.

1200 Kilocycles

KADA—C. C. Morris, Ada, Okla.—Modification of license to move main studio from 115½ South Rennie St., Ada, Okla., to Highway No. 48, 1 mile north of Ada, Okla.

NEW—Hazlewood, Inc., Orlando, Fla.—Construction permit for a new broadcast station to be operated on **1390 kc.**, 500 watts, 1 KW day power, unlimited time. Amended to request **1200 kc.**, 250 watts power, make changes in equipment, and antenna and transmitter site to be determined, Orlando, Fla.

WMOB—S. B. Quigley, Mobile, Ala.—License to cover construction permit B3-P-1983 as modified for a new station.

WMOB—S. B. Quigley, Mobile, Ala.—Authority to determine operating power by direct measurement of antenna power.

KADA—C. C. Morris, Ada, Okla.—Construction permit to make changes in equipment, increase power from 100 to 250 watts.

NEW—J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Construction permit for a new broadcast station to be operated on **1200 kc.**, 250 watts power, unlimited time.

1210 Kilocycles

KLAH—Barney Hubbs, A. J. Crawford, Jack Hawkins, Harold Miller, d/b as Carlsbad Broadcasting Co., a partnership, Carlsbad, N. Mex.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Construction permit to make changes in equipment and increase power from 100 to 250 watts.

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Modification of construction permit B3-P-2444 for a new station, requesting approval of antenna and approval of studio and transmitter site at 51 East First St., Fort Myers, Fla., and increase in night power from 100 to 250 watts. Amended to make changes in antenna.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Modification of construction permit B3-P-2419 for change in frequency, increase in power, new transmitter and antenna, move of transmitter, requesting approval of antenna and approval of transmitter site at Albert Pike, 0.6 mile north of O St., Fort Smith, Ark., and install new transmitter.

KOCA—Oil Capitol Broadcasting Assn., Kilgore, Tex.—Construction permit to move transmitter locally and make changes in antenna.

WHIZ—WALR Broadcasting Corp., Zanesville, Ohio.—License to cover B2-P-2420 for new antenna and move of transmitter.

NEW—Watertown Broadcasting Corporation, Watertown, N. Y.—Construction permit for a new broadcast station to be operated on **1420 kc.**, 100 watts night and 250 watts day power, unlimited time. Amended to change requested frequency from **1420 kc.** to **1210 kc.**, power to 250 watts, make changes in antenna and change type of transmitting equipment, and give transmitter site as Hoard St. and Starbuck Ave., Watertown, N. Y.

WOCB—Harriett M. Alleman and Helen W. MacLellan, d/b as Cape Cod Broadcasting Co., near Hyannis, Mass.—Modification of construction permit B1-P-1140 as modified for a new station, requesting extension of completion date from 1-1-40 to 5-1-40.

1240 Kilocycles

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—License to cover construction permit B2-P-2424 for new transmitter, changes in antenna, move of transmitter, and increase in daytime power. Amended re Section 5.

1260 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Authority to determine operating power by direct measurement of antenna power.

KOIL—Central States Broadcasting Co., Omaha, Nebr.—Authority to transfer control of corporation from Sidles Company, to Star Printing Co., 1 share common stock.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—License to cover construction permit B3-P-1764 as modified, for move, new equipment, antenna and increase in daytime power.

1280 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Construction permit to install directional antenna for night use, increase power from 1 KW; 5 KW day to 5 KW day and night, and move transmitter from Brainerd Community, Hamilton County, Tenn., to 2 miles from city limits, S. Westerly direction, Dixie Highway, State 27, Chattanooga, Tenn.

1310 Kilocycles

WCLS—WCLS, Inc., Joliet Twp., Ill.—License to cover construction permit B4-P-2404, for move of transmitter, changes in transmitting equipment, and changes in antenna.

WCLS—WCLS, Inc., Joliet, Ill.—Authority to determine operating power by direct measurement of antenna power.

KRMD—Radio Station KRMD, Inc.—Shreveport, La.—Authority to determine operating power by direct measurement of antenna power.

WDMJ—The Lake Superior Broadcasting Co., Marquette, Mich.—Modification of license to change hours of operation from specified hours to unlimited time.

1370 Kilocycles

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—License to cover construction permit B3-P-1954, as modified, for a new broadcast station.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Authority to determine operating power by direct measurement of antenna power.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Modification of license to increase power from 100 watts; 250 watts day to 250 watts power day and night.

KTUC—Tucson Motor Service Co., Tucson, Ariz.—Modification of license to increase power from 100 watts; 250 watts day to 250 watts day and night.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Modification of license to change hours of operation from unlimited day, specified hours night, to unlimited (simultaneous with KGFL from local sunset to 7:30 p. m., MST).

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Authority to determine operating power by direct measurement of antenna power.

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—License to cover construction permit (B3-P-2390) as modified for a new station.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—License to cover construction permit B3-P-2567, for equipment changes and increase in power.

NEW—C. P. Edwards, Jr., & Howard Long, d/b as Kingsport Broadcasting Co., Kingsport, Tenn.—Construction permit to erect a new broadcast station to be operated on **1370 kc.**, 250 watts power, unlimited time.

1420 Kilocycles

WGPC—Albany Broadcasting Co., Inc., Albany, Ga.—Construction permit for equipment changes and increase in power from 100 to 250 watts.

NEW—Richard T. Sampson, Riverside, Calif.—Construction permit for a new broadcast station to be operated on **1420 kc.,** 250 watts power, unlimited time.

1430 Kilocycles

WMPS—Memphis Broadcasting Co., Memphis, Tenn.—Construction permit for changes in equipment.

1440 Kilocycles

WCBA—Lehigh Valley Broadcasting Co., Allentown, Pa.—Construction permit to install new transmitter, install directional antenna for day and night use, increase power from 500 watts to 5 KW.

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Construction permit for a new transmitter, directional antenna for day and night use, and increase in power from 500 watts to 5 KW.

1490 Kilocycles

KFBK—McClatchy Broadcasting Co., Sacramento, Calif.—Extension of special experimental authorization for transmission of facsimile signals from midnight to 6 a. m., PST, using 10 KW power, period 2-1-40 to 2-1-41.

1500 Kilocycles

WCNW—Arthur Faske, Brooklyn, N. Y.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

NEW—Albert Joseph Meyer, Powell, Wyo.—Construction permit to erect a new broadcast station to be operated on **1500 kc.,** 250 watts power, unlimited time.

NEW—J. Leslie Doss, Bessemer, Ala.—Construction permit to erect a new broadcast station to be operated on **1500 kc.,** 250 watts power, unlimited time.

KNOW—Frontier Broadcasting Co., Inc., Fort Worth, Tex.—License to cover construction permit B3-P-2436 as modified for increase in power, move of transmitter, and installation of new equipment.

KPLT—The North Texas Broadcasting Co., Paris, Tex.—Authority to transfer control of corporation from A. G. Mayse to Mary Jo Mayse, 45 shares common stock.

MISCELLANEOUS

NEW—Central New York Broadcasting Corporation, Syracuse, N. Y.—Construction permit for a new high frequency broadcast station to be operated on **43200 kc.,** 1 KW power, unlimited time, special emission. To be located in or near Syracuse, N. Y.

WENP—WSOC, Inc., Portable-Mobile.—Construction permit to make changes in equipment.

W9XYH—Head of the Lakes Broadcasting Co., Superior, Wis.—Modification of construction permit B4-PHB-75 as modified for changes in equipment.

WEKQ—Allen T. Simmons, Akron, Ohio.—Modification of license to increase power from 25 watts to 100 watts.

W2XQR—John V. L. Hogan, Long Island, N. Y.—License to cover construction permit, B1-PHB-66, as modified, for a new high frequency broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Continental Baking Company—A complaint has been issued charging Continental Baking Company, New York, which operates plants in 28 States, with price discriminations in violation of the Robinson-Patman Act.

In certain trade areas the respondent company is alleged to sell its bread of like grade and quality and of a definite weight at one price, while at the same time in another trade area served from the same plant, it sells the same type of bread and of the same weight at a lower price. And, the complaint continues, in certain trade areas the respondent sells bread of the same grade and quality and of a definite weight at one price, while, at the same time, in another trade area served from the same plant, it sells bread of the same grade and quality, but greater in weight, for the same price as the bread of less weight.

Illustrating these practices, the complaint alleges that the respondent company, serving its Louisiana and Texas retail customers from its plant in Shreveport, La., charged 10 cents for 24 ounces of bread prior to February, 1939, but that subsequent to that time, while still charging its Shreveport area customers 10 cents for its 24-ounce loaf, from the same plant delivered the 24-ounce loaf to customers in the Marshall, Tex., area for 8 cents a loaf.

From its plant in Kansas City, Mo., the complaint continues in another illustration, the respondent served its Missouri and Kansas retail customers, the prevailing price prior to December, 1938, having been 8 cents for a 20-ounce loaf. It is alleged that subsequent to that time the respondent continued to sell the 20-ounce loaf for 8 cents in the Kansas City area while from the same plant it sold a 24-ounce loaf of the same quality bread for 8 cents to customers in the Leavenworth and Osawatomie, Kans., areas.

This type of discrimination, it is alleged, may result in a substantial lessening of competition and tend to create a monopoly in the Continental Baking Company. (3962)

Fellom Publishing Company—A complaint has been issued against Roy Fellom, trading as Fellom Publishing Company, San Francisco, alleging misleading representations in the sale of advertising space in the "Pacific Road Builder and Engineering Review."

The respondent is alleged to have represented to prospective buyers of advertising space, including manufacturers and others selling equipment materials and commodities, that the "Pacific Road Builder and Engineering Review" is circulated only to equipment buyers and has no circulation to non-buyers; that a survey has been made of the equipment buyers in the eleven Western States in which the magazine is principally circulated; that the magazine goes to 93 per cent of the equipment buyers in those States and that it is circulated to 93 per cent of heavy construction equipment buyers based on the number of such buyers and to 98 per cent thereof based on volume of purchases in the eleven states.

Among other representations alleged to have been made by the respondent were that the magazine had a total average monthly net paid circulation of 5,129 and a total average monthly distribution of 6,289 for the last six months of 1937, and a total average monthly net paid circulation of 4,583 and a total average monthly distribution of 5,625 for the first six months of 1938.

The statistics furnished are alleged to be misleading in that they overstate the volume of circulation and give an erroneous idea of the value of the magazine as an advertising medium based on possible results and also of the correctness of the prices charged for advertising space therein based on the represented extent of such circulation.

The complaint alleges that the criculation of the respondent's magazine is not restricted exclusively to buyers of equipment; that no accurate and dependable survey has been made by or for the respondent as the basis for the figures given in regard to coverage of equipment buyers, and that his statements with respect to circulation among equipment buyers in eleven Western States and other circulation statistics as given are inaccurate and exaggerated. (3960)

M. Seidel & Son—Alleging misrepresentation and the use of lottery methods in the sale of furs and fur garments, a complaint has been issued against Maurice and Charles Seidel, trading as M. Seidel & Son, 243 West 30th St., New York.

The respondents are alleged to have sold women's articles of apparel made from rabbit peltries so dressed and dyed as to resemble fur products made from the peltries of seal, beaver, leopard, ermine, mink, squirrel, sable or karakul sheep. It is alleged that the respondents failed to disclose the true zoological names of such furs and fur products so sold but instead misrepresented them by means of misleading and deceptive designations such as "Black Seal," "Mendoza Beaver," "Leopardine," "Erminette," "Squirrelette," and other names.

The respondents are also charged with disseminating advertisements suggesting that salesmen selling their products can earn $1300 a week or more, and that an investment of $12 would bring $1300. Use of a push card lottery plan to promote the sale of fur products to ultimate consumers, also is alleged. (3961)

CEASE AND DESIST ORDER

The Commission has issued the following cease and desist order:

Diamond Knitting Mills, Inc.—Prohibiting misleading representations in the sale of knitted wearing apparel an order has been issued to cease and desist against Diamond Knitting Mills, Inc., 7th and Green Sts., Philadelphia.

Among representations found to have been made by the respondent corporation were that certain of its products were composed entirely of unweighted silk, that is, silk which had not been subjected to a metallic bath, when in fact these articles were made of weighted silk.

On cloth tags or labels the respondent was found to have printed the following language: "Genuine * * * All Silk," and in a diamond figure the words "Diamond Knit," the diamond having been inserted between the words "Genuine" and "All Silk."

The order directs the respondent to cease using the term "All Silk" or the unqualified word "Silk" to designate fabrics not made wholly from unweighted silk.

The respondent is prohibited from representing that fabrics composed wholly or partly of weighted silk are composed of unweighted silk, through failure to disclose the presence and percentage of weighted silk and the percentage of weighting in such weighted silk. The order provides that the word "Silk" may be used to refer to the silk content of such fabrics when the disclosures mentioned above are clearly and conspicuously made in connection with that word. (3877)

STIPULATIONS

The Commission entered into the following stipulations:

Vincent Christina, Inc., 215 East 22d St., New York, manufacturer of a pharmaceutical product designated "Thiosol," agrees to desist from describing or referring to its product "Thiosol," or any product of similar composition, as being a chemically true solution of colloidal sulphur, or from implying that the product contains colloidal sulphur only, when any other ingredient not true colloidal sulphur is present. (2596)

Merchandising Associates, Inc., 322 East Colfax Ave., South Bend, Ind., manufacturers of "Karmalax," a compound used in the making of bread, has agreed to cease advertising or representing its product, through use of the trade name "Karmalax" or the letters "lax," or in other ways, to be a laxative or as having laxative qualities. The corporation also agrees to cease representing that "Honey-Krushed Bread" relieves constipation or possesses qualities that will relieve or cure constipation. (2594)

Midland Television, Inc., Kansas City, Mo., conducting residence and correspondence courses in radio, television and airline radio operation, entered into a stipulation to discontinue misleading representations.

In its advertising matter, according to the stipulation, the respondent corporation published composite illustrations of the Kansas City Power and Light Building, in which the school occupies several of the upper floors, and the KMBC broadcasting tower, so arranged in some instances as to create the illusion that the buildings are contiguous to each other, when in fact they are some five miles apart; and letterheads featured a similar picture with the conspicuously printed corporate name "Midland Television, Inc."

This illustrated matter was misleading insofar as it tended to convey the impression to prospective pupils that the entire building was occupied by the respondent corporation and that the tower belonged to the school, according to the stipulation.

The respondent corporation agreed to cease making such representations and to discontinue disseminating advertising matter which tends to convey the impression that students are virtually assured of employment upon completing their radio work at the school. The respondent also stipulated that it would desist from the representation that any person connected with the school's "technical staff" is a "member of the Institute of Radio Engineers," when such is not a fact, and from representing that the sole purpose of "Midland Training" is to help students make more money. (2597)

Universal Art Association—Rodney R. Williams, sole trader as Universal Art Association, 102 South Jefferson St., Chicago, in connection with the sale and distribution of tinted photographs, agrees to cease use of the word "Association" or any similar term to imply or cause the belief that a personal business enterprise is a voluntary association of individuals or organized for the prosecution of some purpose. He will cease representing that colored or tinted photographs or photographic enlargements are paintings, oil paintings, or "finely finished paintings"; that a drawing for a "lucky" certificate or other similar devices used in the sale of his products, is for the purpose of introducing a new type of painting or to advertise his business, or that such drawings, coupons, special discount checks or similar devices entitle customers to receive pictures free or at a substantial reduction; that funds collected through the sale of such pictures are to be used for the purchase of brushes and paints for college students, or any other purpose other than the personal aggrandizement of the respondent; and will discontinue use of coercive methods to induce purchase of special frames, through refusal to deliver paid-for pictures or original photographs loaned to him for reproduction. (2595)

FTC DISMISSES COMPLAINT

The Federal Trade Commission has ordered that the complaint against W. W. Kimball Co., 306 South Wabash Ave., Chicago, its sales manager, Ben F. Duvall, and George H. Kranz, one of its employees, and Victor G. Williams, trading as Williams Music Store, 30 East Broad St., Columbus, Ohio, charging misrepresentation in the sale of pianos, be dismissed.

NAB Reports

1626 K STREET, N.W. WASHINGTON, D. C. Vol. 7, No. 50, December 15, 1939

MERRY CHRISTMAS

More Broadcast Music, Inc., Pledges As Miller Continues Trip

Continuing the drive to free the industry from the strangle hold of the ASCAP monopoly, Neville Miller, president of the NAB, held district meetings in Omaha, Denver, Minneapolis and Tulsa in the past week, following those held in Dayton and South Bend, to acquaint NAB members and non-member stations with the prospectus of Broadcast Music, Inc., and to receive stock subscriptions in the new corporation being set up to develop sources of usable music independent of ASCAP.

In Tulsa, 21 out of 18 stations present subscribed. In Denver the 14th NAB District passed the following resolution:

> "Resolved that the membership of the 14th District adopt and approve the plan for the subscription of stock in Broadcast Music, Inc., as presented by President Neville Miller, and sign up immediately the agreements for the purchase of stock and license contracts submitted to stations."

Of the 23 stations present, 21 approved the resolution and signed the subscription. Ed Craney, KGIR and KPFA, did not vote on the resolution and voiced objections to the plan. He also spoke against the plan in Omaha, where 16 out of 27 present signed. In

(Continued on page 3892)

AN IMPORTANT NOTICE

In order to expedite the subscriptions to Broadcast Music, Inc., the following three important points are called to the attention of all stations in those districts where meetings have been held:

1. Sign one copy of the stock agreement, giving the figure which represents 10% of your 1937 ASCAP payment. This is important as stock is sold in $5.00 per share units.
2. Make checks for the above stock subscription payable to Broadcast Music, Inc., and mail in to NAB Headquarters in Washington, D. C.
3. Sign two copies of the license agreement. Under paragraph two thereof, the figure should be 40% of your 1937 payments to ASCAP. This figure constitutes the license fee, no part of which is due at the present time.

MORE BROADCAST MUSIC, INC., PLEDGES AS MILLER CONTINUES TRIP

(Continued from page 3891)

Minneapolis 16 station out of 21 present signed the agreement at the meeting.

In the columns below is printed a list of those stations which have already bought the stock or which have actually committed themselves to do so. Because every mail brings in more signed subscriptions, it is impossible to give a complete list in this week's bulletin. The list published, however, is complete up until noon, Thursday, December 14.

In Omaha, Rev. W. A. Burk, manager of WEW, vigorously attacked the NAB Code. Don Searle, KOIL, Omaha, a member of the Code Compliance Committee, replied. In a show of hands the members present voted their approval of the Code, four to one.

Mr. Miller's trip to the south, southwest, the Pacific Coast and the northwest will be resumed immediately after the Christmas holidays.

Stations which have already signed stock subscriptions or which have actually committed themselves to sign:

SUPREME COURT GRANTS WRIT

Supreme Court of the United States this week granted a writ of certiorari to the Federal Communications Commission in the case of Sanders Brothers Radio Station against the Commission.

The Communications Commission on July 2, 1937, entered an order granting the application of the Telegraph Herald (call letters KDTH) for a new broadcast station at **Dubuque, Iowa,** to operate on **1340 kilocycles,** 500 watts, daytime.

Sanders Brothers, licensee of Station WKBB, **East Dubuque, Illinois,** in appealing the decision to the Court of Appeals of the District of Columbia claimed expected economic injury from the grant to the Telegraph Herald, which contention was sustained by the Court of Appeals. The Communications Commission asked for review of the lower court's decision which has just been granted by the Supreme Court.

COURT DISMISSES APPEALS AGAINST FCC DECISIONS

The Court of Appeals of the District of Columbia on Monday dismissed the appeals of WOKO and Adirondack Broadcasting Co. from the decision of the Federal Communications Commission granting the application of Troy Broadcasting Co. for a permit to construct a broadcast station at Troy, N. Y.

Radio Christmas Promotion Successful in all Sections 3894
"Radio's Riches" Enthusiastically Received 3895

The reason assigned for appeal was that: "The Commission in erroneously granting the application of the Troy Broadcasting Company, Incorporated, illegally deprives appellant of a large portion of its listening audience, talent, program material and advertising revenue, with resultant deterioration of program service now rendered by appellant's station." The Court held that this was not sufficient to bring appellants within the terms of section 402 (b) (2) of the Communications Act, as persons agrieved, or whose interests are adversely affected by the Commission's decision. In its opinion the Court laid down the rule that no showing of injury, suffered or threatened, would be sufficient unless it also appeared that, as a result of such injury, the public interest, convenience or necessity would suffer.

The Court cited as authority, Yankee Network v. Federal Communications Comm. (decided August 14, 1939, NAB Reports, August 25, 1939), wherein the Court was able to spell out a sufficient statement of reasons for appeal to present the issue. It distinguished Tri-State Broadcasting Co. v. Federal Communications Comm., (decided November 13, 1939, NAB Reports, November 17, 1939) where it did not appear that the expected competition would immediately or ultimately result in such a reduction of income to Tri-State as to require deterioration of its service to the listening public, saying that "it by no means follows that an appealable interest is necessarily shown even though an existing licensee may suffer such a reduction in income as will cause deterioration of its service. The question in each case is one of public interest . . . It is quite possible that the public interest may be better served by the coming of a new broadcasting station into the community, even though the result may be some reduction in income and some deterioration in the service of the appellants' stations."

In Florida Broadcasting Co. v. Federal Communications Comm.; The Metropolis Company, intervener, decided the same day, the Court denied the Commission's motion to dismiss Florida Broadcasting Co's. appeal on the ground that the statement of reasons for appeal was sufficient, denying the Commission's argument that the statement of reasons for appeal must be in the nature of a bill of particulars.

FCC CONCLUSIONS CHANGED IN PHOENIX CASE

The Federal Communications Commission has ordered that the Proposed Finding of Fact and Conclusions issued

December 1 in the application of M. C. Reese for a construction permit for a new broadcast station at Phoenix, Arizona, to operate on 1200 kilocycles, 100 watts night, 250 watts until local sunset, unlimited time, be recalled and set aside and that new Proposed Findings of Fact and Conclusions be issued.

FREE OFFERS

All members are asked to read carefully the Bureau of Radio Advertising bulletin dated December 12, covering the recent "free offer" activities of the American Express Company and Macfadden Publications.

Other free offers reported by member stations during the past two weeks include:

The American Booksellers Association.

The American Bible Society.

COST-PER-INQUIRY

The following agencies have recently sought to place radio advertising with member stations on a percentage basis:

Harry M. Miller, Inc.

Weill & Wilkins (on behalf of Air Conditioning Training Corporation).

The Bureau of Radio Advertising has advised the above firms that NAB stations consider acceptance of their propositions bad business practice, and has invited their use of radio on a regular basis. The advertisers, the Bureau stated, will then find that stations are willing to cooperate 100% and that the improved results will more than justify the expenditure.

812 STATIONS

The Federal Communications Commission issued operating licenses to five stations during the month of November, 1939. One operating station was deleted and four construction permits were issued for the construction of new stations. A comparative table by months, giving the number of operating stations and number of construction permits issued, follows:

	Jan. 1	Feb. 1	Mar. 1	April 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1
Operating	722	727	729	732	734	735	735	738	739	743	751	755
Construction	42	39	37	37	38	38	43	56	59	57	58	57
	764	766	766	769	772	773	778	794	798	800	809	812

LABOR NOTES

The Labor Relations Board has ordered an election among the technicians of Station WQXR, New York City, to determine whether they wish to be represented by the International Brotherhood of Electrical Workers (A. F. of L.) or the American Communications Association (C. I. O.)

Broadcasters negotiating labor contracts for the first time, as well as veteran negotiators, could read with profit "The Collective Labor Agreement" by Elias Leiberman. (Harper and Brothers, $3.) Although the author is counsel for the International Ladies Garment Workers Union and the book must be read in that light, there are many valuable suggestions, especially in Chapter IV. The "sample clause" section is an invaluable aid.

NAB BUREAU OF ADVERTISING'S THIRD SUCCESS STORY

Vol. 1, No. 3 of "Results from Radio" has been released to NAB members by the Bureau of Radio Advertising. This is the third in the series of success stories and trade studies planned by the Bureau for local sales and promotion use.

The 4-page folder outlines the case history of Burt's, in Cleveland, Ohio, who have employed radio advertising extensively for 9 years to build a unique business consisting of jewelry and optical department, furniture shop, and men's and women's clothing. Mr. L. O. Klivans, President of Burt's, documents the story with the statement that "Radio has built Burt's into the only store of its kind in the world." Extra copies of the first three studies in the "Results from Radio" series are available to members at cost, on request to the Bureau of Radio Advertising. Previous releases covered department stores and laundries.

Radio Christmas Promotion Successful in All Sections

The radio industry's Christmas promotion has caught on in every section of the country with many station managers resorting to additional exploitation measures.

The last of the extra supply of scripts for the three 15-minute NAB Christmas programs were exhausted last Wednesday when WGAR, Cleveland, wired for additional copies.

The Christmas promotion in Syracuse over WSYR is proving highly satisfactory to station and public, according to Arnold Schoen, service director. Everyday for the three weeks preceding Christmas the station is using part of its space in the Syracuse Herald to plug "Give a Radio This Year." The campaign is supported with an ample announcement schedule over the air.

Major Edney Ridge of WBIG, Greensboro, gladdened the hearts of radio dealers throughout the area served by his station by furnishing huge Window displays on which were displayed large photographs of twenty-four artists.

Ellis Atteberry, general manager, KCKN, struck gold in Kansas City, Kans., and Kansas City, Mo. He scheduled all three Christmas scripts and additionally a minimum of four 1-minute daily announcements for the three weeks preceding Christmas.

A letter to every radio distributor and dealer in the two cities asked only that they exert every effort to sell the maximum number of radio sets during December.

Four network shows per week over National Broadcasting Company—Red and Blue stations are carrying the story of Radio Christmas to millions of people. Dr. O. H. Caldwell, editor, Radio Today, who is featured on NBC Red, Friday evenings, at 7:45, began his discussion of radios as Christmas gifts as early as December 1 and plans to continue this discussion right through the December 22 broadcast.

In a number of cities member stations and local chapters of the Radio Servicemen of America are engaged in a joint endeavor to provide radio sets for the unfortunate. Parts and tubes needed to put the used sets into operating condition are contributed by the local jobbers.

In Cleveland according to Carl George, WGAR program director, the sets after being repaired by the servicemen are distributed through the Cleveland Welfare Federation to institutions and shut-ins.

A similar campaign is in progress in Minneapolis. Initial announcements soliciting new sets for listeners began December 1, according to C. T. Hagman, of WTCN.

Additional impetus to the December promotion was given by public utilities which included in their December bills a stuffer suggesting that radio sets be purchased as Christmas gifts.

With all of the varied and diverse promotions that are being carried on to increase radio listening, it is certain that radio is scoring a sharp advance over the preceding year.

With judicious exploitation on portable sets and automobile radios during early 1940 and assuming good programs, it would seem that the summertime radio audience would closely coincide with the winter audience.

"RADIO'S RICHES" ENTHUSIASTICALLY RECEIVED

As the spear-head of the industry's 1940 public relations campaign, the sixteen-page rotogravure booklet "Radio's Riches" has been enthusiastically received by stations throughout the country.

Members who contemplate an early New Year use of the booklet are requested to send in their orders as quickly as possible in order to be included in the first printing run.

The booklet is billed at $11 per thousand, and individual changes of copy for station promotion and advertising may be secured at the following price: Your individual copy imprinted over tint block on back cover with copy equivalent to name and address—base price $11 per thousand—plus $1.50 per order for composition and lockup—plus $1.25 per thousand for running. For your own copy on entire back cover, base price of $11 per thousand—plus $5.50 per order for composition and lockup—plus $1.25 per thousand for running. If halftones are used, supply 85-line screen.

BROWN REPORTS ON GREAT LAKES RADIO NEEDS

Present radio communication facilities of shipping on the Great Lakes and coastal waters do not adequately protect life and property, Commissioner Thad H. Brown reported to the FCC this week in recommending legislation and other regulation to insure better safeguards.

For ships on the Great Lakes, a uniform system of radiotelephony is proposed. This would be established by formal agreement between the United States and Canada, supplemented by legislation of the respective countries, to take effect for the 1942 navigation season.

George Harm

George Harm, owner of Station KARM, died suddenly at his home in Fresno, California, on Monday, December 11. Mr. Harm was well known in the broadcasting industry on the Pacific Coast and his sudden death was a great shock to his many friends.

CLEVELAND TO GET FCC FIELD OFFICE

Establishment of a permanent field office at Cleveland, Ohio, effective January 1, has been ordered by the Federal Communications Commission. It will be located in quarters used for the Commission's Great Lakes and Inland Waters Survey, now completed. This office will be a sub-office of the main district headquarters office at Detroit, and will be manned by one inspector and an assistant to be transferred there.

The Cleveland office is made necessary by the fact that in the past fiscal year inspectors from the Detroit office, besides making regular inspections of broadcast, police, aeronautical, and other radio stations in the Cleveland area, made regular trips to Cleveland to examine 734 applicants for radio operator licenses.

JAMES C. YOUNG

Information is desired concerning the present whereabouts of James C. Young. Mr. Young was formerly connected with WSAL, Salisbury, Maryland. Any one having information, please communicate with Headquarters Office.

MECHANICAL REPRODUCTIONS

Radio Transcription Producers Association of Hollywood, Inc., has filed a petition with the Federal Communications Commission to amend Rule 3.93, dealing with mechanical reproductions. The petition signed by Gerald King, president of the association is as follows:

"Comes now, Radio Transcription Producers Association of Hollywood, Inc., by their attorney, and respectfully petitions the Commission to amend Rule 3.93 by: (1) eliminating the said rule entirely or (2) amend the same as follows:

3.93 (a) Eliminate therefrom the following words, "At the beginning of the program, at each 15 minute interval and"

3.93 (b) Eliminate therefrom the following words, "Beginning and"

3.93 (c) Eliminate therefrom the following word, "Preceding" and substitute in its place, "Following"

In support of this petition, it is respectfully submitted that this section has grown obsolete and is of no value to the listening public and should be entirely eliminated.

The public is only interested in the substance and quality of the program broadcast and whether it comes from a transcription made by live talent or comes by means of mechanical devices such as a transmitter and wire line of live talent, makes no difference to the listening public.

The more recent perfection of mechanical transcriptions tended to make the quality of both types of programs similar and the effect upon the listening public would be almost indistinguishable.

In event the Commission feels that the entire elimination of Rule 3.93 would be inadvisable at this time, then the aforesaid amendment should be adopted, thereby giving the public notice of the type of program which it has just received. There appears to be no good reason at this time to continue to notify the public in the beginning of all transcriptions to the effect that the following program is a transcribed program.

This places a handicap upon the transcription that is unfair and unnecessary and works to the disadvantage of transcription over live talent programs for which there is no sound reason.

The public has the privilege of listening to the program of its choice and whether it be live talent or transcription, the latter should not be penalized by reason of the fact that the broadcasting station has chosen this type of program as being superior to live talent. This amendment, if adopted, would also inform the public as to speeches and other spot announcements of important events which were taken at one time and broadcast at a later date.

It is, therefore, respectfully requested that the Commission give serious consideration to these amendments in their coming report on the monopoly hearing (Order No. 37, Docket No. 5060) and that the said Rule 3.93 be entirely eliminated or amended as proposed hereinbefore."

FCC APPROPRIATIONS

Federal Communications Commission officials appeared before the House of Representatives' Appropriations Committee in Executive Session on Wednesday in connection with appropriations for the coming fiscal year beginning July 1, 1940.

The Commission asked the Bureau of Budget for $3,115,000 for the new fiscal year but was allowed only $2,100,000, which is $300,000 more than the current appropriation. Of the $300,000 additional $150,000 will be for personnel and the other $150,000 for modernizing its monitoring system.

FCC RULES AND REGULATIONS

Parts of Federal Communications Commission Rules and Regulations are now available in printed form at the Superintendent of Documents, Government Printing office, Washington, D. C.

Only certain parts have been printed and when the other parts will be available is not yet known. Part 1, dealing with Rules and Practice and Procedure, and part 61, Tariff—Rules Governing the Construction, Filing and Posting of Schedules of Charges for Interstate and Foreign Commerce, are available at 10 cents each, and the following parts are available at 5 cents each: part 3, Rules Governing Standard Broadcast Stations; part 10, Rules Governing Emergency Radio Services; part 11, Rules Governing Miscellaneous Radio Services; part 14, Rules Governing Radio Stations in Alaska (Other than Amateur and Broadcast); and part 41, Telegraph and Telephone Franks.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDER

The Federal Communications Commission has announced a final order denying the application of KROC, **Rochester, Minnesota,** to change its operating assignment from **1310 kc.** to **920 kc.,** and increasing its power from 250 watts day, 100 watts night, to 1,000 watts day, 500 watts night, unlimited time, using a directional antenna at night. The Commission found that the granting of the application would not serve public interest.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearing is scheduled before the Commission in a broadcast case for the week beginning Monday, December 18. It is subject to change.

Monday, December 18

To Be Heard Before Commissioner Thad H. Brown

WSAL—Frank M. Stearns, Salisbury, Md.—In re: Revocation of station license of WSAL.

FUTURE HEARING

During the week the Commission has announced the following tentative date for a broadcast hearing. It is subject to change.

February 12

NEW—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—C. P., **1310 kc.,** 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, Hawaii.—Granted modification of construction permit to change name of station from Honolulu Broadcasting Co., Ltd., to Hawaiian Broadcasting System, Ltd., and increase in night power from 1 KW to 5 KW.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Granted construction permit to install new equipment and increase power from 100 watts to 250 watts.

WRPM—Radio Air Service Corporation (Cleveland, Ohio—WHK area), Portable-Mobile.—Granted voluntary assignment of construction permit for relay broadcast station WRPM from the Radio Air Service Corp. to the United Broadcasting Company.

KHBG—Okmulgee Broadcasting Corporation, Okmulgee, Okla.—Granted construction permit to make changes in equipment and increase in power and time of operation from 100 watts, daytime only, to 250 watts, unlimited time.

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Granted construction permit to install new equipment and increase power from 100 watts to 250 watts.

WBOS—Westinghouse Electric and Manufacturing Co., Millis, Mass.—Granted modification of license of international broadcast station WBOS for additional frequencies **6140, 15210,** and **21540 kc.,** sharing time on all frequencies with WPIT.

WSB & WEGG—The Atlanta Journal Co., Atlanta, Ga.—Granted authority to transfer control of the Atlanta Journal Company, licensee of broadcast station WSB (operating on **740 kc.,** with 50 KW, unlimited time), and relay broadcast station WEGG, from 29 stockholders who now own all of the common voting stock, to (1) James M. Cox, (2) Springfield Newspapers, Inc., and (3) The Evening News Publishing Co., for a total consideration of $1,826,125. (In addition Mr. Cox also agrees to purchase 100% of the preferred non-voting stock—1,175.6 shares of $100 par value per share now held by 36 stockholders, for a consideration of $117,560.)

KOIN—KOIN, Inc., Portland, Ore.—Granted construction permit to install directional antenna system and increase night power from 1 KW to 5 KW, employing directional antenna for night operation.

KTUC—Tucson Motor Service Co., Tuscon, Ariz.—Granted modification of license to increase night power from 100 watts to 250 watts.

KSLM—Oregon Radio, Inc., Salem, Ore.—Granted modification of license to increase day power from 500 watts to 1 KW.

WDAF—The Kansas City Star Co., Kansas City, Mo.—Granted modification of license to increase night power from 1 KW to 5 KW.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KERN, Bakersfield, Cal.; KFIZ, Fond du Lac, Wis.; KIDW, Lamar, Colo.; KIUN, Pecos, Texas; KOKO, La Junta, Colo.; KUJ, Walla Walla, Wash.; KVRS, Rock Springs, Wyo.; KWYO, Sheridan, Wyo.; KPLT, Paris, Tex.; KVGB, Great Bend, Kans.; WACO, Waco, Texas; WDNC, Durham, N. C.; WLEU, Erie, Pa.; WMBS, Uniontown, Pa.; KCMC, Texarkana, Tex.; KFAM, St. Cloud, Minn; KNEL, Brady, Texas; KWEW, Hobbs, N. Mex.; WNLC, New London, Conn.; WOC, Davenport, Ia.; WOMI, Owensboro, Ky.; WOPI, Bristol, Tenn.; WRDW, Augusta, Ga.; WSAU, Wausau, Wis.; and WWSW, Pittsburgh, Pa.

KFXD—Frank E. Hurt, Nampa, Idaho.—Granted renewal of license for the period ending October 1, 1940.

KOME—Oil Capital Sales Corp., Tulsa, Okla.—Granted renewal of license for the period ending October 1, 1940.

WJHL—WJHL, Inc., Johnson City, Tenn.—Granted renewal of license for the period ending October 1, 1940.

WBRY—American Republican, Inc., Waterbury, Conn.—Granted renewal of license for the period ending August 1, 1940.

DESIGNATED FOR HEARING

The following application has been designated for hearing by the Commission. Date for the hearing has not yet been set.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Application for construction permit to install new equipment and increase power from 250 watts daytime only to 1 KW, on **780 kc.**

MISCELLANEOUS

WPAD—Paducah Broadcasting Co., Paducah, Ky.—Granted construction permit to install a new transmitter.

WBZ—Westinghouse Electric and Manufacturing Co., Boston, Mass.—Granted modification of construction permit to make changes in equipment.

WKAR—Michigan State College, East Lansing, Mich.—Granted modification of construction permit to extend completion date to January 30, 1940.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted license to cover construction permit authorizing move of auxiliary transmitter from present main transmitter site to studio location and installation of new antenna for auxiliary purposes only.

KDKA—Westinghouse Electric and Manufacturing Co., Pittsburgh, Pa.—Granted license to cover construction permit authorizing move of transmitter site locally.

KXOK—Sweetwater Radio, Inc., Sweetwater, Tex.—Granted license to cover construction permit authorizing erection of a new station to operate on **1210 kc.,** 250 watts, daytime only. Also granted authority to determine operating power by direct measurement of antenna input.

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas.—Granted license to cover construction permit authorizing installation of new equipment and increase in power to 250 watts. Also granted authority to determine operating power by direct measurement of antenna input.

WKST—Keystone Broadcasting Co., New Castle, Pa.—Granted modification of license to change corporate name from Keystone Broadcasting Company to: WKST, Inc.

KVGB—Helen Townsley, Great Bend, Kans.—Granted authority to determine operating power by direct measurement of antenna input.

Station KFI, and others referred to as "Clear Channel Group"—Dismissed without prejudice the petition and supplemental petition to intervene (in the matter of the application of WHDH to increase power to 5 KW on its present frequency **830 kc.**), the motion to dismiss the application or eliminate Issue No. 3 filed by such Group, and the motion to dismiss application filed by the National Broadcasting Co., Inc. (Station KOA).

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Directed that the hearing previously designated for December 11, 1939, will be held in the offices of the Commission, Washington, D. C., on January 15, 1940, at 10 a. m., in re application for construction permit to increase power from 1 KW to 5 KW and operate unlimited time instead of daytime (KOA), on frequency **830 kc.**

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted authority to determine operating power by direct measurement of antenna input.

KFAM—The Times Publishing Co., St. Cloud, Minn.—Granted authority to determine operating power by direct measurement of antenna input.

KEIL—KMTR Radio Corp., Hollywood, Calif.—Granted construction permit for relay broadcast station to be used with applicant's standard broadcast station KMTR, frequencies **30820, 33740, 35820** and **37980 kc.,** 25 watts; 50 watts on **33740 kc.** for the transmission of orders only.

WENX—Brown Radio Service and Laboratory, Rochester, N. Y.—Granted reinstatement of construction permit for high frequency relay broadcast station, using new equipment and increase in power to 50 watts; to be used with applicant's standard broadcast station WSAY.

WEHX—United Broadcasting Co., Cleveland, Ohio.—Granted modification of relay broadcast station license to increase power to 100 watts.

Ralph M. Lambeth, Greensboro, N. C.—Granted petition to accept amendment to application for construction permit to change frequency to **1380 kc.** and power to 500 watts, day only.

WFLA—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—Granted petition to intervene in the hearing on the application of WROL, Knoxville, Tenn., to change frequency and power, install new transmitter and use directional antenna at night.

KTEM—Bell Broadcasting Co., Temple, Texas.—Granted petition to intervene in the hearing on the application of Chilton Radio Corporation for a new station in Dallas, Texas.

KTEM—Bell Broadcasting Co., Temple, Texas.—Granted petition to intervene in the hearing on the application of V. O. Stamps, for a new station in Dallas, Texas.

V. O. Stamps, Dallas, Texas.—Granted motion for order to take depositions in re application for new station.

K. E. Schonert & Oscar L. Turner, d/b as Olney Broadcasting Co., Olney, Ill.—Granted motion to withdraw and dismiss without prejudice the application for a new station.

KORN—Nebraska Broadcasting Corp. Fremont, Nebr.—Granted modification of construction permit for approval of transmitter site at East Sixteenth St., Fremont, Nebr., and studio site at 6th and Broad Streets, Fremont, Nebr.; installation of vertical radiator and new equipment.

Monocacy Broadcasting Co., Portable-Mobile (area of WFMD, Frederick, Md.).—Granted construction permit for new low frequency relay broadcast station, to relay programs where wire facilities are not available, to operate on **1622, 2058, 2150, 2790 kc.**, power 40 watts.

KWHB—WHB Broadcasting Co., Portable-Mobile (area of WHB, Kansas City, Mo.).—Granted license to cover construction permit for new relay broadcast station; frequencies **1622, 2058, 2150, 2790 kc.**, power 100 watts.

KEJJ—National Broadcasting Co., Inc., Portable-Mobile (area of KOA, Denver, Colo.).—Granted license to cover construction permit for high frequency relay broadcast station KEJJ, for changes in equipment and addition of A1 and A2 type of emission.

KEJK—National Broadcasting Co., Inc., Portable-Mobile (area of San Francisco, Calif.).—Granted license to cover construction permit for high frequency relay broadcast station KEJK for changes in equipment.

KEJL—National Broadcasting Co., Inc., Portable-Mobile (area of San Francisco, Calif.).—Granted license to cover construction permit for high frequency relay broadcast station KEJL for changes in equipment.

WEJN—National Broadcasting Co., Inc., Portable-Mobile (area of WJZ and WEAF, N. Y.).—Granted license to cover construction permit for high frequency relay broadcast station WEJN for changes in equipment and addition of A1 and A2 emission.

WEJQ—National Broadcasting Co., Inc., Portable-Mobile (area of WTAM, Cleveland, Ohio).—Granted license to cover construction permit for high frequency relay broadcast station WEJQ for changes in equipment.

WEJW—National Broadcasting Co., Inc., Portable-Mobile (area of New York, N. Y.).—Granted license to cover construction permit for high frequency relay broadcast station WEJW for changes in equipment.

WTAW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted special temporary authority to operate simultaneously with Station WJBO from 7:30 p. m. to 10:30 p. m., CST, on December 12, 1939, in order to broadcast the Houston Symphony Orchestra concert.

WLOK—The Fort Industry Company, Lima, Ohio.—Granted special temporary authority to operate from 5:15 p. m. to 10:30 p. m., EST, on December 8, 1939, in order to broadcast speeches in connection with annual football dinner and a basketball game only; to operate from 8:00 p. m. to 10:30 p. m., EST, on December 9, 16, 21, 29, 1939, and January 4, 5, and 6, 1940, in order to broadcast basketball games only.

KWFC—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—Granted modification of construction permit for approval of transmitter and studio site, installation of new equipment and vertical radiator, upon express condition that said grant is not to be construed as a finding in the appeal proceedings filed by C. E. Palmer in the United States Court of Appeals for the District of Columbia, Cause No. 7542 from the grant of the application of KWFC (B3-P-2380) nor upon any of the issues involved therein, nor that the Commission has found that the operation of this station is or will be in the public interest beyond the express terms hereof.

WSYB—Philip Weiss, tr/ as Philip Weiss Music Co., Rutland, Vt.—Granted license to cover construction permit for changes in equipment and increase in power to 250 watts, unlimited time.

WLTH—Voice of Brooklyn, Inc., New York, N. Y.—Granted license to cover construction permit to move transmitter site locally and install vertical radiator, upon express condition that this grant shall not be construed as a finding by the Commission in the matter of the Order to Show Cause issued to Voice of Brooklyn, Inc. (WLTH), Brooklyn, N. Y., on July 26, 1939, Docket No. 5711, nor upon the application for renewal of license of Station WLTH, nor upon the application of Station WBBC (File No. 1-MLB-1095A), nor upon any of the issues involved therein; nor that the Commission has found that the operation of this station is, or will be, in the public interest beyond the express terms hereof.

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—Granted license to cover construction permit and modification thereof, for erection of new station to operate on **1200 kc.**, 250 watts, unlimited time.

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 with certain additional power specifications.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 with certain additional power specifications.

WEOC—South Carolina Broadcasting Co., Inc., Portable-Mobile (area of Charleston, S. C.).—Granted license to cover construction permit, as modified, for new high frequency relay broadcast station to relay programs where wire facilities are not available to be broadcast over applicant's standard broadcast station WCSC, to operate on frequencies **30820, 33740, 35820, 37980 kc.**, with 10 watts power.

Valley Broadcasting Co., West Point, Ga.—Granted motion for continuance of hearing now scheduled for January 9, 1940, new date to be fixed by office of the Secretary.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted extension of special temporary authority to operate on frequency **1200 kc.** at present transmitter site for the period December 13, 1939, to not later than December 21, 1939, in order to complete construction at approved site.

WILL—University of Illinois, Urbana, Ill.—Granted special temporary authority to remain silent on Christmas Day, December 25, 1939, and New Year's Day, January 1, 1940, in order to observe holidays.

WPRO—Cherry and WEBB Broadcasting Co., Providence, R. I. —Granted extension of special temporary authority to operate new transmitter in accordance with modification of construction permit during daytime, using 1 kw directional, for the period December 13, 1939, to not later than December 22, 1939, in order to complete proof of performance measurements.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from local sunset (December 4:45 p. m., EST) to the conclusion of the football game between the New York Giants and the Green Bay Packers on December 10, 1939, in order to broadcast football game only.

WTAD—Illinois Broadcasting Corp., Quincy, Ill.—Granted special temporary authority to conduct field test measurements for new transmitter site with equipment described in letter dated November 25, 1939, on frequency **900 kc.**, between the hours 1:00 a. m. to 6:00 a. m., for a period not to exceed 10 days.

W2XWI—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted modification of construction permit for high frequency broadcast station W2XWI for approval of transmitter site.

W8XVB—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y. —Granted license to cover construction permit for high frequency broadcast station for assignment of frequency **43200 kc.**, on an experimental basis only, conditionally, power 1000 watts.

KDKA—Westinghouse Electric and Manufacturing Co., Pittsburgh, Penn.—Granted license for auxiliary transmitter to be located at approximately 1.2 miles south of Saxonburg, Saxonburg-Culmerville Road, Bulter County, Pa.; frequency **980 kc.**, 50 KW, auxiliary purposes only.

KNOW—Frontier Broadcasting Co., Inc., Austin, Texas.—Granted license to cover construction permit, as modified; frequency **1500 kc.**, power 250 watts, unlimited.

WMPS—Memphis Broadcasting Co., Memphis, Tenn.—Granted construction permit to make changes in transmitting equipment.

KALE—KALE, Incorporated, Portland, Ore.—Granted modification of construction permit for changes in antenna and make changes in transmitting equipment and extend completion date from February 20, 1940 to 90 days after grant.

WKAR—Michigan State College, East Lansing, Mich.—Granted modification of construction permit to install new transmitter and extend completion date to January 31, 1940.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted license to cover construction permit and modification thereof; frequency **1370 kc.**, 100 watts night, 250 watts daytime, unlimited time.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54.

W2XBT—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate Television Broadcast Station (experimental) W2XBT on frequency band **156-162 mc.,** for the period December 11, 1939, to not later than January 9, 1940, pending adjustment of the license to conform with the provisions of Section 4.74.

WOLF—Civic Broadcasting Corp., Syracuse, N. Y.—Granted special temporary authority to perform site survey tests from sunrise to sunset on frequency **1500 kc.,** with a portable crystal controlled transmitter as described in letters dated December 6 and 9, 1939, for the period December 11, 1939, to not later than December 20, 1939, in accordance with construction permit.

KADA—C. C. Morris, Ada, Okla.—Granted modification of license to change location of main studio from 115½ South Rennie St., Ada, Okla., to Highway No. 48, 1 mile north of Ada, Okla.

KNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

Portorican American Broadcasting Co., Inc., Ponce, P. R.—Granted supplement to petition for reconsideration and grant of application for new station, which was designated for hearing on June 20, 1939. The application for construction permit to erect a new station in Ponce, P. R., to operate on **1340 kc.,** with 1 KW, unlimited time was granted, subject to condition that permittee shall file application for modification of construction permit specifying transmitter location and antenna system within two months after effective date of order.

KIRO—Queen City Broadcasting Co., Inc., Seattle, Wash.—Dismissed petition for rehearing in re application of KMPC, Beverly Hills, Cal., for construction permit to change site locally and operate with power of 1 KW night, 5 KW day, on **710 kc.,** which was granted by the Commission, without a hearing, on November 14, 1939.

KFBI—Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Granted modification of construction permit approving transmitter and studio sites and installation of vertical radiator.

WDLP—Panama City Broadcasting Co., Panama City, Fla.—Granted modification of construction permit approving studio and transmitter sites, and installation of vertical radiator.

W9XBA—WHB Broadcasting Co., Kansas City, Mo.—Granted license to cover construction permit, as modified, for new high frequency broadcast station to operate on **26100 kc.,** 100 watts, to be located at 9th and Grand Ave., Kansas City, Mo.

W2XQR—John V. L. Hogan, Long Island City, N. Y.—Granted license to cover construction permit as modified, for high frequency broadcast station to operate on **43200 kc.,** 1 KW, to be located at 3104 Northern Blvd., Long Island City.

W9XYH—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted modification of construction permit as modified, to make changes in equipment of high frequency broadcast station.

WMGA—Frank R. Pidock, Sr., Moultrie, Ga.—Granted license to cover construction permit authorizing a new station to operate on frequency **1370 kc.,** 250 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 5:45 to 6 p. m., EST, on December 17, 24 and 31, in order to broadcast to its conclusion the Rosary Hour. Station operates on **1140 k.,** 500 watts, limited time.

Hampden-Hampshire Corp., Holyoke, Mass.—Set aside its decision of December 23, 1938, in so far as it denies the application of Hampden-Hampshire Corp., for the use of frequency **1240 kc.,** with power output of 1 KW day, 500 watts night, with directive antenna; dismissed petition for rehearing in re this application, and granted petition only in so far as it requests the Commission to accept amendment of application B1-P-1701 so as to seek the use of the frequency **1370 kc.,** with 250 watts power, unlimited time, non-directive antenna, instead of the frequency **1240 kc.,** with power output of 1 KW day, 500 watts night, with directive antenna.

KYUM—Yuma Broadcasting Co., Yuma, Ariz.—Granted modification of construction permit approving transmitter and studio site in Yuma, and installation of vertical radiator.

WCAT—South Dakota State School of Mines, Rapid City, So. Dak.—Granted special temporary authority to remain silent for the period beginning December 21, 1939 and ending no later than January 3, 1940, in order to observe Christmas vacation.

APPLICATIONS FILED AT FCC

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—Extension of special experimental authority for transmission of facsimile signals from 12 midnight to 6 a. m., EST, using 50 KW power, for period 2-1-40 to 2-1-41.

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Modification of construction permit, B5-P-2388, for changes in hours of operation, increase in power, new equipment, antenna, and move of transmitter, further requesting authority to use antenna and transmitter formerly used by station KECA and move transmitter from Moynier Lane, between Adams Blvd. and Higuerra St., Culver City, Calif., to 1418 East 81st St., Los Angeles, Calif., KECA's former site.

720 Kilocycles

WGN—WGN, Inc., Chicago, Ill.—Extension of special experimental authority for transmission of facsimile signals from 1 a. m. to 6 a. m., CST, using 50 KW power, for period 2-1-40 to 2-1-41.

740 Kilocycles

WSB & WEGG—Atlanta Journal Co., Atlanta, Ga.—Authority to transfer control of corporation from James R. Gray, Inman Gray, Mrs. James R. Gray, Cordelia Gray Brumby, Franes Gray Yankey, Mary Inman Pearce Smylie, Jennie Gray Pearce, John A. Brice, J. L. Williford, John Morton Smith, to James M. Cox, Springfield Newspapers, Inc., and The Evening News Publishing Co.

770 Kilocycles

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Authority to transfer control of corporation from Sidles Company to Star Printing Company, 1 share common stock.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of special experimental authority to operate synchronously with WBBM from local sunset at Lincoln, Nebr., to midnight, CST, period 2-1-40 to 2-1-41.

850 Kilocycles

WWL—Loyola University, New Orleans, La.—Extension of special experimental authority for unlimited time for period 2-1-40 to 2-1-41.

KWKH—International Broadcasting Corp., Shreveport, La.—Extension of special experimental authority to operate on **1100 kc.,** 50 KW power, directional antenna for night use, unlimited time, for period 2-1-40 to 2-1-41.

920 Kilocycles

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Construction permit to install new transmitter and increase power from 1 to 5 KW, using directional antenna at night.

930 Kilocycles

NEW—The Valley Broadcasting Co., Steubenville, Ohio.—Construction permit for a new broadcasting station on **930 kc.,** 1 KW power, daytime. Amended: Re corporate structure.

WELI—City Broadcasting Corp., New Haven, Conn.—Modification of license to increase power from 250 watts, 500 watts day, to 250 watts, 1 KW day. Amended to request power of 500 watts, 1 KW day, and make changes in directional antenna (no construction necessary).

1040 Kilocycles

KRLD—KRLD Radio Corp., Dallas, Tex.—Extension of special experimental authority to operate simultaneous with WTIC unlimited time for period from 2-1-40 to 2-1-41.

1060 Kilocycles

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Extension of special experimental authority to operate simultaneous with KRLD, unlimited time on **1040 kc.**, directional antenna at night, for period 2-1-40 to 2-1-41.

1120 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of license to increase power from 250 watts, 1 KW day, to 500 watts, 1 KW day.

1140 Kilocycles

WAPI—Alabama Polytechnic Institute, University of Alabama and Alabama College (Board of Control of Radio Station WAPI), Birmingham, Ala.—Extension of special experimental authority to operate unlimited time, using directional antenna after sunset at Tulsa, Okla., for period 2-1-40 to 2-1-41.

1200 Kilocycles

WJHL—WJHL, Inc., Johnson City, Tenn.—Construction permit to make changes in transmitting equipment, install directional antenna for night use, increase power from 250 watts to 1 KW, change frequency from **1200 kc.** to **880 kc.**, and move transmitter 500 feet east of present location, from Kingsport Highway (3 miles north) to Kingsport Highway 11 E, 3 miles from Johnson City, Tenn.

WMOB—S. B. Quigley, Mobile, Ala.—License to cover construction permit (B3-P-1983) as modified for a new station. Amended: Hours of operation.

1210 Kilocycles

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Authority to transfer control of corporation from Sidles Company to Star Printing Company, 1 share common stock.

NEW—Van Curler Broadcasting Corporation, Schenectady, N. Y. —Construction permit for a new broadcast station to be operated on **1210 kc.**, 250 watts power, unlimited time.

1240 Kilocycles

KGCU—Mandan Radio Assn., Mandan, N. Dak.—Construction permit to install new transmitter, make changes in antenna, increase power from 250 watts to 500 watts night, 1 KW day.

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Authority to determine operating power by direct measurement of antenna power.

KFJZ—Tarrant Broadcasting Co., Fort Worth, Tex.—Construction permit to install new transmitter, increase power from 1 to 5 KW. Amended to install directional antenna for day and night use.

1310 Kilocycles

KARM—George Harm, Fresno, Calif.—License to cover construction permit (File No. B5-P-2542) for changes in equipment and increase in power.

NEW—Oscar Kronenberg, Steubenville, Ohio.—Construction permit to erect new broadcast station on **1310 kc.**, 250 watts power, unlimited time.

NEW—John B. Bedingfield and Parker Bedingfield, d/b as Dublin Radio Broadcasting Co., Dublin, Ga.—Construction permit for a new station to be operated on **1310 kc.**, 250 watts power, unlimited time.

1320 Kilocycles

WSMB—WSMB, Inc., New Orleans, La.—License to cover construction permit B3-P-2398 to replace tower demolished by hurricane, and make changes in antenna.

1350 Kilocycles

WMBG—Havens & Martin, Inc., Richmond, Va.—Modification of construction permit (B2-P-1912) for increase in power, equipment changes, and change in directional antenna, requesting further authority to install new transmitter.

1360 Kilocycles

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Construction permit to install new transmitter and vertical antenna; increase power from 500 watts to 500 watts night, 1 KW day; change hours of operation from share with WSBT to unlimited time; and move transmitter from 128 North Pulaski Rd., Chicago, Ill., to site to be determined. Contingent on WSBT going to **930 kc.**

WFBL—Onondaga Radio Broadcasting Corporation, Syracuse, N. Y.—Construction permit to install directional antenna for night use; increase power from 1 KW, 5 KW day, to 5 KW day and night.

1370 Kilocycles

WMAN—Richland, Inc., Mansfield, Ohio.—License to cover construction permit (B2-P-2121) as modified for a new station.

WFTL—Tom M. Bryan, Fort Lauderdale, Fla.—Authority to determine operating power by direct measurement of antenna power.

WFTL—Tom M. Bryan, Fort Lauderdale, Fla.—License to cover construction permit (B3-P-2330) as modified for a new station. Amended: Section 5.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—License to cover construction permit (B3-P-2562) for equipment changes and increase in power.

KVFD—Northwest Broadcasting Co., Fort Dodge, Iowa.—Modification of construction permit, B4-P-2042, as modified, for a new station, requesting increase in power from 100, 250 watts day, to 250 watts day and night.

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Tex.—Authority to determine operating power by direct measurement of antenna power.

NEW—Ralph M. Lambeth, Greensboro, N. C.—Construction permit for a new station on **1370 kc.**, 250 watts, unlimited time. Amended to request **1380 kc.** 500 watts power, daytime operation; equipment changes.

1420 Kilocycles

WSPB—WSPB, Inc., Sarasota, Fla.—License to cover construction permit B3-P-2416, as modified, for a new station.

1450 Kilocycles

WHOM—New Jersey Broadcasting Corporation, Jersey City, N. J. —Construction permit to install new transmitter and increase power from 250 watts to 250 watts, 1 KW day. Amended to make changes in antenna and request power of 500 watts, 1 KW day.

1500 Kilocycles

KROD—Dorrance D. Roderick, El Paso, Tex.—Modification of construction permit (B3-P-947) for a new station, requesting authority to change site from 900 Hammett Blvd. to 2,250 feet south of Spruce St., on line of Boone St., extended southward, El Paso, Tex. Amended: Antenna changes, new transmitter, increase power from 100 to 250 watts, move studio from 200 San Francisco St. to Mesa and Mills Sts., El Paso, Tex., and move transmitter .5 mile (same address), extend commencement and completion dates 30 and 180 days respectively.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Construction permit to use old RCA 250-watt transmitter as auxiliary transmitter for auxiliary purposes only, at new site, 341 Rising Main St., Pittsburgh, Pa.

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Modification of license to change hours of operation from daytime to unlimited time, using 100 watts power.

WRTD—Times Dispatch Radio Corporation, Richmond, Va.—Authority to determine operating power by direct measurement of antenna power.

KAWM—A. W. Mills, Gallup, N. Mex.—Modification of license to increase power from 100 watts, 250 watts day, to 250 watts day and night.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Construction permit to make changes in equipment and increase power from 100 watts to 250 watts, and change hours of operation from daytime to unlimited time.

KBKR—Louis P. Thornton, Baker, Ore.—License to cover construction permit (B5-P-1841) as modified for a new station.

MISCELLANEOUS

Don Lee Broadcasting System, Portable-Mobile.—License for new special relay broadcast station to be used in connection with television station W6XAO, Los Angeles, Calif., and television relay station W6XDU; frequencies **1646, 2090, 2190, 2830 kc.**, 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of station KABB.

Don Lee Broadcasting System, Portable-Mobile.—License for new special relay broadcast station to be used in connection with television station W6XAO, Los Angeles, Calif., and television relay station W6XDU; frequencies **1646, 2090, 2190, 2830 kc.**, 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of station KABD.

Don Lee Broadcasting System, Portable-Mobile.—License for new special relay broadcast station to be used in connection with television station W6XAO, Los Angeles, Calif., and television relay station W6XDU; frequencies **1646, 2090, 2190, 2830 kc.**, 100 watts, unlimited time, in accordance with Section 4.24, A3 emission, equipment of station KAOG; 8 watts.

Don Lee Broadcasting System, Portable-Mobile.—License for new special relay broadcast station to be used in connection with television station W6XAO, Los Angeles, Calif., and television relay station W6XDU; frequencies **31620, 35260, 37340, 39620 kc.**, 10 watts, and equipment of station KEGQ.

Don Lee Broadcasting System, Portable-Mobile.—License for new special relay broadcast station to be used in connection with television station W6XAO, Los Angeles, Calif., and television relay station W6XDU; frequencies **31620, 35260, 37340, 39620 kc.**, 2 watts, and equipment of station KEGO.

NEW—Columbia Broadcasting System, Inc., area of New York, N. Y.—Construction permit for a new television station for portable-mobile operation in area of New York, N. Y., to be operated on **336000-348000 kc.**, 25 watts visual, 5 watts aural, special and A-5 emission, unlimited time. Amended: To request 10 watts aural instead of 5 watts.

WLWH—The Crosley Corp., Portable.—License to cover construction permit B2-PRE-323, to install new transmitter.

WLWI—The Crosley Corp., Portable-Mobile.—License to cover construction permit B2-PRE-324, to increase power to 15 watts. install new transmitter.

WLWC—The Crosley Corp., Mobile.—Modification of license for Order Relay station, using 25 watts for relaying programs and orders concerning such programs and on **33740 kc.**, using 50 watts for transmission orders only. Amended: To request increase in power to 50 watts (programs and orders).

WELV—West Virginia Broadcasting Corp., Mobile, Wheeling, W. Va.—Modification of license to increase power from 25 to 50 watts.

WLWD—The Crosley Corp., Mobile.—Modification of license to increase power from 25 to 50 watts.

NEW—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Construction permit for a new high frequency broadcast station to be operated on **42600 kc.**, 250 watts power, unlimited time, special emission. Transmitter to be located at Jefferson Standard Life Ins. Bldg., Elm and Market Sts., Greensboro, N. C.

NEW—Star-Times Publishing Co., St. Louis, Mo.—Construction permit for a new high frequency broadcast station to be located at 3615 Olive St., St. Louis, Mo.; **43000 kc.**, 250 watts power, special emission.

WNEI—WFBM, Inc., Indianapolis, Ind.—License to cover construction permit B4-PRY-157, as modified, to make changes in equipment, and reduce power to 0.15 watts.

NEW—The Outlet Co., Providence, R. I.—Construction permit for a new high frequency broadcast station to be operated on **43400 kc.**, 1 KW power, special emission. Transmitter to be located at Providence, Rhode Island, exact site to be determined.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Modification of license to request classification of station as Class III-A.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Kant-Slip Manufacturing Company—Charges that instead of preserving the life of leather as advertised, "Kant-Slip" dressing causes leather to become dry and brittle, are made in a complaint against Samuel Benensohn and L. Benensohn, trading as Kant-Slip Manufacturing Company, 451 East 63d St., Chicago.

The respondents' product allegedly is described in pamphlets and other printed matter as follows: "Kant-Slip Dressing is a positive preservative! Prolongs the life of leather, canvas and fiber belts making and keeping the belt soft and pliable. Water and oil proof."

The complaint charges that the dressing consists principally of rosin and denatured alcohol, neither of which is a preservative, and which have a solvent action on the oils and greases in leather, tending to remove them and cause the leather to become dry and brittle. (3963)

Lowe Brothers Company—See Sherwin-Williams Company.

John Lucas & Company, Inc.—See Sherwin-Williams Company.

Plat-Num Perl Laboratories—See A. Sartorius & Company, Inc.

A. Sartorius & Company, Inc., trading as Plat-Num Perl Laboratories, 80 Fifth Ave., New York, is charged in a complaint with misrepresentation in the sale and distribution of manicure products.

Compounds distributed by the respondent are "Plat-Num Nail Protector" which is advertised to "encourage growth" and "strengthen nails," and "Plat-Num Olive Oil Compound Nail Polish Remover for dry brittle nails."

A further practice of the respondent in connection with the sale of its products, the complaint continues, is the use of the legend "Manufacturing Chemists," which appears on business stationery and other printed and written matter distributed by the respondent to prospective purchasers. Through use of such legend, the complaint charges, respondent represents that it is the manufacturer of the commodities distributed by it.

The quantity of olive oil contained in the polish remover, the complaint alleges, is so small as to be incapable of relieving or improving, to any appreciable extent, the condition of dry, brittle nails. The complaint also charges that use of the nail protector does not stimulate or encourage the growth of nails, nor does it strengthen them. (3966)

Fong Wan—Fong Poy, also known as Fong Wan, Fong Kwongii, Yee Nun Yet, Chan Woon Sheuno, and Lee Bing Lim, copartners trading as Fong Wan, 576 Tenth St., Oakland, Calif., are charged in a complaint with misrepresentation in advertising matter in newspapers and periodicals, and in a booklet designated "Herb Lore," concerning the remedial benefits of Chinese herbs sold and distributed by them.

The complaint charges that in advertising matter the respondents represented that the herbs sold by them are a remedy, cure and effective treatment for heart trouble, high blood pressure, colds, influenza, asthma, pyorrhea, blood disorders, crosseyes and other eye troubles, cancer, stomach troubles, dysentery, pains, dizziness, hardening of the arteries, goiter, bronchial trouble, coughs, sinus trouble, liver and gall bladder troubles, diabetes and other disorders of the kidneys and bladder, nervous attacks and disorders, arthritis, obesity, headaches, neuritis and piles, and that they stop pain and give permanent relief from asthma and other disorders.

Among advertisements distributed the respondents allege: "In a condition of this sort (gallstones), five or six kinds of herbs must be compounded for the Liver and Gall; auxiliary herbs must be added to cleanse the blood and rid it of the fire element (inflammation); some herbs must be put in to cause the air and the blood to circulate properly; other varieties must be used to take away the swelling; and still other herbs must be added for Nerves of the Shoulder Blade."

The complaint alleges that in truth and in fact the respondents' Chinese herbs are not a remedy or cure for any of the ailments or diseases named; that they do not and cannot wash away any diseases from the human body; that Fong Poy or Fong Wan is not able to diagnose or heal diseases or ailments, nor has he restored the health of any persons by the use of Chinese herbs. (3964)

Sherwin-Williams Co., Cleveland, paint and paint products manufacturer, and two of its subsidiaries, The Lowe Brothers Company, Dayton, and John Lucas & Company, Inc., Philadelphia, have been served with a complaint charging price discriminations in the sale of their products in violation of the Robinson-Patman Act.

With annual net sales of over $17,000,000 the parent company alone distributes its products through 6300 authorized dealers, more than 80 chain lumber yards, approximately 120 wholly owned retail stores and other miscellaneous mediums and controls either directly or through its subsidiaries a number of large paint manufacturing companies operating and distributing in various parts of the country.

Price discriminations are alleged to have resulted from certain practices engaged in by the respondents in connection with the granting of functional discounts and in connection with the granting of per order or volume discounts under their 1938 and 1939 discount plans.

For the purpose of granting and allowing quantity discounts under their respective 1938 plans, the three organizations, particularly Sherwin-Williams and Lowe Brothers, allegedly permitted the main offices of some chain lumber yard buyers to pool the orders of their unit stores and granted to such buyers the quantity discounts applicable to the gallonage represented by the pooled orders. For example, it is alleged, if a pooled order totaled more than 84 gallons, each unit store, through its main office, received a flat 10 per cent off dealers' list prices even though no one unit store may have ordered a sufficient quantity to qualify for any discount.

With respect to other chain lumber yard buyers, the respondent manufacturers, particularly Sherwin-Williams, allegedly granted a flat 10 per cent discount off dealers' list prices, irrespective of the size of the order or whether it represented the pooled requirements of all unit stores of the chain lumber yard or the individual rquirements of only one unit store. In either case, it is alleged, the manufacturer granting the pooling privilege or the discount did not customarily make shipment of the full order to the main office of the lumber yard, but shipped to the various units.

It is alleged that the chain lumber yards receiving the flat 10 per cent discount from dealers' list prices were, in certain cases, in competition with other chain lumber yards purchasing from the respondent manufacturers and not receiving the flat 10 per cent discount. In other cases, independent dealers purchasing from the respondents but not receiving either the pooling privileges or such discount allegedly were in competition with chain store lumber yard units getting such privilege or discount. (3965)

STIPULATIONS

The Commission entered into no stipulations during the past week.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Arvil Company—Stafford T. Mitchell, Janet M. Mitchell and Otis S. Mitchell, trading as The Arvil Company, 1700 Wilson Ave., Chicago, have been ordered to cease misrepresentations of the efficacy of their hair preparations designated "Arvil" and "Dawn Shampoo".

In publications and advertising matter, the Commission finds, respondents represented that application of their hair restorer, "Arvil", to the skin, is always safe, that it replaces missing pigment in the hair shaft proper, and that both "Arvil" and "Dawn Shampoo" will give permanent relief from dandruff. Both products were represented as competent remedies for conditions responsible for hair falling out, and as encouraging hair growth, and "Arvil" was represented as having an antiseptic effect on hair and scalp and as causing hair to assume a natural and youthful color.

Findings of the Commission are that the preparation "Arvil" contains lead acetate in an amount which may be injurious when applied to the skin, that use of the preparation over a period of time may result in lead poisoning, and that it does not restore pigment in the hair shaft but acts as a dye to color the surface of the hair.

The respondents are ordered to cease and desist from representations that "Arvil" restores pigment in the hair shaft or causes the hair to assume a natural or youthful color, that it is effective as an antiseptic or astringent when applied to the hair or scalp, and that either "Arvil" or "Dawn Shampoo" is a cure or remedy for baldness or an effective treatment for falling hair or the causes thereof. They also are ordered to discontinue representing (through failure to reveal that the use of "Arvil" on the skin is not wholly safe, particularly if there is any injury, abrasion or inflammatory or eczematous condition thereon) that "Arvil" contains no harmful or dangerous drugs or that the use of it will have no ill effects on the human body. (3472)

Berkeley Studios International Press Service, Inc.—See International Press Service, Inc.

Ford Motor Company—See General Motors Corporation.

General Motors Acceptance Corporation—See General Motors Corporation.

General Motors Corporation—Orders to cease and desist from use of the words "six per cent" or the symbol "6%" in connection with the installment payment plan of purchasing automobiles have been issued against General Motors Corporation, Detroit, and its subsidiaries, including General Motors Acceptance Corporation, and against Ford Motor Company, Dearborn, Mich. (3001 and 3005)

Globe Clock Company—See Sales Stimulators.

International Press Service, Inc., formerly trading as Berkeley Studios International Press Service, Inc., and Fred Friewald, photographers, 36 Newbury St., Boston, have been ordered to cease and desist from representing that they have any connection with International News Service or International News Photos, or that they operate or have any connection with a press photographic service. Fred Friewald is president and treasurer of the organization.

Findings of the Commission are that the corporation has a library of about 12,000 photographs, 97 per cent of which are photographs of residents of Boston. The corporation has no direct connection with any news service or publication. Through "bookers" or salesmen the findings continue, respondents contact by telephone members of the public, soliciting appointments for the taking of their photographs. Usually the persons selected are those who have received publicity by reason of their business, professional or other activities of news interest.

Respondents' employees, in telephone conversations, sometimes state that they are representatives of "International Press Service", "Press Service", or the "International". Persons so solicited are asked to make an appointment for the taking of their photographs which, it is stated, would be without expense to them, the photographs to be filed in respondents' press library for release to newspapers or other news publications desiring photographs. After photographs were taken, the person solicited was told that within two or three days proofs would be submitted for approval. Respondents enclosed a card with the proofs which stated "Enclosed are proofs of the negatives for which you recently posed. Will you kindly approve one for press release and return it to our representative, who will call within the next few days." The respondents' representative, when he called, endeavored to sell prospects quantities of the finished photograph.

Findings are that the respondents have no interest in and take no steps to cause the publication of the photographs taken by them. Whenever a photograph is solicited by a news service such as the International News Service or the Associated Press, the purpose is primarily to cause the photograph to be published. (3618)

National Employees Training Service—W. R. Young, trading as National Employees Training Service, Detroit, has been ordered to cease and desist from representing that correspondence school instruction conducted by him will guarantee students positions in the United States Government or that he has any connection with the Government or the United States Civil Service Commission.

It was found that as a means of contacting prospective purchasers of his course of instruction, the respondent mailed to numerous boxholders on Rural Free Delivery routes in various States, postal cards on which were printed statements that due to death, retirement and normal Government expansion, many thousands of Government positions are open for trained men or women each year; that American citizens of good health and character could qualify for Government positions; and the request was made that the attached reply card be mailed for free samples of actual questions given in recent Civil Service examinations. Attached to the cards were business reply cards which were to be detached and mailed under the provisions of the United States postal laws, and which were addressed to the National Employees Training Service. On the cards was printed "Government positions $105 to $175 per month."

The statement that no postage stamp was necessary, and the address "National Employees Training Service" upon them, the Commission finds, caused many recipients to believe that the respondent was in some way connected with the United States Government.

Concerning the home study course conducted by correspondence, which was sold to applicants, the respondent is found to have made representations to the effect that he and his agents were employed by the United States Government and were representatives of the United States Civil Service Commission; that the business was an old, established one; that students solicited would have to enroll immediately in order to get within the quota of Government positions allotted to the respondent, which quota was practically filled; that jobs with the Government would be secured for students taking the course of instruction, or that money paid for the course would be refunded; that respondent was able to advance information concerning examinations to be conducted by the United States Civil Service Commission, and that students taking the course have preference over other applicants for a position in the classified Civil Service of the United States.

The Commission finds that these representations were false and misleading. With few exceptions, the respondent did not refund the price of tuition after being unable to secure positions for students completing the course.

The respondent is ordered to cease and desist from representing, through use of the word "National," or similar words, that he has any connection with the United States Government; that his business had been in existence for many years; that the enrollment of students is limited by a definite quota, or that only persons with high scholastic attainments are accepted by him as prospective students; that Civil Service positions in the United States Government are guaranteed to students who have completed respondent's course of instruction; that respondent has any advance information with respect to available positions in the Civil Service, which information cannot be secured from the United States Civil Service Commission, or has any additional or confidential information which is not available to the public, or that respondent has any control of positions available in the Civil Service, or that his students are preferred by the United States Civil Service Commission over other students who have not taken respondent's course of instruction. (3331)

Sales Stimulators—Ben Braude, trading as Sales Stimulators and as Globe Clock Company, 337 West Madison St., Chicago, has been ordered to cease and desist from misrepresentations as to possible earnings of agents or salesmen representing him, and from misrepresentation of the value of premiums distributed by him.

The respondent, who is engaged in the sale and distribution of a sales stimulator plan, and of tableware, electric shavers, clocks and other merchandise in connection therewith, represented through advertisements in periodicals and other publications, the Commission finds, that salesmen for his products made up to $32 daily and approximately $350 a month in the ordinary course of their business, and that premiums distributed by him had a higher retail value than they actually possessed.

The Commission orders that the respondent cease and desist from representing any specified sum of money as possible earnings or profits of agents, salesmen or distributors, which is not a true representation of average net earnings consistently made by active, full-time agents or representatives under normal conditions, or representing as the customary or regular prices for premiums used by him in connection with any sales stimulator plan, prices or values which are in fact substantially in excess of the actual values of such premiums. 1626 K STREET, N. W. WASHINGTON, D. C. Vol. 7, No. 51, December 22, 1939

HAPPY NEW YEAR

A. F. of M.

In view of developments in the A. F. of M. situation, many affiliates have believed it wise to write to their musicians' locals to this effect:

The current agreement between Station —— and Local —— of the American Federation of Musicians expires January 17, 1940. At the local officers' earliest convenience, representatives of the station would like to meet with them to negotiate a new agreement to succeed the expiring one.

STUDEBAKER-FREC REPORT COMMENDS AMERICAN SYSTEM

Declaring that "there is, and there can be no basic conflict between educators and broadcasters within the proper concept of the American way," Dr. John W. Studebaker, U. S. Commissioner of Education, yesterday submitted his report, covering the activities of the Federal Radio Education Committee, of which he is the chairman, to James L. Fly, the Chairman of the Federal Communications Commission.

The report, covering the chronological development of the FREC (which is jointly financed by two foundations and the broadcasting industry) gives a comprehensive review of educational and public service aspects of broadcasting. Throughout the report there is a reflection of the improving relations between educators and broadcasters.

STUDEBAKER-FREC REPORT COMMENDS AMERICAN SYSTEM

(Continued from page 3905)

In his conclusions Dr. Studebaker said in part:

"The private ownership of property and its administration in the interests of the owner, so long as that administration is not inimical to the public welfare, is a root principle of the American philosophy. It is in this respect that the American philosophy differs most sharply from the ideologies of some other nations.

"The American system of education reflects this basic philosophy. It proceeds upon the premise that, under the American form of government, the individual should be encouraged toward the fullest self-expression, and it endeavors not only to equip the individual to achieve that self-expression, but also to guide him toward a type of self-expression which will be constructive and in the best interests of the whole body of citizens.

"Broadcasters represent that small group of body politic which has sought and found self-expression through the development and administration of radio. According to their lights they have administered this public trust in the public interest, and there is no principle in the American philosophy which forbids that they should receive rewards of the kind which accrue to other citizens who find opportunities for self-expression through other commercial or industrial channels. This is basic and undeniable if we are to adhere to the American system of living.

"The maintenance of this system—a system of freedom of expression which demands free communication, is more closely identified with the responsibility of maintaining the American system of freedom in education than with any other force in our scheme of living. Public education is supported and controlled by the public; yet education must make possible freedom to learn if democracy is to be nurtured and developed. Radio, by its nature, must be regulated by the Government, but radio must provide freedom of communication if it, as a powerful instrument of influence, is to strengthen and not stifle the processes of democracy.

"In the kindergarten, the elementary school, the secondary school, the college, the university—from the rostrum, the forum platform, and at the table around which a discussion group may gather, educators are today, and for years have been upholding and inculcating an appreciation of the American way of life and especially of the basic necessity of freedom to learn. In doing so they have increased the understanding of the need for a system of broadcasting free from the compulsions of censorship.

"We have indicated that broadcasters administer a public trust—free to derive profit from that administration if they choose, but enjoined to operate in the public interest; to assume responsibility which is always a concomitant of privilege. All through the American system these two factors will be found ranged side by side—privilege, and responsibility—*noblesse oblige.*

"As this report is written we cannot offer all of the answers to these and other equally basic questions. *But we are steadily moving* toward solutions, and the Federal Radio Education Committee, representing the cooperative effort and will of broadcasters and educators toward true public service, is a very proper vehicle for seeking answers to these questions which must eventually be satisfactorily answered. There is, and there can be, no basic conflict between educators and broadcasters within the proper concept of the American way. Broadcasters enjoy the privileges of broadcasting only because the American people are abidingly devoted to the perpetuation of a system of life under which the individual may enjoy the fullest freedom as a concomitant of his actions in the commonweal. The American system of education is the strongest bulwark for the continuation and perpetuation of that system in this country today. Therefore it is a mutual necessity that broadcasters and educators shall work together for the solution of the problems of education through radio in the truly democratic manner represented by the Federal Radio Education Committee."

HIGHLIGHTS IN B. M. I. SUBSCRIPTIONS TO DATE

(Continued from page 3905)

with a figure of 85%; though Districts 14, 4 and 1 are close behind with better than 80% subscribed.

Districts 2, 9 and 11 show better than 60% already signed up, and Districts 8 and 10 are in excess of 50%.

Despite the fact that when the meeting of District 7 was held in Dayton, Ohio, no solicitation for stock subscriptions could be made at the time, this District now shows a large subscription list with more coming in every day.

Below is published a list of the district meetings scheduled for 1940.

CORRECTION

In last weeks NAB REPORTS it was stated that in the Omaha meeting a vote of the members present showed their approval of the NAB Code "four to one".

Headquarters has been informed by Don Searle, KOIL, that this was an incomplete statement and did not reflect the whole aspect of the vote. The "four to one" vote was one favoring a "liberal interpretation" of the Code in contrast to that "of a strict enforcement," Mr. Searle stated.

TO STUDY POSSIBILITIES OF AURAL BROADCASTING ON HIGH FREQUENCIES

In view of the growing interest in frequency modulation and filing of applications to begin regular broadcast service as distinguished from experimental service on frequencies above 25,000 kilocycles, the Federal Communications Commission announced Tuesday that it will inquire fully into the possibilities of this system of modulation as well as amplitude modulation for aural broadcasting. Accordingly, an informal engineering hearing will be held before the full Commission beginning at 10 a. m. February 28, 1940, the Commission announced.

Pending the outcome of this hearing, it was decided to grant the following classes of applications:

(a) Applications for permission to carry out programs of fundamental research not authorized in the past and which show satisfactory promise of being able to contribute substantially toward the development of aural broadcasting service, and

(b) Applications filed by existing licensees to experiment with aural broacasting on frequencies above 25,000 kilocycles, provided the request to operate additional stations involves a program of experimentation directly related to the existing station.

About 20 applications are pending action by the Commission for new stations desiring to use frequency modulation. There are now 34 amplitude modulated stations and 20 frequency modulated stations authorized by the Commission.

Before a permanent policy can be established with respect to either or both systems of modulation on frequencies above 25,000 kilocycles for regular broadcasting service, studies and investigations must be made regarding the relative values of the two systems, the patent situation, the frequency needs of all radio services, and whether amplitude or frequency modulation, or both systems, should be recognized for other services as well as broadcasting. It is also necessary to consider the possible future effect that broadcasting on ultra high frequencies may ultimately have upon standard broadcasting in the band 550 to 1600 kilocycles.

The frequency bands above approximately 25,000 kilocycles are sometimes referred to as "very high frequencies", "ultra high frequencies", or "ultra short waves". These frequencies possess relatively short distance characteristics as compared with the lower frequency bands. The signals are subject to rather wide diurnal and seasonal variations in signal strength at distances beyond the horizon; therefore, as a practical matter, these frequencies may be said to be useful for broadcast service up to about 100 miles only.

Major E. H. Armstrong, professor of electrical engineering at Columbia University, appeared as a witness in behalf of frequency modulation at the Federal Communications Commission engineering hearing in June, 1936. On the basis of testimony of experts who testified at this hearing, and after studies had been made jointly by the Commission's Engineering Department and the Interdepartment Radio Advisory Committee, the Commission and the President adopted permanent allocations above 25,000 kilocycles for the various government and non-government radio services.

Amplitude modulation has long been used as the standard system for transmitting speech and music by radio. It is the only system of modulation which is used by the existing services operating on conventional frequencies, i.e., below 25,000 kilocycles.

The claimed chief advantages of the two methods are set forth briefly as follows:

Amplitude Modulation

1. Amplitude modulation utilizes a much narrower band of frequencies, i.e., about one-fifth of the frequency band required for wide band frequency modulated signals of equal fidelity.
2. Amplitude modulation may be used on all frequencies throughout the radio spectrum, whereas frequency modulation has proven useful only in the very high frequency bands.
3. Amplitude modulation is the only system which has been used successfully for television on the frequencies allocated by the Commission for television service.

Frequency Modulation

1. Frequency modulation possesses characteristics whereby it is possible to reduce the effects of all kinds of disturbances including atmospheric static, electrical noises, and background signal interference.
2. A frequency modulated broadcast station employing low power will provide greater service than a similar station using amplitude modulation. However, if the power of the two stations is substantially increased the percentage increase in service area of the frequency modulated signal will be materially reduced.
3. A frequency modulated receiver will accept only the strongest signal or noise as the case may be when the ratio of the desired to undesired signal strength is approximately 2 to 1. In the case of amplitude modulation, the ratio must be at least 20 to 1 for good broadcast service. Consequently, it is possible to operate frequency modulated stations at relatively close geographical locations without interference.
4. Frequency modulation has definite advantages over amplitude modulation in operating the low power services such as forestry, police, aircraft, etc. In such cases, each system is under the control of one licensee who can plan for the purchase, installation and operation of the entire transmitting and receiving system.

Radio Council on Children's Programs Formed to Aid Code

Following a luncheon meeting at Town Hall Club last Monday in New York between members of the Radio Council on Children's Programs, with Ed Kirby and Paul Peter of the National Association of Broadcasters, Margaret Cuthbert of the National Broadcasting Company, Gilson Gray of the Columbia Broadcasting System, and Joseph Creamer and Jules Seebach of the Mutual Broadcasting System, Mrs. Harold V. Milligan, chairman of the Council, made public a list of eight attributes which children's radio programs should have in order to be included in the recommended lists which the Council will distribute to members of affiliated organizations.

"The Council has agreed," declared Mrs. Milligan, "that children's radio programs should:

"1. Be entertaining.
"2. Be dramatic, with reasonable suspense.
"3. Be of high artistic quality and integrity.
"4. Be expressed in correct English and diction.
"5. Appeal to the child's sense of humor.
"6. Be within the scope of the child's imagination.
"7. Stress human relations for cooperative living.
"8. Stress intercultural understanding and appreciation."

In a brief statement telling of the origin and development of the Radio Council on Children's Programs, Mrs. Milligan, who is Radio Chairman of the General Federation of Women's Clubs, explained that initiators of the Council's movement to bring about better radio programs for children are: representatives of the General Federation of Women's Clubs, United Parents' Associations, American Library Association, National Society of New England Women, and Junior Programs, Inc. Since the Council began its activities about a year ago, other groups have become affiliated, and in order to broaden the scope of its activities and coordinate all efforts for improving children's radio programs, in line with the policy set forth in the NAB Code, the following representatives have been appointed Vice-Chairmen: Mrs. Dorothy Lewis, New England Colony of Women, patriotic women's organizations; Mrs. Nathaniel Singer, United Parents' Associations, parents' groups; Mrs. Harold V. Milligan, General Federation of Women's Clubs, women's clubs; Miss Rita Hochheimer, National Education Association, schools; Dr. Alice V. Keliher, Progressive Education Association, teachers' organizations; Mary Gould Davis, American Library Association, public libraries and librarians; and Mrs. Dorothy L. McFadden, founder-director of Junior Programs, Inc., children's program producers.

The NAB Headquarters Staff and the Code Compliance Committee will work in close cooperation with the Radio Council on Children's Programs.

FREE OFFERS

In deference to this season of giving, the Bureau of Radio Advertising suspends the publication of the current crop of "free offers" in this week's Reports.

The latest list of time-chiselers will be fully reported in a latter issue, however.

DONALD KAGY

Anyone knowing of the whereabouts of Donald Kagy is asked to communicate with Eugene Carr, Assistant Manager of WGAR, Cleveland, Ohio.

BROADCAST MEASUREMENTS

During November, Federal Communications Commission officials measured 713 broadcast stations, with 90 not measured.

Of these, 637 stations showed a maximum deviation within 0-10 cycles; 70 stations a deviation within 11-25 cycles; 5 stations a deviation within 26-50 cycles; and 1 station showing a maximum deviation of over 50 cycles.

EXPERIMENTAL AUTHORIZATION CHANGE

The effective date of application of paragraph 3(b) of Section 3.32 of the Rules Governing Standard Broadcast Stations, insofar as it pertains to existing experimental stations, was postponed from January 1, 1940, to May 1, 1940, by action of the Federal Communications Commission.

This particular provision reads:

> "In case a special experimental authorization permits additional hours of operation, no licensee shall transmit any commercial or sponsored program or make any commercial announcements during such time of operation. In case of other additional facilities, no additional charge shall be made by reason of transmission with such facilities."

SPECIAL AUTHORIZATIONS FOR HOLIDAY RADIO PROGRAMS

The Federal .Communications Commission has announced that from December 20 through December 30, it will entertain on 48 hours notice and may grant, through the usual officials, applications for individually designated programs of a religious, ceremonial, or other nature having to do with the celebration of Christmas and the New Year.

FEDERAL COMMUNICATIONS COMMISSION

FINDING OF FACT

The Federal Communications Commission has granted a proposed finding of fact proposing to grant the application of WRTD, **Richmond, Virginia,** to change its operating assignment from **1500 kilocycles,** 100 watts, unlimited time, to **590 kilocycles,** 1,000 watts, unlimited time, using a directional antenna at night.

The Commission found that the applicant is financially qualified to install the equipment and to operate the station as proposed. Also, the directional antenna will comply with the Commission's Rules and will render proper service.

FINAL ORDER

The Commission has adopted a final order granting the application of KOH, **Reno, Nevada,** and KERN, **Bakersfield, California.** KOH was granted permission to move its transmitter locally, install new equipment and change its frequency from **1380 kc.,** 500 watts, unlimited time, to **630 kc.,** 1000 watts, unlimited time, using directional antenna at night. KERN was granted authority to change its frequency from **1370 kc.** to **1380 kc.,** increase its power from 100 watts to 1000 watts, to change its transmitter site and install new equipment.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings or oral arguments are scheduled before the Commission during the week beginning Monday, December 25.

There will be no regular meetings of the Commission during the week of December 25. The next regular meetings of the Commission will be on January 4 and 5.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WMBC—E. J. Hunt, Detroit, Mich.—Granted authority to transfer control of Michigan Broadcasting Co., licensee of station WMBC (representing 1,643 shares, or 62%, of issued and outstanding capital stock of licensee corporation), from E. J. Hunt to John L. Booth, for a consideration of $125,000. (Station operates on **1420 kc.,** 250 watts day, 100 watts night, unlimited time.)

WHK—The United Broadcasting Co., Cleveland, Ohio.—Granted extension of special temporary authority to transmit facsimile signals between the hours of 1 and 6 a. m., using 1 KW power, for the period ending August 1, 1940. (The present assignment of WHK is **1390 kc.,** 1 KW, 5 KW LS, unlimited time.)

W8XE—The United Broadcasting Co., Cleveland, Ohio.—Granted license for replacement of transmitter, using the transmitter constructed under authority for relay broadcast station WRPM, and increase power of facsimile station W8XE from 50 to 100 watts.

WTIC—Travelers Broadcasting Service Corp., Hartford, Conn.—Granted modification of special authority to use directional antenna for night operation.

WFTM—Fort Meyers Broadcasting Co., Fort Meyers, Fla.—Granted modification of construction permit for approval of studio and transmitter sites, installation of vertical radiator, and increase in night power from 100 to 250 watts, operating on **1210 kc.,** 250 watts day, unlimited time.

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Granted modification of construction permit to increase power from 100 to 250 watts, operating unlimited time on **1500 kc.**

KLAH—Carlsbad Broadcasting Co., Carlsbad, N. Mex.—Granted modification of license to increase night power from 100 to 250 watts, on **1210 kc.,** unlimited time.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted modification of license to increase night power from 100 to 250 watts, **1370 kc.,** unlimited time.

WISE—Harold H. Thoms, Asheville, N. C.—Granted modification of license to increase night and day power from 100 to 250 watts, operating unlimited time on **1370 kc.**

KWJB—Sims Broadcasting Co., Globe, Ariz.—Present license extended on a temporary basis only, for a period of 3 months.

WAXG—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Renewal of relay broadcast station license extended on a temporary basis only, and application for renewal designated for hearing to be heard in connection with application of broadcast station WTAL for transfer of control.

KXO—E. R. Irey, F. M. Bowles, El Centro, Calif.—Present license extended on a temporary basis only, for a period of 3 months, subject to whatever action may be taken upon pending application for renewal.

The Commission granted an amended application of Station WEEI, The Columbia Broadcasting System, Inc., Boston, Mass., for a construction permit to employ present daytime directional antenna pattern for both day and nighttime operation and increase night power from 1 KW to 5 KW, on **590 kc.,** unlimited time.

RENEWAL OF LICENSES

The following relay broadcast stations were granted renewal of licenses for the period ending December 1, 1940:

WEGQ, area of Boston; WEHA, area of New York City; KEIM, area of Phoenix, Ariz.; WEKA, area of East Lansing, Mich.; WEHB, WEHD, WEHU, WEHV, WEHX, area of Cleveland, Ohio; WENK, area of Erie City, Pa.; WEHF, area of Cleveland, Ohio; WEKF, area of Paducah, Ky.

The following stations were granted renewal of licenses for the regular period:

KAWM, Gallup, N. Mex.; KDAL, Duluth, Minn.; KDNT, Denton, Tex.; KFGQ, Boone, Iowa; KGFL, Roswell, N. Mex.; KMAC, San Antonio, Tex.; KOBH, Rapid City, S. Dak.; KOVC, Valley City, North Dakota; KSAL, Salina, Kans.; KSAN, San Francisco, Calif.; KTUC, Tucson, Ariz.; KTSW, Emporia, Kans.; WAPO, Chattanooga, Tenn.; WBTH, Williamson, W. Va.; WCBS, Springfield, Ill.; WELL, Battle Creek, Mich.; WGNC, Gastonia, N. C.; WGRC, New Albany, Ind.; WHDF, Calumet, Mich.; WHBB, Selma, Ala.; WKBB, Dubuque, Iowa; WHBQ, Memphis, Tenn.; WHLB, Virginia, Minn.; WHLS, Port Huron, Mich.; WILM, Wilmington, Del.; WKBZ, Muskegon, Mich.; WKEU, Griffin, Ga.; WJAC, Johnstown, Pa.; WLAP, Lexington, Ky.; WMAS, Springfield, Mass.; WMBC, Detroit, Mich.; WMBH, Joplin, Mo.; WMEX, Boston, Mass.; WNBF, Binghamton, N. Y.; WMFD, Wilmington, N. C.; WPAY, Portsmouth, Ohio; WRAK, Williamsport, Pa.; WRJN, Racine, Wis.; WBNY, Buffalo, N. Y.; KGKB, Tyler, Tex.; KUTA, Salt Lake City, Utah; KATE, Albert Lea, Minn.; KELD, El Dorado, Ark.; KGLU, Safford, Ariz.; KIUP, Durango, Colo.; KLUF, Galveston, Tex.; KRIC, Beaumont, Tex.; KRLH, Midland, Tex.; KRNR, Roseburg, Ore.; KWBG, Hutchinson, Kans.; KVWC, Vernon, Tex.; KXL, Portland, Ore.; WCHV, Charlottesville, Va.; WGPC, Albany, Ga.; WJMS, Ironwood, Mich.; KNET, Palestine, Tex.; WJBK, Detroit, Mich.; WMSL, Decatur, Ala.; WNOE, New Orleans, La.; WPAD, Paducah, Ky.; WGRA, Rome, Ga.; WRTD, Richmond, Va.; WSLI, Jackson, Miss.; WSTP, Salisbury, N. C.; WSYB, Rutland, Vt.

The following station was granted renewal of license for the period ending October 1, 1940: KFPW, Fort Smith, Ark.

The following stations were granted extension of licenses upon a temporary basis only, pending receipt of and determination upon application for renewal of license, in no event later than February 1, 1940:

KGKY, Scottsbluff, Nebr.; WFOR, Hattiesburg, Miss.; WMFJ, Daytona Beach, Fla.

The following stations were granted extension of licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than February 1, 1940:

KCRJ, Jerome, Ariz.; WMFR, High Point, N. C.

KRKO—Lee E. Mudgett, Everett, Wash.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1940, subject to whatever action may be taken upon the pending applications of KRKO for renewal of license, construction permit and assignment of license, and the application of Cascade Broadcasting Co., Inc., for construction permit.

WCNW—Arthur Faske, Brooklyn, N. Y.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1940, subject to whatever action may be taken upon pending application for renewal of license.

WRDO—WRDO, Inc., Augusta, Ga.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1940, subject to whatever action may be taken upon pending application for renewal of license.

WWRL—Long Island Broadcasting Corp., Woodside, L. I.—Granted renewal of license on a temporary basis only, for the period ending December 1, 1940, subject to whatever action may be taken by the Commission upon the application of WWRL for renewal of license pending before it.

KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only, for the period ending February 1, 1940, pending determination upon application for renewal of license.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Present license further extended upon a temporary basis only, for the period ending February 1, 1940, pending determination upon application for renewal of license.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Present license extended upon a temporary basis only, for the period ending February 1, 1940, pending determination upon application for renewal of license.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Special experimental authorization to operate a "Satellite" station on **1370 kc.,** 10 to 100 watts power, unlimited time, in addition to WLLH, was extended for a period of one month ending February 1, 1940.

KSUB—Leland M. Perry, Cedar City, Utah.—Extended special temporary authorization to Leland M. Perry, surviving partner of Johnson & Perry, a partnership, to operate station KSUB for a period of one month, from January 1 to February 1, 1940, upon a temporary basis only, subject to whatever action may be taken upon any formal application for regular authorization that may be submitted with respect to station KSUB, and that nothing contained in said special temporary authority shall be construed as a finding by the Commission that the operation of the station is or will be in the public interest beyond the express terms thereof.

WAXG—Florida Capitol Broadcasters, Inc., area of Tallahassee, Fla.—Extended relay broadcast station license further upon a temporary basis only, for the period January 1 to February 1, 1940, pending determination upon application for renewal.

KEIO—KUOA, Inc., area of Siloam Springs, Ark.—Extended relay broadcast station license further upon a temporary basis only, for the period January 1, to February 1, 1940, pending determination upon application for renewal.

MISCELLANEOUS

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Granted license to cover construction permit for change in equipment and increase in power to 250 watts; **1370 kc.**, unlimited time; formerly operated with 100 watts.

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted license to cover construction permit for new transmitter, changes in antenna, local move of transmitter, and increase in day power; **1240 kc.**, 1 KW night, 5 KW day, unlimited time.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Granted license to cover construction permit for changes in transmitter and increase in power from 100 watts to 250 watts, **1370 kc.**, unlimited time.

WKRP—Radio Station WSOC, Inc., Portable-Mobile (area of Charlotte, N. C.).—Granted construction permit to make change in transmitter in portable-mobile station.

WMOB—S. B. Quigley, Mobile, Ala.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WMOB—S. B. Quigley, Mobile, Ala.—Granted license to cover construction permit and modification thereof for new broadcast station, **1200 kc.**, 100 watts power, daytime only.

WFTL—Tom M. Bryan, Fort Lauderdale, Fla.—Granted license to cover construction permit and modification thereof for new broadcast station, **1370 kc.**, 100 watts power, 250 watts day, unlimited time.

WFTL—Tom M. Bryan, Fort Lauderdale, Fla.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted license to cover construction permit and modification thereof for increase in day power from 1 KW day to 5 KW day; new transmitter, local move of transmitter and new antenna; **1260 kc.**, 1 KW night and 5 KW day, unlimited time.

Springfield Radio Service, Inc., Springfield, Ohio.—Granted petition to accept appearance filed late in re application for new station to operate on **780 kc.**, 250 watts, daytime.

Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—Granted motion for leave to amend application for new station to change frequency from **1370 kc.** to **1150 kc.**, and operate 250 watts, daytime only.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted special temporary authority to operate from 6:00 p. m. to 6:45 p. m., EST, on December 24, 1939, in order to broadcast Richmond's Christmas Mother Pageant.

Chilton Radio Corp., Dallas, Tex.—Granted petition to consolidate application for new station to operate on **1370 kc.**, 250 watts, unlimited time, with that of V. O. Stamps for a new station in Dallas, requesting the same facilities.

Dixie Broadcasting Corp., La Grange, Ga.—Passed nisi petition for enlargement of issues and consolidation with the application of Valley Broadcasting Co., West Point, Ga., for a new station to operate on **1310 kc.**, 250 watts, unlimited time.

WAAB—The Yankee Network, Inc., Boston, Mass.—Granted petition to extend time for filing findings to be proposed by the parties to February 14, 1940, in re application of The Mayflower Broadcasting Corp., Boston, for a new station to operate on **1410 kc.**, 500 watts, 1 KW LS, unlimited time (facilities of station WAAB), and the application for renewal of license of station WAAB.

Chilton Radio Corp., Dallas, Tex.—Granted authority to take depositions in re application for new station to operate on **1370 kc.**, 250 watts, unlimited time.

KRMD—Radio Station KRMD, Inc., Shreveport, La.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54.

WEKQ—Allen T. Simmons (Area of Tallmadge, Ohio), Portable-mobile.—Granted modification of license of portable mobile relay broadcast station to increase power from 25 watts to 100 watts.

WEIK—WFBM, Inc., Portable-Mobile (area of Indianapolis, Ind.).—Granted modification of license of portable-mobile relay broadcast station to use 40 watts power on **31220 kc.** for the transmission of orders only.

KBKR—Louis P. Thornton, Baker, Ore.—Granted license to cover construction permit and modification thereof, for new broadcast station to operate on **1500 kc.**, 100 watts, 250 watts day, unlimited time.

KARM—George Harm, Fresno, Calif.—Granted license to cover construction permit for changes in equipment and increase in power; **1310 kc.**, 250 watts power, unliimted time.

WHIZ—WALR Broadcasting Corp., Zanesville, Ohio.—Granted license to cover construction permit for local move and new antenna; **1210 kc.**, 100 watts, unlimited time.

W1XOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to test the high frequency broadcast equipment of station W1XOJ, authorized by modification of construction permit, on frequency **43000 kc.**, with power not to exceed 2000 watts, for the period beginning December 16, 1939, and ending not later than January 14, 1940, and to make adjustments on equipment installed and for tuning and adjustments of the antenna elements which are now assembled for erection atop 400-foot mast.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period December 20, 1939, to not later than January 18, 1940, pending the filing of modification of license and completion of arrangements with Station KWLC.

WCLS—WCLS, Incorporated, Joliet, Ill.—Granted special temporary authority to operate from 8:30 p. m. to 10:45 p. m., CST, on January 6, 16, and 23, 1940, in order to broadcast basketball games only.

Bamberger Broadcasting Service, Inc., Portable-Mobile, Newark, N. J.—Granted construction permits for two new high frequency relay broadcast stations to be used to relay programs where wire facilities are not available, to be broadcast over applicant's standard broadcast station, frequencies **31620**, **35260**, **37340** and **39620 kc.**, 0.2 watt power.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Granted license to cover construction permit for move of transmitter and studio sites locally, and changes in antenna system; **1310 kc.**, 250 watts, unlimited time.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted special temporary authority to operate from 8:00 p. m. to 10:30 p. m., EST, on December 16, 1939, in order to broadcast Dedication of Radio Station WKNY, provided station authorized to conduct program tests.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted special temporary authority to use studios in the Governor Clinton Hotel, Kingston, N. Y., as main studios during the period authorized for program tests, pending action on formal application to change location of main studio.

WHB—WHB Broadcasting Co., Kansas City, Mo.—Denied special temporary authority to operate from 5:15 p. m., CST, to the conclusion of the Rose Bowl football game on January 1, 1940, in order to broadcast the football game only.

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Granted construction permit to make changes in auxiliary transmitter for auxiliary purposes only; **580 kc.**, 1 KW night and day.

KTOH—Garden Island Publishing Co., Ltd., Lihue, Hawaii.—Granted modification of construction permit for new broadcast station, to move transmitter site to approximately one mile north of previously approved site, and extend commencement date from August 20, 1939, to 60 days after grant and completion date 180 days thereafter; **1500 kc.**, 100 watts night, 250 watts day, unlimited.

WHLD—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Granted modification of construction permit for new broadcast station, for approval of transmitter site, installation of new equipment and vertical radiator. Transmitter site to be located at Niagara, N. Y.; **1260 kc.**, 1 KW, daytime.

WOCB—Harriett M. Alleman and Helen W. MacLellan, d/b as Cape Cod Broadcasting Company, Yarmouth, Mass.—Granted modification of construction permit to increase night power to 250 watts, for extension of completion date from January 1, 1940, to May 1, 1940; **1210 kc.**, 250 watts, unlimited.

WRNL—Richmond Radio Corp., Richmond, Va.—Granted license to cover construction permit for auxiliary transmitter to operate on **880 kc.**, 500 watts, for emergency use only.

WCPO—Scripps-Howard Radio, Inc., Cincinnati, Ohio.—Granted authority to determine operating power by direct measurement of antenna input in compliance with the terms of Section 3.54, with certain additional power specifications.

WEMA—Westinghouse Electric & Manufacturing Co., Portable-mobile (area of Boston, Mass.).—Granted modification of license to increase power of relay broadcast station on all four licensed frequencies to 50 watts.

WEMB—Westinghouse Electric & Manufacturing Co., Portable-mobile (area of Boston, Mass.).—Granted modification of license to increase power of relay broadcast station on all four licensed frequencies to 50 watts.

WEMN—Westinghouse Electric & Manufacturing Co., Portable-mobile (area of Philadelphia, Pa.).—Granted modification of license to increase power of relay broadcast station on all four licensed frequencies to 50 watts.

WEMO—Westinghouse Electric & Manufacturing Co., Portable-mobile (area of Pittsburgh, Pa.).—Granted modification of license to increase power of relay broadcast station on all four licensed frequencies to 50 watts.

WEHG—Columbia Broadcasting System, Inc., Portable-mobile (area of WABC, New York, N. Y.).—Granted modification of license to increase power of portable-mobile station to 2.0 watts.

WSPB—WSPB, Inc., Sarasota, Fla.—Granted license to cover construction permit for new broadcast station, and modification thereof; **1420 kc.**, 100 watts night, 250 watts day, unlimited time.

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted license to cover construction permit, and modification thereof, for changes in equipment and increase in power to 1 KW; **1430 kc.**, unlimited time.

WRTD—Times Dispatch Radio Corp., Richmond, Va.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with additional power specifications.

WKAQ—Radio Corp. of Porto Rico, San Juan, Puerto Rico.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54, with additional power specifications.

WLWC—The Crosley Corp., Portable-mobile (area of Cincinnati, Ohio.).—Granted modification of license of relay broadcast station to increase power to 50 watts.

WLWD—The Crosley Corp., Portable-mobile (area of Cincinnati, Ohio.).—Granted modification of license of relay broadcast station to increase power to 50 watts.

WLWG—The Crosley Corp., Portable-mobile (area of Cincinnati, Ohio.).—Granted license to cover construction permit to increase power to 2 watts and install new transmitter in relay broadcast station.

WLWH—The Crosley Corp., Portable-mobile (area of Cincinnati, Ohio.).—Granted license to cover construction permit to install new transmitter in relay broadcast station.

WLWI—The Crosley Corp., Portable-mobile (area of Cincinnati, Ohio.).—Granted license to cover construction permit to increase power to 15 watts and install new transmitter in relay broadcast station.

WELV—West Virginia Broadcasting Corporation, Portable-mobile (area of Wheeling, W. Va.).—Granted modification of license to increase operating power of relay broadcast station to 50 watts.

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted special temporary authority to operate from 5:00 p. m. to 8:00 p. m., EST, on December 24, 1939, and from 10:30 p. m., December 24, 1939 to 1:00 p. m., EST, December 25, 1939, in order to broadcast non-commercial public service broadcasts as described in letter dated December 11, 1939.

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, Puerto Rico.—Granted special temporary authority to operate from 10:00 p. m. to 12:00 p. m., AST, on December 29, 1939, in order to broadcast holiday programs.

The WGAR Broadcasting Co., Portable Mobile (area of WGAR, Cleveland, Ohio).—Granted construction permit for new high frequency relay broadcast station to operate on **132260, 134080, 135480** and **135760 kc.**, power 100 watts.

WLWO—The Crosley Corporation, Cincinnati, Ohio.—Granted modification of construction permit for new equipment and increased power, for extension of completion date from January 1, 1940 to July 1, 1940.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Granted special temporary authority to operate with power of 250 watts from 8:00 p. m. to 9:30 p. m., CST, on December 16, 27, 1939 and January 1, 1940, and from 7:00 p. m. to 8:30 p. m., CST, on December 21, 1939 and January 6, 1940, during the broadcasts of basketball games only.

WSBT—South Bend Tribune, South Bend, Ind.—Granted petition insofar as it requests acceptance of amendment to application seeking a change in directional antenna structure described in pending application requesting use of frequency **930 kc.**, with 500 watts power, unlimited time.

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Granted renewal of license for the regular period. The application for renewal of license for WMAQ was designated for hearing because of the request of WHA, Madison, Wisconsin, for its facilities. On October 27, 1939, the Commission dismissed without prejudice the application of WHA and the hearing was cancelled.

RCA Communications, Inc., New York City.—Dismissed the matter in re informal application for authority under Sec. 325(b) of the Communications Act, to maintain apparatus to be used in connection with program transmissions, and closed the files insofar as it relates to this application.

The St. Louis University, St. Louis, Mo.—Granted special temporary authority to operate from 4:45 p. m. to 5:00 p. m., CST, on December 31, 1939, in order to broadcast Holy Service.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with Station WGBF, with reduced power of 250 watts, from 8:00 p. m., CST, to the conclusion of the basketball games on December 28, 1939, January 18 and 25, 1940, in order to permit WGBF to broadcast basketball games only.

WGBF—Evansville on the Air, Evansville, Ind.—Granted special temporary authority to operate simultaneously with Station KFRU as above in order to broadcast basketball games only.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted construction permit to use old RCA 250-W, transmitter as an auxiliary transmitter at new site, 341 Rising Main St., Pittsburgh, Pa.; **1500 kc.**, 250 watts, auxiliary purposes only.

WMBG—Havens & Martin, Inc., Richmond, Va.—Granted modification of construction permit for authority to install new transmitter; **1350 kc.**, 1 KW night, 5 KW day, unlimited, directional antenna.

APPLICATIONS FILED AT FCC

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Modification of license to request classification of station as Class III-A.

WIS—The Liberty Life Insurance Co., Columbia, S. C.—Authority to determine operating power by direct measurement of antenna power.

570 Kilocycles

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Construction permit to install new transmitter, make changes in directional antenna, increase power from 1 KW to 5 KW, move transmitter from College Point Causeway, Flushing, N. Y., to Belleville, Turnpike, Kearny, N. J. Amended: to request 1 KW-5 KW day power and make equipment changes.

620 Kilocycles

KWFT—Wichita Broadcasting Co., Wichita Falls, Texas.—Construction permit to install new transmitter, directional antenna day and night use, increase power from 250 watts; 1 KW day, to 5 KW. Amended to request 1 KW, 5 KW day power (use directional antenna day and night).

630 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—Construction permit to install new transmitter and increase power from 1 to 5 KW (directional antenna for night use).

880 Kilocycles

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Modification of license to increase power from 250 watts to 500 watts.

920 Kilocycles

WAAF—Drovers Journal Publishing Co., Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

940 Kilocycles

WAVE—WAVE, Inc., Louisville, Ky.—Construction permit to increase power from 1 to 5 KW, install new transmitter and directional antenna for day and night use. Amended antenna changes, and move transmitted from 675 S. Fourth St., Louisville, Ky., to Hamburg Pike, 2 miles N. of Jeffersonville, Ind.

970 Kilocycles

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Construction permit to install new transmitter, increase power from 100 watts to 1 KW, change hours of operation from day to limited. Amended equipment.

1050 Kilocycles

KFBI—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—Modification of construction permit (B4-P-1865) as modified, for new transmitter, antenna and move of transmitter and studio, further requesting authority to install directional antenna for night use, and change power and hours of operation from 5 KW, limited, to 5 KW to sunset at KNX (P.S.T.) and 1 KW thereafter, unlimited time, extend commencement date 30 days after grant and completion date 90 days thereafter.

1080 Kilocycles

WMBI—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of license to change hours of operation from limited, shares with WCBD, to limited time only. Contingent on WCBD going to new frequency.

1120 Kilocycles

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Construction permit to install new transmitter, directional antenna for day and night use; increase power from 250 watts night and 1 KW day, to 5 KW day and night; and move transmitter from 231 West Michigan St., Milwaukee, Wis., to near Milwaukee, Wis. Amended to request 1 KW, 5 KW day power.

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Modified license to change hours of operation from daytime to unlimited, using 500 watts.

NEW—Willard Carver, Thomas B. Williams, and Byrne Ross, Lawton, Okla.—Construction permit for a new broadcast station to be operated on **1120 kc.**, 250 watts, daytime.

1140 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension of special experimental authority for unlimited time, using directional antenna for night use, for period 2-1-40 to 2-1-41.

1200 Kilocycles

WJHL—WJHL, Inc., Johnson City, Tenn.—Construction permit to make changes in transmitting equipment; install directional antenna for night use; increase power from 250 watts to 1 KW; change frequency from **1200 kc.** to **880 kc.**; move transmitter 500 feet east of present location, from Kingsport Highway (3 miles north) to Kingsport Highway 11E, 3 miles from Johnson City, Tenn. Amended re stock ownership.

WTHT—The Hartford Times, Inc., Hartford, Conn.—Modification of construction permit (B1-P-2240) for increase in power; move of transmitter to site to be determined, Hartford, Conn.; install new transmitter; changes in antenna, further requesting approval of antenna; change type of transmitter; increase in power from 100 watts, 250 watts day, to 250 watts day and night; and approval of transmitter site at northeast corner of Talcott Road and South Quaker Lane, West Hartford, Conn.

WESX—North Shore Broadcasting Company, Salem, Mass.—License to cover construction permit (B1-P-2332) for a new broadcast station.

WESX—North Shore Broadcasting Company, Salem, Mass.—Authority to determine operating power by direct measurement of antenna power.

KVOS—KVOS, Inc., Bellingham, Wash.—Authority to determine operating power by direct measurement of antenna power.

KVOS—KVOS, Inc., Bellingham, Wash.—License to cover construction permit (B5-P-2456) for changes in transmitting equipment and increase in power.

KBTM—Jay P. Beard, tr/as Regional Broadcasting Co., Jonesboro, Ark.—License to cover construction permit (B3-P-2516) for changes in equipment, increase power, and change hours of operation. Amended re section 5c.

NEW—Tri-County Broadcasting Co., DuBois, Pa.—Construction permit for a new broadcast station to be operated on **1200 kc.**, 250 watts, unlimited time.

1210 Kilocycles

KANS—The KANS Broadcasting Co., Wichita, Kans.—License to cover construction permit (B4-P-2479) as modified for changes in equipment and increase in power.

KANS—The KANS Broadcasting Co., Wichita, Kans.—Authority to determine operating power by direct measurement of antenna power.

KXOX—Sweetwater Radio, Inc., Sweetwater, Tex.—Modification of license to change hours of operation from daytime to unlimited, using 250 watts power.

1220 Kilocycles

KTMS—News-Press Publishing Co., Santa Barbara, Calif.—Construction permit to make changes in transmitting equipment and increase power from 500 watts to 1 KW, directional antenna for day and night use.

1240 Kilocycles

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Authority to determine operating power by direct measurement of antenna power.

1280 Kilocycles

KLS—S. W. Warner and E. N. Warner, d/b as Warner Bros., Oakland, Calif.—Authority to determine operating power by direct measurement of antenna power.

1310 Kilocycles

WTEL—Foulkrod Radio Engineering Company, Philadelphia, Pa.—Modification of license to change frequency from **1310 kc.** to **1500 kc.**, and hours of operation from shares with WHAT to unlimited time, using 100 watts power.

KARM—George Harm, Fresno, Calif.—Authority to determine operating power by direct measurement.

WSGN—The Birmingham News Co., Birmingham, Ala.—Construction permit to install new antenna; increase power from 100 watts night, 250 watts day, to 250 watts day and night; and move transmitter from 1627 N. 20 Way, to 2200 Fourth Ave., N., Birmingham, Ala. Amended re antenna.

1330 Kilocycles

KMC—Carl E. Haymond, Tacoma, Wash.—Authority to determine operating power by direct measurement of antenna power.

1360 Kilocycles

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Construction permit to install new transmitter and vertical antenna; increase power from 500 watts to 500 watts night, 1 KW day; change in hours of operation from shares WSBT to unlimited; and move transmitter (contingent on WSBT going to **930 kc.**). Amended: Site to be determined in or near Chicago, Ill.

WCSC—South Carolina Broadcasting Company, Inc., Charleston, S. C.—Authority to determine operating power by direct measurement of antenna power. Amended re sections 4 (a) and 7.

1390 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Construction permit to install directional antenna for night use; increase power from 1 KW nigbt and 5 KW day, to 5 KW day and nigbt. Amended re antenna.

1400 Kilocycles

WHDL—WHDL, Inc., Olean, N. Y.—Modification of license to increase hours of operation from daytime to unlimited time, using 250 watts power day and night.

1420 Kilocycles

WCBS—WCBS, Inc., Springfield, Ill.—Authority to determine operating power by direct measurement of antenna power.

WELL—Enquirer-News Co., Battle Creek, Mich.—Construction permit to install new transmitter, make antenna changes, and increase power from 100 watts to 250 watts.

NEW—Cbattanooga Broadcasting Corporation, Chattanooga, Tenn.—Construction permit for new broadcast station to be operated on **1420 kc.,** 250 watts power, unlimited time. Contingent on B3-P-1939, Docket 4909, requests facilities of WAPO if vacated.

NEW—Chattanooga Broadcasting Corp., Chattanooga, Tenn.—Construction permit for a new broadcast station to be operated on **1420 kc.,** 250 watts, unlimited time. (Contingent on B3-P-1939, Docket 4909, facilities of WAPO, when vacated.)

1500 Kilocycles

KNOW—Frontier Broadcasting Co., Austin, Tex.—Authority to determine operating power by direct measurement of antenna power.

NEW—The KAW Valley Broadcasting Co., Inc., Topeka, Kans.—Construction permit for a new station to be operated on **1500 kc.,** 250 watts, unlimited time.

MISCELLANEOUS

NEW—Albert S. and Robert A. Drohlich, d/b as Drohlich Brothers, Sedalia, Mo.—Construction permit for a new relay (high frequency) broadcast station on **30820, 33740, 35820** and **37980 kc.,** 25 watts power, A-3 emission, hours of operation, Section 4.24, to communicate as a relay broadcast station in accordance with Sections 4.21, 4.22(c), 4.23(b) and 4.25(b). Location: Portable-Mobile, area of Sedalia, Mo.

NEW—WGN, Inc., Chicago, Ill.—Construction permit for a new high frequency broadcast station located at 435 N. Michigan Ave., Chicago, Ill., **43200 kc.,** 1000 watts power, unlimited time, Section 4.4, emission special.

W6XDU—Don Lee Broadcasting System, area Los Angeles and environs.—License to cover construction permit (B5-PVB-35) as modified for a new television station.

W6XDU—Don Lee Broadcasting System, area Los Angeles.—Modification of license to change frequency band to **318000-330000 kc.**

KEIL—KMTR Radio Corp., area of State of California.—Modification of construction permit (B5-PRE-331), requesting increase in power from 25 watts and 50 watts on **33740 kc.,** for transmission of orders only, to 50 watts.

WALO—Columbia Broadcasting System, Inc., area of New York, N. Y.—License to cover construction permit (B1-PRE-310) for new relay broadcast station.

WALP—Columbia Broadcasting System, Inc., area of New York, N. Y.—License to cover construction permit (B1-PRE-309) for a new relay broadcast station.

W2XAB—Columbia Broadcasting System, Inc., New York, N. Y.—License to cover construction permit (B1-PVB-6) as modified for new equipment, increase in power, add A-3 emission, **50000-56000 kc.** Amended to request **42000-56000, 60000-86000 kc.**

NEW—J. W. Woodruff, tr. as Atlanta Broadcasting Co., Atlanta, Ga.—Construction permit for a new bigb frequency broadcast station to be located at Atlanta, Ga., to operate on **42800 kc.,** 1000 watts, unlimited time, emission special for frequency modulation.

NEW—The Columbus Broadcasting Co., Inc., Columbus, Ga.—Construction permit for a new high frequency broadcast station to be located at Columbus, Ga., to operate on **43000 kc.,** 1000 watts, unlimited time, emission special for frequency modulation.

W9XZV—Zenith Radio Corp., Chicago, Ill.—Modification of license for changes in authorized frequencies from **42000-56000, 60000-86000** to **44000-50000 kc.** in accordance with revised rules.

W2XB—General Electric Co., Albany, N. Y.—License to cover construction permit (B1-PVB-11) to request frequency **66000-72000 kc.** in accordance with Commission's letter of 7-27-39 and to specify location as Town of New Scotland, N. Y. Amended: Specified same frequencies as granted in construction permit.

W1XA—General Electric Co., Bridgeport, Conn.—Reinstatement of construction permit (B1-PVB-12) for new television station frequencies **60000-86000 kc.,** 175 watts for visual, 100 watts aural A5, visual, A3, aural.

WEHK—Columbia Broadcasting System, Inc., Portable-Mobile.—Construction permit to change equipment and increase power from 1.5 watts to 2 watts.

WLWG—The Crosley Corp., Portable.—License to cover construction permit (B2-PRE-322) to install new transmitter and increase power to 2 watts.

WLWO—The Crosley Corp., Mason, Obio.—Modification of license to change frequencies as follows: Delete **6060 kc.** and add **6080 kc.**

NEW—The Moody Bible Institute of Chicago, Chicago, Ill.—Construction permit for a new bigh frequency broadcast station to be located at R. F. D. No. 1, Addison, Ill. Frequency **43000 kc.,** 1 KW power, special emission, unlimited time.

W9XG—Purdue University, West Lafayette, Ind.—Construction permit to request frequency channel **66000-72000 kc.** for visual and aural, power 3000 watts visual, 750 watts aural, emission A5 visual, A3 aural and changes in equipment.

NEW—General Electric Co., Schenectady, N. Y.—Construction permit for a new television broadcast station to be located at New Scotland, New York, to be operated on **156000-162000 kc.,** 10 watts, A-5, unlimited.

WEMZ—WHEC, Inc., Rochester, N. Y.—License for reinstatement of relay broadcast station WEMZ.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Construction permit to make equipment changes and increase power from 20 KW to 50 KW.

NEW—James F. Hopkins, Inc., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be located at Detroit, Michigan; **43400 kc.,** 1 KW power, special emission, unlimited time.

WEJA—National Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-PRE-305) as modified, to increase power to 100 watts and make changes in equipment.

NEW—The Travelers Broadcasting Service Corp., Avon, Conn.—Construction permit for a new television broadcast station on **84000-90000 kc.,** power output 1000 watts, emission A3 and A5 for aural and visual transmissions. Amended: To request **66000-72000 kc.**

NEW—Woodmen of The World Life Insurance Society, Portable-Mobile.—Construction permit for a new relay (low frequency) broadcast station to be operated on **1622, 2058, 2150, 2790 kc.,** power 10 watts, emission A3 and hours in accordance Section 4.24.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Assured Remolded Tire Distributors—See Beho Rubber Company, Inc.

Beho Rubber Company, Inc., 2441 Indiana Ave., Chicago, and Bernard Holtzman, Mae Murray and Milton M. Holtzman, individually and as officers and directors of the corporation, also trading as The Best Tire House, The Modern Improved Retread Outlet, and The Assured Remolded Tire Distributors, engaged in selling and distributing used tires which have been retreaded or recapped, are named respondents in a complaint charging misrepresentation.

The respondents have made many statements concerning their product, the complaint alleges, through their salesmen traveling throughout the various States, among which are that tires purchased from them will be identical in quality with samples displayed by salesmen taking orders; that carcasses used by the respondents in their tires are less than one year old, and will be free from boots or patches; that the tires shipped will be of the size ordered and will be shipped to the purchaser from points in the vicinity in which the purchaser is located, on consignment, and that the freight rate will be at a lower rate than that actually applying to such shipments; that large concerns such as Sears, Roebuck & Company sell retreaded or recapped tires, and that the respondents supply Sears, Roebuck & Company with such tires for resale to the purchasing public; that Beho Rubber Company, Inc., 2441 Indiana Ave., Chicago, The Best Tire House, 2433 Indiana Ave., Chicago, The Modern Improved Retread Outlet, 709 South Dearborn St., Chicago, and The Assured Remolded Tire Distributors, 2441 Indiana Ave., Chicago, have no connection or affiliation with each other and are separate and distinct businesses in competition with each other; that respondents' tires are suitable for the purpose for which they are purchased and will give many miles of service at a fraction of the cost of new tires, and that respondents are manufacturers of the tires sold by them.

The complaint alleges that the respondents do not ship tires of the same quality as the samples displayed by their salesmen, but make a practice of shipping shoddy, and, in many cases, worthless merchandise. In many instances the tires are made of old and useless tires, and usually contain boots and patches. The respondents do not always ship tires of the size ordered, and shipments are not made from points in the vicinity in which the purchaser is located, except in the vicinity of Chicago, and the freight rate applying to purchasers is often much higher than represented by respondents' salesmen. The complaint alleges that Sears, Roebuck & Company does not sell retreaded or recapped tires, and the respondents do not sell tires to Sears, Roebuck & Company, nor do the respondents make or manufacture the tires sold by them. (3973)

Best Tire House—See Beho Rubber Company, Inc.

Champion Spark Plug Company, Toledo, has been served with a complaint alleging violation of the Robinson-Patman and Federal Trade Commission Acts. Price discrimination, unlawful payment of compensation for "special sales services" and unfair resale price agreements with distributors and dealers in restraint of trade, are charged.

One of the two largest manufacturers of spark plugs in the United States, the respondent company, according to the complaint, supplies practically the entire original equipment requirements of the Ford Motor Company, and its products are also used for original equipment by Chrysler, Hudson, Studebaker, Packard, Nash, Graham-Paige, Willys-Overland, and other motor car manufacturers.

The complaint points out that more spark plugs are sold for replacement than for original equipment; that the ability of a spark plug manufacturer to sell his product in the replacement field depends largely upon the extent to which it is used for original equipment of automobiles; that its adoption by a well known automobile manufacturer has great advertising value and that automobile manufacturers customarily recommend to dealers and to car owners that in making replacements and repairs they use only parts of the same kind and manufacture as those with which a car was originally equipped. (3977)

D. D. D. Corporation—A complaint has been issued against D. D. D. Corporation, Batavia, Ill., engaged in the manufacture, sale and distribution of a medicinal preparation known as "D. D. D. Prescription".

In advertisements in newspapers and periodicals, and in continuities broadcast from radio stations, the complaint alleges, the respondent represents that "D. D. D. Prescription" is a cure or remedy and a competent treatment for eczema, blotches, pimples, athlete's foot, rashes, hives, insect bites, and minor cases of ivy and oak poisoning.

The complaint alleges that these representations are misleading and untrue, and that the preparation will have no therapeutic effect other than to temporarily relieve the symptom of itching, and that the preparation would not be a competent treatment for rashes or other externally caused skin eruptions except in those cases where a temporary acting anti-pruritic agent having some antiseptic properties might be of value. (3972)

Hi-Ho Company—See Neo-Vim Company.

Indianapolis Soap Company—Misrepresentation in the sale of soap products is alleged in a complaint issued against Indianapolis Soap Company and Williams Soap Company, 1249 Roosevelt Ave., Indianapolis, and against Jesse M., Maude S., and Robert S. Daily and Sidney F. Daily, Jr., individually and as officers of the two companies.

In the sale through canvassers and peddlers of soaps known as canvassers' soaps, the respondents allegedly misrepresented the actual retail value and quality of their products.

The respondents' soaps allegedly were advertised as being free from impurities and other harmful substances and as being made from natural mineral and vegetable oils. The complaint continues that they were also represented as being capable of purifying and invigorating and opening the pores of the skin and as being of superior grade and quality. These representations were exaggerated and misleading, according to the complaint.

Cartons of soap sold by the respondents allegedly were represented as having a retail value of 75 cents each, when, according to the complaint, they were sold to canvassers and peddlers at about 5 cents a carton.

Indianapolis Soap Company allegedly operates under various trade names including Union Soap Company, Sanisoap Company, Sanisoap Co., Inc., W & W Soap Mfg. Company, Crescent Soap Company, Cleanaid Products Company, Utility Cleanser Company, Hoosier Mfg. Company, and Nature's Products Company. (3971)

Kremola Company, Inc.—A complaint has been issued against Kremola Company, Inc., 2975 South Michigan Ave., Chicago, alleging misrepresentation in the sale and distribution of a cosmetic preparation.

The Kremola company is engaged in the distribution of a cosmetic preparation containing drugs, known as "Kremola" and as "Dr. Berry's Freckle Ointment", recommended for the purpose of removing freckles.

Among advertisements in newspapers and periodicals disseminated by it, the complaint alleges, is the following: "'Gone like magic' is the song of happy thousands for whom KREMOLA, an M. D. doctor's prescription, has cleared away pimples, blackheads, and surface skin blemishes. A clear-up—not a cover up."

The respondent allegedly has represented that its preparation will remove freckles and is a cure or remedy for pimples and blackheads. The complaint alleges that the presence of ammoniated mercury in the preparation may be harmful when continuously applied to the skin, that some of the mercury content may be absorbed through the skin, causing mercury poisoning; and that the respondent failed to reveal that use of the preparation under some conditions may cause injury to health. The effect of the preparation causes a sloughing of the outer layers of the skin, the complaint continues, which may tend to lessen the contrast between freckles, pimples and blackheads and the normal skin area, but does not remove them. (3968)

Tommy Loughran, an individual, 4 South 15th St., Philadelphia, engaged in selling correspondence courses which teach methods of building and improving the body physically, is named respondent in a complaint. (Loughran, former light-heavy-weight Champion, once fought Carnera for the heavyweight championship, but is not so identified in the complaint).

In the course of his business, the complaint alleges, Loughran, by advertising in newspapers and magazines, represents, among other things: "Now do you believe me when I say my big ambition in life is to spread the gospel of perfect health and Puissant Body Building? Where on earth could you expect to get this big, massive body with its perfectly functioning organism for such a ridiculous price as I am passing it out today? I only wish someone had offered it to me." . . . "Do you want big muscles and a huge robust body? My book 'Puissant Body Building' is absolutely FREE."

In lessons given purchasers of his course, the complaint continues, the respondent teaches how to exercise different external and internal muscles, and in other lessons explains the qualities of different foods, advising which classes and kinds of food his students should eat in order to obtain optimum health, and assures students that if they follow his instructions, perform the exercises and eat the foods he recommends, perfect health will be produced and maintained, and large muscles and a powerful, robust body will be built; that his object is to support the gospel of perfect health and puissant body building, and that if students and purchasers of his courses follow his teachings they will become paragons of strength.

The complaint alleges that respondent's course will not produce perfect health in all instances nor keep everyone in a health condition. It will not insure everyone big muscles or a huge, robust and powerful body. Respondent's book "Puissant Body Building" will not show everyone how to obtain big muscles and a powerful body, and the course of instruction will not enable everyone to become a paragon of strength. While proper exercise and diet are important factors in building up and preserving health and body strength; the complaint continues they are not the only ones. On account of physiological and other factors, many people, even though following such course of instruction and diet, cannot attain perfect health or perfect functioning of the body organism, nor can they obtain huge, robust or powerful bodies, nor are they enabled to have big muscles or a powerful body, nor become paragons of strength. (3976)

Marchant Calculating Machine Company, Oakland and Emeryville, Calif., and Dwight R. Cooke, its district manager for Washington, D. C. and parts of Virginia and Maryland, are charged in a Federal Trade Commission complaint with disparagement of the products and business standing of a competitor.

It is alleged that the respondents, in order to induce the purchase of their machines in preference to those sold by Friden Calculating Machine Co., Inc., a California corporation, represented that the latter's machines are inaccurate, low priced because of inferior workmanship, of foreign manufacture and constitute infringements on patents held by the Marchant Company, and that parts for the Friden Company's machines are not readily obtainable because such machines are assembled products.

The respondents also allegedly represented that the Friden Company is not a manufacturer but operates only an assembly plant, is not equipped properly to service calculating machines, and is not financially responsible.

The complaint alleges that the respondent's representations are deceptive and misleading and constitute unfair disparagement; that the Friden Company's machines are accurate, of American manufacture and have a trade-in value equal to other machines of similar design and value; that the Friden Company is a manufacturer, and that there is no evidence to show that it is not financially responsible. (3970)

Modern Improved Retread Outlet—See Beho Rubber Company, Inc.

Neo-Vim Company—A complaint has been issued against W. C. Pollard, A. L. Riaff, and L. M. Jensen, trading as Neo-Vim Company and as Hi-Ho Co., 400 North High St., Columbus, Ohio, sellers and distributors of a medicinal preparation designated "Neo-Vim" and a cosmetic designated "Hi-Ho Tooth Paste".

In advertising matter and through radio broadcast the respondents are alleged to have represented that "Neo-Vim" tonic is a competent and effective tonic which supplies the user with increased energy and vitality and increases the appetite; that it is a competent treatment for indigestion; and that "Hi-Ho" tooth paste possesses unusual and superior qualities for brightening the teeth; that it keeps the gums healthy and that it will remove all stain, film and discoloration from teeth and prevent impure breath and offensive breath odors.

The complaint alleges that these claims are grossly exaggerated, misleading and untrue. (3969)

Wardell Piano Company—Clayton L. Wardell, trading as Wardell Piano Company, 909 Pierce St., Sioux City, Iowa, is charged in a complaint with misrepresentation in the sale of pianos.

Through advertisements in newspapers and other printed matter, and by postcards sent through the United States Mails, the complaint alleges, the respondent has represented that pianos offered for sale by him are instruments which, having been previously sold on a deferred payment plan, have been repossessed from the original purchasers, and that the pianos are being offered for resale at prices representing only the unpaid balances due, and that such prices are substantially lower than the original prices of the pianos.

The complaint charges that the pianos sold by the respondent are not repossessed pianos, but are taken from the regular stock of the respondent, and that the prices at which they are offered for sale are the usual prices at which such pianos are customarily offered for sale by respondent in the regular course of business. (3967)

Williams Soap Company—See Indianapolis Soap Company.

CEASE AND DESIST ORDERS

No cease and desist orders were issued during the week.

STIPULATIONS

The Commission has entered into the following stipulations:

Acme Art Association—E. J. Moak, sole trader as Acme Art Association, Kansas City, Mo., mail order dealer in colored photographic enlargements, will desist from use in his trade name of the word "Association" or similar designations with the effect of conveying the impression that his individual business enterprise is a body of persons organized for the prosecution of some purpose. The respondent also agrees to cease representing directly or in any other manner, that colored or tinted photographs or enlargements are oil paintings, and that he maintains a photographic studio. (2604)

Atlanta Candy Company—Charles E. Carter, sole trader as Atlanta Candy Company, Atlanta, Ga., agrees to discontinue selling to jobbers and wholesalers for resale to retailers, or to retailers directly, candy so packed and assembled that sales to the public may be made by means of a lottery. (2612)

Bost Tooth Paste Corporation, Indianapolis, Ind., stipulates that it will cease representing that "Bost Tooth Paste" removes tobacco stains which have been absorbed into the enamel of the teeth. The stipulation points out that the respondent's preparation will not be effective in removing such stains. (02466)

Chattanooga Medicine Company, Chattanooga, Tenn., engaged in the sale of a medicinal preparation designated "Cardui," agrees to desist from representing that "Cardui," or any other medicinal preparation containing substantially the same ingredients or possessing the same properties, whether sold under that name or any other name, is an analgesic or will act immediately to relieve the pain or discomfort associated with menstrual distress or other functional disturbances of women. (02471)

Colbey Company—See Frank E. Davis Fish Company.

Frank E. Davis Fish Company—A stipulation from Frank E. Davis Fish Company, trading as The Colbey Company, 93 Rogers St., Gloucester, Mass., has been accepted in which the respondent agrees to discontinue misleading representations in the advertisement and sale of woolen blankets.

According to the stipulation, the respondent company advertised that "Every Colbey blanket is pre-shrunk—never any worry from that source."

In its stipulation, the respondent admitted that its blankets are not pre-shrunk, but are subject to residual shrinkage, and agreed to cease employing the term "Pre-shrunk" to designate blankets which are not in fact shrink-proof or non-shrinkable, or which have not been fully shrunk or pre-shrunk to the extent that no residual shrinkage is left therein. (02470)

Eastern Isles Importing Company, Inc., 16 East 34th St., New York, trading also as Futura Fashions, in the manufacture and sale of women's and children's wearing apparel, has entered into a stipulation to discontinue misleading representations in the sale of its products.

Under its stipulation, the respondent corporation agrees to cease employing the word "Satin" to describe products not composed wholly of silk, but, if such word is used properly as descriptive of the construction of a fabric or product containing fiber other than pure silk, it is to be accurately qualifed by accompanying words clearly disclosing the fibers of which the fabric or product is composed. This is to be stated in the order of their predominance by weight, beginning with the largest single constituent. An example of such designation is "Silk and Rayon Satin" for a fabric of satin construction and composed of a mixture of pure silk and rayon, each present in substantial proportion but with the silk predominant; or, "Rayon Satin," when composed of rayon.

The respondent corporation also agrees to desist from use of the words "Acetate" or "Bemberg" alone or in combination with other phraseology as descriptive of the rayon content of garments, fabrics or material, unless such words are immediately accompanied by the word "Rayon" in conspicuous type, as, "Acetate Rayon" or "Bemberg Rayon."

Use of the word "Crepe" or other word connoting pure silk to describe fabrics not composed wholly of unweighted silk, is to be discontinued by the respondent. In the event any such fabric or product contains any weighting, loading or adulterating materials, conspicuous and nondeceptive disclosure is to be made of the presence of such materials and the percentage or proportion thereof is to be stated in immediate conjunction with the word "Crepe" or other word connoting pure silk.

The Eastern Isles Importing Company also agrees to cease selling any product made of rayon without disclosure of the rayon content, and to discontinue advertisement of any product composed wholly or partly of rayon without full and nondeceptive disclosure of the fiber and other content by clearly naming each constituent fiber in the order of its predominance by weight, beginning with the largest single constituent, and by giving the percentage of any fiber present in less than a substantial amount, or, in any case, less than 5 per cent. (2610)

Faultless Appliance Company—Frederick L. Watson, trading as Faultless Appliance Company, Haverhill, Mass., engaged in the mail order sale of a rupture support or truss of his own design, agrees to cease and desist from use in advertising matter of any kind of statements asserting or implying that difficulties associated with rupture will be cured, ended or permanently relieved by the use of his device, or that his device will afford adequate support for all varieties and grades of hernia, or that the device will do more than give temporary support for certain varieties of hernia. (2599)

Futura Fashions—See Eastern Isles Importing Company, Inc.

Hampden Sales Association, Inc., New York, N. Y., in the sale of "Nailcare", a packaged manicuring product, agrees to discontinue representing, directly or by implication, that this article will prevent breaking of nails or will nourish or feed the nails or the skin. (2598)

G. H. Hess, Inc., Louisville, Ky., manufacturer of uniforms and house dresses, agrees to cease direct or indirect use of the terms "Shrunk" or "Pre-Shrunk" as descriptive of goods which are not shrinkproof or non-shrinkable or have not been fully shrunk or pre-shrunk to the extent that no residual shrinkage is left remaining in them. The stipulation provides that if these terms are properly used to indicate application of a shrinking process and if the goods have been shrunk to a substantial extent, but there remains a certain amount of residual shrinkage, such terms are to be accompanied by clear explanations in percentages of the amounts of residual shrinkage remaining in both the warp and the filling, or in the warp or the filling, whichever has the greater residual shrinkage. An example of such explanation is "Preshrunk (or shrunk)—will not shrink more than — per cent under Commercial Standard CS59-36". The respondent also agrees to discontinue misleading uses of the word "Linene" or the term "Lin" in the description of products not made from fiber of the flax plant. (2605)

Keelor & Stites Co., Cincinnati, Ohio, engaged in the business of conducting an advertising agency which disseminated advertisements for a turkey feed designated "Tuxedo Turkey Growing & Developing Mash" and a hog feed designated "Tuxedo Porkmaker", on behalf of The Early & Daniel Company, Inc., Cincinnati, agrees to cease disseminating any advertisements which represent that correct feeding will assure one of an increase in profits, or that feed alone is responsible for the quality or size of poultry or stock. (02473)

Keystone Shower Door Company—Abram R. Finkel, trading as Keystone Shower Door Company, Philadelphia, Pa., manufacturer of glass enclosures for tub and shower baths, agrees to discontinue use in advertising matter the word "Plate," alone or with the word "Commercial", as descriptive of the glass content of his products which is not "Plate" glass. (2603)

Kroger Grocery & Baking Company, Cincinnati, Ohio, selling a food product designated "Kroger's Hot Dated Coffee" will discontinue representing directly or by implication, that the cost of packing coffee by any method other than that employed by it, is any amount in excess of the actual cost; that coffee is not as fresh as it could be if it does not have the date of roasting stamped on the package; that such date indicates to the retailer or consumer the length of elapsed time in days since the coffee contained therein was roasted; that ordinary systems of dating only measure the time from warehouse to consumer; that if respondent's coffee is not sold on or before the date stamped on the package it is not for sale at any price; that the respondent's system of dating is "the only" method or system that has any meaning, and that no other coffee affords the same freshness at the time of purchase, when these are not the facts. (02472)

Lever Brothers Company, Cambridge, Mass., in the sale of a detergent designated "Rinso", agrees to desist from representing that one using "Rinso" will "never" have red or rough hands; that the product in every instance will make clothes at least 5 shades whiter or that colors "never" fade when washed with it; that no other soap will produce the degree or kind of whiteness attained by "Rinso", or will do as good or quick a job as will the respondent's product. The representation that makers of 33 washing machines have recommended the effectiveness of "Rinso" "above all others" will also be discontinued. (02468)

Moon Gag-Cartoon School—Edward D. Muenchow, doing business as Moon Gag-Cartoon School, Fall Creek, Wis., agrees to cease and desist from representing that he is an internationally known cartoonist, when such is not the fact; that the "Noon Gag-Cartoon School" correspondence course is written and illustrated by a cartoonist regularly producing cartoons for more than 30 or any nationally circulated magazines and newspapers; that every trick of the trade one needs to know to become a successful cartoonist is included in his course of instruction; that students who have completed his course of instruction will or may, by reason thereof, be in a position to earn bankers' wages, own a home, a car and other luxuries; and that any person, without regard to education, imagination, discernment, sense of humor, experience or artistic talent, may become a successful cartoonist by taking his course of instruction. Muenchow further agrees to discontinue stating that he has made arrangements with the editors of "The Cartoon Book" that he can assure the printing and publication of cartoons therein, without explaining that he is himself the editor and publisher of such book; will cease using the word "Guarantee" or other words of similar import in connection with money-back agreements so as to mislead or deceive students or prospective students or the public. He further agrees to cease representing that any commodity or service is "free", when such commodity or service is regularly included as part of the course of instruction; or representing that statements made in his advertising media comply with rules for advertising of the private home study schools, as promulgated by the Federal Trade Commission; or using the name of the Federal Trade Commission in his advertising matter in any way, the effect of which may be to convey the impression that his claims have been given either the express or the tacit approval of the Commission. (2601)

National School of Cartooning—Ralph A. Hershberger, doing business as The National School of Cartooning, Cleveland, Ohio, agrees to desist from defamation of competitors by imputing to them dishonorable or questionable conduct, or from the false disparagement of the character, nature, quality, value or scope of their courses of instruction or educational services; from representing that personal instruction and criticism will be given by any correspondence school only when so specifically stated in an enrollment blank; that a copyright has been granted by the United States Government for the "Circle System" or any other system of drawing, or that the booklets or other material issued by The National School of Cartooning are the only cartooning publications for which a copyright has been granted within the past 20 years; from representing that students who have completed his course of instruction will or may by reason thereof step into good positions as cartoonists or comic artists, earn from $30 to $75 weekly at the start, have rapid advancement beginning immediately or "do the same" as certain outstanding cartoonists supposed to earn more than $100,000 a year, or from making overstatements or misrepresentations as to the earning power or future security of his students and graduates, and from representing that any person, without regard to his education, imagination, discernment, sense of humor, experience or artistic talent, can or may become a competent and successful cartoonist or comic artist by taking his course of instruction. (2608)

Nu-Life Cleaner Mfg. Company—Albert Isserson, trading as Nu-Life Cleaner Manufacturing Company, Cleveland, Ohio, engaged in compounding and packaging a rug and upholstery cleaning fluid and selling it under the trade name "Nu-Life Rug and Upholstery Cleaner," will cease and desist from the use in his advertisements or otherwise of any word, statement or representation, the effect of which may tend to convey the belief to purchasers that the product has sterilizing or germ destroying or moth-proofing properties or qualities, or that, when used as directed, it will completely de-moth upholstery furniture or rid it of all moths, or that it will have any moth elimination effect other than to act as a contact killer of such pests. (2607)

Takamine Corporation, New York, N. Y., stipulates that it will cease using the word "Sterilized" in connection with the sale of "Takamine" tooth brushes. The stipulation points out that the processes used in treating these brushes do not completely destroy germ life. (2602)

Tescum Company—J. H. Bramley and Edna B. Brown, trading as Tescum Manufacturing Company and as The Tescum Company, Cleveland, Ohio, selling a medicinal preparation for the correction of alcoholism designated "Tescum Powders," agree to cease representing that use of the powders will result in the eradication of the drink habit, or will "stop" excessive drinking, or that the preparation is a competent treatment for chronic alcoholism. The respondents further agree to cease use of the word "Manufacturing" as a part of their trade name and to discontinue otherwise stating or implying that they manufacture the product. (02467)

Tescum Manufacturing Company—See Tescum Company.

Thomas Hosiery Manufacturing Company—Joseph Thomas, trading as Thomas Hosiery Manufacturing Company, New York, N. Y., agreed to cease employing the word "Manufacturing" as part of his trade name or in any manner tending to convey the impression that Joseph Thomas manufactures the products he sells, when such is not a fact. (2611)

Three Rivers Fur Tannery, Three Rivers, Mich., in the sale and distribution of women's wearing apparel, agreed to discontinue use of the word "Tannery" as part of its corporate or trade name or the words "Manufacturing" or "Factory" in advertising matter. The stipulation points out that the respondent corporation, although it owns both a tannery and a factory, has not for several years actually operated its own tanning facilities, except in connection with a relatively small part of its business, but has had its products manufactured from hides dressed and otherwise prepared in tanneries which it neither owned, operated nor controlled and has filled approximately 70 per cent, if not more, of its received orders with garments made in plants which it neither owned, operated nor controlled.

The respondent corporation also stipulated that it will cease employing in advertising matter words such as "Hudson Seal," "Northern Seal," "Lapin," "American Broadtail," "Beaverette," or "Laskin Mouton" as descriptive of furs, unless such designations are immediately accompanied in equally conspicuous type by the correct name of the fur actually used so as to form the last word of the description, as, for example, "Hudson Seal-Dyed Muskrat," "Northern Seal-Dyed Rabbit or Coney," "Lapin-Dyed Rabbit or Coney," "American Broadtail, Processed Lamb," and "Mouton Dyed-Lamb." (2609)

Thrift Buyers of America, South Bend, Ind., formerly Thrift Hosiery Society, retail distributor of hosiery by mail order and otherwise, stipulates that it will desist from the use in its corporate or trade name of expressions such as "Thrift Hosiery Society" or "Thrift Buyers of America" as descriptive of its business; or the use in its trade promotional representations of phraseology such as "Thrift Associates", "Group Buying" or "In Unity there is Strength". The stipulation points out that the respondent is not organized to function as a membership cooperative organization, but is only a private business corporation for profit, whose customers are not members thereof. The respondent corporation will also cease issuing "membership" certificates with the effect of conveying the impression that customers enjoy the advantages of mass buying and avoid paying a retailer's profit. The respondent also agrees to discontinue representing that customers save 25 per cent, 40 per cent, or 25 to 50 cents on every pair of hosiery, or any percentage or amount in excess of what actually has been saved by customers in their purchase of the respondent's merchandise. (2606)

Trail's End Poultry Farm—Milton and Mark Johnson, trading as Trail's End Poultry Farm, Gordonsville, Va., in the sale of chicks incubated at their place of business at Gordonsville, Va., stipulate that they will cease using in advertising matter the language "300-egg double pedigree White Leghorn breeding males," alone or with the phrases "finest bred chicks," or "finest breeding cockerels," to imply that the chicks they sell have been hatched from eggs laid by stock of the 300-egg or pedigreed type, when such is not a fact. The respondents also agree to discontinue misleading uses of the word "certified" in connection with their chick products. (2600)

Betty Wales Cosmetics, Inc., Coral Gables, Fla., agrees to cease advertising, directly or by implication, that "Betty Wales Wrinkle Reducer" will help to reduce, remove or prevent lines or wrinkles, unless this claim is limited to temporary, superficial and minor cases due to external causes such as exposure to the elements, and that the product will penetrate or be absorbed by the skin or be beneficial in helping to retain the texture of youthful skin. (02465)

Woodstock Typewriter Company, Woodstock, Ill., agrees to cease representing that a free trial may be had of a Woodstock typewriter, until such time as a free trial is actually provided for all responsible persons in all localities in which the representation is disseminated, and to discontinue advertising that, according to information in its possession, Woodstock typewriters were used to win most of the world's school contests, when it does not possess any reliable information to that effect. (02469)

Radio and the New Year

From every standpoint American broadcasting has had its greatest year.

Its service to church, to school and to home has never been more needed, nor better conceived. It has promoted tolerance and understanding; stressed the need for cooperative living in a world elsewhere torn apart by racial and religious intolerance.

It has kept its listeners abreast of every important development at home and abroad, instantly and fairly. It has cooperated with the press to make the American people what President Roosevelt has described as "the best informed people in the world".

Its contributions to the economic and social life of the nation have increased. It has kept commerce moving; it has developed new markets and widened old ones. Its wage scale is the highest in American industry. And it has helped to fill the pay envelopes of every American worker by creating and renewing demand for products of industry and the farm.

Its economic base has been fortified. It has enjoyed an expansion of business in the past year and faces a New Year of still further expansion. Yet competitive activity within the industry has never been more vigorous or as varied: competition for listeners, competition for business, keynote of the American System of Broadcasting.

Its audience has multiplied in the past year. Practically every family in the United States save the impoverished owns a radio, unquestionably the largest single audience of listeners ever assembled in history. The number of radios in use throughout the nation has now reached the astounding total of some 45,000,000.

It has embarked upon a democratic plan of voluntary self-regulation and has earned a

RADIO AND THE NEW YEAR

(Continued from page 3919)

greater degree of public confidence thereby. It has proven it can itself shoulder its social obligations in a manner responsive to public taste and changing conditions.

In the past year the industry has set about a definite plan of defense to withstand the assaults of outside raiding parties who periodically swoop down seeking plunder. The industry has stated its position in the past that it is prepared to do business in a business-like way and upon economic grounds, but it no longer will continue to be victim to the whims of monopoly and pistol-point pressure. As we go into the New Year it reiterates its position, this time through the stronger voice of an aroused and a united industry.

In extending my New Year's greeting, let me congratulate each and every one in each and every station whose combined work and energy continues to make American radio preeminently the finest broadcasting service in the world.

Neville Miller

Broadcast Music, Inc.

Neville Miller next week will start his second long trip in behalf of Broadcast Music, Inc. The trip will carry him from New Orleans to Portland, Ore., starting with a District 6 meeting at the Roosevelt Hotel in New Orleans next Wednesday, January 3. On Friday he will meet with District 13 broadcasters at the Baker Hotel in Dallas, Tex. From there he will go to the West Coast.

Again the NAB emphasizes the importance of attending these meetings. Only through support of Broadcast Music, Inc., will the industry be able to shake off the chains of a music monopoly. Members should see that non-members in their area attend. Unanimous support is needed.

RADIO IN 1940 CENSUS

The NAB has kept in current contact with the Bureau of the Census since June 1938, in an effort to keep before that body the need for the inclusion of radio questions in the 1940 Census. At the last session of Congress a bill was passed providing for a Census of Housing. The Bureau of the Census has prepared its Housing Schedule and the radio question is included on the form.

The exact question is as follows, "Is there a radio in this dwelling unit? Yes —— No ——". The appropriation needed for conducting the Housing Census will probably be up for Congressional approval in the first Deficiency Bill. However there is every assurance that the $8,000,000 needed will be appropriated.

The inclusion of the radio question in the Housing Schedule has resulted in the elimination of a radio question from the Agricultural Schedule although the Agricultural Census Advisory Committee was favorably disposed to the suggestion of expanding the radio question to determine the number of radios on each farm and the number of automobiles equipped with radio receivers.

On December 13 a conference of those interested in the inclusion of radio questions in the Census met in the office of John H. Payne, Chief, Electrical Division, Bureau of Foreign and Domestic Commerce. As a result of this conference the letter to Dr. William L. Austin, Director of the Bureau of the Census which follows, was prepared.

It will be noted that the question of auto radio equipment was not referred to. The reason is that the Housing and Population Censuses do not include questions on automobile ownership and obviously the question of auto radio ownership could not be logically included. The letter to Dr. Austin, signed by Mr. Payne follows:

"December 14, 1939

Dr. William L. Austin
Director, Bureau of the Census
Department of Commerce
Washington, D. C.

Dear Dr. Austin:

At a conference held in the offices of the Bureau of Foreign and Domestic Commerce on Wednesday, December 13, 1939, representatives of the government and of the radio industry considered appropriate questions which it is hoped may be included in the Housing Schedule of the Bureau of the Census. The conference was attended by representatives of the following:

Department of State
Bureau of Foreign and Domestic Commerce
Federal Communications Commission
U. S. Office of Education
Federal Radio Education Committee
National Association of Broadcasters
Radio Manufacturers Association

In view of the social significance of radio as a medium of mass communication for national and international cultural development, for national defense, and for purposes of regulation, it was unanimously agreed that—

1. The Bureau of the Census be commended for including Question 22 under Section V of the Housing Schedule which now reads, "Is there a radio in this dwelling unit?"

If the Bureau of the Census feels that it must restrict the inquiry to the above questions, we recommend the instructions be amended to read as follows:

Instructions—Item 22

Enter "yes" if there is a usable radio in this dwelling unit (include any set out of repair not exceeding six months). When there is no usable radio set in this dwelling unit, enter "no". Except for trailers used as dwelling units, no account shall be taken of radio sets installed in automobiles.

2. The conferees are unanimously agreed that if the radio questions must be limited to one, it should preferably be worded as follows: "How many usable radio sets are in this dwelling unit?"—with only one square instead of two for the answer, and with instructions to the Census enumerators as follows:

Instructions—Item 22 (revised)

Enter in the square provided for answer the number of usable radio sets in the dwelling unit (include any set out of repair not exceeding six months). Except for trailers used as dwelling units, no account shall be taken of the number of radio sets installed in automobiles. Should there be no usable radio set in this dwelling unit, enter "0" in the square provided for answering this question.

3. The conferees are further unanimously agreed that, in view of the great social significance attending the reception of foreign broadcasts, it is highly desirable to add the following question: "Is a radio set in this dwelling unit usable for listening *directly to* international short wave broadcasts?" Yes — No —— with instructions to Census enumerators as follows:

Instructions

". . . Listening *directly* to international short wave broadcasts" refers to reception directly from Asia, Africa, Europe, or South America, which is heard through the medium of short waves. If these broadcasts are heard only through local United States stations, the answer should be "no".

While the conferees strongly recommend the above procedure and are submitting this letter as a matter of information, it is the intention that the appropriate heads of the various agencies mentioned above will write to you directly, expressing their views regarding this recommendation.

The agencies represented hold themselves in readiness for conference with you or those in your Bureau whom you may delegate to consider this subject.

Sincerely yours,
John H. Payne,
for the Conferees
(Chief, Electrical Division)

In addition to Mr. Payne's communication, Dr. Austin received the following from Neville Miller:

December 22, 1939

Dr. William L. Austin, Director
Bureau of the Census
Department of Commerce
Washington, D. C.

Dear Dr. Austin:

With regard to the communication you received from John H. Payne under date of December 14th reporting conference of those parties interested in the inclusion of radio questions in the 1940 Census, I would like to call to your attention some significant facts on the subject.

Mr. Payne mentioned that the Department of State, Bureau of Foreign and Domestic Commerce, the Federal Communications Commission, the United States Office of Education, the Federal Radio Education Committee, the Radio Manufacturers Association and our own Association, came together in unanimous accord on the points covered in the letter. In addition to those mentioned, the Chief Signal Officer of the United States Army is likewise concerned. Although he was unable to attend the conference on December 13th, I am informed he will communicate with you directly.

The interests of the above mentioned parties must be obvious to you. However, I would like to restate the position of the National Association of Broadcasters in the matter.

As you know, broadcasting in the United States is a commercial enterprise in that the cost of broadcasting is paid for from advertising revenue. But radio broadcasting is more than a commercial enterprise. Radio is charged by Federal statute to operate "in public interest, convenience and necessity".

What is the "public interest, convenience and necessity" of our 130,000,000 fellow citizens? Certainly it differs as between those who live in rural areas and those who live in urban America. Again, it is divided up into different and interchangeable conditions of life, socially, educationally, religiously, politically and economically.

The broadcasting industry has interpreted that specification in law to mean that it must render a social service to the public. The social problem of broadcasting arises out of the fact that radio cuts across barriers of time and distance and society, and reaches all people at the same time.

In order intelligently to operate the broadcasting industry "in public interest, convenience and necessity" it is essential that we know the facilities for listening, which is the number and distribution of radio sets. We are requesting that you make a Census count of the number of radio sets located in homes in your 1940 Census in accordance with the suggestions in Mr. John H. Payne's communication of December 14th.

Sincerely yours,
Neville Miller

Although no reply has been received from Dr. Austin, it is understood that the Census Bureau will not act favorably on these recommendations but will retain the single radio question, "Is there a radio in this dwelling unit?".

FUTURE RADIO FAMILY ESTIMATES

NAB is undertaking to devise a plan whereby yearly estimates of the number of radio families by state and county can be made. It is also hoped that these estimates can be expanded to include all radio receivers—extra sets in homes, auto radios, receivers in institutions and in places of business and that some permanent arrangement can be made to develop this basic information in its most usable form to the NAB membership.

"Radio's Riches" Commended Throughout Country

From east, west, north and south member stations have expressed approval of "Radio's Riches", the industry's 1940 best seller.

Harry R. Spence, KXRO, Aberdeen, Wash., said it all in two sentences when he wrote: " 'Radio's Riches' is one of the finest public relations mailing pieces I have ever seen. You have done a bang-up job and are certainly to be congratulated".

Despite the fact that Mr. Spence takes in a lot of territory, "Radio's Riches" was carefully thought out. It is intended to meet conditions of 1940 and it is sincerely believed that its wide distribution will benefit every radio station.

In making up your mailing list, make sure that a copy of "Radio's Riches" is sent to every leader of thought in your community, to the officers and members of the various clubs, civic groups, PTA and other educational groups as well as to business leaders, owners and officers of business establishments.

Your sample copy with prices was mailed during the Christmas rush and was probably delayed because it was sent fourth class. But everything should be in your hands by this time. As soon as convenient may we have your requirements?

FORTY-FOUR MILLION SETS

The quality of present day radio programs and remarkably efficient new radio sets combined to make things easier for Santa Claus this past Christmas.

After making his rounds he brough the total of active receivers in the United States to approximately 44 million according to Paul Peter, NAB director of research.

Newspapers are keenly cognizant of the forward strides made by the radio industry this year. On December 17, the Bridgeport, Conn., Post published a ten inch editorial under the caption, "Radio". Said the Post in part:

"One of the surprising developments of the current season, and yet one which probably is not particularly attracting public attention is the number and variety of radios which are now being offered in retail stores . . . . Radios are engaging the public's attention perhaps more than ever before, because, with surprising few exceptions, they are remarkably efficient.

"The quality of programs now being offered also has a great deal to do with it.

"This year, Santa Claus should have no trouble at all, so far as radios are concerned."

The net result of the NAB Radio Christmas promotion is to have helped establish the broadcasting industry in its strongest position thus far in its history. Circulation is at an all time high.

PITTSBURGH "RADIO CHRISTMAS" GOES OVER WITH A BANG

Right now "Grant 1630" is Pittsburgh's most famous telephone number.

It was planned that way by KDKA, KQV, WJAS, and WWSW, The Pittsburgh Post-Gazette, and the Radio Servicemens Association. From more than a thousand homes that number was called to announce the gift of more than twelve hundred radio sets, to be rehabilitated by the Servicemen, and distributed at Christmas time by the Federation of Social Agencies.

W. B. McGill, KDKA's director of promotion, gave most of his time for a couple of weeks to Pittsburgh's Christmas promotion.

"It is the general feeling among radio men participating," he said, "that the plan has unusual merit and advantages to all branches of the radio industry locally.

"We feel, first, that it gives us a fraternal spirit of good neighborliness; second, that it has tremendous potentialities for building good will with the public; third, that it solidifies and improves our contact all around."

Santa's Radio Workshop, where all radio sets were repaired, was located in the lobby of the Grant Building, one of Pittsburgh's finest office buildings. In the beginning four unemployed radio servicemen worked on an eight hour shift. This was later increased to a double shift with many hours of overtime for additional men. Pay roll expenses were met with funds secured from radio jobbers and distributors by the servicemen. In addition they secured large contributions of necessary parts from parts distributors, and they personally donated one thousand radio tubes.

Special events exploited Santa's Radio Workshop such as the personal appearance of the radio personalities who sang Christmas carols. An interview with Santa Claus himself from the lobby workshop was broadcast over a special four station hookup.

KDKA, on December 14, devoted its half hour "Pittsburgh Speaks" program to the idea. A team of RSA men competed with a team from WWSW, KQV, WJAS, and the Pittsburgh Post-Gazette in a quiz program, the questions of which were slanted to bring out salient bits of information pertaining to Radio Christmas. Other similar programs on other stations were broadcast.

HIGH FREQUENCY HEARING

Details of the informal hearing to be held at the Federal Communications Commission February 28 in the matter of aural broadcasting on frequencies above 25,000 kilocycles just became available at the Commission this week as follows:

> Notice is hereby given of the informal hearing before the Commission en banc to be held at the office of the Commission, Washington, D. C., beginning at 10 a. m., February 28, 1940, for the purpose of determining:
>
> (1) Whether aural broadcasting on the frequencies above 25,000 kc. has reached such a stage of development that it is acceptable for rendering regular as distinguished from experimental broadcast service to the public;
>
> (2) The relative merits of frequency modulation and amplitude modulation when employed for aural broadcasting on frequencies above 25,000 kc.;

(3) The relative merits of wide band and narrow band frequency modulation when employed for aural broadcasting on frequencies above 25,000 kc.;

(4) Whether it is possible to allocate sufficient frequencies to accommodate stations employing frequency modulation (narrow or wide band) to provide a satisfactory program service in the United States when considered in the light of the frequency needs of other services, including television, Government, aviation, police, common carrier, amateur, etc.;

(5) Whether it is possible to allocate sufficient frequencies to accommodate stations employing amplitude modulation to provide a satisfactory program service in the United States when considered in the light of the frequency needs of other services, including television, Government, aviation, police, common carrier, amateur, etc.;

(6) Whether it would be practicable for the Commission to authorize both amplitude and frequency modulation for aural broadcasting stations operating on frequencies above 25,000 kc., or whether the Commission should recognize but one of these forms of modulation for such stations;

(7) The possible future effects of ultra high frequency broadcasting upon standard broadcasting on the band 550-1600 kc.;

(8) Whether existing allocations of frequencies above 25,000 kc. to particular services shall be modified to provide frequencies for aural broadcasting;

(9) The existing patent situation respecting frequency modulation and amplitude modulation for aural broadcasting stations operating on frequencies above 25,000 kc.

The Commission desires to expedite consideration of the foregoing matters as much as possible so that policies may be formulated for the future licensing of applicants in the aural broadcast field utilizing frequencies above 25,000 kc. However, it is to be noted that no individual applications will be considered at the hearing.

The Commission considers that technical developments in the use of ultra high frequencies for aural broadcasting are sufficient to require consideration of the numerous questions involved, and persons appearing at the hearing should submit data obtained from actual tests and operations and thereby avoid speculative testimony as much as possible. If for the purpose of obtaining additional data for presentation at the hearing, operation not permissible under the outstanding authorization is necessary, then requests for special authorization to carry out such tests will receive the Commission's prompt attention.

Should any party desire to expand the matters herein listed for consideration, application should be made to the Commission for such purpose as soon as possible and not later than February 1, 1940.

Except with the permission of the Chairman, cross examination of each witness will be limited to questions by Commissioners or members of the Commission's technical and legal staffs.

Persons or organizations desiring to appear and testify will notify the Commission of such intention on or before February 1, 1940. In such notification the number of witnesses that will appear, the topic each will discuss and the time expected to be occupied by each witness should be stated. This information is necessary in order to more effectively organize the hearing.

If it is intended to submit written statements, drawings, etc., in connection with the testimony to be given, it is required that ten copies of the same be submitted to the Commission on or before February 23, 1940.

The Commission directed that this notice be published in the Federal Register.

Dated at Washington, D. C., December 27, 1939.

FEDERAL COMMUNICATIONS COMMISSION.

T. J. Slowie,
Secretary.

FEDERAL TRADE COMMISSION REPORTS ON BROADCAST ADVERTISING

False and misleading advertising matter as published in newspapers, magazines, catalogues, and almanacs and as broadcast over the radio is surveyed and scrutinized by the Federal Trade Commission's Radio and Periodical Division. Discussing the radio phase in its annual report just made public the Commission says:

> *Radio advertising.*—The Commission, in its systematic review of advertising copy broadcast over the radio, issues calls to individual radio stations, generally at the rate of 4 times yearly for each station. However, the frequency of calls to individual broadcasters is varied from time to time, dependent principally upon transmittal power, the service radius or area of specific stations, and the advertising record of certain types of stations, as disclosed in analyses of previous advertising reviews.
>
> National and regional networks respond on a continuous weekly basis, submitting copies of commercial continuities for all programs wherein linked hook-ups are used involving two or more affiliated or member stations.
>
> Producers of electrical transcription recordings submit monthly returns of typed copies of the commercial portions of all recordings produced by them for radio broadcast. This material is supplemented by periodical reports from individual stations listing the programs of recorded commercial transcriptions and other essential data.
>
> The combined radio material received furnishes representative and specific information on the character of current broadcast advertising which is proving of great value in the efforts to prevent false and misleading representations.
>
> During the fiscal year ended June 30, 1939, the Commission received 626,293 copies of commercial radio broadcast continuities, amounting to 1,384,448 pages of typewritten script. These comprised 860,908 pages of individual station script and 523,540 pages of network script.
>
> The staff read and marked 643,796 commercial radio broadcast continuities, amounting to 1,384,353 pages of typewritten script. These comprised 492,540 pages of network script and 891,813 pages of individual station script. An average of 4,539 pages of radio script were read each working day. From this material 29,143 commercial broadcasts were marked for further study as containing representations that might be false or misleading. The 29,143 questioned commercial continuities provided current specimens for check with existing advertising cases as to their compliance with actions, stipulations, and orders of the Commission, in addition to forming the bases for prospective cases which may not have previously been set aside for investigation.
>
> *Cooperation of radio and publishing industries.*—In general, the Commission has received the helpful cooperation of nationwide and regional networks, and transcription producers, in addition to that of some 616 active commercial radio stations, 457 newspaper publishers, and 533 publishers of magazines and farm journals, and has observed an interested desire on the part of such broadcasters and publishers to aid in the elimination of false, misleading, and deceptive advertising.
>
> *Source of Radio and Periodical Division's cases.*—Examination of current newspaper, magazine, radio, and direct mail order house advertising, in the manner described, has provided the basis for 75 percent of the cases handled by the Commission through its Radio and Periodical Division during the fiscal year ended June 30, 1939. Information received from other sources or referred from other divisions of the Commission, and from other Government agencies, formed the basis of the remainder of this work.

HEARING ON TELEVISION RULES

The FCC has adopted, with minor modifications, the rules recommended in the Second Report of the Television Committee, made public in November.

The Commission set the matter of the proposed rules down for public hearing at the office of the Commission at 10 a. m., Monday, January 15.

All interested parties desiring to be heard should give proper notice to the Commission not later than January 10. Each party is requested to cite the specific rules or other specific recommendations of the Committee to which exception will be taken, and list the witnesses desiring to be heard, and estimate the amount of time desired for such participation.

The rules:

Part 4. Visual Broadcast Service

Sec.
4.61 Defined

Television Broadcast Stations

4.71 Defined
4.72 Licensing requirements, necessary showing
4.73 Operation
4.74 Frequency assignment
4.75 Power
4.76 Supplemental report with renewal application

Facsimile Broadcast Stations

4.91 Defined
4.92 Licening requirements
4.93 Charges prohibited; restrictions
4.94 Frequency assignment
4.95 Power
4.96 Supplemental report with renewal application

Sec. 4.61. *Defined.* The term "visual broadcast service" means a service rendered by stations broadcasting images for general public reception. There are two general classes of stations recognized in the visual broadcast service, namely; television broadcast stations and facsimile broadcast stations.

Sec. 4.71. *Defined.* The term "television broadcast station" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public. The transmission of the synchronized sound (aural broadcast) is considered an essential phase of television broadcast and one license will authorize both visual and aural broadcast as herein set forth.

(a) There shall be two types of experimental television stations, namely, "Experimental Research Stations" and "Experimental Program Stations" which shall be known as Class I and Class II stations, respectively.

Sec. 4.72. *Licensing requirements, necessary showing.*

(a) A license for a television Class I station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation in the technical phases of television broadcasting, not requiring a service directly to the public, which indicates reasonable promise of substantial contribution to the development of the television art.
2. That the program of research and experimentation will be conducted by qualified personnel.
3. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
4. That the public interest, convenience and/or necessity will be served through the operation of the proposed station.

(b) A license for a Class II station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of experimentation in the television broadcast service including scheduled programs which indicates reasonable promise of substantial contribution to the advancement of television broadcasting as a service to the public.
2. That the program of experimentation will be conducted by qualified personnel.

* 3. That a minimum scheduled program service of five hours per week will be maintained throughout the license period.

4. That program material is available and will be utilized by the applicant in rendering broadcast service to the public.
5. That the applicant will install and operate adequate transmitting and studio equipment to render a satisfactory service to the public within the designated service area and with the television transmission standards recognized by the Commission for Class II television stations.

**6. That the operation with respect to fidelity of transmission, spurious omissions, carrier noise, safety provisions, etc., will be in accordance with the standards of good engineering practice applicable to television broadcasting stations in all phases not otherwise specifically included in these regulations.

7. That operation as proposed by the application will not result in objectionable interference to any other Class II station as determined by the standards of allocation applicable to television broadcast stations.
8. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
9. That the public interest, convenience and/or necessity will be served through the operation of the proposed station.

Sec. 4.73. *Operation:* Class I and Class II stations: Charges:

(a) No charges either direct or indirect shall be made for either the production or transmission of either aural or visual programs by Class I television stations;

(b) No charges either direct or indirect shall be made for the transmission of either aural or visual programs by Class II television stations; however, Class II television broadcast stations may make charges to cover cost of program production, including advertising material, which programs may be transmitted as an experimental program service but without charge for such transmission;

(c) Quarterly reports shall be made to the Commission by Class II television broadcast stations of the charges and costs as well as of other pertinent information which may be of assistance to the Commission in evaluating the economic feasibility of television broadcasting as a regular service to the public on a commercial basis.

(d) The offering by any person of the facilities of any television broadcast station on a regular commercial basis is prohibited. The limited commercialization permitted under subsection (b) above shall not take precedence over the experimental service, but shall in fact be subordinated to it.

Class I Stations: Scope of Experimentation, Limitations and Restrictions:

(e) Class I stations shall operate to conduct research and experimentation for the development of the television broadcast art in its technical phases but shall not operate to render regularly scheduled broadcast service to the public.

(f) Class I stations will not be required to adhere to the television transmission standards recognized by the Commission for Class II television stations.

(g) No Class I station shall operate when interference would be caused by such operation to the regularly scheduled broadcast service of a Class II station.

Class II Stations: Scope of Experimentation; Service Requirements:

(h) Class II stations shall operate to render scheduled television broadcast service for public consumption, and in connection therewith may carry out experiments with respect to program technique, determine power and antenna requirements for satisfactory broadcast service and perform all research and experimentation necessary for the advancement of television broadcasting as a service to the public.

(i) Class II stations shall operate in accordance with the television transmission standards (scanning, synchronization, etc.) which the Commission recognizes for this class of station. The Commission will recognize a modification in these standards upon a showing by the applicant proposing the changes that it will be in the public interest to require all Class II stations to adopt the proposed changes.

(j) Class II stations shall make all equipment changes necessary for rendering the external transmitter performance required by the Commission.

(k) Class II stations shall maintain a minimum scheduled program service of five hours per week throughout the license period. (The Commission may modify this minimum schedule in accordance with the showing on the merits in individual cases.)

(l) In case of failure of a Class II station to render its minimum of scheduled program service per week, the renewal of the license therefor may be refused unless it be shown that the failure of program service was due to causes beyond the control of the licensee.

---

* This provision modified Section 4.4 as it applies to Class II television broadcast stations.

** The specifications for operation deemed necessary to meet the requirements of good engineering practice as applied to television stations will be published from time to time. These specifications will be altered as the art progresses and upon a showing being made that such changes are desirable in the public interest.

Sec. 4.74. *Frequency assignment.* (a) The following groups of channels are allocated for assignment to television broadcast stations licensed experimentally:

Group A

Channel #1	44,000- 50,000 kc.
2	50,000- 56,000
3	66,000- 72,000
4	78,000- 84,000
5	84,000- 90,000
6	96,000-102,000
7	102,000-108,000

Group B

Channel #8	156,000-162,000 kc.
9	162,000-168,000[1]
10	180,000-186,000
11	186,000-192,000
12	204,000-210,000
13	210,000-216,000[1]
14	234,000-240,000
15	240,000-246,000
16	258,000-264,000
17	264,000-270,000[1]
18	282,000-288,000
19	288,000-294,000

Group C

Any 6000 kc. band above 300,000 kc.
excluding band 400,000 to 401,000 kc.

(b) Each Class II television broadcast station will be assigned only one channel from Groups A or B. Class I television stations may be assigned one or more channels as the program of experimentation requires. Both aural and visual carriers with side bands for modulation are authorized but no emission shall result outside the authorized channel. The assignment of a channel to a Class II television broadcast station does not preclude the use of that channel by Class I stations although the Class II television station has priority for the use of the channel for scheduled program service.

(c) Groups B and C may be assigned to television stations to serve auxiliary purposes such as television relay stations and developmental mobile service. No mobile or portable station will be licensed for the purpose of transmitting television programs to the public directly.

(d) The assignment of frequency channels in Group (A) for Class II television broadcast stations will be limited as follows:[*]

Cities whose metropolitan districts exceed 1,000,000 population	3 channels
Cities whose metropolitan districts are not less than 500,000 population or more than 1,000,000 population	2 channels
Cities whose metropolitan districts are less than 500,000 population	1 channel

(e) A license for only one Class II television station on a channel in Group A will be granted to a person to serve in whole or substantial part the same service area.

(f) No Class II television broadcast station will be assigned a channel in Group A for time sharing operation unless it is shown that the service proposed can not be rendered on a channel in Group B.

Sec. 4.75. *Power.*

(a) The operating power of a Class I station shall not be in excess of that necessary to carry forward the program of research.

(b) The operating power of a Class II station shall not be in excess of that necessary to provide adequate service to the service area designated for the station.

Sec. 4.76. *Supplemental report with renewal application.*

A supplemental report shall be filed with and made a part of each application for renewal of license and shall include comprehensive reports on the following:

(a) *For Class I Television Broadcast Stations.*

1. Number of hours operated.
2. Full data on research and experimentation conducted.
3. Conclusions, tentative and final.
4. Program for further developments of the television broadcast service.
5. All developments and major changes in equipment.
6. Any other pertinent developments.

(b) *For Class II Television Broadcast Stations.*

1. Number of hours operated during which programs were transmitted classified as studio performances, special events (with appropriate description), films, etc.
2. Studio equipment used and any developments made during the license period.
3. Progress made in the advancement of television broadcasting as a service to the public.
4. Itemized financial data on cost of operation during the license period.
5. Field intensity measurements and visual and aural observation to determine the service area of the station (required for first report only and whenever changes are made which would tend to cause a change in the service area.)

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The Federal Communications Commission has adopted a final order granting the application of WJBO, **Baton Rouge, La.,** to increase its power to 1000 watts, unlimited time. No exceptions were filed when the proposed findings of fact and conclusions were issued by the Commission.

The Commission has also granted the application of WAPO, **Chattanooga, Tennessee,** to change the station's assignment from **1420 kilocycles,** 100 watts night and 250 watts day, until LS, unlimited time, to **1120 kilocycles,** 500 watts night and 1000 watts day, unlimited time, employing a directional antenna at night.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The following hearings are scheduled before the Commission in broadcast cases for the week beginning Monday, January 1. They are subject to change.

Wednesday, January 3

Further Hearing

NEW—Burlington Broadcasting Co., Burlington, Iowa.—C. P., **1310 kc.,** 100 watts, unlimited time.

NEW—Clinton Broadcasting Corp., Clinton, Iowa.—C. P., 1310 **kc.,** 100 watts, 250 watts LS, unlimited time.

Further Hearing Before Commissioner Thad H. Brown.

WSAL—Frank M. Stearns, Salisbury, Md.—In re: Revocation of Station License of WSAL.

---

[1] See Secs. 4.4(c) and 4.154(a).

[*] This limitation upon the use of the channels for metropolitan districts having different populations can be departed from, providing the applicant shows that no other metropolitan district would be restricted to fewer channels than provided for by the table.

FUTURE HEARINGS

During the week the Commission has announced the following tentative dates for broadcast hearings. They are subject to change.

February 5

NEW—Springfield Radio Service, Inc., Springfield, Ohio.—C. P., **780 kc.**, 250 watts, daytime.

February 26

NEW—William F. Huffman, Wisconsin Rapids, Wisc.—C. P., **1310 kc.**, 100 watts, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KBIX, Muskegon, Okla.; KEEN, Seattle; KFRO, Longview, Texas; KGIW, Alamosa, Colo.; KNOW, Austin, Texas; KPAB, Laredo, Texas; WAGF, Dothan, Ala.; WBLK, Clarksburg, W. Va.; WCBM, Baltimore, Md.; WPAR, Parkersburg, W. Va.; WHMA, Anniston, Ala.; WKBV, Richmond, Ind.; WMIN, St. Paul, Minn.; WPRA, Mayaguez, P. R.; WTMV, E. St. Louis, Ill.

Licenses for the following stations were extended upon a temporary basis only, for a period of one month from January 1 to February 1, 1940, pending determination upon application for renewal:

KGFI, Brownsville, Texas; KRE, Berkeley, Cal.; KTEM, Temple, Texas; WKAT, Miami Beach, Fla.; WMSD, Muscle Shoals City, Ala.; WPRP, Ponce, P. R.; WSVS, Buffalo, N. Y.; WTMC, Ocala, Fla.

WTOL—The Community Broadcasting Co., Toledo, Ohio.—Present license further extended on a temporary basis only, for a period of one month, from January 1 to February 1, 1940, pending determination upon application for renewal.

WGIL—Galesburg Broadcasting Co., Galesburg, Ill.—Present license extended upon a temporary basis only, for the period January 1 to March 1, 1940, pending receipt of and determination upon application for renewal.

MISCELLANEOUS

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Denied special temporary authority to operate from local sunset (December 5:00 p. m., EST), on December 24, 1939, to 2:00 a. m., EST, on December 25, 1939, and from local sunset on December 31, 1939, to 1:00 a. m., EST, on January 1, 1940, in order to broadcast programs as described in letter dated December 5, 1939.

WJJD—WJJD, Inc., Chicago, Ill.—Denied special temporary authority to operate from 8:00 p. m. to 9:30 p. m., CST, on January 6, 8, 13, 15, 20 and 27, 1940, in order to broadcast basketball games only.

WEAU—Central Broadcasting Co., Eau Claire, Wisc.—Granted special temporary authority to operate from 11:15 p. m., CST, December 24, 1939 to 2:00 a. m., CST, December 25, 1939, in order to broadcast the Christmas Eve services of the St. Patrick's Cathedral of Eau Claire.

WNYC—City of New York Municipal Broadcasting System, New York City.—Granted special temporary authority to operate from 8:00 p. m. to 11:00 p. m., EST, Wednesday, December 20, 1939, in order to broadcast emergency program for Finnish Relief.

W3XAD—RCA Manufacturing Co., Inc., New York, N. Y.—Granted special temporary authority to operate transmitter of television broadcast (experimental) station W3XAD on television bands 18 and 19 frequency **282** and **294 mc.**, for the period December 20, 1939, to not later than January 16, 1940.

KFDY—So. Dak. State College, Brookings, S. Dak.—Granted special temporary authority to remain silent on December 25 and January 1, in order to observe holidays.

WDMJ—The Lake Superior Broadcasting Co., Marquette, Mich.—Granted special temporary authority to operate from 1:30 to 4:30 p. m., CST, on December 25, in order to broadcast special Christmas program.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 9 to 11 a. m., 1 to 3 p. m. and 8 to 10 p. m., EST, on December 25 and January 1, in order to broadcast holiday programs (provided WOSU remains silent).

The Commission granted the application of the Midland National Life Insurance Company, Watertown, South Dakota, for a construction permit to erect a new station to operate on the frequency **1210 kc.**, with 250 watts power, unlimited time.

WLOK—The Fort Industry Co., Lima, Ohio.—Granted special temporary authority to operate from 7:30 p. m. to 8:30 p. m., EST, on December 22, 1939, in order to broadcast the mass singing of Christmas Carols in the Lima Public Square.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.; and WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan and Bostwick, St. Albans, Vt.—Issued subpoena and subpoenas to appear and produce papers in re applications for renewal of licenses scheduled to be heard on January 16 and 17, 1940. (Docket Nos. 5430 and 5788.)

WBNS—WBNS, Inc., Columbus, Ohio.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Sec. 3.54, for both main and auxiliary transmitters, with certain additional power specifications.

WCLS—WCLS, Inc., Joliet, Ill.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Sec. 3.54, with certain additional power specifications. Also granted license to cover construction permit for change in equipment and antenna, and move of transmitter; **1310 kc.**, 100 watts, specified hours.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 to 3 p. m., CST, January 2, 3, 4, 9, 10, 11, 16, 17, 30 and 31, 1940, and from 3 to 3:30 p. m., CST, January 15, 22 and 29, 1940, in order to broadcast special educational programs (provided station KGGF remains silent).

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to operate from 7:15 to 9:15 p. m., CST, January 18, 23 and 25, 1940, and from 8:15 to 9:15 p. m., CST, on January 24, 1940, so that WNAD may remain silent during final examinations (provided WNAD remains silent).

KWEW—W. E. Whitmore, Hobbs, N. Mex.—Granted special temporary authority to operate simultaneously with station KBST from 8 p. m. to 9 p. m., MST, on December 28, 1939, in order to broadcast a speech of Governor John E. Miles.

KPAC—Port Arthur College, Port Arthur, Tex.—Granted special temporary authority to operate from 11 p. m., December 24, 1939, to 1 a. m., December 25, 1939, CST, with power of 100 watts, in order to broadcast a Christmas Eve Carol Program direct from the Methodist Church.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Granted special temporary authority to operate with power of 5000 watts from 12 midnight to 1 a. m. on the morning of December 25, 1939, in order to bring the services of the Secred Heart Catholic Church to regular daytime audience.

KGEK—Elmer G. Beehler, Sterling, Colo.—Granted special temporary authority to operate from 1:30 p. m. to 5 p. m., MST, December 25, 1939, in order to broadcast the extra Christmas program.

Joe W. Engel, Chattanooga, Tenn.—Granted petition for order to take depositions in re application for new station to operate on **1370 kc.**, 250 watts, unlimited time.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted petition to accept amendment to application for construction permit to change night power to 5 KW; applicant also desires change in frequency from **1350 kc.** to **630 kc.**, operating with 5 KW LS, unlimited time.

Chilton Radio Corp., Dallas, Tex.—Granted petition to accept amendment to allow application to remain on hearing docket, requesting reduction in power from 250 watts to 100 watts on frequency **1370 kc.**, unlimited time.

Valley Broadcasting Co., West Point, Ga.—Granted authority to take depositions in re application for a new station to operate on **1310 kc.**, 250 watts, unlimited time, a hearing on which is scheduled for February 12, 1940.

Lookout Mountain Co. of Georgia. Lookout Mountain, Ga.—Granted petition to intervene in the hearing in re the application of Joe W. Engel for a new station in Chattanooga, Tenn., to operate on **1370 kc.**, 250 watts, unlimited time; denied petition insofar as it requests continuance of hearing on Engel application now scheduled for January 15, 1940.

Lookout Mountain Co. of Georgia. Lookout Mountain. Ga.—Granted petition to accept amendment to application for construction permit to request 250 watts instead of 100 watts night, 250 watts local sunset. operating on **1370 kc.**; and change transmitter from near Roseville to near Chattanooga.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Adopted final order (No. B-82), effective December 23, 1939, granting the application for construction permit to increase power from 500 watts to 1 KW, unlimited time; frequency **1120 kc.** (Docket No. 4908).

WAPO—W. A. Patterson, Chattanooga, Tenn.—Adopted final order (No. B-82), effective December 23, 1939, granting the application for construction permit to change station's assignment from **1420 kc.**, 100 watts night, 250 watts day until local sunset, unlimited time, to **1120 kc.**, 500 watts power at night and 1 KW day, on an unlimited time basis. employing a directional antenna at night, subject to proof of performance in accordance with Section 3.33(b) of the Rules Governing Standard Broadcast Stations, and upon the condition that during directional operation of the antenna, the inverse distance field in the directions indicated shall not exceed the values specified (Docket No. 4909).

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Denied special temporary authority to operate from local sunset (December, 5:00 p. m., EST) December 24. 1939, to 2:00 a. m. on December 25. 1939, or to the conclusion of Christmas Eve Midnight Mass and from local sunset December 31, 1939, to 1:00 a. m. on January 1. 1940, in order to broadcast appropriate Christmas and New Year's programs as set forth in letter dated December 21, 1939.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Granted special temporary authority to operate from 8:30 p. m., EST, December 24, 1939, to 1:00 a. m., EST. December 25, 1939, in order to broadcast special Christmas programs.

WEJJ—National Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate relay broadcast station WEJJ as a sound channel on 30-40 megacycle band in conjunction with experimental television station W3XAD for the period December 26, 1939, to January 16, 1940.

United Air Lines Transport Corp., Washington. D. C.—Granted special temporary authority to operate already licensed aircraft radio transmitter aboard plane owned by United Air Lines Transport Corp. (call letters KHAZT), as a sound channel in connection with NBC television demonstration from aircraft on December 26, with alternate days December 27 and 28.

APPLICATIONS FILED AT FCC

580 Kilocycles

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night, using directional antenna night.

630 Kilocycles

NEW—R. E. Troxler, High Point, N. C.—Construction permit for a new broadcast station to be operated on **630 kc.**, 500 watts, daytime (Section 15c).

780 Kilocycles

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Modification of license to change frequency from **780 kc.** to **1370 kc.** and hours from daytime to unlimited. using 250 watts power.

890 Kilocycles

WJAR—The Outlet Company, Providence, R. I.—Authority to determine operating power by direct measurement of antenna power.

1140 Kilocycles

WAPI—Alabama Polytechnic Institute, University of Alabama College (Board of Control of Radio Broadcast Station WAPI), Birmingham, Ala.—Construction permit to install new transmitter, directional antenna for day and night use; change frequency from **1140 kc.** to **1050 kc.**; increase power from 5 to 50 KW, hours from simultaneous day, share KVOO night, to unlimited time; and move transmitter. Amended to request directional antenna night, non-directional day.

1150 Kilocycles

NEW—Hobart Stephenson, Milton Edge and Edgar J. Korsmeyer. d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—Construction permit for a new broadcast station to be operated on **1370 kc.**, 250 watts, unlimited. Amended to change frequency from **1370 kc.** to **1150 kc.**, hours to daytime, and make antenna changes.

1160 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Construction permit to make changes in equipment, install directional antenna for day and night use, increase power from 10 to 50 KW and change hours from simultaneous day, share night with WWVA to unlimited. Amended: antenna changes.

1210 Kilocycles

KHBG—Okmulgee Broadcasting Corp., Okmulgee, Okla.—License to cover construction permit (B3-P-2605) for changes in equipment, increase in power and changes in hours of operation.

NEW—Palm Radio Co., Fort Myers, Fla.—Construction permit for a new broadcast station to be operated on **1210 kc.**, 250 watts, unlimited time. Amended to request facilities of WFTM.

WTMA—Y. W. Scarborough and J. W. Orvin, d/b as Atlantic Coast B/C Co., Charleston, S. C.—Authority to determine operating power by direct measurement of antenna power.

1290 Kilocycles

WNEL—Juan Piza, San Juan, Puerto Rico.—Authority to determine operating power by direct measurement of antenna power.

1310 Kilocycles

KUIN—Southern Oregon Broadcasting Co., Grants Pass, Ore.—License to cover construction permit (B5-P-2245) as modified for a new station.

KUIN—Southern Oregon Broadcasting Co., Grants Pass. Ore.—Authority to determine operating power by direct measurement of antenna power.

WGTM—WGTM, Inc., Wilson, N. C.—License to cover construction permit (B3-P-2569) for changes in equipment and increase in power.

1370 Kilocycles

KFGQ—Boone Biblical Colege, Boone, Iowa.—Modification of license to request additional specified hours of operation. Wednesday 4 p. m. to 5 p. m. and Sunday, 7:30 p. m. to 8:30 p. m. and 11 p. m. to 12 midnight. CST.

NEW—Birney Imes, Columbus, Miss.—Construction permit for a new broadcast station on **1370 kc.**, 250 watts, unlimited time.

1390 Kilocycles

WHK—United Broadcasting Co., Cleveland, Ohio.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night, using directional antenna night.

1420 Kilocycles

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Modification of construction permit (B1-P-2446) for new station requesting approval of transmitter and studio sites at 42 S. Market St., Poughkeepsie, N. Y., approval of antenna and change type of transmitter.

WPAD—Paducah Broadcasting Co., Inc., Paducah. Ky.—License to cover construction permit (B2-P-2630) for installation of new transmitter.

KWAL—Chester Howarth and Clarence Berger, Wallace, Idaho.—License to cover construction permit (B5-P-1967) as modified for a new broadcast station.

1500 Kilocycles

KYCA—Southwest B/C Co., Prescott, Ariz.—Modified construction permit (B5-P-865) for new station, requesting change in transmitter site from 1.9 miles from center business district to E. Gurley St., and studio from 129 N. Cortez St. to E. Gurley St., Prescott, Ariz., install new transmitter, antenna changes, increase power from 100 watts night, 250 watts day to 250 watts day and night and extend commencement date to 30 days after grant and completion date to 180 days thereafter.

KOTN—Universal B/C Corp., Pine Bluff, Ark.—Construction permit to make changes in transmitting equipment and increase in power from 100 watts to 250 watts.

NEW—Albert Joseph Meyer, Powell, Wyo.—Construction permit for a new broadcast station to be operated on **1500 kc.**, 250 watts, unlimited time. Amended to give studio site to be determined, Powell, Wyo.

NEW—E. W. Williams, Corbin, Ky.—Construction permit for a new broadcast station to be operated on **1500 kc.**, 100 watts, unlimited time. Amended to specify transmitter site as approximately 1 mile from center of business district, Corbin, Ky.

MISCELLANEOUS

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of license to correct description of transmitter in accordance with new type and serial numbers recently adopted.

WRCA—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of license to correct description of transmitter in accordance with new type and serial numbers recently adopted.

KRLH—Clarence Scharbauer, Midland, Texas.—Authority to determine operating power by direct measurement of antenna power.

WAVB—Vee Bee Corp., Portable-Mobile.—License to cover construction permit (B2-PRY-117) as modified for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Air Conditioning Textiles, Inc.—A complaint has been issued against Air Conditioning Textiles, Inc., 1441 Broadway, New York, sellers and distributors of toilet preparations, charging misrepresentation. The respondent's products include a toilet soap designated variously as "Air Conditioning the Human Body" soap and as "Air Conditioning" soap.

In advertisements and by means of circulars and other printed matter, the respondent corporation allegedly represents that its products "definitely reduce body temperature", "reduce humidity by evaporation", and "eliminate perspiration objections".

Use of the term "Air Conditioning", the complaint continues, as descriptive of respondent's soap product, has the tendency to mislead purchasers into the mistaken belief that to some extent the principle of air conditioning has in some manner been incorporated into the soap and that it possesses properties contributing to human comfort not possessed by ordinary soaps. The respondent's soap possesses perfume and menthol in less than 3 per cent, but, the complaint alleges, it has no properties different from ordinary soap. (3974)

Argo Pen-Pencil Company, Inc.—See Park Row Pen Company.

Bowers Battery Mfg. Co., Inc.—See Reading Batteries, Inc.

Park Row Pen Company—Harry Sachnoff, trading as Park Row Pen Company, and Argo Pen-Pencil Company, Inc., alleged to be dominated by him, both of 220 Broadway, New York, are charged in a complaint with misrepresentation in the sale and distribution of fountain pens.

The complaint alleges that the respondents have caused to be stamped upon certain types of pen points which are used in fountain pens and combination pen-pencils, sold and distributed by them, the words "Durium, 14K gold plated, No. 8", and "Warranted Duripoint, Made in U. S. A." The complaint alleges that these pen points are made of chromium or stainless steel alloy, thinly electroplated with gold. Through the use of gold electroplating and also the designations "14K" or "14 Kt" stamped conspicuously on some of the pen points, the respondents allegedly represent directly that the points are in fact made of solid 14-carat gold, and use of the word "Durium" conveys the impression that pen points are made with some special alloy or are tipped with some special substance of unusual quality which gives them a writing quality and durability not found in other pen points. There is no metal or substance known to science or industry as "Durium", according to the complaint.

The respondents also allegedly furnish a "Life-Time Guarantee" with their pens, as follows:

> "This certifies that this Reservoir Pen is Guaranteed by us to be in perfect working order and absolutely free from any defects.
>
> "In the event of any dissatisfaction, return this Certificate with your pen, and 25¢ in stamps to us and we will adjust same or give you a new one. It is important that you return all parts of the pen sent for repair, as we will not supply new parts unless the old parts accompany the repair.
>
> "This guarantee does not cover careless or violent handling and consequent breakage."

This is in no sense a genuine lifetime guarantee, the complaint continues, as it is in fact a device whereby a defective fountain pen or combination pen-pencil may be used to sell another fountain pen or combination pen-pencil at the regular selling price or more, or as a means for selling some insignificant repair part for the price of a whole new fountain pen or pen-pencil. In order to exercise the so-called "lifetime guarantee", purchasers must pay the respondents 25 cents, which is more than the price at which the respondents sell the fountain pens or combination pen-pencils to dealers in the regular course of business. (3975)

Perrine Quality Products Corp.—See Reading Batteries, Inc.

Price Battery Corporation—See Reading Batteries, Inc.

Reading Batteries, Inc., Temple, Pa.; Bowers Battery Manufacturing Company, Inc., 629 Franklin St., Reading, Pa.; Royal Battery Corporation, Jersey Ave., New Brunswick, N. J.; Price Battery Corporation, Trenton Ave. and Ontario St., Philadelphia, and Perrine Quality Products Corporation, Waltham, Mass., have been named respondents in a complaint charging them with acts and practices constituting unfair methods of competition.

The respondents, according to the complaint, have been engaged, at their respective places of business, in the manufacture of automobile storage batteries in the low-price field. The number of storage batteries manufactured and sold by them since 1932 constituted a substantial proportion of all low-price batteries manufactured and sold in the northern and eastern portions of the United States.

The complaint charges that about August, 1937, the respondents, for the purpose of eliminating competition among themselves as to prices, discounts, terms and conditions of sale, entered into and since carried out by means of an informal association, an agreement, combination, understanding and conspiracy among themselves by which they have fixed and maintained minimum prices and uniform discounts, terms and conditions of sale for their products. The complaint also alleges that they have held meetings from time to time at which information concerning prices and terms and prospective territories and customers has been exchanged; have agreed among themselves not to deviate from these terms, and have allocated territories and prospective customers.

These acts and practices, the complaint continues, have hindered and prevented competition, and placed in respondents the power to control and enhance prices, and created in them a monopoly in the sale of lower-price automobile storage batteries in the northern and eastern portion of the United States. (3978)

Royal Battery Corporation—See Reading Batteries, Inc.

STIPULATIONS

During the past week the Commission entered into the following stipulations:

Crown Webbing Company—Charles Leitner, trading as Crown Webbing Company, 714 Broadway, New York, has agreed to cease and desist from representing on his letterheads or in trade literature or otherwise, that he is a manufacturer of elastic braids and webbings, or representing that the elastic braids and webbings sold by him are made in a plant owned or controlled by him, when such is not the fact. (2613)

Walter W. George, conducting an advertising agency at 150 Nassau St., New York, which disseminated advertisements for a tissue builder designated "Jane Cook's Wonder Tissue Creme" on behalf of Jane Cook Method, Los Angeles, will cease representing, directly or by implication in the dissemination of advertising, that such a cream will increase the size of the bust or that it will correct a flat chest, flabby or sagging bust, scrawny neck, or an underweight condition. He further agrees to cease disseminating any advertisements representing that the product is in fact a "tissue" cream, either by the inclusion of that word in the name for the product, or otherwise. (02476)

Theo. A. Kochs Company, 659 North Wells St., Chicago, in connection with the sale of its products, agrees to desist from using, directly or indirectly, the word "Chrometal" or words of similar meaning, to designate furniture or other equipment or merchandise sold by it, unless the metal of which such article is made is composed throughout of chromium or of an alloy of chromium and other metal in proportions entitling it to be properly represented and referred to as chrome metal, as understood by the trade and the purchasing public. (2614)

Physical Culture Studio—Raymond F. Biggin, doing business under the trade name Physical Culture Studio, 116 Church Road, Foxcroft, Philadelphia, engaged in selling a booklet prescribing a course of treatment for hair and scalp designated "Healthy Hair", agrees to cease and desist from representing that the "Healthy Hair" course of treatment employs a principle used by those skilled in physical culture; that the treatment, under that or other names, will feed starved or poisoned hair roots; remove poisons from hair roots, or restore new beauty and vigor to hair; that the treatment produces results when all other methods have failed, stimulates dormant circulation of the scalp, or removes incrustations and other strictures which prevent hair from growing properly. He also agrees to desist from representing that the treatment is a new or scientific discovery, is a way to avoid the risk of baldness, and that results are guaranteed. (02477)

Standard Auto Seat Cover Company—Charles A. Greenspan, trading as Standard Auto Seat Cover Company, 4147 Chestnut St., Philadelphia, in connection with the sale and distribution of auto seat covers or other merchandise, has agreed to cease and desist from representing in any way that he is the manufacturer of the goods sold by him, when he neither owns nor controls the plant or factory in which such goods are made. (2618)

Sta-Wel Belt Company—J. J. McSherry, Jr., and Dorothy Shepard, trading as The Sta-Wel Belt Co., 18 East 53d St., New York, have agreed to cease representing that an abdominal belt or binder designated "Sta-Wel Belt", or any other binder of similar design or construction, prevents seasickness and other travel sickness for all persons who use it, or that it is a "nerve control" belt, or in any other manner that it controls the nerves or inhibits nerve impulses. (02474)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Milton K. Altschul, Inc.—See Fruit & Produce Exchange.

Association of American Arts, Inc.—Four individuals formerly connected with the Association of American Arts, Inc., now dissolved, and all having had their place of business at 486 Boylston St., Boston, and operating under various trade names, have been ordered to cease and desist from misrepresentations in connection with the advertising, sale and distribution of colored or tinted photographs, enlargements having a photographic base, and frames therefor.

Individuals named as respondents are H. E. Bernie or Bernstein, otherwise known as Harry Burney or H. E. Burney; J. A. Bernie or Bernstein, otherwise known as Jack A. Burney or Jacob Bernstein; Eli Litcofsky, otherwise known as A. Davis or Alfred Davis, and Edward Ziman.

Findings of the Commission are that these respondents and their agents and representatives visited prospective customers in various States, and made various false and misleading representations.

The respondents were ordered to cease and desist from representing, through any corporate or other device, including any trade name, that colored or tinted pictures or enlargements are hand-painted or are paintings; from using the terms "pastel" or "painting" to describe photographic enlargements; from misrepresenting the actual cost of production of pictures; from representing that respondents are conducting any special or advertising campaign, unless such campaign is in fact being conducted; that any portrait will be placed on exhibition in studios or other places of display, and other similar representations; from concealing from any customers that finished pictures, when delivered, will be so shaped and designed that they can be used only in a specially-designed, odd style of frame which can be obtained from respondents only; and from retaining the original photograph loaned to the respondents for use in making a picture, unless all the terms and conditions upon which the original photograph is to be retained in connection with the purchase, are fully and adequately revealed to the purchaser at the time the photograph is obtained from him. (3409)

Bay Company—See Johnson & Johnson.

B & T Floor Company, a corporation, Columbus, Ohio, has been ordered to cease certain misrepresentations in the sale and distribution of extruded aluminum alloy trimmings and metal products designated "Chromedge".

The respondent, in catalogs, folders and other advertising matter circulated throughout the country, was found to have represented, among other things:

> "Chromedge, the brilliant solid white metal for trimming wall and floor covering materials, manufactured only by the B & T Floor Company, Columbus, Ohio."

* * * *

> "Metal. Chromedge is not a plated metal, Chromedge is manufactured from a special white metal alloy in which we have incorporated chromium, magnesium, silicon, iron, copper, etc., in such a way that it will accept and retain a brilliant, lustrous polish. Its ductility is of such a nature that it may be easily bent to fit curves and angles."

Findings of the Commission are that "Chromedge" is not a metal of superior quality having the attributes of chromium, but is, in fact, extruded aluminum alloy containing approximately 98 per cent aluminum and .20 to .30 per cent chromium.

The respondent purchases practically all its alloy, which it sells under the trade name "Chromedge", from the Aluminum Company of America, and the same alloy is sold by the Aluminum Company of America to numerous competitors of the respondent.

The Commission orders that the respondent cease and desist from representing, by use of the word "Chromedge" or similar word or words, that its extruded aluminum alloy, or any other metal not composed principally of chromium is chromium; or that "Chromedge" has the attributes of chromium or is superior in quality to extruded aluminum; that competitors' extruded aluminum alloy products are inferior to those sold under the name "Chromedge"; and, by use of the words "Manufactured only by" or words of similar import, that the respondent is the manufacturer of any product it sells, unless it actually owns or controls a manufacturing plant where the products so represented are manufactured by it. (3541)

Chase & Company—See Fruit & Produce Exchange.

Dearborn Sales Company—See Reliable Sales Company.

Fruit & Produce Exchange—Prohibiting violation of the brokerage section of the Robinson-Patman Act, an order to cease and desist has been issued against Jake Felt, trading as The Fruit and Produce Exchange, Linden Station, Memphis, Tenn., and against the following concerns which sell produce, foodstuffs and allied products to Felt: Milton K. Altschul, Inc., 264 Wholesale Terminal Building, Los Angeles; San Pat Vegetable Company, Sinton, Tex.; A. O. Kolberg, McAllen, Tex.; Albert Miller & Co., 308 West Washington St., Chicago, and Chase & Co., Sanford, Fla.

The respondent selling companies were found to be fairly representative of a large group of sellers of produce, foodstuffs and allied products which they sell to the respondent Felt and other purchasers. Such commodities, when received by the respondent, are stored in a warehouse used jointly by Jake Felt, trading as The Fruit and Produce Exchange, and by M. E. Carter & Co., of Memphis, a wholesale corporation, 84 per cent of the outstanding stock of which is owned by Felt, who is its president and a member of its board of directors, and conducts its affairs.

Findings are that the seller respondents and other sellers had paid and delivered to the respondent Felt, trading as The Fruit and Produce Exchange, so-called brokerage fees or commissions which were a certain percentage of the quoted sales prices agreed upon between each of the sellers and the respondent, or were flat commissions agreed upon between each of such sellers and Felt. It was also found that he had received and accepted such fees or commissions on commodities resold by him, under the name of The Fruit and Produce Exchange, to wholesale dealers, and on commodities resold by M. E. Carter & Co., to retail dealers, and that in connection with these transactions, the respondent Felt was the sole party at interest and neither he, trading as The Fruit and Produce Exchange, nor M. E. Carter & Co., which he controlled, rendered any services to the sellers.

It was found that in all the transactions with the sellers, the respondent Felt acted in his own interest and as a representative of M. E. Carter & Co., and that any benefits which may have accured to the seller respondents or other sellers were solely incidental to buying services performed by M. E. Carter & Co.

The Commission dismissed its complaint in this proceeding as to M. E. Carter & Co., because the record did not disclose that any brokerage or allowances in lieu thereof had been paid to that firm.

The Commission order directs the five produce concerns and their officers, representatives and employees to discontinue paying Jake Felt, individually, trading as The Fruit and Produce Exchange, or under any other name, any fee or commission as brokerage or any allowance in lieu thereof upon the purchases made by the respondent Felt without services being rendered therefor by Felt. (3765)

Gravitonic Life Ray Corporation, Inc., and Fred W. Reed, individually and as president of the corporation, St. Petersburg, Fla., have been ordered to cease and desist from misrepresentations in the sale and distribution of an electrical apparatus manufactured by the corporation and designated "Gravitonic Life Ray".

In newspapers, magazines, pamphlets and other advertising matter the respondents were found to have represented, among other things:

"The Gravitonic Life Ray now presented to the public is a wonderful discovery which promises to revolutionize the present methods of making examinations, and the treatment of practically all human ills. As the name implies this discovery is based upon the forces of gravity, the tonic of the air, and the vibrational impulses thereof in the ether surrounding the earth. All life is, or is affected by vibrations and these vibrations in the ether both build and destroy life. The Gravitonic Life Ray is the summation of all the rays which produce and support life. The Gamma Rays and all other rays which tend to destroy life, have been screened out."

* * * *

. . . "Sleeping sickness victims have been aroused, patients blinded by tic-douloureux have had sight restored, tuberculosis, stomach and gall bladder troubles have been relieved and cured; diseases of the kidneys overcome, arthritis victims relieved and cured, gland disorders corrected, likewise diabetes, tumors, prostate trouble, colds, dizziness, anemia, cancer, chronic indigestion, acute appendicitis, catarrh, colitis, dyspepsia, nervousness, spinal trouble, high blood pressure, tonsilitis, and mastoid and ear trouble have been relieved and cured."

Findings of the Commission are that these statements are misleading and untrue, and that the respondents' device is worthless and of no use in the diagnosis, cure or treatment of disease, and that it is not a discovery and will not revolutionize methods of making examinations or the treatment of practically all human ills.

The respondents are ordered to cease and desist from representing that the device is a scientific discovery or based upon any scientific foundation; that it will locate the cause or trouble of any disease; that it will cure any of the ailments or diseases named in the advertisements, or that its use will have any beneficial effect upon the human system or any beneficial value in the treatment of any disease or condition of the human body. (3451)

Johnson & Johnson, New Brunswick, N. J., The Kendall Company, Walpole, Mass., and The Bay Company, Bridgeport, Conn., have been ordered to cease and desist from unfair competitive methods in the sale of medical supplies such as gauze, bandages, bandage rolls, cotton sponges, napkins, pads, adhesives and similar products.

The Kendall Company now sells, and for more than five years, has sold through two of its subsidiary corporations, Bauer & Black, and Lewis Manufacturing Company.

Since 1933, the Commission finds the respondents have manufactured and sold 85 per cent of all such products manufactured and sold in the United States. Prior to September, 1933, the three companies were in competition with one another as to prices, according to the findings. At that time, for the purpose of eliminating price competition among themselves, the respondents entered into and have since carried out an agreement to fix and maintain uniform prices, have maintained their published prices; have communicated to one another proposed changes in the prices of the products prior to release to the trade of notice of such proposed changes, and have agreed among themselves to divide the United States into zones, for which zones they have, by agreement, fixed and maintained uniform prices for their products.

The respondents had admitted all material allegations set forth in the complaint, which were the facts found by the Commission, and had waived all intervening procedure.

The Commission ordered the respondents to cease and desist from entering into or carrying out any conspiracy, combination or undertaking to fix and maintain uniform prices in the sale of gauze, bandages, bandage rolls, cotton sponges, napkins, pads, adhesives and similar products to any and all classes and kinds of buyers; from agreeing to communicate to one another changes in prices prior to release to the trade of notice of such changes; from agreeing to maintain, and maintaining, pursuant to any such agreement, published price lists, and from agreeing to divide and dividing the United States into zones, and, with respect to such zones, fixing and maintaining uniform prices for their products. (3393)

Johnson's Lixolene Company—John C. Johnson, trading as Johnson's Lixolene Company, 4028 Hill Crest Drive, San Diego, Calif., has been ordered to cease and desist from misrepresentations in connection with the sale and distribution of "Johnson's Lixolene," a medicinal preparation recommended for the treatment of eczema and other diseases of the skin.

Findings of the Commission are that the respondent disseminated advertisements of its product in the Untied States mails and by continuity broadcast from radio stations. In its broadcasts it represented, among other things:

> "This radio address is given by Dr. J. C. Johnson, the author of Johnson's Lixolene, 'The Safe Skin Remedy,' for the benefit of those who are interested in knowing of this new remedy which is offered in the drug stores for the relief of even the most chronic cases of eczemas. This is our third time to broadcast over this station, spreading the news about the therapeutic value of Lixolene in giving complete relief from the causes of all parasitic infections of the skin."

The Commission finds that "Johnson's Lixolene" consists essentially of a solution of salicylic acid in a diluted mixture of alcohols, together with a small amount of boric acid and a trace of methyl salicylate, and that it is neither a skin remedy nor a powerful germicide.

The respondent is ordered to cease and desist from representing that use of his preparation is a remedy or cure for eczema, acne, psoriasis, dandruff, poison ivy, seborrhea or alopecia, or has any thearpeutic value in excess of temporarily relieving the symptom of itching by reason of its mildly antiseptic and counter-irritant properties; that the preparation is a germicide; that all eczemas and other diseases of the skin are caused by parasitic infection; that the proper treatment for eczema or other skin ailments is in all cases the local application of a germicide, and that respondnent is a physician or a medical doctor, or that he has any recognized standing or reputation as a dermatologist or chemist. (3887)

Kendall Company—See Johnson & Johnson.

Albert Miller & Company—See Fruit & Produce Exchange.

National Numbering Machine Co., Inc.—Price discriminations in violation of the Robinson-Patman Act are prohibited under an order to cease and desist issued against National Numbering Machine Company, Inc., 1 Beekman St., New York.

Findings are that the respondent company sold to the American Woodtype Manufacturing Company, New York, dealer in typographic numbering machines, 100 machines at a net price of $6 each, and that about the same time it sold to the American company's competitor, Craftsman Machinery Company, Boston, 300 machines of like grade and quality at a net price of $5 a machine. The Craftsman company, it was found, resold a substantial number of the machines so purchased, at a net price of $7.50 and $8.50 for the five-wheel and six-wheel types, respectively.

The respondent was also found to have sold for resale machines of like grade and quality in quantities of five or less, to various other companies or individuals competitively engaged one with another, at net prices varying from $6 to $8 a machine.

The different prices were found to constitute discriminations in price between purchasers of the respondent's typographic numbering machines.

The order directs the respondent to cease discriminating in price, either directly or indirectly, between the Boston and the New York companies named.

The order also prohibits discrimination in price, wherever any of the sales are in interstate commerce, between different purchasers competitively engaged in the resale of the respondent's typographic numbering machines by means of price differences substantially similar to those set forth above, unless the difference between the prices paid by such purchasers make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which the machines are sold or delivered. (3889)

Nutrine Candy Company, 419 West Erie St., Chicago, has been ordered to discontinue certain price discriminations in violation of the Robinson-Patman Act and the sale and distribution of candy by means of lottery methods in violation of the Federal Trade Commission Act.

This company, according to findings, sells a small line of fancy candies packed in boxes, but specializes in the sale and distribution of bulk candy directly to retailers in Wisconsin, Minnesota, Nebraska, Oklahoma, Arkansas, Tennessee, Michigan, Iowa, Indiana, Kansas, Missouri, Ohio, Kentucky, West Virginia and Western Pennsylvania.

Findings are that the respondent company maintains four separate price schedules under each of which all of its bulk candies are listed. These schedules of prices are identified by the symbols "ES" ("Eastern Syndicate" accounts), "NS" ("National Syndicate" accounts), "SS" ("Small Syndicate" accounts), and "SR" ("Small Retail" accounts) and the price for candy of like grade and quality varies according to the schedules. The "ES" schedule carries the lowest and the "SR" schedule the highest price per pound for candy of like grade and quality.

It was found that the respondent permitted its salesmen to sell items to a customer from one schedule and other items purchased by the same customer at the same time from another schedule.

This method was found to have resulted in the respondent's selling to different purchasers, competitors one with the other, candy of like grade, quality and quantity at varying prices. These price differentials were found to range from a low of $.0075 a pound to a high of $.04⅞ a pound, depending on the brand of candy so sold and purchased.

The effect of these selling methods was found to be a substantial lessening of competition between competing retailers purchasing under the high and low classifications, and a tendency to concentrate in the more favored retailers the retail sales of the respondent's products and to eliminate the bulk candy business of the less favored retailers.

Concluding that nothing appeared in the record to justify these price discriminations, the Commission ordered the Nutrine Candy Company to cease and desist from such practices or engaging in similar discriminations under like conditions.

The order also prohibits the distribution of candy so assembled that sales may be made by means of lottery devices, and the supplying of lottery devices to dealers for use in selling such candy to the consuming public. (3756)

Ransom Electric Company—Ben Ransom, trading as Ransom Electric Company, 211 Second Avenue North, Nashville, Tenn., has been ordered to cease and desist from misrepresentations in the sale and distribution of incandescent electric lamp bulbs.

The Commission finds that the respondent is engaged in importing incandescent electric lamp bulbs manufactured in Japan, and printed or marked with the words "Made in Japan". Before selling such bulbs the respondent buffed off, or otherwise removed, the words "Made in Japan". The bulbs then were placed in cartons upon which were printed the words "Made in U. S. A.", "Lednew Lamps", or "The Lednew Corporation".

The respondent also purchased for resale, the findings continue, certain electric lamp bulbs manufactured under the trade name "The Elite Lamp Service", and in advertising matter, circulars and pamphlets distributed in connection with their sale, represented: "All the E. L. S. lamps are made in conformity with the specifications of the U. S. Bureau of Standards." The Commission finds that this representation is misleading and deceptive as the United States Bureau of Standards has not adopted or promulgated any specifications for incandescent electric lamp bulbs with which the respondent's bulbs could conform.

The respondent is ordered to cease and desist from representing that lamp bulbs imported from Japan, or any other foreign country, are made or manufactured in the United States; from representing, through names of purported manufacturers placed on the cartons or containers in which bulbs are offered, that they are manufactured or made by any one other than the real manufacturer thereof, and from representing that bulbs offered for sale and sold by him conform to specifications of the United States Bureau of Standards. (3905)

Reliable Sales Company—Yale I. Glubok, trading as Reliable Sales Company, 5244 Enright Ave., St. Louis, and Sam Luber, trading as Dearborn Sales Company, 711 South Dearborn St., Chicago, have been ordered to cease and desist from use of lottery methods in the sale and distribution of their merchandise to ultimate consumers.

Reliable Sales Company, engaged in the sale and distribution of various articles of merchandise, including blankets, bedspreads, silk hose, clocks, and other novelties, mailed push cards and order blanks from its place of business to members of the public in various States, the Commission finds, and prizes in the shape of merchandise were awarded to certain purchasers by means of lottery methods.

Dearborn Sales Company, selling and distributing radios, coffee sets, and other merchandise, also distributed to the purchasing public devices commonly known as pull cards, with certain literature, instructions and order blanks through which merchandise was to be sold to ultimate purchasers by means of lottery methods.

The respondent companies were ordered by the Commission to cease and desist from supplying or placing in the hands of others push or pull cards, punch boards and other lottery devices so as to enable such persons to dispose of or sell any merchandise by lottery methods. (3278 and 3870)

San Pat Vegetable Company—See Fruit & Produce Exchange.

Shanks Laboratories—W. H. Shanks, W. J. Goggin, Clara Shanks and Jessie G. Goggin, trading as Shanks Laboratories, Columbus, Ohio, have been ordered to cease and desist from misrepresentations in connection with the sale and distribution of a medicinal preparation designated "Shanks Mange Lotion".

In circulars and other advertising matter distributed throughout various States, the Commission finds, the respondents have represented, among other things: "I have been successful in compounding a preparation to be used in the treatment of mange, eczema, cuts, sores, abscesses, etc. that over a period of 20 years * * * it has never failed to effect a rapid clearing up of all forms of skin diseases. . . ."

The Commission finds that the preparation is not a cure or remedy or a competent or effective treatment for diseases or disorders of the skin on dogs or human beings, which diseases or disorders are due to or persist because of a systemic disorder or condition.

The respondents are ordered to cease and desist from representing that "Shanks Mange Lotion" is a cure or competent treatment for eczema, abscesses, cuts or sores, or for athlete's foot or dandruff; or that the preparation is in all cases a competent treatment for itching scalp on human beings or mange on dogs or will cause hair to grow on bald spots. (3860)

Zo-Ak Company, Inc., whose principal place of business is located at 56 West 45th St., New York, has been ordered to cease and desist from misrepresentations in connection with the sale and distribution of certain medical or pharmaceutical preparations designated as "Zo-Ak Tablets" (blue label), or "Zo-Ak for Men," and "Zo-Ak Tablets" (orange label), or "Zo-Ak for Women."

The Commission finds that the respondent represented that its preparation for men is a competent remedy or treatment for sexual debility and a stimulant for reduced virile powers, and that its tablets for women constitute a remedy or relief from the nervous symptoms due to "change of life".

Findings are that the preparation for men is not a competent remedy or treatment for sexual debility, and contains a dangerous ingredient. The recommended dosage for respondent's preparation is greatly in excess of the therapeutic dosage, and such tablets taken under conditions prescribed by respondent and under the conditions which are customary or usual may be injurious to the health of users.

The Zo-Ak Company, Inc., and its officers, agents or representatives are ordered to cease and desist from disseminating, by means of the United States mails or in commerce, any advertisement for the purpose of inducing the purchase of "Zo-Ak Tablets" representing that "Zo-Ak for Men" is a competent remedy for sexual debility or that it contains quick-acting vegetable stimulants plus essential vitamin concentrates in adequate amounts to build up health and strength, or which advertisement fails to reveal to purchasers or prospective purchasers that use of the preparations under conditions prescribed may cause injury to health, or represents that "Zo-Ak for Women" is a remedy for or affords relief from the nervous symptoms due to "change of life". (3724)

FTC CLOSES CASES

The Federal Trade Commission has closed its case against Parker-McCrory Manufacturing Company, 2609 Walnut St., Kansas City, Mo., manufacturer and distributor of radio sets and parts and mechanical devices, it appearing that the respondent company has agreed to discontinue the misleading representations alleged and to abide by the rules of fair trade practice for the radio receiving set manufacturing industry, promulgated by the Commission July 22, 1939.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.

The Commission has also closed without prejudice its case against Piel Brothers Starch Company, Indianapolis, which was charged with price discrimination in violation of the Robinson-Patman Act in the sale of corn products. The case was closed without prejudice because it appeared that voluntary liquidation of the respondent corporation is in process.
